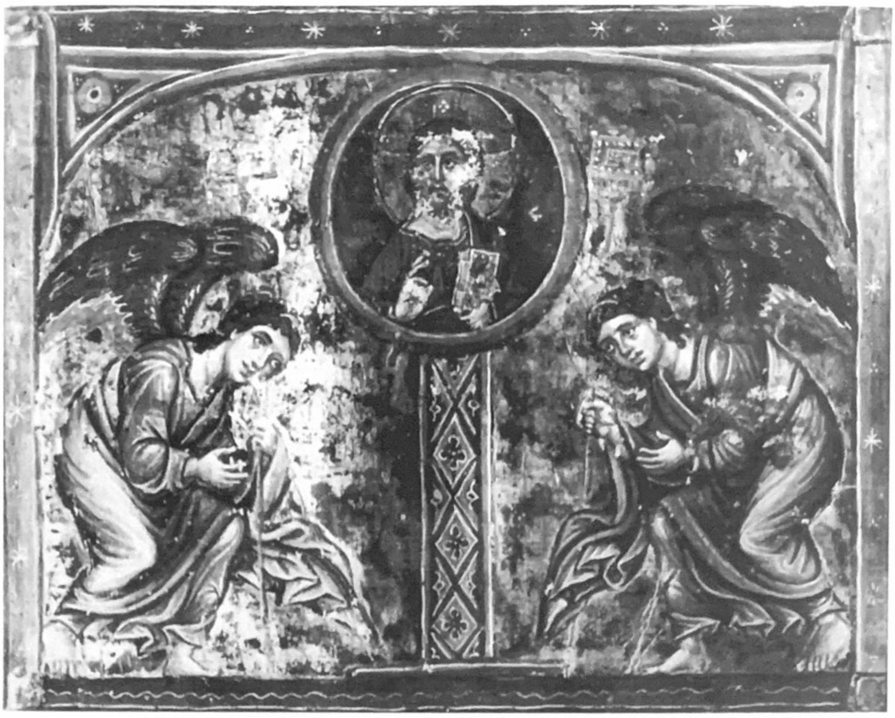
THE PERUGIA MISSAL, *C.*1250 (FIGS. 149–151, CD NOS. 72–79): There is in the Biblioteca Capitolare in Perugia a liturgical manuscript, which because of its calendar and because of its painted decoration has particular importance for our understanding of artistic developments in Acre in the mid-thirteenth century. Now designated as MS 6, this codex is a large missal in Latin written by a French scribe, with two panel miniatures, one of which actually contains a historiated initial "T" for the start of the Canon of the Mass, and four other regular historiated initials.[536] The calendar is notable because of several features. First, there is at 12 July a commemoration of the "dedicatio ecclesie Acconensis," with an octave on 19 July for this dedication. This seems clearly to be a reference to the retaking of the city of Acre by the Crusaders on 12 July 1191 and a rededication of the Cathedral of the Holy Cross. It is an important reference because it provides a clear liturgical link between this manuscript and the city of Acre, where we interpret the codex to have been done and where this codex was intended to be used, presumably in that church. Second, the characteristic entries found in earlier manuscripts made for Jerusalem use are mostly lacking in this calendar, which places further emphasis



150. The Perugia Missal, fol. 183r, (T)e igitur..., (headpiece), Christ between two worshipping angels. (photo by courtesy of the Biblioteca Capitolare, Perugia)

on the references to the "ecclesie Acconensis." Some other notable new entries that are found include a commemoration for St. Francis on his feast day, October 4, and one for St. Dominic on 5 August. These two entries are slightly later insertions, that is, done by a different hand, but very soon after the basic calendar was prepared. This seems to accord with the idea that the manuscript was intended for the use of the cathedral, that is, not for either the Franciscan or Dominican houses in Acre, and that these entries were added to the main calendar shortly afterward, to bring it up-to-date as it were. It is also interesting that the Feast of the Purification of the Virgin on 2 February, is now referred to here as the "Ypapanti domini," as it is also in the Riccardiana Psalter, using the Byzantine term for this commemoration of the Latin Purification of the Virgin, but citing it in Latin.[537]

As mentioned earlier, the scribe who wrote the calendar and the text of this missal appears to be French, but the painters who decorated the book have been the source of some discussion. Buchthal astutely identified the work of at least two separate painters in this codex, one who did the two panel miniatures, including a full-page miniature of the Crucifixion. The other painter executed the four historiated initials and the major decorated initials.[538] When Buchthal published this manuscript in 1957, he used as his primary comparison for the Crucifixion, the Ryerson Diptych, a pair of panels he attributed to a Venetian painter, now in the Art Institute of Chicago[539] (Appendix no. 130, Figs. 412, 413). His claim however that "the closest parallel for the illustration of the Crucifixion... both stylistically and iconographically" is this panel painting is no longer valid and must be reconsidered.

In fact the closest iconographical parallels to this Crucifixion can be seen to be a Crucifixion in another missal, Egerton MS 3153, now in London, which Buchthal knew and discussed[540] (Fig. 153), and an icon painting in the collection of

152. Icon: Sinai, App. no. 104/1732, Panel with the Crucifixion, surrounded by the busts of holy figures. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

St. Catherine's at Mount Sinai, first published by Weitzmann in 1963, about which Buchthal did not know in 1957[541] (Fig. 152). The closest stylistic parallel to this Crucifixion and especially to the closely related headpiece with the historiated "T" decorated with a medallion of Christ worshipped by two bowing angels, is a work Buchthal also did not know in 1957. It is a fresco painting discovered in Istanbul in 1967, in a chapel with scenes of the life of St. Francis, apparently done in Constantinople during the period of the Latin Empire.[542] Significantly for our understanding of painting in Acre at this time, both of the painters working in the Perugia Missal can also be seen to be closely related to the master of the Arsenal Bible and to other works done in Acre about this time. Detailed consideration of these points can help us to better understand the new developments in painting in Acre.

Buchthal's stylistic distinction of hands is still useful and shows once again what a sharp eye for style he possessed. In the panel miniatures we see statuesque and expressive figures, with strong sculpturesque qualities. In contrast to the Arsenal Bible master, however, the first Perugia Missal painter employs substantial highlights, and there is strong use of light and dark shading to enhance the volumetric quality of these figures. Moreover, the skin tones are painted with greenish-gray shading and the feet have reddish outlines, both also characteristic of icon painting. In particular the draperies of the angels on both miniatures are complex and voluminous with vigorous white highlighting. We also notice agitated passages of drapery that float out from their arms ending in sharp points. The dynamic action of the angels in both panels is contrasted with the tranquility of the central figures of Christ in both cases, and in the Crucifixion Mary and John are standing quietly, lost in their grief, mainly expressed in their hand gestures and inclined heads. Overall the figures seem to have stocky proportions similar to those of the Arsenal Bible master, and there are similarities also in the repertory of decorative ornament in the border of the Crucifixion panel and the vertical stem of the "T" to the ornament of the Arsenal Bible frontispieces.[543] These similarities seem to be those associated with a common workshop tradition, however, and do not indicate the work of a single artist.

Besides the differences in the volumetric treatment of the figures and the use of highlights, the stronger indications of interest in Byzantine icon painting technique in the first Perugia painter's work is another distinguishing aspect. Also the characteristic treatment of the faces, although similar in design, shows smaller eyes with greater emphasis on a deeply shaded "glancing eye" treatment. We also note that only sometimes is the linear definition of the eye, with the linear extension of the eye along the side of the head, included, as with the standing Virgin in the Crucifixion panel. Here as elsewhere, however, the artist's interests are much more aimed at three-dimensional modeling and much less at the linear clarity of the Arsenal Bible master by comparison.

The second Perugia Missal artist was responsible for the smaller, more conventional historiated initials and the few decorated initials without figural designs. Again, as in the Arsenal Bible, these initials in the Perugia Missal are completely French, although there are some variations in design. By and large the figures in these initials are fleshy and thickset, with large heads and emphatic gestures. By contrast to the panel miniatures, the figural designs in the initials are somewhat simpler, much more linear in emphasis with less interest in volumetric quality or the use of highlights. This artist does not explore the use of light and dark shading to anything near the same degree. Thus, to paraphrase Buchthal, it is as if this French-trained artist is given more robust Crusader models to imitate – especially those of the first Perugia Missal painter and possibly also certain Arsenal Bible figures – which he translates into works that partake of this workshop style but are quite different in their linear simplicity.[544]

The problematic part of Buchthal's discussion derives from the fact that he links the style of the first Perugia Missal painter with that of the Ryerson Diptych and that of the second Perugia Missal painter with that of the Arsenal Bible.[545] In the first case, we can perhaps agree that the artist of the Ryerson Diptych is a Venetian-trained painter, but my argument is that he was a Venetian-trained Crusader artist working in Acre who was a follower of the Perugia Missal artist, not the source of inspiration for his work. By contrast, the first Perugia Missal painter was in fact French, not Venetian in background.[546] Indeed, as Weitzmann has argued, the likely iconographic model for the first Perugia Missal painter's Crucifixion panel is a panel painting – an icon painting – a purely Byzantine example, or a Crusader version based on a Byzantine model, or both. But the primary stylistic inspiration seems to have come from the workshop of a painter whose main extant production is in Constantinople, whom I discuss later. In the second case, this artist surely based his style on the first Perugia Missal artist in whose workshop he seems to have been employed, and also on the work of the Arsenal Bible master as part of the larger Acre workshop milieu. Consider the details of this proposal.

When Buchthal published the Crucifixion panel in the Perugia Missal in 1957, the best work available for comparison *was* the Ryerson Diptych, despite its differences in iconography and style. Now, however, clearly the work most closely related is the Crucifixion panel from Acre, a "Crusader" icon in St. Catherine's Monastery that Weitzmann published in 1963[547] (Fig. 152). Indeed it is instructive to examine all three Crucifixion examples cited by Weitzmann in his groundbreaking article: a purely Byzantine version,[548] the Crusader icon panel,[549] and the Perugia Missal miniature (Fig. 149). The dead Christ on the cross is similarly tranquil, even serene, in all three cases, but both the iconography and the style is notably different between the Byzantine and the two Crusader examples, and they are slightly different between the two Crusader examples as well. Jesus is nailed to the cross with the older convention of four nails in the Byzantine icon and on the Crusader icon, but the miniature has only three nails. The latter is a very recent development in the early thirteenth century, which is here no doubt part of the artist's French Gothic training.[550] The loincloth of Christ is transparent in the Byzantine example with a rolled knot closure at the waist. It is somewhat ambiguously opaque and partly transparent in the Crusader icon with a kind of double knot at the waist, but in the miniature it is clearly fully colored white with a single knot that is combined with a series of folds over the groin. Nonetheless the shape of the loincloth with the pointed fold on the left side is similar in the two Crusader examples – very different from the irregular circular hem profile found on the Byzantine icon – although the legs of Christ fill the cloth more fully in the Perugia image. The cross itself is substantial in all three examples,[551] but in the Byzantine icon the main beveled part of the cross piece is darkly shaded on its lower horizontal and right vertical part. For the two Crusader examples, however, the main beveled feature is lightly shaded on the upper part of the horizontal crosspiece and on the left vertical part. This handling of the beveled members seems to be a characteristic of Crusader panels that appear to have been done in this workshop. The golden, crossed haloes of Christ are all three rather distinctive. The Byzantine example shows the beautiful burnished version that emphasizes the radiance of light, whereas the two Crusader versions have the same matte gold as their backgrounds. In the case of the icon, it is a cross halo with white simulated pearls set in a red circular border – a typical halo type found in Crusader icon painting workshops. The miniature has an incised halo border only, occasionally used by Crusader icon painters – but not used by the Arsenal Bible master, who has painted borders only. All three Crucifixions have blood flowing from the wounds of Christ at the hands, feet, and side, but surprisingly it is the Byzantine icon with the more copious amounts.

In the case of the inscriptions, including that on the *titulus*, all three are again different. The Byzantine example has only "IC XC" in red on the *titulus*, with another inscription below designating the Crucifixion, both of which are in Greek, of course, and both of which may in fact be repainted. The Crusader icon has different inscriptions, but again, notably, they are all in Greek. The angels, Mary and John are identified, and then on the *titulus* between the letters "IC XC" are the Greek words "O BACILEVC THC DOXHC," "the king of glory," a very Byzantine choice and one which no doubt reflects the wishes of the patron who ordered this icon.[552] By contrast the Perugia miniature has no extant inscriptions, or at least nothing survives if any were originally included on the *titulus* or on the gold background. In the case of the Perugia Missal, of course, we know the patron must have been a Latin clergyman who ordered this Latin liturgical book, so that if any inscriptions had been intended, they would have been in Latin.

Stylistically the figure of Christ is more slender and elongated in the Byzantine icon, compared with the more volumetric, even sculpturesque Crusader versions. Furthermore the details of the anatomy are slightly different in all three, but the two Crusader examples share the round kneecaps and curved muscle line on the leg, as well as the small oval shape on the chest. The conventions for the muscles on the arms are, however, more similar in the Byzantine icon and the Perugia miniature, compared with the smoothly rounded forms of the Crusader icon. The loincloth folds in the two Crusader paintings are similar in the way they are drawn and in their volume.

Similar findings are also seen with the figures of Mary and John. On the Byzantine icon they stand in normal Byzantine poses with heads slightly inclined and restrained hand gestures, the Virgin holding out her right hand up toward Jesus and John holding his right hand to the side of his head. Both figures express a sorrow more internalized than outwardly expressive. In the two Crusader examples, however, not only are their poses more distinctive, with heads inclined more dramatically and with the right side of the Virgin's maphorion forming a sharp downward point, but their gestures are also more specific and complex. The Virgin has lowered her right hand but still holds it out in the Perugia miniature, whereas in the Crusader icon she allows it to be covered with her drapery. Otherwise, however, as Weitzmann points out, these main figures coincide to an astonishing degree.[553] Both Virgin figures share a distinctive gesture with her left hand, where she places her hand with raised thumb close to her nose and face as if on the verge of tears. John's sorrowful gesture of holding his right hand to his head is further emphasized by the placement of his little finger across his cheek toward his nose and leaning his head more heavily on this hand. His left hand is the same in both cases, held downward with the four fingers spread out. The colorism of Mary and John changes, however. In the Byzantine icon, their colors are, for the Virgin, a dark maroon maphorion with gold hems and red tassles, whereas John is in pastel gray and green. In the Crusader icon these colors are completely changed with the Virgin uniformly in very dark blue with yellowish highlights, apparently imitating Byzantine chrysography. John is in a very dark blue or maroon tunic with similar highlights, covered with a stunningly bright red cloak. In the Perugia miniature, the overall colorism is by contrast similar to the Arsenal Bible, both in terms of the French Gothic use of red and blue in the frame, and in the Virgin's blue and gray drapery, colors typical of the main figures in many of the frontispieces.

John's salmon cloak and blue tunic also have some parallels with figures in the frontispieces of the Arsenal Bible.

Stylistically, the figures of Mary and John are notable because in contrast to the thin, attenuated figures in the Byzantine icon, they are much more robust, monumental, and sculpturesque in the two Crusader paintings – somewhat more so in the Perugia panel than in the Crusader icon. John especially is turned more frontally, and so we see him in the breadth of his body. The heavy draperies that both figures wear are striking as are the highlighting and the use of light and shade. Although it can be said that all three paintings use some highlighting and employ light and shade, certainly the Perugia Missal painter uses them most agressively. Indeed, one sees the gray-green shading of the flesh tones in the Byzantine manner even more notably in the Perugia miniature than on the Byzantine icon. The Perugia painter seems to have studied and knows the main techniques of good Byzantine-style painting, or at least what these figures look like, including the red outlines seen on John's feet.

The three Crucifixions differ most perhaps in regard to the representations of the mourning angels. Whereas on the Byzantine icon the angels are tiny and their gestures are directed toward an expression of "behold the Crucified Lord," in the Crusader examples the angels are much larger and their gestures are different. In the Crusader icon the angels are violently mourning as expressed by their contorted bodies and by their hands held to their weeping faces. In the Perugia miniature, the angels are again larger and more active, but their hand gestures are more exclamatory and indicative. Weitzmann notes that the angels in the Crusader icon reflect an overall heightened emotional pitch, with a greater emphasis on the emotional content that reflects a Western-derived, Crusader temperament in contrast to the more controlled and modulated tenor of the Byzantine image. This observation holds true for the Perugia miniature as well, where the angels, although "somewhat different in type . . . nevertheless show the same emotional expressiveness and merely represent variants within the same mode."[554]

Weitzmann noted the distinctions discussed here, and his interpretation was that the Perugia miniature should be dated very slightly later than the Crusader icon, but still *c.*1250. He also suggested that these paintings might have been done in the same workshop, an issue I consider in more detail later. In the end, however, it is striking that although the two icons have certain features that link them more closely, in terms of the way they are painted, it is the Perugia miniature panel that shows the more painterly characteristics of Byzantine technique, an issue that raises the question of where the style of the first Perugia artist may come from. What seems clear is that it did not come directly from either of the icon painters that we have been discussing here, and certainly not from the Ryerson Diptych, which by contrast looks quite different and was apparently done later.[555] Nor can we locate the origins of the first Perugia artist's style in earlier products of the "Acre scriptorium." The Crucifixion of the Naples Missal, done much earlier, *c.*1200,[556] presents some of the basic iconography seen later, with four nails, the gestures of John,[557] and the mourning angels with handkerchiefs. The style of the Naples Missal painter is very different, with short stocky figures and less heightened emotional content.

There is also nothing else that we can identify at Sinai that fully corresponds to this style or that can be dated clearly to 1250. There is, however, a group of small panels that seem to have been part of a Great Deësis, which are worth mentioning here as possible evidence for the contemporary presence of the Franco-Byzantine style at Sinai. We have already seen panels identified as part of Great Deësis groups from Sinai that we have proposed to date in the 1230s, including bust-length images of Christ, interceding figures of the Virgin and St. John the Baptist, and pairs of archangels.[558] There are additional small panels of bust-length figures of Christ, the Virgin, and St. John that seem to be related to those earlier works, but appear on stylistic grounds to be more developed formally, and dating after the Mileševo and Studenica parallels noted above.[559] Compared with the earlier examples, these images are more linear in design, with greater use of highlights and strongly characterized faces. They also seem to be characterized by the boldly outlined eyes with pronounced definition that includes a strong linear extension back toward the side of the head. Their significance is that to some extent these panels exhibit a style that corresponds to an early version of the Franco-Byzantine Crusader style in Acre. At this point we cannot say whether they should be dated to the 1240s, to 1250, or to the 1250s, but they seem to show that this style existed in Sinai in various versions.

These various possibilities notwithstanding, the first Perugia painter's style seems to have its closest link not to the Arsenal Bible – although it is surely related in general workshop characteristics – nor to these possibly contemporary works from Sinai, but to the work of a remarkable painter who painted a small chapel in Constantinople about this time with a monumental figure of St. Francis and a cycle of scenes from his life. It is these fresco paintings that show the closest stylistic features in technique and form to the two large panel miniatures in the Perugia Missal. Consider the evidence.

The St. Francis Chapel in Constantinople: In 1967 C. L. Striker discovered a small chapel in the diaconicon complex of a Byzantine church that had been taken over by the Latins after the conquest of 1204. The chapel had originally been decorated with mosaics by the Byzantines, but the Latins introduced a program of frescoes largely obliterating the earlier work. This chapel was walled up when the church was later returned to Byzantine hands in 1261 and left in obscurity when it came under Muslim control in 1453 and was transformed into a mosque, the Kalenderhane Djami, as we know it today. This small chapel had been decorated during the Latin occupation with fresco painting, not in true fresco technique but *fresco al secco*. Fragmentary remains of the program of decoration were found, partly in situ and partly fallen, having flaked off the wall. This program is focused on a large standing figure of St. Francis flanked by scenes of his life. The fresco paintings were conserved between 1968 and 1972, and a montage was done by C. L. Striker with E. J. H. Hawkins between 1977 and 1979.[560] Out of a total of more than one thousand fragments, Striker and his team have been able to reassemble about 40 percent of the bits of fresco in their original position. A selection of the main figural fragments are now on display in the National Archaeological Museum in Istanbul.

The chapel itself is small, entered through a forebay 2.5 meters square. In front of the apse of the chapel is an arched vault 60 cm wide on which paired Greek Church Fathers were painted on the soffits of the arched surface.[561] Fragments of two of these figures remain enabling us to know that they were approximately 1.6 meters high, without their haloes. The painting surface of one of the fathers is continuous with that of the painted Latin inscription appearing adjacent to the arched vault on the front surface of the arch of the apse semidome. This demonstrates that these Byzantine figures were part of the chapel decoration. Enough of the Latin inscription survives to identify and reconstruct it as a ten-word passage from Psalm 25 (26): 8, "DOMINE DILEXI DECOREM DOMU *(s tuae et locum habitionis gloriae)* TUAE."[562] The apse of the chapel is 2.2 meters at its widest, 3.6 meters high at the crown of the semidome, and 2.2 meters deep from the front face of the semidome to the rear wall. There are three windows below the semidome, each one 80 cm wide and 1.6 meters high. The function of this chapel and its forebay is unclear, but the inscription suggests that it may have been used as a sacristy, that is, for the celebrants to prepare for the liturgy. In any case, the inscription is a famous verse, most frequently found in the *Lavabo* prayer, during which the priest cleanses his hands in preparation for the consecration in the canon of the Mass.

> Lavabo inter innocentes manus meas et circumdabo altare tuum, Domine, ut audiam vocem laudis, et enarrem universa mirabilia tua. Domine, dilexi decorem domus tuae, et locum habitationis gloriae tuae.[563]
>
> With the pure in heart I will wash my hands clean, and take my place among them at thy altar, Lord, listening there to the sound of thy praises, telling the story of all thy wonderful deeds. How well, Lord, I love thy house in its beauty, the place where thy own glory dwells.

The main decoration of this chapel is a program, the configuration of which appears to be similar to early altarpieces devoted to St. Francis, as seen in the examples from Pescia and Pisa.[564] In the center of the apse, the figure of St. Francis stood frontally with a large open book in his left hand. Essentially only the book, his hands, and a small passage of drapery at his waist survive. The red framed panel in which he stood is 1.1 meters × 35 cm wide at the top × 50 cm wide at the bottom. This means Francis was about half the size of the paired Church Fathers at the entrance to the chapel. Above St. Francis was a small lunette containing a bust-length Virgin in a maroon maphorion with white highlights. She holds the child tightly across his chest in an unByzantine manner, flanked by two bust-length angels, one on each side.

Flanking the figure of Francis were ten scenes of his life, five on each side. Fragments of seven of the ten scenes have been located into their original positions even though only three of these scenes can be precisely identified.[565] A number of significant fragments exist uncontextualized (mentioned later). The sizes of the scenes of the Life of St. Francis all vary according to their location in the semidome, but the rectangles that contain scenes two and three to the left of the main figures are estimated to be 49.7 × 44 cm, measured along their central axes. This means that the figures of the friars that appear in them are approximately 30 cm high, or about one-third the size of the central figure of St. Francis.

This fresco program is a major find and is significant for the following reasons. First, it is the earliest exant program in fresco painting devoted to St. Francis East or West, well before the paintings in the lower and upper church in Assisi, and the only such program in the Near East during the thirteenth century. Second, it is clearly done in Constantinople during the Latin Empire, sometime between 1228 and 1261. Third, the style of the extant fragments indicates that the workshop responsible for these frescoes contained both a Crusader painter, who did the St. Francis cycle, and a Byzantine painter, who did the Greek Church Fathers. What are the stylistic characteristics of the Crusader work?

C. L. Striker reports that "shortly after the discovery of the St. Francis frescoes in 1967, the late Hugo Buchthal happened to visit Istanbul, and he immediately identified the style of the frescos to be the same as the painter of the Paris Arsenal Bible." Striker continues, "the similarity between the Kalenderhane frescos and the Arsenal Bible, first recognized by Buchthal, is confirmed further by detailed comparison of the two works in such features as palette, modeling, gesture, costume, and treatment of landscape and architectural background."[566] At this point Striker offers a series of comparisons to demonstrate their relationship.

1. The treatment of the rocky outcropping behind the birds St. Francis preaches to in scene 5 can be compared with the landscapes in the Creation cycle of the Genesis frontispiece in the Arsenal Bible.
2. The craned-neck posture and gesture of the friar standing behind the crenellated wall in scene 2 is comparable to the scribe seated before Solomon in the Wisdom frontispiece, or a number of other figures, like King Saul in the frontispiece for I Kings.
3. The costume and headdress worn by the woman in the scene of St. Francis performing a healing miracle, scene 3, is similar to those worn by women in the Tobit and Job frontispieces.
4. The green and yellow striped garment worn by a female figure in two of the uncontextualized fresco fragments is strikingly comparable to the blue-green and yellow costume worn by Judith in the frontispiece to Judith of the Arsenal Bible.[567]

In addition to the comparisons with the Arsenal Bible, Striker also points to certain parallels with Crusader icon painting. He stated earlier, in 1982, that the frescoes are "very similar, on the one hand, to the paintings of the Paris Arsenal Bible, a relationship first observed by Hugo Buchthal, and on the other hand, to the wings of a Crusader triptych at the monastery of St. Catherine at Mt. Sinai published by Weitzmann."[568] This triptych, a major work done in Acre in the 1250s and first published by Weitzmann in 1963, has four scenes of the life of the Virgin on the inside surfaces of the two wings. Weitzmann proposed that the artist of these four scenes was "a French painter working in Acre" based on their style and iconography. He concluded that with regard to the Arsenal Bible and the Acre Triptych wings, "we are dealing with products of the same local tradition and that, therefore, our triptych is the product of a workshop in Acre and of approximately the same date as the Arsenal Bible, that is, around the middle of the thirteenth century. We would not even exclude the possibility that both miniatures and icons were actually produced in the very same workshop."[569] We will reconsider the issue of workshops in Acre below, but Striker adds the St. Francis painter to the same Crusader stylistic orbit by saying, "there is consensus that both the Arsenal Bible and the Sinai icon are French or of French heritage. Based on this, it is more likely that the St. Francis painter was of French heritage than that his origins were elsewhere."[570] Furthermore, he points out that while there is too little evidence to judge whether any of these works are by the same painter, "they [the Arsenal Bible and the St. Francis frescoes] are sufficiently close to suggest that both are the product of the same, probably small group of painters who produced, as called on, manuscript illumination, mural painting, and, to judge from the further similarity to these works of an icon at St. Catherine's Monastery on Mt. Sinai, panel paintings as well."[571]

By describing these painters as French, the authors I have cited all mean that we are dealing here with Crusader painters in Acre and Constantinople whose primary training may have been in the French Gothic tradition, but whose working style combined both French Gothic and Byzantine characteristics to form the unique Crusader style that we associate with Acre, and now with Constantinople, in the mid-thirteenth century. The question is, to which of these Crusader artists in Acre is the St. Francis painter most closely linked, and how can we understand the workshop organization in Acre in light of the claims that book painters, icon painters, and fresco painters were working there together?

As the story of painting in Acre unfolded between 1957 and 1982, we have seen that the primary representatives of the Franco-Byzantine Crusader style in Acre in the early 1250s were the Arsenal Bible and selected icons now at Mount Sinai, including the Crucifixion icon (App. no. 104/1732, Fig. 152) and the inner wings of the so-called Acre triptych (App. no. 66/753, Figs. 157–160). There is no doubt that the St. Francis painter is related to the Arsenal Bible and the Acre triptych wings as discussed earlier, and the specific examples given provide the evidence in terms of formal parallels. But now that we understand the French Gothic–Crusader background of the first Crusader painter of the Perugia Missal, it seems that in fact the closest links can be seen between him and the St. Francis painter in terms of technique, handling, and execution, as well as design. Consider the following points.

1. Whereas the pose and gesture of the friar in scene 2 of the fresco is indeed comparable to certain figures in the Arsenal Bible, the painterly execution of the figure is much closer to the bowing angels and figures of Christ, Mary, and John in the Perugia Missal. Notice the greenish-gray shading of the skin tones and the white highlighting on the faces. Compare in particular the friars in scenes 2 and 4 and the faces of some of the uncontextualized fresco fragments[572] with not only the faces of the various figures in the Perugia Missal panels, but also the beautifully modeled torso of the figure of Christ.
2. The handling of the convention for delineating the eyes is a major index for identifying the painters participating in the Acre style. This mode of painting the eyes and their relation to the face and head differs, however, according to the way it is carried out. Although the linear definition of the eyes can be seen in the fresco and in the miniatures with a linear extension back toward the side of the head in these figures, the emphasis is much more on the deeply shaded glancing eye and the three-dimensionality of the head, than on the rolling eyeballs and the somewhat pop-eyed look of the Arsenal Bible master. In fact, if anything, the Perugia Missal painter is slightly closer to the Arsenal Bible master in this respect than is the St. Francis painter. But both the St. Francis master and the first Perugia Missal artist are more interested in a sculpturesque, volumetric, instead of a decorative linear effect.
3. The design and painting of the hands and feet of the various figures in both the frescos and the Perugia missal panels are relevant *comparanda* as well, partly drawn to our attention by the prominence of the hands in scene 2 as well as some of the uncontextualized fresco fragments.[573] The feet of St. John and the bowing angels clearly show the red outlined handling also dimly seen in the frescoes in scene three. The fact is that this technique, which is characteristic of that employed in fresco and panel painting, is also adopted by the first Perugia Missal painter.
4. Another interesting minor comparison between the fresco painter and the Perugia Missal concerns the profile figure of the woman of Narnia, an uncontextualized fragment,[574] and the profile figure of the angel in the Resurrection initial by the second Perugia Missal painter.
5. The drapery of the Perugia Missal panels, which is such an important feature of these miniatures, is difficult to compare directly with the frescoes because of the accident of what survives. What is clear is that there is major interest in white highlighting in the frescoes, as seen in the Virgin and Child in the lunette, but most of the other examples have to do with the rather more simplified habits of the standing friars. Hence we do not see the same examples of dynamic poses and complex, voluminous draperies in the extant frescoes. There is a suggestion of swinging drapery folds with white highlights in the fragments of the green and yellow costume, or in the somewhat disjointed and headless figure of St. Francis among the uncontextualized fragments.[575]

In fact, however, a most interesting comparison for the drapery style of the first Perugia Missal painter is found in a Sinai icon of the Annunciation, as noted by H. Belting.[576] Here we see the vigorous pose of the striding angel who wears a light blue robe over a copper brown tunic with an intensive system of white highlights. We also note the flaring drapery dropping from his arm and coming to a point and the convention for delineation of the eyes typical of this Acre style. While this painter definitely does not paint figures as fleshy or substantial as those in the Perugia Missal panels, there can be no doubt that he is closely related to the first Perugia Missal painter. Furthermore, there can be no doubt that the painter of this Sinai icon is also working in the Franco-Byzantine Acre Crusader style, the style that Weitzmann noted is the most widespread among the Crusader icons now preserved in the Monastery of St. Catherine's on Mount Sinai.[577]

THE EGERTON MISSAL, C.1250S (FIG. 153, CD NO. 80): The final important comparison for the first Perugia Missal painter is with the artist of the Egerton Missal,[578] another participant in the Acre style of the 1250s. This is an interesting liturgical manuscript also written by a French scribe[579] that has been attributed to the patriarchate of William of Agen, that is, after

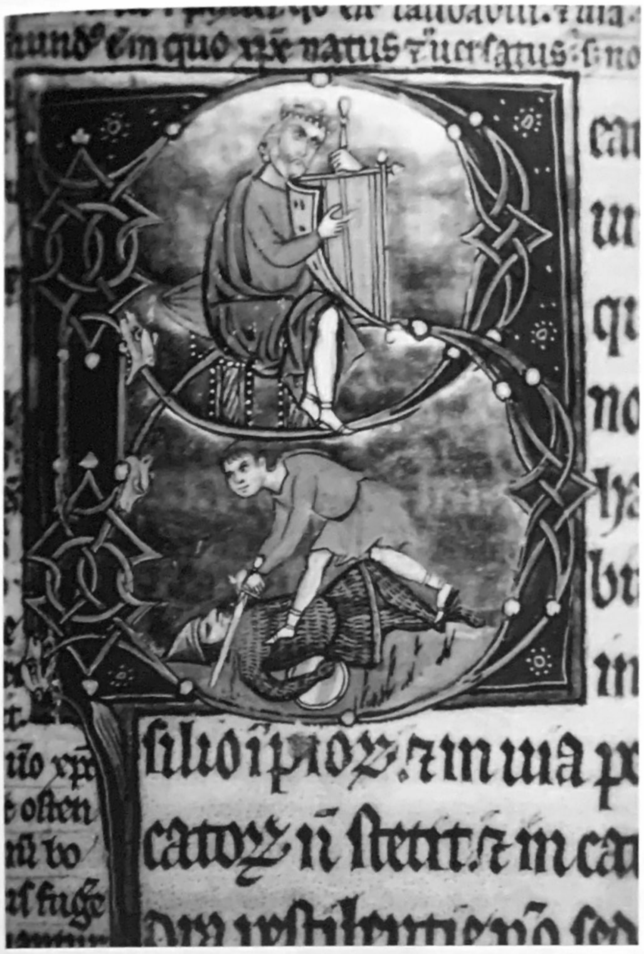
1262, but that I am dating on the basis of its style closer to mid-century.[580] Surprisingly, its calendar is unlike that in the Perugia Missal. It is much more closely related to the earlier Jerusalem calendars in various ways, not the least of which is the inclusion of the commemoration of the liberation of Jerusalem on 15 July, and the omission of the dedication of the "ecclesie Acconensis" on 12 July. Also its entries for the feast days of Sts. Dominic and Francis are much later additions, presumably done after the manuscript had left Acre. In all of these aspects, among others, the calendar is very different from that of the Perugia Missal. In light of this, it is perhaps surprising that the full-page Crucifixion miniature is closely linked to the example in the Perugia Missal, but certain decisive differences indicate that it is done by a different artist, probably slightly later than the Perugia Missal.

The Egerton Missal is badly damaged and the Crucifixion miniature is now conserved with a gauzelike substance over the folio to stabilize the painting, but we can see enough to make certain observations. The quality of the artist is hard to discern because the surface is abraded, but the style is less robust. Clearly the handling of the design produces more slender, less full-bodied figures than what we see in the Perugia Missal. Despite the surface abrasion there seems to be some indications the artist employed white highlights however. The Crusader style of the artist appears to be even more French in its palette with a pink and blue frame, and draperies that appear to be blue, gray, and pink. The figures of Mary and St. John seem to be copies of the Perugia Missal type figures in poses, gestures, facial types, eye delineations, and colorisms. Christ is quite slender with a voluminous loincloth. The folds are complex with a single knot at the waist; it is colored gray with white highlights and has a very emphatic pointed flair at the left side. Iconographically the cross resembles that in the Perugia panel the way it is shaded, but the fact is that the Egerton Christ is fixed to the cross with four nails demonstrates this artist was not necessarily copying the Perugia miniature, but perhaps one of the iconic versions. To the extent that we can see what remains of them, the angels above do resemble the angels on the Ryerson Diptych, but as we have already seen, the precise arrangements of each of these components is variable within this workshop tradition. What we can conclude is that the Egerton Missal painter is indeed a follower of the first Perugia Missal painter, another member of a large and very active group of painters that was working in Acre during and after Louis IX's residency there between May of 1250 and March of 1251. Furthermore, there is no reason to see any Italianate elements in the work of this painter. He is part of the Franco-Byzantine Crusader style, which apparently sprang into existence in response to the presence and the needs of Louis IX, his entourage and his army, and, after his departure, the continuing French presence in Acre in the persons of the members of the French regiment. I discuss the circumstances of the workshops in Acre in which this style is found later, after due consideration of other relevant examples of how this style developed.

We can conclude our consideration of the Perugia Missal with a look at what painting we can identify that is linked specifically to the second painter, who specialized in historiated initials. For this there is an important manscript in Padua, Biblioteca Capitolare (MS C.12), a book of Old Testament selections.[581] It is written in Latin and contains the Psalter, the books of Daniel, the minor prophets, and the Maccabees. It is decorated only with historiated initials; there are no panel miniatures.

THE PADUA BOOK OF OLD TESTAMENT SELECTIONS, *C.*1250S: (FIG. 154, CD NOS. 81–105): The Arsenal Bible notably omitted the Psalter and any books of the Prophets, and this book now in Padua is focused precisely on those books. This codex is, however, written in Latin, not Old French; it includes the Book of Maccabees, which the Arsenal Bible also contains, but the system of decoration in the Padua book is entirely different. The Padua book is also clearly done somewhat later than the Arsenal Bible and the Perugia Missal, but it is linked to their production by certain iconographic features. Moreover, if we doubted the impact of French Gothic manuscript illumination on the earlier Crusader painting in Acre even slightly, this manuscript will erase any lingering reservations.

The layout of the Padua codex, starting off with the eight-part Psalter, is typical of thirteenth-century French Psalters, and the historiated initials that begin each of its parts follow the typical French program that was studied so usefully by G. Haseloff.[582] As Buchthal points out,[583] the artist of the Padua codex mostly retains the basic French iconography and focuses on King David as the author of the Psalms in the traditional



154. The Padua Manuscript of Old Testament Selections, Bibl. Capitolare, MS C. 12: fol. 1v, The Psalter: (B)eatus vir . . . , (historiated initial) David plays the psaltery, David slays Goliath. (photo by courtesy of the Biblioteca Capitolare, Padua)

way. But the artist loses the iconographical precision of many of the scenes in the French cycle, or the English iconography in the one case of Psalm 68. No longer is the artist basing himself on a literal illustration of the first lines of the Psalm *ad verbum* but is instead following some kind of workshop model, or possibly even a set of rather generalized written instructions, in which the specific and direct link is often broken between text and image. The most egregious examples show the images losing contact with the meaning of the Psalter text and substituting a completely bland picture that functions in most cases merely as a textual illustration of David with other figures. In the case of Psalm 109, however, which in the French thirteenth-century tradition regularly presented an image of the Trinity, here there is the very rare image of Jesus with God the Father, omitting entirely the dove above them. The result is a series of scenes that mostly emphasize royalty in the person of King David, that show the participating figures in French costumes, some as monks or as clergy, and transform the Lord into Jesus Christ for the benefit of the Christian reader. What is also evident is that the style of the figures, although still showing a Crusader synthesis of Byzantine facial and head types with French Gothic linear design, is much more strongly French in flavor. This is conveyed not only by the Gothic style of the painted initials and their ornament, but also emphatically by the colorism of the initials and the costumes of the figures, in Gothic pink, blue, and red, along with some tans and browns.

Buchthal has called attention to the fact that the illustrations for the books of the prophets have the most explicit Byzantine figure and head types among the historiated intials in this codex.[584] This may be explained by the models the artist was using, but in the case of these historiations also, the models are mostly French. There is one exception, the scene of the angel speaking to Malachi (fol. 287r, CD no. 103), for which no exact French precedent is known.[585] There is also one of the prophet illustrations that is unfinished, the faces and flesh passages in the historiated initial for the Book of Micah (fol. 236v, CD no. 97). Here we can see, for example, how the artist designed the heads and faces, put in the basic shading, colored in the hair, but then failed to complete the face and head with the linear elements in reddish brown and brown or the white highlights that characterize the finished figures. What is also apparent, this oversight aside, is that it is in the faces of these figures in the prophet book initials that we find the use of the Acre type of eye delineation, the kind we have seen in earlier manuscripts such as the Arsenal Bible and the Perugia Missal. This convention is absent from the Psalter illustrations, but it reappears in the illustrated initials to the prophet books, not systematically, but recognizably as part of the artist's repertory of design.

The books of the Maccabees also follow standard French iconography from contemporary Bibles[586] (fols. 295r, 338r, CD nos. 104, 105). The style is consistent with the earlier twenty-one initials. The figures remind us both of the initials of the Perugia missal and purely French manuscripts such as the Moralized Bibles; and the colorism, design of the initials, and their ornament is purely French, but the Acre style eye convention is less consistent than with the prophet illustrations. These characteristics certainly identify the artist as different from the second painter of the Perugia Missal or the painter of the Egerton Missal, which has initials of a much more generic sort, not explicitly French. What we see is the assertion of French characteristics done after the Arsenal Bible and the Perugia Missal were done, possibly even long after Louis IX seems to have left Acre. The exact date is unknown, but may have been in the later 1250s, based on parallels with certain characteristics that we can see in the panel paintings to be considered later. Buchthal concludes his comments on the illustrations of the Padua codex by restating his findings on "the French origin of their iconography and the French basis of the style." Furthermore he says it is the interesting synthesis of certain Byzantine features with the French aspects of style and iconography that give "the scriptorium of Acre" its distinct character in the third quarter of the thirteenth century.[587] What, however, should we understand by "the scriptorium of Acre" in this period?

WORKSHOPS AND ARTISTS IN ACRE AND THE MONASTERY OF ST. CATHERINE'S ON MOUNT SINAI: MANUSCRIPT ILLUMINATION: So far our findings with regard to artistic developments in Acre around the year 1250 and in the years afterward are that we have numerous practitioners working on miniature and panel painting who combine French and Byzantine aspects into a distinctive Crusader style. What can we say about the workshop circumstances of these artists? Hugo Buchthal in effect began the discussion of this issue when he wrote the following:

> It is here always referred to as "the scriptorium of Acre," as its exact location still eludes us. The "ecclesia Acconensis," the consecration of which is recorded in the calendar of the Missal at Perugia, was probably the Cathedral of the Holy Cross, which was in the possession of the Canons of the Holy Sepulchre; but as none of the distinctive Jerusalem feasts appear in the calendar, it is unlikely that the manscript was written there.... It is quite possible that the biblical and liturgical manuscripts written in the "scriptorium of Acre," which owed its existence to the intitiative of St. Louis, were produced in the Dominican house of that town, which counted among its most important religious foundations.[588]

This is an important point of departure, but this whole question is due for reassessment.

Consider first the number of artists whose work we have examined so far. Based on the estimate that we have proposed up to now, there was at least one master painter for the Arsenal Bible, two for the Perugia Missal, one each for the Egerton Missal and the Padua Book of Old Testament selections, and one artist each for the Crusader Crucifixion icon, the Acre triptych inside wings, and the Annunciation icon. The St. Francis master in Constantinople seems to be distinct from any of these painters, but they all seem to share the Acre style of *c.*1250 and later. In each of these cases, we can also consider the possibility, indeed the likelihood that these master painters were assisted by one or more assistants or apprentices. In the the Arsenal Bible this assistant may have done the painted – as distinct from the historiated – initials, as may also have been the case with the Perugia Missal, the Egerton Missal, and the Padua Old Testament book. This means that in terms of just the works we have discussed so far, we could be looking at eight masters and four or five assistants – a total of twelve or thirteen painters. This is a remarkable number given that, as far as we know, the evidence suggests that none of these artists was working in Acre before King Louis IX arrived there in May 1250. Moreover, in the entire period of Acre from 1191 up to 1250, we have never seen evidence of more than one or two painters working there at any one time, certainly no indication of a "critical mass" for ongoing workshop production. If we attribute the sudden surge of artistic activity in Acre to the arrival of Louis IX and the stimulating effect of his patronage, a proposal made in effect by Buchthal, Weitzmann, and Weiss, what can we understand the workshop circumstances to have been starting in 1250?

Looking first at the books we have considered, it appears that there is clear evidence for two or three workshops. The liturgical books, that is, the missals, and possibly also the Padua Old Testament selections book, with its extensive glosses on the various texts, would most probably have come from the "scriptorium of Acre." By this we mean the atelier under the patronage of the patriarch of Jerusalem at this time. These patriarchs were either Robert of Nantes or Jacques Pantaleon. Robert was patriarch since the time the Crusader barons came back to power after the end of the civil war. He came to Syria in 1244, accompanied Louis IX on his ill-fated Crusade, and was active on behalf of the Church in the Holy Land. His leadership provided a beneficial effect on the Church in the Latin Kingdom until his death on 8 June 1254, shortly after Louis sailed for France.[589] The see lay vacant until his successor could be named following the death of Innocent IV. The new pope, Alexander IV, named Jacques Pantaleon to be the new patriarch in April 1255. Jacques Pantaleon, like his predecessor, was also a Frenchman, born in Troyes. He had been former archdeacon of Liège, and since 1252, bishop of Verdun. He arrived in Acre in June 1256, just as the War of St. Sabas was breaking out, and held his position until he was himself elected pope in August 1261.[590] Despite the absence of these patriarchs from Acre on ecclesiastical business from time to time, their home church and their scriptorium was in Acre in these years. This scriptorium was indeed the successor to the "scriptorium of Jerusalem," which had been transferred to Acre in 1191 and surfaced sporadically as the source of illustrated manuscripts between 1191 and 1244, as discussed in earlier chapters. This scriptorium was presumably located in the Cathedral of the Holy Cross, the patriarch's co-cathedral, and the cathedral of the bishop of Acre as well. The manuscripts we are attributing to this scriptorium were, based on the precedent of the scriptorium of the Holy Sepulcher in Jerusalem during the twelfth century, primarily Bibles or Bible extracts, gospel books, or liturgical service books, although certain important illustrated prayer books may have been done there as well. All of these manuscripts were written in Latin by French scribes, as we have seen, and decorated by painters working in Acre, who were not necessarily part of this scriptorium. I return to this point shortly.

The Arsenal Bible commissioned apparently by the French king, was written in Old French, also by a French scribe, but there is no reason to suppose that it was written in the patriarchal scriptorium in Acre. The fact that it seems to have been a personal book, and the fact that the scribal "portrait" in the historiated initial at the start of the manuscript depicts a Dominican, clearly suggests that the codex may have been done in the scriptorium of the Dominican house in Acre.[591] The substantial Dominican interests in Bible studies in Paris are well-known, and it is possible that when the king developed an interest in a book of Bible selections written in Old French, his personal confessor, Geoffrey of Beaulieu, himself a Dominican, could have arranged to have the book written at the Dominican house in Acre. Indeed, the Dominicans may have helped Louis to find the artists he needed to execute the decorative program for this book.

One of the interesting issues discussed by C. L. Striker in his study of the fresco paintings in the St. Francis chapel of the church that later became the Kalenderhane Djami in Constantinople is the identification of that church during the Latin Occupation between 1204 and 1261. In 1982, Striker discussed the French heritage of the Arsenal Bible painter and the icon paintings found on the inside wings of the so-called Acre Triptych and their relationship to the style of the St. Francis cycle in the frescoes of the chapel. He then observes, "if this French connection is valid, it may also be helpful in identifying Kalenderhane during the Latin occupation or at least connecting it with historical sources, which has not yet been possible. By a process of elimination, the most likely candidate for identification with the building in this period, improbable as it may appear, is an anonymous French Dominican monastery mentioned for the first time in 1233 and then indirectly in 1238, 1239, 1244 and 1252."[592] In the final report published in 1997, Striker continues to maintain this possibility, although this association has now been questioned and a case has been made for linking the church with the Franciscans, as the fresco cycle obviously suggests.[593] It cannot as yet be shown unequivocably that the Franciscans or the Dominicans were located in this church during the Latin Empire, but it would be logical to find the Fransciscans there, as has recently been argued. Even if the Dominicans may not have been located in this church, although the jury is still out on this verdict, the documentation makes clear they were certainly located in Constantinople during the Latin Empire, and it is still possible that the Dominicans in Acre assisted Louis IX in finding a worthy artist for his handsome Bible by bringing an accomplished painter to Acre for the commission, a painter who had worked for the Dominicans or the Franciscans on the St. Francis Chapel in Constantinople. The evidence surely indicates that it was not the St. Francis master himself, but someone whom this painter had perhaps trained in his workshop and who later came to Acre.

One of the important aspects of this hypothesis is that the writing of the Arsenal Bible by a Dominican scribe, and the artist for decorating this book, whom the Dominicans may have helped the king to locate, are two separate issues. There is direct evidence for the Dominican scribe, a Frenchman, which both Buchthal and before him, Berger, commented on.[594] The artist may or may not have been a Dominican, however, and may or may not have been a member of the Dominican scriptorium in Acre when he was working on this project. We should recall that we have argued the closest links between the St. Francis Chapel frescoes and the Acre style are seen in the work of the first Perugia Missal painter. This painter presumably worked for the "Acre scriptorium" of the patriarch when the Perugia Missal was done, and therefore we must also consider the possibility that the patriarch is also a candidate to have helped the king to locate suitable painters for his Bible in Acre. The issue of where and when these painters worked in Acre, however, directly forces us to deal with the works of art for which no written text was involved, namely, the icon painting.

WORKSHOPS AND ARTISTS IN ACRE AND THE MONASTERY OF ST. CATHERINE'S ON MOUNT SINAI: ICONS: As discussed earlier, Weitzmann originally proposed that the Crusader icons he discussed, namely, the Crusader Crucifixion icon, and the inside wings of the "Acre Triptych," now held in the collection of the Monastery of St. Catherine's on Mount Sinai, were done in Acre.[595] In fact, he begins his 1966 discussion of what he calls the French Crusader masters by saying that "in the thirteenth century, and especially in the second half, the production of icons by Crusader artists was so extensive that one can identify several workshops, each of which had a distinct style of its own. These shops must have existed side by side and, on occasion, must even have joined forces for the execution of individual pieces. One of the most prolific of such workshops was. . . very closely linked with the scriptorium of Acre which produced illustrated manuscripts such as the missal in Perugia, Biblioteca Capitolare cod. 6, and the Bible in the Bibliothèque de l'Arsenal in Paris, cod. 5211."[596] As noted earlier, however, I am arguing that these very two manuscripts were done in separate workshops and were painted by different artists. Weitzmann's idea, however, that there were "several workshops" is instructive and can be examined further with regard to the development of his own ideas and other considerations as well.

By 1982, however, Weitzmann had revised his thinking about the location of the artists in their icon workshops, and in different publications he then proposed to locate them in the Monastery of St. Catherine's on Mount Sinai. In one article he then stated his belief that the icon workshop that produced the Acre triptych "was located in Sinai."[597] In the "Annotation" to his earlier articles from 1963 and 1966, written in 1980, but published also in 1982, he states quite specifically, "I believe now that the large group of French paintings was not brought from Acre but rather made at St. Catherine's, probably by a painter who came from Acre."[598] In the introduction to this same volume, he writes that these "Latin artists . . . worked either in the Holy Land at large or, in considerable numbers, in the monastery itself, where they had apparently established a colony."[599] This change in his thinking raises two issues for us to consider here: First, which is more likely, that the Crusader artists painting these icons were working in Acre, or they were working in St. Catherine's Monastery on Mount Sinai? For those artists who were working in Acre, where were they working in Acre?

To engage the first question, consider the number and functions of the so-called Crusader icons in the collection at St. Catherine's Monastery.[600] Weitzmann himself is responsible for the research work of having identified approximately 120 of what he called "western-influenced icons" done by "Latin artists" in the collection at Sinai, the overwhelming majority of which date to the second half of the thirteenth century and many of which belong to the Franco-Byzantine Acre Crusader style group. These icons are notable because of their Western-influenced iconography and Crusader stylistic features that distinguish them from purely Byzantine work, and they also have either Latin or Greek inscriptions, or have both Latin and Greek inscriptions on the same icon.[601] If we look at the function of these icons, we can immediately recognize that overall they belong to several categories of imagery. The main groups are (1) painted iconostasis beams, with images of the liturgical feasts; (2) icons of the liturgical feasts in the form of single panels, with a large number of Crucifixions and images of the Dormition of the Virgin; (3) icons of the Virgin and Child seated or standing, including single panels, diptychs, and some triptychs, many of the single panels with site-specific Sinaitic iconography; (4) icons of individual saints or groups of saints, prominent among which are images of soldier saints, some standing, but most of whom are mounted; (5) icons containing images of the Deësis often associated with apostles or other saints, or individual panels that collectively comprise the Great Deësis, including angels in a pose of prayer; and (6) a selection of other single panel images among which are those of the Last Judgment, the *Maestas Domini*, and the image of Elijah.

The striking fact about these panels is that, with some significant exceptions, the majority are mostly relatively small and therefore are portable. Clearly many were intended primarily for some kind of private devotional use, or could have functioned that way even if they were modeled on Byzantine liturgical icons meant to be used in church services and in a formal ecclesiastical context, such as being placed on the templon screen or set on the proskynetarion.[602] The uses that these kinds of icons could be put to were therefore very likely one of the following.

One obvious use was that an icon was commissioned to be an ex voto gift for the monastery of St. Catherine's on Mount Sinai, to be hung in the main church or one of its chapels with special dedications. The motivation for the gift could be any number of things. The icon could be offered in conjunction with a prayer to St. Catherine, or to Christ, to the Virgin, or to other saints, for thanksgiving, as an act of penance, to ask for the safety of a relative in battle or in prison, for healing, for protection in travel, for the grace of death in Christian circumstances; the list goes on. This would clearly help explain the large number of icons there, the iconography of some of these panels, and the reasons for their presence. This means that one source for many of these icons was from Frankish pilgrims to Sinai. In the case of some with Greek inscriptions, another source could have been Christian pilgrims of other Eastern Christian backgrounds who would approach a Crusader artist for such an image in preference to a Byzantine icon painter, or because the Crusader artist was more available to them. These icons are icons for pilgrims of mostly a non-Orthodox background who are ordering holy images mostly modeled on Byzantine icons by non-Byzantine, that is, Crusader painters.

A second obvious likely use was the icon as a personal devotional image for private prayer, a religious image that could be carried by its owner or recipient for this purpose, not given away. Most of these icons are clearly very closely modeled on Byzantine sources, but a few are strongly Western in inspiration. We will see this especially with some of the smaller triptychs and some of the most explicitly Western paintings. The Western characteristics are evident either in terms of style or iconography, or both, such as some of the little triptychs with the Virgin and Child, or the Maestas Domini panel, or the icon of the Deësis with the Twelve Apostles. Many of these icons may have been originally commissioned for personal use and even include images of their patrons or donors, but were then eventually given to the Monastery of St. Catherine's, either by the owner later in life or perhaps by a relative in honor of the owner. It is in any case important to distinguish between the probable original function of these icons when commissioned, in contrast to how and why they eventually made their way to Sinai. The distinction of who the intended recipient was and who the patron or donor was is clearly also important in several of these icons, in which the images of the donors or someone meant to be commemorated by the donor was included in the image. The iconography of these donors was popular among the Western pilgrims, and we find them earlier, in the twelfth century, associated with the icons painted on the columns of the Church of the Nativity in Bethlehem.[603]

A third use would have been in the context of Byzantine ecclesiastical settings. Some of these "Western-influenced" icons are large; some are even bilateral; most – the great majority – have Greek inscriptions. Clearly it is likely that some of these larger "Crusader" icons were painted either for Western patrons to give to Greek recipients or directly for Greek patrons, and these icons were either given directly to the Monastery of St. Catherine's on Mount Sinai or came there indirectly later on. In some cases, such as the impressive bilateral icon of the Crucifixion and the Anastasis (App. no. 97 1568), done by a Crusader painter of Venetian background, even with its Latin inscriptions it hangs in the main church of St. Catherine's today.

A fourth possible use for which these icons could have been commissioned would have been for a Latin ecclesiastical setting. Even though we have no official indication of icons becoming part of the Latin liturgical services during the thirteenth century, we know that icons had begun to appear in Latin churches and their chapels during the twelfth century. We have pointed out, for example, this phenomenon when discussing pilgrims' accounts in the twelfth century, and we have noted the somewhat parallel development of the choir screen with images in Latin churches, known as the *tramezzo* in Italy, especially in Franciscan churches, or the *jubé* in France.[604] We should also note the growth of the function of the painted panel as an altarpiece, changing its position from an altar frontal, to one of an altar retable in the thirteenth century. Because "as a general rule, the altarpiece, unlike its predecessors such as the frontal and the *paliotto*... originated on side altars before arriving at centrally located main altars,... " we can readily see some of these relatively small icon panels serving in this role in Crusader churches.[605] We can also imagine that these Crusader icons may have helped to stimulate the use of the painted panel altarpiece more widely. Finally, obviously some of these icons also could have been made for a church in Acre, or for the Latin chapel at Sinai in the Monastery, St. Catherine of the Franks, as it came to be called. Icons were clearly growing in importance in the thirteenth century as religious objects that all religious communities deemed important, and that drew them all together in different ways.

With these points in mind about the icons, it is also relevant and worth inquiring into the somewhat parallel case of the existence of Latin manuscripts and Crusader paintings in Greek manuscripts in the Monastery of St. Catherine's on Mount Sinai, as evidence for the presence of Latin monks and pilgrims in the thirteenth century. Weitzmann has pointed out that with one exception, no Latin manuscripts survive at Sinai, although there is evidence of the existence of a small number that appear to have been destroyed much later, based on the appearance of flyleaves from Gothic Latin codices in certain Greek bindings.[606] He does, however, discuss two Greek manuscripts with "Crusader" illustrations. One is a Psalter and New Testament, Sinai MS 2123, which is dated 1242.[607] The full-length image of St. Paul, which appears in this codex on fol. 84v with Western iconography and Italo-Byzantine Crusader style led Weitzmann to suggest that the artist may have been Venetian in background and that the manuscript may have even come from Venice. The later, Renaissance period, paintings also found in the manuscript suggest that the book came to Sinai after the medieval period. Another manuscript, a *Sticherarion* with musical notations, Sinai MS 1216, has a series of images of saints (bust length) and feast scenes done in wash-drawing technique, reminiscent of similar pictures done in this technique, which appears occasionally in Byzantine manuscripts of the thirteenth and fourteenth centuries.[608] Weitzmann illustrates the Dormition of the Virgin on fol. 149r from this codex. Although expressing uncertainty regarding whether this was done by a "Latin artist," he notes that the iconography is unusual and has its closest parallel in a Crusader icon that was apparently done by a Crusader artist of Venetian background that I discuss later. He also remarks on the style of the figures with regard to the "rolling-eye" convention, that is, the linear definition of the eyes, which he finds similar to the Acre convention discussed earlier in terms of the Arsenal Bible, the Perugia Missal, and the icons of the Acre Franco-Byzantine style group.[609] In this case, however, the manuscript appears to have been written and illustrated at Sinai, in the absence of any other attribution.[610] With only these two cases of illustrated manuscripts from Sinai we admittedly have a tiny and limited sample. Nonetheless I suggest that with these codices we have an interesting possible parallel indication of what we seem to be dealing with on a much larger scale with the more numerous icons, namely, that some of the "Western-influenced" icons could have been done in St. Catherine's. It is also possible, however, that some – in fact, many – could have been done somewhere else – Acre is the most likely place – and brought to Sinai as a devotional gift or spiritual donation. The case of each icon must be studied intensively on an individual basis.

From these considerations we can propose the following observations as part of our working hypotheses. First, it is clear in discussing the icons, not to mention other types of painting, that we must attempt to distinguish among several important issues: Who was the person who commissioned the icon, who was the recipient of the icon, who might the icon have been commissioned to honor, what was the function of the icon, in primary and secondary use, where was the icon commissioned, where was it produced, and where was it intended to be used? I have endeavored to raise these issues here at the outset of what will be an extended discussion of numerous different Crusader-painted icons and other illustrated manuscripts. In each case we must pose these questions, examine the evidence carefully, and see what answers we can give in the current state of our knowledge.

Second, it seems likely that, as proposed earlier, "Western-influenced" icons were painted both in Acre and at St. Catherine's on Mount Sinai. The reason most pilgrims would have for approaching a Crusader icon painter in Acre was that it was practical and efficient to commission such paintings in Acre before setting out on the journey to Sinai while waiting for transport, and "Crusader" icon painters were apparently readily available in Acre. For some pilgrims, however, they may have only realized their interest in having an icon painted after they had arrived at the Monastery of St. Catherine's. Of course pilgrims were only one category of patrons involved; there must have been many others, including "resident Crusaders," that is, Frankish settlers and merchants, Latin and Eastern Christian clerics, among others. As stated at the outset of our inquiry after discussing only a few examples, evidence seems to indicate that many of these icons were painted in Acre, but a certain number must have been painted on Sinai as well. Again, we have to consider this question on a case-by-case basis.

Where did these artists work at Sinai, or in Acre? At Sinai we know that apparently some, probably a small number of Latin monks lived in the monastery during the Crusader period. All Latin religious at St. Catherine's Monastery were under the protection of the Latin Patriarch of Jerusalem who, along with the pope in Rome especially, enjoyed remarkably harmonious relations with the abbot of the monastery during most of the thirteenth century. In the hierarchy of the Latin Church in the Holy Land, the Latin monks were directly placed under the jurisdiction of the Latin bishop of Petra, who oversaw day-to-day practical matters. They had their own chapel, St. Catherine of the Franks, a chapel that continued to exist up into the eighteenth century.[611] Although we do not know exactly where in the monastery they might have had a painting workshop, it may well have been linked to where they lived.

The circumstances of these Latin monks should not be overestimated, but the existence of resident Latin monks in the monastery seems likely in the thirteenth century. No doubt their chapel was very small; there are many such small chapels in the Monastery of St. Catherine even today, even if this particular one has disappeared. In the economy of the place, too, the cells where the monks lived could have also served as their workplaces for painting, in one of the cells or in a small room next to where they were living.

In Acre the issue of where these icon painters may have worked is much more complicated because of the presence of other painters – apparently many other painters – who did illustrations for the manuscripts as well. The indisputable fact about the icon painters in Acre is that they painted exclusively religious paintings, but the manuscript illustrators in the second half of the thirteenth century would be called on to paint both sacred and secular works. Therefore, one likely place for the icon painters to have worked was in the house(s) from which the Latin monks at Sinai must have come. The main house, as I suggested earlier, was likely that of St. Catherine's in Acre.[612] They could also have been monks associated with the patriarchate or with the Benedictine houses in Acre. They also might have been Dominicans or Franciscans, although it would seem likely that some mention of this fact would have been noticed by the historians of the mendicant orders. It is not impossible, however, that the master painter of the Arsenal Bible was a Dominican, or even a Franciscan, but we have little on which to base such a claim, save for the purely circumstantial evidence presented earlier.

In light of the fact that numerous manuscripts done in Acre from *c.*1260 on were secular, however,[613] we must also consider a paradigm for artistic workshops that reflects that of Paris, already well established there by 1250.[614] It is reasonable to think of Paris in relation to Acre, not only because of the presence of King Louis IX, who links the two centers and who seems to be the stimulus for much new manuscript production in Acre, but also because Paris was rapidly becoming the main center for manuscript illumination, not only in France, but also in Europe by the mid-thirteenth century. In this regard, a great deal of light has been shed on the production of manuscripts in Paris by the recent study of Mary and Richard Rouse.[615] In keeping with their proposals for locating where in Paris the production of manuscripts was done, how they were being executed and by whom, it seems that we can use this model, albeit on a drastically reduced and modified basis, to apply to Acre.

Just as there were scribes, parchmenters, *libraires*, and painters working in central Paris well before 1250 as the Rouses have demonstrated, it seems likely that, mutatis mutandis, a similar, but much smaller enclave for the production, decoration, and even the sale of books could have been set up in Acre in 1250 and thereafter. Acre of course had no university to stimulate book production in that direction, that is, for the academic study of texts, but it did have many literate and educated patrons who wanted books, and some obviously wanted decorated books, and it is especially the decorated books that we are concerned with here. I propose that just as Paris had its centers of production where the parchmenters, painters, and *libraires* lived and worked, there was also a street somewhere in Acre, which cannot as yet be located exactly, where these people lived, had their shops, and did their work. Even if in the 1250s the scribes were mainly still found in the religious houses, and many painters were also religious as well, some of the scribes and some of the painters must have been secular, that is, purely commercial – more in number as the years went by after 1250. They could have taken work in a religious house or scriptorium on contract, or in their own workshop situation.

The presence of the panel painters in Acre must also be related to such a center of activity. Even though not a single example of the hand of an icon painter who also worked in one of the extant illustrated manuscripts can as yet be demonstrated, the coherence of the "Acre style" among these artists clearly indicates some active means of interchange and interaction. Even if the panel painters were all religious, perhaps working partly at the house of St. Catherine's in Acre, just as the painters for the "scriptorium of Acre" were all religious, they still had common needs. They would have to obtain their materials, they would want to discuss their work with other artists, religious and secular, they would wish to know what kind of work was being done by others, and perhaps they would even find some interested patrons in a workshop-type environment that brought them all together, or at least allowed them to mix together and observe each others work. The proposed street in Acre where painters of all types, scribes, carpenters, parchmenters, and *libraires* could be found is my suggested model.

I am offering this overall paradigm for the sudden appearance and the growth of painting – all kinds of painting – in Acre as a working hypothesis to test as we examine a whole series of works done from the time of Louis IX on. We shall see if this proposal can help us better understand the realities of what the complex evidence presents to us as "Crusader painting in Acre" as we examine the major extant works and consider their historical context.

THE ACRE FRANCO-BYZANTINE CRUSADER STYLE, *C.*1250S: Before moving on to additional works of art, one other issue requires some discussion: What was the source of the Franco-Byzantine Crusader style we see in the Arsenal Bible, the Perugia and the Egerton Missals, the Padua Old Testament selections book, and the various icons apparently done in Acre, and related work, so closely identified with the presence of King Louis IX? The important feature about the Acre style in question is that it is a mature and basically fully formed style. It is not one likely to have been achieved by a painter of French Gothic background "just off the boat" suddenly working with Byzantine models in a Crusader context. Nor could it likely have been achieved by a Crusader-born artist who received his primary training from a French Gothic painter without further work and experience. Rather, it displays the sophisticated synthesis of French Gothic with Byzantine formal characteristics, the product of some years of experience and development. This suggests the work of a Crusader-born artist trained in the first instance by a Crusader master of French Gothic background. This Crusader-born artist was also acquainted with Byzantine techniques and Byzantine iconography, to which was joined a solid knowledge of Crusader painting. Or it suggests an artist who, having been born in the Latin East somewhere, was trained by an established Crusader master, who commanded the Franco-Byzantine Crusader style.

In proposing this interpretation, I am not overlooking the problem that Weitzmann observes in his discussions of "Crusader icons," namely, the difficulty we face when trying to identify the artistic background – whether French or Italian, or otherwise – for many of these Crusader painters. As he says, "no doubt Italian and French elements are combined in . . . our whole group of icons." And "the respective share of these two nationalities will . . . be one of the main problems in the discussion of the Crusader icons."[616] He then continues, "attempts to distinguish the nationalities of the icon painters may not always be successful, simply because Italian and French artists working side by side and apparently having models from both countries available, gradually developed a style and iconography which, when fused with Byzantine elements, resulted in what one might simply call Crusader art."[617]

We can provisionally accept the idea of French or Italian "nationalities" here, meaning largely regionally, linguistically and culturally defined artistic characteristics, as long as we make suitable historical distinctions for what this meant in the thirteenth century, in contrast to the modern idea invented largely in the nineteeth century and developed further in the twentieth. But we cannot accept the idea at face value of "Italian and French artists working side by side, . . . " who "gradually developed a style and iconography which, when fused with Byzantine elements, resulted in . . . Crusader art." Nor can we accept the idea that what is normally found in a Crusader workshop is "Italian and French artists working side by side." What we normally find in a Crusader workshop is *Crusader artists working side by side*, although obviously they may reflect different artistic traditions in their backgrounds and training. It is of course possible that from time to time a Western artist comes to Acre for example, and joins the painting establishment. Such a painter, if he were young and still developing as an artist, could learn the Crusader style, transforming his own original style. The problem is that it is difficult to identify such a newcomer in thirteenth-century Acre. In fact, we have certain evidence that clearly suggests when mature European artists came to the Holy Land working in a fully developed personal style, they largely retained the style of their primary training. This indicates that it is highly unlikely that an artist who came from the West suddenly became a Crusader artist working in a fully realized Crusader style.[618] The result is we must revise our thinking to understand that in the thirteenth century a Crusader artist is largely to be understood as born and trained in the Crusader East. He is a Crusader painter because he has been trained by a Crusader master in a style that synthesizes western European and Byzantine elements with local Levantine components, that is, by a master who generally already commands this synthesis. Although we have assumed the phenomenon in the past, we have as yet no specific, clearly documented example, so far as I know, of an Italian or French or German or English (or Byzantine) thirteenth-century painter who can be seen working in the West and then comes to the Holy Land where his style is then transformed into that of a Crusader painter working in a fully formed mature Crusader style. We only have evidence of different phenomena. We know of German painters who come to the Holy Land, or possibly Constantinople, and copy Crusader or Byzantine models in their sketchbooks, in the cases of the artists of the Freiburg Leaf, the Wolfenbüttel Sketchbook, and the Halberstadt Cabinet.[619] We also know of the Paris-Acre

Master who comes to Acre from Paris and paints for nearly twelve years in what is essentially a Parisian Gothic style of the 1270s.[620]

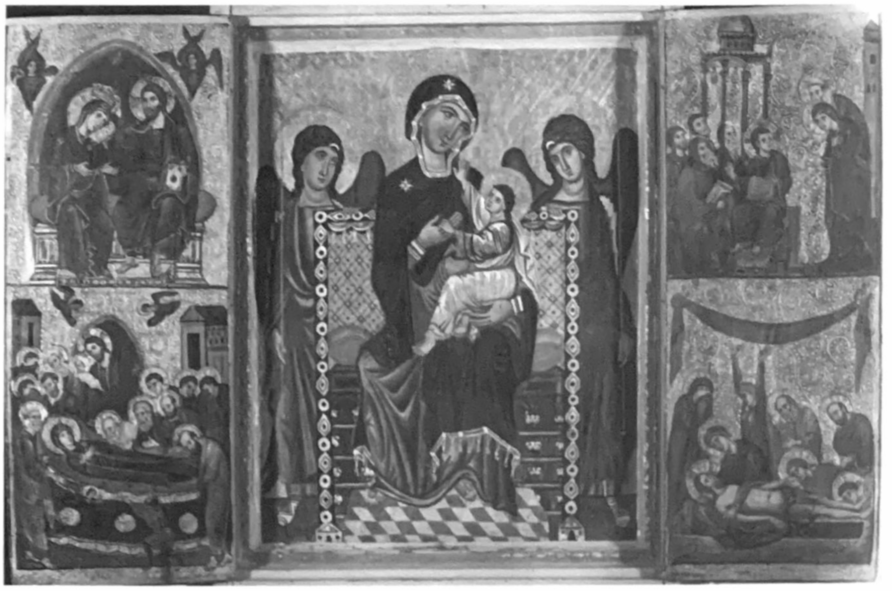
This concept of a Crusader artist should not be taken to the other extreme, however. Unlike Pace, we should *not* go so far as to say that "the very nature of 'Crusader painting' eludes all efforts to verify the nationality of its artists; we could go so far as to say that if the origin of the artist can really be detected, his work must no longer be labelled as 'Crusader.'"[621] This view, which was formulated at the time when Belting's idea of an "artistic lingua franca" in the Mediterranean world was being discussed intensively,[622] obscures two facts. First, we can often say something about the artistic tradition from a European region, which plays a prominent, perhaps even central part in the stylistic identity of a Crusader painter. Second, the most distinctive aspect of a Crusader artist is in any case his Crusader stylistic formation, not his European connections. That means we must start with the recognition of an artist as a Crusader artist and then analyze his Byzantine, western European, and Levantine characteristics, whatever they may be. That means the approach we wish to take, in other words, what we are concerned with first and foremost, is to identify the nature of the Crusader artist and his work. So in the end we can agree with Weitzmann and Pace in the sense that verifying the "national" origin of the artistic heritage of a Crusader artist is not something we can always know for sure, although for the overwhelming majority – if not nearly all – Crusader artists their place of origin is the Latin Kingdom of Jerusalem.

What, then, does it mean to say that a Crusader artist has a French Gothic or a Venetian background? In this discussion I mean that although an artist is born of Crusader parents, resident in the Holy Land, the ancestry of these parents may be French, or the master he is trained by may have derived his Crusader training in a setting that privileged the French Gothic tradition, or the Venetian tradition, or some other Italian regional tradition, whatever the case may be. But the style he learns as an apprentice is essentially a Crusader one, that is, one in which the Western tradition, whatever it is, has already been synthesized with the Byzantine and the local Levantine components. Obviously not every Crusader artist follows this paradigm, and wide variations are possible. My point is that seeking to find a European national origin for the style of any particular Crusader artist is, in any case, not the most fruitful way to approach the study of his work. We must start by recognizing his work as Crusader and then analyze what is Crusader about it in terms of its components.

Therefore, whoever invented the mid-century Franco-Byzantine Crusader style or whatever workshop fostered its birth, it is not likely to have been a European newcomer to Crusader Acre when it apparently first appeared in the latter part of 1250 in some of the manuscripts and icons we have discussed. In contrast to the style of a later artist, like the Paris-Acre Master, who apparently came to Acre directly from Paris in the late 1270s, *c.*1280, the Acre Franco-Byzantine Crusader style in the 1250s was a mature synthesis of Eastern and Western elements. The style of the Paris-Acre Master was, by contrast, almost purely contemporary Parisian Gothic when he arrived off the boat, and, as we shall see, it remained substantially Parisian Gothic during his entire twelve years in Acre. The Acre Franco-Byzantine Crusader style of 1250 is a fully formed Crusader development with Near Eastern touches that suggests vigorous activity in its new surroundings, especially in Acre, but also in Constantinople and Sinai. In fact it is precisely because of the existence of this style virtually simultaneously in both Acre and Constantinople *c.*1250, and possibly also in Sinai, so far as we know now, that the likelihood must be entertained that the origin of this style, or at least its roots, surprisingly it seems, probably lies in Constantinople, or much less likely perhaps, in St. Catherine's Monastery on Mount Sinai. Unfortunately the bases for arguing this suggestion are almost entirely circumstantial and *ex silencio*, but the argument must be considered nonetheless.

We basically know nothing, or very little, about Crusader painting in Acre or Constantinople, or Sinai, in the decade of the 1240s. In Acre, however, there seems to have been no painting done, especially after 1244, because of the political and military situation, until King Louis IX arrived from Egypt. In Sinai we have no icons in the Crusader "Western-influenced" style that can be firmly dated into the 1240s as yet, only the Deësis panels that can be dated to the mid-thirteenth century at best. In Constantinople, on the other hand, the possibility exists that work was being done that no longer exists, that has not yet been recognized, or has not yet been excavated. It is indeed possible that such work forms the basis for the style we see so skillfully employed in the St. Francis Chapel. The master of the St. Francis frescoes headed the workshop that produced the paintings in the St. Francis Chapel and may have produced other works which no longer exist. Whatever these works were, the possibility exists that this master and his assistant(s) worked in Constantinople for several years, in the middle or late 1240s before doing the chapel project. This would have given him the time to develop this style to the level of maturity and high quality we see in the frescoes and given his assistant(s) time to train and to learn this style as well. It was in Constantinople that they could have learned the Crusader style, as possibly residents of the Latin Empire where both essential traditions, the French Gothic and the Byzantine, obviously existed and could have been synthesized. There certainly they could have studied Byzantine manuscript illumination and fresco painting, and there the process of synthesizing the Eastern and Western components into a genuine and distinctive Crusader style could have been accomplished.

Sinai could also be a possible source. We do in fact have the early thirteenth-century St. George icon now in the Byzantine Museum in Athens, which appears to have been the joint product of a Byzantine painter and a Latin sculptor. Weitzmann at least has proposed that it was done in Sinai, but others have suggested Constantinople and Cyprus as well.[623] The issue is not resolved for this icon, and, as we have seen in Chapters 3, 4, and 5, there are only a small number of other "Crusader" icons attributed to Sinai in the first half of the thirteenth century. These icons collectively, and the St. George icon in particular, exemplify the unresolved state of the question when the issue of how Acre, Cyprus, Constantinople, and Sinai are related in this period is raised. Further, Sinai as an artistic center to some extent must be viewed as surprisingly diverse in character. As Weitzmann argued, whereas the bulk of icons produced in the thirteenth century were Byzantine, and most of the artists there were Greeks, "yet there never developed an indigenous,



155. Icon: Sinai, App. no. 66/753, the Acre Triptych: central panel and interior side wings. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Sinaitic style. Masters were called from outside, be it Cyprus or Constantinople or elsewhere, worked at Sinai for some time, and were then replaced by the next team."[624] The Latin monks who worked at Sinai must also have come and gone – presumably to and from Acre – and they must have been stimulated by the Greek icon painters with whom they worked in proximity. It is partly that stimulus that would have inspired the union of French Gothic and Byzantine or various regional Italian and Byzantine traditions to create the Crusader styles we are discussing.

Unfortunately we know nothing specific about how this style came to Acre, whatever its source. We know nothing about the precise artists. We do not know the means by which the various artists and patrons could have transmitted to Acre the specific sources we find in, for example, the Arsenal Bible, that is, whether they were sketches on loose sheets or as ensembles of drawings in more elaborate model books, or examples in finished manuscripts. As research moves ahead, however, we hope to learn more about what painting there was in Constantinople in these years, what icons could have been made in St. Catherine's Monastery in the 1240s, who the artists were, and how it was that an artist and a style so important for Acre, could have possibly originated outside the Latin Kingdom, either in the Latin Empire of Constantinople or in Sinai. What is fascinating to observe is that just as the St. Francis chapel project employed artists of diverse backgrounds, one a Crusader painter and one a Byzantine painter, so, too, in Acre we encounter a similar phenomenon in the so-called Acre Triptych.

CRUSADER ARTISTIC ACTIVITY BETWEEN 1254 AND 1268: When Louis IX departed for France on 24 April 1254, the Latin Kingdom and its capital city, St. Jean d'Acre, was in excellent condition, although perhaps not as excellent as it had been between 1220 and 1244. Within two short years, however, the kingdom of Jerusalem was plunged into a new civil war, focused on the rights and property of the major Italian maritime powers in Acre, known as the War of St. Sabas. It appears that the realignment of power that resulted from that conflict, in which the Venetians defeated the Genoese with the help of the Pisans, later also assisted by the merchants from Marseilles, enabled the Venetians eventually to establish commercial dominance in Acre and caused the Genoese to flee to Tyre. While the smoldering animosities among the Italian merchants continued to complicate commerce all along the coast of Syria-Palestine after 1258, some of the effects of this conflict also became visible in the artistic production of St. Jean d'Acre.

THE "ACRE TRIPTYCH," *C.*1256–1260 (FIGS. 155–162, COLOR PL. 4 APP. NO. 66/753): We have already had occasion to consider briefly aspects of the paintings on the inside wings of the "Acre Triptych," a major work done in Acre after the departure of Louis IX in April of 1254.[625] The scenes of the life of the Virgin referred to earlier are important examples of the Franco-Byzantine Acre Crusader style, related generally to the earliest manuscript illumination during the time of Louis IX's residency in Acre. The triptych is, however, a complex work that requires careful examination. Besides the four scenes of the life of the Virgin on the inner wings, the central panel presents a monumental image of the Virgin and Child enthroned with two flanking angels. On the outside surface of the two wings there are also two saints standing under round arches: St. Nicholas on the left wing and St. John the Baptist on the right.

Returning to the scenes of the life of the Virgin, we can see some important additional features about their iconography and style. The four scenes are Christ among the Doctors in the Temple (upper right wing), the Threnos (lower right wing), the Dormition of the Virgin (lower left wing), and the Coronation of the Virgin (upper left wing). These scenes are unusual as a cycle; Weitzmann could not discover a comparable series.[626] The idea of smaller scenes that flank the enthroned Virgin and Child, clearly not a Byzantine format, is frequently found in Italian panel painting, but whereas the Threnos and

See COLOR PL. 4

the Dormition are commonly represented in cycles of scenes of the Passion in such examples, the finding of Christ in the Temple and the Coronation are rare.[627] This suggests a specific commission for a special purpose. The series does not read convincingly as a narrative or strictly liturgical sequence; rather the four images make more sense as scenes that gloss the relationship of Mary and Christ, who appear in the large cult image on the central panel. This "program" and some of the specific iconography is very "Western-influenced" as is the content of the scenes, with its emphasis on the human relationship of Jesus and the Virgin and its focus more on a devotional function. Each scene is in fact a synthesis of Byzantine and French Gothic iconographical and stylistic aspects which clearly link these images and their artist as belonging to the Acre style group.

Weitzmann has discussed the Byzantine and Western aspects for these scenes in detail, and there is no need to rehearse his points here. We can recall, however, that each image, whatever its Byzantine parallels, is based on Western, mostly French sources, such as the Moralized Bibles or other French manuscript illumination or stained glass, models mostly drawn from the same general repertory that has been identified for the Arsenal Bible. Furthermore, each scene focuses on some aspect of the relationship of Jesus and Mary throughout their lives. The scene of Christ among the Doctors (Luke 2: 42–50) represents the Virgin as a worried mother seeking safety for her young son. The choice of this scene, the only real story in Luke of Christ's youth, is interesting, and the composition and action places emphasis on the tender relationship of mother and son by showing Jesus interrupting his discourse to turn and speak to his anxious mother (and father).[628]

In the Threnos, the theme of the caring mother tending to her son is dramatized not only by the circumstances of the event, but also by the outpouring of grief by those pressing in closely around her as well as by her pose. In contrast to the purely Byzantine version in which she is in effect gently taking Jesus to the tomb, here she is positioned as if seated frontally somehow on the tomb, unwilling or unable to let him go as she embraces him on her lap. We are here at the moment where the Lamentation merges with the Entombment, before the Western image of the Pietà emerges as a separate devotional image.[629]

The Dormition depicted here is the most purely Byzantine scene of the four. In this case, however, the relationship is reversed, and it is now the caring son, Jesus, who looks after his mother. The most Western-influenced aspect of this scene is, as Weitzmann indicated, the pose that Jesus takes.[630] He cradles the soul of the Virgin in his hands and, bending over affectionately, almost leans out of his mandorla in a most un-Byzantine manner.

The Coronation of the Virgin is the most French – and the least Byzantine – of these scenes. Although the Triumph of the Virgin may have Italian roots,[631] it is French Gothic art that celebrates the Coronation of the Virgin, as Verdier has shown, in portal sculpture and manuscript illumination, however, not in panel painting.[632] The few early Italian examples of this iconography are clearly dependent on French inspiration.[633] Here again Jesus cares for his mother by giving her a place in heaven next to his – she is a *synthronos*, – recognized through his act of coronation as the queen of heaven for all the world to see.

Taken together, these four scenes demonstrate a radical departure from Byzantine icon painting by introducing a whole new devotional tone and content. To paraphrase Belting, the stories of the Life of Christ and the Virgin were being selected and retold in a new way in Western art that invited the onlooker's empathy and offered not only new ways of seeing these events, but also stimuli to sympathetic and affective participation.[634] And, as Derbes points out, these changes in pictorial narrative began to occur well before the age of Giotto or Duccio; in fact they began in the mid-thirteenth century, and we see evidence of these changes here in Acre.[635]

What is remarkable about this triptych, however, and distinguishes it from western European parallels is not only the new content of the imagery, but also the special multicultural stylistic character of work, looked at as an ensemble. The inside surfaces of the wings are clearly done in the Franco-Byzantine Crusader style associated with Acre in the 1250s, but the central panel of this triptych is done in a very different style indeed. We have already commented on the style of the four scenes, a masterful combination of French Gothic line and color design with Byzantine-style figures and head types. The work is done in the painterly manner of the first Perugia Missal painter, but with looser brush work and much less deep shading of the faces as in Byzantine technique. The emphasis is on volumetric faces developed with linear outlines and white highlighting. The conventions for the rolling eye treatment are notably much less regular than we see in either the Arsenal Bible or the Perugia Missal.[636] Here the spectacled effect, with the eye completely circled and a linear extension back toward the ear, is minimized, seen, for example, on the St. Peter figure in the Dormition. Instead, the pupil is often partly surrounded with white highlighting, with linear outlines above and below – sometimes completely separate, sometimes linked around the inner or the outer part of the eye, and sometime with the linear extension. This more painterly handling seems to be found in a number of icons in the Franco-Byzantine Acre Crusader style, all of which seem later than the three works *c.*1250 discussed earlier.[637]

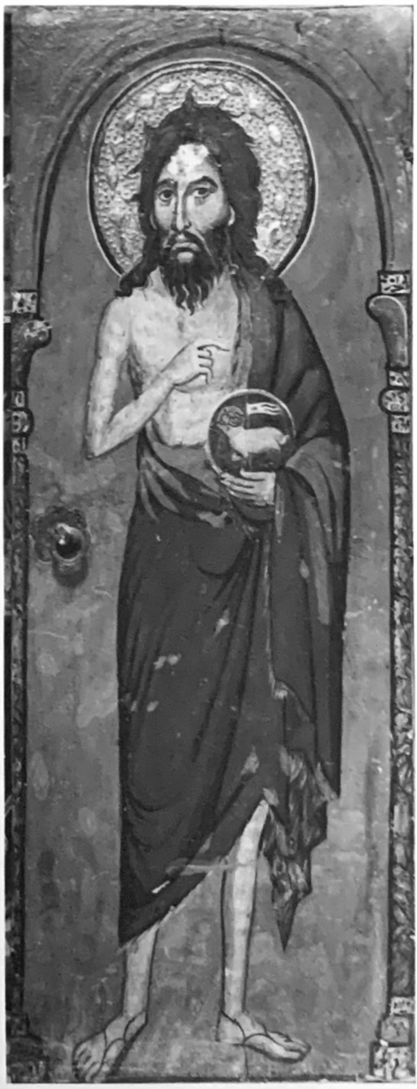
By contrast the central panel shows us a monumental image of the Virgin and Child enthroned with two standing angels, that is clearly executed by a Crusader painter with an Italian, not a French Gothic background. It is a very different Italo-Byzantine Crusader style in Acre done by an artist using a Byzantine icon as his model, specifically possibly an early thirteenth-century example at St. Catherine's, Mount Sinai.[638] As Weitzmann says, "a comparison between these two Virgin icons shows quite clearly that the Crusader artist followed a Byzantine model much more faithfully than a Dugento artist working in Italy would have done. Yet the Western temper asserts itself in many respects in this instance. . . . In the Crusader panel the Child clings to the Virgin by holding her right hand as if to steady himself; he looks up at her face and tries to reach it with his other hand. . . . Baby-like behavior such as holding the Virgin's hand has no place in a Byzantine icon of the Virgin. The fundamental difference of two religious concepts manifests itself here in all clarity, despite the fact that the Western artist tried to copy a Byzantine model as closely as he could."[639]

With the proviso that I would prefer to read here, "the Crusader artist" instead of "the Western artist," Weitzmann notes the major stylistic features of the Virgin and Child, including the stocky proportions of the figures, the large, fleshy faces and hands, and the softly modeled drapery.[640] Italian ornamental vocabulary is noted in the tooled nimbi with rinceau and palmette design, and the background with a diamond pattern. There is also the gold and black pearl and bead studded frame of the throne, and the foreshortened red and white tile floor. Although he notes a parallel between this tiled floor and a slightly later work from the circle of Guido da Siena,[641] overall he somewhat tentatively attempts to attribute this image to an artist from Apulia, largely on the bases of the ornamental vocabulary and general comparisons with the design and execution of the Virgin.[642] Pace, however, challenged this attribution directly, correctly in my view, noting that these proposed similarities were not convincing. He pointed out that some of the important stylistic features of the icon found no parallel in Apulian paintings in general, or in the frescoes of the crypt of S. Vito Vecchio in Gravina that Weitzmann was discussing specifically. In particular he noted "the icon displays a spatial setting, with the angels partly behind the throne, a three-quarter profile for all the figures, a use of painterly shading in the faces of the Madonna and the angels, and a peculiar style of representing



161. Icon: Sinai, App. no. 66/753, the Acre Triptych: right side outer wing, Standing figure of St. John the Baptist. folds."[643] In the face of this challenge, we must consider the origin of this artist's Italian background to be as yet unresolved.

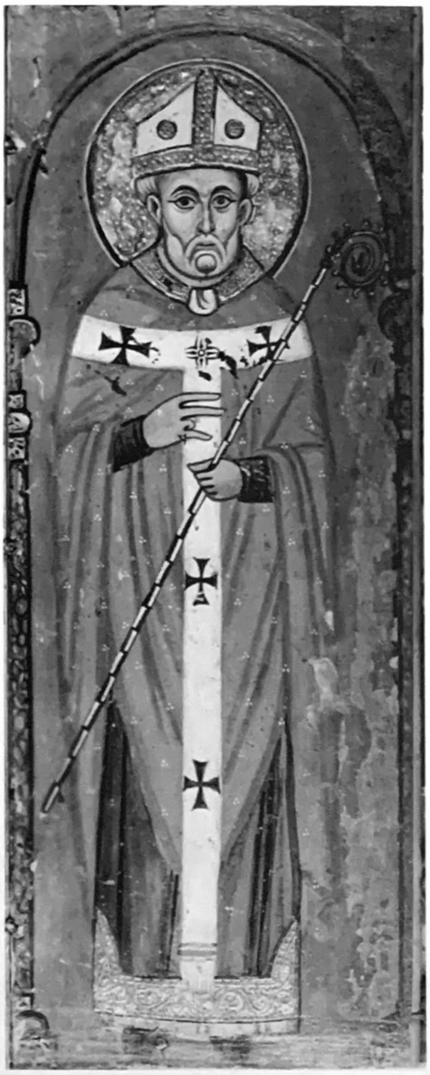
The Apulian connection, however tempting, seems untenable for explaining the Crusader painter's artistic background in the Virgin and Child. And despite Weitzmann's comment "that a clearly definable influence from Pisa or, for that matter, from Tuscany in general, though it had the best known Ducento school of panel painting, . . . has not yet been traced among Crusader icons,"[644] our attention is in fact drawn to the Tuscan area for this central panel for several reasons. First, Weitzmann himself noted possible links to Tuscany in certain details. There is an ornamental vocabulary in Tuscany that includes the diamond and pearl border and the red and white tiled floor in empirical perspective, as Weitzmann pointed out.[645] Also we find images of the Virgin and Child that provide viable comparisons for this representation in terms of style and iconography. Second, Anne Derbes, although acknowledging that in Tuscany, Pisan painting would seem to provide the most likely prospects, has pointed clearly in the direction of Siena, by proposing to see parallels of this Virgin type in the oeuvre of Guido da Siena and his circle.[646] Let us reconsider the characteristics of this central panel and the treatment of the triptych as a whole.

One of the new developments found in this triptych is the intensive decoration of the backgrounds, haloes, certain passages in the textiles, and even the border frame of the central panel, with gilding over raised gesso or with incised patterns in the gold grounds. None of the three early works we discussed employed these highly decorative techniques extensively, but we did remark on the fact that borders of the haloes in the Perugia Missal panels were incised. In the triptych, the wings have extensive raised gesso work, whereas in the central panel the ornamental vocabulary is exceptionally rich in both design and technique. The outer border is a raised gesso version of the diamond and pearl painted design found on numerous Crusader icons of the Acre group. Weitzmann found specific parallels for this painted type in early Pisan paintings.[647] The raised gesso technique of the border, which unites the central panel with the wings, finds its only other presence within the central panel in the cloth of honor on the back of the throne of the Virgin. There we see its raised pointed tetra-lobe designs in diamond forms that echo the same larger pointed tetra-lobe designs painted on the hanging itself. The cloth of honor is, however, understated and clearly subordinated to the bold gold and black frame of the unusually shaped throne,[648] with its decoration of round beads with open centers and two-part hexagons or the strongly stated red and white checkerboard floor under the throne. The tiled floor looks like the artist's decorative attempt at some kind of empirical perspective, but looked at closely, apparently the design is applied to a form that was possibly originally a footstool in the artist's model. The idea of the tiles is found in Tuscan painting, as Weitzmann noted, but in the example he cites, which is apparently a later repainted passage, it is applied to an entire floor across the front of the panel. It is not clear when the floor in the Tuscan panel was painted, or repainted. The fact is that the idea might just as well have originated here in Acre as there, or could even be the result of repainting in the Acre panel.[649] The throne decoration – and indeed the shape of the throne itself – is not paralleled exactly by any known extant Italian work either, but it seems to be a boldly decorative interpretation of what are usually more understated designs found on wooden thrones in central Italian painting of this period.[650]

There can be no doubt, however, that the incised diamond-shaped designs on the gold background, which harmonize with the textile pattern on the cloth of honor placed across the back of the throne, and the incised foliate and palmette patterns on the haloes of the Virgin, Jesus and the angels, or the round stippled dots which texture the background and the haloes, are entirely Italian, not Byzantine or French. In fact this panel contains one of the richest examples of Italianate incised tooling of any extant Crusader icon. This is again a technique that can be found flourishing at this time in Tuscany.[651] Thus, just at the time that the raised gesso or *pastiglia* technique became popular in the Near East among the Crusader artists as a less expensive way of achieving the effects of the more costly repoussé sheets of precious metals on panel painting,[652] the incised decoration also becomes widespread in Italy and the Near East.[653] The Acre Triptych is one of the most remarkable Crusader examples of this phenomenon in the 1250s in Acre.

There are also the two large standing frontal figures on the outside surfaces of the wings of this triptych, images of St. Nicholas on the left and St. John the Baptist on the right. Weitzmann initially attributes these two figures to the same painter who did the central panel; he also claims that this fact provides "proof that the triptych was indeed perceived as a unit and that the center and the wings were executed at the same time."[654] Certainly the two standing figures share with the figures of the central panel similar fleshy faces, similar conventions for the eyes, the same love of decorative forms and the same *pastiglia* in the haloes (as seen on the inside wings) and on the lower hem of Nicholas's liturgical garment under the chasuble. But the differences in facial type with emphasis on the large, long nose in the Virgin and angels, the design of the more round as opposed to the more elongated face, the greater linear precision of the eye convention, the differing proportions of the figures, and the simpler draperies, all suggest the work of a Crusader artist of somewhat different background for these two standing saints. The two outer wings are also distinguished from the inner images in another obvious and important way, by having a red ground, not a gold ground, an idea that also possibly suggests knowledge of Cypriot painting in the second half of the thirteenth century.[655] The artist of the outer wings is close in style to that of the artist of the central panel, but his personal manner of design and painting is nonetheless somewhat different.

Where then does one find these artists' backgrounds? The figure style of the Virgin and the angels with large heads and somewhat melancholy looking faces, with softly painted draperies and with thickly painted chrysography that appears to be "poured" over the body of the Christ child, all seems distinctive. This corresponds to the peculiar proportions and pose of the Virgin with the oddly projecting knee out to the left, and the strange disjunction between the rather large-headed and vertical upper body and the somewhat unclearly defined, broad and massive lower body. It is not an artist that we see elsewhere in the Crusader East, and we certainly cannot find an exact parallel to his work in Italy. But it is to Tuscany and with artists in the circle of Guido da Siena that the most interesting similarities seem to exist. Derbes draws our attention to the Virgin's facial type, with its almond-shaped eye, smoothly



162. Icon: Sinai, App. no. 66/753, the Acre Triptych: left side outer wing, Standing figure of St. Nicholas in episcopal regalia. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

arched brow, and especially its demure smile.[656] If we compare the work of the Madonna del Voto Master, with his individual wide-browed, long-nosed Virgin facial type, its curious flat forehead, and its relationship of the face and head with the border of the maphorion, there seems to be a kinship of design that suggests our Acre artist may also have been originally trained by a Crusader master familiar with this school.[657] Furthermore, we can concretely point to a Byzantine icon, the mid-thirteenth-century Virgin Hodegetria in the church of the Carmine in Siena, as a possible model for painters working in the Guidoesque style.[658] Looking at the Byzantine icon, then at the Madonna del Voto dossal, and then at the Virgin on the Acre Triptych, one can see a relationship of design and painted form that can help us further understand the possible Tuscan background of our Crusader painter's training. Finding a more exact parallel may not be possible, but locating the artist's ultimate background in Tuscany with links to "Guido-style works"[659] in the region of Siena and Pisa is significant for reasons discussed later.[660]

With the two standing frontal saints on the outside wings, it is more difficult to produce exact comparisons. Standing saints under arches are found all over the medieval world, East and West, but it is not possible to cite precise *comparanda* for these two figures as such, posed in an architectural setting. The question here is whether the painter who did these outer wings has the same artistic background as the artist of the central panel, despite the observed differences. The fact is that these frontal standing figures also seem to be the work of a Crusader artist of Italian background. Besides the stylistic features mentioned earlier, the figure of St. Nicholas even features a bold black and white geometric decorative design on the crozier that reminds us of striking Italian geometric designs in Dugento painting and the aesthetic of black and white *opus tessellatum* in Venetian marble floors.[661] His work is, however, distinct in handling from that on the central panel.

Weitzmann was ambivalent about the background of this artist, who did Sts. Nicholas and John the Baptist, but he favored Apulia. Pace has argued that southern Italy is an unlikely background for the painter of these figures, however, as well as for those on the central panel, for reasons of artistic style and the methodology of analysis and interpretation.[662] In fact, these saints on the outer wings compare most favorably, especially in terms of the handling of the head and face, as well as the figure style, not with the figures of the central panel of the Acre Triptych, but with a series of icons which Weitzmann originally attributed to a painter he called the "Master of the Knights Templar," nomenclature that is no longer tenable and that I later propose to change.[663] This comparison is not new; Weitzmann advanced the idea himself in 1966.

> The painter who depicted John the Baptist and St. Nicholas of Bari seems to have specialized in the representation of saints in a frontal position. We have by his hand – and this is one of the rare cases where a considerable number of icons can be grouped together as characteristic of the work of an individual artist – about half a dozen icons, all of approximately the same size and with two or three saints standing side by side. Among these icons is one with two saints, one of whom is Symeon Stylites [Fig. 193, App. no. 11/64] on his column, a figure so similar in its facial features to the St. Nicholas on the triptych wing that, . . . , the assumption of a common hand is justified.[664]

An equally important comparison is made with another icon, the Virgin and Child flanked by St. John the Baptist and Moses (Fig. 194, App. no. 43/428), a work done by a Crusader artist of Venetian background, which Weitzmann characterized as working in a linear Venetian style.[665] Weitzmann recognized these affinities when he concluded his discussion of "the Master of the Knights Templars" group of icons with the following observations:

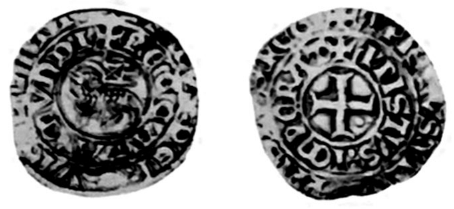
> The hard, linear style of our [St. Nicholas/St. John the Baptist] master has affinities . . . with the icons of the of the second Venetian group [=the linear Venetian style], and while there are distinct differences, it is difficult to decide whether these should be interpreted in terms of different localities or merely in terms of individual artistic personalities. In other words, there is a possibility that our Master of the Knights Templars may have been another Venetian after all or, even if he was a South Italian, may have had a strong connection with Venetian art.[666]

I believe Weitzmann is correct to attribute the basic background tradition of this Crusader painter of St. Nicholas and St. John the Baptist, by the artist he originally called "the Master of the Knights Templars," to Venice, even though he remained ambivalent in discussing these paintings, and tended to favor an attribution to Apulia for the background of this artist long after 1966. For the moment, what is particularly significant is that Nicholas and John the Baptist are painted by an artist who is different from that of the central panel.[667] His facial type is clearly recognizeable, a beautiful synthesis of the sophisticated modeling of the Byzantine[668] with the more linear and decorative Venetian type. Note especially the subtle modeling of the faces and the expressive eyes, which look directly at the viewer, which we find in the icon with the standing Virgin and Child (Fig. 194, App. no. 43/428). Note the similar proportions of the figure of St. John the Baptist in this icon, as well as his costume, and those of the St. John on the Wing of the Acre Triptych (Fig. 161, App. no. 66/753). Note the comparisons of the faces in these figures as well as with that of Moses. Nicholas was popular in the Veneto as elsewhere in Italy, of course, as can be seen in an impressive Pisan altarpiece from the church of S. Verano, where he is also represented as a Latin bishop with his Western miter and crozier.[669]

Meanwhile, St. John the Baptist is a combination of the Byzantine ascetic figure wearing only his hair shirt as seen in thirteenth-century icon painting,[670] but holding a typical Western iconographic symbol, the disc with the *Agnus Dei*. The appearance of this disc is unique among Crusader icons from Sinai, where John appears most often in his intercessory pose as part of the Deësis group without an attribute.

The *Agnus Dei* in a tondo or medallion format, both as an independent symbol and as an attribute of St. John the Baptist, goes back to Early Christian/Early Byzantine art, examples of which can be seen, for example, in mosaics at Ravenna in the sixth century, where the lamb appears without the banner of salvation.[671] This tradition continues at least partially in medieval Italy where one can see the lamb in a medallion, for example, in the tribune vault mosaics of the Cathedral Baptistery in Florence,[672] but Italian painted representations of St. John the Baptist with the lamb on a disc as an attribute are unknown to me in the thirteenth century. Not so, however, in France, where St. John appears in thirteenth-century sculpture as a statue-colonne at Chartres and Reims cathedrals, holding his attribute as we see it here.[673] Of course the format of a standing holy figure gesturing and holding a disc is well-known from the apostle figures lining the nave of Sainte Chapelle.

On the Acre Triptych wing, the lamb with a halo around his head appears facing forward, with his front right leg raised and a white banner behind him emblazoned with a red cross. There was certainly no Byzantine source for this imagery, because the imagery of the lamb as a representation of Jesus had been forbidden in the East since the council of Constantinople in 692. The early-thirteenth-century French imagery mentioned earlier could have been part of the tradition out of which this image appeared in Acre. But the work most relevant to the Acre triptych wing seems to be a remarkable new coin minted certainly after 1251, and apparently *c.*1260 in Acre or Antioch with this iconography. There is no doubt that this rare coin should be placed in the context of the new coinage with Christian inscriptions instigated by the papal legate, Eudes de Châteauroux, and struck in Acre from 1251 on, whether it was minted there or not. But the gold *Agnus Dei* bezant is a special coin, anonymous and undated, that has on its obverse the Paschal Lamb, with the inscription *Agnus dei qui tollit peccata mundi.*[674] On the reverse is the inscription, + *Xpistus:vincit Xpistus:regnat* + *Xpistus :imperat* (Fig. 163). Just as we see in the painting, the lamb is nimbed, and behind him appears the banner of salvation. These examples differ from the related French antecedents because the banners billow out from cross-staffs, so that the cross is part of the staff and is not on the banner itself. The two Crusader examples are not exactly the same either, suggesting that neither was the precise artistic model for the other,[675] but they both seem to find their common context in the Crusader capital city.



163. Acre: golden *Agnus Dei* bezant. See COLOR PL. 7 (photo: after Slocum catalogue)

This numismatic image of the *Agnus Dei* is the closest comparison piece to the medallion, but it is not the only example that may be relevant here. We find among the seals used by both the Hospitallers and the Templars, examples which feature the *Agnus Dei*. The most interesting example for the Hospitallers is the seal used on a document of 1221, in which Cardinal Pelagius settled a dispute between the Knights of St. John and the Templars over the town of Jabala.[676] As for the Templars, it is remarkable that among extant seals, the imagery of the *Agnus Dei* is the most prevalent with nineteen surviving examples, although none is directly connected to the Holy Land.[677] Templar Masters in France, Aragon, and especially England used this motif on their seals, including the important English master, Richard of Hastings, one of the two Templars who commissioned a translation of the book of Judges into Old French in the third quarter of the twelfth century.[678]

It is immediately evident that the image of the *Agnus Dei* in a medallion-shaped configuration, besides being the attribute of St. John the Baptist, is a generic symbol of the lamb in the Book of Revelation where it is associated with the book of the seven seals. Here in Acre, however, two events occurred that might have been related to or even stimulated this unusual iconography, namely, the minting of the new *Agnus Dei* coin *c.*1260 and the sweeping 1258 agreement concluded jointly by the Hospitallers, the Templars, and the Teutonic Knights designed to end internecine rivalries among them.[679] Future research will determine whether the Acre Triptych may have been specifically commissioned with either event in mind, but for the moment, we can note the parallels all of which tend to indicate a dating in the late 1250s or the early 1260s, perhaps *c.*1260.

In both images of St. Nicholas and St. John the Baptist, therefore, we find an interesting synthesis of East and West. St. Nicholas wears Western episcopal vestments, but he blesses in the Greek manner. St. John is holding an attribute that looks rather French Gothic in origin, but his figure style and costume is decidedly Byzantine in type, quite in contrast to the Gothic images on the French cathedrals. As a pair they represent the two most popular saints both East and West in the thirteenth century, figures that here also link this triptych to the liturgy. Nicholas is dressed in liturgical garments ready to celebrate the divine mysteries; the attribute of John the Baptist represents the *Agnus Dei*, that is, the image of Christ taken from St. John's Gospel, I, 29: "Behold the lamb of God, who takes away the sin of the world." With these beautiful words John the Baptist proclaimed his recognition of Jesus as the Messiah. As a part of the Latin liturgy these words, "*Agnus dei qui tollis peccata mundi*," are found in the prayer known as the *Agnus Dei*, which comes after the kiss of peace is given, just before communion.[680]

In sum, Sts. Nicholas and John the Baptist introduce us to this triptych. It is a triptych that has the character of a specific Crusader synthesis appropriate to its function not only as a devotional work in honor of the Virgin, but also as a liturgical altarpiece for the Latin rite. The presence of saints Nicholas and John the Baptist in conjunction with the Virgin and Child on the central panel forms an introduction to what we will find inside the triptych when it is open. They also form a prelude to an iconography we will find in the later Middle Ages, namely, that of a variation on the Deësis, where the Virgin and Child now replace the figure of Christ alone, and Nicholas and John the Baptist are the intercessory figures, a group we find in the fourteenth-century chapel mosaics of St. Isidore in San Marco in Venice.[681]

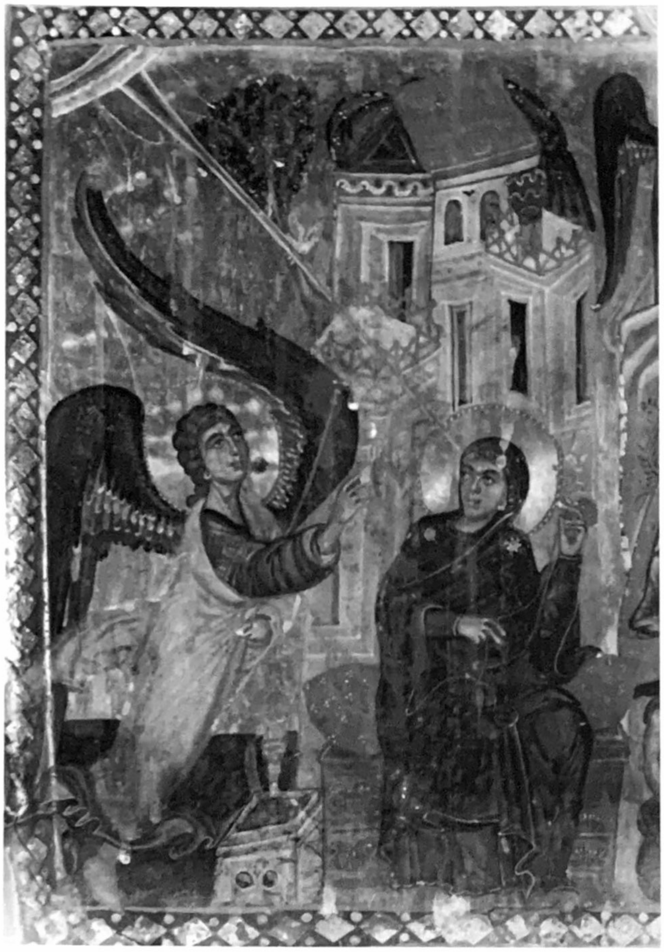
What then can we say about the date of the Acre Triptych and the circumstances of its commission? Like the artist of the Arsenal Bible, the painter of the Virgin and Child in the Acre Triptych was someone whose master's primary training may have been Western, indeed Tuscan, but who certainly had been exposed to considerable Byzantine and Crusader painting as well. In this case the artist may well have been working in the latter part of the 1250s or early 1260s, some years after the Arsenal Bible was done, but his Crusader combination of East and West shares with it at least one notable feature. Just as the Arsenal Bible Master combines the dramatic ornamental vocabulary of stained-glass windows with the Franco-Byzantine figural style of the frontispiece miniatures, the Acre Triptych Virgin and Child master combines the intense decoration of painted and incised ornamental surfaces with his monumental Italo-Byzantine Crusader figure style of the enthroned Virgin and Child with angels. Furthermore, this Triptych is linked by small details to the earlier icon paintings of *c.*1250. We notice, for example, that the haloes of the holy figures on the inside wings are given the same lovely red borders with white pearls that are found on the Crusader Crucifixion icon that we compared with the Perugia Missal Crucifixion panel.[682]

In the case of the Acre Triptych, of course, the distinguishing feature is the combination of what are in effect, three Crusader stylistic variants – one from a Franco-Byzantine tradition for the inner wings, the others Tuscano-Byzantine for the central panel, and Veneto-Byzantine for the outer wings – in the same work. This multicultural Crusader workshop product is of course not unique; we have already seen mutatis mutandis the pairing of Byzantine and Crusader painters in Constantinople, and we will see other examples later in Acre as well, for example, in manuscript illumination. But in the case of the Acre Triptych we may wonder what occasioned such a distinctive commission in Acre at this time.

The Acre Triptych is remarkable as a Crusader work for its stylistic richness and lavish decoration, for its notable and unusual programmatic content, and for its remarkable and special iconography. Its appearance in Acre seems to parallel certain major political, military, and economic developments that took place in the later 1250s, centered on the War of St. Sabas. The distinctive features of the Acre Triptych include the combination of a French-influenced and two Italian-influenced Crusader styles in one work. The significance of this combination as a direct reflection of the situation in Acre seems to lie in the fact that the Venetians and Pisans had expelled the Genoese as a viable commercial power in the capital city by 1258. The Acre Triptych appears to reflect the new reality of French and Italian presence and power in Acre, which was brought together in this work, perhaps as a commission linking French with Tuscan and Venetian interests.

Could this work have been ordered as an important diplomatic gift made to recognize the consummation of a major treaty? We have no concrete event,[683] no specific church,[684] no particular patron(s), and no exact moment to propose, as yet, for this work to have been called into existence. We cannot definitively say what the use of three Crusader artists or styles signified. Nor is it known exactly what the Tuscan background for the central panel painter, along with those of Venetian and French background for the wings, meant in this ensemble. But it seems very likely that it was meaningful in some way for both the patron(s) and the recipient(s), as well as for the function of the Triptych. In light of the numerous works of Crusader icon painting that can be associated with Crusader artists of Venetian background in Acre from *c.*1260 on, the fact that here an artist of Tuscan background was used for the main cult image seems worthy of note. It is certainly significant that an artist of Genoese background was not used. The commission of the Acre Triptych could well have been intended to cement Tuscan, French, and Venetian ties in some way during or, more likely, just after the War of St. Sabas. This could have been intended in terms of personal relationships, or in terms of some kind of political and economic cooperation, where the multicultural stylistic repertory of the triptych would have been meaningful to those involved.

Or perhaps the Acre Triptych was commissioned for a confraternity or a religious order in Acre, or a group of confraternities. For a confraternity, membership was normally open to people of one place of origin, for example, from one of the Italian city states.[685] Seen this way it would perhaps be significant for the commission that the central panel had Tuscan connections, and the presence of artists from other backgrounds could be explained as constituting the available resources of the atelier where this work was produced. We shall have to await the findings of further research to help us understand the intent of the patronage and the function of the work more clearly and specifically. However, based on the monumental Virgin and Child images commissioned in Italy for members of confraternities and religious orders in Tuscany, images such as Duccio's *Rucellai Madonna*, done for the Laudesi in 1285[686] or Coppo di Marcovaldo's *Madonna del Bordone* done for the Servites in 1261,[687] such patronage would surely be possible and not unlikely in Acre.[688] Not only do we note the overwhelming focus on the cult of the Virgin which characterized the devotional attention of many confraternities and orders, and certainly also



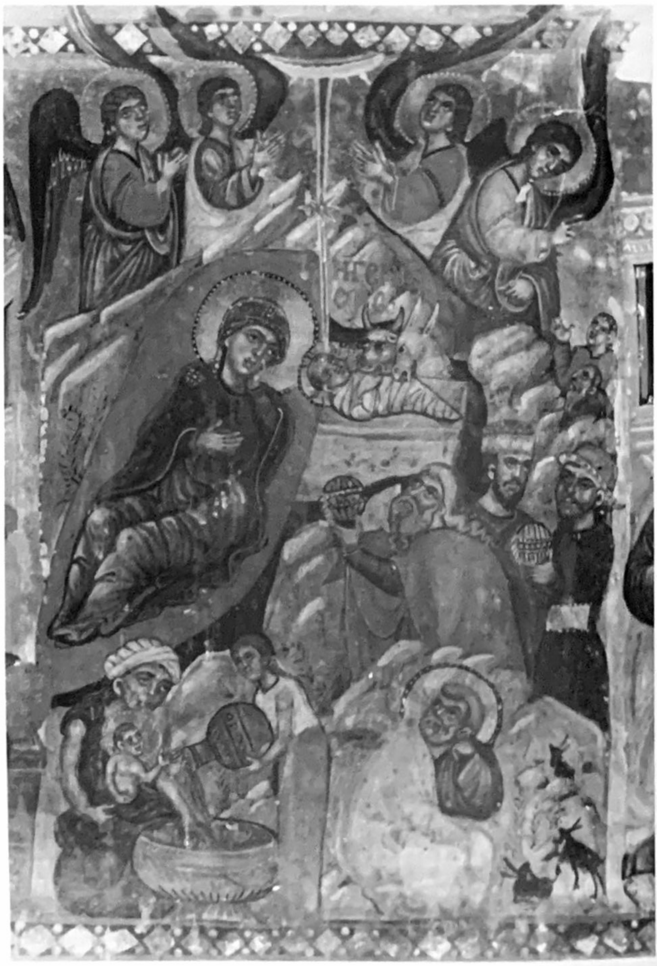
164. Icon: Sinai, App. no. 105/1744, Iconostasis Beam, scene of the Annunciation. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

the Carmelites, for example, but also the choice of Sts. Nicholas and John the Baptist, two of the most important and universally revered saints in the Byzantine and Crusader East. Taken together these features would be attractive and characteristic of the religious interests among several possible confraternities or orders in Acre in the late 1250s or the early 1260s. Whoever the patron eventually turns out to be, the Acre Triptych, done let us propose between *c.*1258 and 1261,[689] seems to be surely an important indication of the growing multiculturalism of the Crusader artistic milieu and increased sophistication in the interactive development of Acre-based Crusader painting.

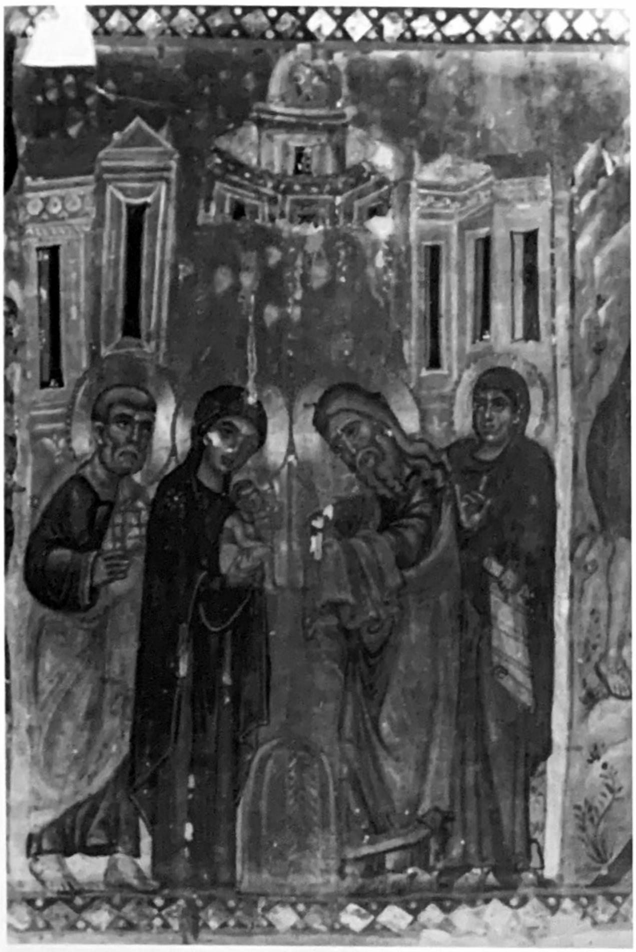
We can test our findings in regard to the Acre Triptych by examining another large and important work done about 1260, an iconostasis beam now in the Monastery of St. Catherine's on Mount Sinai.

THE ICONOSTASIS BEAM OF THE TWELVE FEASTS, *C.*1260: There are in the collection of the Monastery of St. Catherine's on Mount Sinai a number of special works, iconostasis beams painted with the scenes of the twelve liturgical feasts drawn from Byzantine images of the *dodekaorta*. In contrast to the panels just discussed, these beams were apparently made for a particular chapel, to decorate the top of the templon screen.[690] Given the existence of a special chapel for Frankish pilgrims served by Latin monks at St. Catherine's, the Chapel of St. Catherine of the Franks, as it became known later, iconostasis beams decorated by Crusader painters with measurements corresponding to the dimensions of this chapel would seem to have been made for use there. Two of these beams were clearly done by Crusader artists, one by an artist working in a Veneto-Byzantine Crusader style.[691] The scenes contained on this latter beam are strongly characteristic of Crusader work and can be related directly to Acre images of *c.*1250 (Figs. 164–76, App. nos. 105, 106, 107/1744–1746, Figs. 393, 394, 395). Their style and iconography raise several important questions about the function of this beam, however, including exactly where it was originally intended to be used and the reasons for its commission and execution.[692]

The main images that appear on these beams are the twelve great feasts of the Byzantine calendar, starting with the Annunciation and ending with the Koimesis. On the Crusader-commissioned examples, such as this one, it is common to expand the cycle with one to three additional scenes. In the case of this beam, the scene of the Last Supper is added, in its correct liturgical place between the Entry into Jerusalem and the Crucifixion. As Weitzmann points out, "in Byzantine art the Last Supper has great liturgical significance, being usually grouped



165. Icon: Sinai, App. no. 105/1744, Iconostasis Beam, scene of the Nativity and the Three Magi. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



166. Icon: Sinai, App. no. 105/1744, Iconostasis Beam, scene of the Presentation in the Temple. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

together with the Washing of the Feet,..., but they are not part of the great feast cycle, and this intrusion may thus be attributed to a Western mind."[693]

The beam with its thirteen scenes has been published already, but the entire cycle is worth considering further, with all the issues that the scenes raise.[694] The most familiar image from this beam is the Crucifixion,[695] which relates directly to the earlier Crusader icon and the miniatures in the Perugia and Egerton missals. Weitzmann discussed the Crucifixion at some length in 1963, noting the close iconographical relationship with the earlier Crusader Crucifixion icon and the Perugia Missal Crucifixion in terms of their poses and gestures, but pointing out the different style of this artist. The sturdy and thickset figures, the greater solidity of the bodies, and the voluminous folds of the loincloth led Weitzmann to suggest a Crusader painter of Italian background, but one who was clearly integrated into the characteristics of the Acre school of painters. On the basis of further discussion in 1966 in which he compares the work of this painter with a Venetian diptych now in Bern, Weitzmann proposed to identify Venice as the place of origin for this Crusader painter or the place of his training.[696] I would propose to modify this assessment to indicate that this artist was a Crusader artist with significant Venetian influence in his training.

His Venetian "background" notwithstanding, the painterly style and the iconographic details taken together, such as the treatment of the beveled cross, his use of the red halo borders decorated with pearls, the rolling-eye convention – all of these aspects indicate an artist well-acquainted with Crusader icon painting in Acre. It is also notable that the inscriptions on this image are written in Greek, indicating something important, either about the function of this beam or its intended location, or both. But the Greek letters are timidly formed and rather inelegantly painted on the crossarm by the head of Christ, suggesting an artist – or some assistant[697] – who was not fully comfortable with Greek. Other features also suggest a Western-trained artist, such as the rectangular format of the scenes, instead of the customary Byzantine arched configuration.[698] The framing ornament of golden diamonds and white pearls set on a black ground seen here, found in Pisan painting and used widely in Crusader work, is also employed in a raised gesso version on the Acre Triptych, as discussed earlier. By contrast with that work, however, the haloes here are done in a Byzantine technique, creating the effect of rotating wheels, instead of the elaborate ornamental aesthetic expressed in raised gesso *pastiglia* often found in these Crusader works.[699]

Some of the scenes on this beam show that the Crusader artist was able to follow his Byzantine model accurately, without significant iconographic changes. These scenes include the

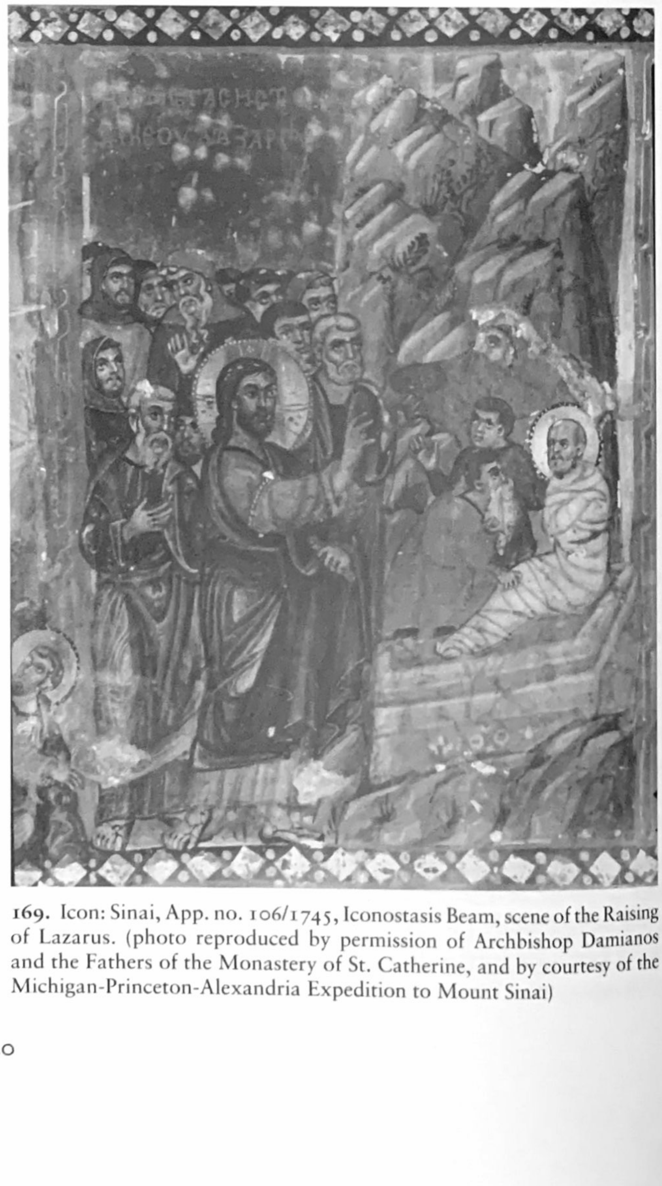
168. Icon: Sinai, App. no. 106/1745, Iconostasis Beam, scene of the Transfiguration. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

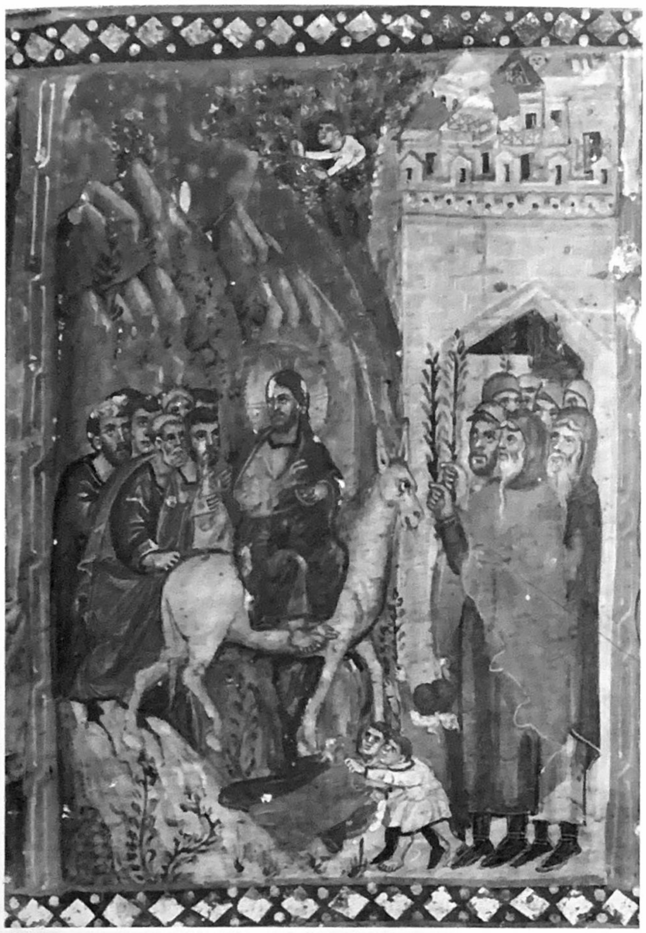
Annunciation, the Presentation in the Temple, the Baptism of Christ, the Transfiguration, the Entry into Jerusalem, and the Harrowing of Hell.[700] Although it is true that there are occasional variations, for example, the artist emphasizes the element of surprise to the Virgin by posing her with her back turned to the angel in the Annunciation, but otherwise the basic iconography of these scenes is entirely traditional Byzantine imagery.

Other scenes on this iconostasis beam, however, indicate that this Crusader painter, although he looked at Byzantine art through a Crusader training grounded in the Venetian tradition, "imitated Byzantine models as closely as possible, but on occasion consciously inserted an element of Western iconography or invented new details."[701] Weitzmann points out, for example, that in the Pentecost scene, the Crusader painter has revised the standard Byzantine iconography. First, the apostles are seated in a manner approximating a circle following Western medieval convention, and second, instead of having Peter and Paul jointly seated in the central place of honor, here Peter is alone given this distinction, again a totally Western choice.[702] In discussing the Koimesis scene, Weitzmann poses the difference between what he calls a "carelessness in iconographical accuracy" with deliberate programmatic choice. In this image the group of apostles at the bier of the Virgin, usually led by St. Paul and placed on the right side, at her feet, has been replaced by a group of four angels. Besides their un-Byzantine location, their iconography and function are also entirely Western: They hold orbs and scepters, paying her homage. Thus, like the program of the Acre Triptych, here again we see a deliberate celebration of the Virgin with her regalia as queen of heaven, a completely Western interpretation.[703] In the image of the Raising of Lazarus, the standard Byzantine iconography of Lazarus standing at the entrance to his tomb is totally changed by depicting him seated upright on the lid of his sarcophagus.[704] This representation seems to be more of an example of iconographical deviation by an artist not thoroughly trained in Byzantine imagery, and not familiar with the specifics of the biblical text of John 11: 38–44. Finally, in the case of the Last Supper, decidedly Western iconography has been introduced by the imagery of St. John, the beloved apostle, reclining on Christ's chest, and the presence of Sts. Peter and Paul holding attributes in their hands.[705]

Among the various scenes that reflect Crusader sensibilities on this iconostasis beam, perhaps the most interesting and significant iconographic choices are found in the Nativity scene, which is combined here with the Adoration of the Magi. Whereas the iconography of the Nativity follows fairly standard Byzantine conventions, it is the representation of the three magi that excites our special interest. In Byzantine and Western iconography in the twelfth and thirteenth centuries, the magi are normally characterized as an elderly bearded figure, a middle-aged bearded figure, and a youthful beardless figure. In the West after the tenth century, the magi are also



169. Icon: Sinai, App. no. 106/1745, Iconostasis Beam, scene of the Raising of Lazarus. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



170. Icon: Sinai, App. no. 106/1745, Iconostasis Beam, scene of the Entry into Jerusalem. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

regularly depicted as kings wearing crowns, but in Byzantine art they continue to wear Persian dress as Easterners.[706] Here, however, it is evident that they are all three quite distinctive and follow neither tradition. The eldest figure, with long flowing white hair and beard, wears a striking red cloak; the central figure, who is much more youthful, wears a short beard and an Italian nobleman's cap decorated with ermine. The third magus, who is also bearded, is represented as a Mongol. He has the Mongol physiognomy and wears a characteristic Mongol cap.[707]

Weitzmann noted this departure from standard iconography and he proposed to identify the Mongol as a representation of Kitbogha, the Nestorian Christian general in command of Mongol forces in Syria in the late 1250s.[708] Although Weitzmann recognized the middle magus as a Westerner, he declined to attempt to identify him or the other older figure. Instead, having gone this far, he concluded that "with the portrait of Kitbuqa, the Nativity picture becomes an expression of the oecumenical hopes of the Pope, St. Louis, and all the Crusaders that an alliance with the Mongols would be a first step toward making Christianity the world religion."[709] I believe we can, however, go further with the interpretation of this image.

Recall that in 1260, after the Mongols had conquered Baghdad, Aleppo, Harenc, and finally Damascus, the prince of Antioch and the king of Armenia had treated with the Mongol general to avoid attack on their own territories. As a result of their peaceful overtures, Bohemond, prince of Antioch, and Hetoum, king of Armenia and Bohemond's father-in-law, were apparently invited to accompany Kitbogha when he entered Damascus with the victorious Mongol army at the beginning of March 1260, according to the account of the Templar of Tyre. As we have seen earlier in the chapter, Runciman characterized it in dramatic fashion: "the citizens of the ancient capital of the Caliphate saw for the first time for six centuries three Christian potentates ride in triumph through their streets."[710] Here I propose to see this image as additional indirect evidence for the factual accuracy of what the Templar of Tyre reported.

Looking again at the Nativity scene with the three magi, I suggest that these three figures represent Hetoum I as the eldest magus in his royal red robe, Bohemond VI in his noble Italianate dress, and Kitbogha, the victorious Mongol general.[711] They appear here in honor of the remarkable alliance, that, as Weitzmann suggested, for a fleeting moment offered the hope of making Christianity a world religion. Kitbogha "was said to be descended from one of the three Wise Men from the East," hence his appearance here as a magus, with his other "Eastern" Christian allies.[712] His physiognomy is characterized as Mongol, and he wears a typical Mongol cap decorated with gold. He also wears a beautiful purple robe with circular

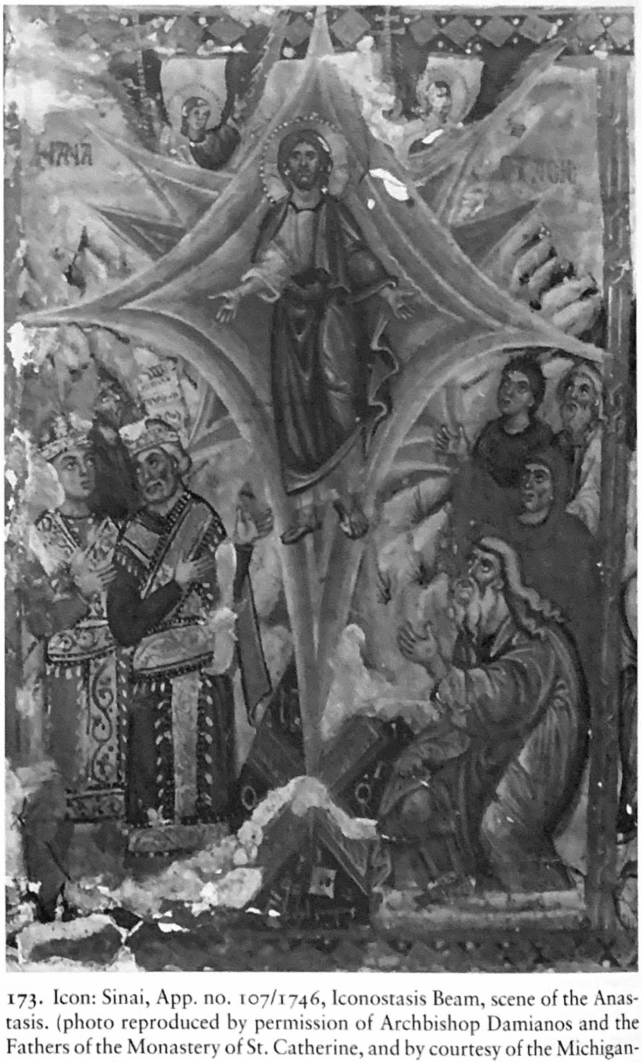
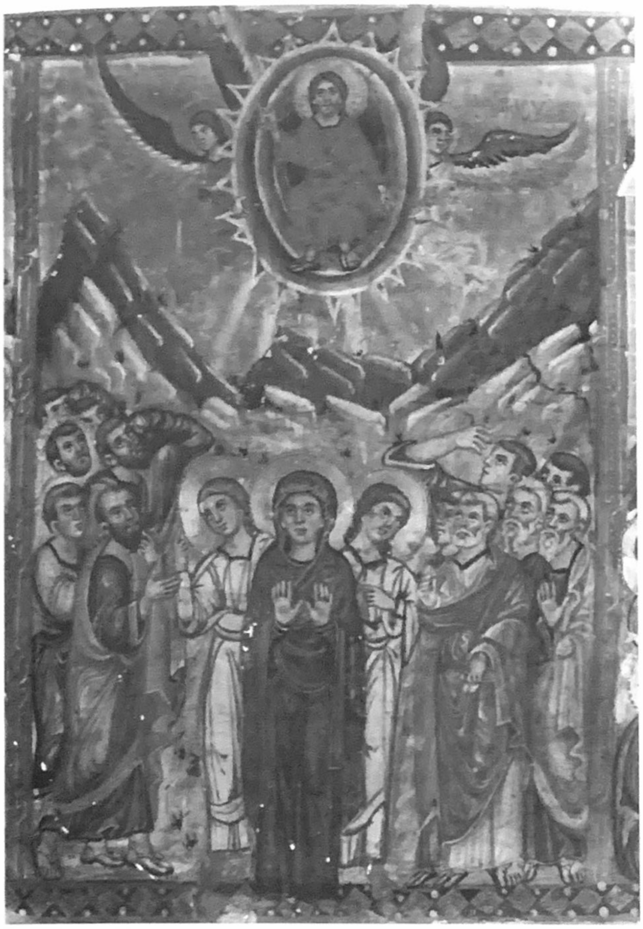
golden designs and a wide gold belt bordered with pearls.[713] The Mongols are famous for the importance they put on sumptuous garments and the royal use of gold.[714] Hetoum, the Armenian king, had reigned since 1226, so he, who had ruled for an amazing thirty-four years by this time, was the eldest magus. Although we have no image of Hetoum I to compare with this image, his brilliant red robe is a characteristic feature of royal and princely Armenian portraits in the second half of the thirteenth century, as seen in the Gospels of Queen Keran (Jerusalem, Armenian Patriarchate, MS 2563, 1272) or the Prince Vasak Gospels (Jerusalem, Armenian Patriarchate, MS 2568, thirteenth century).[715] We also see royal red robes in the portrait of Prince Oshin from the Oshin Gospels (New York, Morgan Library, MSS 740 and 1111, 1274), which features also Bishop Johannes, the brother of King Hetoum I, in his sumptuous chasuble of blue with large golden fleurs-de-lis.[716] Johannes was noted for his interest in rich textiles, so the lavish garments in this remarkable dedication page, recently reunited with its Gospel Book (MS 740) in the Morgan Library, cannot be surprising.[717] Hetoum and Kitbogha both carry round golden vessels, the nature of which is similar to, but not the same as, pierced globes used as incense burners by the Mamluks.[718] Bohemond's Crusader ancestry as ruler of Antioch was, of course, ultimately Italian, hence his aristocratic Italianate costume. Again, we have no portrait of Bohemond to compare here either, but a slightly later image of his beardless relative, Tancred, exists in the William of Tyre codex, Paris, BN MS fr. 9084, on fol. 42r. The manuscript dates from the 1280s and is discussed in Chapter 7, but the miniature demonstrates a characteristic Crusader imagery for a Crusader prince, similar albeit somewhat more simplified in its details of the headgear.

One unusual feature of these special magi is the fact that all three are bearded. It is not surprising that the Hetoum would be depicted with a long white beard because he is represented at the eldest magus, and in any case he was the oldest of these three figures. Having been crowned king in 1226 at a young age, he must have already been about fifty years old in 1260. Kitbogha as the youngest magus is the least likely to have been bearded according to iconographic tradition in regard to this scene. However, there can be no doubt of the artist's intent to represent a Mongol physiognomy here, and this thin beard type is standard imagery for Mongol leaders at this time, even if we do not have a portrait of Kitbogha with which to compare it.[719] Bohemond presents a special problem, however. Westerners at this time were distinguished from Greeks and others in the Near East at this time by not wearing a beard, as we know from various accounts.[720] In this case, however, it is first of all typical of the "middle" magus to wear a beard in the iconography of



173. Icon: Sinai, App. no. 107/1746, Iconostasis Beam, scene of the Anastasis. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



174. Icon: Sinai, App. no. 107/1746, Iconostasis Beam, scene of the Ascension. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

this scene at this time, and second, even though we do not have a portrait of Bohemond to compare with this image, it was not uncommon for Crusaders to adopt Eastern style in their modes of dress and appearance. Furthermore, the whole point of Bohemond as magus was the idea of representing him as coming from the East, so the artist appears to have combined the Italianate headdress with the Eastern-style beard to characterize the count of Tripoli in his special role for this image.

Why then would this scene appear on an iconostasis beam, painted by a Crusader artist? Who is likely to have made this commission, where was it executed, and for what church was it intended? Weitzmann's thought is clearly that this iconostasis beam was executed for the Frankish chapel in the Monastery of St. Catherine's on Mount Sinai.[721] But there is another more attractive possible function for this beam that must be considered. When the Christian triumvirate entered Damascus, Kitbogha is reported by the Templar of Tyre to have given Bohemond and his Frankish troops a place of worship. It was a former Byzantine church that had for a long time served as a mosque. Bohemond "purified and censed" it for use again as a Christian church, and "he had the Frankish mass sung within it, and had its bells rung.[722] It is hardly surprising that Bohemond would have ordered a Latin Mass to be performed in it, but because the only concession that the Mongols had demanded from Bohemond earlier, when he had sought a peaceful alliance with them and offered his submission, was the restoration of the Orthodox patriarch in Antioch,[723] and because the church in question in Damascus had formerly been a Byzantine church, it seems possible that the real purpose of this restored church in Damascus was to be open, not only to Latin Christians, but also to Eastern Christians as well.

I propose that this iconostasis beam may therefore have been commissioned with this special iconography to decorate the newly reclaimed church in Damascus, an order sent from Bohemond to the Latin icon painters at St. Catherine's Monastery on Mount Sinai. Perhaps the wood for the beam was sent to Sinai from Tripoli at Bohemond's directive,[724] and perhaps Bohemond's commission was transmitted to Sinai via Acre, where he knew the painting could be ordered immediately with the best possible available painter.[725] However it was effected, the commission was duly carried out in mid-1260, with the special imagery indicated to commemorate the triumphal entry of Kitbogha, Hetoum, and Bohemond.

Unfortunately, however, by the time the work was done, the political and military situation had changed, swiftly and radically, and it was not possible to deliver the beam because by then Damascus was back in Muslim hands and the church for which the beam had originally been intended was presumably once again a mosque under Muslim control. The pivotal event

176. Icon: Sinai, App. no. 107/1746, Iconostasis Beam, scene of the Dormition. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

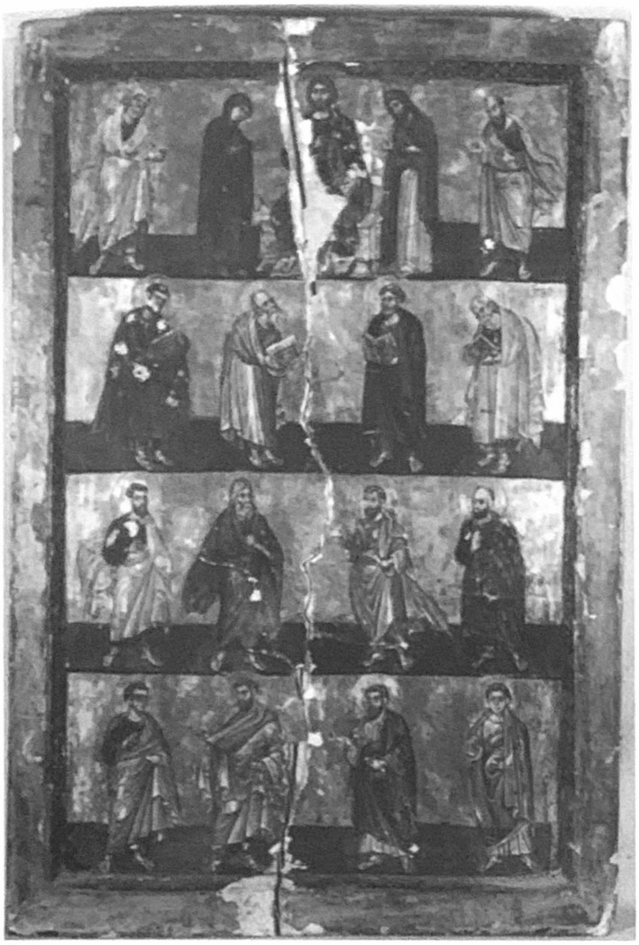
for all of this was, of course, the battle of Ain Jalud, in which on 3 September 1260 the Mongol army was destroyed, Kitbogha was decapitated by Baybars, and the Muslims were restored to power in Syria. The dream of Christianity conquering the Near East, retaking the Holy City of Jerusalem, and making Christianity the dominant world religion through a Crusader alliance with the Mongols and the Armenians was now definitively over. It was now clearly Islam that would become the dominant world religion in the Near East.

What irony that a Crusader painter of Venetian background would paint this image, for it was the Venetians and their trade routes especially whom the feared Mongols threatened throughout the later thirteenth century! What a vivid illustration of the vicissitudes of history that an iconostasis beam, apparently commissioned to decorate the sanctuary of a Christian church in Damascus could never reach its intended destination and instead remained in the monastery where it was painted, its original purpose apparently unrecognized for centuries!

Whatever we may think about this hypothesis for the iconostasis beam as the work of a Crusader painter in 1260 strongly reflecting the Venetian tradition, work possibly done at St. Catherine's Monastery on Mount Sinai,[726] we must point out that it is only one example of a number of important and impressive paintings done in Venetian-based Crusader styles. This is truly remarkable in view of the fact that, first, we have so little Venetian painting in Venice at this time, and second, that we have so little Venetian painting in Constantinople at the time of the Latin Empire or from anywhere else in their growing and far-flung commercial holdings.

What is the significance of these Crusader panel paintings in the decade of the 1250s in Acre? Examination of the Crucifixion panel (Fig. 152, App. no. 104/1732) done *c.*1250, the Acre Triptych (Figs. 155–162, App. no. 66/753) done in the late 1250s or early 1260s, and the Iconostasis beam (Figs. 164–176, App. no. 105, 106, 107/1744–1746) done in 1260, has provided us with clear indications of multiple artists working on these commissions, sometimes Crusader artists from different backgrounds working on the same project. These works have also provided us with indications of important origins for the traditions these several Crusader artists worked with, either from French backgrounds, Tuscan backgrounds, or Venetian backgrounds. We shall look with interest at what other panels can be related to these Crusader variations of the Acres style. We shall be able to use the three examples cited earlier, as well as the related manuscripts to help us date and contextualize other works. These works seem to indicate also how multicultural Acre was as a center for Crusader painting. This is something we have not seen in Crusader art since the mid-twelfth century with such notable examples as the Psalter of Queen Melisende (*c.*1135) in Jerusalem and the program of mosaics in the Church of the Nativity in Bethlehem (*c.* 1167–9). Clearly, the patronage and the presence of King Louis IX must have greatly stimulated the production of the figural arts in Acre, just as he stimulated the architectural work on major Crusader fortifications. How did the Franco-Byzantine Crusader style develop from the earliest examples in 1250 to the inner wings of the Acre Triptych in the late 1250s, and beyond? What other works, if any, are there in the Tuscano-Byzantine Crusader style that appears in Acre at the end of the 1250s on the Acre Triptych? What other panel paintings do we find by the artists working in the Veneto-Byzantine Crusader style of the iconostasis beam before and after 1260? Where were these various artists working? Which works were done in Acre, which in St. Catherine's Monastery on Mount Sinai, for Crusader, Frankish, or for Eastern Christian patrons?

Other Icons: the Franco-Byzantine Crusader Style in Acre, 1250 to the Early 1260s[727]*:* After the departure of Louis IX in April 1254, the French presence was directly maintained by the soldiers of the French regiment. It appears that these men and their retainers, along with other pilgrims from France, and, of course, the resident Crusaders of French ancestry provided a sustained interest in commissioning icons, as well as illustrated manuscripts, in the Franco-Byzantine Crusader style in Acre. There are several groups of icons in that style that we can recognize in the succeeding years. The surprising aspect of these examples is the range of variation we can find in their styles, some of which we have already seen. For example, there are works that are quite closely related in general stylistic characteristics to the Perugia Missal and the Arsenal Bible style, such as the Crucifixion panel (Fig. 152, App. no. 104/1732) discussed earlier or a panel with the Twelve Apostles standing below an image of the Deësis (Figs. 177–9, App. no. 18/137). There are also works that are so close to their Byzantine models



177. Icon: Sinai, App. no. 18/137, Panel with the Deësis and Fourteen Apostles. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

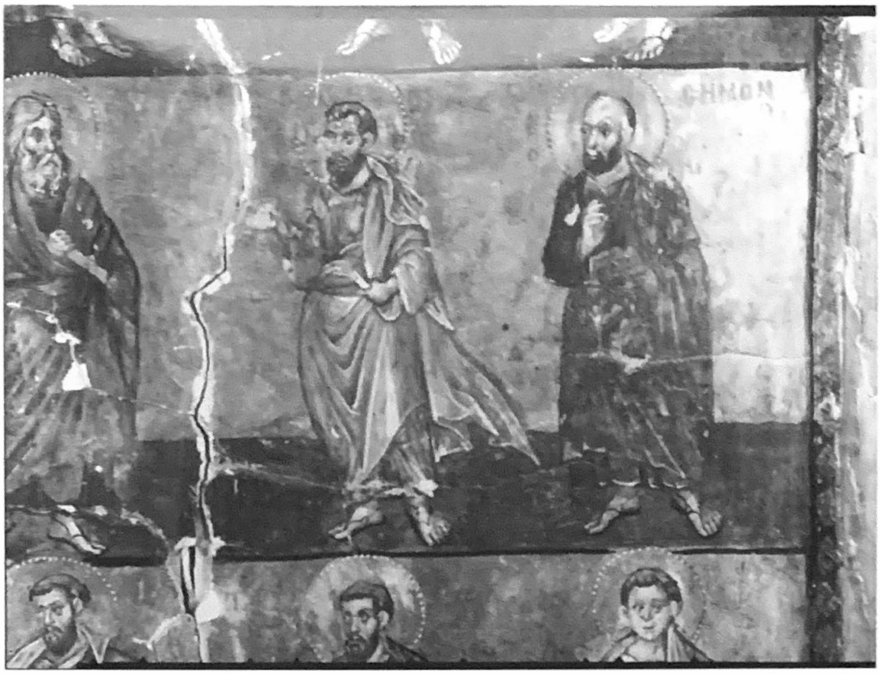
that we might not recognize them as Crusader were it not for certain decisive iconographical deviations, or for their stylistic variations. A handsome icon of the *Koimesis* (Fig. 266, App. no. 87/1394) from the 1270s or 1280s, or a Nativity panel (Fig. 188, App. no. 113/1831) from the 1250s, present good examples of this type. These works are often paintings of very high quality, some of which also relate to Armenian painting. At the other end of the spectrum, there are works that are quite close to French Gothic painting in style and iconography. The tiny *Maestas Domini* panel (Fig. 51, App. no. 34/308) discussed in Chapter 3 is one example, and there is a charming triptych with the Virgin and Child enthroned (Fig. 205, App. no. 70/822) as well. There are relatively few icons in this category, and those that exist are rather timid attempts to master the challenge of painting holy images on panels as known from Byzantine models, but they represent an important artistic and cultural development in Acre that strengthens as the years go by.

The challenge with all of these panels is to attempt to evaluate these works in terms of function, as we have tried to do with the Arsenal Bible, with the Acre Triptych (Figs. 155–162, App. no. 66/753), and with the Sinai iconostasis beam (Figs. 164–176, App. no. 105, 106, 107/1744–6). We also want to assess them as far as possible in context with regard to possible patronage and ownership. We shall attempt to date these works in some reasonable manner and to relate and interpret them meaningfully with regard to other major paintings, either from the Latin Kingdom or from outside the Crusader sphere of development. These panel paintings are among the most difficult of all Crusader works to study, precisely because of their lack of obvious context and explicit documentation. Our path has, however, been blazed by the substantial pioneering work of Kurt Weitzmann, along with discussion by others, all of whose work will enable us to push the discussion along and bring new insights to our understanding of these important paintings. We are reminded that Weitzmann in his many articles repeatedly observed that his "remarks about... Crusader icons are preliminary and constitute only the barest frame for further treatment of a new and vast subject and more details will have to be filled in by future research."[728] Obviously what he offered, taken collectively, amounted to much more than "the barest frame," but we will attempt to carry on with the process of adding to the discussion.

Starting then with the works closely related to the Acre Crucifixion panel and the manuscripts associated with it, such as the Arsenal Bible (*c.*1250), the Perugia Missal (*c.*1250), and the Padua book of Old Testament selections (*c.* early 1250s), Weitzmann and Belting draw our attention to two interesting panels. One is an icon containing the Deësis flanked by Sts. Peter and Paul, with twelve other apostles assembled below in three rows (Figs. 177–9, App. no. 18/137). The other is an icon of the Annunciation (Fig. 180, App. no. 5/44), mentioned earlier as being closely linked to the style of the first painter of the Perugia Missal. Both panels are probably based on larger models, an iconostasis beam in the case of the former and a larger feast picture in the case of the latter, but they themselves are moderate in size. Despite their sources, the likelihood is that they were painted for individual devotional use, probably for a Latin patron, despite the fact that the inscriptions that they carry are in Greek. The iconography and style of both panels exhibit decisive features that indicate their Crusader character.

In the case of the Deësis with four evangelists and ten apostles,[729] the intercessory image is typically Byzantine except for the style of the throne, which relates to several other icons among the Franco-Byzantine Crusader stylistic group.[730] The prominent place of Sts. Peter and Paul, in this case flanking the Deësis along the top row, is characteristic of these Crusader formulations, and we see a variety of parallels in other examples in the Franco-Byzantine group, such as the frame of the Acre Crucifixion (Fig. 152, App. no. 104/1732), the border of another Crucifixion (App. no. 30/261, Fig. 365), or the outer wing of a fragmentary triptych (App. no. 72/886, Fig. 385).

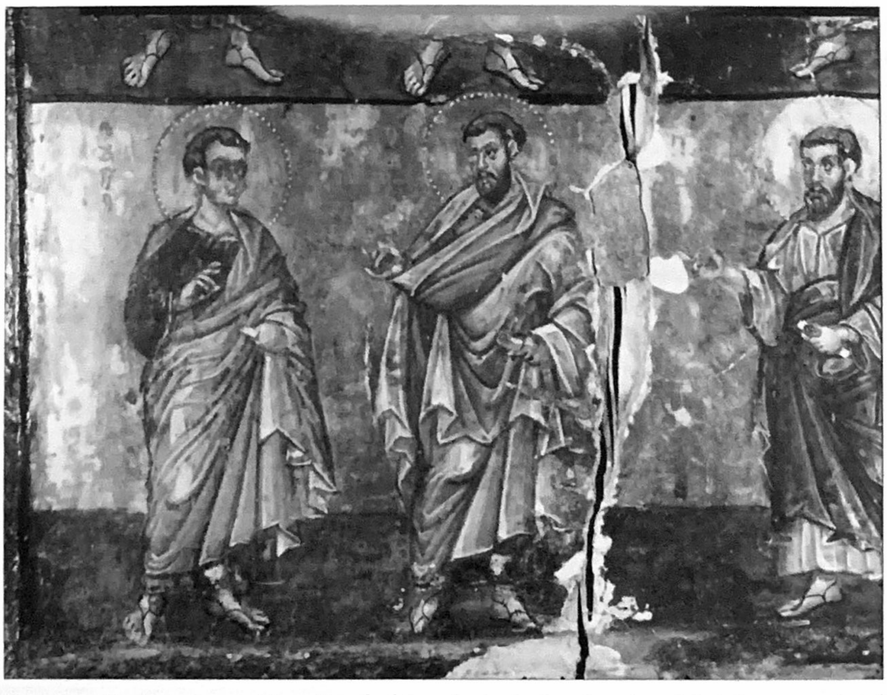
Peter and Paul are joined here by the four evangelists in the second row; in the third row, Bartholomew, Andrew, James (son of Zebedee), and Simon; and finally in the lower register, Thomas, James (son of Alphaeus), Thaddaeus, and Philip. As Weitzmann argues, this set of apostles is unusual,[731] and it is likely that the Crusader painter created the figure types of James (son of Alphaeus) and Thaddeus on his own because they do not follow earlier Byzantine types. It is, however, likely that the artist used as his model paintings based on a conventional iconostasis beam containing a conventional set of twelve apostles, because most of their types are Byzantine. Their



178. Icon: Sinai, App. no. 18/137, Detail of Apostles in the third register, right. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

poses, turning toward the center of the panel, are a matter of composition only in this formulation, but would have been meaningful on a beam with the Deësis in the center of the same register. Weitzmann discusses at length the evidence that such an iconostasis beam with apostles was in fact a Byzantine invention, as was the transformation of this iconography to a portable panel format, which has been reinterpreted here by the Crusader painter.[732]

In stylistic terms, Weitzmann relates the figures on this icon to the inner wings of the Acre Triptych (Figs. 155–62, App. no. 66/753) and the Acre Crucifixion (Fig. 152, App. no. 104/1732), along with another panel containing the Virgin and Child with Moses, Elijah, and St. Gregory of Nazianzus (Fig. 182, App. no. 7/54, Fig. 355). He recognizes the strong individuality of the painter and yet notes his participation in certain features of the Acre style. There are "the faces with their rolling eyes"



179. Icon: Sinai, App. no. 18/137, Detail of Apostles in the fourth register, left. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

that nonetheless are given strong emotional expression in some cases. He notes "the thick-set proportions of the massive Apostles who stand with big feet firmly on the ground . . . and the whirling masses of drapery, which in some instances heighten the emotional quality of the figures." In the end he links this figure style most closely to that of the bowing angels in the panel miniature of the Perugia Missal because of "their extremely squatty proportions and the massive whirling yet softly designed drapery," along with "the type of head with the peculiarly designed eyes."[733] Finally, Weitzmann also draws a general comparison of this exuberant style to the Byzantine frescoes at the Church of the Trinity in Sopoćani (*c.*1260), noting their overall parallels.[734] The conclusion we draw from these comparisons is that it is reasonable to date this panel in the 1250s from Acre, between the Perugia Missal and that of the inner wings of the Acre Triptych.

The other panel mentioned earlier, that of the Annunciation (Fig. 180, App. no. 5/44),[735] is comparable in many ways stylistically to both the angels of the Perugia Missal and to the Deësis with Evangelists and Apostles icon (Figs. 177–9, App. no. 18/137). The draperies of both Gabriel and the Virgin are clearly related. The architecture behind the Virgin with its three-dimensional formulations and its balustrades and ornament is loosely related to another Franco-Byzantine style icon (Fig. 186, App. no. 52/574). The use of haloes with red rims and white pearls is widespread among these Crusader panels, as we have noted. The sinuous Gothic-like pose of the Virgin, who is turned away from the angel and recoils from the message he brings, is charged with emotional content according to Western sensibilities, even though the iconography of Mary spinning is entirely Byzantine. This icon, whose frame has been entirely repainted in bright orange-red and teal blue, is strongly related to the more painterly version of the Acre Franco-Byzantine workshop style in the 1250s as we have seen in the icon of the Deësis with the Apostles and should also be dated to the mid- or later 1250s.

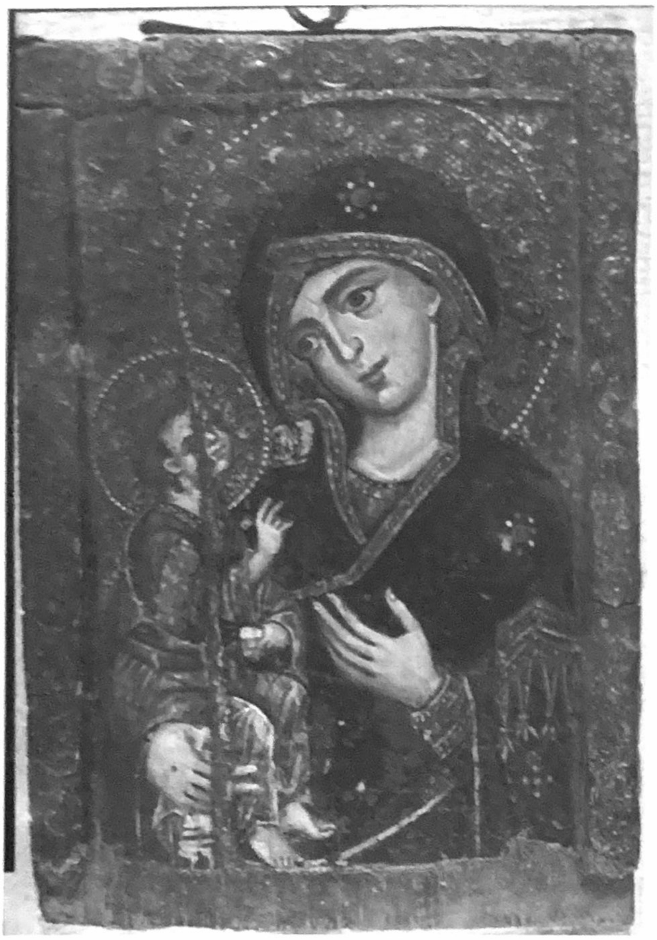
Along with these two works, there are a number of other panels in this Franco-Byzantine Crusader style of the 1250s but by artists that show distinctive characteristics, some with larger outputs. There are a series of panels, which however painterly in style, are remarkable because of the extensive use of low relief raised gesso decoration as an integral part of their production. They are related strongly and closely to the inner wings of the Acre Triptych and thus can presumably be dated to the late 1250s or early 1260s. It is not inconceivable that some of these icons are done by a single Crusader master. A second large group of icons features finely designed figures with softly painted faces and draperies, some with unusual iconography. In this latter case a number of artists are probably working, but despite the diversity of individual hands, the overall style of the icons forms a fairly cohesive group.

The style of the first group was described by Weitzmann as emphasizing more realistic characteristics in its figural representations.[736] The best examples include the following: a panel with the Virgin and Child, Moses, Elijah and St. Gregory Nazianzus (Fig. 182, App. no. 7/54, Fig. 355), and an icon of the Virgin and Child, Hodegetria (Fig. 181, App. no. 8/55, Fig. 356).[737] To this group we should also add two other panels. One is an icon of St. George, now in the British Museum, which has been attributed to this same group[738] (Fig. 183, App. no. 125). The other is a Sinai icon, which has no raised gesso decoration at all, but whose two mounted soldier saints, Sts. Theodore and Demetrios (Fig. 184, App. no. 40/386), reflects the robust interest in a vigorous naturalism combined with strong decorative instincts done in a painterly Crusader style.[739]

I have already noted in Chapter 4 an interest in raised gesso decoration in certain earlier icons now in the collection of St. Catherine's Monastery, specifically a Crucifixion and a Virgin and Child Hodegetria (Fig. 75, App. no. 32/285 and Fig. 76, App. no. 57/679, respectively), said to have been done by Syrian artists from Cyprus working at Sinai, in the 1230s or 1240s. The use of the raised gesso is a phenomenon that Frinta discusses as a response to Byzantine icons with precious metal covers, one that he associates especially with Cyprus.[740]

It is a form of decorative art that Crusader patrons seemed to like, combining as it did the sumptuous effect of metallic covers with the rich texture of a sculptural surface in low relief. The combination that we see here, produces a lavish effect of robust painterly forms with rich decorative sculptural surfaces.

In the case of the Virgin and Child Hodegetria (Fig. 181, App. no. 8/55, Fig. 356),[741] the icon is a variant of the iconographical type, where the child sits on Mary's right arm as she gestures toward him. Known as the Hodegetria Dexiokratousa, this type is especially congenial to Crusader interest in the close human relationship of mother and child, because this arrangement allows the child to sit nestled in his mother's arm, not separated away by his blessing arm. The emotional expression



181. Icon: Sinai, App. no. 8/55, Panel with bust-length image of the Virgin Hodegetria *Dexiokratousa*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

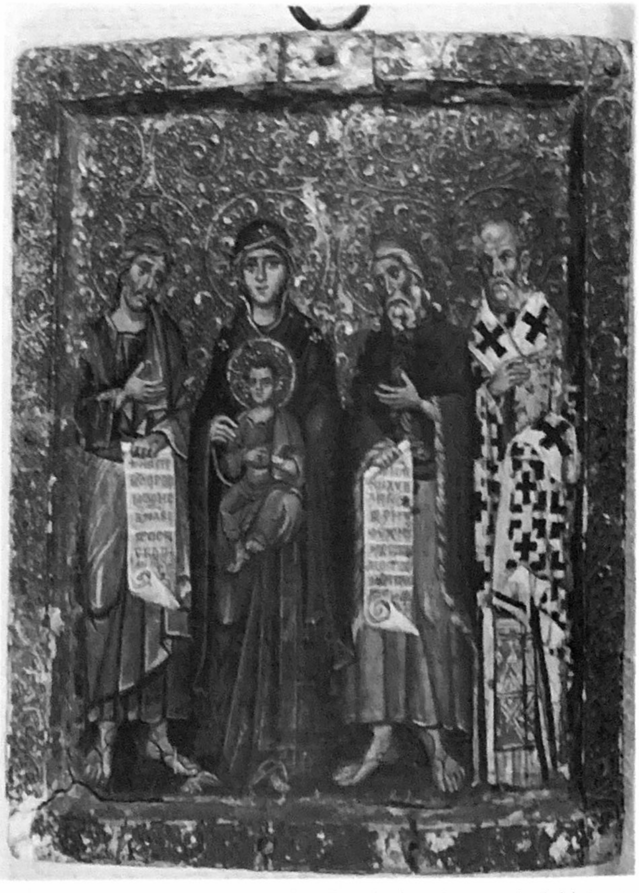
of warmth is conveyed by the way the child seems to look up at his mother, by the child's tiny size, and by the way the Virgin inclines her head toward him.

The representation of rounded forms in terms of warm flesh tones gently accented with white highlights, highlights also found on the child's drapery alone, is set against a raised gesso ground. We note the persistent pattern of vine tendril forms, which move around the frame and the haloes and across the background. We note the way these curvilinear shapes are set in a context of round studs, which cover the ground, and even flow over the hems of the Virgin's maphorion. These studs are also found on the inner wings of the Acre Triptych, and even though the foliate patterns are different here and on those wings, the overall resulting effects are quite similar. The staccato effect of the studs is echoed by the additional decorative motifs of the pearl ornament on the red halo rims.

Given its small size and its warm emotional content, it is clear that this icon is meant to function as the object of personal devotion. It is plainly not intended to function in some formal liturgical setting, that is, not likely to have been placed on an iconostasis, or on a proskynetarion even for a Latin church. As a personal-sized devotional icon, it exemplifies the Crusader interest in exploring the representational combination of the human relationship between the Virgin and her son, and the iconography of these figures in byzantinizing costume and format. Given its function, the icon is nonspecific as to what location it may have been associated with. On the strength of its stylistic comparison to the Acre Triptych (Figs. 155–62, App. no. 66/753), we may consider that it, too, was done in Acre in the late 1250s or early 1260s.

The icon most closely associated with the Virgin Hodegetria (Fig. 181, App. no. 8/55, Fig. 356) is a slightly larger panel of the Virgin and Child with three standing male saints (Fig. 182, App. no. 7/54, Fig. 355).[742] The style is similar in terms of its painterly characteristics, even if it is not exactly the same with regard to the design of the figures. Again the raised gesso has different vine tendril configurations, but their combination with the pattern of studs produces a comparable result in all three examples, that is, these two icons and the inner wings of the Acre Triptych (Figs. 155–62, App. no. 66/753).

What is distinctively different in the Virgin and Child with Saints icon (Fig. 182, App. no. 7/54, Fig. 355) is the iconography of the Virgin standing with the Child suspended in front of her, a variant of the Virgin Platytera, where he is touched by her hands but unsupported. The two figures flanking her are the Western-type bearded Moses to the left, and the figure of Elijah to the right with white hair and beard. Moses of course is specifically associated with Sinai because it was here that he encountered the Burning Bush, and it was on Mount Sinai that he received the law from God. Elijah is also associated



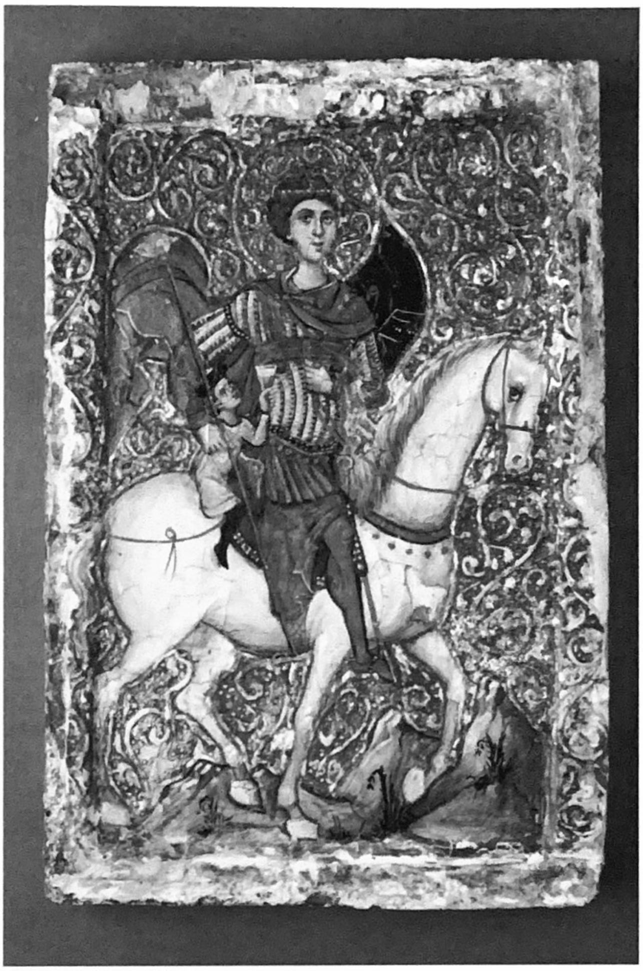
182. Icon: Sinai, App. no. 7/54, Panel with the Virgin and Child "n tns batou," Moses, Elijah, and St. Gregory Nazianzus, all standing. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

with Mount Sinai, having lived there in a cave where food was provided to him daily by a raven. The inscriptions on the scrolls pertain to Moses on Sinai (Exodus 24: 12) or the Ascension of Elijah (IV Kings 2: 2, 4, or 6).[743]

Pilgrims to Sinai could visit the Chapel of the Burning Bush in the apse of the Monastery Church of St. Catherine's, and they could also climb Mount Sinai to see the chapels dedicated to the sites where Moses received the tablets and Elijah sought refuge in his cave. Because the monastery had at the time of its founding by Justinian in the sixth century been dedicated to the Virgin Theotokos,[744] Mary was given special veneration here as well. As she became associated with the *locus sanctus* of the burning bush, in time she was given the epithet, *H THC BATOU*, meaning the Virgin of the [Burning] Bush.[745] Thus we can identify this type of the Virgin and Child as *H THS BATOU*, based on its specific iconography and comparison with several other examples.

The central message of this icon was clearly therefore one that focused on the *locus sanctus* of Sinai in terms of the iconographic type of the Virgin and Child and the presence of two major Sinaitic Old Testament figures. The model for this icon was probably one at Sinai that the artist used for this purpose and to which he added for his patron, an extra saint. The Church Father standing to the right appears to be St. Gregory Nazianzus, the great fourth-century Cappadocian theologian.[746] The figure of St. Gregory is clearly squeezed in at the right side, indicating most probably, as Weitzmann has pointed out, that the artist was following a well-known Sinai icon and modifying it for his current patron. Unfortunately we know nothing about the details of this order or why the patron may have chosen St. Gregory.

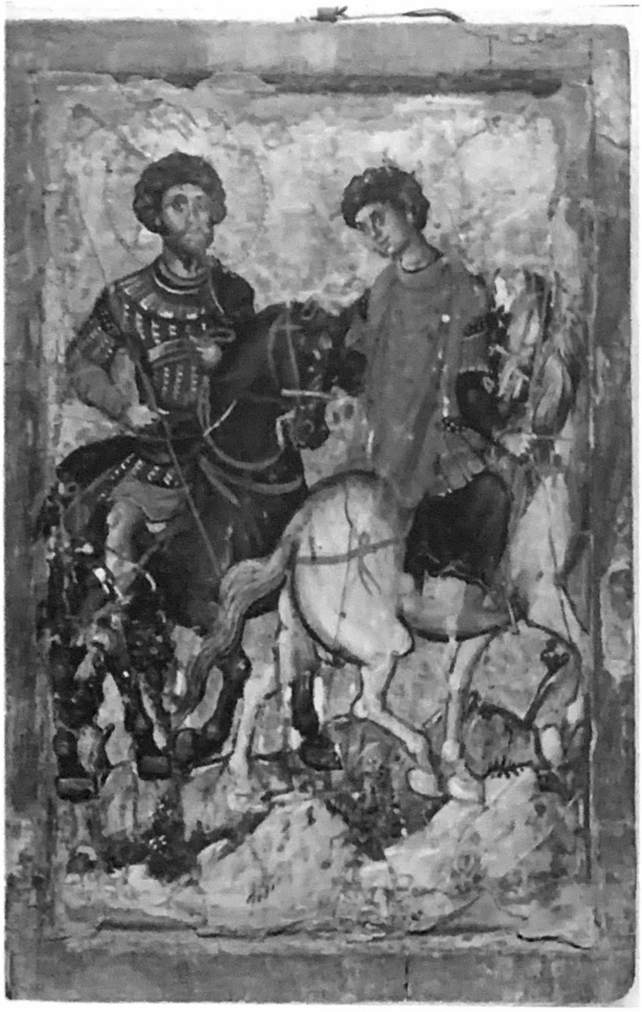
The commission for this icon (Fig. 182, App. no. 7/54, Fig. 355) must have been completely different from that for the Virgin and Child Hodegetria (Fig. 181, App. no. 8/55, Fig. 356), and the function can be understood to include the special imagery appropriate to Sinai as a *locus sanctus* because the image was apparently meant to serve as an ex voto icon that must have been given to the monastery by a pilgrim. In sum, the commission of this icon was certainly focussed on Sinaitic iconography and may have been made based on a model from St. Catherine's. This would suggest the possibility that the icon was executed at Sinai, but for artistic reasons of style and technique, it also possible may have been done in Acre. Note the strong artistic workshop connections between this icon (Fig. 182, App. no. 7/54, Fig. 355) and the inner wings of the Acre Triptych (Figs. 155–62, App. no. 66/753), as well as the Virgin Hodegetria (Fig. 181, App. no. 8/55, Fig. 356), the latter examples appearing to have been done in Acre. Clearly here we are faced with the problem of an icon presumably made for Sinai by a Crusader artist working in a Franco-Byzantine Crusader style, using a model with Sinaitic iconography, probably for a pilgrim who likely wished to give this icon to the monastery as a gift ex voto. The very ambiguity of the evidence seems to suggest that somehow the painter was connected both to Acre and Sinai. Therefore we may here be seeing evidence for the work of a Latin monk whose house was in Acre, perhaps St. Catherine's in Acre as we have discussed, but who spent time in residence at the Monastery of St. Catherine's on Mount Sinai as well.



183. Icon: London, British Museum, App. no. 125, Panel with St. George and the Youth of Mytilene. (photo by courtesy of the British Museum, London)

To evaluate this problem in a larger perspective, we can examine five additional icons that also exhibit iconography specifically related to Sinai and other *loca sancta*. For Sinai we have another Virgin and Child *H THC BATOU* image with four standing saints (Fig. 191, App. no. 23/205),[747] and another Deësis with three standing saints below (Fig. 187, App. no. 33/293).[748] For other sites, we have a third icon belonging to the raised gesso group, the panel with St. George as soldier and martyr mounted on his horse with the youth of Mitylene, now in the British Museum (Fig. 183, App. no. 125).[749] There is another icon in the Franco-Byzantine Crusader style with no raised gesso, which reflects a different group of artists. It represents the Virgin and Child Enthroned, with the death of Moses, and scenes of St. John the Baptist (Fig. 186, App. no. 52/574).[750] Finally there is an icon of St. Marina now in the Menil collection in Houston (Fig. 192, App. no. 126), which has selective use of raised gesso but presents a style rather different from what we find in Acre at this time.[751] These latter three icons have all been dated in the mid-thirteenth century and have been associated with different *loca sancta*, specifically with Lydda near Ramla, Mount Nebo in Jordan, and Mar Marina south of Tripoli, respectively. Could the icons have been done in these sites, or were they done elsewhere to function as a gift to or as a souvenir from one of those sites?

In the case of the St. George with the youth of Mytilene now in the British Museum[752] (Fig. 183, App. no. 125), both the style and the elaborate raised gesso clearly links this panel



184. Icon: Sinai, App. no. 40/386, COLOR PL. 5. Panel with mounted Saints Theodore and Demetrios. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

with the icons of the Franco-Byzantine Crusader style. Cormack thinks the style of the figures; the design and painting of the heads, faces, and eyes with white highlights; the treatment of the armor; the type of horse and the pose of his head with his spirited expression; and the red halo rim with pearl decoration clearly can be closely associated with the style of the icon of Sts. Theodore and Demetrios (Fig. 184, App. no. 40/386) and that they were done by the same painter. The latter icon, of course, does not have raised gesso. But when we compare the specific designs in the raised gesso relief work of the British Museum St. George, that is, the large vine-scroll patterns for the background and the frame, or the smaller reverse "S" forms in the halo, all of which is accompanied by a liberal sprinkling of studded "dots," we note that none of the other icons has work that is exactly the same, but the little Virgin and Child Hodegetria panel (Fig. 181, App. no. 8/55, Fig. 356) is close.

Could the St. George icon have been done at Lydda, the site in the Latin Kingdom sacred to St. George as the site of his tomb, the former Diospolis, as Cormack has suggested? Also recall he argues that this artist is the same painter who did the pair of mounted soldier saints, Theodore and Demetrios (Fig. 184, App. no. 40/386).[753] Thus it is possible that the artist was trained in Acre and then went to Lydda, where he did this icon. It is also possible, indeed much more likely, that the artist painted this icon in Acre itself, for some pilgrim who was going to Lydda or who had just been to Lydda. There is another small icon of the mounted St. George at Sinai with the youth of Mytilene (Fig. 185, no. 36/357), but it is damaged and difficult to compare with the British Museum example, except to say it has similar iconography and is also done with raised gesso of a similar sort. Cormack correctly observed that it was done by a different artist – I would argue a Crusader, not a Western artist – of lesser quality.[754] No other extant icon has been claimed for Lydda as yet, but if the argument is to be made, this Sinai icon is a prime candidate. However, we should keep in mind that just because an icon contains iconography that relates it to a holy site, this does not necessarily mean the painting was done there. For this iconography of St. George, we do after all have the fresco painting from Crac des Chevaliers that was certainly done in situ.[755] Furthermore, taking into consideration the iconography of the mounted soldier saint and the likelihood that patronage for this kind of imagery would be popular in a Crusader military center like Acre, not necessarily in a monastic center or at a holy site itself, on balance, it seems perhaps more likely that the artist of the British Museum St. George worked in Acre, and did his icon for a pilgrim going to

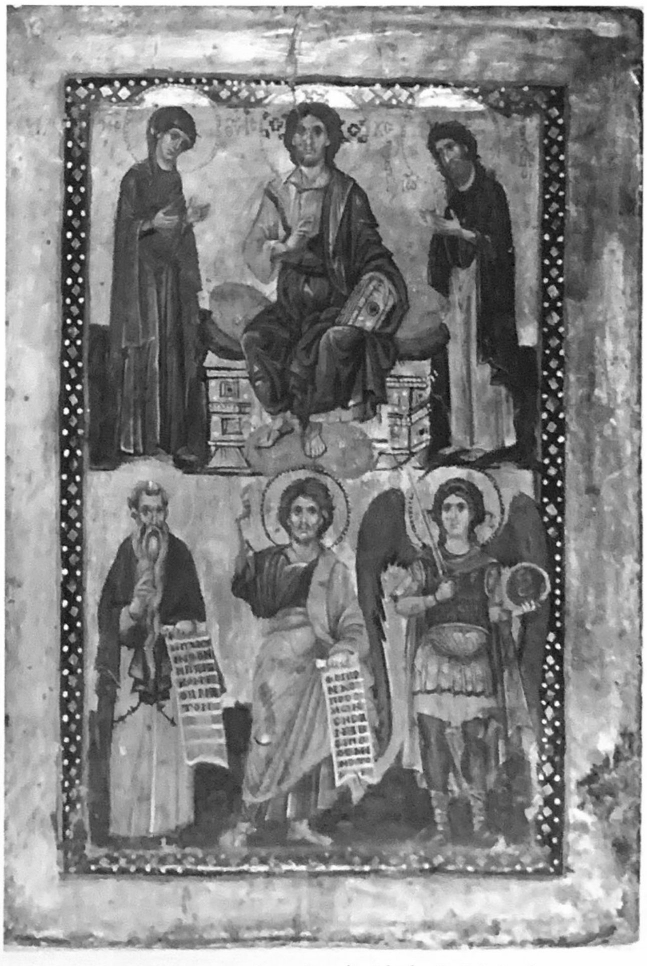
Lydda.[756] What additional light can the other icons shed on this problem?

Other Icons: Franco-Byzantine Crusader Artists and Icon Painting at Various Sites: Two other icons are linked to the Acre Franco-Byzantine Crusader style and different holy sites. One includes the seated Virgin with Child with scenes of the Death of Moses, the Banquet of Herod with the Head of St. John the Baptist on a salver, and the figure of St. John the Baptist in the Wilderness (Fig. 186, App. no. 52/574). Another icon in two registers has the Deësis above with three standing saints below (Fig. 187, App. no. 33/293). These two icons are more closely related to each other stylistically than they are related to the St. George icon (British Museum) or its closest relatives such as the Sts. Theodore and Demetrios (Fig. 184, App. no. 40/386), the little Virgin and Child Hodegetria (Fig. 181, App. no. 8/55, Fig. 356), or the standing Virgin and Child with three flanking figures (Fig. 182, App. no. 7/54, Fig. 355). But their iconography reflects and possibly links them with two holy sites. In the first case (Fig. 186, App. no. 52/574),[757] Weitzmann has noted the likelihood that this unusual assortment of scenes and their irregular composition on this panel derive from a diptych type known from Sinai. He has also argued that the imagery of the death of Moses buried by angels as here is entirely Western, drawn from French manuscripts. In the two scenes below, the banquet of Herod with Salome and the head of St. John shows a combination of the Byzantine iconography for the crown of King Herod with his garments being a Western-inspired robe trimmed in ermine. To the right, St. John the Baptist appears in the wilderness in his hair shirt, but without the image of God in the sky above, as we find him in numerous Byzantine and even a few other Crusader icons as well.[758]

Even though Weitzmann makes the case that the model or models for this icon comes from Sinai, he also points out that some of the iconography here points to a site in Jordan. Mount Nebo was the place where the burial of Moses was located, and the Trans-Jordanian desert where Mount Nebo was situated was the wilderness from which John came. Certainly Mount Nebo is a holy site and its church, dedicated to Moses, had a chapel in honor of the Theotokos, whom we see enthroned with the Child on our icon.

But it must be admitted that this imagery is complex. Not all of the scenes are related to Mt. Nebo: The scene of Herod's banquet most likely took place in one of Herod's palaces (Herodion?) on the West Bank, not on the East Bank.[759] Nonetheless, Mount Nebo was a major pilgrimage site, and

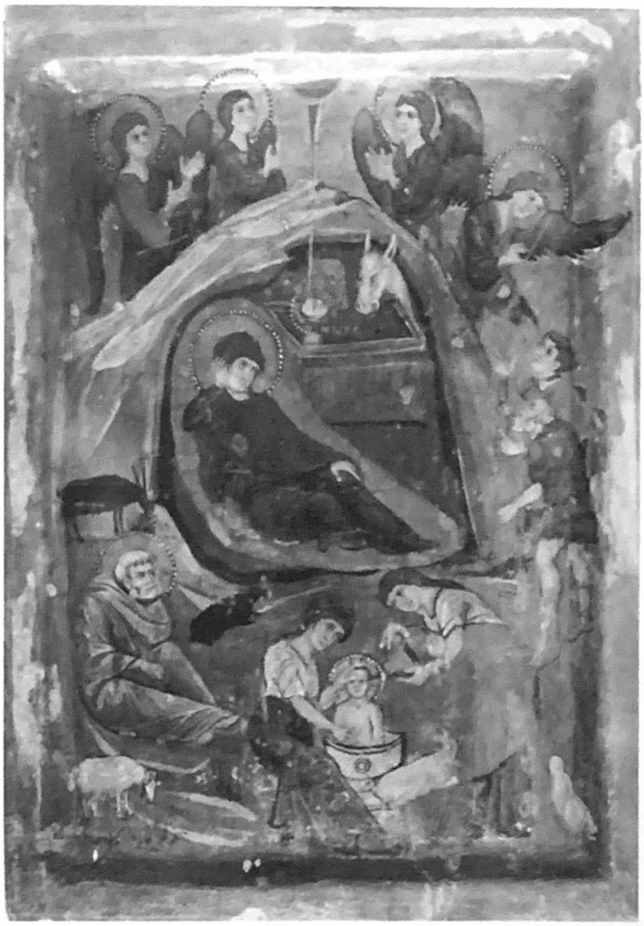


187. Icon: Sinai, App. no. 33/293, Panel with the Deësis in the upper register, and three standing saints: Sts. Euthymios, Moses, and the Archangel Michael, below. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

this icon with three images related to it may have been done to serve as a gift for its church. Weitzmann concludes, "However, if our icon was destined for Mount Nebo, it is not likely that it was made there. Its place of origin is once more, . . . , our Acre workshop, which, . . . , did produce icons for specific localities for which iconographic subjects strongly connected with them were chosen."[760] He clearly makes this conclusion based on the style of the artist's work, which is the Acre Franco-Byzantine Crusader style. We would agree with this conclusion also because the array of sources for the imagery is so complex and would suggest an active and reasonably large workshop environment. It does not mean that every Crusader icon that is now in the St. Catherine's collection was done in Acre, however; it means that again we must evaluate each icon on its own merits. Some appear to have been done in Acre, some at Sinai.

The second icon (Fig. 187, App. no. 33/293) is a panel with two registers, which has a Deësis group above, and three frontal standing figures below, including St. Euthymios, Moses, and the archangel Michael.[761] Weitzmann compares this composition with Byzantine ivory Deësis triptychs. Here, however, the Crusader artist has rearranged the canonical lower organization of saints from the apostles to three figures, of which Moses is the most prominent standing on the central axis. The inscriptions on the scroll Moses holds, taken from Exodus 24: 12/34: 11, links him to Sinai. Euthymios, the hermit of the nearby bishopric of Pharan, stands to the left. Weitzmann points out that he was almost like a local Sinaitic saint, and Euthymios was also widely popular in the Holy Land; we have encountered him as one of the saints depicted on the column paintings in the Church of the Nativity at Bethlehem.[762] St. Michael, despite his popularity East and West, is a somewhat unexpected choice for the third figure of this group, at the right. It appears, however, that such a remarkable selection of holy figures not only relates this icon to Sinai, but also very probably reflects the patron's specific choices, whoever he or she was. Not only is this selection unusual, but also the iconography of each of these figures indicates its Crusader origin by deviations from Byzantine standards. Moses is bearded as we find him in the West. Euthymios, although not in a hooded monastic habit as we see him in Bethlehem, wears a megaloschema which appears here to be pleated, an unlikely configuration for a stiff, broad embroidered stole. Finally, Michael's armor consists of two types – the artist seems to have conflated his costume to include both plate and scale armor – which, although common in Crusader painting, is uncommon in Byzantine art. The figures are all given red haloes with pearl decoration, and the end result is then framed with the typically Crusader gold lozenges separated by paired white pearl designs. It is a devotional icon of excellent quality done in a softly painted Franco-Byzantine Crusader style that we shall encounter in two other closely related feast scene icons later.[763]

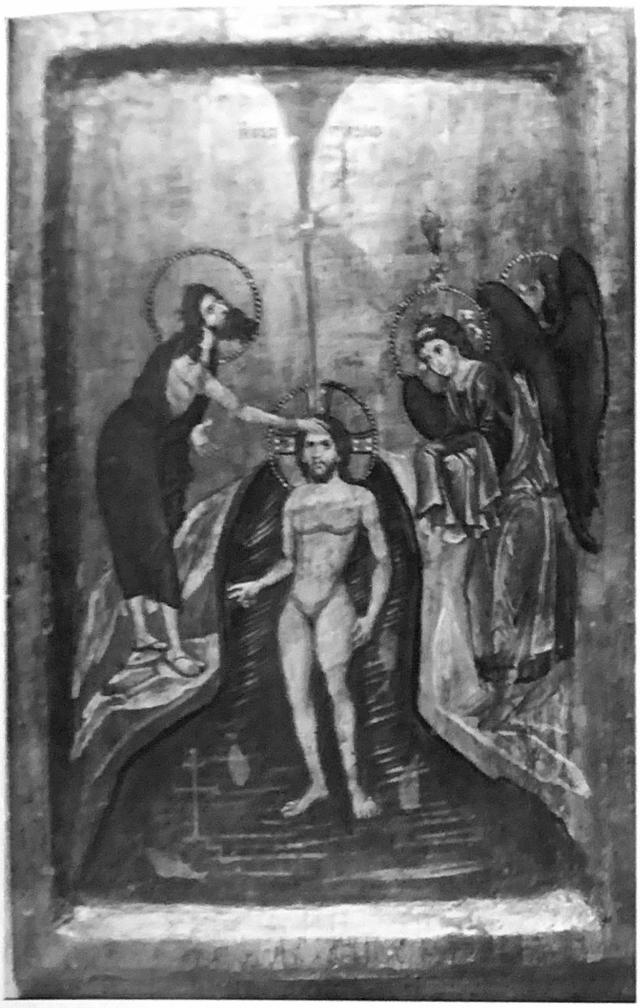
What can be said about the location of where these two icons were done? Whereas the first icon (Fig. 186, App. no. 52/574) is linked to Mount Nebo and the second (Fig. 187, App. no. 33/293) is tied to Sinai, they share a somewhat similar style, which indicates at least a common workshop training and painting experience. The fact that these panels seem to have been done for different sites but have related styles, suggests they may have been done in the same place or that the artists were at one point trained or worked together at the same place. That same place could have been Acre or Sinai, but it is not likely to have been Mount Nebo. This is a finding that corresponds to our earlier discussion.



188. Icon: Sinai, App. no. 113/1831, Panel with scene of the Nativity. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

The two feast scene icons mentioned earlier are also relevant to our discussion here. Both the Nativity (Fig. 188, App. no. 113/1831)[764] and the Baptism of Christ (Fig. 189, App. no. 114/1836)[765] are icons drawn from the Dodekaorton, the cycle of Twelve Feasts of the Church, but we should not forget that they also represent *loca sancta* as well. Weitzmann published the Nativity as an example of a separate panel that belonged to an iconostasis beam, and Mouriki identified the Baptism and an additional fragment with the seated figure of Christ that she recognized as part of a Deësis from the same ensemble (Fig. 190, App. no. 65/743).[766] Weitzmann called this almost a "harsh linear style," presumably on the basis of the finely drawn faces and pronounced outlines of the figures. But there is a striking softness in the modeling of the three-dimensional contours of these faces, accented with white linear highlights that appear on the draperies as well. It is unlikely that the same artist who did the double register Deësis also did the two feast icons, but they are closely related.

The important difference for our discussion here is the fact that the two feast icons appear to follow closely good Byzantine models, retaining their iconography of the holy sites.[767] In the case of the Nativity, it is the cave grotto set in a rocky

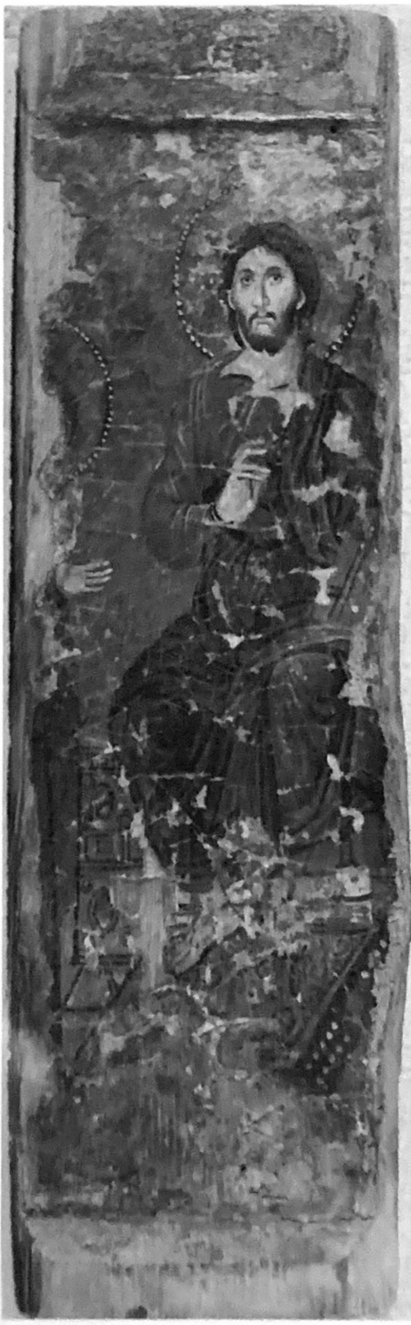


189. Icon: Sinai, App. no. 114/1836, Panel with scene of the Baptism of Christ. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

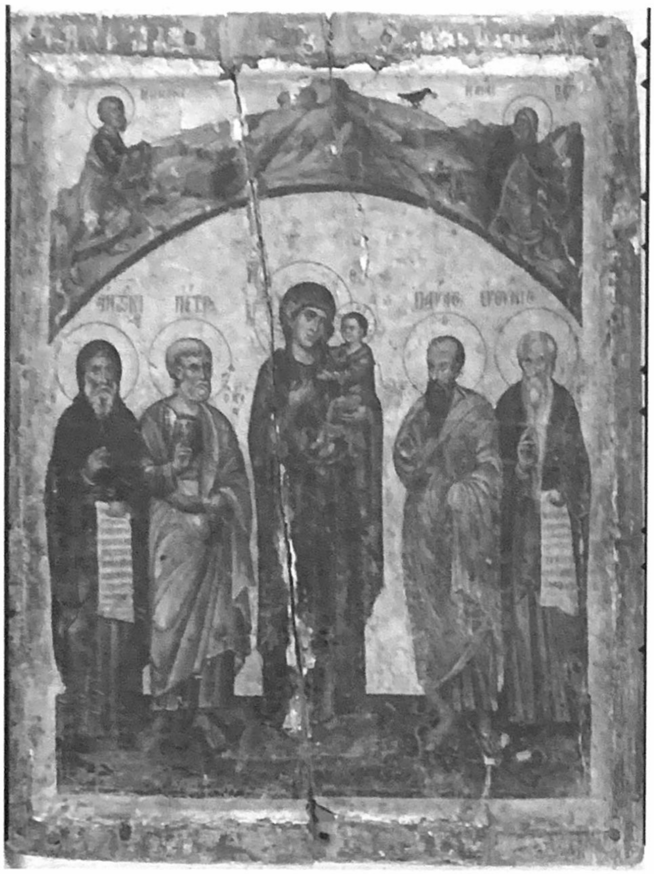
landscape. In the case of the Baptism, it is the cross monument set in the Jordan River to mark the place of the event for the pilgrims. These icons are, however, standard types, and even their figure style shows few Crusader formal traits – Weitzmann notes the staring eyes, the tight fit for the figures in their appointed spaces, and the characteristic pearl-decorated haloes. The same basic style is seen in the Christ of the Deësis, with his handsomely designed draperies, and a bench throne that relates to the double register Deësis icon (Fig. 187, App. no. 33/293), and the Virgin and Child Enthroned with scenes of Moses and St. John the Baptist (Fig. 186, App. no. 52/574). What is distinct here is the traditional formula in standard iconography, in contrast to those icons, particularly those with Sinaitic imagery seen earlier, that appear to be composite, newly assembled by a Crusader artist presumably in response to the commission of a pilgrim patron. In many ways it is those icons that seem to suggest a Sinai origin, partly because of the richness of their iconography, the way they reflect the various aspects of the holy site, the models to which they seem to have had access, and partly because of their substantial numbers in contrast to those that might be associated with some other specific holy site.

Finally, there are two other icons which are relevant for our discussion here. Unlike the earlier examples, they are stylistically more distinct from any of the examples we have presented so far, and again they come from two sites. One is a Sinai icon (Fig. 191, App. no. 23/205), a Virgin and Child with four standing saints that has explicit and complex Sinaitic iconography. The other is a tiny icon of St. Marina from the Menil collection in Houston, which appears to relate to a specific holy site near Tripoli (Fig. 192, App. no. 126). Can they shed any additional light on these issues?

The first of these examples, the Virgin and Child *Hodegetria* with four standing saints (Fig. 191, App. no. 23/205), is a remarkable icon with several unusual features.[768] It is done in a refined painterly style that is clearly related to the Acre



190. Icon: Sinai, App. no. 65/743, Fragment of a panel with the seated figure of Christ. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



191. Icon: Sinai, App. no. 23/205, Panel with the Virgin and Child *Hodegetria* and four standing saints, with Moses and Elijah on the spandrels of the arch above, on either side of Mount Sinai. Franco-Byzantine master of the Acre Triptych inner wings (Figs. 155–62, App. no. 66/753) in terms of facial types, the linear conventions for the eyes, and the manner of painting with white highlights on the faces. The figures are quite distinct, however, because of their slender proportions with small heads, feet, and hands, unusually elegant for Crusader icon painting in the 1250s or early 1260s. They have red haloes, but without the pearl decoration that we have found on so many Crusader icons in this period. These figures also stand frontally, hierarchically – the Virgin is slightly larger and raised on a footstool – under an arch, which supports the image of Mount Sinai above. On the mountain wilderness the somewhat diminutive figures of Moses (left) and Elijah (right) appear. Finally, the figures are all given Greek identifying inscriptions, but the remarkable addition here is the fact that the four standing saints below are also speaking. They are given small Greek inscriptions placed to one side at the level of their mouths by which they exclaim, "*O AGIOS*," "o holy one," referring to the presence the Virgin and Child in the center. Thus here we have a special type of a "speaking icon."[769]

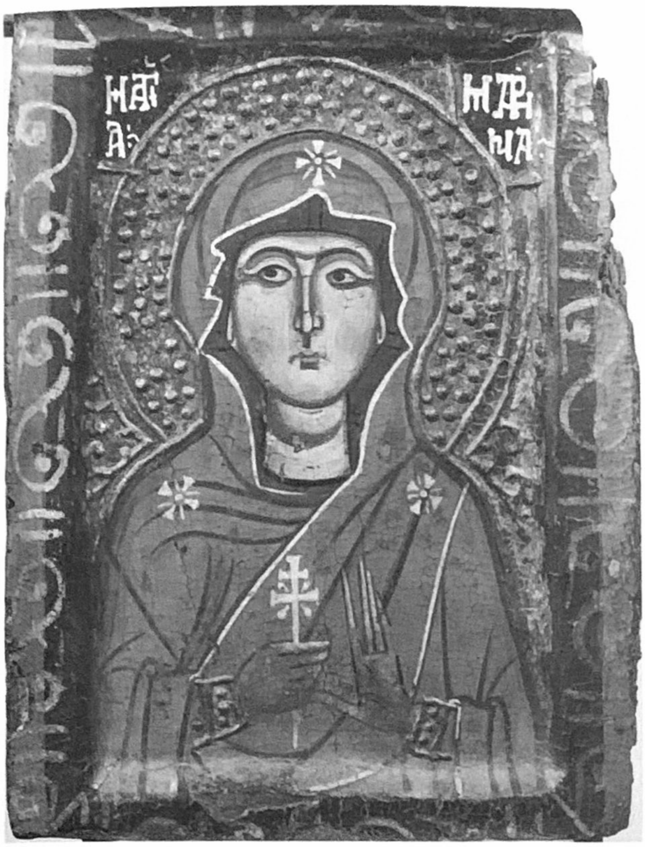
Weitzmann has examined this icon in detail, identifying its "Western-influenced" characteristics. The tiny Child is held up high; he places his right arm and hand around the neck of the Virgin and his left hand on her veil in a gesture of affection. This reflects the interest of this artist and presumably his patron in greater emphasis on the human relationship between mother and child. This relationship is not absent from Byzantine icons, but it is carefully limited to certain iconic types, such as the Virgin and Child *Eleousa*, and is rigorously excluded from the imagery of the *Hodegetria*. The Virgin and Child are flanked by the figures of Sts. Peter and Paul, a pairing not uncommon in Sinai Crusader icons, but here Peter holds the keys, not a book, and the implication is that he is given primacy of place by his position to the Virgin's right, reflecting a Western sensibility. Certainly their softly painted style, their volumetric draperies, and their decisive corporeal presence also reflect the artist's interest in more naturalistic values. The two monastic saints, Anthony at the left and Euthymios at the right, are purely Byzantine choices, of course, and their association with St. Catherine's is derived either from the existence of a chapel in his honor at the monastery, in the case of the former, or the importance of the cult of the latter as a saint who had once lived as a hermit near Sinai in the bishopric of Pharan.[770] It is clear, however, that the Crusader painter has transformed their monastic megaloschema from a stiff embroidered stole into a tunic made of soft, flowing fabric with many pleats. In the zone above we have Moses and Elijah, two Old Testment figures closely associated with Sinai. To the left, Moses appears ascending Mt. Sinai according to Byzantine iconography, but the image of God he is moving toward is omitted, and Moses is given a beard and made to look old in a manner typical of Western imagery at this time, as we also saw him in the Arsenal Bible. Elijah appears with a raven above to the right,[771] but even though he follows a Byzantine model, he looks very similar to the seated Elijah image that appears in the IV Kings miniature of the Arsenal Bible, an impressive bearded figure wearing his special fur trimmed costume.

With this icon, therefore, we are seeing an inventive, individual artist working in the Acre Franco-Byzantine style, who produces an icon with an extraordinarily intense Sinaitic iconographical program. It is in fact one of the richest among the extant Crusader icons, and it illustrates the notion of the composite program pertaining to Sinai discussed earlier. This icon is clearly an excellent candidate for our category of panels painted in St. Catherine's with direct and intimate access to other works with Sinai imagery. Even though he is an artist whose style is related to Acre, it seems likely he may have worked in Sinai when doing this icon.

Another quite individual artist painted the handsome little St. Marina icon now in the Menil Collection in Houston[772] (Fig. 192, App. no. 126) In this case, however, no links with Acre Crusader style or with Sinai Crusader style can be seen. In this icon, St. Marina appears as a frontal bust-length figure glancing slightly to our left. She holds a double-barred cross in her proper right hand, gesturing toward it with her left. She is dressed in a bright red maphorion or veil, trimmed with a white hem and decorated with three yellow star-shaped ornaments on her head and shoulders. Underneath her veil she has a blue coif. Her halo and the cuffs of her undergarment are emphasized with raised gesso. She is identified with a Greek inscription as Saint Marina. The image is framed with a striking border in vermilion and dark green, decorated with yellow paired bar dividers and reverse "S" curves shaped in the manner of metal work.

Iconographically she follows a standard type for female saints in Middle Byzantine art, except that she holds the



192. Icon: Houston, The Menil Collection, App. no. 126, Panel of St. Marina. (photo by courtesy of The Menil Collection, Houston)

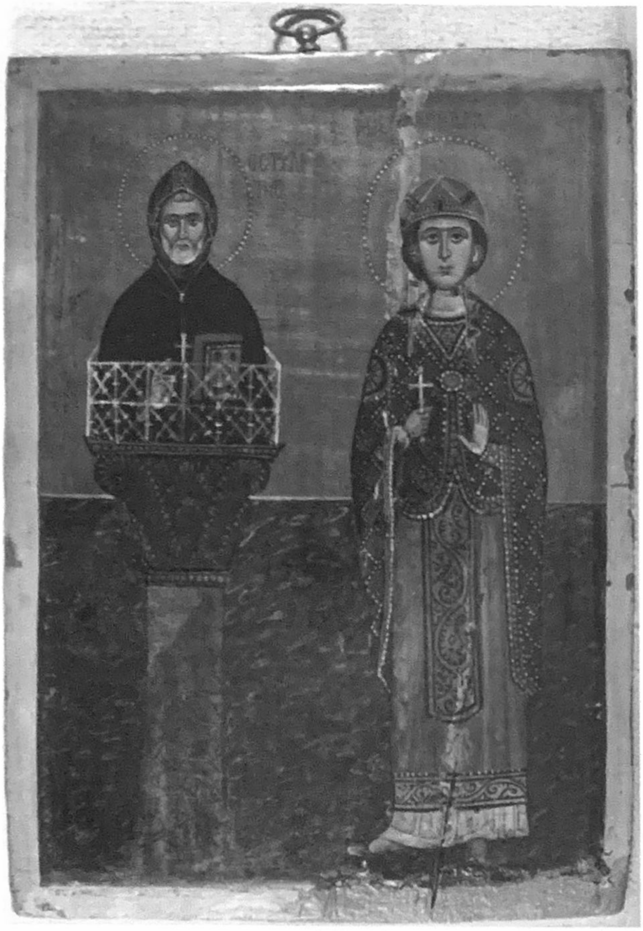
double-barred cross, which may be a reference to the Crusader cult of the True Cross. Stylistically she is done in a regional style that seems to relate to Tripoli. The case can be made that this artist was possibly Syrian with knowledge of Byzantine icons from Cyprus.

In contrast to the volumetric and painterly modeling of the figures in most of the Acre Franco-Byzantine Crusader style works, this figure is treated in flat patterned forms articulated with linear designs for the folds. The red veil of the saint is positioned as if the head were turned to the left, even though the face is strictly frontal. Inside the opening of the veil the blue coif fills the area around the head as a flat pattern, as if it were a hood, rather than a coif on the head alone. In proportions, the figure is notable for its large head and the extraordinarily long, pointy fingers. The face and neck are equally two-dimensional and sharply defined, imitating the Byzantine mode of deep greenish shading and facial design. The model is transformed into something quite linear in terms of the black and red articulation of the eyes, nose, brows, and mouth and abstract in terms of the decorative green and red shading on and around the face.

In contrast to the other icons we have been discussing, no obvious stylistic parallels emerge from Acre or Sinai with which to compare this handsome work. Despite the popularity of St. Marina on Cyprus and the large number of St. Marina icons in the collection of the Monastery of St. Catherine's on Mount Sinai, only distant echoes of this style can be seen in some of the so-called Romanesqueizing works from Cyprus.[773] In fact, the closest stylistic *comparanda* seems to be found in the region south of Tripoli, in what was at the time the southwestern corner of the County of Tripoli and the northern section of the Latin Kingdom. From the towns of Tripoli and Gibelet on the coast, this area forms a triangle inland to what we call the Cedars of Lebanon today, including the Qadisha Valley. It is there, in a series of Maronite churches and shrine-grottoes that we find parallels to the style of this icon in fresco paintings, for example, at Bahdeidat, at Ma'ad, at Hadschit, and at Saidet ed Darr.[774] The frescoes in this area represent a well-established regional style dating from the twelfth century,[775] which is partly the reason for the conservative, decorative stylistic traits seen in our icon. But the site of greatest interest here is the grotto south of Tripoli known as Mar Marina, where remarkably, both St. Marinas were venerated: St. Marina of Antioch in Pisidia, known as St. Margaret in the West, and St. Marina of Syria, the female saint who lived her life disguised as a monk in the Monastery of Deir el Qannoubine.[776] St. Marina of Antioch in Pisidia is without doubt the better-known and more widely represented in icon painting, and the evidence suggests that our icon represents her, but her cult was clearly reinforced by the existence of the latter in Syria.

There are two levels of extant fresco decoration at Mar Marina, both now badly damaged, neither of which relate directly to our icon of St. Marina, but the hand of this artist, otherwise unrecognized as yet in this region, finds its home in the midst of the ensemble of these frescoes done in the "Syrian style." This enables me to propose that the Menil St. Marina icon is "the work of a Syrian artist painting in the current mode ca. 1250 with a knowledge of developments in Cyprus, and painting in his homeland south of Tripoli in the service of the cult of St. Marina."[777] It appears likely that the Menil icon was ordered by a "Crusader" patron, probably a pilgrim to Mar Marina, from this Syrian artist working at the grotto, whose painting style reflected Crusader, Byzantine Cypriot, and local Syrian developments. As such the Menil St. Marina icon is a unique extant example of icon painting from the County of Tripoli.

The decisive evidence that leads me to make this attribution is the combination of stylistic and iconographic characteristics, not the iconography alone. Whereas the iconographic program of an icon can often be carried out in a workshop setting remote from an actual holy site, if the elements of style are directly identifiable at this site or its surrounds, then it appears that the possibility strongly exists for the work to have been done at the site or nearby. This argument can be clearly demonstrated here with the Menil St. Marina icon. The problem is that with many of the extant Crusader icons from St. Catherine's Monastery on Mount Sinai, the evidence is ambiguous and not so clear because whereas the iconography can be intensely Sinaitic, there is no recognizeable Sinaitic Crusader style. In this regard it is worth reflecting on words that Kurt Weitzmann wrote near the end of his career of studying the icons at Sinai. Referring to painting at Sinai in general, but with reference to the Crusader icons included, he wrote: "there never developed an indigenous, Sinaitic style. Masters were called from outside, be it Cyprus or Constantinople or elsewhere, worked at Sinai for some time, and were then replaced by the next team. So if for the later thirteenth century we have been able to establish a Venetian workshop, it must be seen in the light of many workshops at Sinai, those organized by Crusader artists being



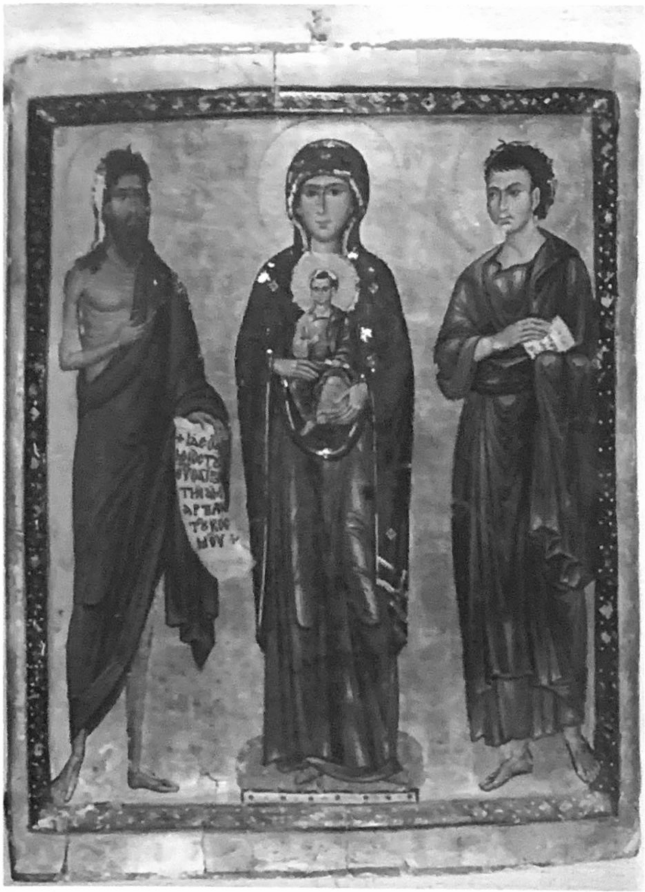
193. Icon: Sinai, App. no. 11/64, Panel with St. Symeon Stylites on his column and St. Barbara standing. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

rather an exception than the rule." He concludes, "Sinai is not a normal Greek monastery but a crossing point of many cultural influences and a place which belonged to Christianity at large."[778]

Icons at Sinai in the Veneto-Byzantine Crusader Style: Up to this point, we have focused on the icons done in the Franco-Byzantine Crusader Style that appear to date mostly between 1250 and the early 1260s, in comparison to the icons of the 1250 Crucifixion (Fig. 152, App. no. 104/1732) and the Acre Triptych (*c.*1258–1261) (Figs. 155–62, App. no. 66/753). In mentioning a "Venetian workshop" earlier, Weitzmann is referring not only to the artists working in a painterly Veneto-Byzantine Crusader style, such as we see in the iconostasis beam of 1260 (Figs. 164–175, App. no. 105, 106, 107/1744-5-6) discussed earlier, but he is also referring to a slightly later, more refined and more linear version of the Veneto-Byzantine Crusader style, by a different "team" which appears in a series of major icons including a second iconostasis beam, which I discuss in Chapter 7.[779] The reason he does not refer to teams of artists working in the Franco-Byzantine Crusader style in his article is presumably because they did not do any of the large, explicitly liturgical icons that might function in the Orthodox services of the monastery. Without reading too much into the division of labor this implies, his analysis suggests perhaps that some Crusader artists – especially those working in the Veneto-Byzantine styles – were sometimes commissioned to do Byzantine type icons for both Crusader and Orthodox patrons, and other Crusader artists – particularly those working in the Franco-Byzantine styles – specialized more in devotional panels and ex voto type icons for pilgrims. What we also observe is that based on our analysis so far, the Crusader icons in the Franco-Byzantine styles are popular in the period from 1250 to the early 1260s, and as we shall see they apparently continue to be produced later as well. But it is difficult to date any of the icons in the Veneto-Byzantine Crusader style before the end of the War of St. Sabas. After that point, however, that is, during and after the years 1258–61, we start to find a number of icons in the latter style. Interestingly enough some of them seem to be devotional or ex voto type icons, that is, they seem to be similar in function to the Franco-Byzantine style icons we discussed earlier. In date, however, they seem to belong more to the 1260s than to the 1250s.

Our link to these icons in the Veneto-Byzantine Crusader style in the present context are the two saints on the exterior wings of the Acre Triptych (Figs. 155–62, App. no. 66/753) discussed earlier. The standing, frontal images of St. Nicholas and St. John the Baptist can be closely compared with two icons. One contains St. Symeon Stylites with St. Barbara (Fig. 193, App. no. 11/64), from the group which Weitzmann attributed to the Master of the Knights Templar.[780] The other represents the Virgin and Child *H THS BATOU*, with St. John the Baptist and Moses (Fig. 194, App. no. 43/428), which belonged to the artists working in a linear Veneto-Byzantine Crusader style and which Weitzmann associated with three slightly later monumental icons: a bilateral icon (Figs. 269, 270, App. no. 97/1568), a diptych (Figs. 271–288, App. no. 110/1783), and an iconostasis beam (Figs. 256–61, App. no. 74/1003).[781] These two *comparanda* are worth further discussion, especially with regard to the other icons with which they can be grouped, because they show not only a different repertory for these Crusader artists of Veneto-Byzantine stylistic background when compared with those of the Franco-Byzantine Crusader style, but also they demonstrate that in their own time, that is, in the 1260s and later, these icon painters became as productive as the Franco-Byzantine Crusader artists of the 1250s.

The icon of St. Symeon Stylites on his column with St. Barbara (Fig. 193, App. no. 11/64) is typical of one of the two types of images we find on the panels in this group.[782] We have frontal saints, usually standing, holding attributes and gesturing as one type. For the other we have mounted saints seen in more or less three-quarter view, such as the image of St. Sergius with a female donor (Fig. 199, App. no. 14/80). Weitzmann attributed the icon of Sts. Symeon Stylites and Barbara (Fig. 193, App. no. 11/64) to the same hand as did the outer wings of the Acre Triptych (Figs. 155–62, App. no. 66/753), that is, Sts. Nicholas and John the Baptist. "Symeon Stylites on his column, [is] a figure so similar in its facial features to the St. Nicholas on the triptych wing that, in my opinion, the assumption of a common hand is justified."[783] In fact, Weitzmann continues, "we have by his hand – and this is one of the rare cases where a considerable number of icons can be grouped together as characteristic of the work of an individual artist – about half



194. Icon: Sinai, App. no. 43/428, Panel with the Virgin and Child "n tns batou," St. John the Baptist and Moses, all standing. a dozen icons."[784] After careful analysis it seems unlikely that all of these icons can indeed be attributed to the same hand,[785] but there is no doubt, nonetheless, that they are extremely closely related, done by artists working closely in the same workshop.

Most of these icons are small, approximately the same size, roughly 34 × 25 cm. They are characterized by figures in a rather flat-patterned style, with a similar repertory of decoration ranging from triple dot (= pearl?) patterns on cloaks and tunics, to stoles, hems, and ceremonial garments with comparable vine-scroll embroidery framed with pearls, to the same kind of scale armor on military figures with their pearl-studded diadems. In each case the most impressive part of the icon is the face of each saint, that is, appropriately, the likeness of the saint, which typically has the most sophisticated painting producing the greatest three-dimensionality. These faces are rounded and volumetric, with characteristic deep shading under the chin, lower lips, left side of the nose, and eyes and brows, with a delicate net of linear white highlights applied strategically to the forehead, around the eyes, nose and on the neck, and the characteristic Acre linear convention for the definition of the eyes. These icons often follow good Byzantine models and have the character of a simplified, direct style, which was obviously appealing and popular. But unlike good Orthodox icons in the Middle Byzantine period, which "sought consistently to make distinctions between different classes of saints according to their degrees of corporality, motion, and emotive responses,"[786] these saints by our Crusader painters all look essentially the same in terms of their formal characteristics.

Besides the icon of Sts. Symeon Stylites and Barbara (Fig. 193, App. no. 11/64), we have several other examples in this style. There is an icon of Sts. Catherine and Marina (Fig. 195, App. no. 90/1418),[787] which depicts the patron saint of the monastery at Sinai with Marina, presumably St. Marina of Antioch in Pisidia – the normal choice – who was honored with a side chapel in the main church at Sinai. Thus this icon is in its own way a highly charged Sinaitic icon done for this particular *locus sanctus*. Marina is a simplified version of a Byzantine type image, as she appears in a Greek icon of this pair at Sinai,[788] but she shares with Catherine – as well as Symeon Stylites and Barbara – a red halo decorated with pearls. Catherine, however, is more distinctive because along with the single armed cross all of these standing saints carry in their proper right hands, she also carries an impressive orb with an image of the True Cross inside, inscribed with the initials of the name of Jesus Christ, in Greek. Although Catherine became the patron saint of the monastery at Sinai in the tenth or eleventh century and was the object of special veneration there as a result, in Byzantine

196. Icon: Sinai, App. no. 78/1118, Panel with standing soldier saints, Sts. George, Theodore, and Demetrius. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

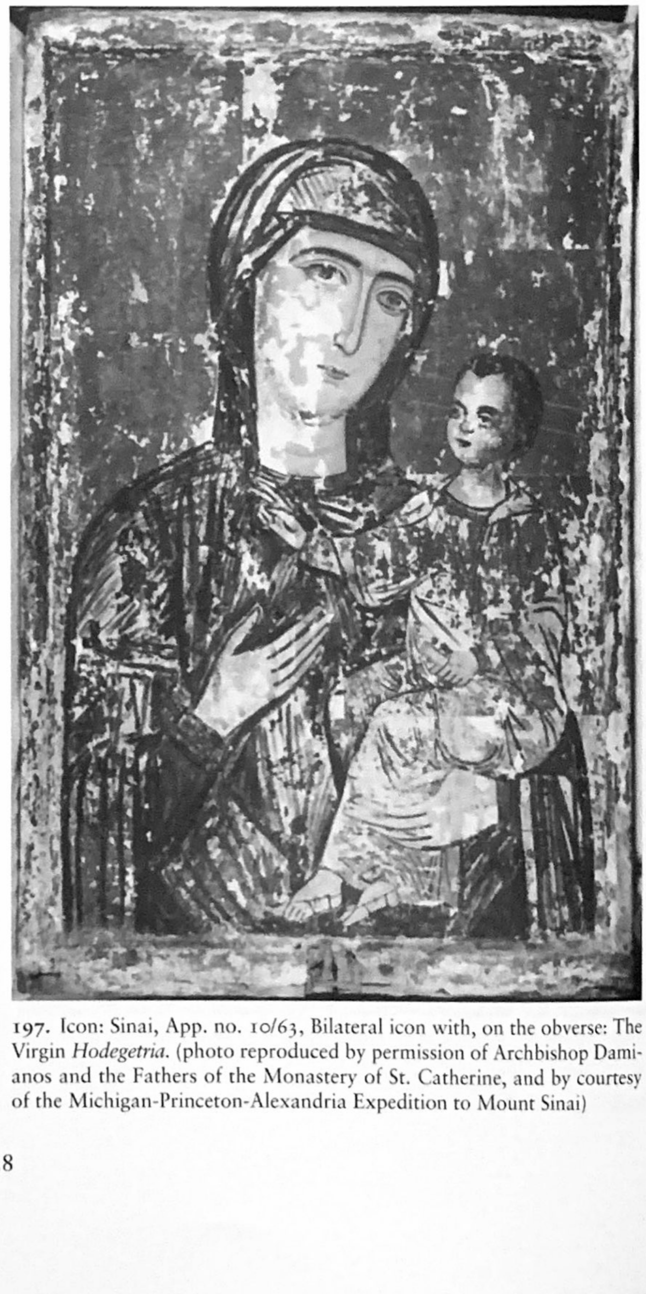
iconography she did not normally receive imperial attributes. She was a princess not an empress, and so she also should not wear the loros. The orb and loros is Crusader iconography for Catherine, essentially found only in Crusader icons.[789]

Another example in this style is an icon with three standing soldier saints, Sts. George, Theodore, and Demetrius (Fig. 196, App. no. 78/1118).[790] As a type, this image is comparable to good Byzantine icons. There exists, for example, a twelfth-century Greek icon on Sinai with the same saints in a slightly different order, as well as an eleventh-century image with Sts. Procopius, Demetrios, and Nestor.[791] There is also a handsome early thirteenth-century Greek icon on Sinai with two saints, St. Theodore Stratelates and St. Demetrios.[792] For the Byzantines, this kind of icon – large or small – was probably a proskynetarion image with the saints grouped according to their type. For the Crusaders, who did not, so far as we know, use a proskynetarion, the association of soldier saints was still valid, but the function was probably a devotional one.

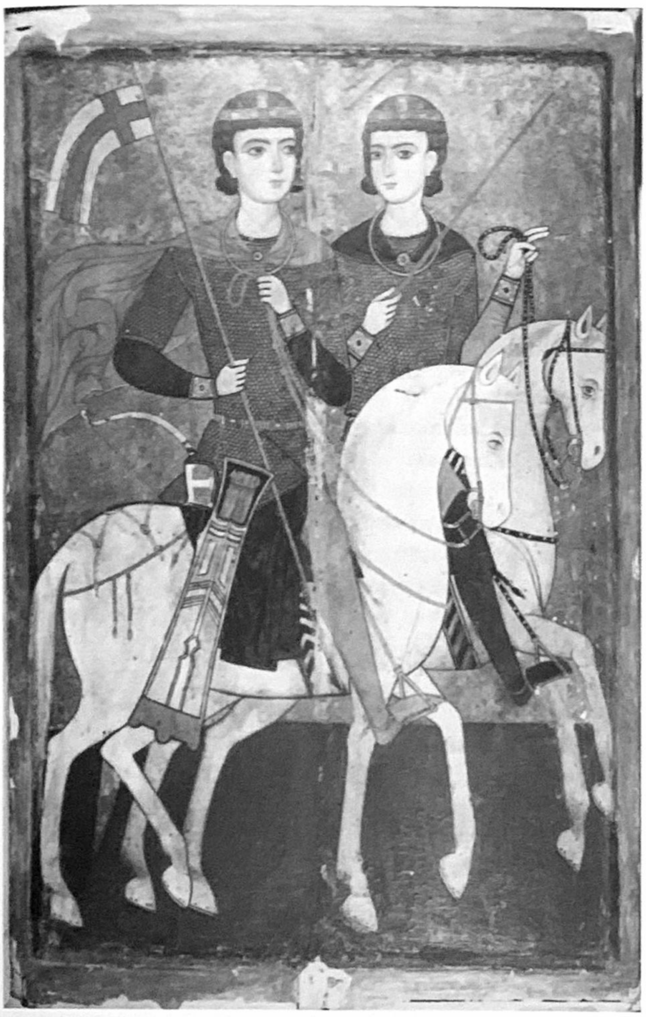
Again the Crusader image has also changed the basic iconography of the twelfth-century example with the three comparable figures. Whereas George is beardless and holds a cross in his right hand and his sword in his left in both, in the Crusader version he wears a diadem and has a small round shield on his proper left arm. His armor is also different, and he wears a long tunic. St. Theodore, standing at the center of the Crusader icon, is identified by a Greek inscription. He is bearded in both, but placed to the far right in the Greek image, where he holds a cross as usual in his right hand and a scepter in his left. In the Crusader image he holds the cross but gestures with his left hand, and also wears a diadem, scale armor, and long tunic, like St. George. Finally St. Demetrios is in the center of the Greek icon, but stands to the right in the Crusader image. Except for the fact that he is beardless, he is exactly like the Crusader St. Theodore in design, only his tunic and cloak are slightly different in colors. But the figure of St. Demetrios in the Greek icon is in a slightly different pose, holding his cross as usual with one hand, but holding the hem of his cloak with the other.

Without insisting that our Crusader artist necessarily used this exact Byzantine icon as his model, we can observe that this comparison shows the Crusader artist has imitated the highly decorative and refined Comnenian style of these Byzantine types, producing a similarly flat-patterned figure style with strongly modeled heads, producing a simplified Crusader version with varied iconography.

Crusader Icons of Mounted Soldier Saints: A similar phenomenon can be seen in another pair of icons from this same



197. Icon: Sinai, App. no. 10/63, Bilateral icon with, on the obverse: The Virgin *Hodegetria*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

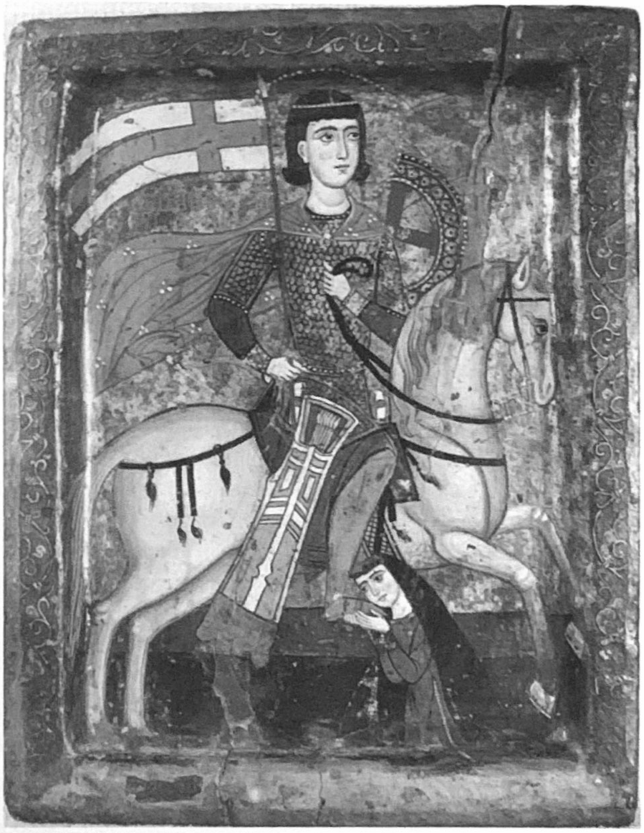


198. Icon: Sinai, App. no. 10/63, Bilateral icon with, on the reverse: mounted soldier saints, Sts. Sergius and Bacchus. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

closely related group done by Crusader painters working in a Veneto-Byzantine Crusader style. We have already noticed that the Crusaders were especially interested in mounted soldier saints: before 1250, with the Freiburg Leaf and the icon of Sts. George and Theodore with a male donor from Paris (Fig. 74, App. no. 94/1463), perhaps done as early as 1225,[793] and after 1250, with the icons of St. George (Fig. 183, App. no. 125) and Sts. Theodore and Demetrios done in a Franco-Byzantine Crusader style (Fig. 184, App. no. 40/386), along with the more conventional frontal standing saints found in Byzantine panels. From the same workshop, possibly even including some work by the same painter that produced the three standing soldier saints (Fig. 196, App. no. 78/1118) discussed earlier, we also have two icons with mounted soldier saints. The first icon is a large bilateral panel (Figs. 197, 198, App. no. 10/63): It represents Sts. Sergius and Bacchus as mounted soldier saints on one side, and on the other a large bust-length and rather damaged image of the Virgin and Child Hodegetria.[794] The second icon is much smaller (Fig. 199, App. no. 14/80) and depicts St. Sergius on horseback with a kneeling female figure wearing a long black veil.[795]

Weitzmann has pointed out that icons with mounted saints are not unknown in Byzantine art, that is, in Early Byzantine art[796] and Middle Byzantine art,[797] but there are few purely Byzantine examples from the thirteenth century at Sinai. One such icon, with images of Sts. Victor, Menas and Vincent, he dates to the thirteenth century.[798] Because of the style and the appearance of the Deësis imagery at the top of this icon,[799] it is undoubtedly Byzantine, but it is an icon that could well have been stimulated by Crusader interest in this type of mounted saint imagery. Numerous other twelfth- and thirteenth-century examples exist in fresco paintings from Syria, Cyprus, and from Frankish Greece that are currently being studied.[800]

It is clear that the Crusaders greatly favored this kind of image, and the cultural and artistic context for these Crusader images was quite rich in the thirteenth century, including both Christian and Muslim examples.[801] The impressive icon of Sts. Sergius and Bacchus (Figs. 196, App. no. 10/63) represents the two Roman officers who were martyred at Resafa in the early fourth century, transformed into Crusaders. They are depicted riding left to right, their horses in profile, they themselves more or less in three-quarter view. Compared with the more informal image of Sts. Theodore and Demetrios (Fig. 184, App. no. 40/386) riding on horses moving in different directions, and with riders seen from the front and back, this image is much more formal in terms of a parade review. The two horsemen and their mounts ride together much like we see on the icon of Sts. George and Theodore (Fig. 74, App. no. 94/1463), or the Byzantine example Weitzmann cited, with Sts. Victor,



199. Icon: Sinai, App. no. 14/80, Panel with St. Sergius and a kneeling female donor figure. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Menas and Vincent. Stylistically, what is distinctive about the Sergius and Bacchus icon is the design of the faces, the modeling of the face and neck with its special "V" shape at the collar bone, the finely patterned scale armor of their short-sleeved hauberk, the "V" fold drapery of the tunic of St. Sergius, and the strongly outlined and two-dimensional, but large and elegant horses. Sts. Sergius and Bacchus are clearly closely related in style to the icon of the three standing saints (Fig. 196, App. no. 78/1118) and to the image of St. Sergius with the kneeling female (Fig. 199, App. no. 14/80), but differences in formal details indicate that they may all be by different artists in this workshop.[802]

Compared with the other icons of mounted soldier saints, however, it is their iconography that is most distinctive. As martyrs they have incised haloes and wear heavily jeweled diadems and round pearled necklaces. The cuffs of their tunics and the fibulae for their cloaks are jeweled. Bacchus even has pearls on the tack of his horse. They both have handsomely decorated saddles and saddle harnesses. They are both armed with spears, but on that of St. Sergius there is a banner featuring a red cross on a white ground. Sergius also carries a composite bow in a saddle case, and from his belt he has a remarkable decorated quiver with arrows featuring at least three different arrowhead tips – barbed, lozenge, and chisel tips – placed tip-up for easy selection.[803]

The icon of St. Sergius with the kneeling female (Fig. 199, App. no. 14/80) also features comparable iconography, although it is done in a slightly different style, with not quite as refined a drawing hand; it is simpler but more robust, with more volumetric modeling especially of the horse. The iconography of St. Sergius, although slightly different in regard to its pearled red halo and diadem and with the addition of a round shield with a red cross, is essentially the same otherwise. Consider the quiver, which is here even proportionally larger, although his arrows have only one kind of tip, the composite bow, the spear, and the somewhat larger banner. And of course, at the feet of Sergius is a kneeling woman with a black veil, who has occasioned much discussion. What does this iconography of St. Sergius mean?

Two of the most conspicuous elements in the representation of St. Sergius in these icons is the quiver, attached to the proper right side of his belt, and the strung composite bow, in a black or red bowcase, attached to the other side of the saddle and only partly visible below the right arm of the saint.[804] Bows and arrows are not normal iconographic components for the equipment of mounted Byzantine soldier saints, for example, Sts. Sergius, Bacchus, George, one or other figure of Theodore, and Demetrios, to name only the most common. When images of mounted soldier saints do appear on icons – rarely in Byzantine art,[805] more frequently in Crusader art[806] – their standard armaments include a lance or spear.[807] Because neither the regular Byzantine nor the regular Crusader mounted cavalry featured horse archery as a major weapon, why, then, is the bow and quiver with arrows included here?

Weitzmann identified the source of the decidedly Oriental looking quiver as ultimately coming from eighth-century art from "Qyzil in the Turfan," transmitted from the East presumably through Persian and possibly Mongol art to the Crusaders. As opposed to a leather sheath or tube, this kind of quiver is like a protective box made of leather or wood(or both), which is here represented as finely decorated, perhaps with ivory inlay, in keeping with the spirit of the parade review representation. Furthermore Weitzmann remarked on the quiver (as did Robin Cormack in a separate article) as another example of eclectic tendencies, which, along with the saint's pearl diadem, his long tunic, his armor and triangular stirrups, when taken together indicate the presence of Crusader imagery.[808] He does not, however, attempt to explain the reason(s) for the appearance of this anomalous quiver with the bow and arrows.

If we ask which armies in the Near East during the period *c.*1250–68 specialized in horse archery, the answer is clearly the Mamluks and the Mongols.[809] If we interpret St. Sergius – identified on these icons by Greek inscriptions[810] – as the embodiment of a Christian knight warring against the infidel, why would he be armed with weapons Byzantine and Crusader cavalry did not typically use? Clearly one possibility might be that the quiver with arrows and the bow are meant to be trophies, or spoils of victory. But alas, the Crusaders won no notable victories over the Mamluks or the Mongols in the second half of the century, as we have seen. Moreover, it is not obvious how the kneeling female figure with her black veil is related to this image of a victorious Christian military saint, perhaps, as has been proposed, as the commemoration of an historical event? Even though she has been interpreted as mourning for the fall of Jerusalem in 1244, an idea suggested by the later practice of Cypriot women mourning for the fall of Acre in 1291 as reported in the fourteenth century,[811] there are other more likely options to consider.

L.-A. Hunt has argued persuasively that this woman is represented with a black veil more likely "to indicate her personal status as a widow than a generalised mourning for the loss of a city." According to William of Tyre, a widow had the right to remain unmarried for a year, meaning among other things that she could and often would wear some sign of mourning that long, and perhaps even longer. The personal aspect of her presence is emphasized not only by the stiff cap she wears to which the veil is attached, indicating she is a woman of stature, but also by her prayer beads, which hang down at her side.[812] As a widow it seems more likely that she is prayerfully seeking the protection of St. Sergius, indicated by the gesture of reverencing his foot, perhaps in mourning for a warrior in her family, possibly her husband, or even her son. In this case it seems more likely that the black veil is an indication of her personal circumstances in mourning for someone and that it is for this reason she is praying to St. Sergius for strength and protection, rather than that the veil refers to the loss of a city.

How then should we interpret this figure of St. Sergius? The image indicates that he is in fact a Crusader soldier saint. What kind of soldier might he be? His armament seems to indicate that he represents the image of a *turcopole*, what William of Tyre calls light-armed cavalry, "equites levis armature, quos Turcopolos vocant."[813] The important fact was that *Turcopoles* were mostly light cavalry originally recruited from the native population. Sometimes they were baptized Muslims. Jonathan Riley-Smith describes them as "half-caste or native calvary: light horsemen sometimes equipped with a bow."[814] We know that *turcopoles* served with both the Byzantine and Crusader armies. In fact they formed regular armed contingents of the major religious orders in the thirteenth-century Levant. We find them among the Hospitallers, the Templars, and the Teutonic Knights.[815] Indeed *Turcopoles* fought with both the Hospitallers and the Templars during the War of St. Sabas, for example. For our consideration here, it is notable that some, indeed apparently a significant number of *turcopoles*, were armed with bows and arrows.[816]

But why choose St. Sergius in particular for such an image and not some other mounted saint? Part of the answer to this may reside in his popular cult in Syria. The Byzantine city of Sergiopolis, al-Rusafa in Arabic, or Resafa, was founded near where he was martyred, and it was there that his relics were preserved.[817] This city was named for him, and he was apparently revered as a patron saint by the native Syrian Christian populace in this entire region. Why should Saint Sergius appear as a *turcopole*? Perhaps these icons of St. Sergius (Fig. 199, App. no. 14/80) and Sts. Sergius and Bacchus (Figs. 198, App. no. 10/63) were commissioned in honor of *turcopoles* who came from Sergiopolis. These commissions could have been made by their wife, or mother, in the case of the former icon, or by a family member, or by friends, or even by themselves in the case of the latter. It appears increasingly evident that local Eastern Christians were important patrons and clientele for "Crusader" icons. Indeed Hunt has argued that the importance of local Christian women as patrons and clientele has heretofore largely been overlooked.[818] In this case the female figure depicted in the St. Sergius icon appears to be a figure in mourning, more than likely for a relative. In any case, until the story recorded in the fourteenth century by Jacopo di Verona, there is no evidence for clothes worn in mourning for the loss of Jerusalem, or any other important Christian city.[819]

If it is correct to see St. Sergius in these two examples represented as a *turcopole*, how shall we understand the banner with a red cross and a white ground that he carries? Weitzmann interpreted that banner as an emblem of the Knights Templar, he concluded "that the two icons were made either at the commission of a Knight Templar, or perhaps for a chapel in a settlement of this order," and he even proposed to name the painter of this closely related group of icons we have been discussing as the "Master of the Knights Templars."[820] The banner with the red cross on a white ground appears in Crusader and Western, but not in Byzantine imagery during the thirteenth century, either as the standard of St. George or as a generic insignia carried by Crusader soldiers in icons and manuscript illumination.[821] The idea of the cross of St. George being appropriated for use by the Crusaders on their banners may have been a conflation of the cross that Crusaders placed on their clothing when taking the Crusading vow, and the visions of heavenly soldiers, sometimes specifically St. George, appearing to inspire them, as reported by the men on the First Crusade.[822]

Weitzmann does not cite the basis for his interpretation, but one likely source for his confusion on this point are the well-known fresco paintings in a Templar chapel at Cressac (Charente) in France, done about 1200.[823] Although the existence of these frescoes clearly verifies the statement of St. Bernard that the Templars decorated their chapels with scenes of battle and trophies of war, the precise interpretation of these paintings remains controversial. Of relevance to us here is the fact that there are scenes of the Crusaders in battle and scenes from the life of St. George, among others in the chapel. In regard to the former, whatever the correct interpretation of the precise battle may be, everyone seems to agree Templars are represented. The depiction of these Templar knights does not, however, include consistent or correct heraldry. Whereas one knight on a galloping horse does have a red cross on a white banner, it is surrounded by eleven eight-pointed stars, and he carries both a red cross and an eagle blazoned on his shield.[824] Other knights wear red crosses on the upper left chest of their surcoat.[825]

In fact, Templars did wear red crosses on their white surcoat, but their battle standard was something quite different. The Templar battle standard was a long narrow vertical rectangle, *argent* with a *chief sable*, meaning that it was white topped by a broad band of black. We know how the standard was used from the Templar Rule,[826] and we know what it looks like from the accurate heraldic paintings of Matthew Paris. The *gonfalon baucent*, or the piebald standard, is depicted several times in the works of Matthew Paris, in the *Historia Anglorum* on folio 42v,[827] in one manuscript of the *Chronica Majora* on p. 220,[828] and in another manuscript of the *Chronica Majora* on folios 141 and 170v,[829] works done in the 1250s. In fact, on folio 141 of the *Chronica Majora*, we also find the banner of the Hospitallers to compare it with, namely, a red banner with a white cross.[830]

It is clear therefore, that this icon of St. Sergius with a banner containing a red cross on a white ground does not represent a Templar, or a Hospitaller, on the basis of that iconography. It represents the image of a Crusader. We should recall however that if St. Sergius is represented as a Crusader *turcopole*, it is possible that these two icons could have been done in honor or in memory of *turcopoles* serving in one of the military orders. Therefore, ironically Weitzmann's original interpretation might be partly correct, namely, that these icons might be connected somehow with a soldier serving with one of the military orders. In the current state of our knowledge we cannot say for sure, however, because we do not know precisely who commissioned these icons or why exactly they were ordered. What is certain is that there is no reason to call the artist(s) who did these icons "the Master of the Knights Templars."

Weitzmann himself acknowledged that the nomenclature he had proposed would have to be revised.[831] In offering a new name here, two factors are important. One is that it is likely that a group of closely related artists is involved in the production of these icons, a group we can provisionally see as belonging to a workshop or atelier. The second factor is that these artists are doing a number of kinds of icons, but they are specializing in military saints for what appear to be Crusader patrons. Therefore, I am suggesting as a new name: the "Workshop of the Soldier Saints." This nomenclature seems reasonable because the most distinctive productions by this group of artists are soldier saints, and especially mounted soldier saints. Furthermore all of the works by this atelier seem to have been produced in a recognizeable linear Veneto-Byzantine Crusader style.

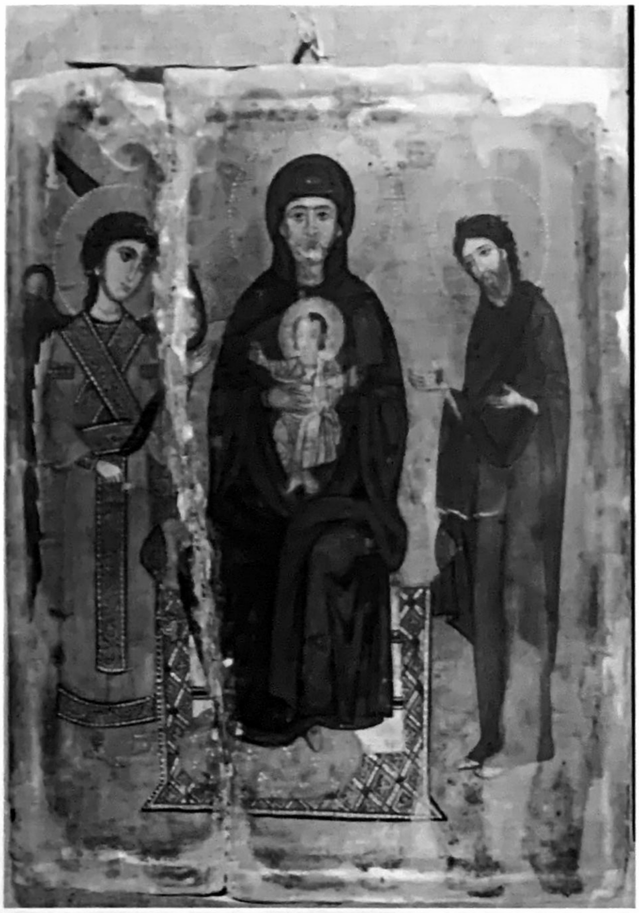
What else can we say about these painters, and where were these icons done? Weitzmann proposed that the same painter did the Sts. Sergius and Bacchus icon (Figs. 198, App. no. 10/63) and the St. Sergius with the kneeling female figure (Fig. 199, App. no. 14/80), and his attribution was followed by D. Mouriki.[832] There is no doubt they are very close, but their similarities may have more to do with the model(s) they were based on and their workshop situation. The mode of painting is different, particularly noticeable in the two-dimensional style of the former and the more three-dimensional volumetric handling of the latter.[833] The design of the horses is quite different between the two icons on close examination, but also the classic Morellian details of the men with regard to their ears, the shapes of the noses, the treatment of the closed hands are done differently. Thus it is probably an oversimplification to talk about one master here for this whole series of icons, and even the two St. Sergius icons appear to have been done by different hands. Who might the artist of the St. Sergius with the kneeling female be (Fig. 199, App. no. 14/80)? There have been a variety of suggestions. Originally the Sotiriou's proposed that it was done on Cyprus.[834] Weitzmann decided that the artist was south Italian, from Apulia but initially wondered whether he could be another painter of Venetian background. In 1975 J. Leroy discussed this icon in the context of Syrian fresco painting at Qara,[835] a view accepted and developed further by L.-A. Hunt in 1991.[836] But there is more to be considered. In 1986 Mouriki proposed the idea that even though these icons belong to the group identified by Weitzmann that we have discussed above, "the painter of the Sergios icon and the double-sided icon of the Hodeghetria and of the Sts. Sergios and Bacchos on horseback was an Easterner, probably a Syrian, who had obtained his training in Cyprus."[837] Mouriki bases her attribution on the mode of painting, the figure style, the ornament, and "the painted floral design on the frame of the small Sergios icon, which finds close parallels in contemporary Syriac miniatures."[838] In my earlier discussion here, I identified this group as belonging to the Workshop of the Soldier Saints in their distinctive Veneto-Byzantine linear Crusader style and differentiated the two icons as probably by different painters.

What are we to make of these diverse opinions about the Crusader style of the small St. Sergius icon (Fig. 199, App. no. 14/80)? In the first place, the discussion demonstrates the complex multicultural context of these icons, the problems of analyzing and evaluating stylistic characteristics against selected *comparanda*, the difficulties of dealing with comparative material in a variety of media, and the differences in assessing a portable object in a diverse collection with other works of variable circumstances, some of which are in fixed locations – the frescoes – and some of which are also quite portable – the illustrated manuscripts and the other icons. Taking the entire discussion into consideration, there clearly seems to be a strong Syrian dimension to this icon, certainly in the choice of the image of St. Sergius, and therefore quite possibly in the patron and apparently in certain of the stylistic features of the icon that suggest the artist may have some kind of Syrian background. The fact is, however, that all of the icons in this series of devotional icons done in this Veneto-Byzantine Crusader style with linear emphasis are close and surely were done in a workshop with a strong identity in one place, wherever the various artists may have come from. That one place could have been either Acre or St. Catherine's Monastery on Mount Sinai. For reasons of the diversity of possible patrons, the variety of holy sites apparently referenced, the fact that only one of the icons in this group – the Sts. Catherine and Marina – has a direct Sinaitic iconographic link, the strong interest in soldier saints, which is not necessarily something obviously characteristic of the monastery on Sinai, and the remarkable differences in the functions these mostly small icons may have served, Acre seems more likely.[839] This is an important case in point of a Crusader workshop style whose participating artists seem to have various backgrounds that reflect the diversity of the Near Eastern setting, but yet they work within the framework of a Veneto-Byzantine linear style apparently established by the head of the workshop and the models the artists are using.

Does the icon with Sts. Sergius and Bacchus (Figs. 198, App. no. 10/63) shed any additional light on this style or workshop? Although the painting of the paired saints offers a more elegant drawing style and a more intensive aesthetic of decoration, the two soldier saints do not easily reveal a different background from the artist of the small St. Sergius icon. He may also have been Syrian in origin. Recalling that this icon is bilateral, however, the image of the bust-length Virgin and Child Hodegetria can add to our understanding of this icon and the workshop from which it came.

Compared with the two mounted saints, the Virgin and Child are badly damaged, from surface abrasion and flaking (Fig. 197, App. no. 10/63). Nonetheless, on close examination, one can see the same precise drawing style for the Virgin's face and the hem of the maphorion as we find on the image of Sts. Sergius and Bacchus. Noting that the Virgin and Child Hodegetria is a popular image among the "Western-influenced" icons at Sinai – there are ten extant from the thirteenth century – it is interesting to note that the model for this image probably came directly from a Byzantine, not a Crusader icon. Bearing in mind that the Byzantine Hodegetria icon published by Weitzmann is the version "Dexiokratousa" with the Child on Virgin's proper right side,[840] instead of the regular Hodegetria as we see here, our Crusader image has the same aristocratic Virgin, a similar vertical composition, a comparable relationship between the Virgin and the Child on her hand, and a similar upward gesture by her free hand. The hem of her maphorion also has a similar threefold ripple effect on the side between the Virgin's head and that of the child, and they both have pendant tassels visible from the shoulder of her free hand. Yet the Crusader copy is obviously not exactly the same, because the Virgin's head is larger; the Child is plumper, blesses in the two-finger Latin manner, and holds the scroll differently; and the Crusader icon has neither angels above nor any extant inscriptions. This image therefore appears to have been done by the same painter who did the two saints on the other side, referring to a good Byzantine icon of the Hodegetria for his model.

Other Icons in the Veneto-Byzantine Crusader Style: Are there other icons that can be related to this group? Although there are various opinions about what icons should be grouped with the Veneto-Byzantine linear style group in the Workshop of the Solder Saints that I have discussed, I propose that two additional icons can be associated with this first set that can be dated in association with the outer wings of the Acre Triptych to the 1260s. These icons include a Virgin *H THS BATOU* with St. Michael and St. John the Baptist (Fig. 200, App. no. 48/544) and a very important example from this workshop, the Virgin and Child *H THS BATOU* with St. John the Baptist and Moses (Fig. 194, App. no. 43/428). Other icons can indeed be related to this large group among works done by artists in the workshop of the Soldier Saints, with its distinctive Veneto-Byzantine linear Crusader style.[841] But I propose that these other icons belong to a later phase of development, in the 1270s and possibly the 1280s, and I discuss them in Chapter 7.



200. Icon: Sinai, App. no. 48/544, Panel with the Virgin and Child "n tns batou" enthroned, and two standing saints, St. Michael, and St. John the Baptist. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

The icon of the Virgin "*H THS BATOU*" (Fig. 200, App. no. 48/544) is again a relatively small devotional icon with several features that link it to our Veneto-Byzantine linear style Crusader group.[842] In type it looks like a variation of the Deësis image, in which St. John the Baptist appears in three-quarter view on the right side in an intercessory pose, but otherwise there are significant changes. The place of Christ alone is taken by the frontal enthroned Virgin and Child, with the tiny Child gently held suspended in front of the Virgin, in the manner of the *Platytera.* The significance of this image is once again, however, the appearance of the Virgin "*H THS BATOU*" as an image of the Virgin in the Burning Bush, a peculiar Sinaitic imagery for which we have seen several interpretations. To the left, also in three-quarter view, is the figure of St. Michael the Archangel in his imperial courtly robes somewhat loosely interpreted, gesturing to the Virgin and Child with his left hand, and swinging a censer with his right hand to honor their holiness.

This icon differs subtly from the others in this group with three standing saints because of its pronounced hierarchical composition, but its close ties with the workshop style are evident in its presentation and repertory of form. The figures are all suspended weightlessly on the matte gold ground. There is the linear handling of the figures including the conventions for the face and eyes. We note the strongly decorative interest in the embroidered costume of St. Michael with its vine-scroll patterns and pearl-encrusted borders comparable to St. Catherine's embroidery in the icon of Sts. Catherine and Marina (Fig. 195, App. no. 90/1418). There is the losenge pattern of the Virgin's throne, generically comparable to both the cloth of honor pattern on the throne and the incised gold pattern on the background of the central Virgin and Child panel of the Acre Triptych (Fig. 156, App. no. 66/753). We observe the three-dimensional ropey drapery, especially of the Virgin, reminiscent of what we saw in the billowing cloak of St. Sergius, in the Sts. Sergius and Bacchus icon (Fig. 197, App. no. 10/63), and the red haloes decorated with pearls link this panel with many other Crusader icons.

Compared with this icon, the last example of this workshop to be discussed here is a much more sophisticated production. The standing Virgin and Child *H THS BATOU* flanked by St. John the Baptist and Moses (Fig. 194, App. no. 43/428) is a somewhat larger icon done in an elegant style by a highly accomplished painter in the tradition of this Veneto-Byzantine linear style workshop.[843] Again the Virgin holds a tiny Christ Child frontally with the significance of the Virgin *H THS BATOU* as we saw in the Virgin and Child *H THS BATOU* (Fig. 200, App. no. 48/544) and a number of earlier examples, but here she stands on a luxurious red cushion placed on a jeweled golden platform. St. John the Baptist stands in three-quarter position at the left, ascetic in his somewhat emaciated proportions and simple garment, gesturing and holding a scroll with a Greek inscription of his prophecy. To the right, a beardless Moses stands also in three-quarter position, cradling a text in his draped proper left hand and his bare right hand, a curious treatment that may have been drawn from an image of Moses holding the tablets.

These figures also float somewhat weightlessly on the gold ground behind them, although the Virgin's footstool is placed solidly on the lower frame. It is odd, however, that whereas St. John the Baptist is placed satisfactorily at the left with only his one foot touching the lower corner of the frame, Moses by contrast overlaps the frame all along the right side and with his foot. This gives the clear suggestion that the artist's model only included two figures, the Virgin and a figure to the left, with Moses being added without sufficient space for his broader proportions. Weitzmann discusses such models, for example, the Byzantine Virgin and Child "*H THS BATOU*" with Isaiah,[844] noting the Crusader artist's efforts "to achieve a higher degree of plasticity." There is also the Byzantine Virgin and Child "*H THS BATOU*" with Moses, very spaciously placed on a small icon with a painted or repainted scroll border.[845]

Weitzmann notes that no fewer than ten such Byzantine icons exist in the Sinai collection, from which the artist might have drawn his model. The Virgin and Child type is repeated without variation, but the holy worshipper is different each time,[846] "presumably selected as namesakes of the donor who commissioned the icons, either as votive gifts or souvenirs. Such a production would indicate a local workshop, and this is also supported by the fact that we can recognize the same workshop in other Sinai icons, all to be dated at the very beginning of the thirteenth century." Thus some of these Byzantine icons were already being used for the same purpose I am proposing for the later Crusader icons whose artists used them for models, and some of these Crusader icons may have been made in Sinai;

the fact is it is difficult to know which were done in Sinai and which were done in Acre.

Weitzmann also notes that this Crusader artist depicts the Virgin and Child "*H THS BATOU*" in the same manner and with the same variable set of worshipper saints as the icon done in Franco-Byzantine Crusader style with the Virgin and Child, with Moses, Elijah and St. Gregory of Nazianzus (Fig. 182, App. no. 7/54, Fig. 355) discussed earlier. In this case, however, the figure of St. John the Baptist is inserted even though he does not appear in the selection of worshippers found in the Byzantine icons referred to above. Moreover St. John has "contracted brows and disheveled hair . . . revealing the artist's keen understanding of a Byzantine model. The choice of the Virgin type and the two Prophets is once more thoroughly Sinaitic; but even here the greater corporeality, the sharp design of the faces, the simplified, more realistic drapery reveal the Italian hand mistakably." For "Italian hand" I would propose to substitute Crusader hand of the Veneto-Byzantine linear style, most remarkable for the elegant linearism of the draperies on all three standing figures, and the sophisticated handling of the three-dimensional facial types so finely painted. The style of this painter is pivotal, linking this panel both to the saints on the outer wings of the Acre Triptych (Figs. 161, 162, App. no. 66/753) and to a group of later works in the most monumental version of this elegant linear Veneto-Byzantine style,[847] works that I discuss in Chapter 7.

There is one final issue that requires comment at this point before we move on to consider other paintings from Acre. Simply put, given how problematic Venetian painting in Venice is in the second half of the thirteenth century in Venice, how and why should we have so many icons done by Crusader artists whose training seems to reflect Venetian traditions painting in Acre after *c.*1258? As Weitzmann pointed out, "our knowledge of Venetian panel painting of the thirteenth century is rather limited, and what little we know about it does not permit a coherent conception. As for the end of the thirteenth century, one focal point is the minatures of the diptych of King Andrew III of Hungary in Bern, a key monument within a whole group of Venetian miniatures under rock crystals; another is a pair of panels in the Museo Correr in Venice with the busts of John the Baptist and St. Andrew." It is with reference to these paintings that Weitzmann defines the painterly Veneto-Byzantine Crusader style with reference to the diptych, and the linear Veneto-Byzantine Crusader style compared with the pair of panels. The diptych of course dates quite a bit later, *c.*1290–6,[848] whereas the pair of panels of John the Baptist and Andrew has fairly recently been dated *c.*1281.[849]

Weitzmann very carefully, of course, only considered *comparanda* among panel painting in his discussion, but certain other Venetian work might help fill in the picture we have of Venetian painting in the period. In mosaics the ongoing work at San Marco is a monumental source for contemporary *comparanda.* Here Demus identified an orderly stylistic development that he characterized as follows:

> Up to and to a certain degree also including the mosaics of the fifties and sixties, Byzantine linear formulas more or less dominated the design and modeling of the draperies. From then onwards they began to be superseded and were finally completely ousted, first by classical lineaments and fold schemes, and finally in the last three decades of the century, by the new glittering light technique and the bulging plasticity of Palaeologan art.[850]

In panel painting there is in the Museo Correr in Venice a wooden *cassa sepolcrale* done for the Monastery of Sts. Biagio and Cataldus at the time of the death of the donor, Giuliana di Collalto (Fig. 201). The box is a large chest with a lid painted on the interior; hence the paintings are apparently in good condition. We see there two standing frontal bishops fully vested with haloes and inscriptions identifying them as the title saints of the monastery. Kneeling to the right in profile is Giuliana, also identified by an inscription. Giuliana died in 1262 as indicated in an inscription on the front of the chest. The three figures are placed on a dark green background with no ground line, and the figures are framed by two decorative bands left and right, bands that look like the golden brocade found on liturgical garments. These brocade borders give the lid the aspect of a silk covering, a kind of pallio for the sepulchral chest. We cannot say if the lid has received any repainting, but it is likely the designs are original to the period around 1262, or according to recent dating, the 1290s. Little attention seems to have been paid to this *cassa*, except to say that it is one of the earliest dated works of Venetian panel painting.[851]

The painted figures of the cassa are of immediate interest because although they resemble miniature painting, they are done in a strongly linear style with intense colors and patterned draperies. St. Cataldus wears a bright red chasuble, and St. Biagio wears a dark blue one with a pink undergarment. Both hold croziers painted with an alternating black and white pattern that appear to be simplified versions of the crozier held by St. Nicholas on the outer wing of the Acre Triptych (Figs. 155–62, App. no. 66/753). We also note the halo type with white dots on black circles, very similar to a large number of crusader panels in the Veneto-Byzantine style referred to earlier.

Finally, the gold brocade panels, with inverted heart-shaped palmettes, constitute a basic pattern for liturgical garments of all kinds in the Sinai icons for which we can cite no fewer than twelve parallels of one kind or other.[852] This is not to suggest that there is any direct connection between this painter in Venice and the icon painters on Mount Sinai, but it is indeed interesting that we can find these parallels with this painting, hitherto unintroduced into the discussion of the Sinai icons. The paintings on the lid certainly tend to validate the dating offered by Weitzmann and assist us in trying to see the earlier and later developments with this style. The links with various decorative motifs also provide interesting parallels, although they cannot necessarily help us with the dating. Perhaps one day it might be possible to find extant silk brocaded vestments that would correspond to these designs at this date in the later thirteenth century.

In manuscript illumination we also find a certain number of examples from the late thirteenth century, including the *Supplicationes variae*. This codex was made in 1293 for use in Genoa, but A. Neff believes that the main cycle of painted line drawings illustrating the life of Christ was done by a Venetian artist.[853] As such this artist exhibits a strong and active interest in the contemporary art of Byzantium, much as Demus has found in the contemporary mosaic work of San Marco. Neff

also points to certain other works by Venetian artists in the second half of the thirteenth century, for example, paintings in an antiphonary now in a private collection[854] or mounted on liturgical objects.[855] These examples serve to indicate that Venice itself was apparently a cosmopolitan artistic center during this period, in which artists were actively producing work demonstrating strong interest in byzantinizing styles, not only for the state, but also for private patrons. Thus we cannot be surprised to find vigorous activity in Acre by artists of Venetian background during the period *c.*1258 and later, a period when Venice assumed a role of special political and economic importance in the Crusader capital.

Manuscript Painting in the Franco-Byzantine Crusader Style in Acre, c.1258–1268: After looking at the various developments with the Veneto-Byzantine Crusader style in Acre in the decade between *c.*1258 and 1268, the question remains as to whether we can identify other significant contemporary work in the Franco-Byzantine Crusader style. In fact, it is in the medium of manuscript illumination that we can see an important new departure in Acre and in Antioch. Following the various religious books done in the Franco-Byzantine style from the 1250s, such as the Perugia Missal, the Egerton Missal in London, and the Padua book of Old Testament selections from the Acre scriptorium, and such as the Arsenal Bible from a Dominican scriptorium, we find in the 1260s the beginnings of the narrative illustration of secular books written in the vernacular, that is, in Old French.

The two most popular texts – judging from extant illustrated examples – were both types of "histories." First, there is *History of Outremer*, the Old French translation of the great Latin work by William II, archbishop of Tyre (1175–84?), the *Historia rerum in partibus transmarinis gestarum*. Second, there is the *Histoire Universelle*,[856] which relates in one continuous narrative the history of the world from Creation to the time of Christ.

The *History of Outremer* was written in the late 1170s and the early 1180s,[857] carrying the story up to early 1184 and left unfinished when William died, perhaps in the fall of 1184.[858] Then his text was translated into Old French at an early date and continued in Old French instalments carrying the story up to various points, the main dates being 1227, 1229, 1231, 1248, 1261, 1264, or 1277.[859] Despite the groundbreaking and substantial studies of these continuations by R. Morgan[860] followed by others,[861] certain basic questions still remain, for example, when and where the Old French translations of the original Latin were done and by whom[862] and which French translations of William of Tyre's text were used with which continuations. In any case it is in the 1240s that we begin to see the production of the first illustrated *History of Outremer* codices in France,[863] followed by the first examples in Acre in the decade following.

For the *Histoire Universelle*, in origin it appears to have been written in Old French for Roger de Lille in France, at the time of Baldwin I, Latin Emperor of Constantinople and an as yet undetermined king of France, probably in the period 1208–13.[864] The first part of the work is largely a compilation from works of Peter Comestor and Orosius, starting with the events of Genesis, Assyrian and early Greek history interspersed with chapters on King Ninus of Nineveh, followed by stories of the *Histoire de Thèbes*, the minotaur, the Amazons, and Hercules. The history of Troy is adapted from the twelfth-century poem by Benoît de Sainte-Maure. Then comes the story of Aeneas adapted from Virgil, and the work ends with Roman history, which incorporates the stories of Persia and the Medes, Judith, Esther, and Alexander the Great, and carries the narrative up to the triumph of Pompey the Great.[865]

A number of extant manuscripts of both of these texts have been attributed to the Latin East, partly on the basis of their codicological and palaeographical characteristics, partly on the basis of the style of their miniatures and decoration, if any. The codex that appears to be the earliest Old French *History of Outremer* manuscript extant from Acre, Paris, B.N. MS fr. 9086, has a continuation to 1232, but no illustrations. It was done apparently in the third quarter of the thirteenth century and might be as early as the latter part of the 1250s. It can be assigned to Acre on the basis of workshop and scribal features.[866] It is of importance to note the evidence of this manuscript. Even though it has no decoration other than its red and blue chapter initials with typically French calligraphic flourishes in the margins, it demonstrates that codices of various levels of production existed, according to the desires and the means of the patron. This suggests the strong possibility that certain scriptoria in Acre operated on a commercial basis, similar to what we find in Paris in the thirteenth century.[867] Certainly there is no reason that requires this manuscript to have been done in the ateliers that specialized in religious and liturgical codices discussed earlier. The hand of the French scribe(s) that produced this manuscript cannot be found in other religious books from Acre. The French scribe(s) that executed this manuscript most likely produced this text in a workshop accessible to the Crusader aristocracy and soldiers who would have been most interested in it, either in a commercial shop, or another possibility would be on contract in the house of one of the military or religious orders.

The earliest illustrated and decorated *History of Outremer* that survives from Acre is now in the Bibliothèque Nationale in Paris, MS fr. 2628 (Fig. 202, CD nos. 106–32). This codex has the basic translated text of William of Tyre, and a Continuation to 1247 as parts of the original project. Then there was added in a later hand a further continuation carrying the story up to 1264. Corresponding to these divisions it contains twenty-six historiated initials probably dating from the decade of the 1250s, and one final miniature added with the last section of text, probably added in the late 1270s, just before 1280.[868] As Buchthal says, "in a modest way the cycle represents a new and interesting venture. These miniatures were not copied from any western model; none of the numerous French manuscripts of William of Tyre has illustrations which are at all comparable."[869] In particular, the illustrations of MS fr. 2628 are completely independent of the *History of Outremer* painted at the court of Louis IX in Paris before he left on Crusade in 1248, Paris, B.N. MS fr. 9081, discussed earlier in this Chapter.[870]

The basic approach to the illustration of these *History of Outremer* manuscripts was the same in the thirteenth century, East or West. Major events, or an event, marking the start of each book division of the text was chosen for illustration. Usually these events were chosen from one of the first chapters of each book or from one of the last chapters of the preceding book, as for example, with the death of one king and the coronation of his successor. Because of this similar process independent cycles often share the choice of the same events, but their style, their specific iconography, their mise en scène, and their treatment of the narrative are all totally different. In the case at hand, there is one other way MS fr. 2628 is parallel to MS fr. 9081, however; it shares with it the mid-century format of historiated double-decker initials, the only *History of Outremer* codex from Acre to exhibit this feature. Yet although MS fr. 2628 is "early" and conventional in that respect, the choice and treatment of scenes is completely independent of the Parisian cycle. True, the artistic level of quality is mediocre in MS fr. 2628, and the painter employs repetitious formulaic imagery, such as knights on horseback riding to a city (Books 2, 3, 5, 13, 17, 20) or the deathbed/coronation pairings (Books 10, 12, 14, 15, 19, 21, 23). Even so these historiated initials have bold designs[871] and appealing narrative images, and this cycle shows certain unique features. In particular the details of life in the Crusader States are vivid and interesting. The coronation rite is rendered with the Crusader focus on the crowning of a kneeling king, instead of the French enthronement, as Buchthal has pointed out.[872] He also observes that "the patriarch of Jerusalem is regularly present at the kings' death-beds. As a rule he is accompanied by an ecclesiastic in a white alb, as worn by Augustinian Canons, in whom we are to recognize the prior of the Holy Sepulcher."[873] There is also the special story of the death of King Fulk while on a *chevauchée* with the queen in the environs of Acre at Book 16, a pair of scenes remarkable for their details of everyday life. We find, for example, the queen in her broad-brimmed sunhat, and the dog capturing the hare who startled the king's horse, the cause of this terrible accident.

There are also notable figures singled out for depiction in MS fr. 2628. We have the unusual depiction of the Byzantine emperor, Heraclius, praying at the Holy Sepulcher in Book 1. At Book 17 there is the attack on Damascus during the Second Crusade at Book 17 led by a knight identified by black fleurs-de-lis on blue trappings as King Louis VII. In Book 25 of the Continuation there is the representation of the elderly knight from Champagne, John of Brienne, sailing to the Holy Land to play an unexpectedly important role in the Latin East. Finally, the illustration at Book 18 records the dastardly abuse of the patriarch of Antioch, Aimery, by Raynauld de Chatillon.

Buchthal claims that although this *History of Outremer* was not copied from a Western model, most of the imagery in its miniatures was "not freely invented: their iconography, just as much as their style, is based on that of the *Histoire Universelle.*" He claims that "the entire repertory of types, groups, figures, and scenes appears to be derived from the Dijon [*Histoire Universelle*] manuscript." Despite the list of "the more obvious borrowings" that he presents, the relationship of these two manuscripts does not seem to exhibit the kind of dependency, one to the other, that he proposes. For example, the Dijon *Histoire Universelle* has its own, different set of repetitious formulae and conventions. There are, for example, numerous figures in bed scenes, images of large seated figures addressing standing or kneeling groups, knights on horseback with brightly colored heraldry, and battle scenes between armies on horseback. If we compare these examples to the historiated initials in MS fr. 2628, as contrasted with the panel miniatures in the later *Histoire Universelle* manuscripts (Brussels, Bibl. Roy. MS 10175 and London, B.L. Add. MS 15268), the examples in the latter seem much closer in most respects, compared with the former. It seems more likely that the similarities found in MS. fr. 2628 and Dijon MS 562 exist because they are both early secular illustrated manuscripts. Their common features in terms of iconographic formulae and conventions can be explained by their relatively early date and the fact that their artists are both dealing with developing a new secular repertory of images, rather than depending one on the other.

In any case MS fr. 2628 seems earlier than Dijon MS 562, not later, based on format and style. In the former, its historiated initial format of the midcentury contrasts to the panel miniatures in the latter, which becomes the format of choice in the latter half of the thirteenth century in the East. Clearly the two manuscripts are also done by different artists in different styles.

Buchthal comments that "apart from differences in quality, which are obvious, the illustrations in . . . Paris fr. 2628, are in the same style as those of the copy of the *Histoire Universelle* in Dijon. Both sets have the same short, stocky figures with big, round faces, protruding eyes, and characteristic lines running from the eyes towards the temples. But in the Paris manuscript their doll-like appearance and standardized gestures make them look lifeless and dull. . . . The drawing is careless and sketchy, the modelling flat and schematic; the human figures are now exclusively rendered in black outlines, and their size is out of all proportion to that of the buildings."[874] Buchthal's analysis is, as always, accurate, and there is no doubt that the quality of the miniatures in MS 562 is higher than in MS fr. 2628, but there are two additional points to be made. First, the figures in the narrative scenes in MS fr. 2628 are charming and interesting, not lifeless and dull, when viewed in the original manuscript. This is because, second, the black and white reproductions in Buchthal's book completely extinguish the vivacity of the images in MS fr. 2628, which are characterized by a lively colorism that these excessively flat gray photographs fail to transmit.

As for Dijon 562[875] (Figs. 203, 204, CD nos. 133–82), Buchthal notes that its "miniatures, rather modest in scope and contained in small square fields inserted into the single columns of the script, are products of the same scriptorium as the Arsenal Bible, and must be of about the same period. They present a similar mixture of eastern and western elements, . . . [but] the Dijon miniatures are more progressive than those of the Arsenal Bible only because they show the influence of a Byzantine model of more recent date; otherwise they are hardly more developed stylistically, and can be only slightly later in date – probably about 1260/70."[876]

Looking at these two manuscripts, MS fr. 2628 and Dijon MS 562, it seems unlikely that they both are stylistically related to the Arsenal Bible in any direct way; only the miniatures in the slightly later manuscript, the *Histoire Universelle*, suggest a distant connection. Furthermore, although they both relate to an overall Acre Franco-Byzantine Crusader style for these secular manuscripts, the artists seem quite different. We can be enabled to evaluate this issue better if we introduce a second early *History of Outremer* codex for comparison, an important manuscript now in the Biblioteca Apostolica Vaticana, MS Pal. Lat. 1963.

MS Pal. Lat. 1963 is unique among the extant illustrated William of Tyre manuscripts because its text consists solely of the Old French translation of the *History of Outremer* with

no continuations[877] (Fig. 205, CD nos. 183–203). The scribe is once again French and the calligraphically decorated chapter initials are also French types. The pictorial decoration was originally planned to be panel miniatures of the sort we see in the Dijon *Histoire Universelle*, but when the cycle was actually carried out, historiated initials were chosen, many in more or less rectangular panels, and a few in a double-decker configuration. The result is an unusual type in which an historiated letter is "floated" on a framed gold ground, something familiar from earlier Crusader work in Jerusalem and Acre, or even in Sicilian illumination, but something we do not find in other William of Tyre manuscripts from Acre in the second half of the thirteenth century.[878]

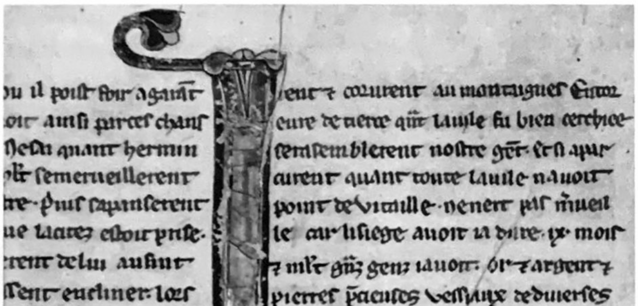
The striking facts about this cycle of miniatures, however, is that in iconography they are completely independent from anything we find in Acre, and in style they are totally different from the Acre Franco-Byzantine style of MS fr. 2628 or Dijon MS 562. Both aspects are worth further consideration.

The narrative cycle in MS Pal. Lat. 1963 is complete except for the author portrait of William of Tyre at Book 1, which is a replacement image done *c.*1400 in the manner of the International Gothic style, and the initial at Book 3 which has been cut out. The other twenty historiated initials are for the most part single scenes, and quite simplified versions of the basic events also illustrated in the cycle MS fr. 2628. For example, where in MS fr. 2628 there are five deathbed-funeral and coronation sequences in the initials, in MS. Pal. Lat. 1963 the same five initials have one scene only with the coronations of Kings Baldwin I, Fulk, and Amaury, the funeral of Amaury, and the episode of Emperor John Comnenus riding into Syria instead of his deathbed scene. These independent choices and the imagery of each scene make clear that the artist of MS Pal. Lat. 1963 was choosing important events at the start of new Books to formulate his cycle, just as the other artists were doing at Acre, but he was doing it independently of contemporary cycles for William of Tyre manuscripts from Acre.

This becomes evident when we look closer at the MS Pal. Lat. 1963 cycle. There we find a few historiated initials that are different from the typical single scene examples at the start of most books. Those initials are found for Books 5, 6, 11, 18, and 22. The striking feature about all of these historiated initials is that they contain scenes pertaining to the history of Antioch. In one case, Book 22, the lower scene of the patriarch riding to Antioch is unique among William of Tyre manuscripts. Book 18 is comparable in its choice of scenes – the episode of the abuse of the patriarch of Antioch by Raynauld de Chatillon – to that also found in MS fr. 2628, but in MS Pal. Lat. 1963 the mise en scène is totally different, and more vivid. Whereas in MS fr. 2628 the imagery of the patriarch is based on the idea of a Byzantine-type Symeon Stylites hooded figure, see, for example, the Sinai icon of Symeon Stylites and St. Barbara (Fig. 193), in the Vatican MS the imagery is more richly narrative. A strong distinction is being drawn between the patriarch in his vivid scarlet robe and the figure of Raynauld wearing his blue cloak lined with vair. This miniature is moreover composed from bottom to top, with the count ordering the abuse of the stubborn patriarch below. Conspicuously standing behind Raynauld is his wife, Constance, over whom he and the patriarch were at odds. The patriarch wearing his scarlet skullcap is being taken to the citadel at right. Then above we find the aged patriarch, who was in rather frail health, with his hands bound, exposed on the citadel in the heat of the day, while one of Raynauld's henchmen pours honey on his bald pate, to attract the flies and insects. The lively narrative is detailed in this case, which accords even with the distinctive masonry of the citadel of Antioch, which is represented constructed with large masonry blocks of an orangish hue. These blocks are rough-hewn on the outer surfaces so that, in effect, an imaginary sun creates a strong pattern of shadow over these surfaces.

Perhaps the most dramatic scenes with the most specific iconography of place in this book are found, however, in the two initials at Books 5 and 6 that depict incidents connected with the First Crusade. In Book 5 the Crusaders ride out from their camp to attack the allies of the Antiochenes. The Antiochenes watch this action looking southwest over the walls with the bridge gate below. The split image suggests a double-decker arrangement, but actually it is a conflated image in which the city in the background is behind the soldiers and the camp in the foreground. Furthermore, the representation of the bridge gate is not imaginary, but rather indicates this artist's direct knowledge of the city of Antioch, a knowledge most impressively represented in the initial for Book 6.

The scene for Book 6 shows the Crusaders putting the surprised Antioches to the sword, after having been let into the city by a Christian sympathizer. With count Bohemond's "*vexillum . . . rubicundum*"[879] rippling in the breeze above the tower where the Crusaders gained entry during the night, the Crusader commander points to their next objective, the citadel of the city still in Antiochene hands. The artistic convention for the inside of this city, with its verdant enclosure sprinkled with flowers, could well have been derived from the Moralized Bibles, as I have discussed elsewhere.[880] There are important changes in this generic model, however. Most significantly, we see a shift from a very general wall profile to what is obviously a very specific depiction. So specific is this that we may identify the city as Antioch. The lower walls of the city have two gates with three towers between them, representing the northeastern St. Paul Gate and the southwestern Gate of St. George. In this miniature the river is omitted and the Bridge Gate seen in Book 5 is accordingly suppressed. The artist focuses, however, on the silhouette of the wall along the heights high above the lower city. We see a three-tower fortress above, which sits on the left peak of an undulating ridge line just before the city walls plunge into a deep ravine, mounting a lower hill to the left before descending to the St. Paul Gate. This distinctive profile must be Mount Silpius at the right. The citadel fortress is not on its highest peak but on the slightly lower one to the northeast just adjacent to the cleft through which flowed the torrent known as Parmenius, separating Mt. Silpius from Mt. Staurin. The significance of this image is that the artist, who is clearly intimately knowledgeable with the topography of Antioch, has painted a city "portrait" of some precision as a setting for the episode of the Crusaders conquering the city in June 1098. The view he has chosen is a famous and characteristic one, which visitors to Antioch can still enjoy while standing on the right bank of the Orontes River.



205. William of Tyre, *History of Outremer*, Rome, Bibl. Apostolica Vaticana, MS Pal. Lat. 1963: fol. 49r, book 6, (L)a estoient..., (historiated initial) The Crusaders fighting inside Antioch. (photograph: copyright Biblioteca Apostolica Vaticana, Vatican City)

I have referred to this iconography of place as a manifestation of the representation of *loca profana* found in Crusader art of the thirteenth century.[881] It is a secular equivalent to the *loca sancta* iconography we have seen in icon painting, especially in the examples that refer by symbolic reference or direct representation to one or other holy site. It is also an iconographical aspect of formal developments known from western Europe in terms of "Gothic naturalism" first seen, for example, in the drawings of Villard de Honnecourt in the 1230s. We see it in this miniature both through the depiction of the city of Antioch and in the comparison of the Crusader soldiers in the city with the then-current coinage. The "helmet deniers" issued by the rulers of Antioch starting in the second half of the twelfth century form one of the most consistent types seen in the Crusader East. On the obverse we find a knight's head with a crescent and a star, surrounded by the inscription, "+ BOAMUNDUS." Looking back at the Book 6 historiated initial, we see exactly the same head type on some of the Crusaders in the city as on the coins. The Antioch helmet denier was issued and circulated from the 1160s into the mid-thirteenth century with certain variations, but it is both distinctive of Antioch in its own way and found from the mint of no other Crusader city.[882] It is, in short, characteristic of Antioch.

> Such direct and unique evidence of specific relationships to Antioch in MS Pal. Lat. 1963, both internal and external to the cycle of historiated initials suggests in the strongest possible terms that the manuscript was done there, in view of its otherwise distinctive Crusader characteristics.[883]

What are the other distinctive aspects of this remarkable manuscript?

One other initial in this codex deserves our attention. Buchthal pointed out that the Book 12 miniature depicts Xerxes, king of Persia, "enthroned in the attitude and costume of a contemporary sultan, and attended with Muhammadan dignitaries; this scene is clearly a direct adaptation of an Islamic miniature in some thirteenth-century Arabic manuscript of the Kitab al-aghani or the Makamat of Hariri."[884] It is remarkable because no direct copy of a Baghdad school miniature appears in Crusader painting in Acre until the mid-1280s. The explanation for its presence here, in a manuscript painted in Antioch, may be found in the fact that Bohemond VI was for a brief time a vassal of the Great Khan. We know what a momentous event it was when Baghdad had fallen to the Mongols in January 1258. "Asiatic Christians everywhere rejoiced. They . . . hailed Hulagu and Dokuz Khatun as the new

Constantine and Helena, God's instruments for vengeance on the enemies of Christ."[885] We know also that when Aleppo and Harenc subsequently fell to the Mongols in 1260, both Hethoum I and Bohemond VI visited Hulagu at his camp to pay him homage. It was there that Hulagu rewarded Bohemond for his deferential visit with spoils taken from his recent conquests. Obviously, among those spoils may have been illustrated Baghdad school manuscripts.

What can be said about the style of these miniatures and the date of this manuscript? The painting seems to be provincial in character, but it possesses a certain strong appeal precisely because of its simplicity and its colorism. The Crusader artist seems to have Italian, probably south Italian, background, but there are also Byzantine and French aspects to his painting as well. The basic figure style suggests the south Italian aspect.[886] Some of the iconographical vocabulary evokes Byzantine parallels.[887] Further, as we have seen there are basic formulas used that seem to be drawn from the Moralized Bibles.[888] But the overall synthesis including the striking colorism of these miniatures seems to be fully Crusader, and apparently Antiochene.

As for the date of this codex, having noted the strong south Italian element in the background of this Crusader artist along with clear French influence in the miniatures, we can probably conclude that the codex was done sometime after Louis IX intervened in the Antiochene succession dispute in 1252.[889] At that time Louis IX would have likely presented Bohemond VI with gifts of recent illustrated books from Acre or even from France on the occasion of knighting the young man at Acre. So if 1252 can be proposed as the *terminus post quem*, the *terminus ante quem* is obviously 1268 when Antioch fell to Baybars and the Mamluk army. The presence of evidence indicating this Crusader painter also used models drawn from School of Baghdad manuscripts suggests further that the *terminus post quem* should be moved up to 1260. So the likely period for the production of this codex is 1260 to 1268 in Antioch.[890] In sum, these considerations make MS Pal. Lat. 1963 slightly later than MS fr. 2628, which may have been done shortly before 1260, but contemporary with Dijon MS 562, which also seems to have been done in the early 1260s.

In conclusion, although it is perhaps surprising to find that this codex seems to show no certain links to Syriac or Armenian manuscript painting but does reflect the impact of work from the School of Baghdad, it is no surprise to find an illustrated manuscript from Antioch nor can it be unexpected that this manuscript contains the *History of Outremer*. Antioch was, along with Jerusalem, Acre, Tyre, and Tripoli, one of the most important Crusader cities, and therefore a center with great potential for artististic production.[891] The fact that this illustrated codex is a *History of Outremer* only provides further evidence of the great popularity in the Latin East of the Old French translation of William of Tyre's great *Historia*.

OTHER EVIDENCE FOR PAINTING IN ACRE BETWEEN C.1260 AND 1268

The existence of the Dijon *Histoire Universelle* as an Acre School product in the 1260s raises the question of whether we can identify any other paintings, especially icons, in the Franco-Byzantine Crusader style from this period. Clearly this codex demonstrates a continuing Crusader patronage interested in secular book illumination in the Franco-Byzantine style founded in Acre by the French king, Louis IX. As Buchthal pointed out, *Histoire Universelle* manuscripts of this type "were produced for 'connoisseurs' who belonged to the native nobility, and the character of their illustrations in is keeping with the small literary merits of the text: it reflects the crude taste and the mediocre education of the military caste for which this unpretentious compilation was intended. Works of no more than local importance were entrusted to second-hand local craftsmen; they lacked the cosmopolitan training and outlook of the great master of the Arsenal Bible, and their achievements were at best no more than prosaic."[892] We might think that the patronage for this kind of manuscript could extend beyond the "native nobility" to recently arrived soldiers of the French regiment, or of one of the military orders. But it is interesting that in contrast to the Crusader *History of Outremer* manuscripts, which were illustrated completely independently of western European cycles,[893] in this case Dijon MS 562 follows "the original French cycle more reliably than any surviving western manuscript." What is also notable is that Byzantine formulas that do not appear in the Western manuscripts appear here, which must have been clearly copied directly from Greek thirteenth-century prototypes. As Buchthal remarks, "that several Byzantine manuscripts of a very recent date were present in . . . Acre, at a time when the supply of contemporary French models had already dried up," is an unexpected discovery from "these otherwise so inconspicuous miniatures."[894]

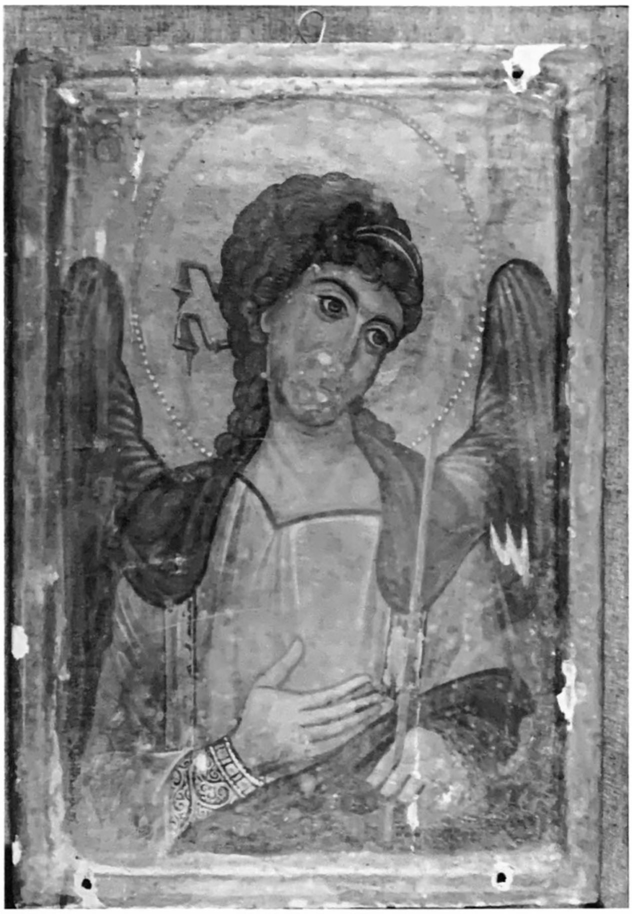
It is this strong Byzantine connection, both iconographically and stylistically, in the Genesis cycle of Dijon MS 562 that provides us with important evidence for what the Franco-Byzantine style by a Crusader painter looked like in Acre during the 1260s. Buchthal has pointed out how the Genesis frontispiece to the Dijon manuscript bears certain iconographic links to that in the Arsenal Bible. Two other miniatures, however, reveal that the artist did not follow the Western cycle and must have had access to recent Byzantine models. The image of Abraham's Hospitality at folio 21v is one example. "The angels are more closely related to each other by their gestures and movements, and Abraham and Sarah, who is shown full length standing in the doorway of her house, are very similar to the figures in the mosaic at Monreale. Moreover, the crossed nimbus is now given to the angel sitting to the left, at the head of the table, in a position comparable to that of Christ in representations of the Last Supper."[895] Another example is the miniature for the Sacrifice of Isaac. Here Abraham brandishes a dagger in typical Byzantine fashion, and the second scene included in this miniature, Abraham and Isaac ascending the mountain, also follows Byzantine models. Besides these iconographic aspects, we note in these miniatures, typical Byzantine-style facial types of bearded old men, figures seen from the back with their heads turned around, tubular drapery folds, and upper garments with symmetrical zigzag edges ending in sharply pointed tips.[896]

These examples of Byzantine influence in Dijon MS 562 give us a bit of evidence for the existence of Crusader painters in Acre in the 1260s working in the Franco-Byzantine Crusader style as well as the Veneto-Byzantine Crusader style. Besides this manuscript there are also a few icons that may belong to this period as well.

Additional Crusader Icons in the 1260s: There exist at Sinai in the collection of St. Catherine's Monastery, two sets of small icons which constitute the Deësis. The first set consists of two icons. There is a frontal bust-length image of Christ (Fig. 129, App. no. 16/110), blessing and holding an open Gospel book with a Greek inscription of John 8: 12,[897] and there is also a panel with the bust-length Virgin (Fig. 128, App. no. 15/109) turning to our right and making intercessory gestures with her hands.[898] There is no doubt that these two icons were probably not done by the same painter, but their style is quite close, both in their facial design and shading and in the handling of the draperies with pronounced loops and fold patterns emphasized by white highlights. They also share similar details such as their undecorated red haloes and the matte gold cuffs and hems on their clothing. These two examples may not have originally gone together, because although both are small, their measurements are slightly different, but if not, they were very likely part of similar Deësis sets.

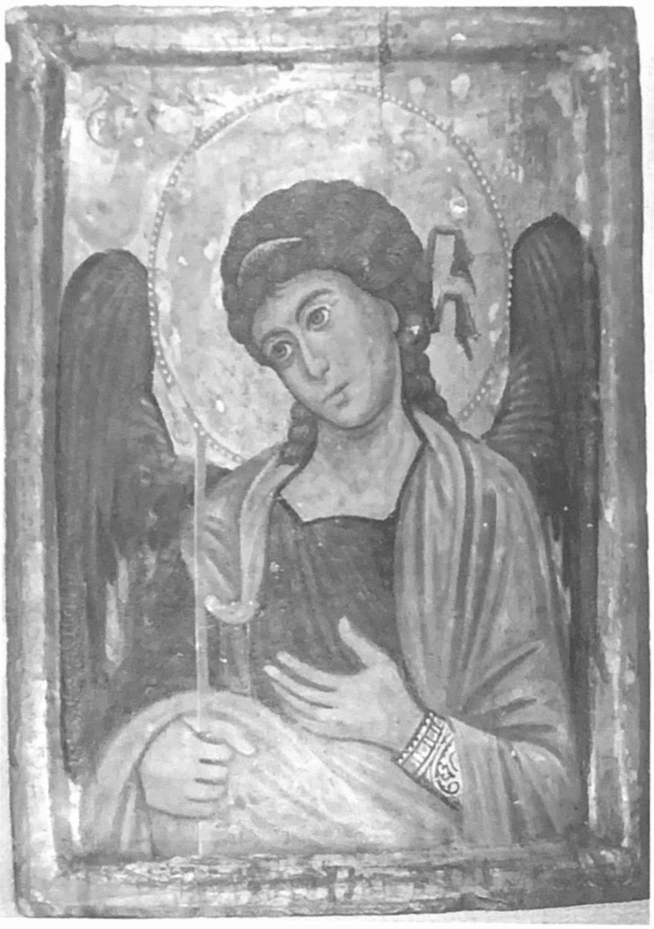
A similar pair is also found along with a separate figure of St. John the Baptist, all of which may have belonged to two or more sets like the first one. In this group, the figure of the blessing Christ Pantokrator (Fig. 125)[899] holds a closed book with a handsome golden cover. The treatment of his face is smaller in design, more simplified, and reflects the Acre style conventions for the definition of the eyes. His drapery is designed with simpler linear folds, and his hands are somewhat clumsy in their articulation. The head is nonetheless impressive with its richly decorated halo featuring the typical red outer rim intensively studded with pearls. A similar bust-length Virgin (Fig. 126, App. no. 1/36)[900] with intercessory gestures appears to be part of the same or a similar Deësis set. Her drapery, the modeling and linear definition of her hands and face, the linear convention used for her eyes, and her red halo studded with pearls are all comparable to the blessing Christ (Fig. 125, App. no. 2/37) mentioned earlier. In fact her softly painted face seems to be a model example of what a Crusader painter of Franco-Byzantine training would do when trying to emulate good Byzantine icons.

Such purely Byzantine icons exist from the early thirteenth century that our Crusader artists could have been using as models. Mouriki published a somewhat controversial bust-length Christ Pantokrator with a comparably sized bust-length intercessory Virgin which show us handsome examples of what appears to be the late Comnenian Byzantine style shortly after 1200 at Sinai.[901] Both of these Byzantine icons are much larger, over twice the size of the Crusader panels we have been discussing, but they indicate the high-quality painting that was available for later Crusader painters to see when they visited the monastery. Mouriki describes the late Comnenian characteristics in the figure of Christ. There we see "the gold striations in the light brown chiton and in its purple clavus, the gold letters on the open Gospels with their deep red pages which imitate purple dyed parchment, and the use of the familiar technique for the reflection of light on the gold ground [to] give the impression of a 'precious' work." We also see, "a preference for light tones for the iris and for the smooth modelling of the flesh, with a sharp contrast between the warm ochre and the abundant red. Impeccable technique is exhibited in the detailed rendering of line and colour with many fine brushstrokes, following older trends. . . . Despite the diminished volume of the body, the Sinai icons may be placed at the beginning of the thirteenth century."[902] We can clearly see the difference between the linear elegance of the monumental and highly decorative late Comnenian Byzantine examples of Christ and the Virgin, when compared to the much less pretentious, simpler, and more softly modeled Crusader examples (Figs. 125, 126, App. nos. 1/36, 2/37). We can also sense, however, what an inspiration these Byzantine icons of outstanding artistic quality could have been for the Crusader artists who were studying them and imitating them in their work.



206. Icon: Sinai, App. no. 89/1414, Panel with bust-length figure of Archangel Michael. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

The question remains whether these sets would have had two, three, or even five panels, in the case of Great Deësis ensembles, as I alluded to in Chapter 5. Surely the Virgin discussed here (Fig. 126, no. 1/36) is done in the same style as two archangels (Fig. 207, App. nos. 85/1357 and Fig. 206, App. nos. 89/1414) that we discussed in Chapter 5 as belonging to the 1260s. Surely the pose of their head is the same, their drapery is closely similar with comparable highlights, their round facial design and soft modeling is similar, and their haloes are red and intensively studded with pearls. In fact, a feature that seems to parallel other icons we have seen is the embroidered designs on the cuffs of their garments, which clearly resemble as costume variants the work on many of the small icons done in the Veneto-Byzantine Crusader style, such as the three standing soldier saints, George, Theodore, and Demetrios (Fig. 196,



207. Icon: Sinai, App. no. 85/1387, Panel with bust-length figure of Archangel Gabriel. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

App. no. 78/1118) or the standing female saints, Catherine and Marina (Fig. 195, App. no. 90/1418), also dated in the 1260s.

For the Great Deësis there would have been a set of five icons, which in this group may have been the Christ blessing (Fig. 125, App. no. 2/37), the intercessory Virgin (Fig. 126, App. no. 1/36), the archangels Michael and Gabriel (Fig. 206, App. nos. 89/1414, Fig. 207, App. nos. 85/1357), and an image of St. John the Baptist. In this case there are two possible examples. First we have a strongly linear St. John the Baptist (Fig. 127, App. no. 3/38)[903] that actually seems a bit later in style at first glance compared with the softer modeling of the Virgin and Archangels icons. There is also a very fragmentary but beautifully painted St. John the Baptist (Fig. 131, App. no. 45/470),[904] which is striking because of the verticality of its composition and his more emphatic intercessory gestures with John's proper right arm and hand completely vertical. Of the two, the former St. John (Fig. 127, App. no. 3/38) seems more likely to be linked with this Great Deësis group, either as an actual part of the ensemble or as a copy of a member of this ensemble. The main similarities seem to be found in the size of his panel, the contrast in modeling between the finely painted face and the somewhat inarticulated hands and arms, the more or less comparable draperies with white highlights, as well as the familiar red halo intensively studded with pearls.

Besides these panels for Deësis icons and ensembles for the Great Deësis, perhaps to place on templon screens, we also have a series of small panels of the Virgin and Child and three diminutive triptychs. Of the three, one has a central panel containing the Crucifixion, and two have enthroned images of the Virgin and Child. All of these icons seem somewhat related in style to the Crusader icons discussed earlier, one way or other. First, there is a tiny panel of a bust-length Virgin and Child Hodegetria (Fig. 208, App. no. 25/220).[905] It resembles the intercessory Virgin (Fig. 128, App. no. 15/109) in terms of aspects of drapery design and handling, as well as seeming to be a more folksy version in linear terms of the basic image of the Virgin and Christ. White highlights clearly appear to have been used for this little devotional plaque, which, however modest, is quite charming. It reminds us somewhat of the figure style in the Dijon MS 562 *Histoire Universelle*. Furthermore, the decorative design of alternating squares of color with equal-armed crosses and four dots gives its frame a bold coloristic and geometric design on the one hand and a somewhat more intimate feel of a touch of folk art.

A similar feature is found on a tiny unpublished triptych (Fig. 209, App. no. 70/822)[906] that, however modest as a work of art, presents a program as remarkable in some ways as the slightly earlier, but more or less contemporary Acre Triptych (Figs. 155–62, App. no. 66/753). The triptych configuration here is different from what we see in the Acre Triptych however. Instead of covering the central panel, the two wings fit into a sunken field in the central panel, a design developed in Byzantium during the twelfth century, and by the thirteenth century Crusader

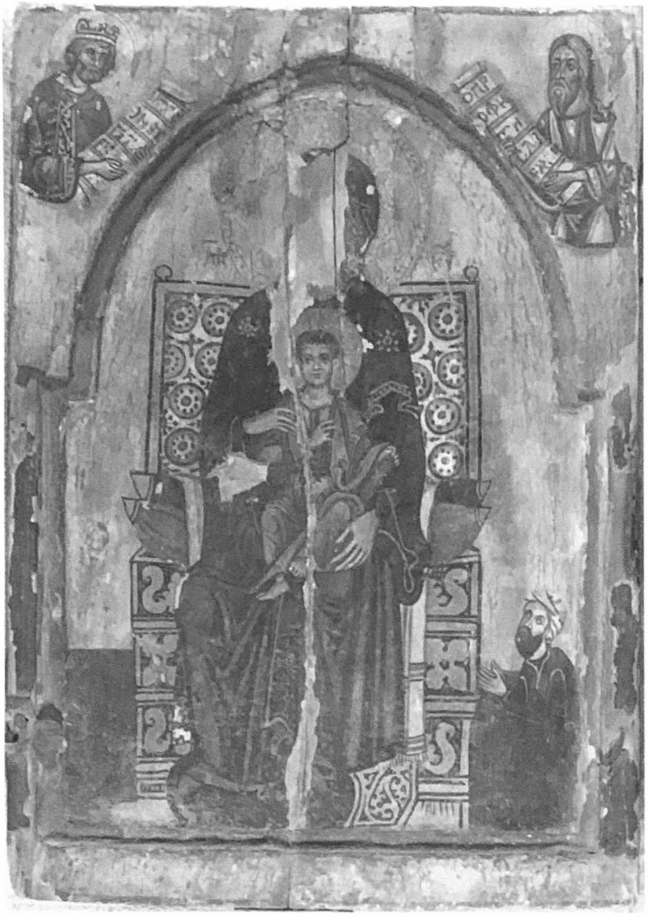
209. Icon: Sinai, App. no. 70/822, Triptych with Virgin and Child Galaktotrophousa Enthroned with Sts. Marina and Catherine on the central panel along with two kneeling donors, and on the wings: (inside left wing) the Nativity and the Annunciation of the Angels to the Shepherds, and (inside right wing) the Crucifixion and the Three Maries at the Tomb. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

icon makers started using it as we see here.[907] In the central panel we see the Virgin and Child enthroned, with the specific iconography of the Galaktotrophousa, that is, the Mother nursing her child, a motif extremely popular in the West in the late Middle Ages, but also known in early and middle Byzantine art. It appears in Byzantine thirteenth-century icons as well as Crusader panel painting seen here.[908] The main group of the Virgin and Child is accompanied by two saints, Marina and Catherine, suspended to each side above two kneeling donor figures. In the round arch above there are large nine-pointed star shapes, creating the idea of an arc of heaven and a border with bold geometric design as we saw earlier in the Virgin Hodegetria plaque (Fig. 208, App. no. 25/220). Above the Virgin and Child, in the spandrels of the arch, was a scene of the Annunciation, with the angel, Gabriel, now effaced, at the left, and at the right a standing Virgin gesturing in surprise.

Like the program of the Acre Triptych, this small devotional icon is focused on the life of the Virgin, although here the choice of scenes is more conventional and drawn from imagery of the Byzantine feast cycle. Following the Annunciation chronologically, there is, or was – this wing is badly damaged – on the inside left wing, a scene of the Nativity below, and above presumably the Annunciation of the Angels to the Shepherds. On the right wing are found the Crucifixion, in a simplified version but that still bears some marks of the Acre School imagery for this scene, which we have seen in the 1250s. Below this is the three Maries at the tomb (from Mark's Gospel) with an angelic figure (from Matthew's Gospel) seated on the empty tomb to the right. The iconography of the front figure from this threesome, presumably Mary Magdalene, relates her to the Virgin Mary above and in the central panel of this triptych.

As a program, the series of scenes provides an expectable sequence, which highlights the role of the Virgin at major points in her relationship with Jesus. Here the scenes pertain to the Incarnation, the Nativity, the Death, and, in effect, the Resurrection, quite in contrast to the unusual choices found on the Acre Triptych (Figs. 155–62, App. no. 66/753). The main central cult figure of the Virgin Galaktotrophousa does, however, focus on the motherly role of the Virgin as the human source of flesh and nourishment for the Child, a devotional focus parallel in its humanity to the image of the "Virgin of Tenderness" type on the Acre Triptych. This devotional focus is enriched here, however, by the diminutive attending female saints, in fact, two Sinaitic saints, as we have seen already in our discussion of the icon of Marina and Catherine (Fig. 195, App. no. 90/1418) in the Veneto-Byzantine style. They are joined by the two small donor figures, an aristocratic man wearing an ermine-trimmed hat to the left and a woman in a red cloak to the right. They are kneeling in the upright, Latin or Western mode, worshipping the Virgin and Child Galaktotrophousa in a typically devotional manner characteristic of pilgrims at the Holy Sites. Images of donors are a frequent feature of Crusader icon painting as we have seen, and although they are far less frequent on purely Byzantine icons, they also do appear from time to time in Armenian and Syriac painting.[909]

In this case, however, the icon seems to have been done by a Crusader artist of French background, indeed, one who arrived quite recently off the boat perhaps. His style is simplified and his figures parallel those in the secular manuscripts of the *History of Outremer* and the *Histoire Universelle* in their immediacy and charm, as well as in the bright colorism and folk appeal of the



210. Icon: Sinai, App. no. 51/573, Triptych center panel with the Virgin and Child "n tns batou" enthroned, with kneeling male figure in a turban. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

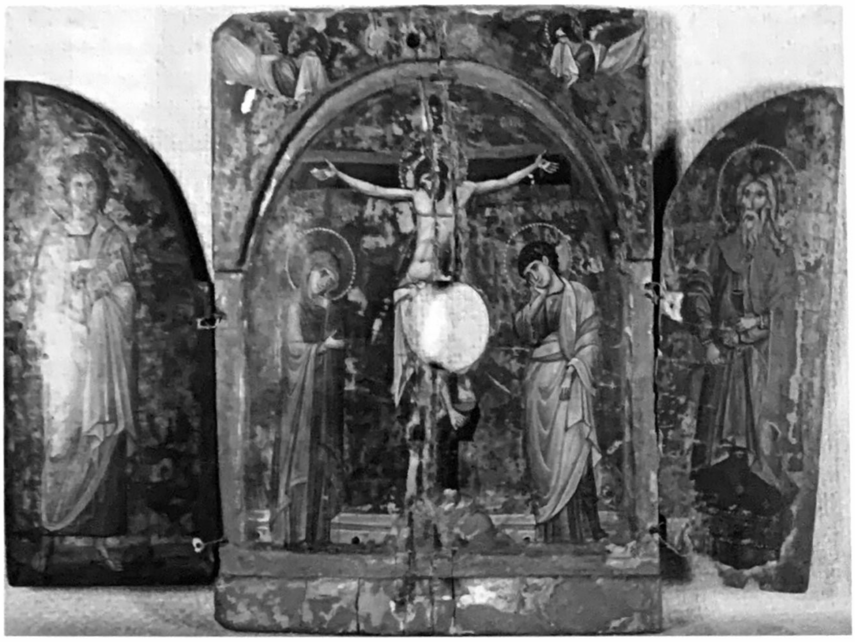
end result. The artist was hardly an accomplished master but seems to have been a competent painter who was somewhat timidly attempting his hand at what seems like it may have been a new kind of art for him, devotional panel paintings for Crusader patrons.

To some extent we find a similar end result on a damaged central plaque for a comparable type of triptych featuring an Enthroned Virgin and Child on a beautiful ivory throne (Fig. 210, App. no. 51/573)[910] in which we see represented a kneeling male donor figure wearing a turban who worships the Virgin and Child Platytera with two bust-length Old Testament figures above on the spandrels of the arch, a king at the left, and to the right, Aaron. It is striking that the array of donor figures – male and female – in Crusader icons is so diverse, starting with the column icons in the Church of the Nativity in Bethlehem between 1130 and the late twelfth century[911] and continuing with various icons in the thirteenth century, among which the most important already discussed are the equestrian St. Sergius with the veiled female donor (Fig. 199, App. no. 14/80) from the 1260s, and the equestrian figures of Sts. Theodore and George with the male donor named George Parisi (Fig. 74, App. no. 94/1463), from *c.*1225.

As we mentioned, this icon (Fig. 210, App. no. 51/573) is the central panel for a triptych, one of several extant from this period, for which the wings in this case are now lost. It is again a Byzantine-type triptych with the central field sunken so that the wings would fold over into this cavity. These Crusader triptychs were usually small and easily portable, which perhaps was their main devotional function. This triptych panel is, however, strikingly different from the round-arched example of the Virgin and Child Galaktotrophousa (Fig. 209, App. no. 70/822) seen earlier. The arch in this case is pointed in the Gothic manner, but a typically Levantine design, broad and open, seen in architecture in the Latin Kingdom since the mid-twelfth century. Pointed arches like this are much less frequent in panel painting, however, or in miniature painting either, for that matter. The main examples we have are in the Arsenal Bible in the frontispiece for the Wisdom of Solomon, and another major icon, an iconostasis beam dossal, which features the Deesis with seven additional bust-length saints (Figs. 256–61, App. no. 74/1003), a major work in the Veneto-Byzantine style discussed in Chapter 7.

The imagery of this central panel presents us with several unusual features on this devotional icon. First there is the Virgin's throne, which appears to simulate ivory carving in its design and white coloration. This idea may be meant to suggest the idea of the Virgin as the *sedes sapientiae*, the Throne of Wisdom, as taken from 3 Kings 10: 18–19, where the throne of Solomon was made of ivory.[912] This suggests that the king – an aged king with white hair and beard – at the upper left may be Solomon, as indicated also from the text on his scroll. Solomon and Aaron otherwise form an unusual pairing on this panel. Finally, who might the donor be? Sotiriou thought he could be an Arab monk or St. John of Damascus, who is frequently shown with a turban. But as Weitzmann points out, his garments are secular, not monastic, thus indicating an Arab Christian layman who cannot be identified specifically.[913] The fact that he is an Eastern Christian should not surprise us, because clearly the clientele for these devotional icons seems to have been drawn from Eastern as well as Latin Christians, who might have been on pilgrimage or seeking holy images from nearby holy sites.

The style of painting on this icon is simplified as we also found it to be the case on the Virgin and Child *Galaktotrophousa* (Fig. 209, App. no. 70/822). Yet this artist is more accomplished, working in a more sophisticated figure style with drapery fold designs that both articulate the body and suggest a certain three-dimensionality for the figure. One unusual aspect of the decoration is found in the Virgin's halo, where we note incised foliate – palmette – designs combined with studded dots punched around the rim of what appears to be the compass-drawn circle. Sotiriou thought this kind of incised pattern could be related to work in ceramic, and Weitzmann suggested that the closest formal design could be seen in the important *Histoire Universelle* now in London, which is to be dated in the mid-1280s. It is true that the incised decorative design of the Virgin's halo here does resemble the haloes of the patriarch and the angel at the left in the scene of the Hospitality of Abraham on folio 24v of London, British Library, Add. MS 15268 (Fig. 248). Closer inspection reveals that none of the designs is exactly alike, however; they are, rather, generically similar. Furthermore, it seems more likely that the idea for using the incised technique found here came from a workshop like that of the Acre Triptych (Figs. 155–62, App. no. 66/753),



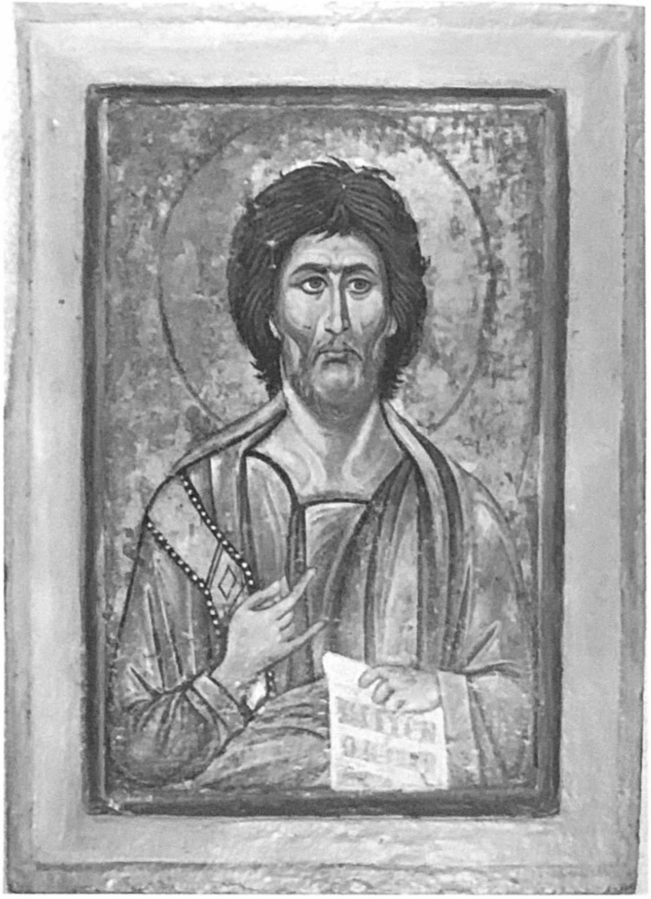
211. Icon: Sinai, App. no. 13/78, Triptych with Crucifixion, sorrowing Sts. Mary and John on the central panel with two sorrowing angels in the spandrels of the arch above, and on the wings: Moses and Aaron. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

which has the richest array of incised work found on any Crusader panel. Thus, rather than imagining that the manuscript illumination influenced these icon painters,[914] I would propose that it is instead much more likely that the designs achieved in this technique by the panel painters in the 1250s and 1260s were later reflected in generic versions found in important miniatures, as we see in the London *Histoire Universelle* of the 1280s.

Finally, from approximately the same time, we have a tiny Triptych with the Crucifixion (Fig. 211, App. no. 13/78)[915] that relates once again to the Crucifixions we studied in the 1250s on icons and in manuscripts. Despite the damage done to the central panel, we can see that this is a traditional four-nail crucifixion, found in the Acre Crusader Crucifixion icon of *c.*1250 (Fig. 152, App. no. 104/1732), but otherwise this image seems to be linked to the Crucifixion panel in the Perugia Missal. Slight changes in the style in terms of the greater linear definition of the drapery, the softened poses, the enlarged loincloth of Christ, along with the simplified architectural backdrop, and the introduction of the familiar red haloes studded with pearls, suggest this is a later version of this imagery. The expressive poses of the sorrowing angels as a pair are not exactly the same as those in any of the earlier Crusader images, but individually they are close to one or other example, and they certainly echo the same high emotional intensity.

Following Weitzmann's argument but revising it, I propose the icon is done by a Crusader painter of Franco-Byzantine artistic background. On the basis of the figures on the wings, Moses and Aaron, the patron saints of Mount Sinai, Weitzmann also proposes that this triptych "was actually made for Sinai."[916] Moses here is the older, Western-type figure, who holds some kind of tablet instead of the scroll we see him carry in other earlier Crusader examples (e.g., Fig. 187, App. no. 33/293). Aaron's costume is more complex. His priestly headdress seems to relate to the imagery found in the frontispiece for the Book of Numbers in the Arsenal Bible. The Crusader artist has also simplified the ephod he wears over the long robe into a generic mantle. The pearl-bordered embroidered panel we see on his ephod in Byzantine images,[917] is here transferred to the long robe. This decorative element of his costume in our Crusader context relates this icon and its painter to the context and characteristics of the Veneto-Byzantine style from the 1260s discussed earlier, along with the formally rather expansive figures and the other slightly later aspects we have identified. Decorative motifs of this kind could, of course, apparently be passed along in workshop situations, and we must imagine that this is what has happened here, where a Crusader painter of Franco-Byzantine background has appropriated a motif found frequently on icons currently quite popular in Acre and at Sinai, done by artists working in a Veneto-Byzantine Crusader style.

Finally, there is a handsomely painted bust-length image of Moses (Fig. 208, App. no. 88/1412),[918] finely painted and beautifully modeled, that even relates to the Christ (Fig. 129, no. 16/110) we started out with or with the image of Moses on the little triptych discussed earlier (Fig. 211, App. no. 13/78), but seems perhaps to date a bit later in relation to an important series of Veneto-Byzantine style works we find in the 1270s. There are also other works that relate to these icons we are dating to the 1260s but that seem later following slightly different developments. Weitzmann mentioned a panel with Moses and Aaron (Fig. 209, App. no. 12/76),[919] one that shows the artist better understood the Byzantine iconography of Aaron's costume but that seems stylistically quite different from the rather flat decorative figures of the Veneto-Byzantine workshop examples of frontal standing small devotional icons. There is also a small figure of a bust-length Christ (Fig. 130, App. no. 77/1025)[920] that seems coarse and less accomplished in style compared with the comparable panels in our 1260s groupings (Fig. 125,



212. Icon: Sinai, App. no. 88/1412, Panel with bust-length figure of middle-aged, bearded Moses. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

App. no. 2/37 and Fig. 129, App. no. 16/110). All of these latter three icons (Fig. 212, App. no. 88/1412, Fig. 213, App. no. 12/76, and Fig. 130, App. no. 77/1025) seem to relate to work found in the 1270s, which I discuss at length in Chapter 7.

Minor Arts in the Latin Kingdom of Jerusalem and The Testament of Count Eudes de Nevers in Acre, 1266: The final bit of written evidence for painting, as well as an impressive array of minor arts in Acre, for examples of manuscripts, metalwork, enamels, and textiles, during the 1260s comes from an unexpected source. On 20 October 1265 an immensely wealthy Crusader, Eudes, count of Nevers, landed in Acre with Erard de Valery and fifty knights. After brief service, Eudes died there less than a year later, on 7 August 1266, and he was buried in the cemetery of St. Nicholas, where his tomb became a celebrated monument. As Hans Mayer points out, "Rutebeuf lamented his death in his *Complainte du comte Eudes de Nevers* portraying him as the model crusader."[921] By great good fortune the executors' inventory and accounts survive, and they clearly lay out his assets in detail, indicating what a fully equipped artistocratic Crusader carried with him.[922] Written between 9 August and 7 October 1266 in the form of four parchment rolls of differing sizes, these extraordinary documents indicate what Count Eudes, a vassal of King Louis IX, possessed in Acre at his death; they indicate his debts and his bequests and gifts. They present in list form much of what was necessary and desirable, indeed what he required for the day-to-day practicalities of life, for the spiritual life of prayer and the liturgy, for information, and even for entertainment. The information in these documents forms an essential part of our knowledge of the cultural life in Acre in the later thirteenth century.[923]

The documents of Eudes de Nevers were first studied in 1871 and have been commented on briefly from time to time since, but they have had little extended attention paid to them since then.[924] According to Chazaud we can consider these texts as the report by the legal executors of the will of Eudes de Nevers. They consist of four rolls written in "roman du Nord," now preserved in the Archives Nationales in Paris.[925] Chazaud outlines theirs as follows:

The first roll (A) is entitled on its verso, "Ce sunt li escrit des choses le Comte de Neverz après son decès." The contents of the accounting is found on the recto as follows:

1. "L'état des sommes léguées par le comte de Nevers à ses gens, chevaliers, écuyers et garçons, et payées la veille de saint Laurent (9 August 1266), à chaque légataire par Hugues d'Augerant et Geoffroi de Sargignes fondé de pouvoir d'Érard de Valeri." This report deals with the statement of bequests made by the count to his men.
2. "Le compte des sommes payées, au nom de la succession, pour le loyer des maisons occupées par les gens du comte de Nevers, pour la solde des arbalétriers et Turcoples qu'il avait pris à son service, pour celle des chevaliers, pour le remboursement d'emprunts faits au Temple et à plusieurs personnages, enfin pour diverses dépenses, entre autres celles de l'embaumement du corps, et celles de la construction dans le cimetière de Saint-Nicolas d'Acre." This report deals with the statement of accounts payed for debts incurred, for loans received, for diverse expenses of the count and his men.
3. "La recepte des choses le conte de Neverz qu'il avoit au jor qu'il alla de vie à mort." This report deals with the accounting for the assets of the count.

The second roll (B) contains on the recto the statement of "mobilier" of the count on the day of his death. These include "bijoux and argenterie," "toile et les étoffes," "etoffes de toute sorte," "utensiles, les armures, testières à cheval," "utensiles de cuisine," "les chevaux de combat" and other animals, "provisions" including wine, grain, meat, and "les chose de la chapelle." On the verso there are listed persons and religious houses that received bequests from among the objects that were not sold.

The third roll (C) contains the records of the assessments of value for the garments of the count, followed by the nomenclature of the religious houses and hermits and what was given to them.

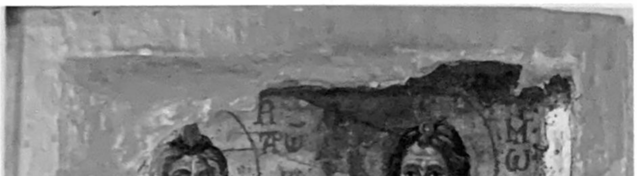
The fourth and final roll (D) contains the price of sale for each of the objects that was not bequeathed to anyone.

Chazaud remarks on the interest of these rolls for the mediaeval archeologist (p. 168), but he spends most of his time commenting on the historical names mentioned in these texts (pp. 168–73) and on the different types of financial terms used in the accounts (pp. 173–6). Our interest from an art historical perspective is mainly with regard to the objects inventoried, as found in the texts that M. Chazaud has transcribed and published in his study.[926]

On roll (A), in part 1, substantial monetary gifts are listed for six knights and chaplains, eight horsemen and nine sergeants, and thirty-three attendants, and servants, including one priest. These gifts range from a minimum of six bezants to the lowliest recipients to 120 bezants, or forty livres tournois, to each of four knights.[927]

In part 2, payments are listed for rents and expenses to be paid by men in the service of the count. The most notable payouts are 105 bezants to five crossbowmen for two months service and 117 bezants to four *turcopoles* apparently for service over an unspecified length of time. Among other payments made are very substantial sums for Erard de Valery, 831 and a half bezants, and to the Templars, 742 and 5/24 bezants, along with 40 bezants for the tomb of the count in the cemetery of St. Nicholas at Acre. The total of all these payments is listed as 8,860 and 19/24 bezants. These accounts are stated as having been paid on 15 September 1266 in the presence of the grand master and the treasurer of the Templars.[928] Other payments or financial transactions in livres tournois or silver marks are also listed which were paid by 29 September 1266.[929]

It is clear as the reports on transactions continue in part 3 that the four knights listed at first, along with Erard de Valery, Hughes d'Augerant, and Geoffrey de Sergines, are the principal figures in this report in terms of the value of money and objects they are reported as dealing with. Some of the objects are of great interest, such as "I chapel d'or à pierres et perles,"[930] worth eighty livres tournois, along with decorations and rugs for this chapel, which "demorèrent monsegnor Erart de Valeri."[931] Or there are what appear to be three manuscripts valued at thirty-one bezants, "li romanz des loheranz et li romanz de la terre d'outre mer, et li Chançoners."[932] These manuscripts appear more likely to have been brought from the West, although it is possible one or more could have been done in Acre. Most likely the chansonnier, and the *romanz des loheranz* – probably a work like *Garin le Loherain* – came from the West, but the *romanz de la terre d'outre mer*, which was almost certainly a copy of the *History of Outremer* by William of Tyre, might well have been a codex ordered by the count in Acre. We do not have examples of the texts of the chansonnier or the *romanz des loheranz* in actual manuscripts from Acre identified as yet, but the *History of Outremer* was without doubt the most popular work done in Acre in the second half of the thirteenth century. One wonders what kind of decoration each of these books may have received, but the text does not refer to them as being illustrated or decorated.



213. Icon: Sinai, App. no. 12/76, Panel with standing figures of Moses and Aaron. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Eudes is not the only aristocrat to have brought such literary works with him to the Holy Land. In 1271 when Edward of England came to Acre on Crusade, he apparently brought with him a manuscript containing the stories of King Arthur and the knights of the Round Table. Furthermore, as several scholars have pointed out, Rusticien of Pisa made a copy of this manuscript which he incorporated into his own work.[933]

On the second roll (B), the "mobilier" listed are extensive. In the first section there are many precious vessels and objects listed in the hands of various persons, from which I select the following examples:

a. [I.] viii boens éniaus (rings),
b. ii saffirs (precious stones),
c. i camahé (cameo),
c. xii petiz éniaus dou Pui,
d. ii croisetes d'or,
e. i viez corroie d'or pelles,
f. i chapel d'or à pierres et à pelles,
f. ii bacins d'argent à donner l'aigue,
g. i henap d'argent à pierres et à émaus,
h. i cope d'argent, d'orée, cuvesclée,
i. ii poz d'argent,
j. ii petis henas d'argent à donner dragiée,
k. i orfroi à perles,
l. iiii cuillers d'argent.[934]

Also listed are other luxury items such as "[VI.] toiles qui fu achetée à Troies" and "toile de la duchoise de Borgoingne."[935] There is luxury clothing and accessories of many kinds, and materials for making clothing, including quantities in bulk: "[VI.] xiiii pannes de gros vair, et une de menu vair, xiiiii dras de tartais; ii chameloz; iii boqueranz plains, et i ovré."[936] Under VII there is a whole assemblage of armor.[937] And at XIV we find, "Les choses de la Chapelle," apparently objects that belonged to the count's personal *cappella*.

a. le calice,
b. une croisète ou il a de la veraie croix,
c. le Saintuaire que li patriarches dona le conte,
d. le messe et le bréviaire,

e. une chasuble viez, et aube, et roichet
f. ii sorpeliz, et i amit,
g. i drap d'autel devant et darrière,
h. i boiste d'ivoire,
i. ii toalles à mains,
j. ii chainètes d'argent,
k. le corporal d'estui,
l. ii custodes parées.[938]

Along with these objects is another large set, all apparently new. This list is of great interest not only for its metalwork and precious objects, but also for the books mentioned here: a sanctorale, a missal, and a breviary.[939] Again there is no indication as to whether they were illustrated or decorated or where they came from, but it is most likely the count had brought them with him from Burgundy, probably from Nevers or Dijon.

There then follows the actual garments which belonged to the count at the time that he died. "Tote ceste robe viez... fu départie au povres hopitauz d'Acre, et au povres maisons de religions."[940] The list of hospitals and houses of religion that these objects were given to is written out in roll C, and indicated subsequently.

Under III, on the verso of roll B is a list of jewels and jewelry which belonged to the count. Geoffrey de Sergines, "li pères," was given a sapphire that the count wore hanging from his neck. His son, Geoffrey de Sergines, "li juennes," was given an emerald. Other notable gifts were to the following:

> Item messire Hug[ues] Augerant en porte l'enel que li dux avoit doné le conte, et l'enel qui deit estre as oirs de Neverz. Messire Erarz de Valeri a les ii croisetes d'or, et le petit vaisselet d'argent ou il a reliques que le patriarches aveit donées le conte.'

At the end of this section we are informed also that the chaplain was given the breviary, and that all the cooking utensils, except for two large pots that were donated, were sold to the Hospital of St. John.[941]

In the assessments of value on roll C, the items evaluated are surprisingly inexpensive. The total of these objects, mostly items of clothing, only comes to 206 bezants. The second list on this roll is however much more interesting because it lists the items from roll B which were given in the name of the count to the various religious institutions and hospitals of Acre.

These organizations, with locations indicated, include the following:[942]

1. Saint Michel [in the old city in the northwest corner along the sea],[943]
2. Li Jacobin [or the Dominicans, in the old city on the west side along the sea],[944]
3. Li Cordelier [or the Franciscans, in Montmusard just north of St. Anthony's along the east side],[945]
4. Saint Antoine [near St. Anthony's gate in Montmusard on the east side],[946]
5. Nostre Dame de Vamit (?)[possibly near the gate of Our Lady in the old city, east of the Hospital of St. John],[947]
6. Sainte Katerine [in Montmusard on St. Catherine's street, near the Carmelites],[948]
7. La Trinité [in Montmusard along the sea south of the Carmelites],[949]
8. Saint-Ladre [Lazarus] des Chevalers [St. Lazarus of the Knights was in Montmusard along the sea south of the gate of St. Lazarus],[950]
9. Saint Thomas [In Montmusard the hospital of Saint Thomas of Canterbury was in the northwest corner just south of the gate of St. Lazarus],[951]
10. ceus de Sas(?),[952]
11. ceus dou Carme [or the Carmelites, in Montmusard along the sea west of Bethlehem street],[953]
12. l'opital dou Saint-Esperit,[954]
13. Saint Elide,[955]
14. meselles de Bethléem,[956]
15. Saint-Barthélemi de Bereithe [Beirut?],[957]
16. Saint-Martin des Bretons,[958]
17. l'opital de Saint Denis,[959]
18. nonnains de la Magdalène,[960]
19. nonnains Nostre-Dame de Sur,[961]
20. ii hermites,
21. nonnains de Saint-Ladre [Lazarus] de Bétennie,[962]
22. Sainte-Anne,[963]
23. Saint Samuel,[964]
24. ceus de la Carpitre(?),[965]
25. Saint-Demitre,[966]
26. l'opital des Alemanz,[967]
27. une béguine, et à une autre béguine,
28. iiii povres,
29. l'opital de Saint Jehan."[968]

On the final roll D, most of the entries record the sale prices of objects which had belonged to the count. In the case of the most prominent men, the purchaser is also named, such as Erard de Valeri, Geoffrey de Sergines, "li pères," and Hugues d'Augerant. A certain "Hue de Mont-Cornet" is also mentioned, and later on in this list there is a whole section dealing with items sold to the Templars. There is also a brief report on money held in specie at the time of the count's death, that is, "deners monaez et en besanz au jor qu'il ala de vie à mort."[969] Finally, there is also a section listing those objects which were at the time of this accounting not yet sold. Clearly some of the most expensive items inventoried earlier were among these objects not yet sold. Conspicuous among them is "I chapel d'or à pierres, et à pelles."[970]

First, it can be said that the religious institutions in Acre must have been the beneficiaries of many wills, and these legacies provided useful support to each institution, in addition to their other revenues. The inventories and accounts indicate that the will of Eudes de Nevers was large, but there were other wills that may have been more modest in size and thereby more characteristic. In 1264 there is, for example, the will of a certain Saliba, an Oriental Christian linked with the Genoese,[971] who gave large bequests to the Church of St. Lawrence, where he wished to be buried. After that he divided up eighty-eight bezants into thirteen gifts to be given to various religious organizations.[972] Most are represented in the list of Eudes de Nevers, but a few are not. The religious institutions in Acre were numerous, which, as Hamilton points out, gave potential donors many options for diversified bequests. At the same time the many organizations diverted potential gifts from the bishop of Acre, and indeed the Cathedral Church of the Holy Cross is not mentioned either in the inventories of Eudes de Nevers or in Saliba's will.

OTHER MINOR ARTS IN THE CRUSADER STATES, 1244–1268

The remarkable – and the unremarkable – items in the inventories of Eudes de Nevers would have mostly come with him from France. But his holdings would have been paralleled by those of other aristocratic men of wealth to a greater or lesser extent, depending on their rank and stature and their financial means. For those long-term Frankish residents in the Latin East, even if they had some things from the West, most of their possessions would have come from the Levant, either made by Crusaders or other local artisans. We can therefore use the inventory of Eudes de Nevers to give us some idea of what a Frankish baron might have owned, transforming the items mutatis mutandis from Western to Eastern produced objects and works.

The inventories of Eudes de Nevers therefore provide us with an important index for works we might expect to find. Finding actual objects and works is quite difficult, however, for some types. As we approach the end of the Crusader States in 1291, there appear to be fewer Crusader objects that can be identified as datable new coins and seals, metalwork or glass and fine pottery from specifically Crusader artisans, and textiles from Crusader sources, from the period after 1244. This situation will no doubt be changed by the excavations currently underway in places like Acre and elsewhere. It will also be changed by the fact that more Crusader work will be recognized as produced in the thirteenth century when more study – historical, art historical, archaeological, economic, institutional, religious, literary – is focused on Crusader developments in the Holy Land during those years. For the present, we are unable to say much about developments in some of these various media because so little evidence can be adduced. Accordingly, I comment on what few examples we have in the "minor arts" as indications of what may become richer fields of study in the near future.

Coins and Seals: 1244–1268: In the previous period, 1225–44, we found comparatively few new coin types issued in the Latin Kingdom, in Tripoli, or in Antioch, and this situation continues in the years 1244–68. In the Latin Kingdom, as noted in the first section of this chapter, the major development was the change imposed on Crusader coinage by the papal legate, Eudes de Châteauroux, at the time of Louis IX's residency in the Latin Kingdom. In 1250 Eudes, objecting to the Crusader minting of coins with Muslim inscriptions, put a temporary stop to the production of Crusader imitations of bezants and dirhams.[973] From 1251 to 1258 a new type appeared intermittantly with purely Christian legends written in Arabic, including the inscribed notice, for example, "struck at Acre in the year 1251 of the incarnation of the Messiah" on the obverse[974] (Fig. 214). Eventually a handsome new bezant was also struck, the rare *Agnus Dei* bezant of uncertain date, which probably also appeared in the 1250s and certainly by *c.*1260[975] (Fig. 215). With its concentric design, it is clearly related to the French *gros tournois* issued by Louis IX in 1266. With its ringing acclamation, "*+Xpistvs: vincit Xpistvs: regnat+Xpistvs: imperat,*" it proclaims a strong Crusader presence, based on a Crusader battle cry, and the coronation acclamation of the kings of France.[976] But as Metcalf points out, "it is so scarce today that one must suspect that few were ever struck,"[977] and as Porteous comments, "the coin is not only anonymous, but also carries no indication of where it was minted, it is only because of the oriental provenance of the few surviving specimens that it can be attributed to the Latin states at all."[978]

We can, I submit, assume the coin was minted in the Crusader States *c.*1260, most probably in Acre; Tyre, although possible, is much less likely.[979] As a development in coinage design, this gold bezant demonstrates an intensification of Western presence and influence, which we also find in manuscript illumination and panel painting. In particular, it is striking that the Acre Triptych (Figs. 155–62, App. no. 66/753), which also dates *c.*1260, includes a possible reflection of this new coin. On the exterior right hand wing, we find the image of St. John the Baptist carrying as his attribute a golden disc with the *Agnus Dei* painted on it. It is clear that the iconography of the image of the lamb is slightly different on the two examples and that they do not demonstrate artistic dependence on each other. But it is also remarkable that they are so close, and that they were produced in the Latin Kingdom, most likely in Acre in close chronological proximity to each other. In fact they may both independently reflect the same circumstances and possibly a similar model.

Acre continued as the most active mint through the 1250s, and substantial numbers of gold coins were struck up to about 1260.[980] After this point there is a reduction in gold coins minted, but a full range of coin denominations are issued more or less continuously – coppers, billon deniers, silver and gold types – through this period. More Western coins are no doubt present, however, because of the residency of King Louis IX and the French Regiment in the Latin Kingdom and the vigorous commercial activities of the major Italian maritime cities.[981]

As for baronial issues in the Latin Kingdom, there seems to have been no substantial increase in the mid-thirteenth century, despite the warning of the weakening of royal rights by the *Livre au roi c.*1200, the absentee Hohenstaufen kings, and the new treatise on jurisprudence by 1266 written by John of Ibelin, the *Livre des assises.*[982] As a class the nobility had steadily improved its social and legal position, but the main baronial mints were only three: Beirut, Tyre, and Sidon. Their issues were remarkably conservative and featured architectural motifs of fortified towers or city gates, reminiscent of older Jerusalem types, as seen in the anonymous coppers from Beirut[983] (Fig. 216), the

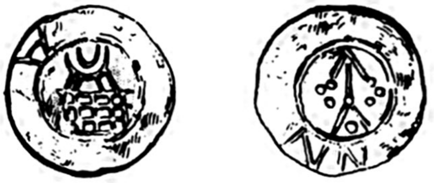
216. Beirut: copper coin. (photo: after Malloy et al., *Coins of the Crusader States*)



218. Sidon: *pougeoise.* (photo: after Malloy et al., *Coins of the Crusader States*)

pougeoise of Philip of Montfort at Tyre[984] (Fig. 217), and the anonymous *pougeoise* of Sidon[985] (Fig. 218). When we see variations on these types, they mostly also feature architectural motifs, such as the domed building on the billon deniers of Sidon[986] (Fig. 219) or the classical temple with four columns on the coppers of Tyre[987] (Fig. 220).

Elsewhere, at Antioch the familiar helmet deniers continue until the fall of the city in 1268 (Fig. 221). The commercial prosperity of Antioch was perhaps the greatest of any Crusader city outside the Latin Kingdom, ranking a distant second after the port of Acre, but making the lack of extant art and architecture there extremely puzzling. And in 1268 the treasury of the city was overflowing, so that after the Mamluk conquest, when the sultan ordered the distribution of booty, "coin was so plentiful that it was handed out in bowlfuls."[988] Meanwhile in Tripoli, Bohemond VI (1252–75) reinvigorated the mint. He had the silver gros and half gros struck, which are of excellent workmanship, among the most handsome of Crusader coins with their eight-pointed stars (Fig. 222). It is of interest that his gros is almost exactly the same weight as the gros tournois of Louis IX (Fig. 223), first issued in 1266.[989] This Tripolitan gros therefore appears to be related to several important coins in this decade; the *Agnus Dei* bezant in gold from an unknown Crusader mint, probably from Acre but possibly also from Tripoli; the French gros tournois of 1266; and the Venetian grosso, which by the 1240s had become widely circulated in the Mediterranean world.[990] No one has as yet been able to demonstrate conclusively to all concerned that the Tripolitan gros and the *Agnus Dei* bezant preceded the French gros tournois in date, but it seems likely that they did. Porteous has presented an interesting argument for the priority of the Tripolitan half gros, based on the Venetian grosso, as having been the stimulus for these other developments well before the gros tournois made its appearance in France. Grierson observed in 1954, "whether or not St. Louis inspired the striking of the coin [the *Agnus Dei* bezant], he is at least likely to have made its acquaintance before his departure from the Holy Land (April, 1254), and it may have influenced his own future coinage."[991]

In Crusader coinage, therefore, we see not only the maintenance of many immobilized types from earlier years, but also certain traditions continued, especially in terms of architectural designs, even when new coins are designed. The most dramatic changes occur with the coinage imitating Muslim issues, however, in which the message of the inscriptions is abruptly revised starting in 1251 to include only Christian admonitions. The appearance of the splendid *Agnus Dei* issue appears to be a truly creative attempt – however limited its production and circulation – to provide a Crusader gold coin of the first rank with Latin inscriptions and imagery to "compete," as it were, with comparable Muslim and Byzantine coins. It would not be surprising if these new Crusader coins eventually can be certified to have been the inspiration for the gros tournois of Louis IX, issued in 1266, at about the same time that he decided to take the Cross a second time.[992] This in itself would be a notable achievement apart from the other lively developments in Crusader coins in the Latin Kingdom at this time.

Crusader Seals: 1244–1268: In the years 1225 to 1244 we noticed two features. First, the seals of Frederick II were important, but they cease to have an impact with his death in 1250. Second, seals from the Crusader States were to some extent more conservative and less experimental in their imagery than we found on the coins, a somewhat surprising development and a reversal of what we would expect. Clearly the most important royal seals produced in the Latin Kingdom in the years 1244–68 were done for King Louis IX during his residency, 1250–4. Not only did he require a new royal seal matrix to be made after its loss during his retreat and capture on the Damietta Crusade,[993] but his vigorous diplomatic activity also necessitated its constant use. Louis's personal seal is a magnificent royal portrait of him enthroned frontally on the *sella curulis*[994] (Fig. 224), the same royal faldstool on which Saul is anointed in the third scene of the I Kings frontispiece of the Arsenal Bible. Louis appears in full regalia, with crown, royal robes, scepter topped with a fleur-de-lis, and holding a fleur-de-lis.[995] This image on the seal of the French king, when compared with the "royal portraits" in the frontispieces of the Arsenal Bible (CD nos. 63–5), makes the Eastern Crusader characteristics of these manuscript paintings more vividly and clearly understandable.

There are no other royal Crusader seals from this period to compare with those of Louis. Among other extant examples

we have nothing in this period from the barons of the Latin Kingdom,[996] but the seal of the commander of the French regiment, Geoffrey de Sergines, survives[997] (Fig. 225). On a letter from 1267, his seal is included along with several others. It contains the inscription, "S'. GAVRIDI. DE SERGINIS MILIT[is]," and his coat of arms. This is a significant example of a seal from an important commander in the Latin Kingdom, and it demonstrates that heraldic arms were now in widespread use.

Another important seal type that we can recognize as characteristic of the Crusaders survives from Beirut and Tripoli. The magnificent wax seal of John II Ibelin of Beirut survives on a document in the Archivio di Stato in Venice[998] (Fig. 226a). The image consists of a knight in full armor brandishing his sword and holding his triangular shaped shield. His right foot is thrust forward in its stirrup as his horse, fully caparisoned, rears with his front hooves at the right. His cross arms are emblazoned on his shield, tunic, and the cloth housing of the horse.[999] It is a stirring example of a Crusader in full array. From Tripoli the great seal in lead of Bohemond VI survives attached to a document of 1255 (Fig. 226b). The inscription on the obverse reads, "+B. PRINCEPS: ANTIOCH: ET COM: TPOL. FILY. B: PNCIPI: ET COMI."[1000] The image in the central medallion is a knight fully armed with lance and shield on a horse galloping right to left, with apparently some kind of banner billowing out from behind his head.[1001] On the reverse is found the standing images of his patron saints, Peter and Paul, much as we would expect to find them on Crusader icons, but here carrying their typical Western attributes of keys and sword, respectively. Peter also carries a cross staff, which is somewhat unusual.

One of the most interesting aspects of these seals is the emphasis it gives to the image of the mounted soldier as an important Crusader type, one which we have also found in the extant Crusader icons from the collection of St. Catherine's Monastery on Mount Sinai and one that is found widely in fresco paintings commissioned by Crusaders. We find this imagery in a variety of types, with galloping, rearing, trotting, and standing horses, and the directions they head can be either left to right or right to left. So far no clear interpretation can be given for the choices made from these possibilities as far as the seals are concerned.

Among other extant seals, we find no major new developments among those of the Hospitallers and the Templars.[1002] What is new, perhaps, is reflected in a valuable document in Old French, which describes the full range of seals used not only by the grand commanders East and West, but also by other important officers of the Hospitaller Order.[1003] There are also certain seals of the Teutonic Knights now extant for the first time, and it is interesting that those used by them feature the image of the enthroned or bust length Virgin and Child[1004] (Fig. 227). The Virgin Mary was the patroness of the Order and her image on seals is further testimony to the dramatic growth of her cult in the thirteenth century. The inscriptions on the two earliest wax seals are abbreviated differently, but they are essentially identical in content: "S. MAGRI. HOSPITAL SCE. MARIE TEUTONICORUM. IRLM." In the central medallion on these seals we find a frontal seated Virgin and Child on a carpentered throne. Both figures are nimbed. The Child blesses and sits on Mary's proper left side. The Virgin holds a staff topped by a fleur-de-lis as a kind of attribute on the later example.

Finally, among ecclesiastical seals, it is also the case that few survive for the leading prelates or any major clerics from this period. James Pantaleon, patriarch of Jerusalem before he became Pope Urban IV, had a great seal with a seated patriarch on the obverse, and the standard Resurrection on the reverse as we have seen from earlier patriarchs.[1005] William of Agen, patriarch from 1263, also used a seal with a handsome image of an enthroned patriarch, designated by his pallium and the patriarchal staff he holds and seated on the episcopal version of the *sella curulis* (Fig. 228a). William also uses a counter-seal, which is remarkable because it is similar to the Hospitaller images of the tomb of Christ, but this time with three figures inserted behind the *gisant* figure[1006] (Fig. 228b). The bishop of Acre, Florent, appointed in 1255, adopts an elongated format for his seal, "en navette," in which he appears standing frontally, in

224. Royal seal of King Louis IX. (photo: after Labarge, *St. Louis*)

full regalia, holding his crozier and blessing. The inscription reads: S' FLORENTII DEI GRATIA EPISCOPI ACCONENSIS.[1007]

Finally attention might be drawn at this point to a phenomenon that had been developing during the later twelfth and thirteenth centuries without much notice, namely, the establishment of convents in Acre for various types of religious women, for which seals came into existence. Some long-standing organizations, including several that relocated to Acre from Jerusalem after Saladin's conquest in 1187, had seals with architecture or bishops reflecting conventional twelfth-century Crusader imagery. But one of those, the nuns of St. Lazarus of Bethany, had introduced on their seals the image of their abbess in examples that go back to the mid-twelfth century.[1008] Some convents and churches for women, Western or Eastern, such as the church of Our Lady of Tyre or the Monastery of St. Margaret, apparently have no extant seals, but others did. Among the most interesting is of the nuns of St. Mary Magdalene – one of the institutions mentioned in the inventory of Eudes de Nevers – a house for reclaiming prostitutes, which has a profile kneeling figure of the nude St. Mary Magdalene holding her ointment jar on a seal configured, "en navette."[1009] Another example is the seal of the Hospital Order of St. Lazarus (Fig. 229). On the obverse of its seal we find what Schlumberger identified as a leper with his noisemaker, but this "leper" might well be a frontal bust-length female figure, who represents Mary or Martha, a sister of Lazarus, in effect as a nurse.[1010] Although of course there are a number of Crusader seals that represent the Virgin and Child as part of their imagery, the growth of an iconography of women on these seals is an interesting and important development that apparently gains momentum in this period.

225. Seal of Geoffrey of Sergines. (photo: after Schlumberger, *Sigillographie*)

There appear to be fewer extant ecclesiastical seals from this period than there are secular examples, which must be an accident of survival in a time of vigorous church activity. Overall, however, the seals appear mostly conservative in design in what was a turbulent period of vigorous military, political, and economic developments and rapid change. Whereas we can see aspects of Western influence in a number of these seals, in the main such influence appears to be related mostly to French sources. This development is certainly a part of what we find with the pictorial developments in manuscript illumination, icons, and coins. What is not equally evident in the seals – or coins – is the strong and growing Italian influence we find in the icons, despite the fact that a number of the clerics in the Holy Land came directly from Italy, and the fact that the War of St. Sabas was an all-consuming struggle between 1256 and 1258. No doubt if more seals can be identified from those ecclesiastics connected directly to Italy, we will be able to evaluate the dynamics of East–West interchange more fully.

Metalwork and Other Minor Arts: The Problem of Multicultural Artisanal Production in the Second Half of the Thirteenth Century in Syria-Palestine: In metalwork Syrian-Crusader or "Syro-Frankish" vessels, secular objects, form the most intriguing works from this period, works that remain mysterious in origin but constitute part of a Near Eastern continuum that stretches from the second third of the thirteenth century into the fourteenth century. By contrast, there seem to be few explicitly religious objects in metalwork, such as the reliquaries and pilgrim's ampullae evident in the twelfth century that can be dated to these years, 1244–68.[1011] A certain number of relics of the True Cross can be documented in the West, but none of them can be directly related to reliquaries for which the metalwork, the enamels, or the ivory carving can be shown to have been done in the Crusader East.[1012] But in fact it is not only the secular metal vessels but also secular glass and fine pottery that emerge as major new luxury commodities in the Levantine marketplace. The issue that has been raised about these works is precisely what they are, that is, are they Crusader? Are they Islamic? Are they Levantine? To what extent do they reflect local traditions of Christian and Muslim imagery, style, technique, and function?[1013]

To this point in our discussion we have been looking mostly at artistic work produced in what might be called Crusader-controlled media, that is, religious and secular figural painting in manuscripts, religious figural painting in icons, religious and military architecture, coins and seals, and certain types of metalwork. In these media the Crusader control could have been exercised by the patrons and the artists together or separately for the special needs and functions the work of art was commissioned and produced, bought, or given to serve. We have seen how the Crusader works of art and architecture can be multicultural in their conception and production, how they synthesize East and West, and how they reflect the specific Crusader circumstances in the Near East. Compared with these works, the luxury commodities of fine secular metalwork and enameled or colored glass, as well as some textiles and especially silk, along with the often more modest productions of glazed pottery, belong in effect to a different category of art work.

These various so-called minor arts are works that raise special issues of style and artistic identity in terms of the

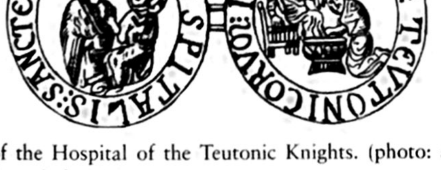
226. Seals of a. John II Ibelin of Beirut and b. Bohemond VI. (photo: after Paoli, *Codice Diplomatico*)

background and ethnicity of the artisan in ways that are often distinct from the other Crusader media. Whereas they, too, can be studied for their technique and certain technical issues, for their iconography, for their inscriptions, for their typology, and for their function, mostly these minor arts have not yet successfully been convincingly localized. Their artistic production is not yet fully understood in terms of the dynamics of artisan, patron, and marketplace. The difficulties of studying these media reside partly in the fact that, except for some of the pottery, they represent artisanal traditions native to the Near East that existed in some cases even before the Crusaders arrived. These were traditions the Crusaders admired and apparently emulated in some cases but that continued in non-Crusader centers even after the Crusaders established their own metalwork, glass, pottery, and textile industries. Compounding the problems of studying these works is their portability, often their total lack of documentation, and the special functions they served. They could be objects of status, which meant they were of high quality and prized as possessions. They could be luxury gifts, diplomatic or otherwise, which meant they often crossed cultural borders. They could even be souvenirs, which meant that they were sometimes acquired by Crusaders, resident Franks, or pilgrims for the explicit purpose of evoking the special place or the unique quality of design that characterized them as "other," valuable, unusual and sophisticated, fascinating and appealing, and even exotic.[1014]

Because of the special problems this category of works present, no attempt will be made here to identify "Crusader" objects. It is not clear that any such Crusader works necessarily existed in these media in the terms with which we have identified Crusader art earlier in the chapter. But it is likely that Crusaders – among others – patronized and owned these objects of "minor arts," based on their provenance and the circumstances of where they are found today, mostly in European or North American collections. In many cases these objects raise similar questions, by displaying recognizeably Christian religious or culturally Frankish themes or subject matter on works that appear to be Muslim in technique, typology, and function as well as in decorative style. We have examples in metalwork of this period such as the famous Paris candlestick (1248–9), the Freer canteen (*c.*1245–50), and the Freer basin (*c.*1240–50).[1015] We have examples in enameled glass such as the Walters Museum beakers (*c.*1260), the Aldrevandini beaker in the British Museum (*c.*1260–90), and the Montfort beaker (mid-thirteenth century).[1016] For the record, we can also mention three examples of proto-maiolica pottery found at Acre and dated to the thirteenth century, such as a bowl with a standing woman holding a distaff,[1017] a bowl fragment with a stylishly dressed soldier on foot holding a shield and a sword,[1018] and a bowl fragment with a standing woman holding a flower.[1019] These works differ in regard to cost and quality, but they all belong to a class of secular objects decorated for special use at some level.

The glazed proto-maiolica pottery all comes from abroad, from the West, probably from Italy. There is a great deal of it in Acre, probably as the result of Italian merchant activity there. And the choice of figural decoration accords with the Crusader clientele for whom these bowls apparently were made.[1020] Similarly with the "Syro-Frankish" metalwork and enameled glass, the objects all seem to have been made outside the Crusader States, brought there and bought there by Crusaders, Frankish residents, or Western pilgrims.

To become acquainted with the issues involved with the works in these media, I propose to discuss selected examples of the mid-thirteenth-century glass, the beakers from the Walters Art Museum, as a case in point. (Figs. 230–3). In this way



227. Seal of the Hospital of the Teutonic Knights. (photo: after Paoli, *Codice Diplomatico*)

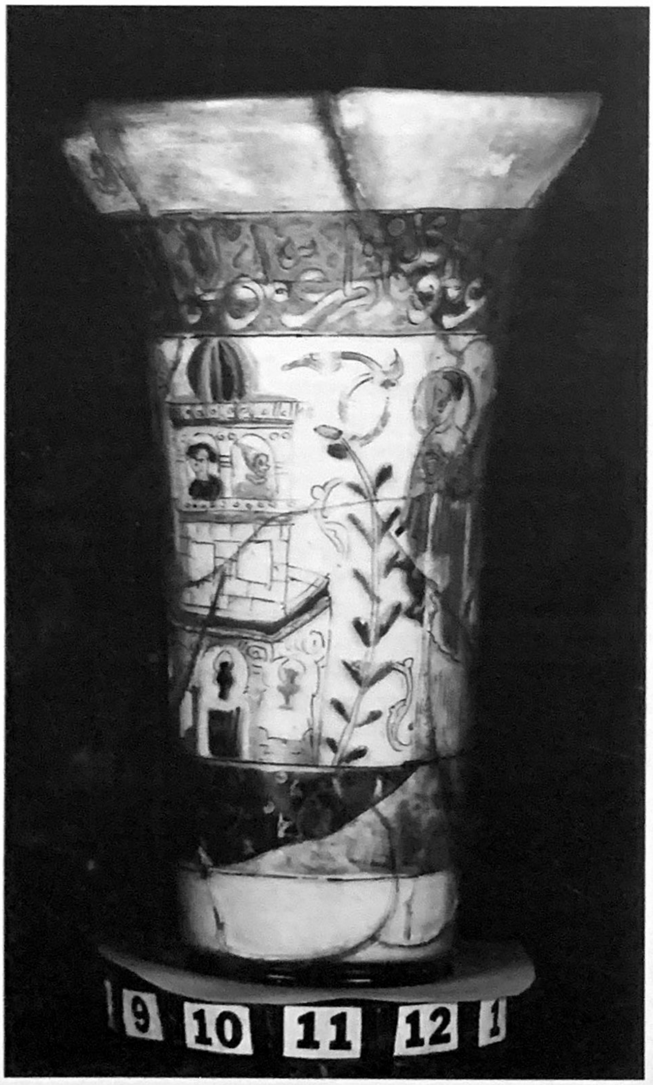
we can introduce the objects and the problems they raise, on the basis of which current and future research will discuss and decide the issues outlined.

These glass beakers with enameled decoration in Baltimore are examples of a major form of Islamic luxury glass production.[1021] They were probably originally made in Aleppo as a pair. Broken at a later time, they were then mended and sold in Baghdad in 1912, at which time they entered the G. Dattari Collection in Cairo. Henry Walters acquired them in 1925 as a pair. Their shapes are nearly identical in form, one being slightly larger in diameter and very slightly taller than the other. Both have a short foot-ring, a cylindrical but slightly tapering body, and a gently flaring rim. The figural decoration on both is set between two zones, both of which apparently originally contained inscriptions. In both cases it is only in the upper zone that the Arabic inscription survives.[1022] The inscription on the larger beaker reads (Walters Art Museum, inv. 47.17):

> Glory to our Lord the Sultan, the Royal, the Diligent, the Wise, the Defender, the Protector of Frontiers, the Fortified by God, the Triumphant.



230. Large Glass Beaker, Walters Art Museum, Inv. 47.17: view (photo by courtesy of the Walters Art Museum, Baltimore)

On the smaller beaker the inscription reads (Walters Art Museum, inv. 47.18):

> Glory to our Lord, the Sultan, the Royal.

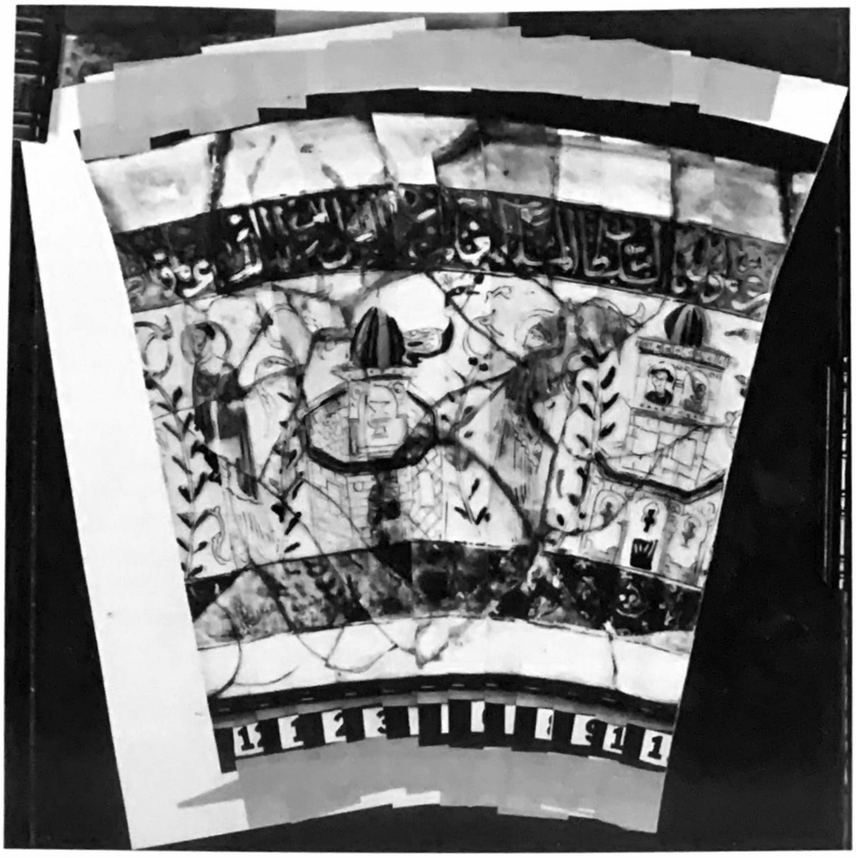
In neither case is the sultan named, nor is there anything specific in the text that would allow us to identify who is referred to.

The glass vessels are both approximately seven inches high (about 19 cm), gilded and decorated with green, yellow, blue, and white enamel. Their decoration features large haloed and small non-haloed figures; each has two domed masonry buildings, large green flowering plants, with a bird on one and a donkey on the other. On the smaller beaker, there is a haloed figure riding a donkey to the left heading toward two towerlike buildings. The first is probably meant to represent the Tower of David with a haloed figure standing next to it; the second is possibly meant to represent a gate to the city with a small figure, possibly a child on the roof of the first story. Both Georgopoulou and Carswell identify this scene as the Entry of Christ into Jerusalem, but they differ on the extent to which the buildings can be identified within the Holy City.

On the larger beaker, we find, not a scene from the life of Christ, but an image of the two main Christian buildings in Jerusalem during the Crusader period. The larger centralized structure with the three hanging lamps and the dome is the Anastasis rotunda of the Holy Sepulcher. The smaller structure with the octagonal lower story, the single lamp and the dome is the Templum Domini, the Muslim Dome of the Rock, which the Crusaders transformed into a church. Both Georgopoulou and Carswell more or less agree on these identifications, but the former offers a much more detailed art historical discussion of the buildings and each element of the decoration.

Based on these analyses and identifications, what interpretation can we give to these beakers? In function, if they are really beakers for wine, they are clearly not made for a Muslim clientele. If, however, they are beakers for other liquids, possibly for some kind of quasi-ceremonial domestic use, they could be used by Muslims as well as Christians. Kenesson suggests that there is a wide range of possible functions for these beakers. "They are often depicted in other media being used as drinking vessels.[1023] In addition to being simple drinking vessels some could have been intended for ceremonial use, others as gifts or awards, some for export and sale on an open market; it has even been suggested that some were used for lamps." The question of their function is unresolved with regard to the Walters Museum beakers, and in fact not much discussed, but it is an important issue with all of these objects, whether they be glass, metalwork, or pottery.

Given the fact that we find scenes of Jerusalem on these beakers, where would they be sold – in the city of their



231. Large Glass Beaker, Walters Art Museum, Inv. 47.17: panoramic view (photo by courtesy of the Walters Art Museum, Baltimore)

origin, that is, Aleppo, or in Jerusalem itself? Or would they be ordered from Aleppo by someone who was going to or had been to Jerusalem? The question of market dynamics in historical context is important here as well. It is especially relevant in this case because in 1260 when these two beakers were apparently done, Jerusalem was in Muslim hands, but Syria was being invaded by the Mongols. Recall that Aleppo was held by an Ayyubid prince in 1259, captured by the Mongols in January 1260, recaptured by the Mamluks in August of 1260 after the battle of Ain Jalud, and then retaken by the Mongols in November 1261.[1024] What impact would this activity have had on the glass industry in Aleppo, and in Damascus as well, in a particularly difficult time?

Who would buy these beakers – what was the targeted clientele? Would they be Christians going to or from Jerusalem?[1025] If so, what kind of Christians might they be? Would they be Western pilgrims or local Orthodox pilgrims – either Arabs, Syrians, or Greeks – or others, possibly Copts, Maronites, or Armenians? There are no explicit Christian religious symbols on these beakers, no crosses, no Latin or Greek or Syriac captions. In fact the inscriptions we do find are in Arabic and refer to the sultan,[1026] whoever that was. Could these pilgrims have been Muslims? Jerusalem is the third holiest site in Islam after Mecca and Medina. Jesus is revered as a prophet by the Muslims. The image of the Entry into Jerusalem by Jesus is possibly "a neat metaphor for the pilgrim's own spiritual journey,"[1027] whoever that pilgrim might have been. Or were they pilgrims at all? Could the patron or purchaser have been a Christian resident of Aleppo, Damascus, or some other Muslim city? Could they have been Christian residents of one of the Crusader cities on the Mediterranean coast? The issues of market dynamics and clientele as related to function are crucial to discuss and attempt to resolve in regard to these objects.

The style and technique of these beakers, as well as their typology, is accepted by most scholars as evidence of their Muslim manufacture.[1028]

The same is true of the inlaid metalwork. Further material from archaeological study and continued technical analysis will no doubt shed further light on how and where these objects, be they enameled glass beakers, silver inlaid bronzes, or proto-maiolica pottery, were made, what functions they served, who their patrons and owners were. Objects of these types which have made their way to Western collections must be studied in comparison with similar objects that have stayed in the East to attempt to neutralize the "Orientalist" aura that surrounds the reception and perception of works that currently reside in Western museums.

In sum, the "minor arts" present us with many important questions that are undergoing reconsideration and further discussion, that are very much under current discussion and on which we can expect much light to fall in future years. We can therefore conclude our discussion of these "minor arts" by observing that, in the words of Carole Hillenbrand, "compelling evidence survives to indicate that the Crusader knightly and mercantile classes acquired a taste for the luxury goods of the Near East. Indeed, the interiors of their houses must have been sumptuous, judging by the precious enamel-painted glass beakers and glazed pottery fragments excavated at Crusader sites." These objects, along with the inlaid metalwork, "were probably prized for their 'exotic' value in much the same way as Oriental carpets are treasured today by their Western owners. The more exotic the artefact the better, since quite apart from their obvious Christian allusions these works pandered to the medieval Western taste for marvels of the East. It is well known that the Arabic script appeared on many medieval European works of art often without any knowledge on the part of its users that it enshrined Islamic political messages." Hillenbrand concludes, "the Crusaders were well ensconced in the Levant in a period [including the years 1244–1268] in which... they came to form part of the political fabric of Near Eastern life. There is clear evidence that the Crusaders shared Muslim artistic tastes and that Muslim craftsmen tailored their artefacts to please a Crusader clientele."[1029]

Textiles: Although almost nothing survives that can be attributed directly to this period, 1244–68, we should not forget that commerce in textiles and silk was vigorous through Crusader ports during the entire thirteenth century up to 1291. This included massive imports of Western cloth as well as exports of Eastern luxury stuffs. Obviously it is the Eastern work that interests us here. As Hillenbrand has observed, "lasting evidence of trading links between the Muslim world and Europe [as well as the Crusader East] is found in the words of Arabic (or Persian) origin which have become embedded in European languages; financial terms such as cheque, tariff, douane, and the names of textiles such as damask, fustian, taffeta, cashmere, samite, organdy, and muslin. The profusion of these names is a clear enough indication of the key importance of the textile trade."[1030]

It was especially silk that formed the main focus of one trading and production industry, in which Crusader merchants and ports were heavily involved. "The thirteenth century represented in many respects the heyday of the Mediterranean trading network, when expectations were still high, the return on voyages significant... The products of the Near East – silks and spices, purchased on the voyages east – were redistributed in the western Mediterranean."[1031] It is the silk trade in the Crusader period that has come under the recent scrutiny of David Jacoby. He is in the process of releasing a veritable torrent of studies that will collectively reshape our understanding of this important aspect of Crusader economic activity and artistic involvement in the Latin East, including both the Crusader States of Syria-Palestine and the Latin Empire and Frankish Greece.[1032]

Conclusions – Artistic Developments in the Crusader States: 1244–1268: There are certain considerations to bear in mind when thinking of this period and the artistic material associated with it. We have chosen the date of 1268, rather than 1275 or some other proximate date, as a signifier of major change in the Latin East of Syria-Palestine because of the momentous historical events in the 1260s leading up to 1268, in relation to the Crusaders, the Mongols, and the Mamluks, and especially the rise of Mamluk power from 1260 on, culminating in the fall of Antioch. We cannot demonstrate that Crusader artistic production paused or is marked by new characteristics as a result of the events of 1268. In fact the artistic output and developments seem relatively continuous from the 1260s into the 1270s. But we prefer this framework to the abstractly assigned idea of "the third quarter of the thirteenth century" for historical reasons. For Acre, the Latin Kingdom, and the Crusader States in Syria-Palestine, we propose that the important time frame was 1244 to 1268, and artistically we have argued that the important time frame was from 1250 to the 1260s, before 1268. Without doubt 1250 was the pivotal date, when Louis IX arrived at Acre and immediately after deciding to stay in the Latin Kingdom for an extended visit, he began to stimulate new artistic work.

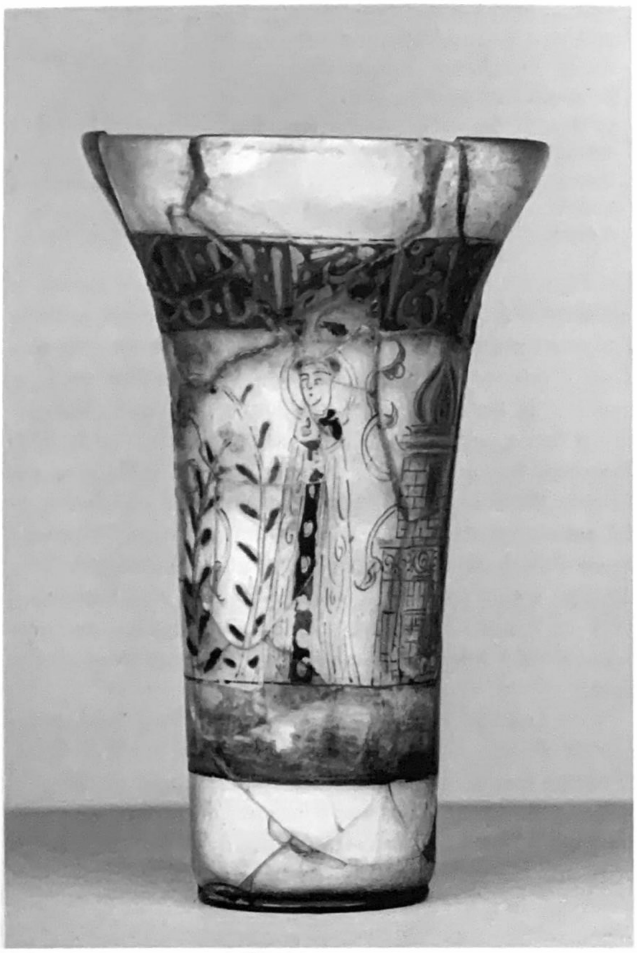
This period, 1244–68, certainly included some of the most momentous and important military and political developments of the thirteenth century in the Near East. The conquest of Baghdad by the Mongols in 1258 was seen by Eastern Christians as the fall of the Second Babylon. With this decisive stroke the Abbasid caliphate was finally eliminated.[1033] Then the battle of 'Ain Jalud in September 1260 ended the Mongol dream of world conquest, and the current fantasy of Christianity becoming the dominant world religion. It proclaimed the new Mamluk dynasty as the prevailing force. Finally, on 25 July 1261, Michael Palaeologus entered Constantinople with his troops and restored the Byzantine Empire to its capital city. The ill-fated Latin Empire was dead,[1034] and the Latin front line against Islam was once again established in and focused on Syria-Palestine.

With this in mind we can observe the following major artistic developments. Along with the massive architectural projects worked on during this period, the identification of the icons along with related manuscript illustration constitutes the major body of extant material for the study of Crusader artistic development in these years.

In architecture, it is unlikely that any other period saw as much building going on as we find between 1244 and 1258, but as we have seen little of it remains to be identified and studied. What does remain is important, however, because it shows us how the Gothic style in architecture was developing in the Holy Land, and how fortifications and defensive strategy were developing and changing.

In painting, as we have seen, there are a large number of important aspects that characterize this period, especially after 1250. First, there is the reestablishment of painting as a major component of Crusader art in the Latin Kingdom, especially in the capital city of Acre in the 1250s. This body of painting is significant for several reasons, even though it is difficult to date many of the icons with any precision. The revival of painting is accomplished at Acre in conjunction with vigorous activity in certain other locations, especially in the Monastery of St. Catherine's on Mount Sinai and in the capital city of the Latin Empire, Constantinople.

Second, taken together, the Crusader art of this period, the 1250s and 1260s, exhibits the greatest multicultural diversity seen in Acre in the thirteenth century, and part of this phenomenon must be the result of many different patrons on the one hand, and on the other, a richly diverse group of artists working not only in Acre but also in St. Catherine's Monastery. It is perhaps this multicultural diversity that stimulates the new interest in the "realia" of the visual world, what is called "Gothic realism" in France, and what might be called "Crusader realism" here in the Crusader States. We see this reflected in various media, in manuscript illumination, icons,



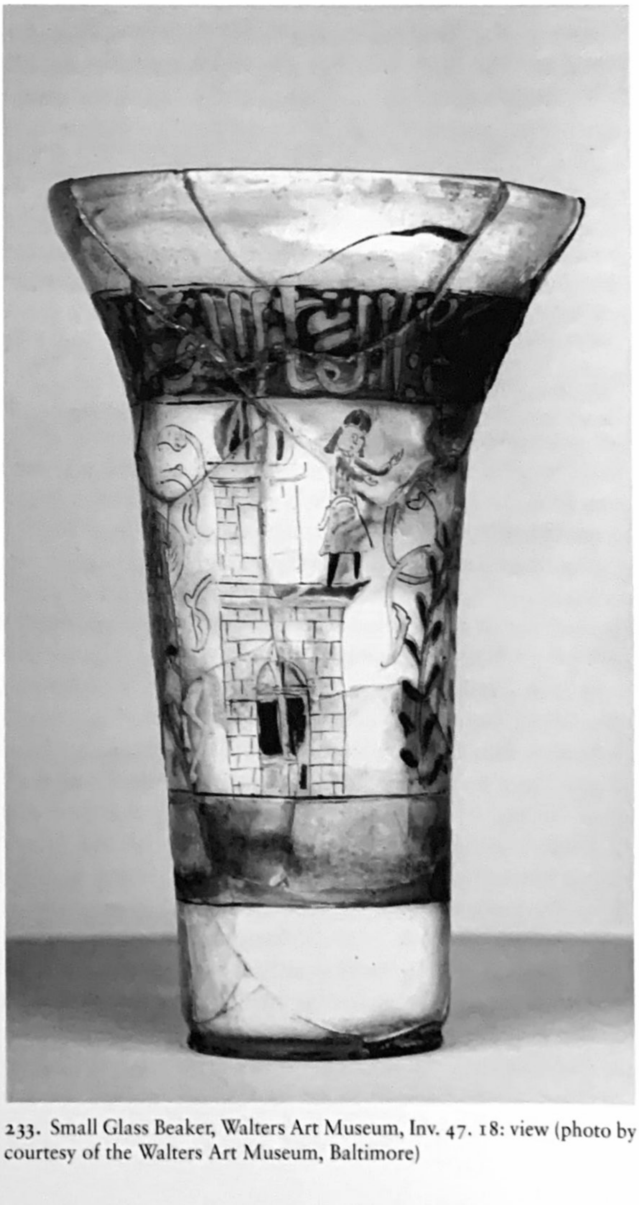
232. Small Glass Beaker, Walters Art Museum, Inv. 47. 18: view (photo by courtesy of the Walters Art Museum, Baltimore)

coins, seals, and even painted glasswork. We also see this interest all around the Crusader States, not only in Acre, but also in the other major centers such as Tyre, Tripoli, Antioch, and outside the Crusader States at the Monastery of St. Catherine's on Mount Sinai.

Third, there are major innovations that appear in this period. There is the rebirth and broad expansion of the book industry to include illustrated secular as well as religious books, starting in the 1250s and continuing in the 1260s. There is the sudden expansion of the making of icons for Crusader and Eastern Christian patrons by Crusader artists starting in the 1250s, which produced many types of panels serving a variety of functions. There is the evidence of major developments in Crusader style that strongly reflects both French and Italian traditions, especially Venetian prominence, in Acre during this time especially after the War of St. Sabas. Furthermore, we see how the important Franco-Byzantine and the Veneto-Byzantine Crusader stylistic traditions are distinctively established in Acre, and possibly also at St. Catherine's Monastery on Mount Sinai by about 1260, and how in the 1260s they begin to interact more and more with each other.

It is striking how important the painting for Crusader patrons or by Crusader artists is during 1250–60s. It is also significant that a number of patrons are depicted on the icons, and what diversity we see in who they seem to be. It is remarkable that in contrast to other media, such as metalwork, textiles, or sculpture, painting provides us with the best surviving examples. One feature about the icons that we notice in comparison with the entries in the inventory of Eudes de Nevers and the will of the Genoese, Saliba, is that virtually none of the "Crusader" panel paintings seem to relate to the religious institutions mentioned in those documents, with one or two possible exceptions.[1035] This places in much greater relief, the fact that many of the icons are oriented to the Monastery of St. Catherine's on Mount Sinai, that these icons seem to be painted for a clientele of pilgrims and visitors with an interest in Sinai, and with images that reside strongly in the Byzantine tradition whatever their Western-influenced interpretations may be. Furthermore, these icons and their patrons and clientele, by giving further indication of this linkage to Sinai, add to the weight of evidence that indicates a strong connection between Crusader painting done in Acre and whatever Crusader painting may have been done in Sinai.

These developments are hardly unexpected in the case of the Franco-Byzantine style, in view of the importance of the French regiment's presence in Acre as established by King Louis IX before he left the Latin Kingdom. But it is perhaps more



233. Small Glass Beaker, Walters Art Museum, Inv. 47. 18: view (photo by courtesy of the Walters Art Museum, Baltimore)

remarkable with regard to the latter to find that in Acre in the period of the decade from *c.*1258 to *c.*1268, Venice inspires such rich and flourishing painting developments in Acre – the various manifestations of the Veneto-Byzantine Crusader style. It is all the more remarkable at a time when, relatively speaking, so little painting is known in Venice itself, and when, comparatively speaking, Tuscan painting is flourishing in the West, but minimally reflected in the workshops of Acre.

These developments also pose the question of what artistic achievements one can identify in the Latin Empire before its fall in 1261. To what extent might Crusader artists working in a Veneto-Byzantine or Franco-Byzantine style in Constantinople have had, first, a strong impact on art in the Crusader States to the East, and second, might they have even transferred their activity to Acre after July 1261? We have so far not recognized this to be an important feature of Crusader art in the Latin Kingdom in the 1260s, but it is a question on which future research may shed much new light.

In conclusion, however, we may say that Louis IX had the most important positive impact on Crusader art in the period 1244 to 1268 with the greatest influence on its growth and development. With regard to the activities of Louis IX in the Latin Kingdom and the importance of his presence in the Levant between 1248 and 1254, we might therefore paraphrase the famous passage from Joinville's *Vie*, which forms the preface to this chapter, as follows:

> Well may the Crusader residents of the Latin Kingdom, and with piety, mourn the departure of this holy Prince, who held the Kingdom of Jerusalem with such devotion, righteousness, and loyalty, and who did in it such great and generous deeds of alms and gave it such good service and beneficial administration. Just as the scribe, when he has written his book, paints it with azure and illuminates it with gold, so did the king, after stabilizing the military forces and opening negotiations to repatriate the Crusader prisoners held in Egypt, enhance and reinvigorate the Latin Kingdom by his substantial interests in architectural projects and the visual arts. He not only strengthened the kingdom with the finest fortifications at Acre, Caesarea, Jaffa, and Sidon, and with establishments for the Franciscans, Dominicans, and other orders, but also he stimulated painting activity: with personal commissions of manuscripts made possible and enriched from artistic resources made available through loans from his own holdings, thereby reestablishing the major scriptoria at St. Jean d'Acre, and with panel paintings, which he used for his personal devotions.

The vigorous activity that followed his departure cannot be too surprising in view of the stimulus he provided while he was resident in the Latin Kingdom. What is more surprising is the diversity of the work that followed, both in terms of style and of types of books and panels produced. What we find is that a truly Crusader art existed, which was strongly stimulated by the patronage and the activity of the king and his men. While he greatly contributed to it and enriched it, he did not change the basic features of its character. Despite his strong French Gothic aesthetic taste, a rich and diverse Crusader art with a remarkable variety of artists who based their work on Byzantine, French, and Italian traditions, and even began to show interest in Islamic work, emerged from 1250 to 1268.

"King Louis of France never forgot the Holy Land. Every year he sent a sum of money to maintain the small company of troops that he had left behind at Acre under Geoffrey of Sargines; and the practice was continued even after Geoffrey's death and his own. He always hoped one day to set out again on a Crusade, but the needs of his own country gave him no respite. It was only in 1267, when he was weary and ill, that he felt able to prepare for his second Crusade and began slowly making the necessary arrangements and collecting the necessary money. In 1270 he was ready to embark for Palestine."[1036] As a result of the loss of Antioch in 1268, and in the face of the continuing threat from Baybars, those in the Latin Kingdom hoped for Louis's return. What impact would he have the second time?

7

ACRE AND THE ART OF THE CRUSADERS: THE FINAL YEARS, 1268–1289

THE FINAL CRUSADES AND THE MAMLUK ASSAULT ON THE LATIN KINGDOM TO THE FALL OF TRIPOLI

Shortly after the fall of Antioch in May 1268, Baybars sent an emir, Kamal al-Din, and his biographer, Ibn ʿAbd al-Zahir, to Acre to conclude a treaty initiated by King Hugh III of Cyprus, regent for the absentee king of Jerusalem, Conradin. Hugh balked at certain provisions, however, not wishing to be bound by the treaty if a new Crusade were to materialize, not wishing to include the kingdom of Cyprus for which he sought a separate agreement, and not wishing to include the territories of the Assassins who still operated independent of the Mamluks. As a result the negotiations failed and the envoys departed. Only Bohemond, count of Tripoli, despite his anger at receiving the "victory letter" from the Mamluk sultan (quoted in Chapter 6), after seeing what Baybars had done to Antioch and fearing what he could also do to Tripoli, concluded a truce separately. Meanwhile Baybars returned in triumph to Cairo on 22 August where emissaries from the Byzantine emperor and from Charles of Anjou sought maintenance of good relations.[1]

In the ensuing months Baybars focused on the training of his army for future campaigns, and sought to prepare for his upcoming *hajj* to Mecca and Medina. When he was reasonably assured that no Crusade was headed for Syria-Palestine or Egypt in 1269, and the Mongols were unlikely to invade for the time being, he proceeded with his plans. After making yet another separate truce with the Crusaders, in this case with a noble lady, Isabel of Beirut, Baybars made his pilgrimage to the Muslim holy places in the summer of 1269.[2]

While Baybars was able to perform his pious visit to Mecca, something no Crusader ruler had been able or chosen to attempt *mutatis mutandis* to Jerusalem for many years, the Franks were endeavoring to regroup in a fitful way. Following the death of Conradin in October 1268, which ended Hohenstaufen claims on the crown of Jerusalem, the *Haute Cour* accepted Hugh III as the new ruler. However, immediately the rights of Hugh III to be sole heir were contested by Maria, daughter of Bohemond IV of Antioch and Melisende of Lusignan. As we have seen in Chapter 6, despite the legal merits of Maria's case, Hugh III had the advantage of his de facto position and of the military resources from Cyprus he commanded to aid the Latin Kingdom in the face of the threat of Baybars.[3] Eventually he was duly crowned king of Jerusalem in the cathedral at Tyre in September 1269.[4] Maria, of course, did not give up and even took her case to the pope, who befriended her. So when the question refused to die and was eventually even put before the Council of Lyon in 1274, the ruling was made that the High Court of Jerusalem alone had jurisdiction. After nearly six years, the squabbling over that case would cease, but her rights were *still* not resolved and would only be settled later. Nor would Hugh's attempts to unify the various factions inside the kingdom be successfully resolved either.[5]

The basic problem was one of political fragmentation, because the Latin Kingdom had gone for so long without a resident monarch. There had not in fact been a resident king since John of Brienne in the 1220s, and we can recall the difficulties that King Louis IX faced on this account during his residency. In any case Hugh III started off well by staging his coronation in Tyre and reconciling the Ibelins and the Montforts through two astutely arranged political marriages. However, the king had much greater difficulty dealing with the military orders and the Italian merchants. The Hospitallers, who had consistently been loyal to the monarchy, nonetheless continued to conduct their own foreign policy, entering into truces on their own, as they had done in 1267 and would again be forced to do in 1271.[6] The Templars meanwhile supported Maria's claims to the crown, and they and the Teutonic Knights disliked Hugh's efforts to bury the hatchet with Philip of Montfort. Although Philip died shortly thereafter in 1270 at the hands of the Assassins, the "damage" had been done – Hugh had shown his intentions.[7] Meanwhile, the Venetians and Genoese continued their hostilities and refused to allow the new king to intrude on their dispute. So, at a time of great peril, when the new king was attempting to retake the reigns of government, few in the Crusader States were willing or able to suppress the quest for

their individual rights and/or ambitions in favor of supporting the larger cause, of which almost everyone seems to have lost sight.

Overseas, the situation was no better for the Latin Kingdom. In November 1268, the pope, Clement IV, had died shortly after the fall of Antioch. His strong interests – "Crusades" against the Hohenstaufens and attempted church reunion with the Orthodox – had already diverted attention away from the Holy Land. Now, with the death of Conradin as well, the papacy faced several major challenges, but remained powerless to deal with them directly due to a three-year interregnum, until Tebaldo Visconti was elected as the new pope, Gregory X, on 1 September 1271. This also enabled Charles of Anjou the freedom to pursue his designs. Politically and personally hostile to King Hugh III, but on friendly terms with Baybars, Charles sought to organize an attack on the Byzantine Empire. But first he would have to defer to his brother's second attempt at a Crusade to the East.[8]

THE CRUSADE EXPEDITIONS OF 1269, 1270, AND 1271

Seen from the Levant and in the eyes of the new king, Hugh III, the great hope for the Latin Kingdom on the horizon was a new Crusade, called by Pope Clement IV, but mainly the project of King Louis IX.[9] In March 1267 he and his three sons had taken the Cross. The Noailles Continuation of the *History of Outremer* somewhat overly optimistically reports that Louis, king of France, and many other counts and barons of France and England and Germany took the Cross to aid the Holy Land.[10] However, even if there was more popular support in France than is sometimes supposed, Jean de Joinville, Louis IX's faithful friend and biographer, refused to go. He reported having had a dream that foretold "the Crusade will be of little profit." Joinville even forthrightly states he "considered that all those who had advised the king to go on this expedition committed mortal sin" because, on the one hand, everyone had seen how the state of the kingdom had worsened since he had been away, and because, on the other, "he was physically so weak that he could neither bear to be drawn in a coach, nor to ride."[11] However, Louis was nonetheless determined, and he was able to convince a few great nobles, his brother Charles of Anjou, and Prince Edward of England, Henry III's son, to join him. In Spain, King James I of Aragon actually set sail in September 1269, but his fleet was decimated by a terrible storm and only "a small squadron" led by two of his sons was able to make it to Acre by the end of December. For the time being they occupied themselves by aiding in the defense of Acre, but when the rest of their army failed to appear, they sailed home, never having had a real chance to attack the enemy.[12]

Meanwhile, Louis IX and Charles of Anjou were forced to delay their departure until a year later. Even though Louis proceeded with the same meticulous preparations as he had done for his first Crusade, there were financial and administrative problems and the ships would not be ready until 1270. Louis was burdened with the major expenses of this Crusade and he still had certain obligations incurred from his residency in the Latin Kingdom in 1250–4. Charles of Anjou meanwhile owed his brother a sizeable sum, which he made no attempt to pay until 1270. The main funding again came from the Church in the form of the ecclesiastical tenth that the pope authorized Louis to collect in France and the twentieth of revenues from churchmen in border dioceses for three years, which started in 1268.

There were, however, also some conspicuous differences between the arrangements in the late 1240s and here in the late 1260s. First, the king purchased some ships outright in addition to leasing many. In Labarge's view these "were the first ships ever actually owned by a [French] king and Louis really deserves to be considered as the founder of the French navy. Another innovation was the king's appointment of a Frenchman, Florent of Varennes, as admiral."[13] The ships came from Genoa and Marseilles and they were to be delivered to Aigues-Mortes in early May of 1270. Second, Louis's wife, Marguerite would not accompany him on this expedition; moreover she was not made the regent. The regency was instead assigned to a knight and a cleric, with stipulated alternates in case of need.[14] Now that his mother was dead, the regency would be placed in bureaucratic rather than in dynastic hands. Third, Louis made no provisions to stockpile supplies for his army in Cyprus or elsewhere on this expedition, as he had done on his first Crusade. Fourth, unlike Louis's ambitious commission of the Sainte Chapelle in 1244–8 while preparations for his first Crusade were going forward, he made no comparable effort to express his Crusader ideals artistically in the late 1260s. Neither of the most famous royal commissions associated loosely with this period, the St. Louis Psalter (Paris, B.N. MS lat. 10525) or the Isabella Psalter (Cambridge, Fitzwilliam Musem, MS 300), seems to reflect Crusader concerns directly.[15] However, it is significant that the St. Louis Psalter makes a large point of contextualizing its Old Testament imagery in frames inspired by the architecture of the Sainte Chapelle, so an indirect connection may exist by this means. Finally, everyone seems to agree that Louis's army in 1270 was significantly smaller than it was in 1248, although the estimates vary.[16] The question is, where was this Crusade headed when the fleet set sail from Aigues-Mortes on 2 July 1270?[17]

When the ships assembled in Cagliari on Sardinia a few days later for final orders, Charles of Anjou and his men had not yet joined the expedition. Nonetheless, the king announced the decision to attack Tunis. The sailors and the army rank and file seemed genuinely surprised, but "Louis's reputation stood so high that few men could question his decisions."[18] Louis, never one to act precipitously, must have planned this beforehand, perhaps with input from his brother, Charles, but when and why?[19] Several historians point to a Tunisian embassy to Paris in early October 1269, reported by Geoffrey of Beaulieu, the king's confessor, as playing an important role in Louis's decision. Although the exact purpose of this diplomatic initiative is not discussed by Geoffey, the main source in Arabic, Ibn Khaldun, sees it as "an embassy to ascertain Louis's intentions and to propose 'conditions of peace sufficiently advantageous to quell his warlike ardor.'"[20] Richard and Riley-Smith suggest the possibility that, however unlikely, Louis could have entertained the hope of converting the emir of Tunis, al-Mustansir.[21] It was certainly a hope that earlier historians identified, one that we encountered in the king with regard to other personalities during his diplomatic initiatives at the time of his first Crusade and residence in the Holy Land.[22] In any case, Strayer points out that "Tunisia was the only objective which satisfied both the religious policy of Louis and the political needs of Charles.

Each king could hope that after the Tunisian raid his interests would prevail." However, Richard comments pointedly, the problem remains "how a landing in Tunis was expected to bring assistance to the Holy Land, then in dire need."

A week later, on 18 July, the Crusaders landed at Tunis without significant opposition. They established camp and secured it. Al-Mustansir, the emir, clearly suspecting that the Crusaders were coming, had taken precautions: repairing the walls of his city, bringing in provisions, and organizing his army. Louis ordered that there would be no attacks on the Muslims until Charles arrived with his soldiers. The Muslims sent out patrols and harassed foragers, but there was very little fighting. Neither commander was ready to risk an open battle or attempt a siege. Meanwhile, as July turned into August, Crusaders at all levels suffered from serious disease and dysentery in the stifling heat. In the royal family, Philippe, Louis's eldest surviving son, became ill and was so weak he could not to exercise his command. John Tristan, the twenty-year-old prince born at Damietta, precipitously became sick and died, just as his father fell ill. Louis, already in weakened condition, gradually succumbed. William of St. Pathus records Louis's last prayer for his people:

> Gracious good God, have mercy on this people who stay here and lead them to their country, that they do not fall into the hands of their enemies and are not constrained to deny Thy holy name.[23]

Then he said, "Jerusalem, Jerusalem," and died, just hours before his brother, Charles, arrived with his fleet, on 25 August.[24]

With his nephew, Philippe III, Louis's successor, too ill to function, the king of Sicily, Charles took command. Certainly neither he nor al-Mustansir wished to risk hostilities and disease was taking its toll on both sides, so eventually peace terms were arranged. Prince Edward of England arrived just as the negotiations were in their final stages, but even his displeasure with the situation could not change the final outcome. The treaty was ratified on 1 November. Charles of Anjou received a war indemnity from which he, personally, took 175,000 *livres*, and he regained the old rights of the kings of Sicily in Tunisia, including trading privileges, controls, and annual payments of tribute. The settlement neither paid for the expenses of the Crusaders nor compensated them for the thousands of deaths they had suffered. "Of all the crusaders, [Charles of Anjou] was the only one who had reason to be pleased." The Crusader fleet then set sail for Sicily. Edward and his men had no choice but to go with them. Voltaire, quoted by Gibbon, summarized this episode by saying, "it is thus that a Christian king died near the ruins of Carthage, waging war against the sectaries of Mohammed, in a land to which Dido had introduced the deities of Syria."[25]

The Crusader fleet arrived safely at Trapani on the west coast of Sicily on 14 November, but on the night of 15–16 November it was hit by a serious storm, which resulted in the sinking of many ships and much loss of life. In the face of this disaster, the various leaders decided to go their separate ways. Charles of Anjou recruited soldiers to join him in an attack on Michael Palaeologus that he was planning. The French Crusade was over and Philippe III was forced to return to France by the difficult overland route. What had started as a proud military venture led by the most revered Crusader of the thirteenth century had turned into a royal funeral cortege. The remains of Louis IX were divided. Charles took his entrails to Palermo where he placed them in the Benedictine Monastery of Monreale, overlooking the city.[26] Philippe III took his bones in a casket where they were laid to rest at Saint Denis, the burial church of the French kings and the site that Louis had chosen to be interred. Joinville reports, "at this tomb in which he was buried God has since then performed many fine miracles in his honour, and by his merit."[27] Along with the bones of his father, Philippe also carried the remains of his wife, Isabel of Aragon, who died en route while giving birth to a stillborn child; the dead child; his brother, John Tristan; and his brother-in-law, Theobald of Champagne and Navarre.[28] Only Prince Edward of England was still determined to go to the Holy Land, and after wintering on Sicily, he and his men sailed on to Cyprus and then to Acre, where they arrived on 9 May 1271.

Meanwhile, in the Holy Land, the situation had been worsening. Baybars, realizing that there would be no Crusade for the moment, took the initiative. In January 1271 he began a new campaign against the Crusader States. Marching into the County of Tripoli by way of Baalbek, his first objective was Chastel Blanc (Safita), a Templar castle southeast of Tortosa, which is distinguished today by its massive donjon and superb masonry, the product of two rebuildings after the earthquakes of 1170 and 1202. At the time of Baybars's attack the fortress had a double enceinte with handsome Gothic vaulting, which no longer survives,[29] and a substantial garrison. However, in the face of the Mamluk army, the master of the Templars, Thomas Bérard – perhaps fearing another disaster as at Safed in 1266 – ordered his men to surrender peacefully on the condition of safe conduct to the coast. The decision of the master seems to indicate that in the circumstances, he valued his Templars more than he valued this site.[30] After this victory Baybars easily took several small castles in the vicinity as well. By this action, he completed the conquest of major Templar inland fortifications, which had started so dramatically with Safed.

From Safita Baybars abruptly turned to the southeast to attack the great Hospitaller Castle of Crac des Chevaliers.[31] Crac remained as one of the most extraordinary of Crusader fortifications, but during the time of its last strengthening in the 1260s, the estate that Crac had commanded was largely deserted. Not only was the Hospital therefore not collecting revenues from its land, but it was also said that as early as 1270 Baybars allowed his horses to graze on the meadows and the crops of Crac.[32] Now as Baybars began to position his army and siege engines on 18 February and started the siege on 21 February 1271, the lands of Crac were provisioning the Mamluks, not the Hospitallers.[33]

Baybars's already substantial army was joined at Crac by troops from Hama, Saone, and the Assassins. The siege began vigorously, but heavy rains impeded progress. By late March, however, the outer walls had been breached, but then Baybars faced the prospect of a lengthy siege of what must have seemed like an impregnable inner castle. If we are to believe the Muslim sources,[34] Baybars, drawing on his experience at Safita where the garrison had been ordered to surrender by the master, had a letter forged to the Hospitaller castellan at Crac from his superior in Tripoli, ordering him to surrender under the assurance of safe passage to save his men.[35] The Christian sources say nothing about such a letter. Thorau accepts the fact of the letter but says, "it is an open question whether the defenders actually fell into the trap and regarded the letter as genuine, as Cathcart King assumes. It would be equally possible that the Hospitallers saw the hopelessness of further defence, and so complied readily with the alleged order."[36] Up to this point the garrison had resisted all previous attacks on the inner castle successfully. On 8 April the Hospitallers suddenly surrendered to Baybars and were given safe passage to Tripoli. Baybars sent another victory letter, this time to Hugh Revel, master of the Hospitallers.

> We bring the news that God has granted us an easy conquest of Hisn al-Akrad. You fortified it, built it up and adorned it, but you would have been more fortunate had you abandoned it. You relied on your brothers to preserve it, but they were of no avail to you. You lost them by making them stay there, as they lost it and caused your ruin. No fortress can hold out when these Muslim armies come down against it.[37]

The boastful tone of this letter does not explicitly help to clarify what happened during the siege, but the irony of the language suggests that in effect the Hospitallers did abandon Crac, who were lost to the master so long as they did not capitulate. With Crac in his hands, Baybars immediately appointed a new commander of the castle, and two emirs were assigned to direct the work of repairing the damaged fortifications.

The loss of Crac des Chevaliers was a great blow not only to the power of the Hospitallers, but also to the prestige and morale of the Crusaders in the Holy Land. Now the Hospitallers and the Templars both sought to make peace with the sultan, in order not to lose control of their situation. A truce was granted for the region of Tortosa (Templar) and Margat (Hospitaller) along the coast, but "the terms imposed by him were stiff."[38] The Templars would have to cede the territory of Chastel Blanc, and the Hospitallers were required to yield half of the lands of Margat as well as revenues from Muslims in this region.[39] They were also forced to agree not to reinforce the defenses of Margat from its current condition without specific prior inspection by a duly authorized Mamluk representative. The terms of this article of the treaty like all the others are detailed and explicit.[40] Margat, just north of Tortosa on the coast, one of the largest Crusader castles ever built, was now the only major castle still in Hospitaller hands.[41]

In the wake of his great victory at Crac des Chevaliers, Baybars also besieged Hisn 'Akkar (Gibelacar) near Tripoli. There the siege only lasted a few days, from 29 April to 12 May.[42] At that point, the sultan began to prepare to attack Tripoli, but then word reached him of the arrival of Prince Edward and his Crusader army at Acre. Baybars therefore abruptly offered Bohemond a ten-year truce. Bohemond, clearly wary of the Mamluk sultan in view of his recent impressive conquests of Safita and Crac, readily accepted the truce, thus sparing Tripoli from Baybar's wrath for the moment.

On his return march to Cairo, however, Baybars added to his military victories by suddenly besieging and taking Monfort (Qal'at Qurayn), the main castle of the Teutonic Knights, in the hills just 25 kilometers northeast of Acre.[43] As long as this castle was in Crusader hands, it was a threat to Safed now controlled by the Mamluks to the southeast of Montfort. The assault began in early June, and when the south rampart was successfully mined, the castellan, John of Sachsen, sued for peace. He and his men were allowed safe passage to Acre on 23 June, together with the treasure and archives of the Teutonic Knights.[44] The castle was then destroyed by July 4;[45] it was never rebuilt. The siege of Crac had taken a month, Gibelacar two weeks, this one again only about two weeks. The Crusaders now held no major inland castles – they were pinned against the coast.

Not all of Baybars's objectives were won on the first attempt, but most were eventually taken. A conspicuous exception to this record occurred about the same time he besieged Montfort. Noting that Hugh III had come to Acre, Baybars sought to surprise him with a naval attack on Cyprus in mid-June. He even painted his galleys black like Christian ships and sailed with banners bearing crosses to deceive his enemy. However, inexperience on the part of his naval commanders and bad weather proved to be the downfall of the fleet. Strong winds off the port of Limassol drove most of his ships aground during the night before the attack. The stranded crews and troops were immediately captured. Now King Hugh sent Baybars his own letter of victory, with news of the defeat of his fleet. Baybars angrily replied that not only had he taken Montfort, which was a far more important conquest, but also he could replace these ships immediately, which he did.[46] However, the fact is that the Mamluk navy was inferior to Crusader shipping, and it could not confront the Italian maritime powers as an equal. This was Baybars's one major weakness, but the Crusaders were too distracted to notice. The Noailles Continuation remarks tersely that the Crusaders sank fourteen saracen galleys off Limassol and killed or took prisoners numbering forty thousand.[47]

So between 1269 and 1271, at a time when Baybars was free to make his own pilgrimage to Mecca in the summer of 1269, Louis IX, the greatest hope for the new Crusade, tragically died en route to the Holy Land in August 1270. A Tunisian, one Ahmad ibn Isma'il al-Zayyan, had composed this ominous epithet for Louis IX, referring back to the disaster in Egypt, and prophetically forward to his fate:

> O Frenchman, this land is Egypt's sister; prepare for your certain fate! Here Ibn Luqman's house [in Mansura] will be a tomb, and the eunuchs (to guard you) will be Munkar and Nakir [the Muslim angels who interrogate the spirits of the newly dead].[48]

Now the ambitions of his brother, Charles of Anjou, loomed over the Mediterranean at the start of 1271. The hopes that Latin Christians everywhere held for the newly named king of Jerusalem, Hugh III, and the newly called Crusade from the West in late 1268 for the Crusader Levant had failed as yet to materialize.

Whereas the army of Aragon under King James I and that of the French army of Louis IX had been destroyed or dispersed by unexpected disasters, the English army of Prince Edward accompanied by Otho de Grandson and Erard de Valéry arrived intact in Acre on 9 May 1271.[49] Edward was full of enthusiasm, but his army is estimated to have been approximately only a thousand men. Even with additional contingents, one led by Edmund of Lancaster, some Bretons, and a group from the Netherlands under the archdeacon of Liège, Tebaldo Visconti, this Crusading force was too small to constitute a major threat to Baybars and his Mamluk army. Baybars demonstrated this by brazenly attacking and destroying Montfort close by Acre a few weeks after their arrival, and Edward was powerless to interfere. Nonetheless, Edward energetically sought to make his presence felt. His aim was to create an alliance that could attack Baybars. He sent emissaries to the Mongol Il-Khan, Abaga, in Turkestan, who promised aid. The Mongol commander in Turkey was ordered to march into Syria accompanied by troops of the Seljuk sultan. Meanwhile, Edward tried to organize the knights of Cyprus to follow their king and come to the aid of the Holy Land. A few were willing to fight with Hugh III, but James of Ibelin insisted they were strictly volunteers and their only obligation was to defend the island. Edward was no more successful enlisting the exclusive support of the Italian merchants. Although he discovered they were trading with the Mamluks, even providing Baybars with important strategic supplies, their commercial activity was rightfully chartered by the high court in Acre and he could do nothing to prevent this.

Besides the commercial activity of the Italian and other European maritime cities, there were also other travelers and envoys, both Christian and Muslim, passing through Acre at this time that added to the cosmopolitan ambience of the city. Perhaps those who would become the most famous were Nicolo and Maffeo Polo, who came to Acre on their way back from the East in 1269 and then en route to the East in 1271, accompanied by Nicolo's son, Marco.[50] There seems to be no evidence that Edward ever met the Polo family, or that he ever really fully acclimated himself to the Levantine world of Acre.

Yet despite his disillusionment with the situation in the Latin Kingdom, Edward did what he could. He conducted raids into the hills around Acre in the summer and fall,[51] but he was never able to link up with the Mongol contingent, which got as far as Apamea before being forced to turn back. He helped strengthen the defenses of Acre by building a tower at the northeast angle of the city walls. He established a small garrison of *stipendiarii* commanded by Otho de Grandson. Baybars had arrived in Damascus during this time with a large army, forcing the Mongols to retreat. Edward realized that his only other real contribution might be a treaty to keep Baybars from attacking the Crusaders again until he, Edward, could effectively return with a larger, more potent force.[52] Baybars for his part was willing to entertain such a treaty, which was no more than a renewal of the truce of 1268 that had been broken in 1269. However, he was suspicious of Edward, who was ambitious. The truce was finally arranged when Charles of Anjou intervened; Baybars wanted to maintain good relations with Charles, who now represented the only real potential Crusader threat from the West. On 21 or 22 April 1272[53] the truce was ratified by King Hugh III, for the government of Acre and the sultan. Baybars, however, insisted that the Hospitallers and the Templars ratify the treaty separately. Thorau says that the Muslims "had too often had the experience of the knightly Orders pursuing their own power politics and evading treaties entered into by the king."[54] Seen from the Crusader point of view, however, this was just more evidence of political fragmentation and a continuation of Baybars's successful policy of "divide and conquer."

The truce was scheduled to last for ten years, ten months, ten days, and ten hours, and included some concessions of land on the part of the Mamluks, including Alexandretta, which became a condominium. The Mamluks also conceded the plain in front of Acre and open use for Christians of the pilgrimage route to Nazareth, which was still the sole major holy site in Crusader "control." Otherwise the County of Tripoli was separately covered by the truce between Bohemond and Baybars concluded in May 1271. When the truce was signed in April 1272 between the king and the sultan, ibn al-Furat says, "the people of Acre came out to see the troops, and the Sultan mounted with his men, after which they jousted with lances."[55]

Because Edward's serious interest in military strategy and the fate of the Latin Kingdom is evident[56] and his intentions to return to the Holy Land were apparently known even then, Baybars is said to have contracted with an Assassin to eliminate him before he left the Levant. Although the Christian sources record this story,[57] the Muslim sources give a different version. Ibn al-Furat claims that Edward was not pleased with the idea of a truce with Baybars and would not become a party to it.[58] Therefore, "to rid himself of this obnoxious Crusader," an attempt was made on his life. The attack occurred on 16 June 1272, and although Edward survived, he was reportedly too sick to leave for home for several months.[59] Finally, on 22 September he sailed for England. When he arrived home he discovered his father, Henry III, had died, and he was now king.

GREGORY X, CHARLES OF ANJOU, AND BAYBARS

Edward's crusading days were therefore over, although as king he persisted in proposing new expeditions to the pope until 1293. Yet despite what Edward had accomplished, his Crusade had had little impact on the main problems of the Latin Kingdom, so little in fact that it merits only a few paragraphs in the Noailles Continuation. Indeed he was the last major European Crusader to come to the Latin Kingdom, but that does not mean that the Crusade ideal was dead in the West. Tebaldo Visconti, archdeacon of Liege, who was in Acre as part of Edward's Crusade, was named to fill the papal vacancy that had existed for nearly three years, the longest in history.[60] Once the new pope, Gregory X, was elected 1 September 1271 by the conclave meeting in Viterbo, hopes were again raised that aid would be forthcoming to the Holy Land. Kenneth Setton observed that "Pope Gregory X would make a great effort – at an oecumenical council – to revive the Crusade."[61] Richard comments, "the whole of Gregory X's pontificate (1271–1276) was to be dominated by the crusade."[62]

Tebaldo Visconti returned to Italy from the Holy Land going first to Viterbo where he was ordained as a priest, and then went to Rome where he was consecrated and crowned as Pope Gregory X, on 27 March 1272. Immediately thereafter he issued a bull, *Salvator noster*, on 1 April 1272, announcing a new council that was to be held in Lyon in 1274. The program for the council was threefold: reforming the Church, healing the schism with the Greeks, and bringing aid to the Holy Land.

Like Innocent III before him, he dreamed of a new and successful Crusade. Gregory commissioned reports from several prominent churchmen that could advise him on how to proceed. These reports were done by a variety of important figures in the church, all of whom had markedly different points of view. Humbert of Romans O.P., former head of his order, genuinely believed in the need for a new Crusade to the East, but saw no possibility of converting the Muslims.[63] William of Tripoli O.P., who was living in Acre at the time, saw little hope for the success of a Crusade to the East, and advocated missionary activity instead. Fidenzio of Padua O.F.M., who only wrote down his report later, supported the Crusade as a way of eliminating the Muslims, who, he argued, were not open to Christian preaching and were dangerous to missionaries. Bruno, archbishop of Olmütz, argued the Crusade should be targeted toward the eastern frontiers of the Holy Roman Empire. Gilbert of Tournai O.F.M., although not criticizing papal policy, forthrightly decried corruption in the collection and use of Crusading tithes and the abuses of Crusade indulgences. It was clear that by this time there was widespread discussion and criticism, positive and negative, of the Crusade in Europe in all levels of society. However, none of these reports fully addressed the roots and causes of that problem, which ironically had started with the changes in the concept and organization of the Crusade instigated by Innocent III.[64]

One major figure who did not submit a report was Thomas Aquinas O.P., who was, however, invited to the council. Thomas had written an unfinished treatise "On Kingship" for a reigning king of Cyprus, unnamed but probably Hugh II,[65] and Pope Urban IV had requested a treatise on the errors of the Greeks from him, the latter which he had with him on his way to Lyon. However, Thomas never reached the council. Traveling from Naples, he died at Fossanuova on 7 March 1274.[66]

The diversity of opinion expressed in the reports he received only seemed to strengthen the resolve of Gregory X to pursue the goal of a new Crusade to the East. The Council at Lyon opened on 7 May, and when it was over on 17 July 1274 the pope could count three successes. First, a semblance of Church reunion had been achieved with the Orthodox Greeks. This was symbolized in the person of George Acropolites, who read the following words to the council on 6 July:

> I, George Acropolites, grand logothete, envoy of our lord the Greek emperor, Michael Ducas Angelus Comnenus, possessing the latter's full mandate for what follows, do entirely abjure all schism. The statement of faith to which we have subscribed, as it has been fully read out and faithfully set forth, in my said lord's name I do recognize to be the true, holy, catholic, and orthodox faith. I accept it.

"Acropolites then solemnly accepted the primacy of the Roman Church and pledged obedience thereto both on his emperor's behalf and on his own."[67]

As part of this union, the emperor Michael also expressed his readiness to support the Crusade to liberate the Holy Land; in return he wished to be assured that there would be peace between him and Charles of Anjou.

Second, the Mongol Il-Khan, Abaga, sent a delegation to Lyon, the leader of which received baptism on 16 July. Abaga "sought an alliance with the Christians against the Moslems in the Levant.... The letter which they brought the pope, the cardinals, and the conciliar fathers... proposed a confederation with Christendom against Islam, which would of course place the city and kingdom of Jerusalem in Christian possession, but obviously under Mongol suzerainty."[68] Gregory X received this embassy with pleasure and he wrote back that the Il-Khan would be informed before the next Crusade army appeared in the East. Gregory's idea of an international alliance against the Mamluks was taking shape.

Third, Gregory had formally proclaimed the Crusade, in a document, the *Constitutiones pro zelo fidei*, issued in May 1274.[69] Restating material from older decrees and adding much that was new in terms of fund raising, "Gregory X's aim was to build up a huge reserve.... As it was, his preparations were heroic.... In 1275 the kings of France and Sicily took the cross. So did Rudolf of Hapsburg in return for Gregory's agreement to crown him emperor.... It was clear that Gregory was planning an eastern crusade on a more ambitious scale than had ever been dreamed of before. But on 10 January 1276 he died.... Gregory's crusade never departed.... Although proposals for large-scale expeditions were still put forward... it was small parties that sailed to help the kingdom of Jerusalem in its last years."[70] Despite Gregory X's hope for a massive new *passagium generale*, in fact the era of the *passagium particulare* had begun.[71]

Even though neither Hugh III nor Baybars realized it at that moment, the age of the major Crusade to the Holy Land led by princes of western Europe was over. The question now was how long the Latin Kingdom and the County of Tripoli could survive in the face of the Mamluk threat. Despite the truce with Baybars, King Hugh III was having difficulty maintaining unity with the Crusader leaders in the kingdom of Jerusalem and in Tripoli. Beirut, his chief mainland fief, was in the hands of Isabel, who had entered into a separate truce with Baybars in 1269 as we saw earlier. In 1272 she had then married one of Edward's Crusaders, Hamo l'Estrange. Before he died in 1273, Hamo placed Isabel and her fief, surprisingly, under the protection of the Mamluk sultan. Then, when Hugh III tried to remarry her to a noble in the kingdom of Cyprus, Baybars objected and the king was forced to send her back to Beirut. So not only was Baybars a threat outside the kingdom, but he was also able to be a disruptive force inside it as well.[72]

Hugh III was no more successful in attempting to assert his power in Tripoli. When Count Bohemond VI died on 11 March 1275, his son, Bohemond VII, was only fourteen. Hugh attempted to claim the regency, but Bohemond's mother, Sibylla, daughter of Hethoum of Armenia, stepped in immediately to assume the office. When Hugh came to Tripoli to press his claim, he found that Bohemond had been sent to the court of Leo III of Armenia to live. Furthermore, the king was faced with the hostile bishop of Tortosa, Bartholomew, whom Isabel had appointed to administer Tripoli in her name. Hugh avoided leaving Tripoli empty-handed only by helping to arrange a truce for Lattakia. Baybars regarded Lattakia part of the Principality of Antioch, and therefore not covered by his treaties with Acre or with Tripoli. When he tried to take it, the citizens appealed to Hugh. The king intervened and arranged a settlement by which the Christians remained in control, but they were obligated to liberate seven hundred Muslim prisoners and pay an annual tribute to the sultan.[73]

Hugh's difficulties also continued to grow even in Acre. Although his relations with the Hospitallers remained correct under Hugh Revel, who had supported him in the dispute with Maria of Antioch, the Hospitallers were now diminished in power and presence because of the loss of their greatest castle and because of their reduction in numbers. The Templars had not been supportive, however, and when Thomas Berard died in March 1273, the new grand master, William of Beaujeu, who took office in May 1273, represented a new problem. He was proud, ambitious, and directly related to the royal house of France, so when he arrived in the Latin Kingdom from Apulia in 1275 he came as an advocate of Charles of Anjou, opposed to

King Hugh personally and politically.[74] This was demonstrated concretely in the La Fauconnerie affair, in which the Templars purchased the village in October 1276 without royal consent. Hugh regarded this as the final insult, and he was so outraged by this development that he abruptly packed his things and left for Tyre, where a meeting of the Haute Cour was called. No one could persuade the Templars to recognize the king's rights. No one, not the Hospitallers, the Teutonic Knights, the Pisans, the Genoese, the members of various confraternities in Acre, nor the church hierarchy, could persuade Hugh to stay, so they prevailed on him at least to appoint a *bailli.* Hugh at last named Balian of Ibelin, son of John of Arsuf to be the *bailli*, and then he sailed for Cyprus. Back home, he wrote the pope explaining his actions, describing how he found it impossible to govern in Acre not only because he could not control the feudal lords and the Italian merchants, but also because of the fractious behavior of the military orders.[75]

The result of the king's departure was rioting in the streets of Acre, which was only brought under control with difficulty, and in the winter of 1276–7 the situation must have seemed very precarious to residents of the various Crusader enclaves along the coast of Syria-Palestine. The hope of another Crusade had faded, and now the new king of Jerusalem, Hugh III, had retreated to Cyprus, leaving them to face the Mamluks on their own. Ironically the situation stabilized in a most unexpected manner. Amazingly, according to the Templar of Tyre Pope Gregory X had taken a personal interest in Maria of Antioch's claims to the crown of Jerusalem, and he suggested that she sell her rights to Charles of Anjou! Only after much delay, and even after Gregory X had died in January 1276, was Maria eventually able to effect this sale in March 1277. As part of the settlement she received a cash payment and an annuity; meanwhile Charles now styled himself "king of Jerusalem."[76]

The immediate result of Charles of Anjou becoming king of Jerusalem was that he sent a trusted lieutenant, Roger of San Severino, to Acre with a military contingent to serve as his *bailli* in the Latin Kingdom.[77] When he arrived in the spring, Roger presented his credentials duly signed by Charles, by Maria, and by the new pope, John XXI.[78] Aided by the Templars and the Venetians, Roger forced Balian of Ibelin to turn over the city to him in early June 1277. With the banner of Charles of Anjou flying over the citadel, Roger then invited the lords of the kingdom to pay homage to him as the new king's *bailli*, but there was uncertainty about what to do and they demurred. A delegation went to Cyprus to consult with King Hugh on this matter, but he refused to discuss it. Eventually the barons paid homage to Roger, and later Count Bohemond VII also recognized him as the lawful *bailli.* Once Roger was in place he appointed other men from the court of Charles of Anjou as constable, marshal, and seneschal of the kingdom.[79] Balian, Hugh's discredited *bailli*, died shortly thereafter, in September 1277.[80]

So Charles was styled king of Jerusalem, but truth be told, he was actually king of Acre. Tyre held out for King Hugh III. The Latin Kingdom was once again fragmented by absentee claimants, but now there were also two kings instead of one. Despite this problematic and potentially dangerous situation, however, the Crusader States were now in less peril than they had been during the previous fifteen years. The reason was because the main threat to the Latin Kingdom, Baybars, had good relations with Charles of Anjou, and neither he nor Roger of San Severino would treat with the Mongols behind Baybars's back nor advocate a new Crusade against the Mamluks the way King Edward I of England would do. He also had an impressive number of truces in effect: those with the Latin Kingdom and the County of Tripoli that were scheduled to run until 1283 and 1282, respectively, and there were other separate truces with the Hospitallers, the Templars, and his special protection over Lady Isabel of Beirut. In the current circumstances the Crusaders for their part valued these truces as respites from Mamluk assault; Baybars on his side could, however, use these arrangements to decide where and when his next attack might be directed, as he had done in the past. In any case, neither Charles nor Roger would be any more successful than Hugh had been in attempting to end the feuding among the various factions inside the kingdom, but Roger, as instructed by Charles of Anjou, would make every effort to keep peace with the Mamluks. In this way Acre, the Latin Kingdom, and the County of Tripoli, perhaps somewhat unexpectedly, were given a new lease on life for at least another decade.

Now that the threat of a new Crusade had passed, Baybars had no immediate interest in attacking the Crusader States; his attention was directed elsewhere. He annexed Nubia by sending military expeditions there in 1272 and 1276.[81] He captured the last three castles of the Assassins east of Margat in 1273, thereby removing them as an independent political and military factor.[82] He dealt with internal problems, including various plots and conspiracies, and especially the bizarre case of Sheikh Khadir b. Abi Bakr, who came to trial in 1273.[83] The Mamluk–Armenian settlement of 1268, imposed by Baybars after Kalavun's conquest of Cilicia, had been broken by the new king, Leo III, and the sultan organized military action there in 1273, 1274, and 1275.[84] After attempted peace negotiations with the Il-Khan broke down in 1272, Baybars planned his next military moves against the Mongols.[85]

The trial of Sheikh Khadir is worth mentioning here, not because of the charges made against him, but because of his fanaticism against religious minorities in the Mamluk sultanate. Sheikh Khadir had become a confidant of and a personal consultant to Baybars, for whom the sultan had had a *zawiya*, that is, an abode for a holy man, erected in Cairo. Sheikh Khadir became quite powerful because of Baybars's favor, and over the years he came to possess *zawiya*s in Damascus, Jerusalem, Ba'albek, Homs, and Hama as well as Cairo. Eventually, however, he was brought to trial for "the most abominable crimes, unnatural sexual practices and adultery." However, Sheikh Khadir was also carried away by a "blind lust for destruction" against

> the Jewish and Christian minorities who lived under the protection of the [Mamluk] authorities.... In Jerusalem he laid the church of the Holy Sepulchre in ruins, and slew the priest with his own hand. In Alexandria the venerable church where the alleged head of John the Baptist was preserved, was ruined. It was turned into a Qur'an school, and called after him al-Madrasa al-Khadra'. In the spring of 1271, allegedly to celebrate the sultan's return from Crac des Chevaliers, he had the great synagogue in Damascus plundered and devastated. The Torah scrolls and all the furnishings were burnt, and the work of destruction culminated in an orgy.[86]

Many Muslims were alarmed by the excesses of this sheikh, whose destructive fury against Christian holy places had not been seen since the time of Caliph al-Hakim in 1009. A death sentence was pronounced against him at the trial, but the fast-talking sheikh was able to have it reduced to life-imprisonment. He died in prison five years later. It is one of the mysteries of this powerful sultan that Baybars was so devoted to this sheikh, a kind of Muslim Rasputin, just as Baybars is also said to have been much given to astrology.[87]

In Cilicia, Baybars had watched the new king, Leo III, repeatedly break their treaty by failing to pay the annual tribute and allowing unprovoked attacks on Muslim trading caravans over several years. After a formal declaration of war, Baybars left Cairo with his army in February 1275. They were joined by additional troops in Damascus and marched into Cilicia. By the end of March the Mamluk army had demolished Sis and had pillaged and looted Adana and Ayas. After a pause in the plain of Antioch to distribute the booty, rest his army, and graze the horses, Baybars then determined to invest the castle of Cursat (Qusayr), about sixteen kilometers almost due south of Antioch. This fort had become the property of the Latin patriarch of Antioch after the fall of the city in 1268, and it was now the only inland castle in the principality held by a Christian garrison, along with the coastal enclaves of Alexandretta and Lattakia. Baybars unleashed a full-scale siege that eventually starved out the garrison. They surrendered on 14 November 1275 and were allowed to depart under safe conduct. Meanwhile as mentioned earlier, Baybars had also threatened Lattakia, but King Hugh had been able to intervene on behalf of the citizens.[88]

It was the Mongols, however, who still occupied great importance in Baybars's thinking and who posed the largest threat for the Mamluks. After their desultory peace negotiations had failed to yield any positive results in 1272, hostilities had been resumed. Despite certain confrontations over the past several years, including a hard-fought battle at al-Bira on the Euphrates in 1273, no resolution of the Mongol presence north of Syria and the fertile crescent had been achieved by the Mamluks. Accordingly, Baybars planned a campaign against the Mongols in Anatolia where their Seljuk protectorate was located. Finally, in the spring of 1277 he was able to bring this plan to fruition.[89] Setting out from Cairo in February, Baybars marched northward past Aleppo to meet the Mongols at Albistan near Melitene. After a bloody battle the Mamluks prevailed on 18 April.[90] Baybars then occupied Kayseri to the northwest where he "received the homage of the people and caused coins to be struck in his name as suzerain of the Selchükids of Rum."[91] When the Il-Khan Abaga was informed, Baybars withdrew to Damascus.

Just as the battle of Ain Jalud had stopped the Mongol threat in 1260, the battle of Albistan stopped the Mongol threat in 1277, but in both cases the Mongol advance was only blunted and delayed or turned back, not eliminated. Baybars, however, would not live to fight again. In Damascus on June 17 Baybars became sick from drinking *qumuz*, fermented mare's milk – a favorite of his and a great favorite of his Mongol enemies[92] – and gradually his conditioned worsened. Despite the ministrations of his physicians, he developed a serious fever that increased until he died on 1 July 1277. The cause of his death was most probably hepatic dysentery. The stories of Baybar's death vary, apparently partly due to the fact that at first his death was kept secret to enable his son to take the reigns of power as smoothly as possible. The variety of legendary stories that then developed include various causes of his fatal illness. Irwin observes sceptically, "inevitably there were rumours of poison."[93] The most likely story, distilled out of the many sources, is that Baybars drank from a cup that had contained poison for someone else but had not been fully cleaned.[94] Nonetheless, Thorau observes, "the story of the poisoned draught taken in error anticipates Shakespeare's use of the same theme in the last scene of *Hamlet*."[95]

Both Baybars and Saladin were buried in Damascus not far from the great Omayyad mosque.[96] Both were great leaders, men from a minority background – Saladin a Kurd, Baybars a Kipchak Turk – who rose to become the most powerful Islamic rulers in their time. However, the impact of their deaths on the Muslim world could not have been more different. When Saladin died, the people of Islam everywhere wept from their loss; even some Christians wept. When Baybars died no one wept. Although he had been admired and had been a great general, he was not loved, and he had few of the personal qualities that had won Saladin such respect.

From the point of view of the Crusaders, the Noailles Continuation records his death in two separate years, and is completely mistaken about the circumstances in both cases.[97] Crusader knowledge about the person of Baybars was evidently limited. However, the results of his campaigns were clear enough: "when Baibars became Sultan the Frankish dominions stretched along the coast from Gaza to Cilicia, with great inland fortresses to protect them from the East. In a reign of seventeen years he had restricted the Franks to a few cities along the coast, Acre, Tyre, Sidon, Tripoli, Jebail and Tortosa with the isolated town of Lattakieh, and the castles of 'Athlit and Marqab."[98] (See Maps 5 and 6.) From the Mamluk point of view, "Baybars not only distinguished himself as a military commander, but also demonstrated the ability and virtues of a great ruler." When he died, "he left to his heirs a firmly based and well-organized polity, rounded out by his territorial gains, and forming a centralized and unitary state."[99] It is perhaps symbolic of his military might that a sword now in the Khalili collection in London, "which is the only surviving weapon bearing the name of Baybars, is . . . the earliest curved Islamic sword known."[100] Without claiming that the Islamic curved sword was invented by Baybars, this weapon dated *c.*1270 with its two lion blazons evokes by its inscription the virtues of its owner:

> Glory to our Lord, the Sultan, al-Malik, the Just, the Learned, the Defender of the Faith, the Warrior at the Frontiers, . . . , al-Zahir Baybars, the Associate of the Commander of the Faithful, may God make his victories glorious.[101]

Baybars was also a substantial patron of the arts, active as a builder who beautified Cairo and Jerusalem and rebuilt many castles and fortifications. It was during his reign and that of his successor that there were changes in Muslim metalwork, glass blowing, and book illumination, stimulated by artists – not to mention artisans, doctors, astrologers, and other skilled refugees – from the East moving into Mamluk lands. As Irwin points out, "it is scarcely an exaggeration to claim that, under the Mamluks, Egypt and Syria became a sort of Noah's

Ark for an older Eastern Islamic culture."[102] However, in particular, Baybars was the great architect of the strategy to push the Crusaders into the sea. Although he died before it could be accomplished, it would only be a matter of time, unless some miraculous change could occur in the direction that developments were moving.

THE CRUSADER STATES AND THE MAMLUKS TO 1289

Following the death of Gregory X in 1276 and that of Baybars in 1277, the fate of the Latin East was attached to the fortunes of Charles of Anjou, the "other" king of Jerusalem, and of the Angevin empire. The papacy was enfeebled again, not by an interregnum but by a series of popes with exceedingly short reigns. Between 1276 and 1291 there were a total of seven pontiffs, and the longest reign was only four years, for both Martin IV (1281–5) and Nicholas IV (1288–92).[103] It was Charles who seemed to be in control, at least for a while.

Although he "had won [his] new kingdom without bloodshed... it was a worthless kingdom," as Runciman bluntly points out.[104] The kingdom of Jerusalem was worthless to Charles, that is, because it could provide little revenue, produced no manpower, and obliged him to support a military presence in Acre at his own expense even though the popes had forbidden him to attack Cyprus. Thus the Latin Kingdom could neither aid him in his plans to conquer Byzantium, nor could he use the Latin Kingdom as a point of departure to win Cyprus. The island kingdom of Cyprus would have been in many ways a much more valuable prize (compared to the Latin Kingdom) in terms of wealth and resources. However, despite papal restraints, Charles was cleverly and persistently preparing for his attack on Constantinople. Through deferential behavior toward Pope Nicholas III (1277–80), successor to John XXI, who died after reigning less than a year, Charles laid the groundwork to persuade the new pope, Martin IV, to impose the union of the Latin and Greek churches with force. Whereas Nicholas was an Orsini, born in Rome, who was focused on limiting Angevin influence on papal policy, Martin was French, a graduate of the University of Paris, devoted to the memory of Louis IX, and ready to cooperate with Charles. Having strengthened his position politically and financially in the intervening years, Charles was ready to pursue his designs on what he viewed as Frankish Greece. He pressured the pope to break off negotiations with Michael VIII over church reunion. In July 1281, with the pope's blessing, he entered into an agreement with the Venetians aimed at restoring the Latin Empire of Constantinople. A joint expedition was scheduled to sail in the spring of 1282.[105]

As the year 1282 began, Charles, besides being king of Jerusalem, was king of Sicily and Albania; count of Anjou, Provence, Forcalquier, and Maine; regent of Achaea; overlord of Tunis; and senator of Rome (for life). He was not only the most powerful lord in western Europe, but he was also single-mindedly preparing to lead a powerful expedition to the East. The problem for the Latin Kingdom was that his goal was Constantinople, not Jerusalem. The problem for Charles was his long-sought goal to attack the Byzantines had blinded him; he had failed to recognize the danger of the Aragonese threat, he did not heed reports of the strength of the Hohenstaufen resistance in Italy, and he could not see the potential for rebellion by the people of Sicily. When the bells for vespers sounded from the Church of the Holy Spirit on the evening of 30 March – Easter Monday – 1282, Sicilians everywhere in Palermo arose. Shouting "moranu li Franchiski," "death to the French," they massacred every Frenchman, every Frenchwoman, and all Sicilian collaborators with the French they could find.[106] The uprising quickly spread through the island, and even the huge Angevin fleet in the harbor at Messina was threatened.

Charles was in Naples when he heard the news, and when he realized what was happening, one chronicler reported him saying, "Since it has pleased you, Lord God, to turn the wheel of fortune against me, may it please you that my descent should be by little steps."[107] However unlikely it is that he would have ever said such a thing, it is interesting that such philosophizing would be attributed to him. To his credit, although he had not been able to see the rebellion coming and did not understand its cause, Charles was able to recognize what was happening very quickly. He immediately diverted men and ships from elsewhere to come to his aid in Sicily. His edict of 10 June 1282, by which he hoped to end the uprising, however, fell on deaf ears because the problem was Angevin taxation and overlordship, not refinements in the system of taxation. However, by 30 August when King Peter of Aragon landed at Trapani and marched to Palermo where he was proclaimed king of Sicily, what had been "a local rebellion became a major war between two kings of Europe." In the midst of this turmoil, the Latin Kingdom had been long forgotten by Charles until his *bailli*, Roger of San Severino, was summoned home at the end of the year.[108]

The events surrounding the rise and fall of Charles of Anjou in Sicily were equally momentous for the Crusader East in light of the developments in Cairo. Although a real effort had been made to enable Baybars's eldest son, Baraka Khan, to succeed his father in 1277, he proved unequal to the task. Despite the fact that he was acquainted with affairs of government, not being the warrior and leader his father was, he could not command the power he needed. When Baraka Khan's limitations became evident, he was replaced in August 1279 with a younger son by his father-in-law, Kalavun, emir of the Mamluk troops in Syria. Baraka Khan became emir of Kerak, while Kalavun as commander-in-chief of the army in effect became the regent for the new sultan, Salamish. Shortly thereafter Salamish too was removed and sent to join Baraka Khan, while Kalavun had a third son, Khidr, sent to Krak de Montréal (ash-Shaubak) to rule. In October/November 1279 Kalavun was elected to be the next sultan. These developments demonstrate both the respect accorded the sons of Baybars by Kalavun in honor of the great sultan, as well as Kalavun's determination to pick up the reigns of government and continue the policies of his illustrious predecessor.[109]

Kalavun, like Baybars, began his sultanate with a series of acts designed to win support and consolidate power. He abolished certain taxes on merchants, he removed Christian scribes from a segment of the bureaucracy in favor of Muslims, and in 1279/80 he began a series of building programs at the holiest sites of Islam: Mecca, Jerusalem, and Hebron. In particular, in Jerusalem he sponsored the reconstruction of the southwest part of the al-Aqsa mosque and began the Ribat al-Mansuri, a hospice for Muslim pilgrims, which was the first Mamluk construction outside the walls of the Haram al-Sharif in Jerusalem.[110]

It was not long before Kalavun was tested politically, however. In April 1280 the emir Sunqur al-Ashqar, Kalavun's main rival for power, proclaimed himself sultan in Damascus. To meet this challenge, Kalavun marched into Syria with a considerable army, which engaged Sunqur and his supporters in battle at Jasura, south of Damascus, on 21 June 1280.[111] Sunqur was routed and fled to the north; in desperation he sought aid from the Mongols. Kalavun announced his victory in Damascus and granted amnesty to its citizens as a means of consolidating his rule. Meanwhile Sunqur took refuge in the castle of Saone, a major fortress that the Crusaders had lost to Saladin in 1188. Kalavun marched northward toward Shaizar on the Orontes, which he besieged in October 1280 and successfully forced its surrender.[112]

Meanwhile, the Mongols, responding to Sunqur's appeal for help and following their own interests in attacking the Mamluks, organized an army that marched into northern Syria. By mid-October the Mongols arrived at Aleppo, but found the city empty; the citizens had fled south. At the same time Kalavun had made contact with Sunqur, "who was entreated to join in the defense of Islam." As Northrup says, "He could not but consent." Sunqur was reconciled to the new sultan and Kalavun sent military contingents after the Mongols, who now retreated precipitously to the north. After this successful foray, Kalavun returned to Cairo in November/December 1280, but he knew the Mongols would return.[113]

Why the Mongols had not pressed their attack in 1280 before Kalavun had fully established his rule in Syria is not clear. However, perhaps sensing a lost opportunity could still be made good, the Il-Khan, Abaga, attempted once again to create a Crusader–Mongol alliance against the Mamluks. A Mongol ambassador had been sent to the Crusaders in Acre in the fall of 1280, proposing that they join with the forces of the Il-Khan in a massive attack Abaga was planning in the spring of 1281. Nevertheless, when Kalavun returned to Syria in March/April 1281, Crusader envoys approached him there, seeking to renew the ten-year truce they had signed with Baybars, and wishing to negotiate security for the Castle of Margat. Kalavun therefore realized that the Crusaders were opting out of the Mongol alliance for the present, so he proceeded to conclude a treaty with the Hospitallers of Acre, which included Margat, on 2 May 1281, and similarly he concluded a truce with Bohemond VII for Lattakia and 'Arqa on 5 July.[114] These treaties largely secured his western flank and enabled Kalavun to focus on the coming Mongol attack from the north.

It was also during these negotiations that Kalavun learned of a serious plot to assassinate him initiated by one Sayf al-Din Kunduk, an official whom Kalavun had demoted when he came to power. The sultan acted decisively when, amazingly, "he received a letter from the Franks in Acre informing him that Kunduk had advised them not to negociate peace with the sultan in view of his imminent assassination and the benefits to them of postponing negotiations." The conspirators were summarily executed, a unique instance in his reign when rivals were put to death, but it was an effective signal that Kalavun was fully in control.[115]

The Mongols reentered Syria from two directions.[116] One army came from Anatolia, led by the brother of the Il-Khan, Manku Timur; the other led by Abaga himself, crossed the Euphrates. A captured Mongol informant estimated their strength at eighty thousand men. They were joined by Armenian troops under Leo III, and with him a contingent of Hospitallers from Margat.[117] Kalavun organized his army at Damascus and then marched north to Homs.[118] Sunqur joined them from Saone, now apparently fully reconciled with the sultan. The battle was joined on 29 October 1281. The Mamluks stood their ground in the center and, when Manku Timur was wounded, chased the Mongols in retreat. Meanwhile their right wing dealt a heavy blow to the Mongols as well. On the other side, the Mongols overpowered the Mamluk left wing, but in the confusion of the battle became disorganized, and when they were informed of Mongol defeat on their other wing, they failed to attack a second time and beat a hasty retreat. Kalavun sealed the victory by sending a Mamluk force after them.[119] When the battle was over, Roger of San Severino is reported by one Muslim source to have come to his camp to congratulate Kalavun in person.[120]

The battle of Homs in 1281 was the third great victory by the Mamluks over the Mongols, following Ain Jalud in 1260 and Albistan in 1277. It was also the first great military victory for Kalavun, who personally led his troops into battle, enhancing his reputation as a warrior and further strengthening his consolidation of power.[121] Homs was a major turning point for the Mamluks in Syria because, although they did not realize it at the time, it would be the last major battle Kalavun would fight against the Mongols. The sultan and his army withdrew back to Egypt. The Mongols recrossed the Euphrates. "The great river remained the frontier between the two Empires."[122]

From the time of Baybars's death to the aftermath of the Sicilian Vespers, it was mainly business as usual for the Latin Kingdom and the County of Tripoli. Although the Franks rejoiced when Baybars died, if they understood how preoccupied Charles was with his plan to attack Byzantium, and the Mamluks were with the transfer of power and with their Mongol enemy, they were not able to respond to and capitalize on this respite.

In Acre, Charles of Anjou ordered Roger of San Severino to maintain an alliance with the Venetians and the Templars and a truce with the Mamluks. Thus, when the Mongol Il-Khan proposed an alliance in 1280 he was met with indifference, except on the part of the Hospitallers. Meanwhile the poisonous political squabbling continued, partly because the feudal lords were unhappy with Roger as the *bailli*. However, when Hugh III came to Tyre in 1279 hoping to assert his authority and oust Roger with the help of the barons, only John of Montfort openly supported him. In Acre the Templars stood fast with Roger and no one else was willing to oppose him. After four months, when his knights completed their mandatory service and returned to Cyprus, Hugh was forced to follow, having accomplished nothing.[123]

Having failed in 1279, Hugh III made another attempt in 1283. In the wake of the Sicilian Vespers and the recall of Roger of San Severino, he hoped to win new support. Arriving in Beirut with 250 knights at the beginning of August, he proceeded by ship to Tyre, while his army marched down the coast to join him. Although he arrived safely, his army was attacked by Muslims en route, the targets of an ambush instigated by Templars at Sidon, so Hugh believed. When he entered the city, the Templar of Tyre reported two disturbing events:

> The day he arrived in Tyre, his personal banner with the Lusignan arms fell into the sea. As he landed at the entrance to the town, the Jewish Torah was carried out to meet them, as is the custom which they perform for the king. As a Jew named Samuel the Doctor was following the Torah, he collided with the cleric who was carrying the cross before the procession, so that the cross, which was so high fell onto this Jew, and broke his head.[124]

On top of this no one from Acre came to welcome him. Eudes Poilechien the *bailli* had just concluded a truce with the Mamluks in June, and he was staunchly supported by the Templars, as they had supported Roger of San Severino before him. Edbury proposes that Hugh did not try to impose his authority by force because he feared possible Mamluk intervention, not to mention the fact he no doubt did not want to risk open warfare with the Templars. When his knights returned to Cyprus after their time of service expired, Hugh stayed on in Tyre, but to no avail. Less than a year later, on 4 March 1284, he died there still hoping to find a way to retake power. His eldest son became king as John II, crowned in Nicosia in May 1284, but he never left Cyprus to come to the Holy Land.[125]

Farther north, in Tripoli between 1277 and 1282, the internecine conflict was even worse.[126] Bohemond was quarrelling with Guy II Embriaco of Gibelet over arrangements for the marriage of a local heiress. Guy sought the protection of the Templars. So violent did this dispute become that Bohemond and the Templars came to open warfare. Bohemond attacked Templar property in Tripoli, and the Templars retaliated by burning the castle of Botron. Bohemond tried to attack Gibelet, but a battle ensued near Botron with massive casualties. The count was defeated and his cousin, Balian of Sidon, who was also Guy's brother-in-law, was killed. Following this there was a year's truce, but then hostilities broke out again. Bohemond was defeated in another battle. Guy now wanted to exact full revenge by taking Tripoli. In January 1282, he entered the city in secret with his men, but when plans fell apart he was discovered and captured by Bohemond. Bohemond blinded his men, and then Guy and his close relatives were taken to Nephin just south of the city, buried in the dirt up to their necks, and left to starve. This story is shocking in many ways. Not only does it indicate what appalling violence was being resorted to among the Franks, and their willingness to indulge in outright civil war further fragmenting the body politic, but also it demonstrates how oblivious the Franks all seemed to be to the danger without. The Crusaders truly seem to have grown accustomed to a kind of coexistence with their enemies associated with a false sense of security.[127]

It is not surprising in circumstances like these that the Crusaders were not receptive to overtures from the Mongol Il-Khan for an alliance against Kalavun and the Mamluks in the fall of 1280. It is also not surprising that in the spring of 1281 Roger and Bohemond sought to renew their truces with the Mamluks and even warned Kalavun of a conspiracy against his life in the process, as we have mentioned. It is perhaps surprising that the Crusaders, in the persons of the Hospitallers at Margat, were willing in the fall of 1280 to risk the fragile peace and their own security by conducting isolated raids against the Mamluks. It is perhaps surprising that we should be surprised, however, because these Hospitallers seemed to be the only Crusaders who, not only still clearly identified the Muslims as their enemies, but also acted accordingly with military action. Nonetheless, these Hospitallers would pay for their truculence and independence.

The Fall of Margat Castle

It is clear that the Hospitallers in the north, with their headquarters at Margat, acted much more aggressively during the thirteenth century.[128] Now, late in the century, however, their actions were framed by the ten-year truce of 1271, agreed on after the fall of Crac des Chevaliers.[129] They clearly broke this truce in 1280 when they conducted a raid into the Buqaia Valley nearly to the walls of Crac des Chevaliers just when the Mongols had occupied Aleppo. When Kalavun sent a Mamluk contingent against them, the Hospitallers were able to drive them off south of Margat near Maraclea. Kalavun was focused on the Mongols at this point, however, and so was content simply to renew his truce with the Hospitallers, including those at Margat, on 12 May 1281.[130] Meanwhile, the Hospitallers continued to break the truce when some of their men fought with Leo III and the Mongols at Homs in October 1281. Again when Kalavun sent Mamluk troops from Crac des Chevaliers to punish them in the winter of 1282, they were driven back in a snowstorm. "The unrepentant Hospitallers continued to raid the surrounding country."[131] Kalavun took notice.

When news of the Sicilian Vespers arrived in the Near East, the Mamluks were relieved. Now, other than possibly Edward I of England, there was no Western figure they feared might have the power and the wherewithal to mount another Crusade to the Levant in the immediate future. On 3 June 1283 Kalavun concluded yet another truce with the Crusaders, dealing with Acre, 'Atlit, and Sidon. This time it was signed by the new *bailli*, Eudes Poilechien, who assumed the position when Roger of San Severino was recalled by Charles of Anjou; William of Beaujeu, the master of the Templars; Nicholas Lorgne, the new master of the Hospitallers; and marshal Brother Conrad, lieutenant master of the Teutonic Knights. Tyre, Beirut, and of course, Margat, were excluded. With this truce in place, Kalavun apparently had started contemplating a serious campaign against Margat.[132]

His attention was directed to Margat Castle, not only because it remained as a conspicuous thorn in his side, but also especially because of developments with the Mongols. The Il-Khan, Abaga, had died in April 1282, and was succeeded by his brother, Tegüder. Though born a Nestorian, he embraced Islam after taking the throne, styling himself Ahmad Takudar and calling himself sultan. His reign was short-lived, however, because he was murdered in a court conspiracy in August 1284, and Abaga's son, Arghun, became the new Il-Khan immediately. Arghun was a much more able and formidable leader than Tegüder, and he wished to revive Abaga's ideas of constructing a Mongol–Christian alliance against the Mamluks. Kalavun could see that to deal with the new threat, he needed to eliminate the Hospitallers at Margat, who had so brazenly joined forces with the Mongols against him in the past.[133]

In late February or early March 1285, Kalavun left Cairo en route to Damascus, where he directed military operations all during March. Weapons and equipment along with siege engines were stockpiled in Hama. Army groups were organized and dispatched without anyone knowing where they were headed. By this means Kalavun, like Baybars had done before him, was able to use the element of surprise. He suddenly appeared before the walls of Margat on 17 April 1285.

The Castle of Margat presented a formidable challenge not only because of its large size and impressive walls, but also because of the steep drop-off all along its more-or-less triangular-shaped perimeter.[134] The castle occupies a plateau on the pinnacle of a ridge line overlooking the Mediterranean, just south of Valenia, about thirty-two kilometers north of Tortosa on the coast. In 1212 Wilbrand von Oldenburg had visited the castle and commented:

> It is a huge and very strong castle, defended by a double wall and protected by several towers. . . . The Hospitallers provide for 1,000 people there apart from the garrison. . . . The provisions stored there are sufficient for five years.[135]

It was important because not only was it the most powerful Crusader castle along the coast between Tortosa and Lattakia, but also it was the place where the bishop of Valenia had located his see since the early part of the century. For the Hospitallers it served as their northern headquarters and its historic significance was that a great chapter had been held there in 1206, which had defined them as a military order.[136] No doubt it was well garrisoned in 1285, but we do not know exactly how many defenders there were.

The Hospitallers were well prepared for the assault, but Kalavun had assembled a powerful attack force with the largest number of siege machines yet seen in the Crusader East. The Templar of Tyre only tersely reports the fall of the castle, but a Muslim source gives a detailed account of what happened: "Immediately the catapults were brought up, carried on men's shoulders, and the fort was surrounded by a murderous circle of weapons. . . . These began a formidable, murderous assault with stones while excavations were started on each side to undermine the walls."[137]

The Hospitallers fought stalwartly. They used their own catapults to destroy many deployed by the Mamluks. For a month the Mamluk army maintained their siege and continued mining operations with little evident progress. It was not until 23 May that the main mine was fired and the enormous round tower at the south end of the castle collapsed. The Hospitallers drove back the invaders, but when they discovered the extent of Mamluk mining operations,

> they lost their courage and presence of mind and gave themselves up for lost. They thought that they were trapped, and asked that their lives should be spared in exchange for their surrender,. . . . They begged our Lord the Sultan to show mercy and pardon them.[138]

Kalavun accepted their surrender and agreed to spare the garrison. The twenty-five highest officers were granted horses, mules, and their equipment in exchange for a ransom payment. The rest of the men were given their lives, and they were all accorded safe-conduct to Tortosa, from which they went south to Tripoli. The sultan's banner was raised over the battlements on 25 May 1285. He took possession of the castle the next day. The decision was made to repair and garrison it "for the destruction of the infidels and the support of the neighbouring castles." Kalavun stationed 1,000 footsoldiers, 400 support troops, and 150 Mamluks there. The emir in command was given control over the entire area from Margat to Antioch.

With the fall of Margat, now called Marqab in Arabic, there was no major castle left in Hospitaller hands, and their main headquarters was now only in Acre. The Hospitallers at Margat had fought the Mamluks with vigor. Jonathan Riley-Smith summarizes their operations this way:

> [Indeed] the garrison of Margat continued to take the initiative right up to the fall of the castle in 1285. The Hospitallers "showed an incredible insolence. Their ravages and raids in the surrounding territories had spread such terror that the inhabitants of the neighbouring fortresses were shut up as if in prison or more as though in a tomb."[139]

The loss of this castle meant the loss of this territory and the loss of the Hospitaller presence in the north. It also raised in the minds of some Crusaders what Kalavun planned for the future.

Kalavun's plan began to unfold in the days immediately following the capture of Margat Castle. Kalavun precipitously attacked the island fortification of Maraclea, offshore opposite the town, about fourteen miles south of Marqab, and sixteen kilometers north of Tortosa. Our main Muslim source describes it as follows:

> This fort . . . faced Maraqiyya [Maraclea] from a position in the sea, two bow-shots or more from the shore. It was almost square in shape; each side was twenty-five and a half cubits long, with walls seven cubits thick. It had seven storeys and was built on ships loaded with stones and sunk in the sea. . . . It had a garrison of a hundred. Behind it and attached to it was a small second fort defended by three mounted catapults. The place was in effect unassailable by siege or blockade.[140]
>
> Kalavun had realized that he could not attack the castle in the conventional manner and "that the Muslims had no fleet strong enough to cut the supply-lines and prevent traffic reaching the fort . . . . and that wit and not force was the agent necessary to its conquest."[141]

Accordingly he sent the following threat to Count Bohemond VII of Tripoli:

> either you demolish it or we shall take so much of your territory in revenge that the Lord of Maraqiyya will be of no help to you.[142]

Bohemond, fearing for the safety of Tripoli and what remained of his county, chose to surrender the fort and demolish it:

> The Prince sent a certain number of Franks to help with the demolition, by which means the word of God was fulfilled: "They cast down their dwellings with their own hands, and with the hands of the believers". (Koran, lix, 2) . . . Stone by stone it came down.[143]

Kalavun had now driven a fatal wedge between Tartus and Lattakia. Some of the Franks who were forced to dismantle this fort may have shuddered to think of what lay ahead.

Meanwhile Kalavun also imposed a major treaty on Leo III farther north in Cilicia. Following the retreat of Armenian forces after the Mongol defeat at the battle of Homs, Kalavun had not attempted to pursue them personally. However, in 1283 and 1284 he had ordered one of his favored Mamluks, Qarasunqur al-Mansuri of Aleppo, to attack Cilician Armenia, not only to punish the Armenians, but also to gain access to the wealth of natural resources in Cilicia – wood and iron – and to gain control of the port of Ayas. Ayas had been rebuilt since it was devastated in 1266, and again in 1275. Marco Polo had passed through the city in 1271, commenting that it was "a city good and great and of great trade," and noting that "all the spicery and the cloths of silk and of gold and of wool from inland are carried to this town.... And the merchants from Venese, from Pise, and from Jene and from all inland parts come there and buy them and sell their own things, and keep their warehouses in that city."[144] It was also now a major venue for the slave trade with Turkestan that the Mamluks depended on. "Since the Mongols did not possess their own port on the Mediterranean, the Armenian port of Ayas was the most important outlet for the transmission of goods coming from the Mongol lands to Europe,"[145] not to mention Mamluk Alexandria.[146] By the usual ten-year truce concluded on 6 June 1285, Kalavun agreed to peace, but he exacted a heavy annual tribute and guarantees for secure passage through Cilicia for Mamluk commerce, including especially the slave trade from Turkestan in which the Genoese were also involved.[147]

The Fall of Tripoli

The year 1285 was a turning point for the fate of the Crusaders in the Holy Land. One factor was that there was a wholesale change in the *dramatis personae* who had wielded power up to this point. Charles of Anjou died in January and was succeeded by his son, Charles II. Pope Martin IV died in April and was succeeded by Honorius IV five days later. Philippe III of France and Peter of Aragon also died later that year. In the East, King John II of Cyprus, who had succeeded his father, Hugh III, died on 20 May. John's fourteen-year-old brother, Henry, succeeded him and was crowned in Nicosia in June 1285.

Changes in priorities, interests, and policies by the new leaders were another factor. It rapidly became evident that Angevin and papal interests would be focused entirely on the war in Sicily, where James the younger brother of Alfonso, who succeeded Peter of Aragon, was declared king of Sicily by the Sicilians, and immediately excommunicated by the new pope! Meanwhile the agenda of the new king of France, Philippe IV, crowned in October 1285, was also quickly identified. Although it has been said Philippe IV pulled out of Palestine completely, in fact what he did was to refuse the "custodia Terre Sanctae" offered to him by the pope.[148] Like Philippe II and Henry II before him, Philippe IV could not accept full responsibility for management of the Holy Land. He did, however, resume paying for the French regiment, commanded first by Eudes Poilechien and then by Jean de Grailly. In sum, although the problems of the Crusaders in the Holy Land were being pushed aside in some corridors of power in Europe, but not others, in the Crusader Levant itself these problems were top priority, and also in Cairo, where Kalavun was now fully in power.

In these circumstances, the new king of Cyprus, Henry II, sent his envoy to Acre, one Julian le Jaune, to open discussions with the lords and the Templars. His claim to be the new king of Jerusalem was supported by the Hospitallers and the Teutonic Knights. The demise of Charles of Anjou and the fall of Margat seemed to indicate that the Latin Kingdom needed a resident ruler. Not only was William of Beaujeu, master of the Templars, willing to change his political allegiance, but also the lords of Acre "acquiesced."[149] Only the *bailli*, Eudes Poilechien, refused to relinquish his position without instructions from his new king, Charles II, and he was supported in this by the French regiment, which was sponsored by the French king.[150] When his envoy reported on the situation, Henry II prepared to come to Acre to resolve it.

Henry II arrived in Acre on 4 June 1286, a year after he was crowned in Nicosia; the people of Acre welcomed him enthusiastically. Nothing like this had been seen since Louis IX sailed into the harbor at Acre in May 1250. The leaders of the three major military orders were conspicuously absent, however, maintaining public neutrality according to their religious vows, they said, but their good offices would be needed shortly. After officially being welcomed in state at the Church of the Holy Cross, Henry indicated he would lodge in the citadel as previous resident kings had done. When Eudes Poilechien and the French regiment refused to hand over the citadel, Henry blockaded them inside and there was an awkward standoff. On 27 June, as their food was running low, Henry sent the French regiment a message. Henry proposed that the regiment leave with no reprisals, but that if it became known that their sponsor, the king of France, explicitly wished them to occupy the citadel, they could return. Now the masters of the three military orders also stepped in. They persuaded Eudes Poilechien to leave, and gave it to Henry. He officially occupied the citadel on 29 June 1286.[151]

Despite, or maybe because of this contretemps, the coronation of Henry II was celebrated with extraordinary pomp and circumstance. It was a moment of high pageantry and rare unity for the Latin Kingdom. On the Feast of the Assumption of the Virgin, 15 August 1286, Henry II was crowned king of Jerusalem in the Cathedral Church of the Holy Cross at Tyre, by Bonacursus de Gloire O.P., archbishop of Tyre, acting in lieu of the patriarch, Elias, who was at this time in Rome.[152] It was the first royal coronation there since that of Hugh III in 1269, and before that, of John of Brienne in 1210 and Isabel of Brienne in 1225.[153]

After the ceremony was over in Tyre, the royal party moved back to Saint Jean d'Acre, where the new king was fêted with feasts and jousts and many entertainments. For fifteen days there was "la feste la plus belle que l'on sache. c. ans," the most wonderful celebration seen in a hundred years! The Templar of Tyre, who must have been present at the festivities, describes a variety of spectacles that took place in the great hall of the *Auberge* of the Hospital of the Knights of St. John. Tableaux were enacted by the knights of Acre from the story of King Arthur and the Knights of the Round Table, with Lancelot, and Tristram and Palamedes, along with other knightly romances. There were scenes from "la raine de Femenie," that is, the Queen of the Amazons from the Romance of Troy, including "chevaliers vestus come dames & josteent ensemble; puis nounains quy estoient avé moines & bendoient les uns as autres." There were also many other "jeus biaus & delitables & plaissans."[154]

It was during these celebrations, as Hugo Buchthal argued in 1957, that a magnificent illustrated manuscript may have been presented to the new king, a present from the Crusader lords.[155] It was a *Histoire Universelle*, the text that combined biblical and secular literary stories in an attempt to give a continuous narration of world history from Creation to the time of Julius Caesar.[156] One of the features of this book is its stories of the Amazons, which became very popular in Acre in the 1270s and 1280s.[157] Taking into consideration the extraordinary features of this codex, with its remarkable frontispiece based on Arabic manuscripts of the school of Baghdad, with its wonderful illustrated stories of the great heroes and heroines of antiquity, such as Joseph, King Ninus, Heracles, Alexander, and the Amazons, and with the blending of French and Byzantine style by a group of at least six high-quality painters, this is clearly a commission of *grande luxe* unique to Acre. Buchthal brilliantly proposed that "it was presented to King Henry by the military aristocracy of Acre on the occasion of his coronation, and to commemorate the pageantry staged in his honour."[158]

The celebrations in honor of the boy-king, Henry II, briefly diverted everyone from the ominous clouds of danger on the horizon. No one in Acre at this time seemed to be concerned with Kalavun and the Mamluk threat; no one was thinking about, or possibly even yet knew about, the alliance the new ruler of the Mongols, Arghun, was attempting to construct by sending letters and enyoys to the leaders of western Europe.[159] No one could foresee that the youthful King Henry II would be stricken with epilepsy, the first Crusader ruler since Baldwin IV and his leprosy to be faced with debilitating disease.[160] Charles II, the new king of Sicily, would not be able to contest Henry II's right to be the new king of Jerusalem for the time being, but he and his descendants would not relinquish their claim to the crown. No one could imagine what a mockery this midsummer festival would seem to be in five years, or even three years hence. However, shortly after the celebrations were over, politics and business returned to normal – the new king on the advice of his uncles, Philip and Baldwin of Ibelin, left Acre and returned home to Cyprus. They understood that having a resident king was no longer popular. From hindsight, it seems to have been an omen for the future. Before his departure, Henry II appointed Baldwin of Ibelin to be his new *bailli*; the confrontation with Eudes Poilechien over the citadel was now forgotten.[161]

The fate of Acre, Tripoli, and the fragmentary remains of both the Latin Kingdom and the County of Tripoli was seemingly now in the hands of larger more powerful forces in the East; Kalavun the Mamluk sultan on the one hand and Arghun, the Mongol Il-Khan, on the other. However, for the moment, the citizens of the Latin Kingdom could look to the future with positive and hopeful thoughts. Once again a Lusignan king was reigning in both the kingdoms of Cyprus and Jerusalem. Acre at least was in 1286, and had been since the truce of 1272, more or less at peace with the Mamluks.

Despite the vulnerable position of the Latin Kingdom along the coast with loss of all major inland castles, the County of Tripoli was in even more precarious circumstances. With Kalavun's attention recently drawn to the north because of the Mongols, the Armenians, and Mamluk commercial access to the Black Sea, the continued presence of Sunqur al-Ashqar at Saone castle, and the sultan's recent successes at Marqab and Maraclea, it is not surprising that he moved next against the Crusaders in the County of Tripoli.

To prepare the way, and before embarking on any larger objective, in the winter of 1286/7, the sultan decided that dissidents and rivals for power must be dealt with. In northern Syria this meant removing the unreliable Sunqur al-Ashqar from Saone. At the beginning of 1287, Kalavun sent another of his trusted Mamluks, Turuntay, to besiege the castle. Before beginning his assault, Turuntay proposed that Sunqur lay down his arms in return for receiving the sultan's pardon and reconciliation. When Sunqur initially refused, Turuntay ordered his troops to attack. Realizing quickly that despite the defensive strength of the castle, his troops were no match for his attackers and their equipment, Sunqur al-Ashqar agreed to surrender. In late April 1287 Sunqur turned over the castle, and so Saone fell a second time – in the first instance the Crusaders surrendered the castle to Saladin in 1188, in this instance a Mamluk emir surrendered it to a Mamluk representative of a Mamluk sultan in 1287.[162] In any case, true to his word, Kalavun treated Sunqur honorably when he returned to Cairo, and he became a counselor and companion of the sultan. The castle of Saone was thereby incorporated into the Mamluk province of Northern Syria.

It was during this period that Kalavun and the Mamluks were also the beneficiary of good fortune in their campaign to conquer the remaining Crusader holdings in Tripoli. On 22 March 1287, Lattakia had suffered a serious earthquake, which destroyed a significant part of the fortifications of the town. Seeing an opportunity here finally to seize control of this important port city that was now only an isolated Crusader enclave, Kalavun apparently claimed Lattakia, formerly part of the Principality of Antioch, was not effectively covered by his recent truce with Tripoli.[163] In fact, according to the text of the truce of 1281 Lattakia certainly was written explicitly into the treaty.[164] Whatever the sultan may have claimed, he understood how vulnerable the Crusaders there were after the earthquake and he ordered his emir, Turuntay, to attack the city. When the defenders fell back to a stronghold at the mouth of the port, the Mamluk emir widened the causeway to enable his army to fight more effectively. The Crusader garrison was forced to capitulate on 30 April 1287.[165]

Then a few months later, on 19 October 1287, Bohemond VII died at age twenty-six.[166] Although he had become count at the tender age of fourteen, he had grown into the position rapidly and Tripoli had had strong leadership by a resident ruler. Now that he had died without issue, the Lady Lucie, his younger sister, was the heir apparent.[167] She alas was living in Apulia, however, with her husband, Narjot of Toucy, who formerly had served Charles of Anjou as his admiral. Not attracted by the prospect of an absentee and essentially unknown relative, who moreover was married to an Angevin officer, assuming the rule, the Crusader lords turned, not to Bohemond's other sister, Marguerite of Antioch-Lusignan, the next in line, but to Bohemond's mother, Sibylle of Armenia, as had happened in 1275 when Bohemond VI died. Just as she had done then, Sibylle, the dowager countess, living in Tripoli, once again sought the consent of Bishop Bartholomew of Tortosa to act as her *bailli*. However, times had changed and Bartholomew was no longer in favor. When Sibylle's letters to Bishop Batholomew fell into their hands, the lords took action. Here begins another classic story of Crusader disorganization, fragmentation, and at times blind self-interest on the part of many factions, which is largely told by the Templar of Tyre. They (the lords) went to the countess and explained that the bishop was their enemy. Bishop Bartholomew was hated because he had been involved when Bohemond VII had killed Guy II Embriaco of Gibelet in 1282. Then, they consulted together and sent for Benedetto Zaccaria to come to Tripoli.[168]

Benedetto Zaccaria has been called "Genoa's most famous entrepreneur," "a naval commander," "merchant," indeed "a merchant pirate," and he was clearly a man of great stature, wealth, and experience.[169] When he arrived from Genoa early in 1288 he found not only that the Commune of Tripoli had come into being, elected their own mayor, Bartholomew Embriaco, and set aside the dynastic claims of Bohemond's family to rule, but also he found that Lucie had arrived at Tripoli to claim her inheritance and departed, while Sibylle discreetly had withdrawn to live with her brother in Cilician Armenia. Lucie had installed herself briefly in the little castle at Nephin with the support of the Hospitallers, where she issued her claim to rule Tripoli. The Commune in reply had denied her claim, going into detail over their grievances with regard to the ruling dynasty,[170] and put the city of Tripoli under the protection of the Genoese. She had then retreated to the city of Acre.[171]

The citizens of Tripoli watched as the struggle for power unfolded, a struggle with wider implications, not only for Tripoli but also all of the Latin East. Before Benedetto Zaccaria had arrived, the master of the Temple, the master of the Hospitallers, the master of the Teutonic Knights, and the *bailli* of the Venetians were attempting to effect a viable resolution to this situation. It was they

> quy estoient dehors les portes de Triple en tentes & pavelions herberges, & estoient venus por metre acort entre la seur dou prince, dame Lusie, & les gens de Triple.

However, when they saw the Genoese galleys approaching, they

> s'en vindrent à Acre sans rien faire.[172]

In this situation, Benedetto Zaccaria, remembering what bad relations the Genoese had had with the counts of Tripoli, especially Bohemond VII, seized the moment. He recognized the Commune of Tripoli, arranged a treaty giving Genoese merchants control of more streets in the city, and a podestà to govern their people in the city, as the Templar of Tyre reports.[173]

Meanwhile Bartholomew Embriaco had regained control of Gibelet through the marriage of his daughter Agnes, to the son, Peter, of Guy II Embriaco. In the wake of his becoming mayor of the Commune at Tripoli, and this marriage, he then began actively exploring the possibility of replacing the countess of Tripoli as ruler of the entire county.[174]

After these developments, Zaccaria went to Ayas to arrange a Genoese commercial agreement with the king of Armenia. It was clear that his goal was to strengthen the Genoese maritime trading empire by expanding their presence in the eastern Mediterranean. At this moment, Zaccaria seemed intent on making Tripoli the centerpiece of their holdings, instead of Tyre. By combining that with their privileges at Ayas, the Genoese could control the north–south coastal commerce in the eastern Mediterranean, especially the slave trade upon which the Mamluk sultanate relied.

In Tripoli the citizens watched with concern. They were faced with the claims of the Countess Lucie, the growing ambition of Bartholomew Embriaco, and the expanding power of the Genoese. The Commune apparently decided neither they nor Bartholomew could any longer control the situation themselves, so they opted to reopen negotiations with Lucie, without consulting the Genoese. When Lucie received their letter, she perceptively sized up the situation and decided to contact Benedetto Zaccaria in Ayas for consultation.[175] Zaccaria returned to Tripoli and went to Tyre, where he invited Lucie to come from Acre for discussions. Benedetto was not interested in the rule, and if she would agree to recognize the Genoese podestà in Tripoli and the Commune, and guarantee their rights and privileges, he would acknowledge her as the countess of Tripoli. Lady Lucie agreed to these terms, and accordingly she finally became the countess of Tripoli in 1288.

In Cairo Kalavun was watching these developments with great interest and with growing involvement. In the first instance, he had been contacted by Bartholomew Embriaco, to see whether the sultan would support his bid to become the new count of Tripoli. He had also been contacted by the Venetians, who, anxious to maintain their strong commercial position in Syria against the Genoese threat, sought an accord with the sultan, which was duly signed on 26 November 1288.[176] The Templar of Tyre also reports that two persons came from Alexandria to speak to the sultan.[177] These "two persons," who are not identified – Richard says they "may have been Genoese from the party of Bartholomew of Gibelet, or Pisans, or Venetians"[178] – warned Kalavun about the growing threat to Alexandria posed by the strengthening of Tripoli as a Genoese naval base.

In sum, this is a version of "the old familiar story of failure to unite and to bury mutual grievances in the face of an overwhelming danger, ... The Italians were no worse offenders in this respect than were the nobles of the crusading states or the members of the military Orders. In 1289 [sic], when Benedetto Zaccaria came with a Genoese fleet to the relief of Tripoli he became involved in the civil war going on between the commune of the city and the Countess Lucie which destroyed the unity of the defense and made the city an easy prey to Kelaoun."[179]

Elsewhere it was during 1287–8 that the Mongol Il-Khan, Arghun, who was known to Marco Polo, sent his special envoy, Rabban Sauma, to the West, someone Marco Polo apparently did not know. Rabban Sauma was an extraordinary man, a Nestorian Christian monk of Turkic stock from the region of Beijing, China, who had come to the Near East to visit Jerusalem but who had ended up working for the Nestorian patriarch of Baghdad, Mar Yahbhallaha. When the Il-Khan, Arghun, determined that letters were ineffective and that he must send an ambassador to seek help from the kings of Europe, he asked the patriarch to select someone willing and able to carry out this mission. Rabban Sauma was duly chosen and became Envoy Extraordinary and Plenipotentiary of Arghun Khan.[180]

The story of this amazing embassy has been told elsewhere and the full details need not be rehearsed here.[181] Suffice it to say that Rabban Sauma traveled westward starting early in 1287, sailing from Trebizond to Constantinople, then to Naples and Rome. Pope Honorius IV had died just before his arrival, so he moved on to Genoa, where his appeal was given careful attention. Then he went to France, where he was warmly welcomed, given a promise by King Philippe IV that he would take the Cross at some unspecified time and lead an army to retake Jerusalem, and a French ambassador was named, one Gobert de Helleville, to accompany him back to the Il-Khan. From Paris he visited Edward I in Bordeaux, and then went back to Rome via Genoa to meet the new pope, Nicholas IV, during Holy Week of 1288. The pope received him warmly as a Christian, invited Rabban Sauma to join him in the papal celebrations of Holy Week and Easter, showered him with relics and gifts, and had letters prepared for the Il-Khan and the Nestorian patriarch, among others. However, Nicholas gave no commitments with regard to a Crusade. Rabban Sauma's visit to Europe had been a personal triumph but a diplomatic failure. As he passed through Genoa on his return journey to Rome, he voiced his frustrations to the cardinal of Tusculum, "When I go back, what shall I say and what answer can I make to the Mongols on my return?"[182]

When Rabban Sauma did return later to the court of Arghun in Persia, the Il-Khan was amazed by the indifference – or was it suspicion – and lack of interest in the proposed alliance to liberate Jerusalem that his envoy had met with in the West. Nonetheless he was very grateful to Rabban Sauma for his good offices and appointed him as his Nestorian chaplain. Indeed, he said, "'we have made thee to suffer great fatigue, for thou art an old man. In future we shall not permit thee to leave us; nay, we will set up a church [a religious tent] at the Gate of our Kingdom [entrance to his royal tent], and thou shalt minister therein and recite prayers.'... And the king took care that reverend men, and holy Fathers [bishops], and priests, and deacons, and monks, should keep vigil in the church and recite the offices, and that the beater of the board [a semantron to call Christians to prayer] should never be idle in that church."[183]

The Il-Khan, Arghun, though disappointed, did not give up. In the spring of 1289, and then in the winter of 1290–1, he sent two further embassies with detailed letters, but it was all for naught. The leaders of western Europe were too preoccupied with the war in Sicily to commit themselves to another Crusade. However, this potential alliance, as it turned out, was the last great opportunity to save *Outremer*.

It is unlikely that the Crusaders in Tripoli or Acre knew about Rabban Sauma's embassy to western Europe in 1287–8 on behalf of Arghun, but it is quite possible and very probable that Kalavun was aware of it.[184] With regard to the relative threat to Mamluk interests, the developments that had put the Genoese in power in Tripoli and in Ayas and the potential for their cooperation with Arghun, along with his hope for a larger Christian alliance, were apparently now viewed in Cairo as too dangerous to ignore. Well informed on what had been going on in Tripoli, Kalavun began planning for his next major campaign.

The Mamluk army left Cairo for Damascus at the beginning of 1289. As he had done with the campaign against Margat, preparations had been made to assemble his troops in Damascus, and weapons and siege engines were stockpiled, all without disclosing his objective. Nonetheless, word of the new campaign leaked out to William of Beaujeu from an emir in the pay of the Templars. However, when William tried to warn the Countess Lucie, the barons, and the Genoese about the impending danger, no one paid him any serious attention. Then, at the end of March 1289, Kalavun's enormous army appeared before the city walls.

Crusader Tripoli was located on a promontory along the coast, known today as the coastal suburb, al-Mina. The walled city is approximately three miles from the inland castle, Mont Pelerin or Qal'at Sanjil, the latter in the hills above the city. Mont Pelerin is reported by Maqrizi to have been captured already by the Mamluks in 1267, during the time of Baybars.[185] It appears that Tripoli at the time of this attack found the castle occupied by the Muslims, hence its lack of mention in the accounts of the siege of the city,[186] whereas the fortified city, its off-shore islands and control of the sea were in the hands of the Crusaders. The Muslim sources refer to Tripoli as a wealthy city and well fortified.

Once the Crusaders realized how serious the situation was, all efforts were made to organize the defense of the city. Countess Lucie came from Nephin south of the city and assumed command with full authority as recognized by both the barons and the Commune. The Templar of Tyre gave a full report on who the defenders were.

> My lord Amaury of Lusignan (brother of king Henry II of Jerusalem and of Cyprus, who was called the Lord of Tyre and the constable of the kingdom of Jerusalem) came to Tripoli, bringing fine men-at-arms with him, knights and others. The Templar Marshal Geoffrey of Vendac also came there, as did Brother Peter of Moncada and Brother Reddecoeur, and many other Hospitaller brethren, and many knights and sergeants of the king of France. The Genoese had four galleys and the Venetian had two which arrived later. And the Pisans, who were enemies of the Genoese and of the men of Tripoli also came.[187]

The siege began about 17 March, according to the Templar of Tyre, or 25 March 1289, according to Abu l-Fida; in either case, right after the rainy season. Kalavun is reported to have used nineteen catapults. The Templar of Tyre says that the walls of the city were strong, and Maqrizi reports that "the thickness of the walls was such that three horsemen could ride their horses side by side along it."[188] The sultan, obviously acting on good intelligence reports, immediately targeted the Tower of the Bishop, which was the oldest and most vulnerable, and the Tower of the Hospital, which was newer and stronger, at the southeast end of the line of fortifications. The attack was relentless. As the battle went on certain noncombattants fled to Cyprus, the two Venetian galleys departed for Cilician Armenia, and then Benedetto Zaccaria and his Genoese ships also left. When the Mamluks saw that the defense was weakening, the sultan ordered his men to intensify their attack on 26 April.[189]

Forcing their way into the city, the Mamluk soldiers took the city by storm, after a siege of thirty-four days, on 27 April. The remaining citizens fled to the harbor, but only a few ships remained. Countess Lucie with Amaury of Lusignan, along with the marshal of the Templars, the commander of the Hospitallers, and John de Grailly, captain of the French regiment and seneschal of the Latin Kingdom, were able to sail to Cyprus.[190] Most other men died, and the women and children were captured for slaves. Some refugees who could not find a ship to board had managed to get in rowboats and make their way to one of the off-shore islands, where the Church of St. Thomas was located. The Mamluks relentlessly followed, swimming with their horses to the island. After the battle ended the author of one of the Muslim accounts, Abu l-Fida, said,

> I went by boat to this island, and found it heaped with putrefying corpses; it was impossible to land there because of the stench.[191]

Obviously Kalavun "did not show his usual mercy to the inhabitants."[192] Despite the horrendous killing, the Mamluks took many prisoners and because the city was prosperous – Maqrizi reports that the Mamluks found four thousand weaver's looms in the city – there was much booty.[193]

When the battle was over, the decision had to be made whether to spare the city. At Antioch, Baybars destroyed the city. In the cases of Crac des Chevaliers and Marqab, the castles were retained and repaired in order to be serviceable for Mamluk military use. At Lattakia the port was important to the Mamluks. Here at Tripoli, the Mamluks already held the inland castle. Kalavun did not apparently want to risk preserving the city and he was willing to sacrifice its port because, first, he wanted to do everything he could to cripple the naval power of the Crusaders militarily and commercially, and second, he did not want to give the Crusaders any incentive to attempt to return to this site. No contemporary source mentions it, but there was also the possible symbolic value here: The Mamluks had pushed the Crusaders into the sea and completely annihilated them. Abu l-Fida says, "the city, on the Sultan's orders, was demolished and razed to the ground."[194]

The Templar of Tyre concludes his account of this disaster as follows:

> And so this great calamity befell the city of Tripoli, as I have told you, and the sultan went out and devastated the whole area, so that you could not have found a single house standing. This is the reason why the Saracens built a place called Mont Pèlerin, which is less than a league from the sea above Tripoli. The town is called New Tripoli.[195]

The fall of Tripoli was a catastrophe for the Crusaders in the Holy Land on the same order of magnitude as the loss of Antioch in 1268. Not only did it signal the end of the County of Tripoli after 180 years of existence, and therefore was a major blow to the Crusader presence in the Levant, but it also showed that the Mamluks, with superior numbers of troops, powerful siege engines, and strong leadership, could bring down the most staunchly defended Crusader force, even without command of the sea. Naval power could not win these battles; in fact it could only provide safety for some of the refugees who could arrange to sail away.

Curiously, however, the fall of Tripoli caused hardly a ripple in the affairs of western Europe; relatively little notice was taken of it.[196] Only a few European writers bother to mention the capture of the city by the Mamluks. Among those that do, it is the loss of life that is deplored the most, with some estimates rising as high as forty thousand persons. Some chroniclers also mention the desecration of the churches and the destruction of relics. Tripoli for most of them was just another Crusader city in *Outremer*, and one without any notable Christian holy sites.[197]

The pope, Nicholas IV, took the fall of Tripoli more seriously of course, and he regarded a major Crusade as necessary to save the Latin Kingdom. However, in the circumstances, faced with the problem of the war in Sicily, he realized that a *passagium generale* was not possible, and that only a *passagium particulare*, which could be organized more rapidly, financed more easily, and accomplished with all deliberate speed, was practical. Somewhat surprisingly, the response even to this kind of appeal was disappointing, to say the least, and consisted mainly of Venetian and north Italian volunteers with commercial interests at stake. A fleet departed from Venice in the summer of 1290, and arrived at Acre in August, but it only consisted of thirteen galleys.[198]

Following the fall of Tripoli, Kalavun allowed the surviving Embriaco lord of Gibelet to remain in exchange for a large payment of tribute. However, he was forced to surrender all smaller fortresses in the area. The sultan also took Botron and other smaller forts not belonging to the lord of Gibelet. Before Kalavun left Tripoli, he negotiated with envoys from Cilician Armenia who sought assurance that he was not planning a new attack on them, despite the truce of 1285. Kalavun exacted more tribute from them. Then he went to Damascus in May 1289 and returned to Cairo.[199]

Perhaps the most curious reflection of the fall of Tripoli in Europe was a prophecy, which claimed to report a divine message seen in a vision experienced by a Cistercian monk.[200] This "vision" appeared first as a text as early as 1239 in Hungary, and Matthew Paris records it for that year. Here the text is generically and mysteriously, but unspecifically, prophetic. The first lines read:

> The high Cedar of Lebanon will be felled. Mars will prevail over Saturn and Jupiter.[201]

However, later, in a version written between 1289 and 1291, the text is revised in light of the disaster in the Levant and called the "Vision of Tripoli." It is characterized as a vision that occurred in the year 1287, and it is localized in the monastery of the Cistercians in the city of Tripoli.[202] It was there that a monk saying Mass saw a disembodied hand writing in gold letters on a white corporal on the altar the following words:

> The High Cedar of Lebanon will be felled [Psalm 29:5; Zachariah 11:1], and Tripoli will soon be destroyed. Mars will overcome Saturn, and Saturn will waylay Jupiter.[203]

No one had paid any attention to the peril of Tripoli and no serious effort was mounted to save the city before the Mamluk army was at the gates. Would the same fate befall Acre?

PILGRIMAGE TO THE HOLY LAND IN THE PERIOD 1268 TO 1289

Compared to the years before 1268, when we know that a certain number of pilgrimages were made to the Christian holy sites, but few detailed accounts remain, the situation is different after 1268. A variety of texts survive from between 1268 to 1289 that give us clear indication that pilgrimages to the Holy Land were still being undertaken and that visits to the traditional holy sites were being continued, but that certain new developments were occurring, which are reflected in and by the texts we have.

Of the four main texts we have chosen to consider, as the most important and/or the most representative of what there is, the first is written by the somewhat mysterious figure, Rusticien of Pisa.[204] Rusticien is of course the man whom Marco Polo credits with writing down his book, *The Description of the World,* while being in prison with him in Genoa in 1298.[205] As we have mentioned previously, Marco Polo was apparently in Acre at the time of Prince Edward's Crusade in 1271. It was during this visit that he seems to have made a few notes referring to the holy places for which we have a surviving account written by Rusticien.[206] We shall not go into the tangled thicket of scholarship pertaining to the critical edition of the text or the language in which the original book was written, but will accept here the French editions edited by Michelant and Raynaud, and the early English translations by Yule (1903)[207] and Moule and Pelliot (1938).[208]

The Polo brothers did not of course come to Acre primarily as pilgrims. They were merchants who had started as explorers and were then sent as envoys. Their mission in 1271 was to return to the Mongol Khan, Kubilai, with a message from the pope.[209] Acre was simply an early stop on their journey eastward, but part of their task for Kubilai was to bring him some holy oil from the Holy Sepulcher. The great Khan had requested this specifically, and the Polos arranged this with the papal legate in Acre.

> They ... asked his permission to go to Jerusalem to get some Oil from the Lamp on the Sepulchre, to carry with them to the Great Kaan, as he had enjoined. The Legate giving them leave, they went from Acre to Jerusalem and got some of the Oil, and then returned to Acre.[210]

Having obtained the oil, the Polos asked the legate for a message for the Great Khan, and then they set out. Shortly thereafter, when they reached Ayas in Cilician Armenia, they heard the news that the papal legate in Acre, Tebaldo Visconti, had been elected as the new pope, Gregory X, in September 1271. So they returned to Acre briefly to obtain new credentials, at which time two Dominican friars, William of Tripoli and Nicholas of Vicenza, were assigned to their party. They then all set off with the protection of the Grand Master of the Temple, Thomas Bérard.[211]

The significance of Marco Polo's book of travels only became evident much later than the dates of the adventures and the information it contains, in the fourteenth century and following, as awareness of it grew, but its importance for our discussion rests on the following points. First, it was possible for the Polos, as Christian travelers with the permission of the legate, to visit Jerusalem and obtain oil at the Holy Sepulcher in 1271, sometime between the spring when they arrived in Acre and the late summer when they apparently departed for the port of Ayas. Second, this spring and summer had been a very active one for Sultan Baybars, during which time he had campaigned successfully against Crac des Chevaliers and Montfort, among other Crusader possessions. Nonetheless, the Polos had gone safely to Jerusalem and returned, in effect as pilgrims, without apparent danger from the hostilities and with no mention of the Mamluk military campaigns by Marco Polo in his book. Third, the mission of the Polos to secure oil from the Holy Sepulcher demonstrates that pilgrimage to the major Christian holy sites, in territory under Mamluk control, was possible even during periods of dangerous military operations. It also shows that the Holy Sepulcher was able to operate to receive pilgrims during this period, indicating that at least a minimal number of Christian priests were on site to minister to the pilgrims. Even if the number of pilgrims may have dropped off between 1268 and 1289 compared to the years before 1244, or even from 1250 to 1268, a development not yet clearly documented, the holy sites of the Church of the Holy Sepulcher in Jerusalem, the Church of the Nativity in Bethlehem, and the ruined Church of the Annunciation in Nazareth[212] were still in operation to receive however many pious and adventurous travelers were willing to risk life and limb to make the pilgrimage.

The *Pelrinages et Pardouns de Acre*

The three other texts included here were written before Rusticien of Pisa recorded Marco Polo's story of his travels, but they date from *c.*1260 to the late 1280s as compared to when Marco Polo and his relatives passed through Acre and the Holy Land in 1271. The second text we have already encountered with regard to Acre. It is the *Pelrinages et Pardouns de Acre.*[213] This type of text appears in several versions. The Old French example we are considering here has been thought to date in the 1280s because of its content, which among other things, includes a remarkable list of the sanctuaries in Acre. Now, however, the argument has been advanced that the text was done much earlier, in the late 1250s or the early 1260s, on the basis of the mention, for example, of the Hospital of St. Martin des Bretons, which was founded on 29 August 1254, shortly after the departure of Louis IX.[214] Even though it may therefore date before the fall of Antioch, however, the pilgrimage route it describes was in full use during the years considered here, that is, 1268–89. In any case this text is of great interest for several reasons.

In the first place, it orients the reader to Acre, not Jerusalem, as its central point of reference, even though it includes a broad survey of pilgrimage sites in the Holy Land. In its first section it starts with a summary of the accessible pilgrimage sites in the immediate environs of Acre, sites such as the cave of St. Elias at Mount Carmel and the relics of St. Eufemia at Chastel Pelerin. It continues with a sequence of sites from Caesarea to Jaffa, Ramla, Emmaus, and on to Montjoie at St. Samuel, and finally, to Jerusalem. In the Holy City, this text begins with the Church of the Holy Sepulcher and presents an interesting selection of holy places therein. In the church itself the text mentions the "compas" or center of the world, the sepulcher meaning the aedicula, Mount Calvary, and the rock of Golgotha, and near there the text says, there was a tomb of stone for seven kings.[215] The sites in the church are completed with mention of the prison of Christ, the column of the flagellation, then down forty stairs to the Chapel of St. Helena where the True Cross was found, and finally down another forty stairs to the "chapel of the Greeks," where a venerated image of the Virgin is to be found.

This survey of the Church of the Holy Sepulcher is interesting because of the unusual sequence of sites it contains, the lack of detailed commentary on the aedicula of the Holy Sepulcher itself or the shrine of the Crucifixion, and the reference to the tombs of the Crusader kings. This seems to be the first reference to these tombs since 1244, when the Khwarismian Turks were said to have destroyed these tombs. It is notable that the Old French in this text refers to "une tounbe" for the seven kings, which might suggest that following the destruction in

1244, a single tomb was perhaps temporarily erected in which the remains of all seven kings were laid. Later on the separate tombs were reinstated so far as we know.[216] The reference to the "chapel of the Greeks" in the depths of the grotto of the Cross is also notable as a new and different location for the image of the Virgin, which in the early twelfth-century text of Saewulf had been located in a chapel to the Virgin Mary on the west side of the rotonda. This was the miraculous image of the Virgin, which had spoken to St. Mary the Egyptian by the power of the Holy Spirit.[217]

The major sites of Jerusalem that follow are the *Templum Domini*, the Golden Gate, the *piscina probatica*, the Temple of Solomon, and the holy places of Mount Sion. We note that a variety of remarkable relics are associated with these places or are nearby, including relics of St. John the Baptist in a chapel in front of the Tower of David, and the head of St. James, and we observe that the sequence of the visit to these sites has become somewhat convoluted, perhaps from lack of access. Certainly, Christians were no longer welcome in the Haram al Sharif after 1187, and therefore knowledge of the *Templum Domini*, the Temple of Solomon, and the interior of the Golden Gate, which was walled up along the outside walls of the city, was strictly by hearsay. On Mount Sion, the site of the Last Supper and the Pentecost are of course mentioned, but from there to the east into the Valley of Jehosaphat, with Gethsemane and the Mount of Olives, there are relatively few sites mentioned pertaining to the Virgin Mary, and no mention of her tomb.[218]

The final section of part one deals with the holy sites east, south, and north of Jerusalem, starting with Bethany and Bethphagé down to the Jordan River, where St. John baptized Christ. Bethlehem is inserted at this point with emphasis on the "Three Kings" there, followed by the Church of St. Abraham at Hebron. From this point to the south, the author jumps to Nablus north of Jerusalem, with mention also of Mount Hermon and Mount Tabor. Arriving in Galilee the reader is directed to the Sea of Galilee and Magdala, where Mary Magdalene is said to have been born. From there one could go to Nazareth, where this text says the Virgin was born and the Incarnation took place.[219] Nearby is Cana, where St. Anne was said to be born. Surprisingly Tyre is identified as the place where Jesus was preaching the word of God, when he met the woman who said,

> "Benet seit le ventre qe vous porta e les mameles qe vous alettérent!" E Ihesu la respondy: "Benet soient que oyent la parole Dieu e que la garde bien!"[220]

This is surely the passage from Luke's Gospel, Chapter 11:

> "Blessed is the womb that bore thee, and the breasts that nursed thee." But he said, "Rather, blessed are they who hear the word of God and keep it."
>
> [Luke 11: 27–8]

However, it has nothing obvious to do with Tyre and is not associated with other texts linked there either. This site is followed by Sidon, where the Church of the Holy Saviour is cited, which was said to contain many relics. This text appears to be the only one that refers to these relics, so we do not know what they were, and the place of the church in the city has not yet been located archaeologically.[221] Sidon is also correctly referred to as the place where Jesus encountered the Canaanite woman, from Matthew 15: 21–8 and Mark 7: 24–30. Sidon is followed by Beirut, where the text mentions the story of the miraculous image of Christ referred to by Wilbrand of Oldenburg, among others, but not where the image was at this time, or what the name of the church was. By the Crusader period this miraculous image was thought to be in Italy, and today it is visible in the Chapel of St. Lawrence in the Lateran Palace in Rome.[222] In our text, however, it is notable primarily as a source of the Holy Blood, which now, *c.*1280, existed in many places, that is, in reliquaries in "Rome, France, England and other places."[223] The text concludes with the observations that there are other pilgrimages that could be made, but ones the author is not even going to name. In particular, pilgrimages to "Sardayne, de la Mont Synay e autres pelrynages" are mentioned but not discussed, because the travel was very difficult and very long, but the author does not elaborate further.[224]

In its second, rather brief but important section, the *Pelrinages et Pardouns de Acre* text contains a major list of sanctuaries and religious establishments in the city of Acre, for which indulgences (*Pardouns*) could be gained under the proper conditions. We have compared the sites to those mentioned in the inventories of Eudes de Nevers. It is interesting that those sites listed that provide the greatest indulgences are the following:

> "Seint Sepulchre, .vij. aunz, .iiij. karantaines,"
> "Seint Lazer de Bethayne, .viij. aunz, .iiij. karantaines,"
> "la Magdaleyne, .xj. aunz,"
> "Seinte Bryde, .viij. aunz,"
> "Seinte Thomas, .xv. aunz."

However, "Seinte Croy" was only ".iij. aunz,.xl. iours." Among the religious orders, the sites differed in value:

> "Alemayns, .iiij. auns,"
> "Temple, .viij. aunz,"
> "Hospital Seint Iohan, .viij. aunz,"
> "Fréres preschours, .iij. aunz, .xl. iours,"
> "Fréres desakés, .c. .xl. iours,"
> "Fréres menours, .ccc. iours."

Finally, we can compare the value of indulgences among the churches belonging to the Italian merchant communities:

> "Seint Marc de Venyse, .v. aunz,"
> "Seint Lorenz, .xl. iours,"
> "Seint Pére de Pyse, .v. aunz."

It is hardly surprising that the churches belonging to the Hospitallers and the Templars are so highly regarded, or similarly those of the Dominicans. However, we would like to know why the Church of St. Thomas was the most highly rated for these indulgences. Also whereas it is hardly surprising that the church of the Genoese is so lowly rated, it is very surprising that the Franciscan church was also very lowly rated.

The significance of this pilgrimage text resides first in the rich view of and the abundant light it sheds on Christian pilgrimage and spirituality in the very restricted conditions of the late-thirteenth-century Crusader States in Syria-Palestine. Second, it reflects Acre after the departure of Louis IX, when its economic decline had started due to the loss of Asiatic trade routes, but some years before the fall of the city. Third, it indicates that in the circumstances where the pilgrimage to Jerusalem, Bethlehem, and Nazareth, not to mention Saidnaya and Mount Sinai, was made much more difficult and possibly even curtailed for many pilgrims, a handbook to the sites in Acre for the religious visitor was desired. Whereas it could never be said that Acre in any way substituted for the major holy sites, the spiritual benefits available in Acre could nonetheless be made available to the pilgrim with a guidebook like this. This guidebook could serve Christian visitors, for one thing, as a work to use while awaiting travel to another major inland holy site, either one of the three major dominical sites or some other site such as Tortosa, or some other accessible place. For another thing, it could serve the devout Christian, pilgrim or resident, who was unable or uninterested to travel elsewhere, and wished simply to enrich his or her own spiritual life in Acre. Finally, the *Pelrinages et Pardouns de Acre* is notable as an indicator of the state of pilgrimage in the Holy Land in the last half of the thirteenth century. Pilgrimages to the main holy places were still possible, but more distant inland sites were now relatively inaccessible. Not only were the Crusaders now pinned along the coast, but also Christian pilgrims were becoming more restricted in what pilgrimage sites were open to them. In contrast to Jacques de Vitry, who decried Acre as an evil place, this text views Acre in a more positive light when now, as Jacoby characterizes it, "a substitute expiatory pilgrimage was established in Acre."[225]

Burchard of Mount Sion

The third text to be considered here is a more conventional – and therefore in this context very interesting and important for comparison – account of a description of the Holy Land made by Burchard of Mount Sion and written in the early 1280s, that is, in the years just before 1285.[226] Burchard was German like many other pilgrims we have considered in the twelfth and thirteenth centuries. We do not know where he was born; scholars have claimed he might have been a native of perhaps Strassburg or Magdeburg, but all we can surely say is that at some point he was connected with the Dominican house at Magdeburg.[227] He was a Dominican friar who lived for ten years in the Latin Kingdom in both Acre and Jerusalem.[228] The date of his writings is determined partly from the fact that he records specific events up to 1274, the *terminus post quem*, but from before 1285 and 1291, the former being the *terminus ante quem*. Burchard was in the Holy Land during the reign of Kalavun, and he was writing before the fall of Acre in the time of Henry, king of Cyprus and Jerusalem, and during the ten-year truce that Kalavun made in the year 1282 with the Templars and the Hospitallers.

Even though Burchard is writing a detailed and systematic account of his visit to the Holy Land, his approach is radically different from earlier pilgrims in one respect. Despite the fact he may have been living in Jerusalem for part of his time, he is based in Acre and he orients his descriptive narrative with Acre as his center, not the Holy City. This very decidedly reflects the reality of the Crusader States in the late thirteenth century when he was writing. What other specific indications does he give us that can be directly tied to his context in the Holy Land in the early 1280s when he seems to have written his account? It is an account based on conditions between 1274 and 1285, along with whatever texts he was using to help inform his narrative description.

Burchard divides his text into four sections emanating from Acre. "Thence I have drawn four lines, corresponding to the four quarters of the world; and each quarter I have divided into three parts."[229] After an analysis of the four Syrias, the three Palestines, and the three Arabias, based as he says on the work of Jacques de Vitry, Burchard describes the Holy Land in four parts, starting with Acre:

> The city of Acre is fortified with walls, outworks, towers, ditches, and barbicans of very great strength, and is triangular in shape like a shield, whereof two sides look upon the Mediterranean Sea, and the third upon the plain round about it. This plain is more than two leagues wide...; it is very fertile,.... There are in the city many strong places, castles, and citadels belonging to the Knights of the Hospital, the Temple, and the Teutonic Order. This city belongs to the King of Jerusalem, and hath a good and roomy harbour on the south side wherein ships may be moored.[230]

To the north is Tyre, in which he says

> is an Archbishop's see.... In the sands, at a distance of two bow-shots, without its eastern gate, they show the place where Jesus Christ preached,.... They also show a great stone, whereon Jesus Christ was then standing. This place is never covered with sand,...; but this place, though in the midst of the sand, ever remaineth uncovered both in summer and in winter, as I have seen with my own eyes.[231]

Then he describes briefly Sidon, Beirut, the Castle of Nephin, "nearly the whole of which stands in the sea," and Tripoli. Tripoli is

> an exceeding noble city, standing almost entirely in the sea, like Tyre. It is full of people, for therein dwell Greeks and Latins, Armenians, Maronites, Nestorians, and many others. Much work is done there in silk. I have heard for certain that therein there are weavers of silk and camlet and other like stuffs.

North of Tripoli is Antaradus, known as Tortosa.

> St. Peter preached for a long time at Antaradus, when he was on his way to Antioch,.... Here also St. Peter built the first church in honour of the Blessed Virgin, which church exists at this day. I have celebrated Mass therein, for I abode there for six days.
>
> Seven leagues from Antaradus is the Castle of Margat, belonging to the Brothers Hospitallers of St. John. It stands above the city of Valania, one league from the sea, and is strongly fortified and set upon an exceeding high mountain....
>
> The city of Valania and the river of the same name, which runs past it, are the boundaries of the kingdom of Jerusalem. Here likewise begins the principality of Antioch, and here ends the county of Tripoli. This place is seven days' journey distant from the city of Acre, and it is four days' journey from it to Antioch. Now, albeit I have travelled beyond this place and viewed the country, yet I write nothing thereof, because I do not intend to write about any land save the Holy Land.[232]

This section covers essentially what was left of the Crusader States of the Latin Kingdom and the County of Tripoli north of Acre. Crac des Chevaliers had fallen but Tripoli and Margat were still in Crusader hands, so the text dates after 1271 and before 1286 on this evidence.

The second and third divisions of the Holy Land are northeast and east of Acre. The second division includes Montfort and Toron and extends to the source of the Jordan River at what he calls "Belinas," or Baniyas. Montfort, Burchard says, "once belonged to the Teutonic Hospital, but now is utterly ruined." It fell to Baybars, as we have seen, just shortly after Crac des Chevaliers in 1271. The third division includes the castles of Judin and Saphet, or Safed. Burchard calls Saphet "the fairest and strongest, to my mind, of all the castles I have ever seen, set upon an exceeding lofty rock. It used to belong to the Knights Templars, but was betrayed and taken in shameful sort, to the injury of the whole of Christendom."[233] Beyond Safed to the southeast is the Sea of Galilee with its many sites related to Christ, including the Mount of the Beatitudes and Capernaum. As with all of the divisions whether along the coast or inland, Burchard discusses the sites with their the biblical associations from ancient as well as Christian and Crusader times.[234]

The fourth division east and southeast of Acre is split into three parts. The first part covers the territory south of Safed across the Sea of Galilee into trans-Jordan beyond. The second part includes Cana of Galilee and Nazareth. At Cana, Burchard makes his perceptive archaeological observations:

> Now, these places, like almost all the other places wherein the Lord wrought any work, are underground, and one goes down to them by many steps into a crypt. So it is in the place of the Annunciation, the Nativity, in this Cana of Galilee, and in many other places which are shown underground. The only reason that I can find for this is that owing to the frequent destruction of the churches built over these places, the ruins raised the soil above them, and then, after they had been levelled carelessly, other buildings were built upon them. Christians therefore who were zealous to visit these places, and wished to get to the very spot where the thing was done, had to clear out the places and make steps leading down to them. Wherefore almost all these places seem to be in crypts.

In light of these remarkable comments, it seems odd that Burchard did not have more to say about the Church of the Annunciation at Nazareth. In Nazareth "the place still remains where the angel Gabriel brought the tidings of salvation to the Blessed Virgin, ... I have said many Masses at that place, and even on the day itself – I mean the day of the holy Annunciation [25 March]."[235]

"There are three altars in the chapel, which is hewn out of the living rock, even as is the place of the Nativity, the Passion, and the Resurrection, and of old a great part of Nazareth was hewn out of the rock, as may be seen at this day." Certainly the shrine of the Annunciation was in place, if undecorated, but Baybars had destroyed the church around it in 1263.[236] Burchard takes no notice.

The third part of the eastern division stretches from Mount Carmel past Megiddo southeast to Sebaste, Nablus, Jericho, and the Dead Sea, reaching right up to the Mount of Olives outside of Jerusalem. This is a very large section in his account, partly because of the many biblical sites, which he includes, partly because of the interesting things he has to say about Sebaste, for example, among other important places. Burchard clearly knew Sebaste well; here "there are two churches built in honour of St. John the Baptist. Howbeit, the Saracens have made one of these into a mosque, namely, that which was the chief one and was once the Bishop's cathedral; more especially have they so done with the sepulchre of the same St. John the Baptist, which was all of marble, like the Lord's sepulchre, where the prophet lay buried between Elisha and Obadiah." So the impressive early Gothic Crusader church on the site had now become a mosque.[237]

At this point, Burchard comments on the reverence that the Muslims have for St. John, and he makes some very precise observations on their beliefs relative to the Christian religion. "They [the Muslims] truly declare that Christ is the Word of God, but they say that He is not God. They say that the Blessed Virgin conceived of the Holy Ghost, bore Him as a virgin, and remained a virgin. They say that John was a great and exceeding holy prophet. They say that Mahomet was God's messenger, and was sent by Him to themselves alone. This I have read in the Alcoran [al-Koran], which is the book of their law." Few pilgrims demonstrate the knowledge of the Muslim religion Burchard reveals here, and none of the other pilgrims in this period claims to have read the Koran as he did. Burchard is truly unusually detailed about the sites he visited, unusually perceptive about the history of these places, and unusually sensitive to the cultural and religious context of Christian and Muslim in the Holy Land at this time.

He goes on to describe the other church at Sebaste in this manner. It "stands on the brow of the hill, where the King's palace once stood. Therein dwell Greek monks, Christians, who received me kindly and gave me food. In that church these same Greeks show the place where they say that John was imprisoned and beheaded by Herod." Burchard knows from his history, however, that John was not recorded as being beheaded here; he explains that after John was beheaded at "Macherunta" [Machaerus in trans-Jordan], "his body was buried in Samaria by his disciples between the aforesaid prophets, but his head was buried in Jerusalem." Burchard pays no attention to the handsome frescoes in the Greek Church of St. John, but he also sets the record straight as he knows it, even while he exclaims, "I have nowhere in the Holy Land seen such great ruins as at Samaria, and yet I have seen great ones."[238]

When Burchard comes to Jericho, he continues his discussion of sites related to St. John the Baptist. "Two leagues from Jericho, beside Jordan, is a chapel built in honour of St. John the Baptist, on a spot where the Lord is believed to have been baptized." However, surprisingly, he then comments, "what came to pass in Jericho is well known, and therefore I forbear to write it down." We are left to wonder about this curious and conspicuous omission.

Burchard concludes this part with the approach to Jerusalem, by way of Bethany, the Mount of Olives, and Bethphage. It is here that Burchard expresses the religious spirit and fervor of the pilgrim that he obviously felt as he approached the Holy City. "We come now to the going down the Mount of Olives" – which Burchard must have done frequently while he lived in Jerusalem on Mount Sion – "where He saw the city and wept bitterly over it, while crowds went before and after Him, shouting 'Hosanna to the Son of David!' and rejoicing at his blessed coming. Let us go on, pass over the brook Cedron between the place of His prayer when in an agony and His capture in Gethsemane, and follow Him, if happily we may be suffered to come to Golgotha, where His feet stayed nailed to the cross, and running with blood; let us die there with Christ, that together with Him we may rise again." Clearly Burchard was eloquently and impressively proclaiming the intense identification of the

Christian pilgrim with the experiences of Christ at the entrance to Jerusalem.[239]

Burchard discusses the history of the Holy City at some length and argues that it is currently on the same site it occupied in the time of Jesus. Not surprisingly his point of reference is Mount Sion, since this is where he may have lived. However, he observes that since antiquity, the city "has spread itself out, in width, though not in length, and the whole of the ancient city, together with Mount Sion, is now within the walls, and is inhabited; but at this day there are very few inhabitants for so great a city, because the people thereof dwell in continual terror."[240]

Burchard proceeds to describe the holy places around the walls of the city before going inside. In doing so he proposes an explanation for why the place of the Crucifixion was inside the walls of the city *c.*1280, and why the Tomb of the Virgin looked the way he saw it. In the case of the former, his ideas are correct in theory but inaccurate in historical specifics and lacking any archaeological evidence; in the case of the latter, his idea is completely speculative. He thought that at the time the Virgin's sepulcher was built it was at the foot of the Mount of Olives, and then it was covered over, so that to reach it then [in 1280 or today] one descends sixty steps from the chapel building at the entrance on the surface. He certainly knows the site well, but he knew nothing about the archaeology of the site.

When Burchard enters the city, he goes first to the Church of the Holy Sepulcher. He describes the Anastasis rotunda and the shrine on Golgotha in some detail, but he says nothing about any damage that was done to the Church of the Holy Sepulcher by the Muslim sheikh Khadir b. Abi Bakr in the time of Baybars's reign. The Holy Sepulcher itself is covered with "gray-coloured marble"; the chapel of Calvary "is entirely paved with marble, and its walls are covered with marble and adorned with mosaic work of the purest gold." He also chooses to mention specifically the altar of the column of the flagellation, and the Chapel of St. Helena, forty-eight steps below the level of the ambulatory.[241]

When he leaves the Church of the Holy Sepulcher, he goes south to Mount Sion, which he knows well. However, although he mentions the major holy events here with regard to Christ, the Virgin, and St. James, he does not describe the sites or give any details on the current state of the buildings. Then after describing the size of Jerusalem, he discusses the major gates to the city. The major gate on the west side of the city he gives several names: David's Gate, the Fish Gate, the Gate of the Merchants. He duly enumerates the major gates, moving clockwise around the walls, but even though he names them all, for example, St. Stephen's Gate (now the Damascus Gate), the Sheep Gate or the Valley Gate (now the Lion Gate), and the Golden Gate, he surprisingly says nothing about their use by Christian pilgrims. This seems to be explained by his sources, one of which he mentions from time to time being Jacques de Vitry. After a description of the mountains around Jerusalem, he then discusses a number of holy sites in the environs of Jerusalem, including especially Bethlehem.

The passage on Bethlehem is puzzling because although it is long and detailed, Burchard does not add any specific information to the basic account given in most pilgrimage texts. Here is what he says about the grotto of the Nativity:

> One goes from the church into the place of the most sweet Nativity down the steps, ... This chapel is all lined with mosaic work, paved with marble, and most sumptuously built. Over the place where the Blessed Virgin was delivered, Mass can be said on a marble slab which is laid there. One also sees a piece of the bare stone whereon Christ was born. In like manner a part of the manger wherein Christ lay is left uncovered. These places are kissed with the greatest devotion by the faithful. I passed one night in these two places, kissing now one and now the other.

Burchard also was very impressed with the main basilica:

> I have never seen or heard anyone say that he had seen a holier church anywhere in the world. Therein are four rows of pillars, admirable not only for their number, but for their wondrous size. Moreover, all the nave of the church above the pillars, even to the roof, is of most beauteous and noble mosaic work [wherein is set forth all history from the creation of the world to the coming of the Lord to Judgment]. Likewise the whole church is paved with marble of divers colours,.... The Saracens honour all churches dedicated to the Blessed Virgin, but this one above all.

Burchard clearly knows about the Church of the Nativity and has visited it himself. It is, however, disappointing that he does not mention the paintings on the columns, or "pillars" as he calls them, and that he does not really understand the program of conciliar texts on the nave wall, which addresses not so much the history of the world in general as early Church history.[242]

Following a brief survey of other sites around and south of Bethlehem, including especially Hebron, Burchard turns to the final part of his text that deals with the southern quarter of the Holy Land. The first division begins with Haifa and then Pilgrims' Castle and Caesarea. He calls the Templar castle at 'Atlit "the most strongly fortified of all the places ever held by the Christians." Caesarea, he says, "has a strong position, but at this day is completely ruined." Baybars had of course destroyed it in 1265. His comments on places reach as far south as Ascalon, Gaza, and Beersheba. This, and a report on "The Fruits and Beasts of the Holy Land," completes his account of the Holy Land. It starts at the foot of Mount Lebanon and reaches to Beersheba, a distance of not more than ninety leagues north to south, and it is by his reckoning forty leagues in breadth, between Jordan and the Mediterranean Sea.[243]

Burchardus concludes his account with a very interesting discussion of "The Various Religions of the Holy Land." Other pilgrims like John of Würzburg had also commented on the multicultural and multireligious people of the Levant, but Burchard's discussion is long and quite substantial. He is quite scathing about the Latins. "To tell the truth," he says, "our own people, the Latins, are worse than all the other people of the land." He explains this as the result of who these people are, all manner of malefactors who have fled Europe as penitents or refugees: murderers, robbers, thieves, adulterers, and the like, "from Germany, Italy, France, England, Spain, Hungary, and all other parts of the world."[244]

Other peoples found in the Levant are the Saracens, who follow the religion of Islam. There are also the Syrians, who are Christians, but dwell with the Saracens. The Greeks are also Christians, but schismatics, except "that a great part of them returned to obedience to the Church at a General Council [of Lyon in 1274] held by our Lord Gregory X." Whereas Burchard admires the Greek churchmen, because "all the prelates are monks, and are men of exceeding austerity of life and wondrous virtue," he dislikes the Syrians, because they are "stingy, giving no alms," "they are clothed most wretchedly," but most of all because unlike the Greeks, they "keep no faith with the Latins."[245]

Burchardus continues his discussion by mentioning the array of other Christians found in the East. He cites the Armenians, Georgians, Nestorians, Nubians, Jacobites, Chaldeans, Medes, Persians, Ethiopians, and Egyptians. He also refers to the Bedouins, whom he calls also Midianites or Turcomans.[246] He does not assign a religion to them, but he understands how numerous they are, how "all Syria is full of them," the fact that they are nomads and live in their tents, and how brave they are in war. His comments are quite remarkable and demonstrate that he has observed much during his residency in the Holy Land, some that others failed to see or to describe. Finally, he discusses the Assassins, whom he identifies as Muslims but as originally coming from Persia. Burchard seems not to know that the Assassins were subjected to the depredations of the Mamluks in a series of campaigns by Baybars, in 1270, 1271, and 1273.[247]

At the end of his account Burchard includes a large section discussing the issue of Christians in the Near East, as compared to Muslims. Amazingly, he says that, except for Egypt and Arabia where Muslims chiefly live, everywhere else

> you will find thirty Christians and more for one Saracen. But the truth is that all the Christians beyond sea are Easterns by nation, and albeit they are Christians, yet as they are not much practised in the use of arms, when they are assailed by the Saracens, Turks, or any other people soever, yield to them and buy peace and quiet by paying tribute, and the Saracens, or other lords of the land, place their bailiffs and tax-gatherers therein. Hence it arises that their kingdom is said to belong to the Saracens, whereas, as a matter of fact, all the people are Christians . . . , as I have seen with my own eyes in Cilicia and Lesser Armenia, which is subject to the rule of the Tartars.

This is followed by a remarkably detailed description of the Armenians and the Armenian Orthodox religious practices, with which he is very favorably impressed. It must be said, however, that, whereas on the one hand, Burchard's interest in the many Christian sects is quite remarkable and even sympathetic, on the other, it seems odd that, writing in the early 1280s, he would claim in effect that there was a plurality of Christians over Muslims throughout much of the Near East. He of course was mainly focusing on the religion of these peoples, but his seeming lack of appreciation of the danger that the Mamluks posed to the Latin Christians appears to be another reflection of the extent to which the Crusaders failed to understand their peril in the 1280s.[248]

Finally, Burchard summarizes his travels "over the whole of this land." However, what he thinks of this way is really mainly only the coastal ports from Cilicia, along Syria, to Tyre and the Latin Kingdom. Then he sailed farther south to "Caesarea, Antipatris, Joppa, Iamnia, Ekron, Ashdod, Ascalon, Gaza, and the whole sandy desert even to the mouths of the river Nile," including Damietta, territory all controlled by the Mamluks in the early 1280s. He had also traveled to the main holy sites of Jerusalem, Bethlehem, and Nazareth, where, as we know, he lived in the Holy City for a time and where Christian pilgrims were still allowed to visit by special arrangement. Also everything south of Chastel Pelerin was, of course, in Muslim hands by 1280, so he did travel extensively. However, what is conspicuously different for Burchard, compared to the earlier thirteenth-century German pilgrims we discussed, both Wilbrand von Oldenburg and Magister Thietmar, is the fact that basically he does not go anywhere east of the Jordan River. He does not visit Damascus, Aleppo, Homs, Qara, or Saidnaya, and most importantly, he never journeys southward to the Monastery of St. Catherine's on Mount Sinai.[249]

Burchard is one of the last pilgrims to travel to the Holy Land and write a full report before the fall of the Latin Kingdom in 1291. His account is important not only because of its systematic and yet selective content, but also because of the extent of the *actualia* included in his discussion. Whereas his basic text seems as usual to be based on earlier sources,[250] he does include a number of up-to-date observations that clearly enable us to date his account to the early 1280s. Furthermore, he discusses his material selectively and critically to a remarkable degree, and his organization is distinctively late thirteenth century, taking the city of Acre as his point of reference. However, whereas Burchard is openly and even harshly critical of the Latins in the Holy Land, he does not tell us much about those more virtuous Franks who were also there. Also even though Acre is the geographical pivot in the organization of his account, unfortunately he does not describe the Crusader capital in that much detail. In the end, however, we can agree with Grabois that this is yet another example in a "long series of *itineraria* written by generations of pilgrims. . . . By its critical methods and the author's need to find reasonable answers to the questions he posed, it opens a new way leading to a systematic exploration of the Holy Land. This kind of exploration is based on the confrontation of the normative texts with the observations of the traveller who was an eye-witness, and who wished, . . . to express the truth as he himself had experienced it."[251]

The Pilgrim Philippus

The fourth and last pilgrim worth mentioning here, Philippus, is much less well-known than Burchard, and about whom we know very little. W. Neumann, the editor of his text, argues that Philippus wrote between 1285 and 1291.[252] We do not know for sure whether Philippus was also German, but Neumann concludes that he had nothing whatsoever to do with the Dominicans, unlike Burchard. The account of Philippus is organized into ten chapters, as follows:

Ch. 1. Nazareth,
Ch. 2. Jerusalem,
Ch. 3. Mount Sion,
Ch. 4. Mount Sion to the Mount of Olives,
Ch. 5. The Mount of Olives,
Ch. 6. The Templum Domini,
Ch. 7. Bethlehem and Hebron,
Ch. 8. Bethany, the River Jordan, and sites south of Nazareth,
Ch. 9. Tiberias and sites north of Nazareth,
Ch. 10. Damascus and Syria.

Clearly this account is much more traditional in its focus on Jerusalem and the major holy sites and thus has relatively little to say about the substantial changes in pilgrimage since Jerusalem was definitively lost in 1244. Yet despite its preoccupation with the Holy City and the holy sites, Philippus does make several interesting references to various important holy places.

In Chapter 1, he has nothing to say about the destruction of the Church of the Incarnation in Nazareth, but, for example, he affirms the identification of Sepphoris as the place of origin of Anna, mother of the Virgin Mary. In Chapter 2, he starts in the traditional way at the Holy Sepulcher and rehearses the more or less standard identifications of events and places. In this way he completes his circuit through Jerusalem in Chapters 3–6, returning inside the city walls from the Valley of Jehosaphat and coming to the Church of St. Anne. As in the twelfth century this site is identified as the birthplace of the Virgin Mary, which was formerly the house of Joachim and Anna, her parents.[253] The holy sites pertaining to the Virgin Mary are clearly affirmed.

From Jerusalem, Philippus moves south to Bethlehem in Chapter 7. Here as in Jerusalem, the standard identifications are made, excluding the *actualia* that was such an interesting part of the account of Burchard. In the expansive Chapter 8 he moves east from Bethany to Jericho and the Jordan, where he passes the house of Zacchaeus the publican who stood in the sycamore tree to see Jesus. Moving north and south from the Jordan River, he then turns to the coast, from Gaza northward to Ascalon and Jaffa as if current political and military control by the Muslims made no difference. Heading northward, he passes the Pilgrims' Castle at 'Atlit, where the relics of St. Eufemia are found,[254] before arriving at Acre, about which he has virtually nothing to say. In Chapter 9 he refers to the sites around Lake Galilee and in Chapter 10, he comments on sites to the east in Syria, the same places that early-thirteenth-century German pilgrims had visited, such as Damascus and Saidnaya, where, in the latter place, as he points out, the famous icon of the Virgin Mary exudes holy oil "day and night."[255] He ends his account somewhat unexpectedly at Tortosa, where he dutifully reports the significance of the shrine to the Virgin. It is in Tortosa, he says, that a chapel exists inside the great church, which was established by Sts. Peter and John in honor of the blessed Virgin Mary that has been held in great veneration up to the present day.[256]

Philippus then concludes his account by saying he has written about the things he has seen to honor the omnipotent Lord and for the use of pilgrims to the Holy Land.[257] Philippus is clearly writing an old-style pilgrim's guide, which very much focuses on locating the events of the New Testament with their sites in the Holy Land. It is a perhaps surprising document to come from the Crusader Holy Land in the last years of its existence, but it demonstrates perhaps that there was normal pilgrimage here even as the plight of the Crusader States grew more and more precarious.

THE ART OF THE CRUSADERS, 1268–1289

> O homines qui transitis per viam, in caritate rogo vos orare pro anima mei, megistri Ebuli Fazle, hujus ecclesie edificatoris.
>
> Those who pass this way, I ask that in charity you pray for my soul, master Ebu'l-Fazl, founder of this church.
>
> Master Abu'l-Fadl
> Maronite scribe in Acre

Viewed from the historical vantage point of 1291 and later, when the Crusaders were effectively eliminated from the Holy Land after the conquest of Acre, the prospect of Crusader fortunes between 1268, when Antioch fell to the Mamluks, and 1289, when Tripoli also fell, seems gloomy and hopeless. Part of the problem, however, is the fact that this period is one of the most neglected of all in the study of Crusader history.[258] Furthermore, certain historical studies that have addressed developments in this period see the decline of the Crusades from the viewpoint of an increasingly activated public opinion in Europe, some of which was hostile.[259] Accordingly, the idea that there was a thriving artistic production in this period seems incongruous and difficult to understand. However, if we consider the Crusader States in these years, not from the historical hindsight of 1291, nor from the vantage point of western Europe, but rather looking forward from 1268, and approach the situation year by year, the view from the Latin Kingdom is very different indeed. It is evident that the situation, as seen by the Crusaders in the Holy Land, presented much to hope for and the potential for major positive changes continued to lie ahead.

Consider the facts that despite the threat of Baybars and the Mamluks after 1268, there are the Crusades launched in response to the fall of Antioch: the Crusade of James I (1269), the Crusade of Louis IX (1270), and the Crusade of Prince Edward (1271–2). When those expeditions fail and Baybars even succeeds in taking Crac des Chevaliers (April 1271), hope is nonetheless rekindled with the election of Gregory X (September 1271). The new pope proclaims the most ambitious plans for a crusading expedition yet imagined, even as truces are signed with the Mamluks in the Latin East. From the point of view of those in Acre the situation is reasonably stable through the 1270s and 1280s, because, with the help of these truces, no further Frankish territory is lost in the Latin Kingdom.[260] The same cannot be said of course for the County of Tripoli. Pursuing hopes of an international alliance with the object once again of making Christianity the dominant world religion, the pope proceeds to attempt to achieve a reunification with the Greek Orthodox Church by means of the Council of Lyon in 1274. Although it is a great blow to the Crusader cause when Pope Gregory dies in 1276, the death of Baybars one year later allows the Crusader States a respite from the relentless attacks by this ferocious Mamluk leader. Meanwhile, Crusader hope is again rekindled when the brother of Louis IX, Charles of Anjou, becomes king of Jerusalem, never mind that he acquires the crown by purchase in 1277. When the power of Charles is undermined by the "Sicilian Vespers" in 1282, Crusader leadership falters with the inability of the local king, Hugh of Cyprus, or his *baillis* to assume power. It is only when Henry II becomes the new king of Cyprus (1285) and is crowned the new king of Jerusalem at Tyre (1286) that Crusader hopes rise again with the conviction that a strong leader can once again unify the Crusader Kingdom against the common enemy. Less than three years later, however, the Mamluks under Kalavun take Tripoli. Hope does not die, however, because when Nicholas IV becomes pope in 1288 – the first Fransciscan to become pope – he renews the Crusade policy of Gregory X for the first time since Gregory's death in 1276.

It is evident that during these years – 1268–89 – the Crusaders can continue to view their situation in a positive light, despite their lack of unity and despite the serious threat that looms along their southern and eastern borders from the Mamluks. The economic situation at Acre is also declining with the loss of Asiatic trade routes, but perhaps this decline is masked by subsidies coming from the West. In any case, although the difficult political situation is thus viewed positively and the economic deterioration has begun to set in, the Crusaders can maintain the status quo in terms of seemingly normal religious, normal pilgrimage, and indeed normal artistic activities. It is even true that despite the existence of the truces signed repeatedly in the second half of the century, the Crusaders can, just as the Mamluks also do, continue "normal" military activities when the opportunity arises. On the Crusader side some seem to understand fully the dire threat that the two dedicated Mamluk sultans, Baybars and then Kalavun, present to the Crusader States, but there is little they can do to eliminate the danger. In these circumstances, the art of the Crusaders can potentially continue to flourish. We shall see to what extent this is the case, and what changes, if any, the difficult and variable political developments cause in relation to the characteristics and productivity of artistic output.

PATRONAGE IN THE CRUSADER STATES

One of the most important considerations for the evaluation of the art of the Crusaders is that of patronage: understanding who commissioned the work of art and, if possible, for what purpose(s). What patrons were there and what evidence do we have about them? In the case of the Latin Kingdom in the period from the 1260s onward, we can see certain changes in the political functioning of members of various segments of society that could potentially have a notable impact on art patronage. At the very highest level we can consider the king and the patriarch, two figures who were active as important artistic patrons previously in the Crusader States.

In an excellent study, Sylvia Schein quotes Jean d'Ibelin, writing in the mid-1260s, as follows:

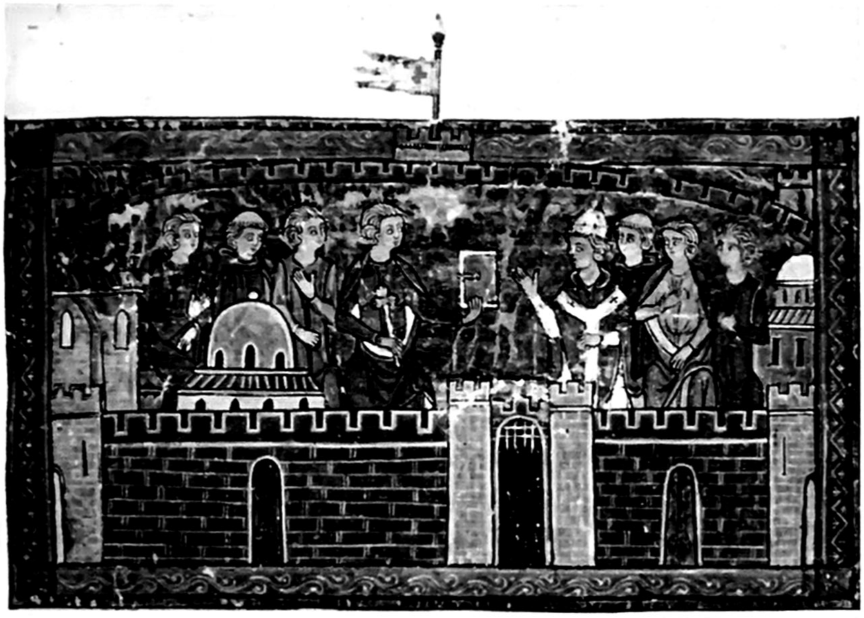
> There are in the kingdom of Jerusalem two chief lords, one spiritual and one temporal. The patriarch of Jerusalem is the spiritual lord and the king of the kingdom of Jerusalem is the temporal lord.[261]

The issue of what role the king and the patriarch played in theory as reflected in this statement and the practical realities of the situation toward the end of the thirteenth century in the Latin Kingdom are spelled out by Schein in terms of several new developments. She points out in particular that the statement of Jean d'Ibelin in 1265 "was perhaps deliberately concealing the fact that the patriarch was increasingly taking upon himself the function of... temporal lord as well."[262]

The specific steps that demonstrate this policy can be listed as follows:

1. Gradually the king's role in the process of making ecclesiastical appointments had waned, and in particular the appointment of the patriarch of Jerusalem was now almost wholly the prerogative of the pope.
2. The patriarch of Jerusalem was now given enhanced power in the Latin Kingdom for two reasons. On the one hand the office of papal legate, formerly separate and distinct, was now officially, since 1220, subsumed into the position of the patriarch of Jerusalem; on the other, the position of bishop of Acre was merged with that of the patriarch of Jerusalem between 1261 and 1263.
3. The patriarch took over many duties heretofore exercised by the king of Jerusalem or his *bailli*, including control over troops and funds sent by the pope to aid the Holy Land. In this role the patriarch was made to become in effect a military commander. The fact of continuous absentee kings for the Latin Kingdom was a major cause of this development.
4. It was further the case that whereas in the past the pope depended on regular reports on the condition of the Holy Land from the patriarch and the masters of Hospitallers and the Templars, popes from the time of Alexander IV (1252–61) increasing relied on the patriarch alone. Instead of depending on the Orders for information, the popes admonished them to cease their feuding and to obey the commands of the patriarch.

Schein concludes that "the power of the patriarch in the kingdom reached its peak by the end of the 1280's."[263] We can conclude that although the king and/or queen may have been a significant presence as an art patron in the past, especially in the twelfth century, he or she is not likely to have been as



234. Jean d'Ibelin, *Livre des Assises*, Venice, Bibl. Marciana, MS fr. app. 20 (=265), fol. 1r, The *Haute Cour* of the Latin Kingdom meets in Jerusalem. (photo by courtesy of the Biblioteca Marciana, Venice)

important a patron in the period 1268–89. Only Louis IX had had a major role as patron during the time of his residency as a Crusader visitor to the Holy Land between 1250 and 1254. It will remain to be seen what evidence there may be about the mainly absentee kings of the Latin Kingdom and the newly powerful patriarchs of Jerusalem in this period.

In view of the above discussion, it is interesting to consider an unusual miniature from the 1280s. It can come as no surprise that when a headpiece miniature was commissioned for a compendium of legal texts from the Latin Kingdom, written in Old French in Acre in the late 1280s, the representation of the *haute cour* in session features the image of the patriarch of Jerusalem in a newly prominent role (Fig. 234, CD 204).[264] It was, of course, the king who presided at the high court, which was the vehicle by which "the crown exercised its competence as the official head of the feudal pyramid."[265] Accordingly, the king is shown here more or less in the central position holding the law book, under the tower with the Crusader banner above, but the patriarch is given special importance. He is paired with the king as an equal in effect, as his gesture and position indicates. He is furthermore represented as the sole figure fully vested in his official robes, wearing his pallium and miter. Even the king bears no standard insignia of rank, that is, no crown or cloak; rather he holds only a special and unusual scepter. It is noteworthy that when this artist, whom we have heretofore called the Hospitaller Master, but now refer to as the Paris–Acre Master, depicted joint councils of kings and patriarchs or bishops elsewhere in manuscripts illustrated in Acre during the 1280s, he regularly represents the kings with crowns, and the bishops only with miters – none with the pallium.[266] It is most unfortunate that we cannot as yet identify a patron for this legal manuscript in light of the extremely unusual feature that this codex has an illustrated headpiece. The likelihood is, however, that whoever it was done for in Acre, whether among the secular nobility or the high clergy, they would have readily recognized the significance of the patriarch's remarkably important position in this miniature.

Among the nobles, knights of the military orders, soldiers, and other high clergy as potential patrons we note the more or less continuous arrival of new manpower from the West along with the long-term residents of the kingdom. Among the high clergy, the patriarchs of Jerusalem tended to be French-born in the latter part of the thirteenth century, perhaps with the sole exception of Thomas of Lentino. Some were outstanding prelates, such as William II of Agen (1262–70) and Nicholas de Hanapes O.P. (1288–91), but unfortunately there were often difficulties filling this important post, resulting in extended vacancies between 1270 and 1272, and again from 1277 to 1279. Also there is the case of Elias of Périgueux (1279–88), about whom Hamilton says, "no patriarch since the death of Amalric of Nesle a century before made so little impression on the church and state of Jerusalem as Elias." Thus patriarchal leadership was erratic. Partly as the result of this bishoprics were often left vacant, and when they were filled the men appointed were often from the West, a sign of increased papal intervention – as seen elsewhere in the European world as well – as Hamilton points out.[267] Examples include Italians, such as Hugh of Troja at Bethlehem (1279–98), and French, for example, Godfrey, O.P., at Hebron (1268–86). However, some were also men born in the Holy Land, such as Bonacoursus de Gloire, O.P., archbishop of Tyre (1272–95).[268]

Among the nobility, there is perhaps no one so well-documented between 1268 and 1289 as Eudes, comte de Nevers, who arrived in Acre in 1265. Eudes of course never intended to stay, but he unexpectedly died there less than a year later. Nonetheless, the presence of the French regiment founded by Louis IX brought new recruits to the Latin Kingdom on a more or less continual basis. These French mercenary troops had been sponsored in the first instance by Louis IX, but at his death in 1270 there was an interruption in their presence. These troops returned to Acre in 1273, led by Oliver of Termes and paid for by Philippe III of France. When Oliver died in 1274, a new commander arrived in the person of William of Roussillon by 1275 or 1276, leading hundred mounted knights and four hundred crossbowmen. When he died in 1277, Miles of Haifa briefly took command. When, however, Charles of Anjou purchased the crown of Jerusalem from Maria of Antioch in 1277, the presence of these soldiers sponsored by the French king in the Latin Kingdom disappeared. Presumably they were then entailed to the command of Charles of Anjou by the pope in 1277. Eventually they returned to Acre sponsored by the French king after 1286, briefly under the command of Eudes Poilechien, and then following him, under John of Grailly.[269]

It is noteworthy that a year after the death of Charles of Anjou, in 1286 when Henry II of Cyprus came to Acre to become king, the men of the French regiment initially sided with Eudes Poilechien, the *bailli* and their countryman, in refusing to recognize Henry's claim to the crown of the Latin Kingdom. As we have noted earlier, in the previous subchapter, it was only when the leaders of the major military orders switched their allegiance and persuaded Eudes and his followers to accept the new ruler that peace and unity was achieved. Forthwith, however, a new leader for the French regiment was sent to the Holy Land, someone who had the confidence of the new king, Henry, namely, John of Grailly. John had worked to block the purchase of the crown of the kingdom by Charles of Anjou at the time of the council of Lyon, and was appointed seneschal by King Henry on his arrival. John and his troops, supported by the French king, resumed the protection of the Latin Kingdom as the French regiment had done at the time of Louis IX.[270]

The French contribution to the support of the Latin Kingdom was not only rendered by the king of France through the French regiment, however. There was also the Master of the Templars, William of Beaujeu, who led the Order from 1273 to 1291.[271] William was from a distinguished Burgundian family with a long Crusading tradition; moreover, the family was related to the French royal dynasty by marriage. William supported the policies of Charles of Anjou particularly against King Hugh of Cyprus, but his first loyalty was to the Capetian king of France, as Jonathan Riley-Smith has pointed out. With regard to the Hospitallers, although they did not have a master with the same noble status as William of Beaujeu, they did have a series of outstanding and experienced leaders in the persons of, especially, Hugh Revel (1258–77), and also Nicholas Lorgne (1277–84) and Jean de Villiers (1285–93).[272]

In discussing the personages and groups of people just mentioned, it should be clear that they constitute examples of potential patrons, not figures for whom we have documented evidence for their actual commissions. In the latter category there are, however, a few examples. In mid-June 1287, we know that Alice of Brittany, comtesse of Blois, arrived in Acre with a large contingent of soldiers. She had taken a vow as a Crusader in 1267, and eventually set out to fulfill her vow as a widow. In 1288 she contributed a substantial sum to pay for strengthening the walls of Acre with a tower, along with a chapel inside the city, in which she installed a priest to say Mass every day, before she died there in August of the same year.[273] Jeanne de Chatillon also came to Acre in 1287 on pilgrimage, but we know nothing about her interest in patronizing the arts.[274] Alice of Brittany was, however, not the only noble woman known to have come to Acre who sponsored works of art or architecture. In 1271 Eleanor of Castile, wife of Prince Edward of England and future queen of England, came to Acre with her husband on Crusade. While she was there she commissioned a translation of the *De re militari* by Vegetius, from Latin into French. This manuscript, which she also apparently had illustrated, she gave to him as a gift. The colophon of this codex mentions "master Richard" who seems to have been the scribe, but also may have been the translator. Whether or not Richard did it, the translation appears to have been done in Acre by an Englishman for the lady, Eleanor.[275] It would be interesting to investigate more widely what other noble women came East to aid the Holy Land at this time, where they may also have commissioned works of art or architecture!

Among the knights and soldiers who commissioned works of art, few are known to us by name during this period. The most prominent figure is, however, William of St. Stephen, who was a distinguished Hospitaller jurist and historian. Jonathan Riley-Smith gives the following biographical details about him:

> William of S. Stefano was probably an Italian. In 1282 he was in Acre, where he commissioned a priest called Master John of Antioch, who was perhaps a brother of the Order and may have been a native Syrian, to translate from Latin into French two treatises, the *De inventione* of Cicero and the *Rhetorica ad Herenium*, which at that time was ascribed to the same author. A little later he returned to Europe and sojourned in the Priory of Lombardy. There, between 1287 and 1290, he compiled the first collection of documents, statutes, *esgarts and usances*, using materials sent to him by Bernard de Chemin, the Treasurer of the Hospital. He returned to the East, where he held the important preceptorate of Cyprus from 1296 until 1303. He was therefore a capitular bailiff at the time of the great dispute of the Convent with William of Villaret, the materials for which he collected in his greatest work.... William's thought was not particularly original. He had however, real merits as a commentator upon the laws of the Hospital and must rank with William of Tyre as one of the great historians of Latin Syria.[276]

What is of the greatest interest for us about William of St. Stephen's commission, however, is the nature of the artist who illuminated his book. The fact is that when the presentation copy of John of Antioch's translated text was prepared for William of St. Stephen, it was illustrated with four panel miniatures, four illuminated initials, one historiated initial, two illuminated schemata, and various marginal drolleries, all executed in a Parisian Gothic style! This means that William chose not to commission a Crusader artist to illustrate his book, but rather a recently arrived French Gothic artist painting in a very up-to-date Parisian style. His commission therefore takes on special significance for our understanding of the nature and development of Crusader art in Acre, not only in the period 1268–89, but also since the time of Louis IX, and all through the thirteenth century. His commission is of the greatest interest since the artist of this book is the same artist who illustrated the *Livre des Assises* of Jean d'Ibelin mentioned earlier, a man we are calling the Paris–Acre Master.

Many other commissions were rendered for books decorated in this French Gothic style, along with a number of works in the more familiar and more complex Crusader style. Unfortunately we do not, however, know the names or identity of any of the other patrons who were involved in projects from this period, with perhaps two exceptions, the second a very special case.

When this French Gothic painter arrived in Acre, the Paris–Acre Master, one of his first works was a cycle of images for a book of Old Testament Bible selections, a codex now in the Bibliothèque Nationale in Paris, MS. nouv. acq. fr. 1404, done about 1280. Although we do not know the specific patron for this manuscript, the text of the Book of Judges contains a very interesting prologue that names two Templars in England in the twelfth century for whom this translation was done.[277] It is very likely, given the fact that this manuscript is one of the only Old French bible texts preserving this special prologue, that the patron here in Acre was also a Templar or connected to the Templar order in some way.

The second book is an even more remarkable commission. In 1957 Hugo Buchthal proposed to attribute a magnificent illustrated manuscript of the *Histoire Universelle*, a codex now in London, British Library, MS Add. 15268, as follows:

> The British Museum manuscript is probably a royal dedication copy which may have been produced to celebrate a special event...; it is perhaps not too bold to argue that it was presented to King Henry by the military aristocracy of Acre on the occasion of his coronation, and to commemorate the pageantry staged in his honor.[278]

By proposing to see this codex as a gift to the new king, Henry I of Jerusalem, from the corporate lords of the kingdom, on the occasion of his coronation in August 1286, Buchthal is interpreting this book as a diplomatic gift of the first rank. It is also a work of the highest importance for understanding the self-image of these lords at Acre and their Crusader artistic tradition. We shall discuss this issue and the richly multicultural content of this manuscript later. Suffice it to say here that in the absence of documented artistic gifts exchanged between the Crusaders and Mamluks, Mongols, Armenians, or Byzantines at this time, this is potentially the most important Crusader diplomatic gift we can identify, if this interpretation continues to be accepted.[279] It is also another possible, indeed probable, example of a collective commission comparable to the kind we consider later that may have been made by the various confraternities.

In the area of commerce, Acre was very important all through the thirteenth century, but especially so as the Latin Kingdom shrank in size after 1244. The complexity of the economy of Acre has recently been given some enlightening discussion demonstrating that its maritime commerce was lively and complex, operating on a three-tier basis. It was important for banking activity as well, and it also had important involvement in land trade and in relations with the rural hinterland.[280] One of the important aspects of this new understanding of the Acre economy is its wider scope and greater complexity compared to the views expressed in older studies. Acre traded not only with western Europe on one level, but its merchants were also involved with trade between Constantinople and Egypt – Alexandria and Damietta – at a second level. Thirdly, Acre also participated in a trading system up and down the coast of the eastern Mediterranean, from Ayas or Laiazzo to Lattakia, Beirut, and Tyre, and, before their fall, to Antioch and Tripoli as well. Trade between Acre and the other port cities and major inland Muslim centers such as Damascus and Mosul was also carried on as part of this regional network. This activity was, however, obviously dependent on the military and political state of affairs between the Crusaders and the Muslim powers, which changed frequently in the thirteenth century. As far as banking was concerned, the role of the military orders as bankers continued in the second half of the century.[281] However, this situation had changed somewhat with the arrival of Louis IX on Crusade in 1248, when new sources of loans were needed for the massive work undertaken by the French king in the Holy Land. This need was met partly by a consortium of Italian bankers from Piacenza, Genoa, Siena, and Florence in the late 1240s.[282] The issue of land trade and relations with the rural hinterland pertains to the agricultural and pastoral products produced by peasants on their land for supply of Acre's needs and sale in Acre's markets, and it pertains to the goods that the merchants of Acre sold to those in the rural hinterland, both products acquired from elsewhere and those manufactured inside the city limits.[283]

Among the merchants in the Latin Kingdom it was the Venetians who had assumed the position of commercial predominance following the War of St. Sabas in Acre after 1258. Venice achieved this when they successfully defeated a Genoese fleet in a sea battle off the coast of Acre in that year. With regard to Acre this meant not only commercial primacy in the trading and exchange of goods, but also the transport of pilgrims. Acre was the primary port for pilgrimage to the Holy Land during this period.

Even though Pisa maintained its quarter in Acre, and Genoa and Pisa maintained a presence in other important Crusader ports such as Tyre, Beirut, and Tripoli, they were increasingly marginalized by the Venetians. Genoa held on in the face of Venetian competition by means of their Black Sea routes and importance in the silk trade, but the Pisans, following their naval defeat in 1284 at the hands of the Genoese, played a shrinking role in the commerce of the Latin East after that point.[284] We know of no individual merchants, Venetian or otherwise, who specifically commissioned works of art at this time, but the strong presence of the Venetians in Acre along with evidence for Veneto-Byzantine Crusader works before 1268 make them prime potential patrons in this period. Jacoby points out in addition that many educated Venetians knew Old French, giving as examples the fact that Marsilio Zorzi had borrowed a copy of the *History of Outremer* in order to use parts for his work, and in 1294 a Venetian from Acre had had his will drafted in French. It is evident that Italian merchants, and especially Venetians, are likely patrons in Acre.[285]

One subject of importance for the consideration of patronage by nonecclesiastical residents and visitors in Acre in particular is the existence of confraternities as part of the social, religious, and political structure of society in the Latin Kingdom in the thirteenth century. Jonathan Riley-Smith has identified the presence of the confraternities in the political life of the city of Acre in documents of 1269 and 1276.[286] Other scholars have also contributed to the study of these organizations.[287] He has described their role, "not as eleemosinary but as crusading institutions, committed to the defence of the Holy Land.... [They were] sworn associations of laymen devoted to works of piety."[288] We know about these organizations only fragmentarily, especially in the last third of the thirteenth century. In 1276 there is evidence for the confraternity of St. George of Lydda and Bethlehem, members of which were Greek Orthodox Melkites. In 1271 a confraternity dedicated to Edward the Confessor for Englishmen had been established by Prince Edward of England while he was in Acre. One confraternity was for Italian pilgrims, named in honor of the Holy Spirit. Another, the confraternity of St. Andrew, was open to anyone, which was quite exceptional. For the most part these organizations were for specific people, either persons who came from a certain place or people of a certain religion. Unfortunately the evidence for these confraternities is slight and so far we know relatively little about them; we do not even know whether there was one specifically for the Venetians in Acre, although it is likely there was.

The lack of evidence about these confraternities is a pity because, as we have already remarked in an earlier chapter, similar organizations were known to be playing an important role as patrons for painting in Italy in the Dugento. Italian confraternities were important furthermore as collective patrons for the newly configured painted panels that began to be installed as altarpieces in various churches.[289] One of the important features of these Italian confraternities that so far has no explicit documented parallel in the East is their liturgical perfomances. Indeed, certain types of confraternities, the "*compagnie delle laude*," were groups of laymen (and sometimes laywomen) organized primarily under the auspices of the Dominican, Franciscan, and other mendicant orders to receive religious instruction, provide charitable services for the poor, and above all to conduct their own liturgical services that featured the devotional activity of *lauda*-singing. It is here, as the lyrical core of a lay, vernacular liturgy, that the *lauda* arose in the thirteenth century, ... and became the dominant insignia of the lay religious activism fostered by the mendicant orders."[290] The devotional focus of the *Laudesi* was on the cult of the Virgin, and we can recall once more that it was the confraternity of the *Laudesi* in Florence that commissioned the *Rucellai Madonna* in 1285 by Duccio.[291] Although it remains to be seen whether there exist in the Latin Kingdom confraternities that are parallel to the *Laudesi* in Tuscany in purpose and activity, Jonathan Riley-Smith concludes his discussion of these Crusader confraternities by noting an intriguing point. Given the fact that we have "the appearance of two Eastern Christian confraternities linked to the crusading orders, ... there is the fascinating possibility that in the thirteenth century there may have been Greek Orthodox and Nestorian Crusaders."[292] The potential significance of such confraternities and such Crusaders for shedding light on artistic patronage involving icons done by Crusader artists for particular functions not now clearly understood is evident. More research is needed here and constitutes a major *desideratum*.

Another major category of important potential patrons is clearly the pilgrims to the Holy Land, as noted earlier.[293] Pilgrims came to the Holy Land to visit the holy places, but the accessibility of these places varied according to circumstances. Quite possibly those with sufficient means would wish to donate works of art to these sites, or commission works to carry with them as devotional objects, or acquire works to take with them – manuscripts, paintings, relics – as records of their pilgrimage, as works to inspire their family and friends back home. We know of several important pilgrims to and pilgrim's accounts of the Holy Land during this period, which we commented on earlier. There is the shadowy Rusticien de Pise, who later wrote the celebrated account of Marco Polo, who had passed through Acre in 1271. There is the anonymous compiler of the *Pelrinages et Pardouns d'Acre*, who wrote probably in the early 1260s, not the 1280s as has previously been thought. There is the account of the German pilgrim, Burchard of Mount Sion, written about 1283.[294] There is the little-known pilgrim from 1285–91 identified as Philippus Brusserius Savonensis, who must have seen the same things Burchard saw shortly before the fall of Acre to the Mamluks, and whose account was written shortly after that of Burchard.[295] Finally, there is also the celebrated account of Ricoldus de Monte Crucis O.P., who reports that he saw more than ten-thousand pilgrims along the Jordan River in January of 1289.[296] It should be noted also that these pilgrims could be either western European or Byzantine pilgrims, as Jacoby has pointed out.

These are the main texts that relate to pilgrimage at this time, demonstrating that pilgrimage continued even though what the pilgrims were able to do and see, and how they did it, had changed compared to what we know about the earlier years of the thirteenth century. There are other pilgrims as well, such as Eleanor of Castile, mentioned earlier, who came with her husband, Prince Edward of England, on Crusade. We know about a certain William of Valence, who traveled to the Holy Land in 1273. In 1376 Mary, countess of Pembroke, left to Westminster Abbey "a cross with a foot of gold and emeralds" that her long-dead father-in-law, William of Valence (+1296), had acquired and carried home with him from Acre.[297]

In sum, the pilgrims constitute an important class of potential artistic patrons. However, very little direct evidence can be associated with them. It is odd, for example, that given the comparatively large number of German pilgrims in the overall crusader period of the twelfth and the thirteenth centuries, very little in the way of Crusader art with any German affiliations can be identified! Despite the prolific writings by German pilgrims, we have almost nothing in the way of works of art – with the exception of the Freiburg Leaf from the late 1190s – that we can associate with them. Despite detailed historical discussions of pilgrims in general and German pilgrims in particular, very little can be said from direct evidence about their interest in, and specifically their patronage of, Crusader art.[298]

One final category of potential patrons is the Eastern Christians. Their numbers grew in Acre during the thirteenth century, where they were located mainly in the suburb of Montmusard. An increase in their numbers is indicated especially from the 1260s onward, following the Mongol invasion of Syria.[299] They are of considerable interest and clearly need more study as potential patrons of certain works of art, like icons, on the one hand, and as participants in the Christian culture of the Latin Kingdom on the other, interacting with the Latins and perhaps supplying some of the manpower for the production of works of art for Crusader patrons.

ACRE AS AN INTELLECTUAL CENTER

In light of this very fragmentary evidence for the artistic patronage in the Latin Kingdom, and especially at Acre in the years 1268–89, what estimate can we make of Acre as an artistic and intellectual center in the Latin East? There can be no doubt that Acre was primarily a city of commerce, a port city that became the capital of the Latin Kingdom by necessity when Jerusalem was removed from Crusader control at the time of Saladin in 1187. By virtue of being the capital city, it also became a center of religious administration as most of the major religious organizations that had had their location in Jerusalem migrated to Acre. Only very gradually did Acre become a religious center as well. Whereas Acre had no holy sites as such, later in the thirteenth century, as David Jacoby has argued, it developed its own organized pilgrimage to religious houses for which indulgences were assigned. Jacoby and Grabois note that Burchard of Mount Sion, who visited Acre in 1280, still did not consider Acre part of the Holy Land, that is, it had no major holy sites. However, in fact the development of Acre as a kind of sacred space had emerged after Louis IX left the Latin Kingdom in 1254. In lieu of the main holy places that were increasingly difficult and dangerous to visit, "a substitute expiatory pilgrimage" was organized in Acre, which was documented in the *Pelrinages et Pardouns d'Acre*, compiled between 1258 and 1264.[300] It is no doubt at this time, in the later thirteenth century, that Acre began to assume the identity that caused it to be known as Saint Jean d'Acre in the last decades of its Crusader existence; this new name seems to have arisen partly from the new religious role of the city, partly from the prominence of the Hospitallers there, the Knights of St. John.

With this in mind, and to begin our discussion of Acre as a cultural and intellectual center for the Crusaders, let us return to the description that Archbishop William of Tyre gives the city in the 1170s, and comment on how it had changed by the late thirteenth century. William of Tyre says:

> Acre is a city on the seacoast in the province of Phoenicia, one of the suffragan cities which is under the metropolis of Tyre.

In the thirteenth century, Acre was no longer a suffragan city, but was the place where the patriarch had his cathedra. Not only had Acre become the residence of the patriarch of Jerusalem, but also, in the second half of the century, the office of bishop of Acre had been combined with his position as patriarch just as the office of papal legate had been merged with his patriarchal powers in the first half of the century. Tyre was no longer the metropolitan city over Acre; Acre was the patriarchal city over Tyre. Tyre was now the place for the coronation of the Latin kings of Jerusalem, but Acre was of course the political capital of the kingdom since 1191 and the residence of the king or his *bailli*. William continues:

> Its double harbor, lying both inside and outside the walls, offers a safe and tranquil anchorage to ships. It is well located between the mountains and the sea and possesses wide domains with rich and fertile fields. The river Belus flows past the city.

As we have seen the city had expanded enormously in the thirteenth century, with the major addition being the suburb of Montmusard, north of the old city. It is not clear, however, whether the harbor, which in the thirteenth century only grew busier than in the twelfth century, had also expanded. Already in the late twelfth century Ibn-Jubayr called Acre's port "second only to Constantinople," and Benvenisti points out it was the single most important harbor on the eastern Mediterranean coast during this period.[301] Certainly Acre became even more important as the leading port in the Latin Kingdom during the thirteenth century, and provided port facilities to handle repeated Crusade expeditions, regular pilgrimage traffic especially in the spring and fall, and intensive commercial activity. One wonders whether when the second line of city walls had been built in the thirteenth century there had also been any enlargement of the quays or the arsenal, where barges brought goods from ships anchored out in the bay, or ships could be repaired and built, respectively. One wonders whether later on, the Venetians in particular had taken advantage of their new position of commercial dominance after the War of St. Sabas to expand their port facilities for handling commerce. Outside the city, the rich and fertile fields were no doubt still there, but they had sometimes become a bivouac area for various armies, the site of pitched battles, and even the object of wanton destruction by Baybars and his troops from time to time, as graphically described by the Templar of Tyre. Therefore, what their condition may have been by 1268 is a bit unclear. William's description then addresses the name of the city:

> According to the story generally received, it was founded by two brothers, Ptolemais and Acco. They fortified it with walls of solid masonry and divided it into two sections, which were called from their names. Hence, even today it is known indifferently as Ptolemais or Acre, as is the case with most of the cities of Syria, each of which has, as a rule, two or even three names.[302]

The understanding of the name of the city in the thirteenth century seems to change slightly. Ptolemais is identified as the old name and Acre is the contemporary name, according to Matthew Paris.[303] Both Marino Sanudo and Paulinus of Pozzuoli say the city known as "Acon" or "Ptolemais" is commonly called "Acri" or Acre.[304] The current understanding is that toward the end of the thirteenth century the city began to be called St. Jean d'Acre, because of the evolution of pilgrimage there as indicated by the *Pelrinages et Pardouns d'Acre*, and because of the prominence of the Order of the Knights of St. John of Jerusalem there. It remains to be seen, however, what attested use of this name can be found in the writings of this period, before 1289 or before 1291.[305]

In this setting the reality of Acre as an intellectual center has received differing evaluations. Some historians have seen this role of the city in a positive light;[306] others have been more matter-of-factly sceptical. Runciman expressed serious doubts, presented in terms of an estimate of the "Intellectual Life in Outremer."[307] He argued that intellectual life in Outremer compared unfavorably with that in Sicily or Spain at the time. Fundamentally he perceived society in the Crusader East as largely composed of soldiers and merchants, and that they had very limited contact with the local indigenous population. It "was, in fact, that of a Frankish colony. . . . On the whole Frankish culture in Outremer remained an occidental importation, with very little contact with native culture, except in the arts."[308] The real measure, as Runciman sees it, was the lack of centers of learning in the Latin East. "It was the absence of these centres that made the cultural contribution of the Crusades to western Europe so disappointingly small."[309] The only positive aspect Runciman could see was in the arts. He writes, "in some of the arts . . . their achievements . . . were remarkable; for the colonists were not numerous and only few of them can have been artists."[310]

This rather dismal overall view is now almost fifty years old, and our understanding of Acre has changed in the interim. Whereas some might say this assessment is more accurate than not for the Crusader States in general, referring to the period 1098 to 1291, it does not apply wholly to the urban culture of Acre in 1268–89 in several ways. First, it is misleading to see Acre as a colonial society, when it was clearly quite multicultural during most of its Crusader history.[311] It is only in the later thirteenth century, following the residency of King Louis IX, when the accumulation of soldiers from Crusade expeditions and the extended appearance of the French regiment gives Acre a more colonial aspect perhaps. Second, whereas many important crusader cities in thirteenth-century Syria-Palestine may have been constituted mainly of soldiers and merchants, Acre by contrast also had a substantial religious presence among its people, mostly Latin Christians among the Frankish residents, but also composed of Eastern Christians among the indigenous population. Furthermore, the merchants who traded here were quite diverse and included besides those from Italy and France, Muslims from northern Africa, Damascus, Baghdad, and Yemen, Armenians, Jews, and even Nestorians from Mossul. With these "natives" the Frankish merchants certainly did have contact in their business dealings. Also despite great differences of opinion over the years about the extent to which Frankish settlers in the Latin Kingdom learned Arabic and interacted in the local languages, a recent study argues that "knowledge of Arabic among the Franks seems to have been more extensive than hitherto thought."[312] Third, because of the presence of the religious communities in Acre, there were centers of learning in Acre, albeit not of university stature, and the richness and significance of cultural interchange was perhaps greater than Runciman was willing to admit. A brief discussion can bring these points into clearer focus.

Because of the presence of the numerous religious houses in Acre, there were Christian schools in Acre. Theology was taught here since 1218. Besides the likelihood of a school connected with the Cathedral of the Holy Cross, the Franciscans and the Dominicans must have had *studia* in Acre. William of Rubruck had been assigned to the Franciscan convent (established *c.*1219) as *lector* in 1255, and the Dominicans with their emphasis on study, preaching, and missionary work surely had a similar *studium* in their establishment (founded *c.*1229). Certainly both the Franciscans and the Dominicans were actively involved in the study of oriental languages, including Arabic and Armenian, for their missionary activities.[313] These three places would have been centers of study in Acre, each with some kind of library.[314] Other major orders were present in the city as well, such as the Carmelites, the Benedictines, and the Cistercians, but we know very little about their intellectual activities there.[315]

There had been a certain level of literary activity in Acre throughout the thirteenth century, connected, for example, with the names of Jacques de Vitry, Thibaut de Champagne, and William of Rubruck, and we can see evidence for this continuing after 1268.[316] William of Tripoli, O.P., wrote his work *De statu saracenorum et de Mahomete pseudopropheta et eorum lege et fide*... in Acre in the early 1270s.[317] A Dominican friar named Yves, who may or may not be the same person as Yves le Breton, O.P., who acted as an interpreter for Louis IX, is known to have been in Acre in 1279 before he became archbishop of Nazareth in 1290. Yves le Breton himself is known to have been a very learned Frenchman, and K. Ciggaars speculates that he could have been sufficiently well-versed in Arabic to make translations of texts pertaining to the Miracles of the Virgin from Latin and Old French.[318] Burchard of Mount Sion, O.P., the pilgrim, wrote part of his account while in Acre in the early 1280s.[319] The last patriarch of Jerusalem, Nicholas de Hanape, O.P., was also a man of letters who had written a well-known treatise in Paris before coming East.[320]

We also have evidence of translators and scribes working in Acre at this time. In 1282 John of Antioch translated classical texts from Latin into French for the Hospitaller, William of St. Stephen,[321] while ten years earlier, in 1271–2, a Master Richard apparently translated the military treatise of Vegetius, also from Latin into French. An eight-line verse that accompanies the translated text of Vegetius includes the following reference:

> Mastre Richard, vostre clerc, que vostre livere escrit En la vile d'Acre sans nul contredit.[322]

In 1270 a scribe wrote a verse colophon in a manuscript of the *Image du Monde*. He called himself "Jaquemin d'Acre."[323] In the 1270s a scribe's name appeared in the colophon of a *Histoire Universelle* manuscript: "c'est livre escrist Bernart dacre."[324] The fact that both Jaquemin and Bernard sign themselves in this manner suggests that the book may have been intended for someone outside of Acre, and that inclusion of this formulation as being from Acre would enhance, certainly not diminish, the prestige of his work. Indeed having these men sign their works this way suggests that they were working in a city, which by the later thirteenth century had something of a reputation for manuscript production.

These are admittedly only fragmentary glimpses into the literary world that existed in Acre at this time, but when put together with other evidence, they help us understand that there was a thriving cultural life in Acre. Acre was after all a very large and important city, and the diverse multicultural population and the resources available to support book production and the arts were substantial. However, besides this admittedly fragmentary evidence for Christian Acre, we also know that the Jewish community had become very important in the city during the thirteenth century as more and more Jews came to the Holy Land. Prawer pointed out that a Talmudic academy existed for Jews of French origin, along with Rabbi Salomon Petit, who expounded the Kabbala for those from Spanish lands. These Jews mixed and debated with others from the Near East. The Jewish community flourished in Acre in the latter part of the thirteenth century, but was destroyed during the Mamluk conquest in 1291. We would also like to know about centers of learning and literary activity for the Muslims and Eastern Christians in Acre as well.[325]

Another approach to the study of Acre as a cultural center is through the consideration of what written works would have appeared in the libraries of an educated noble or soldier of means at this time, and what libraries there may have been in Acre. Even though we do not as yet have any specific archaeological evidence for the existence of such libraries in Acre, by their putative books we shall endeavor to know them. By considering the books that were produced in Acre, or texts known to have been written there, at least a partial profile of the intellectual interests of the educated class can be sketched out.[326] Grabois identifies the following categories and examples of manuscripts known to have been done in Acre for secular patrons; we will focus on what we know about these categories and examples in the period 1268–89:

1. Religious books;
2. Translations of the Greek and Roman classics;
3. Legal texts;
4. Historical works; and
5. *Chansons de Geste* and *Romans*.

In the first category, religious books, the remarkable fact is that the main extant works are Bibles and psalters. The psalters are written in Latin, manuscripts such as the Book of Psalms and Prophets now in Padua and the Riccardiana Psalter. By contrast the Bibles are early translations of the Latin into Old French and date to the second half of the thirteenth century. We have already discussed the Arsenal Bible in Chapter 6 as a work of 1250, and the second Bible codex is Paris, Bibliothèque Nationale, MS nouv. Acq. Fr. 1404, to be dated *c.*1280. All four of these manuscripts are illustrated, and although two of the first three are royal commissions, the last one is very possibly connected to an educated knight, perhaps a member of the Templar Order. What is also remarkable is that despite the continuous production of liturgical service books for Crusader use up to this point, none is extant from the period after 1268. The interest in the narrative books of the Bible in MS nouv. Acq. Fr. 1404 corresponds with the interest shown by the nobility in linking their presence and their activities with the biblical and historical past in the Holy Land. We can also see this interest manifested in the commissions of illustrated books of the *Histoire Universelle*, which contained translated paraphrases or independent versions of Biblical history along with other texts of historical content.

There are relatively few individual examples in the second category of classical texts, but the main book that survives, an Old French translation of Cicero's *De inventione* and the *Rhetorica ad Herennium*, now in the Musée Condé at Chantilly and dated 1282, served as a basic schoolbook in the Middle Ages. It has to be thought of in the category of classical works for basic and practical studies. It remains to be seen why a Hospitaller jurist of the stature of William of St. Stephen would want such a fundamental text for his personal collection, and why moreover he would want it to be translated and illuminated. Again in this category there are composite books, which contain material pertaining to the history of Greece and Rome, and the chief example here again is the *Histoire Universelle*.

When it comes to legal texts, this was a field in which the Crusaders excelled. As Joshua Prawer observes, "in no contemporary Christian nobility was knowledge of customary law and procedure and mastery over the intricacies of constitutional law so cultivated and cherished as in the Latin Kingdom.... All its intellectual energies appear to have been concentrated in the study of law."[327] Furthermore, whereas it is hardly surprising to find manuscripts of law books written in the Crusader East, and clearly many of them must have been written in the Latin Kingdom, either in Acre or Tripoli, until very recently most extant codices had been thought to come from Cyprus at a later time, after 1291. Thus it was quite remarkable when Peter Edbury identified two very early manuscripts of the *Livre des Assises* of Jean d'Ibelin as coming from Acre, instead of Cyprus as previously thought.[328] Jean had completed his treatise in 1265–6, and these two manuscripts should be dated in the later 1280s or 1290.[329] It was even more remarkable to discover that one of these codices was illustrated, with a miniature we have discussed briefly (Fig. 234, CD 204). We shall discuss the artist, the Paris–Acre Master, and the place of this miniature in his oeuvre in Chapter 8.

Among the extant manuscripts, it is the historical works that constitute the most substantial corpus so far identified from Acre. Many of these works deal with ancient history, such as parts of the *Histoire Universelle* and the *Livre de César*, but the most popular work was the *History of Outremer*, written by William II, archbishop of Tyre. It was translated from Latin into Old French and continued in texts of varying lengths down to 1231, 1248, 1261, 1264, and 1275. At the moment we have eight manuscripts executed in Acre surviving that contain the *History of Outremer*, six of which are illustrated. Remarkably, five of these were produced in Acre in the period from 1268 to 1291. The second most popular work, based on the number of extant copies, was the *Histoire Universelle.* There are three extant manuscripts from Acre in this period, all of which are illustrated. Only one manuscript of Roman history survives from Acre, and it too is illustrated.

Finally, we can consider the fifth category, literary works. In many ways this is the most puzzling category, because we have references to many works of literature in various written sources known in the Latin East, but no manuscript – illustrated or unillustrated – has yet been identified from the Latin Kingdom or any other major center in the Latin East.[330] These works are quite diverse and include poems such as the first part of the epic cycle of the Crusades. This part

> was apparently begun toward the end of the twelfth century by a versifier named Graindor of Douai, who rewrote and amalgamated three previously independent poems, *La Chanson d'Antioche*, *Les Chétifs* (the Captives), and *La Conquête de Jérusalem*, which dealt with the First Crusade. Graindor's compilation was later prefaced with an account of the fictitious youthful exploits of Godfrey of Bouillon and the story of his mythical grandfather, the swan-knight; at a later date (the middle of the thirteenth century) a sequel was added which carried the narrative from the end of the First Crusade down to the emergence of Saladin.[331]

We can also think of other works in Old French literature, which refer to Western captives, such as the epic *Huon de Bordeaux*.[332]

Among works not linked to the Crusades, the most popular in Acre were the legends of Alexander the Great, the *Roman de Troie*, and *La Chanson de Thèbes*.[333] We also know that the Arthurian stories enjoyed great popularity in the Latin Kingdom.[334] With regard to this last group of works, it is perhaps surprising that we do not have any extant manuscripts of these texts that we can, as yet, identify as having come from Acre apart from excerpts from some of these texts found in the *Histoire Universelle* manuscripts. Another aspect of these *Histoire Universelle* texts is their stories of the Amazons, which are also mentioned by the Templar of Tyre when he discusses the celebrations following the coronation of the new king, Henry II, in Acre.[335]

There is another, sixth, category of books, hagiography and miracles of saints, that might also be added to this discussion. Although some might include these works under the literary rubric, I prefer to see them as a separate category, which emphasizes their special character. We do not have any manuscripts of the *Miracles of the Virgin* that are known to have been done in the Holy Land, but certainly some circulated out there, and some very likely were also made there. Krinije Ciggaars points to the possibility that someone like Jacques de Vitry must have had such a manuscript in his trunk when traveling to the Latin Kingdom.[336] With regard to saints' lives, one relevant example might be the *Vita* of Jordan of Saxony, O.P., Master General of the Dominican Order. Jordan of Saxony visited the Dominican convent in Acre in the winter of 1236–7, and when he set sail to return to Europe his ship sank and he drowned on 13 February 1237. His body was buried in the Dominican house in Acre and his tomb became a place of veneration. His *Vita* included the account of a miracle in which Jordan saved a woman from a poisonous spider, a miracle that found its way into other compilations and was circulated in the East.[337]

Finally we might add a seventh category of books to include in these libraries, encyclopedias and books of general knowledge. Encyclopedias were obviously extremely popular in the thirteenth century, but the specific example that can be cited with reference to Acre is the *Image du Monde*. This text is a reworking in Old French by Gossuin de Metz of an older Latin work, which was widely known in Europe. A manuscript of the *Image du Monde* was apparently made in Acre with a colophon in verse.[338]

In contrast to these books for which documentation of their existence in Acre can be located one way or another, there are also the books in a different general category, for example, those that would have belonged to a *studium* in a religious house, for which perhaps our best evidence survives in the much earlier twelfth-century list of a library for what appears to be a religious house in Nazareth.[339] This kind of library has a completely different focus as selections from its list of standard classical and ecclesiastical authors indicates:

"Hii sunt libri conventus Nazarene ecclesie.
[Religious texts:]
Ieronimus super psalterium,
Anbrosius (sic) super Lucam,
Matheus; textus Marci evangeliste; Iohannes; apocalysis Iohannis,
Textus iiii evangeliorum,
Gregorius super ii libros Ezechielis,
Gregorius super cantica canticorum,
Gregorius super moralia Iob,
Epistole Ieronimi et Augustini,
XV libri beati Augustini,
Augustinus de Trinitate,
Augustinus super Iohannem,
Epistole Pauli glosate,
Liber Ieronimi questionum Hebraicarum,
Isidorus de summo bono,
Gesta pontificum,
Registrum Leonis pape,
Duo libri dialogorum Gregorii,
[Classical texts:]
X libri de phisica,
Duo libri de luna,
Arimethica (sic),
Alius de construcione,
Magnus Pricianus,
Iii Boetii cum glosulis,
Ii Oracii cum glosulis,
Ii Salustii,
Eneis Virgilii,
Lucanus cum glosulis,
Iuvenalis duplex,
Tullis de amicicia,
Iii Prucencii,
Commenta Boetii,
Duo Ovidii epistolarum,
Ovidius de amatoria arte,
Ovidius de Ponto,
Ii O. de remedio amoris"

These are fundamental and important religious and classical texts for study. We note that all the texts are in Latin, and that certain authors are emphasized, namely, the Evangelists, Jerome, Augustine, Gregory, Virgil, Cicero, Ovid, and Boethius. There is no indication that any of these books would have been decorated or illustrated.

In perhaps a third general category would be the books held in the chapel libraries of the religious orders, such as the Templars and the Hospitallers. Occasional references to such holdings can be found in the archives of these orders. The *Règle* and the *Retraits* of the Templars mention a variety of books, for example, gospels and psalters, with emphasis on works for the recitation of the hours and on prayers in the missal.[340] Every Templar convent would have had a chapel for services. Even though we do not have an inventory from the Latin East, a listing of holdings from a suppressed Templar establishment in Picardy provides a partial idea of what standard ecclesiastical books would be available. The Picard list includes a breviary in two volumes, a gradual, two large books "deu temporal," a book of epistles, a *prosarium*, a life of the Fathers, and an Office of the Dead.[341] Bearing in mind how large and important were the Templar establishments in Acre and at 'Atlit, we can imagine a much larger and important collection in each place.

There is also a subcategory of books that might be mentioned here, the official books of the Templars, in the form of the *Règle* and the *Retraits*, as well as Bernard of Clairvaux's defense of the Order, the *De laude novae militae*. Riley-Smith points out the masters and grand commanders followed a policy that no ordinary brother of the Order was allowed to have a copy of the Rule or the *Retraits*, and the Templar brother knight Géraud de Gaûche had even had to give up his copy of Bernard's *De laude novae militiae*. Later on it was returned to him. Géraud was a knight who served a long time in the East, and we might wonder whether his copy of Bernard's text might not have been written and even conceivably decorated in Acre, or 'Atlit, as well. If so, Géraud must have brought it back with him when he returned to the West, where by 1307 we find him serving as a commander at Le Bastit near Cahors.[342]

The documents of the Knights of St. John of the Hospital also provide certain references to books held by their men. The *Usances* of the Hospitallers, besides mentioning breviaries, psalters, and missals, that is, the usual prayer and service books, also refers several times to romans and chronicles, which in the Latin is rendered "romanciis seu cronicis," in the possession of the officers of the Order.[343] This clearly indicates that the personal allowance of educated members of the Hospital not infrequently was used to acquire manuscripts. Some of these manuscripts were also illustrated and even illuminated.

Finally, the important fact here is that aside from fragmentary survivals and occasional references in the documents, the only other indication we have of the existence of manuscripts of these texts from Acre in the second half of the thirteenth century is in the reports of the dispersal and destruction at the time of the fall of Acre in 1291. For example, we find reference to books in the letters of Ricold of Monte Croce, O.P., where he cites books of the prophets, gospelbooks, breviaries, missals, and books of the *Moralia in Job*.[344] These are exactly the kinds of books mentioned in the larger and more specific selection in the Nazareth list. We do not know whether these religious books were produced in Acre or when they were produced, of course; however, whether they were produced in Acre at this time, there is no extant example for us to study so far.

When we consider the libraries that these books may have belonged to, this provides additional information about the intellectual interests of the educated Frankish population. We know something about what could be found in the library of a religious house in the late twelfth–early thirteenth century, from the surviving inventory of the library of Nazareth mentioned earlier.[345] We also know that a well-established religious house would have had a full complement of liturgical service books. However, we should recall from the inventories of Eudes de Nevers that his personal library in his possession at the time of his death contained both service books for his personal *cappella* – a sanctorale, a missal, and a breviary[346] – and works of literature – a *romanz de loheranz*, a *romanz de la terre d'outremer*, and *li chançoners*.[347] What the article of Grabois describes is the wider holdings of an aristocratic library, and there are one or two points of interest to note about the manuscript evidence we have for the works he cites. In the first place we have six examples of one of the texts, the *History of Outremer*, done in Acre.[348] As we shall see two of these manuscripts were illustrated by a Crusader artist in the multicultural Crusader style of the 1270s, and portions of two other manuscripts were illustrated by Crusader artists of the 1280s. The remaining two manuscripts were done by the recently arrived French Gothic artist, the Paris–Acre Master, who also did most of a third work, completing a codex started by some of the Crusader artists.

If we assume that all of these manuscripts remained in Acre for a time, before they were carried away before or during May of 1291, it is evident that there were six separate libraries to which these manuscripts belonged. We say this because we assume no library had duplicate copies of this work, and all of these manuscripts contain continuations of different lengths, with the exception of the two earliest ones. Furthermore, in the case of Paris, B.N., MS fr. 2628, this codex clearly was done in Acre and then remained there, where the owner was able to have his text updated with additional text and a later miniature. This indicates that these books were being read, that the libraries were being maintained, and that the resources in terms of scriptoria, that is, parchemeniers to provide new materials, scribes, and the books they would copy from, and painters with model books or even other manuscripts they could use for their miniature cycles were available to receive commissions throughout this period, for this one type of book. It must have been possible for other texts as well.

Given the type of book here, it is likely these manuscripts were destined for private libraries of educated artistocrats, knights, soldiers, or perhaps less likely, merchants. It is not that the merchants would necessarily be less educated here, but the content of William of Tyre's *History of Outremer* with its continuations focuses on the political and military history of the Latin Kingdom, with its kings and ruling nobility, not as much on the economic history and activity of the maritime powers. It can also be noted that these manuscripts are painted in two very different styles of miniatures. There is either the established Crusader style as seen from the time of the Arsenal Bible in Acre with Louis IX or the new French Gothic style of the 1270s, which arrived with a new painter, the Paris–Acre Master, and dominated the extant commissions in the 1280s. What criteria governed the choice of one of these styles on the part of these patrons? Why did one of these patrons decide to have both styles represented in his book? Why was the French Gothic style so popular in Acre in the 1280s?

A similar analysis can be given to the extant codices of the *Histoire Universelle*, as well as the manuscript of the *Faits des Romains*.[349] What is particularly interesting is that of the four relevant codices extant with these texts, the decoration of two are done in the established Crusader style and two are executed in the French Gothic style, one by the main master and one by a competent assistant. What is very striking, however, is that when a decision had to be made about the commission in 1285/6 for the *Histoire Universelle* manuscript that was apparently to be given to the new king, Henry I, of Jerusalem, the program of decoration was done in the established Crusader style. Furthermore, it was done by a team with a minimum of at least six artists, in a rich and varied manifestation of the Crusader style incorporating Byzantine, French, Italian, and even Muslim aspects. This choice was made even though the French Gothic artist and his assistant were present and would presumably have been available to work on this highly important project had they been asked. We shall consider what the implications of this choice may have been at the time, in our discussion later.[350]

We can observe that similar to the manuscripts of the *History of Outremer*, these codices were very likely destined for similar types of libraries, not, that is to say, a library in a religious house. It is again likely that it would be educated members of the nobility, the knightly class, the soldiers of means more than the merchants, who would have been most interested in these books. We know, however, that one of the codices, the Brussels MS 10175 manuscript, was inscribed as having been written by "Bernard d'Acre," so the idea is that this book was perhaps meant to go to a library someplace other than Acre, perhaps to Tyre or, even more likely, a city on Cyprus. Furthermore, the fact that some of the same artists worked on the royal gift, the *Histoire Universelle*, MS Add. 15268, and the first five miniatures of MS fr. 9084, a *History of Outremer*, at least raises the question of what patron the latter codex was commissioned for. Most likely it was not for the king, or the lords who may have commissioned the *Histoire Universelle*, but who would have been interested in a manuscript decorated in these two very different styles, and why?

Ultimately the question must be asked, why were all of these works produced in Acre between 1268 and 1291, indicating by what is nonetheless a fragmentary and partial documentation that the most flourishing production of illustrated manuscripts occurred in the last twenty-five years of the existence of Acre as a Crusader city? Furthermore, if the extant manuscripts are indeed representative of developments in Acre in the 1280s, why should a French Gothic style supercede the established multicultural Crusader style that had existed and developed in the Latin Kingdom since the 1130s, and had flourished in Acre since its virtual rebirth as sponsored by King Louis IX? We shall attempt to address these questions in our discussion of painting in the Latin Kingdom later. However, to begin our examination of extant Crusader works in this period, we turn first to the question of the architecture.

ARCHITECTURE

One major aspect of the story of Crusader architecture in the years between 1268 and 1289 pertains to major losses. Baybars succeeded in capturing some of the strongest and most powerful Crusader fortresses including not only the major fortified city of Antioch (1268) in the northern Crusader States, but also a series of important castles including Beaufort (1268), Gaston (Baghras) (1268) near Antioch, Montfort (1271), Chastel Blanc (1271), and Crac des Chevaliers (1271), along with a number of smaller fortifications in the County of Tripoli and the Latin Kingdom. His successor, Kalavun, then continued the Mamluk assault with major victories at Margat (1285) and, of course, at Tripoli (1289).[351]

These losses meant that the Crusaders were left in control of a small series of fortified cities and castles along the coast. In the Latin Kingdom the major holdings were Acre and Chastel Pelerin in the south and the cities of Tyre, Sidon, and Beirut. In the County of Tripoli there only remained Gibelet, and farther north the city of Tortosa still in Templar control, which had belonged to the Principality of Antioch but was now associated with what remained of the County of Tripoli. This means that another important part of the architectural story in this period pertains to the upkeep and maintenance, the rebuilding and strengthening, and perhaps occasionally the new building of fortifications for these sites. The difficulty is that it is so hard to document this work either archaeologically or with the help of other documentation such as historical texts. It is also true that we know very little about any new churches or other ecclesiastical architecture being built, rebuilt, added onto, or repaired at this time.[352]

Partly this situation exists because so much was destroyed as the result of the Mamluk invasions in the years from 1268 to the mid-1270s led by Baybars and then again in the later 1280s led by Kalavun. Partly this situation exists because when things were captured they were sometime repaired and rebuilt by the Mamluks, as at Crac des Chevaliers. However, it is a pity that we cannot know more about what new building went on in any of the major Crusader cities, such as Acre, where new construction was going forward – we know Alice of Blois sponsored new strengthening of the city walls in 1287, for example – both on the defenses and no doubt also on the fabric of the city inside the walls. Because of this lack of access, unfortunately we cannot assess what impact the new Gothic style had on Crusader architecture in the late thirteenth century on the mainland, and we have to look to Cyprus to see current developments as a result. In light of the meticulous work of R. D. Pringle on church architecture and secular buildings in the Latin Kingdom of Jerusalem, we await the publication of volume 3 of his corpus of churches, which will deal with Acre and Tyre, for more information on developments, and possibly Gothic developments in those cities in the late thirteenth century. We also look forward to more published results from the ongoing archaeological work being carried forward at Akko under the direction of E. Stern.

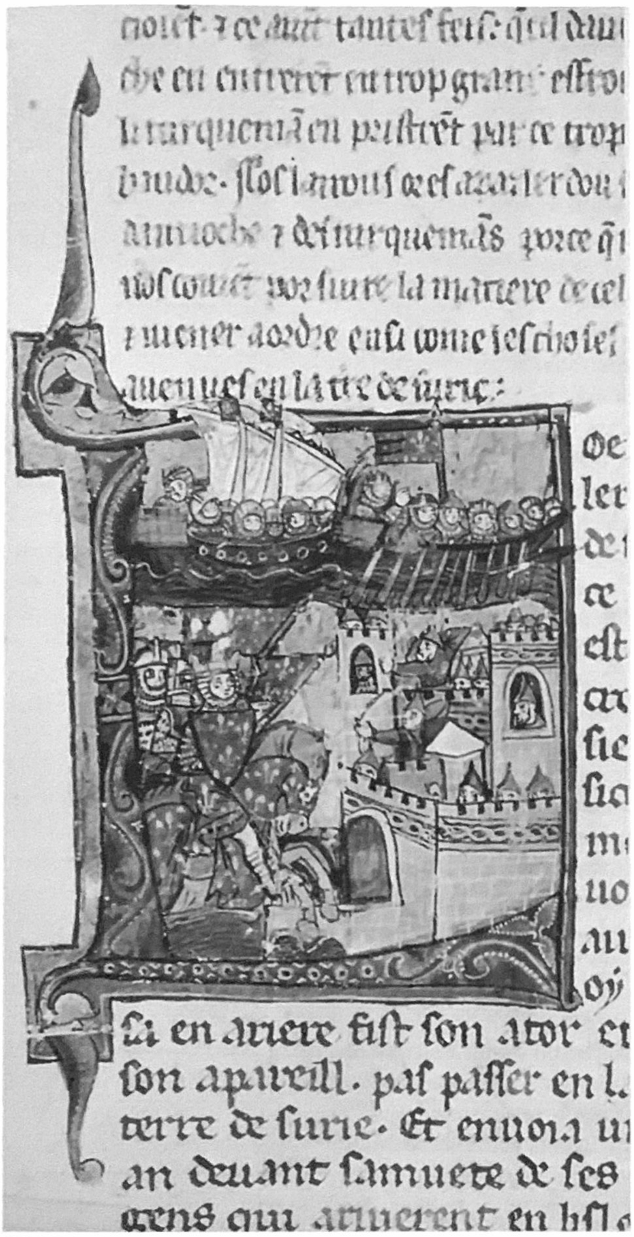
RELIGIOUS AND SECULAR MANUSCRIPT ILLUMINATION IN ACRE

Compared to the architecture, the situation in manuscript illumination is completely different. Where we find very little we can discuss about the architecture in the years between 1268 and 1289 in terms of specific examples, in book painting this is one of the most flourishing periods during the entire era of the Latin Kingdom in the twelfth and the thirteenth centuries. The output is not evenly distributed over these years with regard to the extant codices, however, as Buchthal originally pointed out, even though now we can identify almost double the number of codices compared to what he knew.[353] Whereas there are only three important cycles surviving from the 1270s, that is, the time immediately after the fall of Antioch, in the decade of the 1280s we have fully nine manuscripts with miniature cycles, and another one with a single introductory headpiece. Is this a representative distribution? How do we explain the disparity of output in these periods?

The Lyon and St. Petersburg *History of Outremer* Manuscripts

Sometime shortly after 1277, the owner of Paris, B.N., MS fr. 2628 decided to update his copy of the *History of Outremer.*[354] First he had additional chapters added to his continuation, to bring the story of the Crusader States up to 1277, and second, he had one new miniature added to the cycle of twenty-six historiated initials that been done in the 1260s for this book. Although the artist who executed this last historiated initial was not the same as the earlier painter, he worked in a very similar style. It is a Franco-Byzantine Crusader style of modest quality that illustrates a very important event for the Latin Kingdom, namely the Crusade of King Louis IX in 1248.

On fol. 328v, the historiated initial "L," which begins book 34, has a double-decker image (Fig. 235, CD 132). At the top, two ships in the fleet of Louis IX are sailing toward Egypt with the soldiers ready for battle, and at the bottom, there is the siege of Damietta, which was the one glorious victory achieved by the Crusaders during this campaign in Egypt. Although the diminutive figures are quite simply drawn and painted, and they are quite large in size compared to their boats or the architecture of Damietta they are attacking, nonetheless, this is effective narrative imagery. Furthermore, it gives the artist the opportunity to celebrate the most recent major Crusade success on the battlefield, although by this time it had been about



235. William of Tyre, *History of Outremer*, Paris, Bibl. Nat., MS fr. 2628: fol. 328v, book 34, (L)oeis le roi . . . , (historiated initial), The Crusade of Louis IX in 1248–50: The siege of Damietta. (photo by courtesy of the Bibliothèque Nationale de France, Paris)

thirty years earlier! The painter could also lavish attention on the person of King Louis IX, no doubt as directed by his patron. We note his prominent position and large size in the composition, his crown and the royal arms, azur fleurs de lys or semés, which he carries on his shield, his tunic, his standard, and the caparison of his horse. It would not be difficult to imagine that the patron/owner of this codex was a resident of Acre of French heritage whose decision to commission the additions to this codex was stimulated by the rise to power of Charles of Anjou, brother of Louis IX, as king of Jerusalem in 1277.

Shortly after the additions to Paris MS fr. 2628 were done, two new commissions were made to produce *History of Outremer* manuscripts, apparently from the same workshop, but not necessarily by the same artists who painted MS 2628. Lyon MS 828[355] and St. Petersburg MS fr. fol. v.IV.5[356] were most likely done in the late 1270s, probably shortly after the miniature was completed in Paris MS 2628. Although they do not contain exactly the same text, they are quite closely related.[357] Moreover their miniature cycles are very similar, and, as we shall see, their cycles are partly based on MS 2628.

The St. Petersburg *History of Outremer* seems to have preceded the Lyon *History of Outremer* in sequence of production, but both appear to have been done by the same artist. In MS fr. fol. v.IV.5 we find sixteen extant miniature panels with five missing, each with a two-tiered arrangement, and three historiated initials, two of which only have one scene (Fig. 236, CD 205–24). In the Lyon cycle there are twenty-three panel

miniatures, most but not all with a double-decker configuration (Fig. 237, CD 225–247). Because of the mixed format in the former codex and the fact that formally the admittedly very mediocre artist seems to have mastered his style a bit more fully in the latter codex, it appears the St. Petersburg codex came before the Lyon manuscript in terms of workshop production. Because of the differences in the texts and the variations in the miniature cycles, it is likely that the two books were executed for different patrons.

Even though five miniatures are missing from the St. Petersburg codex, the images for Books 1, 2, 8, 9, and 10, we can reasonably imagine they were quite similar in their iconography to the corresponding pictures in Lyon MS 828, but it is impossible to know about their format. The scenes are mostly presented in panel miniatures with two registers in these two codices, but the St. Petersburg cycle is not completely regularized and unexpectedly includes at least one double-decker historiated initial. It may also have had one or two others among its lost miniatures. What is significant about both cycles as we have them is that they depend heavily on the cycle of Paris MS 2628 for about half of their miniatures, and for the other half the artist has revised the imagery or invented new scenes based on other sources, perhaps in response to the desires of his patron. An important aspect here is that in both cases the artist appears to be using Eastern sources; he is not drawing on Western cycles of the *History of Outremer*.[358]

In the cases where the St. Petersburg and the Lyon cycles follow MS 2628 closely, they are also quite close to each other, with, for example, images of the deathbed–coronation sequence at Books 12, 14, 19, and 21. It is, however, when there are revisions or innovations to the MS 2628 cycle that we find interesting contrasts. Iconographically the St. Petersburg miniatures are a bit higher quality in these cases, that is, more clear, more specific in their imagery, but overall the execution of Lyon MS 828 is better in terms of stylistic quality. Even though the level of decoration in MS fr. fol. iv.V.5 is slightly higher, with the inclusion of illuminated initials instead of red and blue calligraphic initials in the Lyon MS 828, the formal execution of the miniatures in the latter is slightly improved and shows more maturity with regard to the mastery of the Crusader style of the workshop he seems to be part of. There is no doubt that this Crusader artist has strong French Gothic heritage in his training, but he seems to be very conversant with life in the Near East. He thinks pictorially from an Eastern point of view, and even seems to know some Muslim book illustration, which he appears to have incorporated in these two codices. Consider the following examples.

As one instance of an important revision of the MS 2628 cycle, we can see how at Book 6 the St. Petersburg–Lyon artist improves the iconographic clarity of these scenes. In MS 2628 a rather simple composition of the city of Antioch above, with the Crusaders in their tents below, meant to illustrate the First Crusade besieging Antioch in 1098, is vividly altered in both the St. Petersburg and Lyon presentations. In the lower register, the men of the First Crusade enter the city gate and put the defenders to the sword. We also notice, however, that the scene in MS fr. fol. v.IV.5 is clear and direct with the Antiochenes indicated wearing turbans and oriental dress, whereas in the Lyon miniature they look essentially the same as the attacking Crusaders. The same distinction can be seen in the image of the citadel of Antioch above as well, where the defenders wear turbans or conical caps to indicate their Eastern derivation in the St. Petersburg miniature, whereas in the Lyon miniature the pointed caps remain, but the turbans are gone. This apparently shows what kind of iconographical clarity this artist could provide when the patron wanted it. Evidently, in the Lyon MS the patron wanted well-painted miniatures, but his interest in how accurately they reflected the Eastern context of the story was not as important as it was when the St. Petersburg MS was painted.

This does not mean that the Lyon MS 828 cycle was less innovative than what we find in MS fr. fol. v.IV.5; it seems to indicate that our artist provided what was needed, and always from an Eastern, Crusader point of view. For example, at Book 1 the image of Peter the Hermit praying at the Holy Sepulcher and then leading other pilgrims to the Holy Land, which is extant in Lyon MS 828 but missing in the St. Petersburg manuscript, is quite possibly an invention of our artist. No earlier Crusader codex has it, Western miniatures are quite different even when dealing with the same subject, and as we shall see this imagery was very popular later on in Acre.[359]

Another important example of significant innovation occurs at the miniature for Book 15. In MS 2628 we find a familiar deathbed–coronation pairing, which is meant to represent the death of the Byzantine emperor John and the coronation of his successor, Manuel Comnenus, the only event of this type to appear in the text of Book 15. However, the artist of Paris MS 2628 has used the standard Crusader imagery for this imagery, with no attempt to indicate the difference between a Crusader and a Byzantine coronation. In the St. Petersburg–Lyon cycle, however, a new image appears, the depiction of the attack on Shayzar by the Byzantine army, and the chess-playing Crusader leaders: the count of Edessa and the prince of Antioch. There can be no doubt that the Shayzar campaign is the standard choice for contemporary Western cycles, which the MS 2628 artist chose not to follow. However, there is no reason to think the St. Petersburg–Lyon Master[360] was drawing on them either, as certain significant aspects of these miniatures will demonstrate. In the first place, the Shayzar campaign is the major event in the first part of the text of Book 15, so it is the scene of choice – East or West – for these cycles. Secondly, despite the fact that images of this scene appear in Western miniatures at this time,[361] the imagery of the St. Petersburg–Lyon Master makes it clear the artist has drawn on an Eastern source for his iconography.

With regard to the siege scene in the upper register, it is an Eastern choice to show the cavalry attack with saracens in turbans, rather than siege ladders with infantry and defenders in generic Western costume. Also the chess game below very likely indicates the direct knowledge of Arab painting by the St. Petersburg–Lyon artist. Although a chess game was painted in Western Europe before 1250 in, for example, the *Carmina Burana* manuscript now in Munich,[362] and the chess game does appear in Book 15 of the *History of Outremer* now in Bern, MS 112, done *c.*1270 in France, certain details make it clear these Western versions are not the source here. In the West gaming scenes of this kind regularly depict the players as seated on benches, and for Bern MS 112, this is true even though the benches have been forgotten, with the somewhat comical result that the players are literally sitting on air. In the St. Petersburg

and Lyon miniatures, however, the players sit comfortably on the floor of their tent in oriental fashion just as many of them do in the illustrations of the *Libro de Ajedrez, Dados y Tablas* ordered by King Alfonso el Sabio and dated 1283.[363] Even though Alfonso's manuscript is a bit late to be relevant to our case here, nonetheless we can reasonably imagine that the artist of our codices, as well those for Alfonso's manuscript, was using earlier Arabic and/or Persian books with such illustrations as their models. Carl Nordenfalk long ago argued that the *Libro de Ajedrez* illustrations were derived from an earlier Persian type.[364] Although we cannot offer other evidence besides that adduced by Nordenfalk,[365] the existence of Arabic and other illustrated MSS in oriental languages cannot come as any surprise in Frankish Outremer. For one thing, the crusaders acquired a large library when they first conquered Tripoli in 1109. Ibn all-Qalanisi, writing about 1160, says:

> They [The Crusaders] seized an immense quantity of loot and treasure as well as the contents of the city library, works of art and heirlooms belonging to the local notables.[366]

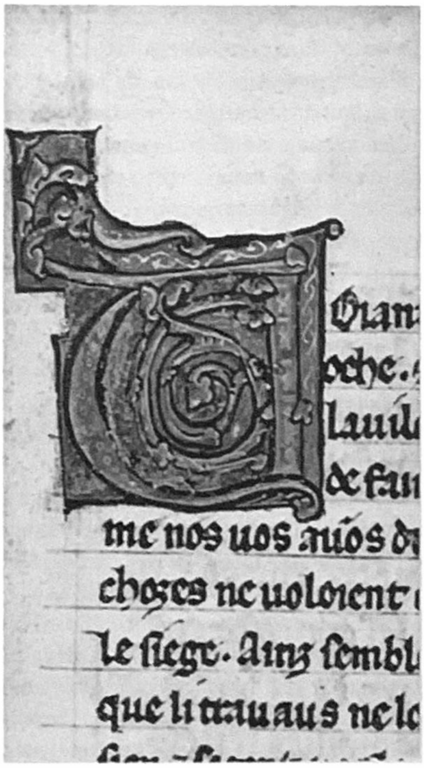
Furthermore, we know that a very large library of manuscripts came into the possession of King Baldwin III at Acre in 1154 as spoils from the shipwrecked transport carrying the library of Usama Ibn-Munquidh. William of Tyre no doubt used Arabic and possibly Persian books in the royal and perhaps also in the patriarchal library in Jerusalem to write his lost *Gesta orientalium principum*.[367] We may also speculate that at least some of the Eastern manuscripts in the royal library may have been illustrated and some of them may well have made their way to Acre or Tyre in the wake of the fall of Jerusalem. Finally, it is likely that along with the later spoils of battle, diplomatic gift exchanges, commerce on the trade routes especially after the Mongol invasions and the fall of Baghdad in 1258, Arab manuscripts and perhaps even Arab painters may have been dispersed westward along the eastern littoral of the Mediterranean. We might even point to generic formal comparisons found in Arab painting, such as the *De materica medica* of 1229, or *The Choicest Maxims and Best Sayings* of the first half of the thirteenth century, as compared to the less accomplished miniatures of the St. Petersburg–Lyon cycles, in terms of the "spectacled eyes" or the generous turbans of the Acre School Franco-Byzantine Crusader style from 1250 onward.[368]

In sum, this evidence, complex though it is, seems to enable us to conclude that the St. Petersburg–Lyon Master shows the direct influence of Arab painting for his models, even if we cannot adduce the actual manuscripts he may have used. Moreover, this example helps us to argue the point that this Crusader painter was working independent of the knowledge or influence of Western cycles of the *History of Outremer*. Besides the resources of the local scriptoria and other Crusader painters and their manuscripts, especially works like Paris MS fr. 2628 and the Dijon MS 562 *Histoire Universelle*, he was able to draw on Arab illustrated manuscripts and the Eastern ambiente of Acre that he observed, as indicated. *Mutatis mutandis*, I would propose that this artist and certain others working in the Franco-Byzantine or Italo-Byzantine Crusader style in manuscript illumination were engaging in the Eastern version of Gothic naturalism seen in the West with, for example, Villard de Honnecourt.[369] Here in the East, we can call it "Crusader naturalism," a development parallel to what we find in the West, and not necessarily wholly unrelated, but essentially a separate and equal development.

There is a third codex, now in Paris, B.N., MS fr. 9085,[370] that also belongs to this workshop, which would tell us more about the St. Petersburg–Lyon Master if it had survived whole. It is apparent from the evidence that survives that originally this manuscript was also given a cycle of panel miniatures and illuminated initials (Fig. 238, CD 248). At a later date, however, all of its illustrations were systematically removed before the book received its present nineteenth-century binding. The first leaf of each book with its illustration was removed, and in its place a blank paper sheet was inserted.

The evidence for attributing this codex to an Acre scriptorium where the St. Petersburg–Lyon Master worked is primarily the materials and workshop techniques found in this manuscript, which are entirely comparable to MS fr. fol. v.IV.5 and Lyon MS 828. I cite my own description here for convenience:

> We note the mediocre preparation of the vellum, which tends to be a grayish, off-white color and is uneven in texture, that is irregularly soft and slippery, especially on the hair side which, often not rubbed enough, also has the minute stumps of bristles to grain the surface. Moreover, the leaves are rather thick and crackly when bent, rather than white, thin, suedey, and pliable as in good French manuscripts of the second half of the 13th century. The rulings of the vellum, brownish in color and usually lightly traced, along with the layout of the page, are quite similar to the [St. Petersburg] and Lyon codices. The very dark brown ink characteristically is flaked in a way distinctive of virtually all Acre School manuscripts. Finally, the scribal hand, essentially a *littera textualis* written just above the rulings and showing a slight vertical elongation, is comparable to that found in the other Acre codices without necessarily being by the same scribe.[371]



238. William of Tyre, *History of Outremer*, Paris, Bibl. Nationale, MS fr. 9085, fol. 47r, Initial "V." (photo by courtesy of the Bibliothèque Nationale de France, Paris)

We only know for certain that this codex was illustrated by a fortunate chance. There are no take-offs of the miniatures on the facing leaves, but on fol. 47r, at the start of Book 5, we find an illuminated initial, "V," that survives in situ. It is completely comparable to the extant "V" in St. Petersburg MS fr. fol. v.IV.5 at fol. 1, for the start of Book 2.[372]

By reconstructing an imaginary replacement leaf with the text at the end of Book 4 in MS fr. 9085 we find that a space of approximately sixteen or seventeen lines is left, just the right size for a miniature panel as we find in the MS fr. fol. v.IV.5 and Lyon MS 828.

Because MS fr. 9085 is so badly mutilated in terms of loss of miniatures and loss of text at the beginning of each book and at the end of the manuscript, we cannot go beyond this attribution. We cannot know, for example, what the miniatures in the cycle may have looked like, or how long the continuation text was intended to be. What evidence we do have, however, makes it clear that this codex is closer to the St. Petersburg MS in all aspects, and therefore should be dated about the same time. We will discuss the dating of these manscripts later.

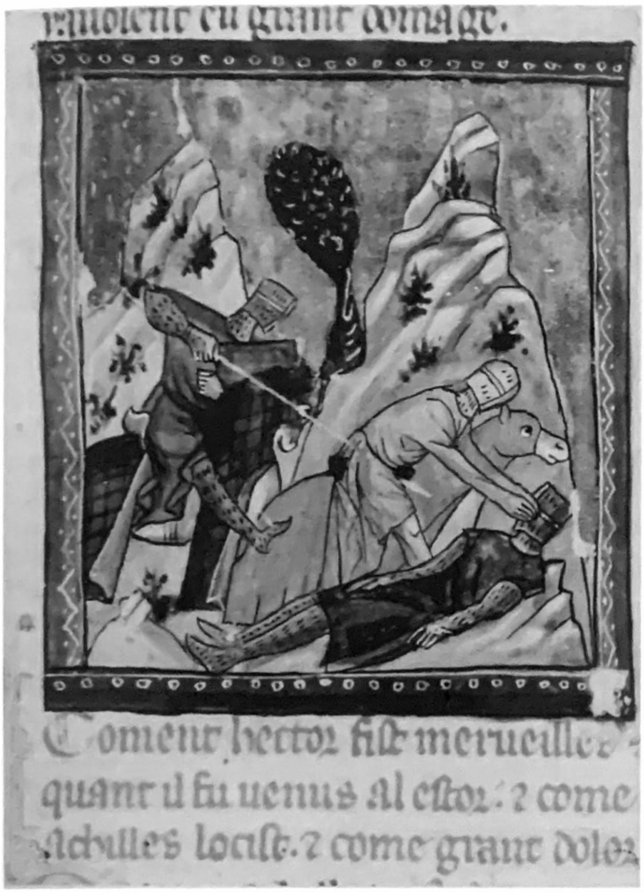
There is, however, one additional codex to discuss, also now in Paris, B.N., MS fr. 9086.[373] This codex has no miniatures and none was ever planned for it. Its only decoration is red and blue calligraphic book and chapter initials. It is attributed to Acre on the basis of its workshop and scribal characteristics as compared to the manuscripts discussed previously, St. Petersburg MS fr. fol. v.IV.5, Lyon MS 828, and Paris MS fr. 9085. Although it is much more difficult to date very precisely – it is proposed in Chapter 6 to date it to the third quarter of the thirteenth century – it is important here nonetheless. It is worth reiterating that it apparently demonstrates how the Acre scriptoria, where these books were made, offered various levels of production according to the desires and means of the patron. This seems to indicate that some scriptoria in Acre operated on a commercial basis much the same as what we are familiar with now in Paris, as the result of the research of M. and R. Rouse.[374] The overall production level in Acre was no doubt much smaller than that in Paris. However, it appears very likely that the means of production, the existence of religious and commercial workshops producing manuscripts, the presence of religious and commercial scribes and illuminators, all of this in Acre, was very similar to that in Paris, but on a smaller scale.

The Vegetius Codex, Marlay Additional MS I, and the *Histoire Universelle* Codex, Bib. Roy., MS 10175

Two other illustrated manuscripts can be attributed to Acre in the 1270s. In one case, a Vegetius codex now in the Fitzwilliam Museum in Cambridge, Marlay Additional MS I,[375] the manuscript itself was no doubt done in England in the late thirteenth century. However, the miniature on fol. 86r,[376] which depicts warfare at sea, is pasted in, obviously done elsewhere and inserted in this book at a later date. The possibility exists that this miniature was done in Acre in 1271, conceivably for Prince Edward's Vegetius codex,[377] or one like it, and eventually found its way into the book now in Cambridge. Certainly the style of the miniature on fol. 86r is very different from that on fol. 2v.[378] Whereas the image of Edward before Vegetius on fol. 2v is parallel to the Huth Psalter in style,[379] the sea battle on fol. 86r is clearly related to the Acre school miniatures we have been looking at in the early *History of Outremer* and *Histoire Universelle* manuscripts discussed previously. It is of course impossible to prove that the sea battle miniature was done in Acre, or alternatively, that it was done in England under Crusader influence. We can only propose that Cambridge, Marlay Additional MS I "is a later copy of Edward I's Vegetius prepared at Acre and that the miniature for fol. 86r came from an earlier copy possibly done in Acre or executed in England under Acre influence."[380]

The other codex from this phase of development in manuscript illumination at Acre is a *Histoire Universelle* in Brussels, Bibl. Roy. MS 10175 (Fig. 239, CD 249–85).[381] Even though MS 10175 is not done by the same artist who worked on Dijon MS 562, they are closely related. Indeed Buchthal's perceptive comments can serve to introduce our discussion of the Brussels codex here.

> The Histoire Universelle manuscripts in Dijon and Brussels represent the next stage in the activities of the Acre scriptorium. They were produced for "connoisseurs" who belonged to the native nobility, and the character of their illustrations is in keeping with the small literary merits of the text: it reflects the crude taste and the mediocre education of the military caste for which this unpretentious compilation was intended. Works of no more than local importance were entrusted to second-hand local craftsmen; they lacked the cosmopolitan training and outlook of the great master of the Arsenal Bible, and their achievements were at best no more than prosaic. Yet... these two manuscripts are in fact far more interesting than the provincial quality of their miniatures seems to suggest: they reproduce the original French cycle more reliably than any surviving western manuscript, ... Even more



239. *Histoire Universelle*, Brussels, Bibl. Royale, MS 10175: fol. 130r, rubrics: Coment hector fist merveilles quant il fu venus al estor, et come achille locist. Et come grant dolor fu demenee (panel: 7.9 × 7.8 cm), Achilles kills Hector by spearing him from behind.
(photo by courtesy of the Bibliothèque Royale de Belgique, Brussels)

> remarkable is the intrusion into their set of Genesis illustrations of some Byzantine formulas which have no parallels at all in western illumination, and which were clearly straight from Greek prototypes.... That several Byzantine manuscripts of very recent date were present in the scriptorium of Acre, at a time when the supply of contemporary French models had already completely dried up, is perhaps the most unexpected conclusion to be drawn from these otherwise so inconspicuous miniatures.[382]

Buchthal's views are extremely important even though we must revise his understanding of the "Acre scriptorium" to something more complex and multifaceted as we have discussed this issue in Chapter 6 and in this chapter. We can also challenge his idea of the crude taste and mediocre education of the military caste for which he assumes these books were done. The fact that we do not know precisely who commissioned these codices aside, these newly popular illustrated secular books were a modest yet relevant contribution to the encyclopedic interests of the educated aristocracy East and West. Finally his rather low estimate of the literary value of the text overlooks the fact that the text has been comparatively little studied by literary scholars. A recent writer makes the following comment:

> L'ouvrage a une double polarité. Il est d'une part une illustration des *Gesta Dei per homines*, mais en même temps il veut transettre un message séculier, celui de la précellence d'un peuple.... C'est ce system d'oppositions, de dynamisme narratif, qui donne à ce texte singulier que sont les *Estoires* son caractère littéraire. Que l'auteur ait su remodeler la matière pour en faire un ouvrage aussi intéressant, témoigne de son talent.[383]

Nonetheless, Buchthal's unerring sense of artistic quality will not let us forget that the miniatures found in these *Histoire Universelle* – and in the *History of Outremer* – manuscripts are modest works by second-rate painters, artists with – in his view – comparatively little training.

Unlike the *History of Outremer* manuscripts discussed earlier, the text for which was after all written in the Crusader States, the text of the *Histoire Universelle* was written in the West and the cycle of miniatures developed for it appears to have appeared first in western Europe. They then traveled, text and miniatures together, to the Latin East in the second half of the century.[384] Substantial evidence for this can also be found in a later *Histoire Universelle* codex done in Acre, but based almost entirely on Western sources, Paris, B.N., MS fr. 20125, which we shall discuss later in terms of works produced in the decade of the 1280s.

Buchthal's analysis of Dijon 562, the earlier codex written and illustrated in the 1260s, and Brussels MS 10175 done shortly thereafter in the later 1270s addresses three issues pertaining to the sources and character of the Crusader miniature cycle. First, there is the problem of how this cycle manifests characteristics of the local Acre workshop tradition, and of course, how the Brussels cycle relates to that of Dijon MS 562. Second, there is the problem of the impact of Byzantine models on these miniatures. Third, there is the problem of the relationship between the cycle of MS 10175 and its Western models.[385] Because in his discussion of these manuscripts, Buchthal chose to emphasize Dijon MS 562, which interested him more,[386] I have placed my focus on Brussels MS 10175, which has its own character and special features.

It is immediately evident that to some extent the miniatures of MS 10175 follow those of Dijon MS 562 closely, but ones the Brussels codex was executed at a slightly lesser level of decoration, and indeed, of quality. Not only are there fewer miniatures in the Brussels codex, thirty-six[387] as compared with fifty in the Dijon book, but also the narrative fullness and complexity of the Dijon miniatures is reduced. In some cases the number of scenes for an episode is diminished, as with the story of Cain and Abel (MS 10175, fol. 22v, compared to MS 562, fol. 3v).[388] In other cases the same scene is represented, but the number of figures is reduced, as in the first Amazon combat (MS 10175, fol. 117v, compared to MS 562, fol. 86v).[389] Only very rarely does the Brussels miniature of a specific scene preserve a more complete and/or "correct" version of the scene than what is found in the Dijon codex. For example, there is the very peculiar example cited by Buchthal.[390] For the triumph of Joseph in Egypt, the Brussels miniature (fol. 73r) has him depicted seated in a chariot, a good medieval adaptation of the Roman triumphal idea. In the Dijon example (fol. 51r), however, Joseph is seated on a horse, which is then placed in a triumphal chariot, clearly an impossible combination of two models. This example raises two points: first, that neither the Brussels nor the Dijon cycle was totally dependent on the other, but both were drawing selectively on an earlier common model; second, that that model may have been the common model for yet another cycle as well, in Paris, B.N., MS fr. 20125, done in the later 1280s.[391] What is certainly sure is that neither the Brussels nor the Dijon cycle is as close to MS fr. 20125 as they are to each other.[392]

With regard to Byzantine sources, Buchthal points out the remarkable fact that in certain cases both MS 10175 and MS 562 refer not to Western, but to Byzantine models.[393] Furthermore, in two cases, the images of Abraham's Hospitality and the Sacrifice of Isaac, the Byzantine models used by the two artists were different. Buchthal traces the source of the Brussels MS 10175 image of Abraham's Hospitality (fol. 40r) ultimately to the Byzantine Octateuch tradition, whereas for the Dijon MS 562 source (fol. 21v) he identifies more contemporary Byzantine parallels partly found in Sicilian mosaics. In yet another case, the Sacrifice of Isaac, the Brussels miniature (fol. 45r) derives ultimately from the Paris Gregory and the Octateuch tradition, whereas for the Dijon miniature (fol. 26r), the source goes back to Byzantine marginal psalters and the images in codices with the Cosmas Indicopleustes text.

With these and other examples in mind, Buchthal concludes that for these scenes in Genesis, where Byzantine models played a key role, the artists of these two manuscripts show "a procedure comparable to that employed by the master of the Arsenal Bible, who worked in the same scriptorium only a few years earlier, and who modified his Byzantine model by adding a certain number of western types and scenes. The common workshop tradition is made equally obvious by the introduction into the cycle of some characteristic details which were not taken from any pictorial model. For example, the miniature of Jacob on his way to Egypt in [Dijon MS 562] contains a magnificent camel which is clearly a study from nature."[394]

These examples and passages from Buchthal's text are worth reconsidering partly because they provide such excellent analyses, and partly because they raise important questions. On the one hand it is impressive that such rich sources were available for the artists of the Dijon MS 562 and the Brussels MS 10175 miniatures. On the other hand, the Franco-Byzantine Crusader style of the Arsenal Bible master and the painters who did these two *Histoire Universelle* manuscripts are quite distinct, and are certainly very different in levels of quality. This of course no doubt had to do with the patronage involved: where the king himself, Louis IX, was apparently the sponsor for the Arsenal Bible, men of lesser means obviously made the commissions for the Dijon and Brussels codices. Also the number of, for example, Byzantine sources identified raises the question of workshop resources and procedures. Taken together this all suggests a very different idea of the scriptorium than what Buchthal had in mind.

Buchthal is of course referring to the "Acre scriptorium" as a kind of collective, nonspecific notion commonly cited in the 1950s to the 1970s. However, when we attempt to be more specific about this issue, in the first place there is no reason to think that if the Arsenal Bible was done in the scriptorium of the Dominican House, as we have suggested earlier, these two *Histoire Universelles* were done there, too. As secular codices they may well have been done in some commercial shop, perhaps one specializing in this type of illustrated codex. As to where resources of this richness could have been found, it is not unlikely that the resources could have been found in Acre. By this time Acre had enjoyed a development of nearly three decades of newly revitalized illuminated manuscript production, even if the extant products are very erratically preserved. However, the kind of resources identified here is the kind of imagery that we must imagine was partly, perhaps substantially, provided by model books. The fact that different imagery is found for the same scenes in the Brussels and the Dijon books at least suggests that the artists were using different model books, and may in fact have been in different shops, very possibly closely related – maybe right next door – but different.

Further consideration of the imagery in the Brussels MS 10175 cycle can provide additional evidence for the idea of separate workshops and better understanding of the challenges the artist faced in illustrating a new text. When the painter turns from the illustration of biblical history to ancient history, that is, to the stories taken from classical mythology, he was left to his own devices. The gods and heroes of antiquity were accordingly configured into images of medieval chivalry set in French feudal society and governed by courtly ceremony.[395] These illustrations furthermore were largely invented in the second half of the thirteenth century when these manuscripts were being painted, but long after the text had come into being. At this time, Paris was becoming the center of book illumination in the medieval world, and the whole enterprise of secular manuscript illumination was a new initiative there, becoming an important feature of Crusader manuscript illumination in Acre shortly thereafter. In both places it emerged during the time of the reign of King Louis IX, that is, before 1270, but in neither place do we have any books of this kind ascribed to his personal patronage, unlike certain religious books such as the St. Louis Psalter. It is therefore undoubtedly correct to see these books as being ordered by the military aristocracy in Acre and nearby, and there must have been several workshops in Acre to satisfy the demand.

In the case of Brussels MS 10175 a few examples of these mythological and historical stories from antiquity will help us to understand that they reflect the same inventive spirit seen in the *History of Outremer* cycles, and that they are clearly a new and independent venture. In the Oedipus story taken from the *Roman de Thèbes*, the representation of the finding of Oedipus hanging from a tree (fol. 90r) characteristically reflects French courtly imagery. Laius and Jocaste are depicted as French royal figures and Oedipus is discovered by a royal hunting party. In the section on the Trojan wars taken from the *Roman de Troie*, the death of Hector (MS 10175, fol. 130r) is similarly construed as occurring in the context of a medieval cavalry battle carried on by knights in armor. While Hector attempts to remove the armor of Patroclus, Achilles attacks from behind and spears him in the back. As Buchthal points out, "the insistence upon this cowardly deed, which is illustrated in every manuscript of the Histoire Universelle, is a forceful reminder of the transformation of Homer's epic in the Middle Ages: it was no longer taken as a panegyric of the Greeks, but had become a glorification of the Trojans, the people of Aeneas, Rome's national hero, and of their magnificent resistance against Greek aggression."[396] This is central to one of the key themes of this book, the Trojan origin of the Franks.[397]

Another interesting feature of this cycle is the introduction of the Amazons into the story. In the case of the Brussels MS 10175, there are three scenes, compared to five in Dijon MS

562, but the presence of these episodes is an interesting reflection of the importance of women in Frankish society if nothing else, and their value here as part of the heroic tradition. The scenes are quite simple and even repetitious, confrontations of mounted women in battle with men: Merpesia and Lampetho wreaking revenge for the killing of their men (fol. 117v), Penthesilea fighting with Pyrrhus son of Achilles (fol. 138r), and Queen Camilla's battle with Aeneas (fol. 165v).

Nonetheless, it is remarkable that in the Brussels miniatures alone the Amazons are consistently armed with bows and arrows – not spears, shields, and heavy weapons. They are representations, as it were, of mythological female *turcopoles*, in this case a paradoxical reflection of the Near Eastern Frankish world where some men, the *turcopoles*, fought with bows and arrows in the Crusader armies.

The rest of the text is occupied with the story of Alexander the Great, taken from the *Roman d'Alexandre*, one of the most popular medieval *romans*, and stories from Roman history. The pictures of Alexander's army in foreign lands no doubt had a special poignancy for the Crusaders, as they reflected on their own circumstances. It is not surprising, therefore, that even the Brussels MS 10175 painter with his limited talents makes an effort to represent the exotic character of the Indian troops with elephants, and different weapons, shields, and costumes (fol. 219v). Otherwise his images of the strange creatures and monstrous beasts that Alexander was said to have encountered are every bit as vivid as those of the other artists of these codices (fols. 222r and 224v).

In the realm of Roman history, the story of Aeneas and Dido from the *Roman d'Enéas* is featured in all of these cycles. The sorrowful Dido, standing on the ramparts of Carthage, plunges a sword into her body as Aeneas sails away (fol. 151v), a story that echoes the sorrow felt by many wives of Crusaders, who watched helplessly as their husbands left for the East, many never to return home. It is notable that here again is an important female participant in these stories, who is joined later on in the cycle by the heroic Judith, who meets with Holofernes in his tent. In the Brussels MS 10175 (fol. 195v) it is a particularly fancy tent with special tent poles. Inside this tent, the courtly encounter of the remarkably well-groomed seated Assyrian general and the beautiful standing Hebrew widow inspires one to think of chivalric manners, and not so much of Judith's heroic act to save her people yet to come.

Finally, in Rome itself Buchthal discusses at length the imagery of the Temple of Janus, partly driven by his interest in the Warburgian investigation of the survival of the classical tradition in Europe. The miniature in the Brussels MS 10175 cycle (fol. 254v) is particularly evocative of how these Crusader artists improvised by transforming the classical subject matter into contemporary imagery. Between groups of men who go to the temple to obtain or to deposit arms, a fully two-headed idol of Janus stands on a remarkable structure. The structure is in fact an elaborate altar, which includes the altar table or block set in a round-backed frame with scalloped side pieces. It is particularly unusual that the frame, which looks variously like a throne with the altar, or an altarpiece set behind the altar, has also been endowed with a set of globular crockets or finials in good Gothic fashion.[398]

Overall Buchthal rates the artist of the Brussels MS 10175 cycle as "below average" in artistic quality, and draws a parallel between this codex and the Dijon MS 562 manuscript and two earlier books: the missal now in Perugia and the Old Testament selections in Padua.[399] One might claim a more positive estimate for the quality of all four manuscripts, but we should note that even in the least of the four, the Brussels MS 10175 miniatures have their own originality and reflect a Frankish culture in the Latin Kingdom that can be seen to be quite lively even in the most mediocre of its artistic productions.

In studying these two *Histoire Universelle* manuscripts, along with the exemplars of the *History of Outremer* discussed earlier, we find that following the departure of King Louis IX in 1254 and after the fall of Antioch in 1268, there was a kind of revival of manuscript production in the 1270s. One of the striking features of this revival is that in miniature painting it stimulates a new, second phase of the Franco-Byzantine Crusader style, the first phase of which reached such splendid heights in the Arsenal Bible in 1250. Second, we see workshops and painters in Acre responding to commissions for illustrations in a new genre of secular books. The artists who did the work combined Byzantine and French imagery and style with their own talents as shaped by the Crusader workshops in which they plied their trade. Theirs was an exciting, innovative venture, and the result is a series of works done by different artists. There is the painter of the Vegetius miniature about 1271; there is the second artist of the *History of Outremer* in Paris MS fr. 2628 who, after the bulk of the Book had been done in the later 1250s, executed its final miniature probably in the late 1270s. There is the Dijon MS 562 artist who may have worked in the decade of the 1260s followed by the painter of Brussels MS 10175 later in the 1270s. Also there was the St. Petersburg–Lyon Master who executed MS fr. fol. v.IV.5, MS 828, and Paris MS fr. 9085 in the late 1270s as we have discussed previously. There is no reason to think these artists all worked in one scriptorium. The lack of dependency of the *History of Outremer* imagery on the *Histoire Universelle* conventions, the different stylistic characteristics of the artistic hands, the freedom each artist had to improvise, and the different resources that each type of text required for doing the miniatures in each case would seem to suggest separate working circumstances that may, nonetheless, have all been located along a common street in Acre. However, there is certainly no reason to think that the new secular books were done in the period from the 1260s to the late 1270s in the same shops that the Bible texts and service books had been produced in the 1250s.

The remarkable irony for these developments is that just at a point in the late 1270s, around 1280, when Buchthal saw the supply of contemporary Western, especially French, sources for the production of illustrated manuscripts in Acre "dry up" as he says, a French Gothic painter straight from Paris arrives on the scene. Although we have heretofore called him the "Hospitaller Master," it will be more accurate and more sensible to call him the Paris–Acre Master from this point onward. As we shall see, he works for many different patrons and he certainly does not favor the Hospitallers with his work. There is only one codex executed by him that can be directly and clearly linked to a Hospitaller patron, and there is only one other codex that has indirect ties with another order, in this case the Templars. His main characteristic is surely not that he worked for the Hospitallers or any other identifiable patron in Acre or Paris, but rather that he came from Paris to Acre about 1280. When he came, he brought with him his mature Parisian Gothic painting style of the 1270s to reinvigorate the production of secular and religious book illumination in the Crusader capital during the 1280s.

The Paris–Acre Master

The Chantilly Cicero Manuscript, MS 433(590), and the Paris Book of Bible Selections, MS nouv. acq. Fr. 1404: The two earliest manuscripts painted by the Paris–Acre Master in Acre consist of a codex of Old Testament Bible selections, Paris, B.N., MS nouv. Acq. Fr. 1404, and a book now in Chantilly, Musée Condé, MS 433(590), containing Cicero's "De inventione" and the "Rhetorica ad Herennium," a text believed also to be by Cicero at the time. We will discuss MS 433(590) first because of its crucial documentation.

The texts of the *rhetorica prima* and the *rhetorica secunda*, as they were known in the Middle Ages, which form the content of Chantilly MS 433(590), were the result of a specific commission (Fig. 240, CD 286–294).[400] John of Antioch translated these treatises for William of St. Stephen, an important jurist and knight of the Hospital of St. John of Jerusalem in Acre in 1282. This information is contained in a detailed passage that serves as a kind of colophon, and appears on folio 12v at the end of the prologue to the text.

> La qle art Je johan dantioche, q len apele de hares, ai tnslatee dou latin e fraceis & vulgalizee a lonor & a la reqste del honest home & relegious fre Guillaume de sait estiene frere de la saite maison de lospital de sait John de Jhl'm. Ce fu fait e acre lan de lincarnacio nre seign Jh'u c'st. m.cc.lxxii. [sic]. . . . [401]
>
> This art [of rhetoric] I, John of Antioch, who is called of Harim, have translated from Latin into French, rendered into the vernacular to the honor and at the request of the honest man and religious brother, William of St. Stephen, brother of the holy house of the Hospital of St. John of Jerusalem. This was done in Acre in the year of the Incarnation of our Lord Jesus Christ. m.cc.lxxii. [sic]. . . .

This passage is actually written as part of the text concluding the prologue, but other references to this information occur in the rubrics on the early folios of the manuscript. Rubrics referring to this commission with the name of John of Antioch appear on fols. 1r, 6v, and 13r, and with the name of William of St. Stephen on fols. 1r and 13r.

Compared to the careful recording of the names of the translator and the patron, however, the handling of the date and place is not so meticulously done. The name of the place where this work was performed only appears once, in the text on fol. 12v, as quoted. The date appears three times, and each time it is different! What is the correct reading? The dates given are as follows: 1382 on fol. 1r, 1272 on fol. 12v just cited, and 1282 on fol. 13r. The explanation for the variable dates appears to be the use of Roman numerals, which are easily susceptible to error. The scribe appears to have rather mechanically copied in the date in these passages, twice making a mistake. The year 1382 is clearly impossible on the basis of historical, codicological, archeological, and artistic considerations, and 1272 is equally unlikely because William of St. Stephen is not known to have been in the Latin East until the 1280s. In 1287 he returned to Lombardy from Acre, then came back to the Near East in 1296 as Hospitaller preceptor on Cyprus.[402] The year 1282 is surely correct, based on historical considerations, and as we shall see, based on art historical considerations pertaining to the artist responsible for painting this manuscript.

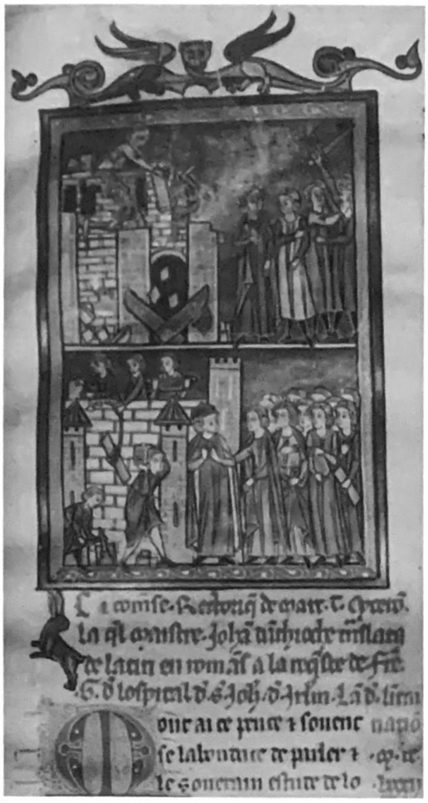
We have made the case elsewhere that this manuscript is the personal copy of William of St. Stephen made uniquely for him as the result of his commission to John of Antioch.[403] It remains to be explained how and why a Hospitaller knight, who has taken a vow of poverty, would order such a book. Perhaps it was for the library of the Order in Acre. In any case, the translator, scribe, and illuminator produced this codex for him in Acre in 1282.[404] As such it is the only extant illustrated secular codex yet identified that is clearly dated and localized, that is, documented to have been done in the Crusader capital.[405] Furthermore it provides important evidence for the career of a prolific painter who did several manuscripts in Paris before he came to Acre to work in the 1280s.

The codicological characteristics of this book accord generally with the earlier manuscripts we have discussed previously, albeit with certain variations. Because this is a special commission by a Hospitaller of considerable stature, the vellum is whiter and more pliable than was the case in the books dated to the 1270s, but its surface texture is very similar nonetheless. The color of the ink is comparable to those books also, as is its pattern of flaking. Finally, the layout of the book in terms of rulings and organization on the page is also comparable.[406] In sum, Chantilly MS 433 (590) is a slightly higher quality work that basically accords with the workshop characteristics found in the *History of Outremer* and *Histoire Universelle* manuscripts done in Acre in the 1270s. This evidence in conjunction with the textual evidence clearly indicates that the manuscript was done in a scriptorium in Acre, but it does not necessarily tell us which scriptorium that was. We shall discuss this issue further.

It is remarkable that a book containing treatises on rhetoric would be illustrated with narrative figural scenes. Although rare before the thirteenth century, it is not the first known medieval *Rhetorica* manuscript to be illustrated,[407] nor is it the first codex with this text to be found in the Near East.[408] However, it is the first Old French translation of this text to be illustrated in the Holy Land, and one of the earliest such illustrated books we have in the vernacular. The most unexpected aspect of this codex is the style of the artist. Instead of the Franco-Byzantine Crusader style that we have seen in Acre, founded in effect by King Louis IX in his commission of the Arsenal Bible, and carried on in the two subsequent decades, we find here an artist working in purely French Gothic, indeed, Parisian Gothic style. We recognize this especially in the linear rhythms of his figure style and the handling of the draperies, the poses of the figures, the design of the architecture, and the distinctive colorism of the panel miniatures and the illuminated initials as well.

The challenge to this recently arrived Parisian painter by William of St. Stephen's commission was similar to that faced by the Crusader painters of the *History of Outremer* manuscripts in the 1260s and the 1270s. Here was a new secular text rendered in the vernacular for which there were no precise precedents on which to base the decoration and figural illustration. The problem was greater in this case, however, because the *De Rhetorica* texts were treatises, not historical material with copious anecdotal or essentially narrative content.

The Paris–Acre Master produced a varied ensemble of decoration to meet this challenge. For the *capitula* on fols. 1r to



240. Cicero's *Rhetorica*, Chantilly, Musée Condé, MS 433 (590): fol. 13r, Book 1 (*De Inventione*) miniature panel with two registers (11.0 × 8.3 cm):
1. Evil Oratory causes the fall of cities and strife among the people;
2. Good Oratory encourages the building of cities and harmony among the people.
Marginal drolleries.
(photo by courtesy of the Musée Condé, Chantilly)

5v, he designated calligraphic red and blue initials only. For the start of the prologue on fol. 6v he painted a handsome pink and blue illuminated initial (T). On fol. 9r is a diagram of knowledge dealing with the divisions of philosophy, and on fol. 11r is a similar diagram of "la rezon civile," both beautifully painted in pink and blue, illuminated, and given elegant scalloped outlines.

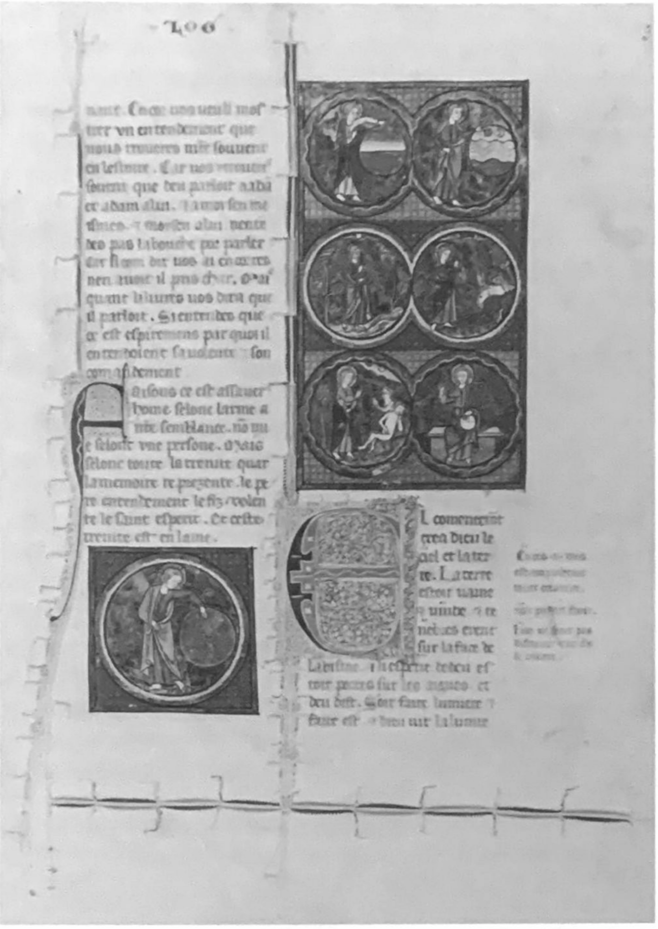
Cicero's text of the *De Inventione*, here identified as the *Rettorique de Marc T. Cyceron*, has the richest content for possible narrative imagery, and the artist accordingly takes advantage of this material. On fol. 13r the text of the *De Inventione* begins – designated Book 1 – and with a bit of imagination our master produces a large double-register panel miniature illustrating the benefits that good and bad oratory can bring to humankind. The text begins only with a small red and blue calligraphic initial, but the panel is embellished with two marginal drolleries, twin winged dragons with a common head above, and below, a jumping rabbit looking back at the text. This is the earliest appearance of marginal drolleries in the Crusader East as far as I know, and they give a somewhat unexpectedly whimsical quality to the illustrations, attesting to the thoroughly up-to-date Western origin of our painter.[409]

On fol. 45v, this text continues at Book 2, with a smaller panel and a very handsome historiated initial (I). Drawing on Cicero's text containing the charming story of Zeuxis of Heraclea, the Paris–Acre Master illustrated the essential details.[410] Zeuxis was commissioned by the citizens of Croton to paint an image of Helen of Troy for their temple of Juno. Helen was to embody the surpassing beauty of womanhood. Zeuxis asked about the loveliest girls of the city who might serve as his models. The citizens cautiously take him first to the palaestra to show him their handsome male athletes. There he is told that in the beauty of these youths, the loveliness of their sisters can be seen. Zeuxis, arguing that no one person could possess supreme beauty except Helen, invited the Crotonians to send him their most beautiful girls. Zeuxis selected five to use as his models, endeavoring to transfer their combined beauty to his mute likeness.

Just as we have seen the classical stories transformed into the visual realities of Crusader French culture in the *Histoire Universelle* miniatures, we find the same phenomenon here. The temple of Juno is transformed into Gothic church architecture. Zeuxis is depicted as standing on a ladder, painting a statue-colonne of the crowned Virgin under Gothic arches as he studies the five most beautiful, clothed women of Croton below. Unlike the point of the story, where Zeuxis chose the five different beautiful women in order to produce the one supremely beautiful example by selecting from their attributes, in this image the women are all exactly alike.[411] Zeuxis himself is adapted from the episode of Exodus 12: 22 ff., where the Israelite elder paints his lintel with hyssop dipped in the blood of a lamb, scenes familiar from thirteenth-century French manuscript illustration in Paris.[412] To the right is found the palaestra, with activities represented exactly as the translator had glossed them in the text: wrestlers, stone throwers, and javelin throwers.[413] These figures have diverse parallels in secular and religious French illustration, sources as widely varied as the wrestlers of Villard de Honnecourt's famous sketchbook or biblical minatures. Finally, the statue-colonne, we should note, is freestanding, not part of a portal as we might expect. This is no doubt meant to convey the idea of a pagan idol according to standard medieval iconography.[414]

Book 3, which begins what is called the "Rettorique nouvele" [=the Rhetorica ad Herennium] on fol. 86r, is given a very large illuminated initial "I" framed with a gold border, but no miniature. Book 4, which starts on fol. 95r, has both a miniature and a handsome illuminated initial. This image represents Cicero simultaneously dictating his text and explaining to Herennius how he will proceed, a direct reflection of the opening words of this book. On fol. 113r Book 5 begins with a historiated and illuminated initial. The scene contains simply a seated master, presumably Cicero, gesturing to a standing student. Otherwise this initial is embellished with an elongated running dog in the upper margin. Finally, at the start of the last book on fol. 127v, Book 6, we find another – the fourth – panel miniature, accompanied by an illuminated initial and a marginal bird. This image is also a teaching scene, but here is a classroom where a master supervises the recitation of six students with two elders looking on. One of the students holds a large book up, apparently as evidence for the point he is making. The two elders are seated at right, wearing the large, new Palaeologan hats. This teaching scene seems improvised, and with the presence of the Greek hats, it may also reflect the sight of Greeks in Acre wearing current attire.[415]

It is remarkable to find a newly arrived painter from Paris working for a prominent Hospitaller in Acre in 1282 on such an unusual commission. However, what earlier manuscripts



241. Bible selections, Paris, Bibl. Nationale, MS nouv. Acq. Fr. 1404: fol. 2r, Genesis, two panel miniatures: the Lord creating on the first day (5.3 × 5.1 cm), and the Lord creating, days two to six, and resting on the seventh day (12.2 × 7.3 cm), large red and blue calligraphic initial, (E). (photo by courtesy of the Bibliothèque Nationale de France, Paris)

can we attribute to him in Acre, and what work of his can be identified in Paris? In Acre there is at least one extant codex that seems to have been done before 1282, a book of Old Testament Bible selections now in Paris, B.N., nouv. acq. fr. 1404. (Figs. 241, CD 295–308).[416]

MS n. a. fr. 1404 is of course of the greatest interest because it immediately makes us think of the Arsenal Bible, Bibl. de l'Arsenal MS 5211, done for Louis IX in 1250 that we discussed earlier. The two manuscripts are related by their texts, both containing early translations of Old Testament books, and by their organization, both parallel up to the end of IV Kings.[417] After that point, however, Arsenal MS 5211 has Judith, Esther, Job, Tobit, Proverbs in three books, Maccabees in two books, and Ruth, but Paris MS n. a. fr. 1404 has only Maccabees in two books, Tobit, and Judith. The translated texts in both manuscripts are, however, equally colloquial and unpolished. Both manuscripts share other characteristics as well. Both are books of modest size: MS 5211 is 28.5 × 20.0 cm, whereas MS n. a. fr. 1404 is 31.7 × 23.2 cm. Both were done for private use. Both are given handsome illustrations at the start of each biblical book. But there the comparisons end. The Arsenal Bible is a manuscript of *grand luxe*, with large, mostly full-page multi-scene narrative miniatures, with an unusually rich and elegant ornamental repertoire, accompanied by illuminated initials, all done on a lavish scale. By contrast, Paris MS n. a. fr. 1404 is a nicely decorated – but not luxuriously illustrated – book with modest-sized miniature panels and red and blue calligraphically decorated initials, but no illuminated initials.

Could Paris MS n. a. fr. 1404 have been copied from the Arsenal Bible? The answer is clearly not, neither for its text nor for its miniatures.[418] What the latter codex has that the Arsenal Bible does not is a verse prologue to Judges, which bears on the original circumstances of the translation of that book, and on the commission of MS n. a. fr. 1404 as well. This indication also tends to confirm what we would have expected, namely that Louis IX had taken his handsome illustrated book of Bible selections back to Paris with him when he left in 1254. The verse prologue to Judges has been fully discussed elsewhere,[419] and we can summarize its significance as follows:

1. Both the Arsenal Bible and MS n. a. fr. 1404 incorporated early translations of Old Testament books and they must have been copied from a common model, or common models, not from each other. If it was remarkable that the Arsenal Bible had used the early editions of Old French translations of the Old Testament book, for reasons discussed in Chapter 6, it is less remarkable that the same early editions were used for MS n. a. fr. 1404. Even though new editions were now becoming available in Paris, in Acre clearly the familiar translations were accessible to the scribes working there. The prologue to Judges is important evidence.
2. The Book of Judges was originally translated about 1173–4 on the commission of Master Richard and Brother Othon, prominent Templar knights active in England in the latter part of the twelfth century.
3. The Book of Judges with the prologue was apparently taken to the Holy Land by Master Richard in 1185, where it became Templar property after his death at the battle of Hattin in 1187. Shortly before Richard had left for Palestine, however, the text was transcribed and must have circulated in N. France and eventually in Flanders, where it was copied in Paris, Bibl. Nat. MS fr. 6447.[420]
4. When the Arsenal Bible was produced in Acre in 1250, this text of Judges was used, but the prologue was omitted because it would have been inappropriate for a royal commission. However, later on the prologue was included in MS n. a. fr. 1404, probably because the manuscript was made for a Templar knight, who, as Weiss characterizes it, "would have desired a dedication made to a predecessor and fellow 'Christian warrior in the Holy Land.'"[421]
5. When Acre fell in 1291, MS n. a. fr. 1404 was apparently taken back to France, where it was copied in a Provençal manuscript now in the Musée Condé at Chantilly, MS 724.[422]

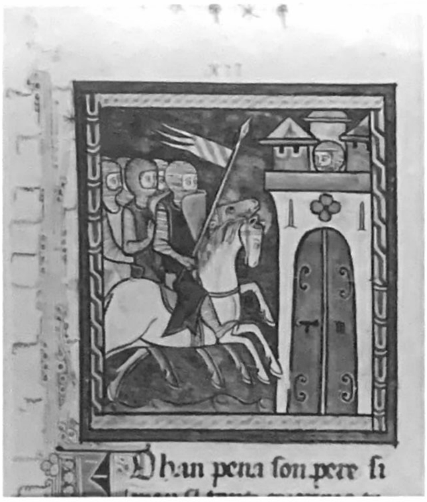
As for the miniature cycle in MS n. a. fr. 1404, it is completely different and much more simplified than what we find in the Arsenal Bible. Effectively only the miniatures introducing Genesis and II Kings have multiple scenes, but for all the representations, the imagery is simplified and direct. Indeed it is also essentially purely French and lacks any Byzantine component. In some few cases the depictions are so simplified as to be ambiguous and even unclear. Nonetheless we can readily see that the work of this artist has parallels with the Moralized Bible tradition of iconography, with the imagery of the *Histoire Universelle* and even the *History of Outremer* miniatures.

The seven scenes for the Genesis miniatures demonstrate that this artist has strong links with basic practices in French thirteenth-century Bible illustration, including some aspects of the Moralized Bible tradition. The inclusion of the seated Lord resting on the seventh day shows only the faintest connections with earlier frontispieces in the Arsenal MS 5211 or the Dijon MS 562, works from Crusader Acre.[423] The scenes that II Kings includes are even more exclusively Western. The image of David ordering the death of the Amalekite (II Kings 1: 15) is entirely focused on the angry king, in his characteristic cross-legged pose,[424] and the anointing of the crowned David (II Kings 2: 4) is completely Western,[425] in contrast with the Byzantine-influenced version found in Arsenal MS 5211.[426] The Exodus image that follows Genesis demonstrates both how up-to-date the artist is in terms of Western iconography, and how innocent of Byzantine influence he is; Moses is both bearded and horned,[427] traits unknown in Byzantine painting of this period.

The simplification in the images is comparable to what we have seen in the Brussels *Universelle History* MS 10175, and there are several examples in MS n. a. fr. 1404. Successful reductions are found in the miniatures for Numbers, Joshua, Judges, III Kings, and Tobit. The panels for the Prologue, I Kings, and IV Kings all exhibit more problematic iconography. In these cases the imagery is so simplified as to be not only unspecific, but also ambiguous.

Contrast these images with some of this painter's best work in which he effectively conveys the new spirit of courtly, chivalrous values as also seen in the *Histoire Universelle* miniatures. For example, in the miniature for Judith, the well-known gruesome scene of Judith cutting off the head of Holofernes has been transformed into a tournament setting. The tent of the general is white with red fittings, gold tie-backs, a green interior, and topped with a golden orb. Holofernes is shown in bed incongruously wearing a crown, while Judith wields his great sword with cavalier bravado in doing the grisly deed, in stark contrast to the earnest determination she displays in the Bible text and as she is depicted in the *Bibles Moralisées*.[428]

Similarly in the extant image for II Maccabees, the choice of iconography is specially attuned to what we must attribute the patron's taste to have been. The story of John I Hyrcanus returning to Jerusalem where he will defend the city against the invading Seleucid, Antiochus VII, is a rare selection iconographically. However, the image of John and his men, Jewish soldiers all, being transformed into French knights riding to defend Jerusalem depicted as a formulaic French castle, embodies the idea of chivalric military ideals just as we have seen them in the *Histoire Universelle* (Fig. 242). We cannot be surprised to find this strongly stated ideal in this image in particular. The Maccabees, alone of the Old Testament books, was the only work in Old French illustrated both as part of the Bible and as secular literature.[429] We can readily imagine that for the Templar patron of this manuscript, a scene depicting preparations for the defense of Jerusalem against the infidel aggressor would have been relevant and meaningful. What is poignant is the fact that the artist has chosen to illustrate John Hyrcanus, not the heroic Judas Maccabeus. John Hyrcanus failed to defend Jerusalem in 133 BC as miserably as the Templars had failed in 1243 and 1244!



242. Bible selections, Paris, Bibl. Nationale, MS nouv. Acq. Fr. 1404: fol. 226v, II Maccabees, panel miniature with John Hyrcanus returning to defend Jerusalem (6.85 × 6.8 cm), with large red and blue calligraphic initial, (I). (photo by courtesy of the Bibliothèque Nationale de France, Paris)

Compared to the rich and detailed program of Arsenal MS 5211 prepared expressly for Louis IX, the imagery of Paris MS n. a. fr. 1404 is much more simplified. Not a manuscript of *grand luxe*, the latter codex contains miniatures that focus attention on major figures from the Old Testament, without personalizing their significance for the patron. There is no special focus on images of Moses, or Old Testament kings and heroines the way we found them in the Arsenal Bible. MS n. a. fr. 1404 does not even include Ruth and therefore does not contain the last book of the Octateuch, clarifying in this way as well as in its imagery its lack of contact with the Byzantine tradition. The fact is that MS n. a. fr. 1404 enables us to understand through its basic and direct program of illustration how extraordinary the Arsenal Bible really is by contrast.

Paris MS n. a. fr. 1404 is nonetheless a very important document for understanding the development of painting in Acre around 1280. It alone preserves the prologue to Judges with its connection to the Templars, and it appears to be the earliest codex painted by the Paris–Acre Master after his arrival in the Crusader capital, about 1280. At this point we can observe that the miniatures of MS n. a. fr. 1404 are very closely related to those of the Chantilly MS 433 (590) Rhetoric codex. Careful observation of the figure style, the conventions of the drapery style, the design of the architecture and military imagery, the colorism, and the technique of the painting will convince us in fact that the same artist did the painted decoration in both manuscripts. If we look at the figures, we see they are both similarly proportioned and share the strong outlines, the drapery forms with elongated "v" folds and conventions for the vertical and horizontal hems. There are also the facial conventions with full faces, large teardrop-shaped eyes, and the linear hair forming distinctive curls over the ears. The Gothic architecture is more pronounced in the Chantilly MS 433 (590) examples. The colorism is basically the same, with pink, pink–purple, orange–red, light and dark blue, and lavender in both codices. However, the additional colors of yellow

and light green that also appear are exploited much more in the Chantilly MS 433 (590) miniatures than in the MS n. a. fr.1404 paintings. Furthermore the technique of shading with the use of color zones is much more emphatic in the 1282 manuscript than in the book of Bible selections. However, there can be no doubt in terms of imagery and style, color, and handling that the same artist is at work in both manuscripts, the Paris–Acre Master.

In sum, this painter once again provides evidence for the "artistic bridge linking Paris and Acre" conceptualized by Weiss, which the Arsenal MS 5211 epitomized in 1250. This time, however, the connection is mainly made in the person of the artist, not so much in the way his painted work brings the Crusader and Gothic styles together. Which manuscripts exist from Paris that can be also identified as his work, and what are their characteristics?

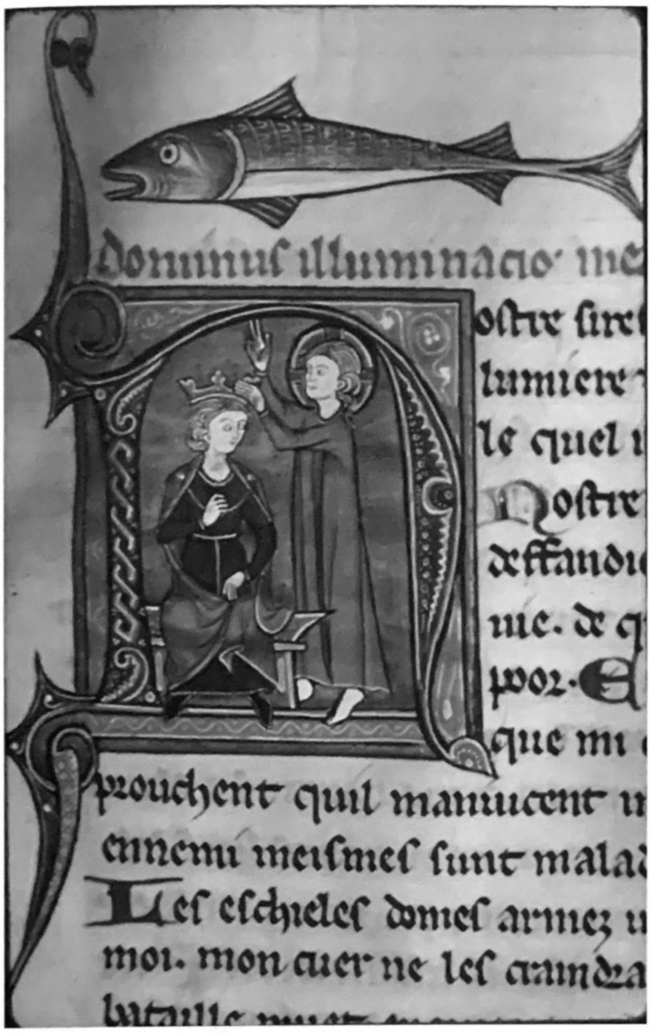
Paris, Archives Nationales, Pièce 1626(1); Paris, Bibliothèque Nationale, MS lat. 5334; and New York, J. Pierpont Morgan Library, MS 494: When research began on the Paris–Acre master, the first codex that emerged done in Paris and decorated by his hand is the censier commissioned by the Abbey of Sainte-Geneviève in 1276, now in the Archives Nationales in Paris, Pièce S 1626(1) (Fig. 243, CD 309–312).[430] Since that time two additional manuscripts have come to light in which his work can be identified. One is a libellus of the life and miracles of St. Martin, now in Paris, Bibl. Nat., MS lat. 5334,[431] and the other is an Old French Bible now in the Morgan Library in New York, MS 494. Of the three works, the censier is invaluable for its documentation, providing an explicit date and place for its illustrations. However, the libellus offers an important historiated initial in a Latin codex as part of his oeuvre, and the Bible contains the most numerous examples of his work before he arrived in Acre, a total of at least thirty-three miniature panels by his hand.

The censier is the most familiar work because it has been identified the longest.[432] It contains four miniatures, which begin each quarterly phase of the year for the rents listed in this document for the year 1276. Although the attribution of all four miniatures to the hand of the Paris–Acre Master has been contested, no other examples of separate work by more than one artist has been suggested among the other manuscripts ascribed to his hand. Whatever we may decide in this case, the designs of the Paris–Acre Master seem to have been the basis for these paintings, and there is no doubt that his work is found in the censier.[433] There is also no doubt that the hand of the same artist can be seen in the historiated initial of the libellus of the life and miracles of St. Martin (Fig. 244, CD 313).

On the basis of comparative analysis, it appears that the initial in the libellus was done after the Paris–Acre Master had finished his work on the censier in 1276. It also appears likely that the libellus was done in Paris before he left for Acre. As the result of his work in Paris as we knew it then, it appeared that it was correct to think of the artist as a bookpainter, probably as a cleric in one of the lower orders, judging from the normal qualifications required for those working in the university book trade. It is also possible that our master had an important patron who was some senior cleric or an educated aristocrat of means. It is perhaps the case that when his major patron left Paris to go to Acre, he went with him.[434]

In 1997 I wrote the following:

> So far as we know now the hand of the Hospitaller Master [sic] does not appear in any manuscripts attributed to Paris at this time other than the *libellus* and the *censier*. All of his other work appears to have been done in Acre.[435] Despite the modest decoration in the *libellus*, it provides us with additional precious evidence that the Hospitaller Master's [sic] origin is correctly to be found in Paris and that his training



245. Bible in Old French, New York, J. P. Morgan Library, MS 494: fol. 302r, Psalm 26, historiated initial
(5.2 × 4.7 cm), (N)ostre sires si est ma lumiere & mon salut. . . .

> and his patron in Paris provided him with the opportunity to travel to the Levant, where the major part of his *oeuvre* was accomplished.[436]

In fact, however, there is another extremely important codex, a Bible in Old French, now MS 494 in the Morgan Library in New York, in which the hand of the Paris–Acre Master can be identified working in Paris before he went to the Holy Land (Fig. 245, CD 314–326).[437]

Morgan MS 494[438] is a magnificent illustrated Bible in Old French, a book Henri Martin called the only complete thirteenth-century Bible in the Old French vernacular in existence. It is a large, heavy book of 638 folios obviously done for someone of means, and although it was not lavishly illustrated, it was very handsomely decorated at a level slightly higher than the Bible from Acre we have already discussed, MS n.a. fr. 1404. In the case of the Acre Bible, our master did all of the painted illustrations. In the case of MS 494, he was one of three major masters, and there were probably assistants working with them in the workshop as well.

Parts of the text of this codex have been studied – the four Gospels – and on the basis of that it has been related to other early Old French Bibles, all done in the West.[439] What is interesting about the text stemma is that although another Old French Bible done in the West exists that is closely related stylistically to MS 494 in terms of the miniatures, Copenhagen, Royal Library MS Thott 7,[440] the text of the latter is unrelated. The question is, given the relevance of one of the artists of MS 494 for painting in Acre, is any part of the text of the Morgan manuscript related either to Paris Arsenal MS 5211 or to Paris MS n. a. fr. 1404? Given the importance of this Bible text in Old French for the development of Bible studies in Paris in the thirteenth century, not to mention the evolution of the language, this book is worth further serious consideration. On the basis of the binding of the codex, it appears to have been in the French royal collection in the fourteenth century, when King John II took an interest in it. With regard to its miniatures, the fact that it was probably done in the late 1270s – current thinking at the Morgan places it *c.*1280 – and that it is yet another example of a significant collaborative effort means that it was part of the flourishing industry of manuscript illumination after the death of Louis IX for which Dante praised Paris as the greatest European center.[441] It also means that in this book we will gain a much greater understanding of the Paris–Acre Master before he goes to the Near East. Which illustrations did he paint in Morgan MS 494?

Out of a total of seventy-six miniatures in this Bible, the Paris–Acre Master appears to have done the following: two panels and two historiated initials for I–IV Kings, one panel and eight historiated initials for the Book of Psalms, one panel for "Paraboles," fifteen historiated initials for the Pauline epistles, and three panels along with two historiated initials for the Letters of James, Peter, and John. This total of thirty-four illustrations for the book is clearly a substantial segment of the illustrations – he was one of the major artists working on this codex.

How can we compare his work in this manuscript to other paintings in his oeuvre? If we look at the historiated initial for Psalm 26 on fol. 302r, an image of the Lord crowning King David, we can see evidence for the fact that this painter is indeed the same artist who later worked in Acre as the painter I am now calling the Paris–Acre Master. Consider this miniature in relation to the panel for II Kings in the Paris MS n. a. fr. 1404 at fol. 124v, where David is being anointed as king. Not only is the basic figure style and the mise en scène precisely the same in terms of the standing and seated figures in both miniatures, but also certain specific details are the same. Notice the handling of the drapery folds and their hems, the way the artist renders the faces with the large round teardrop-shaped eyes, the treatment of the hair with the characteristic curls over the ears, and the poses of the figures, for example, the profile figures standing weightlessly on tiptoes. These features, among others, including the colorism of these paintings, make it clear the same artist is at work on these two miniatures. Furthermore, it is evident from the painted "n," from the flourishes in the left margin with spikey junctures, floral endings, and golden discs, the large fish represented as a marginal drollerie, as well as the text frame below joined to the lower flourish by the neck of a dragon biting its own neck, that this artist is using a full repertory of decorative design here. Moreover this repertoire in Morgan MS 494 probably done just before 1280 is exactly comparable to what we find by his hand in Chantilly MS 43 (590) executed in 1282. We can also recall that our master included decorative marginalia even in the censier for the Abbey of Sainte-Geneviève in 1276.

Further consideration of this artist's work will yield additional parallels. The scene of Anna praying with Eli standing behind her at I Kings (fol. 171r) is comparable to the scene in MS n. a. fr. 1404 (fol. 94v) with slight changes in iconography. Meanwhile the figure of Eli wears a cloak that is exactly like the cloaks worn by the kneeling monks appearing in miniatures of the censier, at fols. 20r and 26v. Moreover, the frame of the miniature panel in MS 494 at fol. 171r is similar, in terms of color and diagonal corner joins inside the outer gold border, to those found in the miniatures of Chantilly MS 433 (590) at fols. 13r, 45v, 95r, and 127v. This type of frame is different from the type utilized in MS n. a. fr. 1404 with its squared-off corner joins and vocabulary of decorative forms, but interestingly in MS 494 we find virtually the entire repertory of frames, either by him or by other artists, that the Paris–Acre Master uses in his later manuscripts in Acre.

The decoration that begins the Psalms at fol. 296v of MS 494 consists of a panel miniature, which depicts the story of David and Goliath, and an historiated initial that shows David playing his psaltery. A marginal drollery appears below; it is a creature – half-man, half-fish – who combs its hair and looks at itself in the mirror. A text frame appears along the upper left margin with spikey junctures, and a winged dragon is worked into the design. The panel includes two biblical scenes, but the spirit of the imagery is comparable to the illustration of secular romances, such as we find in the Lancelot manuscripts.[442]

The historiated initials that constitute the series of decorations for the Psalms are entirely comparable in iconography to those found in the region of Paris in the late thirteenth century. The program of illustration in Morgan MS 494 is completely standard as can be demonstrated by comparison to, for example, Paris, B.N., MS lat. 15467, a book done in Paris *c.*1270.[443] It is an eight-part Psalter with the exact same imagery for Psalms 1, 26, 38, 52, 68, 80, 97, and 109, all also done in the format of historiated initials. MS 494 is distinct only by virtue of the added panel miniature at Book 1, before the historiated (B) of the "Beatus vir . . . ," which contains the two scenes from the David and Goliath story, as mentioned earlier. There are also some iconographic variations in the miniatures of the ensemble; for example, the image for Psalm 109 has neither the Trinity nor the figure of Christ enthroned, as found in the standard versions. It has instead a rather rare variant, namely, two enthroned figures with crossed nimbi, a variation on the Trinity where the dove of the Holy Spirit is missing.

Otherwise the historiated initials done by this master are well executed, but generally repetitious and not particularly interesting. The largest group of these initials is found for the Pauline epistles, and they generally represent a figure of St. Paul seated with a sword inside the decorated letter, and occasionally a drollery above or below in the margin. The one more interesting type of image for these initials is found at fol. 597r, the start of Paul's letter to the Philippians, where Paul inside the city hands a covered letter to a figure who may be a tonsured cleric outside. The architecture of the city with its blue walls, large white tower and red roof, and small pink tower in the rear with a blue roof is completely comparable to the architecture we find in Chantilly MS 433(590), especially at fol. 13r.

In terms of his collaboration with two other major artists in Paris in the late 1270s in MS 494, this manuscript provides us with very important evidence for this painter's work. First, we can see that his activity in Paris was much greater, more diverse, and yet more mainstream than we could document until now. In Paris he executed thirty-nine miniatures in three very different kinds of manuscripts. This contrasts sharply with the mere five miniatures we could attribute to him before the discovery of MS 494. This number and the nature of the illustrations, although broadly speaking all essentially religious in content, by virtue of their diversity suggests that his career in Paris was much more important than we knew before MS 494 was identified. His work in Paris is also perhaps much more parallel with what he does in Acre. Second, the work of this artist develops seamlessly. We first see him in Paris starting with the censier of 1276, and then he paints both the libellus and the Bible before he leaves for Acre around 1279 or 1280.[444] When he arrives in Acre he first takes on a commission remarkably similar to, if much smaller than MS 494, a book of Old Testament selections, MS n. a. fr. 1404, which he illustrates. Then he receives a commission from William of St. Stephen, an important Hospitaller knight, to do the *Rhetorica* manuscript in 1282.

This artist, the Paris–Acre Master, and his paintings are therefore important in a number of ways. This Master is the first purely French Gothic painter known to work in Acre. He is also the first western European artist of any origin who comes to the Latin Kingdom, some of whose work we can identify both in Europe and in the Latin Kingdom. Obviously there may be other painters yet to be discovered, but it is noteworthy that we should find the Paris–Acre Master first, when the French presence in the Crusader capital is consistently strong by virtue of the existence of the French regiment there since the time of Louis IX.

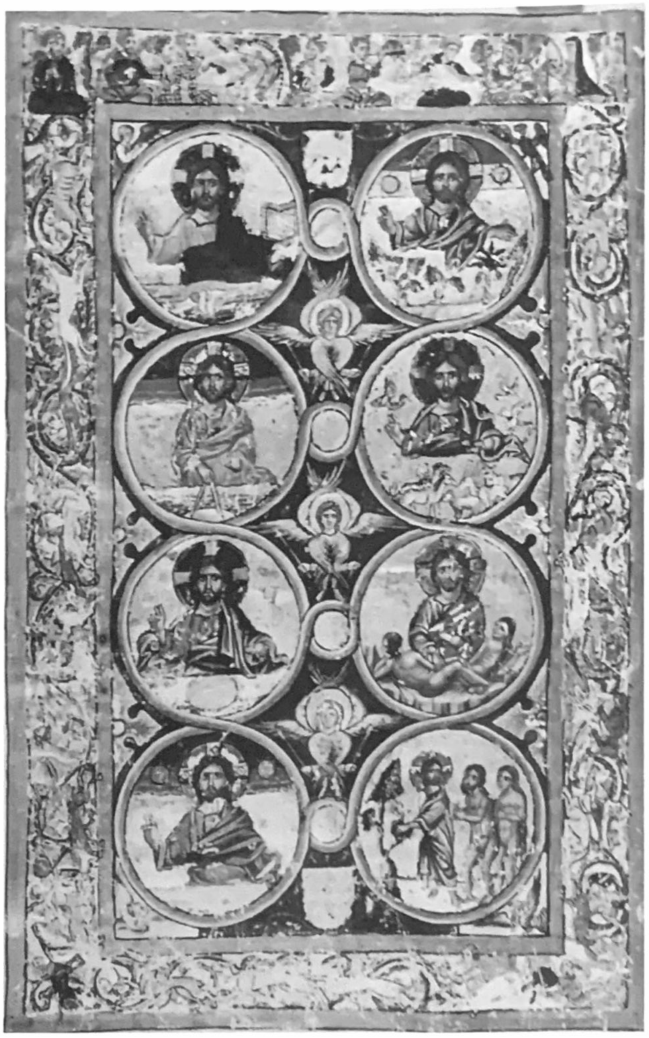
The Paris–Acre Master, who arrives in Acre as a French Gothic painter and proceeds to continue his painting in the French Gothic style of the 1270s, provides us with an important new perspective on the "Crusader style" work we have seen in Acre before 1280. The Paris–Acre Master is clearly Western, a Parisian French Gothic painter, and he becomes "Crusader" only by virtue of the fact that he is commissioned to do his work in Acre for Crusader patrons, not because the nature of his painting changes. His existence changes our frame of reference somewhat for what a Crusader painter is, and how we understand what the nature of Crusader style may be. The Paris–Acre Master comes directly to the Holy Land already fully trained and mature in his career, completely formed as an artist. He is not born in the West and taken to the Crusader States where he receives his artistic instruction in a region strongly influenced by the Byzantine tradition. Nor is he born in the East of Crusader settlers, with French, Italian, German, or English background, and trained as a Crusader artist under the strong influence of Byzantine art. He is, in sum, completely unlike earlier Crusader painters we have encountered. The question is, when he decides to stay in Acre and execute more work, how will his work change and develop? What work will he do? How will he be influenced by his new surroundings, and how will this alter his art?

In the meantime, what if anything can we say about his patrons and the nature of his commissions, in Paris and in Acre between 1276 and 1282? In Paris we find him painting the censier for the Abbey of Sainte-Geneviève and the libellus possibly for St. Martin des Champs, or for someone somehow connected to this famous establishment. Unfortunately we do not know for whom he worked on the Bible, Morgan MS 494 – perhaps whoever he or she was constituted his most important patron. In Acre, we have proposed that a Templar may have commissioned the book of Old Testament selections, and we know for certain that he worked for William of St. Stephen, a prominent Hospitaller, in 1282. This series of patrons, all of whom are quite possibly religious in background and status, suggests that the artist may have been in lower orders himself. There is, however, no indication that he worked for the Templars or the Hospitallers in Paris, and we still do not know why he went to Acre. Perhaps new evidence will come to light that can help clarify these questions further.

The work that the Paris–Acre Master does after 1282 is something of a surprise, given his previous commissions. After a hiatus of several years, from 1282 to 1286, he reappears doing a series of manuscripts of the *History of Outremer*, among others, which include a *Faits des Romains* as well. In these codices we have no specific indications of who his patrons were, but given the nature of the manuscripts, they were most probably laymen, possibly aristocratic laymen, of means. The first of these codices is a *History of Outremer* codex now in Paris, B.N., MS fr. 9084. It is a remarkable book because its miniatures are clearly done by artists working in two different styles: The first five illustrations are painted in the traditional Crusader style; the remaining seventeen panels were painted by the Paris–Acre Master in his signature French Gothic style. Why would such a program be done? What would explain this dualism, as it appears to modern eyes? What context can we find for the production of this book as we have it?

Hugo Buchthal began his discussion of the manuscript by pointing out that the first five miniatures of MS fr. 9084 were done in a style closely related to a major Acre manuscript, the last extant *Histoire Universelle* from Acre, London, British Library, Additional MS 15268. His characterization makes clear that the production of this latter codex was a major event in the history of manuscript illumination in Acre. Buchthal writes, summarizing its place in the manuscript production of the Crusader capital:

> The magnificent volume of the Histoire Universelle in the British Museum [sic], . . . reflects the ambition to emulate the grand compositions of a contemporary Byzantine manuscript. For 150 years, ever since the days of Queen Melisende's Psalter, the temper and the aspirations of Crusading illumination had remained constant. But its true qualities were not present from the outset; they appeared only after a long period of apprenticeship. Its most accomplished products, the Riccardiana Psalter and the Arsenal Bible, already belong to the thirteenth century. The British Museum copy of the Histoire Universelle may now be added to the small group of outstanding masterpieces illuminated in Outremer. It speaks eloquently of the vitality of the scriptorium of Acre even at this late date and in the face of impending doom. One cannot help admiring the consistency which governs the scriptorium's activities throughout the second half of the century: the tradition inaugurated by the master of the Arsenal Bible asserted itself to the end, and gave every single miniature its particular artistic identity. This last chapter in the history of miniature painting in the Crusading Kingdom, even more than its predecessors, is the supreme vindication of the stimulating qualities of Byzantine art, and of the fertilizing effect it had on the creative impetus of medieval Latin artists.[445]



246. *Histoire Universelle*, London, British Library, Add. MS 15268: fol. 1v, (panel: 30.0 × 20.0 cm), the Creation. (photo by courtesy of the British Library, London)

As it turns out this manuscript does not represent the last chapter in the history of manuscript illumination in Acre. However, this eloquent statement about the importance of London, British Library, Add. MS 15268[446] challenges us to reconsider its iconographic program, the artists who painted it, its patronage and function, and fundamental questions about the "scriptorium of Acre," and the idea of who a Crusader artist is and what the nature of Crusader art is at this late date in the city of Acre.

London, British Library, Add. MS 15268 (Figs. 246–248, COLOR PL. 8, CD 327–369): Buchthal's analysis has made clear the fact that Add. MS 15268 has a cycle of miniatures comparable to those found in Dijon MS 562 and Brussels MS 10175. It is not the largest cycle; the London codex has forty-three miniatures whereas Dijon MS 562 has fifty and Brussels MS 10175 has thirty-seven, but its miniatures are regularly larger in size than those found in its predecessors. Indeed, many occupy fully two columns of text, and some are full-page or nearly full-page

panel miniatures. Iconographically its cycle is related to its Acre predecessors, probably drawn from a common model but closer to the Brussels MS 10175 cycle, thus very up-to-date. Buchthal suggested the London codex was probably done in the same scriptorium as the two earlier Acre *Histoire Universelles*, but he does not analyze the number of artists who can be identified working on this commission, and none of these artists are found in either Dijon MS 562 or Brussels MS 10175. Some of these artists are likely found, however, working in a *History of Outremer* codex, Paris MS fr. 9084, the next manuscript also worked on by the Paris–Acre Master. This fact poses interesting questions for our understanding of the scriptorium arrangements in Acre at this time, an issue we shall return to after analyzing Add. MS 15268 further.

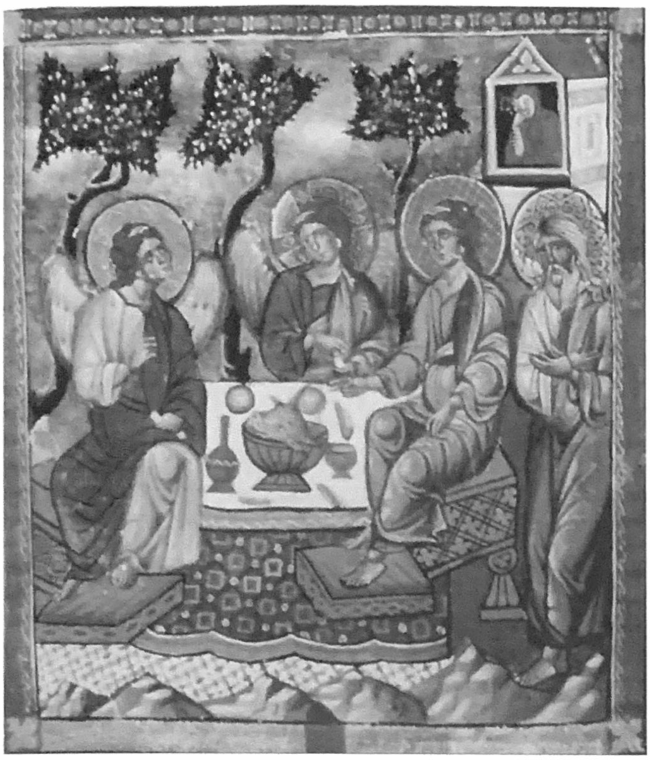
The miniatures of the London *Histoire Universelle* are related in content and presentation to those of its predecessors, Dijon MS 562 and Brussels MS 10175, as those of the Arsenal Bible are related *mutatis mutandis* to the miniatures of its later relative, Paris MS n. a. fr. 1404 in Acre, or to the relevant portion of Morgan MS 494 in Paris. Buchthal's summary of how the miniatures in the cycle of the London codex have been expanded cites the important points, rendering superfluous yet another detailed comparison.

> In the process of copying, each miniature has been completely transformed. The unimaginative *reportage* of the earlier manuscripts in which different stories were often illustrated by the same hackneyed and stereotyped formulas has given way to a vivid and elaborate narrative; every scene gives the impression of a fresh and individual interpretation, achieved by an entirely new approach to the subject and by a lavish decoration not to be found in the model. The illustrations evoke immediately the high standards and the refined atmosphere of a royal court, and raise the narrative to a new level no longer in keeping with the modest aims of the original work.[447]
>
> Most miniatures appear more sumptuous and colourful through the addition of single figures, groups of figures, or whole scenes, of buildings and sometimes of whole towns, and of mountains and other landscape details; these are often quite superficially inserted in places where they clearly do not belong. Wherever possible the traditional scenes are presented in a livelier manner, and with considerable variation. Sometimes the features added are irrelevant to the story, and even detract from its significance; the great majority of the miniatures, however, are more explicit, and their wealth of descriptive detail achieves a splendid decorative effect. Here for the first time the somewhat meagre pictorial material of the earlier model, which was primarily of iconographical interest, is used in such a way as to bring out its artistic possibilities; it has intentionally and proudly been converted into a series of representative and attractive pictures in which iconographical considerations play only a subordinate part.[448]

With regard to style, Buchthal makes the following important observations:

> Though several hands may be distinguished in the illustrations of this manuscript, their style is surprisingly uniform. What differences there are may be traced back to the different styles of the models used by the masters of Acre; frequently they are more prominent between the single figures of one scene than between different miniatures. In fact, the blending of the French and Byzantine styles is more superficial in this manuscript than in most of its predecessors, for instance in the Arsenal Bible; frequently these two elements stand quite unrelated side by side. The reason for this lack of co-ordination is that the two component parts of the style are no longer identical with those in the earlier manuscripts; there is an influx of new ideas which have not yet been entirely absorbed. The French features are still based on works like the Bible Moralisée and the Morgan Picture Book, and lack the sophistication of Gothic illumination from the period after the return of St. Louis from the Holy Land; but the Byzantine element, especially obvious in the Genesis miniatures, is now derived from a new style, which appears at Constantinople only after the middle of the century, with restoration of a Greek dynasty to the imperial throne.[449]

Buchthal sees the influence of the new Palaeologan Byzantine art in various terms. There is what he calls "new devices of perspective" that appear in, for example, the image of King Ninus Enthroned (Fig. 247; fol. 16r), which he likens to the Mellon Madonna's throne, now in the National Gallery of Art in Washington, DC.[450] (Fig. 300) There is the new colorism, surely one of the striking features of the miniatures in this London *Histoire Universelle*. There is the figure style with its volume and roundness, softly painted with white highlights, but often with strong outlines, as in the miniature of the Hospitality of Abraham (Fig. 248; fol. 24v). There is also the strength and impressiveness of the head of the Lord repeated seven times full size in the frontispiece to Genesis (Fig. 246), which Buchthal compares to



248. *Histoire Universelle*, London, British Library, Add. MS 15268 fol. 24v, (panel: 18.3 × 16.6 cm), Abraham's hospitality. (photo by courtesy of the British Library, London)

the head of Christ in the now famous Deësis of the south gallery in the Church of Haghia Sophia.[451] This is the same Deësis, of course, which O. Demus used as an essential point of reference in discussing the Kahn and Mellon Madonnas, which conveys a strong restatement of Byzantine artistic presence in the 1260s, despite the fact that neither the Kahn nor the Mellon Madonna looks very closely related to the head of the Virgin in this Deësis in any specific way.[452]

What Buchthal has to say about the French influence here is also very interesting in light of what we know now about the presence of the Paris–Acre Master in Acre in the 1280s. It means that, for whatever reason, in a workshop where the Paris–Acre Master was surely known, and where he may have even done his work on Paris MS fr. 9084, the French influence in this cycle was only received as embedded in the transmission of earlier models. No direct impact can be seen from the work of the Paris–Acre Master, a French Gothic painter working in Acre in the Gothic style of Paris in the 1270s. We can only conclude that this choice was intentional on the part of those who commissioned London Add. MS 15268. They wanted a book illustrated in the traditional Crusader style.

Buchthal also comments on the interesting influence of Islamic art that appears in the painting of this book along with the Franco-Byzantine Crusader style and imagery.[453] The frontispiece that begins this manuscript is the richest example for seeing these various aspects together. Whereas the medallion images of the Creation for Genesis are based on both Byzantine depictions of the Pantokrator and the iconography of the Lord as the architect of the universe as found in the Moralized Bibles, the mise en scène owes more to the Arsenal Bible in terms of the combination of geometric forms with floral designs in the interstices. What is different here of course is both the addition of three seraphim and the four Evangelist symbols, giving the Creation cycle a cosmic Christian reference, with two coats of arms and a remarkable historiated border, referring very likely to the person for whom the book was made. In fact, as Buchthal has also pointed out, the border incorporates at the top, a feasting scene in which an Islamic dignitary is seated while surrounded by music makers and a dancing girl. On the sides and at the bottom, this program is completed with the addition of vine scrolls containing hunters and animals, including certain exotic creatures like centaurs.[454] Hunting scenes associated with rulers are an ancient iconography for kingship in the Near East going back to Assyrian times, and this appears to be directly intended here for a Crusader, that is, a resident Frank who was part of the leadership establishment who could understand and relate to this kind of visual language.

Buchthal makes the case that borders of this type can be seen in Islamic thirteenth-century art, with banqueting figures and some of these animals to be found in wood and ivory carvings as well as miniature painting from Baghdad from before the Mongol conquest in 1258.[455] Following this same idea, other parallels have also been suggested in both miniature painting and ivory sculpture.[456] He also makes the case that this frame is closely related to frontispiece paintings in manuscripts of the Baghdad School that function as dedicatory copies of certain texts commissioned by a high Muslim official.[457] He argues further that the purpose of including this imagery here is to give this book the character of a dedicatory copy for its recipient. The problem is, and remains after all these years, "to establish the identity of the Latin prince who would have appreciated these allusions to Islamic fashion."[458]

The two coats of arms found on the frontispiece are today almost obliterated, but the hope of identifying the owner of the arms dimly visible there has suggested the possibility of identifying just that Latin prince. Buchthal commented, however, that "the coat of arms which appears twice on this page is a later addition, and thus of no help in settling the problem of its original destination."[459] More recently, however, Zeitler attempted to argue that these coats of arms did not replace older escutcheons, but that the arms fragmentarily visible here are the original ones for whom the manuscript was intended. Unfortunately, the arms she identifies, *losangé or et azur*, although identifiable in some measure, do not relate to anyone in Outremer who seems relevant to this commission.[460] She argues therefore on the basis of these escutcheons that given the presence of these arms, the interpretation offered by Buchthal, that the manuscript was produced to be given to the new king of Jerusalem, Henry II de Lusignan, on the occasion of his coronation in Tyre, is not acceptable.[461] She concludes that the manuscript was probably done for "a Francophone Westerner of elevated social status. Most likely the initial owner was a member of the Levantine aristocracy, . . . [but] there is no reason to assume that a world chronicle, such as the *Histoire Universelle*, could not also have been made for a Western cleric living in the Levant."[462]

The jury is still out on this issue. Of the two coats of arms, the gold remains and the blue of the lozenges can be seen clearly around the edges of the two and tiny scraps in the main body of both as well. The color of this blue seems to be a dark turquoise, which is different from the more cobalt blue of the background on which the shield is set. The dark turquoise seems to be similar to the blue of the scrollwork of the border and may be found in the draperies of two of the musicians in the top border. It remains to be investigated definitively with appropriate technology whether the remaining pigment is contemporary with the rest of the miniature or a later addition. One problematic bit of evidence is the existence of a white vertical stroke in the top left corner of the upper shield: Is it painted over the blue, or beneath it? Was this original or painted in later? As yet this is not determined, but will need to be evaluated as research goes forward.

There is another point worth considering. Assuming for the moment that this blason, *lozengé or et azur*, was the design for the entire shield, it is worth noting that one of the miniatures in the cycle at fol. 149r, depicting Queen Camilla fighting Aeneas, shows Camilla's leading knight carrying exactly these arms on his standard. Does this indicate something about the patron, and/or how these mythical wars were meant to relate to the recipient of this book? Although these escutcheons clearly do not carry the arms of King Henry II, we cannot rule out the possibility based on what we know now that the manuscript with its many fanciful heraldic decorations in the miniatures (COLOR PL. 8) was meant for him, as Buchthal originally suggested, or some other prominent noble at this time.

The question of the artistic hands involved in the painting of this cycle of miniatures is an equally difficult issue. Buchthal realized that several artists participated in producing this book, but he made no attempt to analyze their hands. He comments in different places on the fact of multiple artists, for example, "the miniatures were executed by several different artists who all worked in a very similar style. They all had an intimate knowledge of the pictorial tradition and conventions of the Acre scriptorium, and were familiar with the local version of the cycle of the *Histoire Universelle*; this knowledge could only have been acquired through considerable experience on the spot."[463] Personal inspection of this manuscript makes vividly apparent some of the ways the miniature cycle visually differs from its predecessors or from other illustrated codices done in Acre in the 1280s. Some of the most striking features of this codex when looked at in terms of the miniature cycle are the extraordinary colorism of these paintings, with strong rich colors combining Gothic reds, blues, and pastels, with oranges, reds, and greens, as well as certain other hues such as gray, yellow, beige, and even black. This colorism is combined with a very strong interest in the use of heraldry for the knights and soldiers, which appear in these miniatures. Heraldic arms appear prominently in one form or another on nearly half, that is, fully nineteen of the forty-three panels in this cycle. For the most part the heraldry appears to be essentially imaginary, but the taste for such imagery is clearly a feature of this and other manuscripts done for the educated aristocratic soldiery in the last years of manuscript production at Acre, as we have seen and shall continue to see.

Three other features also striking about these miniatures are the focus on battle scenes of all sorts in all the various stories contained in the *Histoire Universelle*, on the imagery of crowned and noble figures throughout the book, and on a considerable sensibility for depictions that convey the idea of the confrontation of East and West. We see the battle scenes particularly in the representation of Greek mythological stories down to the time of Alexander the Great and imagery derived from the Alexander romance. They include conventional combat between knights and armies as well as siege scenes, but they also include soldiers battling exotic beasts or the famous confrontations of Alexander's army fighting with troops mounted on elephants. The depictions of crowned and noble figures range from biblical personages such as Joseph and Pharoah, to mythological and historical figures like Ninus, Laius, Adrastus, the Amazon queens, Brutus, Nebucchadnezor, Holofernes, and Alexander among others, a remarkable array of people from antiquity. Finally, these representations are occasionally given quite specific contemporary East–West iconography by means of characterizations of Eastern physiognomies and swarthy skin, or costumes of flowing robes and men wearing turbans, or scenes of figures in tents seated in Muslim fashion. We see examples in the miniature for Judith and Holofernes (fol. 181r) especially, and the battle of Alexander with opponents on elephants (fol. 204r). The question is, who were the artists who carried out this commission?

To consider this question, it is important to recall what Buchthal said earlier:

> what differences there are [in style] may be traced back to the different styles of the models used by the masters of Acre; *frequently they are more prominent between the single figures of one scene than between different miniatures*." (my italics)[464]

It must be pointed out that in the current state of our knowledge about this manuscript, we are limited in how far we can proceed with analysis and interpretative discussion.[465] Nonetheless there are certain aspects of style involving artistic hands that can be at least commented on.

When we look at the first part of the miniature cycle, the part that deals with Genesis and is the most heavily influenced by Byzantine sources, we can begin to see what appears to be going on with this project. In the miniatures of the Genesis story we find the representation of a strongly modeled three-dimensional and very painterly patriarchal figure in boldly colored two-tone pastel robes, for example, Noah, Abraham, or Jacob, fols. 7–71. This figure often appears with others done in a somewhat different style, figures much less monumental, treated much flatter, with more linear draperies characterized with flat color and much less modeling, as in the Abraham and Isaac scene (fol. 30v), or scenes of Jacob and Joseph (fols. 48r, 65v, 67r). Recall Buchthal's comment, "the blending of the French and Byzantine styles is more superficial in this manuscript than in most of its predecessors, . . . ; frequently these two elements stand quite unrelated side by side." The possibility exists that this is because different artists were doing different parts of these miniatures, not simply that one artist was using different models. What other evidence can we see?

We also notice in these scenes a certain paradigmatic method placing the figures lined up across the foreground over a background that consists of elements introduced in a seemingly formulaic manner. These backgrounds are composed of different elements, which vary, but they consistently appear to be inserted as needed, namely, architectural components, landscape elements especially mountains, and decorative patterned passages. These patterns are varied but used frequently, and often appear between architectural elements, as with King Ninus (fols. 16r, 71r), Abraham and the Three Heavenly Visitors (fol. 24v), and scenes of Jacob and the Joseph story (fols. 48r, 58r, 64r, and 67r). We also notice that the frames of the miniatures vary considerably. Consider the double gold frame with floral interior decoration of the Noah miniature (fol. 7v), to the red and blue frame with floral motifs of the first King Ninus (fol. 16r), to the variety of patterns – medallion, cable or meander, lozenge, floral – that appear on the other panels with more conventional rectangular enclosures. What this evidence suggests is that perhaps these different parts of the miniatures are being painted by artists who specialize in these components.

This kind of analysis can be continued for the latter portions of the miniature cycle where we encounter other similarly striking elements that seem to be juxtaposed with different components that vary with the size and complexity of the miniature. The handling of the frames, of the background elements, of the use of patterns, and of the variety in combining figure types continues in these later paintings. However, other striking aspects appear as well, most notably the introduction of a considerable repertory of knights and soldiers, the array of heraldic designs, and the composition of complex assemblages of different figures and often strange and exotic animals. It is immediately apparent when analyzing London Add. MS 15268 as compared to its predecessors, Dijon MS 562 and Brussels MS 10175, that the designer of the London miniatures has followed the cycle tradition in choice of scene, perhaps known from a common model available in the workshop. However, when the remarkable expanded miniatures of Add. MS 15268 are compared with the corresponding images in these extant predecessors, it is clear that the process by which they were expanded can be seen to have required significant additions of elements. Typical revisions or additions, such as, for example, groups of figures, landscapes, architecture, and zones of pattern, and changes in existing forms, such as the frames, seem to have much more to do with other similar "standardized" components in the manuscript than they have with their sources in the earlier surviving examples. That is to say, whereas for example the appearance of mounted knights with full heraldic identification can be seen in both Dijon MS 562 and/or Brussels MS 10175 miniatures and the corresponding panel of the London codex, the stylistic relationship between such knights and their counterparts in other Add. MS. 15268 miniatures is singularly much more closely linked by contrast to those in earlier representations, or by contrast even to other figural groups in the London manuscript.

The conclusion this leads us to consider for the London Add. MS 15268 manuscript cycle is that the workshop organization for this project introduced something we see in Acre for the first time. It appears that the artists were organized according to specialties and there was a division of labor among the painters according to those components for which they were responsible. This suggests that the head of the workshop for this large and important project employed several painters, perhaps as many eight or nine, perhaps as few as five or six. Further research will be required to pursue this analysis and to investigate other possible cases in which this same modus operandi can be identified. As it appears here, the headmaster must have organized the team, established the plan for the cycle, provided the instructions, whether verbal, written, or visual, for each miniature, and supervised the process in order to make it possible to complete the project in a timely fashion. The purpose of introducing this kind of division of labor was probably intended not only to make the process of a major project like this one possible, but also to be able to manage the time required so that a large and complex cycle could be executed efficiently in a minimal amount of time.

As research goes forward on this manuscript we can evaluate the possibility of this rather new and sophisticated approach to the organization of labor among the members of the workshop. Clearly very few extant manuscripts from the latter part of the thirteenth century from anywhere in the medieval world would suggest an approach like this, much less the case in Acre. Certainly even Arsenal MS 5211 done for Louis IX – a manuscript of the highest level of decoration with a cycle of the greatest sophistication that exhibits a very rich and complex program – does not seem to provide any evidence for a division of labor such as what we are suggesting for Add. MS 15268. Even though we know that in the case of the Psalter of Queen Melisende from *c.*1135 there were a number of artists at work on this commission, each artist worked on their own set of miniatures; they did not collaborate on a single miniature.[466] It is, however, the nature of the miniatures as we find them in the London Add. MS 15268, the way they are related to their predecessors, and to other miniature panels in this codex, and the composite nature of their compositions that suggest this interpretation of how they were done.

Looked at from this point of view, it sheds new light on the possibilities of the Acre scriptoria that we will endeavor to evaluate as we discuss other manuscripts that constitute closely related examples in terms either of chronology or of style. For one thing it means that the workshop for any one manuscript must be evaluated individually on its own terms. It means that artists could be brought in if more than one was needed to handle a special project, as we have already seen in the past. However, it also means that if many artists were not needed for a large project, these painters could work along in their own workshop. There they would work individually as well, but with the possibility of maintaining contact with their colleagues in other nearby ateliers when needed to meet the needs of their current commissions.

In light of these proposals, what can be said about the patronage, the function, and the intended recipient of London Add. MS 15268? In light of the programmatic emphasis, the special decorations, and the high quality, the size, and the lavishness of the commission, Buchthal proposed what is the current working hypothesis for the production of this book. He suggested that "the British Museum manuscript is probably a royal dedication copy which may have been produced to celebrate a special event."[467] He identifies that special event to have been the advent of Henry II of Lusignan to be the new king of Jerusalem. Henry II was crowned king in Cyprus in June 1285. Approximately a year later, in June 1286 he came to Acre where he was acclaimed as the new king-to-be in the Latin Kingdom. On 15 August, the Feast of the Assumption of the Virgin, Henry was crowned in the cathedral in Tyre.[468] Thereafter he came to Acre where "they held a fortnight of festivity."[469] Buchthal proposes that "it is tempting to connect it [Add. MS 15268] with the festivities of 1286; it is perhaps not too bold to argue that it was presented to King Henry by the military aristocracy of Acre on the occasion of his coronation, and to commemorate the pageantry staged in his honour."[470] For the time being this

remains the best working hypothesis for many reasons, and it means that the project to produce the manuscript was carried out in 1286, even though the exact timing is unclear.[471]

In light of the likely production of this major manuscript in 1286, what precise relations can we see between this codex and Paris, B.N., MS fr. 9084, a manuscript with miniature painting closely related to the style of the London Add. MS 15268 cycle?

Paris, Bibliothèque Nationale, MS fr. 9084[472] ***(Figs. 249–250,*** *COLOR PLS. 9, 10, CD 370–391):* Hugo Buchthal proposed that "it is unlikely that the William of Tyre manuscript . . . was intended for the library of a royal patron. But the first five miniatures in it are certainly the work of the same group of artists who illustrated its close relative, the Histoire Universelle in the British Museum; they may be taken as reflections of the same spirit of high attainment which we traced in the illuminations of that outstanding volume." Buchthal declines to identify which artist(s) found in London Add. MS 15268 he thinks worked on the first five miniatures of MS fr. 9084, and, of course, he did not know in 1957 what we learned in 1976, that the remaining seventeen illustrations were done in Acre as well, not in France or Cyprus. He only comments, "it is impossible to say why the decoration of this manuscript was continued by a different artist. It appears that the five original miniatures were executed before the text was written, and that the remaining ones were inserted after it had been completed."[473] After we reintroduce the codicology and the miniature program we will attempt to comment on these issues.

Buchthal suggests that the first five miniatures in MS fr. 9084 were executed in the style of Add. MS 15268 before the text was done because in the case of Book 3, which depicts the Council of Nicaea, the panel cuts off the first column of text and intrudes half way into the second column. The text in that second column in effect is written around the outside of the frame. Of course, many panels in this cycle – over half – are unusually wide. Those for Books 1, 3, 4, 5, 6, 7, 9, 11, 15, 16, and 17 are all wider than one column, a remarkable departure from the format of earlier illustrated *History of Outremer* manuscripts. The fact is, however, that there seems to have been a major break in the process of the production of this book, as indicated by the following. First, after the first five miniatures were finished, the remaining seventeen miniatures were done by the Paris–Acre Master, a major change in style. Why did this occur? Second, those seventeen panels were apparently painted *after* the text had been completed. Even though two of the seventeen panels intrude into the second column, at Books 6 and 7, just as we saw this happen at Book 3, they were apparently planned that way; in any case there is no evidence that the miniatures in the second style were introduced before the text was written.[474]

These observations suggest the following possible scenario. The book was planned and ruled, with spaces indicated for the panels, which were mostly followed except for Book 3; then the painting started with the first five miniatures in the Add. MS 15268 style. Could the reason for this have been that initially the idea was to give this *History of Outremer* codex to the new king, Henry II? For some reason it was decided to stop this project as originally planned. Possibly it was because the decision was made to present the new king with an illustrated *Histoire Universelle* instead, or possibly because the artist(s) working on MS fr. 9084 were needed on the *Histoire Universelle* project, which was getting underway. However, whatever the reason, the original artist(s) apparently moved on to do the other work, namely the London Add. MS 15268 project. Meanwhile the MS fr. 9084 project was resumed, most likely as a new commission for a new patron. The rest of the program was reviewed and

approved, and the text of the manuscript was written. Then a new and different artist was engaged to complete the final seventeen miniatures of the cycle, the Paris–Acre Master.

Compared to the other *History of Outremer* manuscripts, MS fr. 9084 is unique in having such a lavish decorative program and a cycle with so many expanded format panel miniatures, many of them two columns wide. In most cases, the expanded size panels make it possible to depict on one level what the St. Petersburg–Lyon cycle had often depicted as two register panels, in a double-decker format. This approach is undoubtedly a continuation of the planned configuration of the first five initials with the scenes in this cycle always read in effect left to right, never top to bottom. These features make it clear it was done as a special project, more expansive and more expensive than most other *History of Outremer* codices we have seen, which have smaller, single-column historiated intials or panel miniatures.

The program of MS fr. 9084 is also innovative in its iconography and content. These features are found both in the first five miniatures and in the second group of seventeen panels, indicating the program was a carefully planned and unified project, even though the painting was carried out by different artists working in very different styles. In the first five miniatures, four of the scenes show a remarkable sensibility for visualizing the eastern context of the events, and three of those scenes are entirely new departures in the *History of Outremer* cycle indicative of an innovative and individualistic approach. We note in Book 1 how the contrast of East and West is realized in the visual distinction between the rendering of the Western tonsured and beardless Peter the Hermit and the Eastern patriarch of Jerusalem, bearded and wearing a semblance of Orthodox vestments, along with the Eastern domical architecture of Jerusalem. The story is expressed in this miniature in an unusual way. In the text, Peter first visits the patriarch, then goes to the Holy Sepulcher to pray, and then returns to the patriarch before returning home to the West. The miniature suggests this movement back and forth by Peter by means of the introduction of the central, trefoil archway as the link between the two main scenes.[475]

The same kind of East–West distinction is expressed in the miniature for Book 3, which is original with this cycle and which uniquely depicts the ecumenical Council of Nicaea in 325, where prelates from the Latin and the Greek churches gathered. The beardless tonsured Latin figures contrast strikingly with the bearded and hooded easterners. The lead eastern figure is particularly interesting and eastern looking with his special cap and his robes with what appear to be pseudo-kufic letters across the front.[476]

For Book 4, Turkish and Armenian satraps bring presents to Tancred, hoping to win his favor with diplomatic gifts of gold and fine horses. At the left, Tancred is dressed as a Western nobleman enthroned with two bodyguards. To the right, the Eastern suppliants are strikingly depicted in their boldly patterned robes,[477] and some watching in the hills are also wearing turbans. Clearly here the East–West idea was expressed in terms of the lay nobility, Crusader on the one hand, indigenous on the other.

Finally, for Book 5 we have a remarkable depiction of the First Crusaders attacking Antioch (Fig. 249, COLOR PL. 9). The heavily armed Crusader knights on horseback are recognizeable bearing their brightly colored arms on caparisons, shields, and standards. The outnumbered Antiochene defenders are clearly characterized as Easterners by means of physiognomies, beards, costumes, round shields and weapons, exclusively bows and arrows, although two figures seem to be throwing stones. This is again a departure from the iconography of the earlier *History of Outremer* cycles. More importantly, it is a very strong thematic depiction of the confrontation of East and West that was very familiar to all residents of the Latin Kingdom.

Stylistically the question is, what is the relationship of these miniatures to the work done in Add. MS 15268? The same analysis applied to the miniatures in the London cycle yields similar results here. We can see several specialized aspects of these miniatures, with the groups of knights (Books 2 and 5), the imagery of the Easterners (Books 1, 3, 4, 5), the representation of the Latin clergy (Books 1 and 3), the architecture, and the frames. Just as we postulated a system of the division of labor in Add. MS 15268, it appears we can see the same possibility here. Furthermore, these artists of MS fr. 9084 can be identified with the artists in the London MS, in terms of comparable knights, the Eastern turbaned figures, the architecture, and the frames. Buchthal even singles out the parallel between the soldier in Book 5 holding an axe with a shield protecting his head, and the soldier on the ladder in the *Histoire Universelle* who is holding a pickaxe with a shield protecting his head, in the scene on fol. 101v.[478]

At some point shortly after the first five miniatures were done, a new artist was employed to complete the remaining seventeen panels. This painter is the Paris–Acre Master, whose last work in Acre was documented in 1282, in the Chantilly MS 433(590) *Rhetoric* codex. Why we do not see his hand at work during this hiatus, from 1282 to 1286 is unknown, but with MS fr. 9084 he is faced with a new challenge to complete a miniature cycle for a planned program in a text presumably new to him, the *History of Outremer*. To carry out this task he refers iconographically to earlier cycle traditions, both the St. Petersburg–Lyon cycle and the Paris MS fr. 2628 cycle. He also apparently studies the first five miniatures of MS fr. 9084.

Even though the expanded panel format found in the first five miniatures of MS fr. 9084 is continued in the plan for the rest of the cycle, the Paris–Acre Master derives much of his program for these miniatures from the St. Petersburg–Lyon cycle tradition. The themes of Books 6, 8, 9, 10, 11, 14, 15, 17, 18, 19, 20, and 21 are consistent with the earlier cycles, but there are nonetheless differences in how the imagery is handled; certain innovations are introduced. Despite the expanded width of many of the panels in MS fr. 9084, the artist deals with the imagery by in effect doubling the scene, as with Book 6; expanding one scene into two parts, as seen in Book 7; or simply enlarging the one scene, as we find at Book 17.

In other cases the Paris–Acre Master simplifies the scenes, for example, making the deathbed–coronation iconography into one or the other alone, at Books 10, 11, 19, and 21, all of which are normal panels a single column wide. In the case of Book 16, he introduces a double-column panel, which has the deathbed–coronation pairing, but this represents a significant departure from the earlier cycles in program as well as in iconography. For Book 16 the images in the earlier Acre school manuscripts focused on the dramatic story of the *chevauchée* of Fulk and Melisende, and Fulk's death resulting from an accident while riding. In iconography the artist represents the coronation of Baldwin III in French Gothic terms with a typical coronation–enthronement, instead of the kneeling king imagery of the earlier Crusader cycles.

In other examples from this series of traditional themes, our painter introduces some new ideas, mainly in the form of variations on the basic imagery. For example, the selection of a new ruler for Jerusalem in the panel for Book 9 is varied by depicting the election of a new patriarch following the capture of Jerusalem by the First Crusade. At Book 18, the idea of the humiliation of the patriarch of Antioch is intensified by interpreting him as a corpus, a victim in the image of Jesus, on the citadel tower. Earlier examples from Acre typically show the patriarch simply exposed on the top of the tower following the narrative in the text. Finally, for one of the coronation scenes, that at Book 19 where King Amaury is crowned, the artist introduces new iconography. Instead of the generic setting found in all earlier coronations, the Paris–Acre Master introduces iconography to specify that this event takes place in the Church of the Holy Sepulcher. He paints an architectural framework with supporting arches and minidomes on each side, which join a central trefoil arch under a large domical lantern with a cross on top. This canopy structure has no precedents in earlier *History of Outremer* cycles.[479] Instead it appears to be derived, not from the *Bibles Moralisées* tradition, but from seals of the Hospitaller masters in Acre. Despite the possibility of these seals as a direct and timely model, this type first authorized in 1278,[480] it is not necessary to imagine that the patron of this manuscript was somehow connected to the Hospitallers or that our artist was either.

The miniature cycle in Paris MS fr. 9084 taken together is grounded in the Acre school tradition, but it is nonetheless a very idiosyncratic production with several peculiar features. Not only does it have the novel format, and two distinctly different artistic styles, but also two books out of the basic twenty-two – Books 12 and 13 – were given no miniatures. This omission was apparently the result of the planned program, but it is strange that the start of these two books in this text, at fols. 142v and 155v, is given no indication of the existence of a major text division. There is also the introduction of new iconography at the start of certain books, for example, for Books 22 and 33, Chapter 13. In the first case, the presence of Bohemond of Antioch and Raymond of Tripoli at Jerusalem is found at this point in Lyon MS 828 in a very bland and undefined image. However, in MS fr. 9084 it is transformed into the depiction of a Crusader army arriving outside a city, an image reminiscent of the panel for II Maccabees in Paris MS n. a. fr. 1404. The latter two examples constitute a classic image type for this master, which not only boldly states the heraldic designs of the lead mounted knight, but also evokes the iconography of Crusader soldiery and fortified cities, central features of life in the Latin Kingdom. In the second case the Crusader envoys to Frederick II appear in an image that is one of the rare depictions of this famous and controversial ruler, *stupor mundi*, which appears in any Crusader cycle, East or West.

This last example raises the question of whether the Paris–Acre Master has shown any change in development from the work he did when he arrived in the Crusader capital in *c.*1280–2, and the work he is now embarked on in *c.*1286. First of all his drawing style seems to stabilize and clarify, in the sense that his forms and the use of line become more consistent. Also the fact is his artistic surroundings do seem to have some impact on him, in terms of what he observes formally, and in terms of his color. He can be seen to be learning new ideas, for example, about representing architecture and space, at Books 6 and 18, possibly from images in the St. Petersburg–Lyon cycle tradition and even from miniatures he might have seen in manuscripts of the *Histoire Universelles* produced in Acre. We also find him beginning to adopt the Acre school convention for representing eyes, the so-called spectacle effect with round eyelids and a straight line from the eye back toward the ear, in the miniatures for Books 7, 17, and 20, but sporadically, not consistently. Finally, one can also see that his color develops from the basic Gothic palette introduced in Paris MS n. a. fr. 1404 and Chantilly MS 433(590). Presumably as the result of his contact with the first five miniatures of MS fr. 9084 with their strong vibrant color, featuring rich saturated and strong hues, such as bright orange, light greens, yellows, and deep purples, his color starts to change and develop. In the seventeen panels he executes for this codex we find him introducing a significant new use of yellows, more extensive use of lavenders and orange–reds, and even brown and black.

To conclude then, MS fr. 9084 represents a new departure in the work of the Paris–Acre Master, but looked at in perspective, we can surely say that he has staunchly retained his Parisian Gothic style. He has not suddenly turned into a painter doing the traditional Crusader style as the result of his first approximately six years in Acre. Despite the impact of his new artistic surroundings on him by *c.*1286, he has in fact shown very little interest in emulating the traditional Crusader style and much more interest in proceeding according to his own inclinations, but always as a Parisian Gothic painter.

However, what did it mean that such different styles were employed in the production of MS fr. 9084 for the patron? This is, of course, not the first work of Crusader art to feature multiple styles. We have seen such examples in the twelfth century, in works as diverse as the Psalter of Queen Melisende, *c.*1135,[481] and the sculptural program of the south transept façade of the Church of the Holy Sepulcher, dedicated in *c.*1149.[482] We have also seen this phenomenon in the "Acre Triptych" from *c.*1260 discussed in Chapter 6. Such multiple styles are to be found in works from western Europe as well. One thinks of the Winchester Psalter *c.*1150, with the "Byzantine Diptych" in the midst of a cycle of English Romanesque miniatures, or the Stavelot Triptych with two Byzantine reliquaries set in a Mosan enameled triptych, done *c.*1156–8.[483] What significance can we understand in the stylistic dualism of MS fr. 9084?

One possibility is that the patron wished to have the miniatures painted that way. This means that perhaps when the artists working in the traditional Crusader style left the project, the patron personally selected the Paris–Acre Master to complete it. Why would he have done this, or why would the workshop supervisor have done this on behalf of the patron? The function of this manuscript was to provide the story of the Crusaders in the Holy Land, presumably for someone resident there, but perhaps for someone only visiting.[484] Certainly one possibility is that the styles are meant to have a programmatic meaning; that is, there is a certain iconography of style. Viewed this way, significance is associated with the traditional Crusader style, which is richly multicultural, pertaining to the Near East before the advent of the First Crusade there, in contrast to the more Western flavor of the last seventeen miniatures, which express the notion of Frankish presence in the Crusader States. Looked at this way, this program in MS fr. 9084 is more sophisticated, a special production, and indeed we have no way of knowing that it was not ordered to be this way from the very beginning. It is just a matter of fact that the break in the production of the illustrations for the book seems to be so major. It is unusual to start with some of the miniatures, then do the whole text, and finally finish with the rest – much the larger part – of the miniature cycle.

In a way, the program of the narthex dome mosaics for the Church of San Marco in Venice raises similar questions mutatis mutandis. The first dome for the Creation cycle is done in an archaizing style reaching back to the fifth century, and the remaining domes for the other Old Testament books are done in a contemporary style of *c.*1200. The reason for the archaizing style and iconography is basically because the model used was the Cotton Genesis from the Early Christian period.[485] The others were done in the style of the day from other models. However, the question remains, what meaning was this program intended to convey because of the stylistic difference? Could it be that the iconographic model was also followed for its style to express the fact it was the first book of the Bible and this image of the Creation cycle was given special authenticity because of the venerable Early Christian model? Whatever the reason, the modus operandi for MS fr. 9084 was different. In both cases, the style rendered was the current style of active artists, not a style reflected from some older source. For both of those styles in Paris MS fr. 9084, the contemporaneity was apparently important, to express the immediacy of the experience known by and sought in this book by the patron.

Could the duality of styles and the uniqueness of the combination in MS fr. 9084 also mean that this book was done for a particular person and for a notable event? These are also definite possibilities, and we wish we could identify the patron/owner, but again without further information we are not able to say anything for sure. Nonetheless there is no doubt that the distinction drawn between the style of the first five miniatures and that of the last seventeen clearly could have been inspired by a "Crusader" event. Perhaps the celebration of 15 July 1286 was important to the patron as a distant historical moment of significance in his family – the 137th anniversary of the dedication of the Church of the Holy Sepulcher, and the 187th commemoration of the taking of the city of Jerusalem by the First Crusade?

(photo by courtesy of the Bibliothèque Municipale, Boulogne sur Mer)

Finally, perhaps the two styles of MS fr. 9084 could be intended to express in a different way the same metaphorical bridge between Paris and the Holy Land that the Arsenal Bible apparently expressed for Louis IX. The Acre–Paris link is clearly evident in the realities of the Latin Kingdom, and especially of Acre in the entire period from 1250 to 1291 because of Louis IX, the continuing presence of the French regiment, the residential aristocracy with their ancestral connections to France, the involvement of Charles of Anjou and his French representatives, and the arrival of a Lusignan king, Henry II, as the king of Jerusalem. In this *History of Outremer* codex the two styles would vividly express the cultural presence of East and West in its illustrations for someone who wished to read the Crusader story in its folios. These speculations are just that, nothing more, but they are worth making so that as we continue to look at the evidence for Crusader painting we can consider these questions, and perhaps find answers as research goes forward.

Boulogne-sur-Mer, Bibliothèque Municipal, MS 142*[486] *(Fig. 251, CD 392–413) and Brussels, Bibliothèque Royale, MS 10212: Shortly after the Paris–Acre Master finished his work on Paris MS fr. 9084, he executed a complete cycle of miniatures for a second *History of Outremer* codex. The fascinating thing about MS 142 is that on the one hand it copies closely the unusual features of MS fr. 9084 in terms of the iconography of its first five miniatures, its unusual text incipit at Book 2, and the omission of miniatures at Books 12 and 13, and on the other hand it generally simplifies the imagery of the basic Acre cycle drawn mostly from MS fr. 9084. In most of the scenes for Books 6 to 23 chapter 6, it follows MS fr. 9084,[487] but in certain cases it reverts to the St. Petersburg–Lyon cycle for more standard scenes. The two obvious examples are at Books 15, where the chess scene is reintroduced at the attack on Shayzar, and 16, where the accidental death of King Fulk is depicted. It is also interesting that in MS 142 there are only two expanded panels two columns wide, at Books 1 and 9, compared to eleven in MS fr. 9084, but it has four double-decker panels at Books 15, 16, 20, and 33 Chapter 13, whereas MS fr. 9084 has none in this older format.

The relationship between these codices is very close, with certain variations no doubt to meet the needs and desires of the different patrons. For example it may be that the two expanded panel miniatures in MS 142 are used to introduce the First Crusade at Book 1, and then to start the history of the Latin Kingdom at Book 9. However, there is also a clear development in the work of the Paris–Acre Master seen in the slightly later MS 142 that is only beginning in the slightly earlier MS fr. 9084. This is visible in terms of continued change and enrichment of his color palette and an increase in his sensibility with regard to observation of the Eastern ambiente as found in his imagery. The change in his color palette is most noticeable in terms of the extraordinary lime green he introduces for Books 6 and 18, both scenes of Antioch, especially. The new interest in the imagery of East–West confrontation, seen so vividly in the first part of MS fr. 9084, is found in the several additional examples in MS 142. There is Book 6, the conquest of Antioch with bearded and turbaned Antiochenes. At Book 7, the Crusader envoys to the emperor of Constantinople find also two Greeks standing behind the throne wearing their wide-brimmed hats. For Book 15, the Muslims defending Shayzar brandish scimitars and one has a round shield with the crescent moon on it.

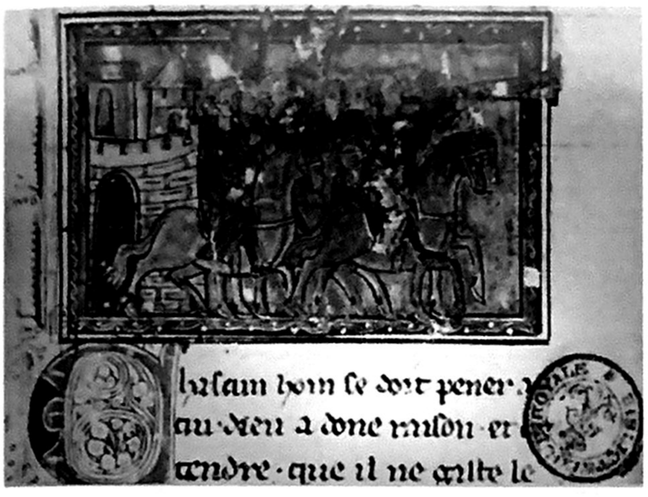
It is clear that for the first five miniatures of MS 142, the Paris–Acre Master studied MS fr. 9084 carefully and translated the imagery and Crusader style of their artists into his own idiom.[488] In the process these scenes are, with the exception of Book 1, reduced to panels one column wide. In doing this, our painter introduces certain changes that indicate the interests of a different patron, for example, special emphasis on the specific heraldry of Godefroy de Bouillon at Books 2 and 5, a much more Western point of view in characterizing these five scenes, and much greater simplification in the scenes of Books 3 and 5. Stylistically, this is the classic example of a model-copy paradigm, where the artist retains the iconography of the model to the extent possible but he transforms the style completely into his own signature formal work.

Following this part of the cycle, the Paris–Acre Master continued to use the basic Acre cycle he knew from MS fr. 9084, but he also drew on the cycle as known from the earlier St. Petersburg–Lyon manuscripts. Although the question has reasonably been raised as to whether MS 142 might have only copied the first five miniatures of MS fr. 9084, and was then completed before MS fr. 9084 was finished,[489] on balance this seems unlikely for several reasons. We note the overall closeness of these two codices to each other, the dependence that MS 142 shows on both parts of MS fr. 9084, the unusual features that MS 142 reproduces from MS fr. 9084, and the developmental aspects in the artist's work from MS fr. 9084 to MS 142 found in both parts of the cycle in the latter codex. These features indicate that MS 142 was made by copying MS fr. 9084 with occasional revisions and special alterations made with reference to other imagery from the standard Acre school cycle. This can be understood as the product of two different commissions for two different patrons, painted by the same artist, the Paris–Acre Master, presumably in the same workshop.

When the Paris–Acre Master did revert to the standard cycle known from the St. Petersburg–Lyon manuscripts, he also adopted their double-decker panel format and yet he clearly changed the style once again. Although he becomes aware of some Eastern aspects of the imagery as we have noted, he is not interested in the traditional Franco-Byzantine Crusader style, with the result that the only changes in his style is his expanded and richer colorism and the interesting variety in his representations of architecture. His mature artistic formation is not, however, changing in any fundamental way in the face of the Byzantine-influenced Crusader style that we can be sure he studied closely in several different examples. This indicates that he differs from other artists who absorb and practice the Crusader style as their own. The essential difference is that the Paris–Acre Master is a Parisian Gothic painter who is now working in a Crusader milieu, and other painters we have encountered were Crusader painters, who were trained as Crusader artists no matter what their ancestral heritage may have been.

It is remarkably fortunate that we can find two manuscripts so closely related to each other, helping us to examine and to define the working methods of the artist and giving us more information about his workshop circumstances. It is interesting to see that his work in 1286–7 is strikingly similar to what he was doing in Acre in 1280–2. It appears to be a classic colonial phenomenon in one aspect especially, where the painter leaves a major center – Paris in this instance – fully formed as an artist, and when he arrives in his new circumstances in Acre he becomes markedly conservative in retaining the style of his homeland.[490] He is working as a Crusader artist otherwise, however, particularly in the way that he embraces the iconographic traditions of the Acre school, and the fact that he seems to be in Acre working primarily as a painter, not otherwise employed so far as we know. He is able to paint in the style of his homeland because clearly there was a market for his work in Acre in the 1280s. There must have been sufficient interest among the military aristocracy in secular illustrated books in Old French to give him plenty of work. Presumably part of the reason his style was in demand was because by the later thirteenth century, the reputation of Paris as the European center for book illumination was known everywhere. Even though the style of the Paris–Acre Master is staunchly fixed as formulated in the 1270s and changes little so far in the 1280s, it is very much à la mode in Acre as we have seen. What additional work does he do between 1287 and 1289?

The vogue for "history" in Acre in the late thirteenth century among the military artistocracy is evident in the numerous manuscripts extant of the *History of Outremer* and the *Histoire Universelle*. There is, however, another work, the *Faits des Romains*, which makes an appearance in the late 1280s, a codex now in Brussels, Bibliothèque Royale, MS 10212 (Fig. 252, CD 414–420).[491] The text begins, "*Ci comense le livre de Cesar*



252. *Faits des Romains*, Brussels, Bibl. Royale, MS 10212: fol. 1v, Chascun hom se doit pener. . . .

coment il conqist plusors terres," and it was a book of Roman history based mainly on Caesar, Lucan, Sallust, and Suetonius.[492] In a sense this work was a continuation of the *Histoire Universelle*, carrying the story along from where it ended, but compared to the *Histoire Universelle* or the *History of Outremer*, it was much less popular in the thirteenth century. Only later, in the fourteenth century, when interest in Old French translations of classical prose texts grew much stronger, did commissions of the *Faits des Romains* grow more numerous.

Brussels MS 10212 is an important manuscript for the witness it provides of the breadth of interest in historical works in Acre, for the fact that it is a good-quality work done in the East at a time that few works were being done as yet in the West, and for the additional examples it contains of work by the Paris–Acre Master. Brussels MS 10212 is, however, a more routine workshop product, modestly decorated with small miniatures fewer in number than those in Add. MS 15268 or in either of the *History of Outremer* manuscripts we have just discussed.

There was no standardized cycle of miniatures for this text yet established; many of the early manuscripts simply have a single miniature at the start of the text. Among those early codices that do receive a set of illustrations, such as this one, there is very little consistency in the choice of scenes, and no direct correspondence in the iconography.[493] Nonetheless the imagery of this book is interesting for several reasons. Many of the scenes show the Paris–Acre Master adapting familiar imagery from other cycles, for example, at fol. 1v the Roman soldiers of Caesar's army are depicted as a *chevauchée* of French knights (Fig. 252), at fol. 121r the messenger scene finds Caesar crowned like a French king seated in front of his campaign tent, and at fol. 69v the arrival of the Roman army before Trier resembles French Crusaders, including one knight carrying a shield blazoned with the French royal arms, marching on a fortified city in the Holy Land. Nonetheless, there are some interesting features and one or two new additions to our Master's repertoire. We find a continued interest in specific heraldry, something we noticed with Boulogne-sur-Mer MS 142. We see many ship scenes (fols. 53v, 208r, 233r), which correspond with the ambiente of the city of Acre. Indeed, the construction of boats by men of Caesar's army to be used to cross the English Channel at fol. 53v depicts shipbuilding with more specific tools, including the T-handled augur, than we have found the Paris–Acre Master representing in his earlier works. Finally, there is one interesting addition to his imagery, the representation of helms for mounted knights. Although full knightly armor with helmets is common in the St. Petersburg–Lyon cycles of the *History of Outremer* and in the three early *Histoire Universelle* manuscripts done in Acre, surprisingly helmets do not appear in his extant work before this point. There is not a single one in his miniatures of the *History of Outremer* codices in Paris MS fr. 9084 or Boulogne-sur-Mer MS 142.

This seemingly minor innovation is of interest because of its likely source. Whereas the helmeted figures in Add. MS 15268 at Books 2 and 5 did not inspire our painter to represent them when he copied these miniatures for Boulogne-sur-Mer MS 142, he introduces them now a year or two later, when he does Brussels MS 10212, *c.*1287–8. It appears instead that this idea for the Paris–Acre Master came from a codex interpreted here to have also been made in Acre in the late 1280s, Paris, Bibliothèque Nationale, MS fr. 20125.[494]

Paris, Bibliothèque Nationale, MS fr. 20125 (Figs. 253–255, CD 421–469): At this point we must pause to consider that fact that despite my proposal, first made in 1976, to attribute this codex to Acre *c.*1287, many important scholars – most, but not all, text scholars – have continued to think of it as French, that is, done in France and produced somewhat earlier, in the third quarter of the thirteenth century. Buchthal of course interpreted it as a French manuscript in 1957, and it was he who first identified its importance for the development of the *Histoire Universelle* cycles in the thirteenth century.[495] Buchthal wrote that Paris MS fr. 20125 was "easily the finest surviving example of the French group – there is no trace of the influence of Palestinian iconography or style; and this is substantially the cycle found in all later manuscripts produced in France. The only possible conclusion is that the manuscripts from Acre go back to the same western models from which this important volume is derived."[496] Stahl is also inclined to doubt that MS fr. 20125 could have been done in Acre. He comments,

> Nothing in the iconography of the Paris manuscript establishes an origin in Acre; whether it is a French manuscript or an Acre copy of a French manuscript, its cycle is entirely Western. It lacks any influence from the Dijon or earlier Acre manuscripts. . . . At the same time, Folda's stylistic arguments for an Acre attribution are not convincing. The painter of the Paris manuscript may be a contemporary of the Hospitaller Master but he is a mediocre artist whose style derives from a different French tradition. . . . He certainly is an artist working in a different shop, for the manuscript has no important codicological features in common with the other Acre manuscripts.[497]

Joslin accepts the Acre localization and *c.*1287 date without discussion, but more recent scholars such as Oltrogge and M. de Visser-van Terwisga prefer to date the manuscript earlier, to France in the third quarter of the thirteenth century. Oltrogge takes a very strict view following Stahl in which she is only willing to accept Chantilly MS 433(590) as an Acre product, and maintains that MS fr. 20125 is made in France.[498] Finally

M. de Visser-van Terwisga follows Oltrogge, characterizing her dating as "plus prudente que celle de Folda." As for the localization, she discusses the "langue et localisation" and the "langue du manuscrit" at some length, finding that the language of the text derives from the northeastern area of the langue d'oïl. However, with regard to the codicology she does not have any new observations to offer, commenting only "nous n'avons aucun renseignement sur le destin du codex depuis le moment de sa facture (3e quart XIIIe siècle) jusqu'au moment où il entra dans la collection du cardinal [Richelieu]. Toutefois, un grand nombre de notes marginales en ancien provençal ou en catalan semble témoigner du séjour du manuscrit dans le Midi de la France, au XIV/XVe s."[499] She, of course, chose Paris MS fr. 20125 as her "manuscrit de base" for editing the text, based on its full content and good quality. All editors of the *Histoire Universelle* agree on the importance of this codex for the completeness and quality of its text, as being close to the French prototype written for Roger de Lille. In the face of this scholarly opinion it might seem inappropriate to maintain my earlier position that this codex, though thoroughly based on Western sources, was executed in Acre by a French Gothic painter in the late 1280s. The most recent contribution on this manuscript, however, by Anne Derbes and Mark Sandona, offers important new evidence to support the attribution of this codex to Acre based both on the emphasis given in its picture cycle on the Amazons, and specifically the interpretations of the scenes celebrating Amazonian victories, not the usual defeats.[500]

From my point of view, none of the discussion has disqualified Paris MS fr. 20125 from being a product of Acre because neither the codicological characteristics nor the individuality of the artist's hand has been invalidated. Let me summarize my analysis again with regard to these aspects and with comments on more recent studies. The case for MS fr. 20125 being produced in Acre was based, in the first instance, on the workshop features of the manuscript and the stylistic analysis of the miniatures. Now we can add to that evidence the remarkable features of its picture cycle as it pertains to the imagery of the Amazons.

It is my contention that this codex was prepared and executed in an Acre workshop closely related to that of the Paris–Acre Master, but painted by an artist distinct from him. The painter was not the Master himself, but a colleague who seems to be an advanced apprentice closely associated with him in the Crusader capital. The distinction in the styles of the two men is that compared to the Paris–Acre Master, the painter of MS fr. 20125 designs and paints taller and larger, slightly less accomplished figures, who seem somewhat ungainly in their proportions and wooden in their poses. Although the MS fr. 20125 artist follows his Master closely, there is the sense of "hardened copies" with less fluency and greater effort at imitation. In the end there is less evidence of an independent figure style fully developed on its own terms and more indication of a figure style followed in a somewhat dependent fashion. Also different is his colorism, which is more limited and features darker blues and purples. There is also a decorative overlay in the MS fr. 20125 miniatures, which manifests itself in surface decoration, seen in the patternization of the shading in the draperies, geometric forms and flat shapes articulated mainly by line, and the use of dotted lines to enhance haloes, draperies, and the planking on boats, but not seen in the work of the Paris–Acre Master. Not surprisingly the apprentice is able to emulate his master in terms of certain formulae, for example, the way the linear hair forms a curl over the ear, or the keyhole shape that forms in the drapery hem of certain figures. However, he does not achieve in MS fr. 20125 the fully formed, consistent, and mature style seen in the Acre work of the Paris–Acre Master.[501] This artist achieves a very effective narrative style. His work is contemporary with that of the Paris–Acre Master but not of the same formal quality.[502]

In regard to the codicological characteristics of the manuscript, I see MS fr. 20125 as a more representative example of a codex done in Acre than, say, the Brussels MS 10212 *Faits des Romains*. The vellum is cut and smoothed to create a rather slick surface. The sheets of vellum are rather thick and off-white, which tend to be oily on the hair side, and possess a somewhat blotchy, irregular surface on the skin side. These aspects compare closely to other manuscripts produced in Acre, without having to say that they necessarily came from the same workshop. The layout and decoration is quite similar in principle and in particulars with other codices from Acre in this period, although there are some variations, such as the use of gatherings with ten folios each. The scribal hands are comparable in general and the color, texture, and flaking of the ink are all similar to Acre school manuscripts done *c.*1260 to the late 1280s.[503]

How does the iconography of this cycle compare to the other *Histoire Universelle* manuscripts painted in Acre? As we have previously discussed,

> the miniature cycle is . . . distinctive, displaying important divergences from earlier Acre codices. Of the individual scenes, Buchthal has considered the salient ones, but the Genesis panel is worth another look. The extant frontispieces in the Dijon and London codices obviously have the frontal bust-length Creator in common with Paris MS fr. 20125. But the images in the last two tondos clearly bring to mind the Bible of the Hospitaller Master [=Paris–Acre Master, Paris MS n. a. fr. 1404]. And the seven medallions of MS fr. 20125 are a comparable version of the usual French cycle as found in MS nouv. acq. fr. 1404. Mover, the idea of splitting the creation cycle into two panel miniatures is a peculiarity these two codices have in common.[504]

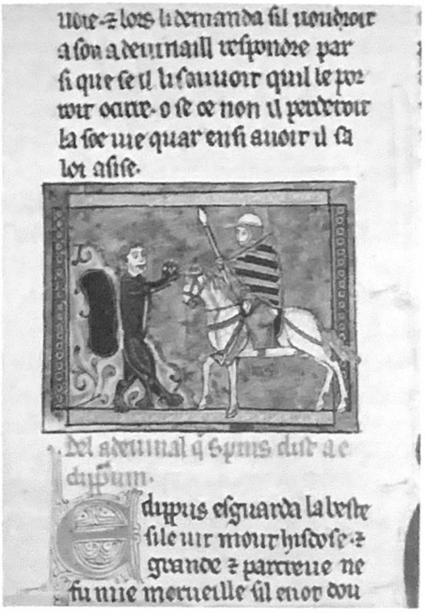
What is clearly very different between these two Creation cycles is the fact that MS fr. 20125 has an elaborate frame compared to the simple one in MS n. a. fr. 1404, and in the former manuscript the frame is very richly decorated. We note in particular the vine scrolls and the hybrid animals, a very simplified version of the lower parts of the frame of London Add. MS 15268 discussed earlier. However, one of the most important features of the frame is the extensive heraldry, including six shields on the larger frame, one of which contains the French royal arms at the top center, *azur fleurs de lys or semés*.[505] At the top part of the frame of the smaller miniature, we find a parody of church and state in the hybrid figures, which have heads wearing a royal crown at the left and a papal tiara at the right. Although a specific patron is unknown for this codex, perhaps these references might suggest the codex was done for someone of stature, someone perhaps even at the royal Lusignan court, who was also connected to the Capetians in Paris, or to Charles of Anjou and his court?

Looking further at the MS fr. 20125 cycle, we find that although the number of miniatures is quite numerous, only two fewer than what is found in Dijon MS 562, which has the largest cycle, certain interesting scenes are not represented, including the Tower of Babel and the Building of Rome. As Buchthal also pointed out, there are fewer scenes from the story of Troy and the romance of Alexander than what we find in the other Acre cycles. These omissions are offset in MS fr. 20125 by the interpolation of additional scenes from the Joseph story of Genesis and four extra miniatures of jousting knights, the latter of which occur as simplified battle scenes that have no exact parallels in the three other Acre *Histoire Universelle* manuscripts. We may add that there is also found in Paris MS fr. 20125 a full set of six scenes dealing with the Amazons, equal to the maximum number of scenes on the Amazons found in any miniature cycle from the other manuscripts done in Acre, far more than the usual two found in Western codices.[506]

It is significant to recall, however, that "in by far the majority of cases, . . . , Paris MS fr. 20125 follows the other Acre *Histoire Universelle* cycles and their common model. . . . It is at first surprising to realize that the *Histoire Universelle* most recently produced in Acre before the Paris codex, namely London Additional MS 15268, had the least iconographic influence on the artist of MS fr. 20125. It was instead those manuscripts chronologically closer to the common western model, Dijon MS 562 and Brussels MS 10175, that provided most of the cycle on which MS fr. 20125 was based."[507]

Among the new evidence produced by recent scholarship, one of the most important studies published since 1976 about this manuscript, apart from the excellent text editions referred to earlier, is an article by Mary Joslin on the relationship of text and image as found in selected miniatures of the Genesis cycle of MS fr. 20125.[508] By choosing four miniatures and subjecting them to careful analysis, she is able to demonstrate how sensitive the seemingly simplified imagery of the MS fr. 20125 really is to the nuances of the Old French text. This inspires her to say that the artist or the painter's supervisor is able to read the Old French fully and to respond to it in a manner that specifically enables him to illustrate the secular vernacular narrative of this particular text. As a result the images are carefully designed for this special text and do not draw on the established Byzantine tradition for biblical images of Genesis, which were originally formulated for a quite different text. This is in marked contrast to these same scenes where they appear in the other Acre cycles.

In other words, Joslin is able to argue that there was a very close relationship between text and image in the conception of the panels for the Hospitality of Abraham, Jacob's Deception of His Father for the Blessing, Joseph and Potiphar's Wife, and the Brothers Plead before Joseph for Mercy toward Benjamin. She in effect demonstrates that in the MS fr. 20125 images,



uoie. ⁊ lors li demanda sil uoudroit

the artist and/or the designer carefully read the French text and designed an image that would complement the text and express its content. By contrast she points out that with regard to these narratives in the other Acre cycles, they adapted preexisting miniature types from other sources that do not fit so closely the exact content of the text. She points out selected special features in each of the four sample scenes in MS fr. 20125. In the case of Abraham and the Three Visitors, she notes the iconography of Abraham's welcoming pose and greeting, and the imagery of the three visitors as pilgrims. In the scene of the Deception of Jacob, she notes the major role of Rebecca and the unique action of the blind Jacob, placing both hands on Isaac's neck and hand. In the confrontation of Joseph and Potiphar's wife, she discusses the visual effectiveness by which "the figures of the image repeat the reasoned struggle by two equals of the dialogue, a contest unlike that encountered in usual contemporary illustration of this narrative."[509] Finally, with the last scene she explains how the image conveys "the dramatic end of Judah's long plea for Benjamin."[510] Moreover, the closeness of text and image is indicated in MS fr. 20125 by the placement of these miniature panels exactly at the point in the text where the story depicted is recounted.

Joslin's discussion in this article corresponds with aspects of Stahl's discussion in indicating that this artist is working separate from the Paris–Acre Master. He is working in a different mode relative to the text, and he seems to be working in a different workshop, though of course it may still be in the same street, or even right next door to that of the Paris–Acre Master.

Here we refer back to our observation that the Paris–Acre Master seems to have looked at the work of the MS fr. 20125 painter in doing the *Faits des Romains*, because it is only there, in Brussels MS 10212, that he introduces mounted knights with helmets! This is easily understood when we examine the Paris *Histoire Universelle*, and observe that fully twelve of its forty-nine miniatures feature helmeted knights in complete battle armor.

The other important contribution has been made by Anne Derbes and Mark Sandona, who analyze the minicycle of miniatures dealing with the Amazons in fifteen illustrated manuscripts of the Histoire Universelle dating from the 1260s to *c.*1300. Their analysis has shown that MS fr. 20125 parallels the other three Acre manuscripts in terms of the number of miniatures and the positive narrative content of these miniatures. However, the imagery of MS fr. 20125 is independent of those other three cycles in its pro-Amazon tenor. Moreover, Derbes and Sandona characterize these Crusader manuscripts as follows: "the three crusader copies of the *Histoire Universelle*, and especially the Paris copy, are clearly informed by a different sensibility: now the women are no longer transgressive threats to the social order but rather its defenders."[511] Their discussion also raises important points about ideology, one of which appears with regard to the heraldry found in the miniatures of the Amazons in MS fr. 20125. It specifically relates to the appearance of the star and crescent, which appears in the miniature of Camilla and Aeneas (fol. 172r), that is, two insignia popular with the Seljuk Turks in the twelfth and thirteenth centuries. Their concluding proposal to explain the *raison d' être* for this focus on the Amazons presents us with a remarkable and persuasive "art in historical context" interpretation. Derbes and Sandona discuss the genesis of the text of the *Histoire Universelle* and the role of women, in particular Countess Joan and Countess Margaret of Flanders, as part of the targeted audience for the author. They also document the link between this text and the Crusade ideals exemplified by this family in Flanders. This leads them to propose the idea of a woman patron for MS fr. 20125, based on its Amazon cycle and that of Genesis as discussed by Joslin. They then speculate on the identification of a possible patron for this manuscript, pointing out that Alice, countess of Blois, came to the Latin Kingdom in 1287 and lived there almost a year before she died in Acre in 1288. Although their argument is circumstantial, they conclude, "the possibility of a female patron associated with the Flemish countesses seems worth exploring, and Alice of Blois fits the description."[512]

These considerations lead me to restate my proposal that Paris MS fr 20125 was done in Acre about 1287, buttressed with new evidence. It means that its model and the copy of the prototype, what Buchthal referred to as a "sister manuscript of [the] model of Paris fr. 20125," are in fact one and the same codex.[513] Please see my stemma for the diagrammatic specifics on the relationships of these manuscripts, their places of origin, and their dates.[514]

Conclusions

To conclude this part of our discussion here, we can consider the following points. Looking at these manuscripts produced in Acre at the time of the advent of Henry II as the new king of Jerusalem, it is remarkable that we have five illustrated codices done from about 1286 to about 1288. These manuscripts all contain extensive narrative texts with large cycles of miniatures and they were carried out by a number of artists. For London Add. MS 15268 and the first part of Paris MS fr. 9084 we find a group of accomplished artists working together in a closely organized workshop circumstance. For the second part of MS fr. 9084, Boulogne-sur-Mer MS 142, and the *Faits des Romains* now in Brussels, MS 10212, we find the Paris–Acre Master executing a series of works in his distinctive style. As for the important Paris MS fr. 20125, we have a separate French master who seems to be closely related to the Paris–Acre Master, but working independently.

It must be candidly observed that the chronological anchor for these works is the relationship between the patronage of London Add. MS 15268 and the diplomatic gift to King Henry II that Buchthal first proposed. However, even if this attribution did not exist, the sequence of these codices would not change, and we could position them in the later 1280s albeit less securely, after Chantilly MS 433 (590) in 1282 and Brussels MS 10175. What is not possible in my view is the proposal made by Stahl to date the Paris–Acre Master's three manuscripts – the second part of MS fr. 9084, Boulogne-sur-Mer MS 142, and Brussels MS 10212 – to the late 1270s or early 1280s. As I stated elsewhere,

> in proposing his reinterpretation, Stahl used as a criterion for Acre the standards of Parisian manuscript illumination. In arguing my dating, I am taking the position that, historically as well as geographically, Acre and Paris are distinct artistic centers despite certain strong ties between them. In the case at hand, when the [Paris–Acre Master] came to Acre from Paris, he clearly retained his Parisian training, but his development as a painter in the East then proceeded according to his new circumstances and his interaction with this new environment. Indeed, I propose as a matter of principle that Crusader art in the Latin Kingdom must be evaluated on its own historical terms, not those of Paris, Constantinople, Venice, or any other European center from which various components of its artistic stimuli may have originated.[515]

Finally, there are a few important aspects of the work of these various Crusader painters in different workshops in Acre during the period 1268 to 1289 to be commented on as follows. When the commission for the new king's book, London Add. MS 15268, was apparently given in 1286, the decision was made to do it in the traditional Crusader figure style, and there was a group of well-trained Crusader artists to deal with this important project. Meanwhile two French artists, the Paris–Acre Master from Paris and the MS fr. 20125 Master, presumably from northern France, although we do not know his exact origin, were also working in Acre. The fact there were two French artists and that between them they did nearly four cycles is indication of the growing interest in the Crusader capital for Old French manuscripts illustrated in French Gothic as opposed to Franco-Byzantine Crusader style. This group of manuscripts provides evidence for a revival of painted book production in the second half of the 1280s in Acre.

We should not forget that a number of books had been done there in the years starting with *c.*1270, but then continued in the late 1270s up to 1282. There is an interesting variety of texts that were illustrated, several *History of Outremer* manuscripts, a Vegetius codex, three *Histoires Universelles*, a *Rhetorica* manuscript, and a book of Old Testament Bible selections. This group totals nine manuscripts, but only one of the artists working in these years up to 1282 resumes work later. Between the time these books were done and the revival of the later 1280s, there was a four- or five-year hiatus. Remarkably the only one of the artists working in these years who resumes work later, after 1286, is the Paris–Acre Master.

These observations raise many questions. What happened to the artists working in the traditional style in the earlier phase of production who did not reappear later, whereas the Paris–Acre Master apparently stayed in Acre and resumed working later? It is striking that there were more artists working in the Franco-Byzantine Crusader style *c.*1286–8 than there were earlier, assuming a large workshop produced London Add. MS 15268 as proposed earlier, but can we connect their hands with only two manuscripts? Why is their extant work so limited? At the same time there were apparently two artists in Acre working in French Gothic styles. Who were their patrons? Why did demand continue to grow for manuscripts done in Acre in the French Gothic style? How many workshops were these manuscripts produced in? What is the significance of the fact that only one of the thirteen illustrated codices produced in Acre between *c.*1270, the late 1270s, and *c.*1286–8 was a religious book, whereas the rest are secular manuscripts in the vernacular, that is to say, in Old French?

These questions are not easy to answer, but we can make a few preliminary comments. Although we do not know why the Paris–Acre Master came to Acre from Paris, he must have been part of the continuing flow of Westerners to the Latin Kingdom in the late 1270s and early 1280s. We do not discern any reduction in the number of travelers to the Holy Land from Europe. Possibly his decision to come to Acre was influenced by the fact that Charles of Anjou became king of Jerusalem in 1277, leading to an influx of persons from France as a result. We cannot say for sure. More likely is the possibility that when we notice the revival of illustrated manuscript production in Acre in 1286–8, it is because the industry is stimulated by the arrival of the new king, Henry II of Cyprus, in Acre. This phenomenon would be vaguely comparable to what happened in Acre by the direct stimulation of Louis IX when he came in 1250. What we can also speculate on is the likely relationship between the growing interest in the French Gothic style in Acre and the appearance of a second artist working in this style. With the arrival of the new king of Jerusalem, we know that the French royal sponsorship of the French regiment was revived from 1286 onward, as well. This might help explain what was generating new interest in the French Gothic style in Acre even while we presume the traditional Crusader style was continuing, although we have no examples of it in manuscript illumination as evidence. In this connection we shall look with interest in the next section at what the extant icons can tell us about the development of the Crusader style.

Finally, there is the issue of religious versus secular book illumination, a phenomenon that we have noted earlier, but that now appears to have become a major feature in the Acre book production. Bearing in mind that we must exercise caution in assessing the situation, based on the chance survival of manuscripts; we must recognize that the paucity of extant religious codices may reflect the destruction of churches and religious houses in 1291.[516] Nonetheless, there seems to be a sharp rise in secular illustrated books in the vernacular at this time. What do we see happening in Acre in this regard, what can it tell us about workshop organization for book production, and what, if any, connection do the developments in Acre have with relation to that in Paris? We know that the beginnings of secular manuscript illumination in France occurred shortly before the middle of the thirteenth century. A. Stones points out that

> the earliest MS of the crusading epic, *Histoire de la guerre sainte*, by Guillaume de Tyr, is very similar stylistically to the Toledo MS of the *Bible moralisée*, whose frontispiece with its portrait of Saint Louis is now in the Pierpont Morgan Library, MS M. 240. It is likely that both were made for Saint Louis before his departure to the Holy Land in 1248, and it is probable that the Guillaume de Tyr MS was made for Saint Louis himself, although it contains no specific marks of ownership.[517]

These observations are important for our considerations here. Stones asserts that the beginnings of secular book illumination in France takes place in Paris with significant sponsorship by King Louis IX. What follows in Paris is enough to elevate the French capital into the leading position in the illumination of manuscripts in Europe by the end of the thirteenth century. She is claiming it begins in the reign of Louis IX and the king himself personally sponsored some of this production.

In light of these developments in Paris, it is not so difficult to see, *mutatis mutandis*, how Louis IX could also have had a deciding influence on manuscript production in Acre when he resided in the Holy Land from 1250 to 1254, as we have argued in Chapter 6. Furthermore it is not difficult to relate the significant development of secular book illumination in Acre as somewhat parallel to what we find in Paris in the second half of the thirteenth century. Carried one step further, the new information that we have learned from Stones about secular book illumination and from Mary and Richard Rouse about book production in Paris should be able to help us envision the workshop situation in Acre at about the same time, by virtue of this parallel, with the proviso that what was going on in Acre was a smaller version of the Paris production in a city without a university, but with a clientele of means who were interested in commissioning illustrated manuscripts.[518] What Derolez summarizes as the variety of workshops and methods for Gothic books, which replace the monastic scriptoria of the earlier Middle Ages, is what we find in Acre and in France, that is, "the layman's writing and illuminating shops, . . . , some religious orders and congregations, individual scribes and artists."[519]

What we see in Acre from 1250 to the end of the 1280s appears to be an expanding production of secular books and a diminishing production of religious books, judging from the available evidence. We have identified individual workshops and looked at the work of a variety of artists. We have proposed to see separate religious houses, such as the Dominicans and the Franciscans with their own scriptoria, and the patriarch of Jerusalem residing in Acre as having his own scriptorium in or near the Cathedral of the Holy Cross, for the production of special religious service books. We have also found there to be a variety of secular works illustrated by a series of several artists working in the traditional multicultural, Franco-Byzantine style,[520] along with two French Gothic painters.

Stones comments on the relationship between sacred and secular books. "Developments in both the layout and the style of secular illustrations are closely related to those of liturgical or devotional books, and in many cases there is evidence that both were produced by the same workshops and artists. While this is generally the rule, many of the outstanding and sumptuous literary MSS have no parallel in liturgical books, while the opposite is also true, and there are splendid liturgical books illuminated by artists who appear not to have participated in secular MS illustration."[521] We can certainly see this characterization of the situation in France as being relevant to book production in Acre.

When we look at the output of the Paris–Acre Master in Acre we can see his layout and style is virtually the same in both secular and religious books, and even though most of his known output in Acre is in secular books, in Paris the only work we have by him is in religious books. However, it is also true that the decoration of the most lavish liturgical service books, prayer books, and biblical texts done in Acre in the thirteenth century are designed and handled by artists who cannot be found working on projects involving secular books. This indicates both that secular and religious book production was not unrelated and that it was carried on in various workshops in Acre. It will be interesting to see what further illustrated manuscripts can be identified from Acre in the very last days of its Crusader existence from 1288/9 to 1291, and what style(s) they were done in.

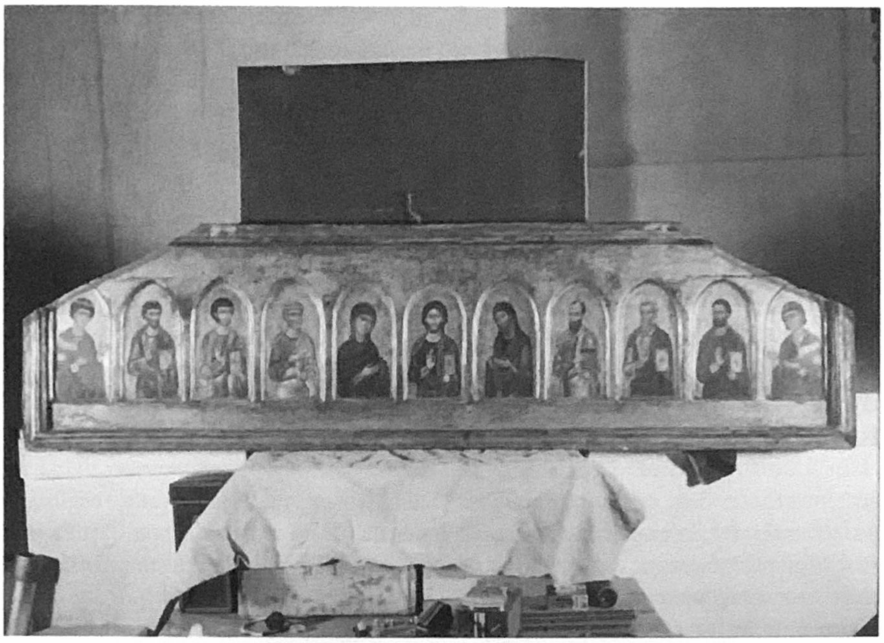
ICON PAINTING

The presence of panel paintings and icons became an important reality in the artistic world of the Crusaders from the time of Louis IX's residency in the Holy Land, from 1250 onward. The problem, as we remarked earlier, is that we often have no clear indication of the exact functions of these panel paintings and icons for the most part. Whereas we can understand what certain types of icons would have been used for in Orthodox services, for example, an iconostasis beam or a bilateral processional icon, it is unclear how these same types of icons would be used in Latin liturgical circumstances.

Rarely do the written sources refer to the use of icons or panel paintings in specific settings. However, there is one passage by the *Templar of Tyre* worth noting. When discussing events of the year 1270, an assassin attacked Philip, the lord of Tyre, and attempted to kill his son as well; the text reads:

> Mais quant il fery le grant seignor, le cop sona si fort que le jeune seignor quy estoit en la chapele [et] lisseit son livre, torna sa chere saver que ce esteit, et adons vy venir le hassissi, l'espee en la main nue, si que il se bouta dedens l'autier, quy avoit une table enpainte de sains par devant, et estoit entré dedens, et au bouter que le seignor jeune fist dedens l'autier le hassissi lansa l'espee pour luy ferir sur la table de l'autier, et se tint si fort quy ne la post aracher.[522]
>
> But when he struck the Old Lord, the blow sounded so loudly that the Young Lord, who was in the chapel reading his book, turned to see what was going on. When he saw the Assassin coming in with a naked sword in his hand, he lunged towards the altar, which had a board painting with pictures of saints on the front of it, and he got behind it. As the Young Lord made his lunge for the altar, the Assassin threw the sword, trying to hit him on the table of the altar, but [he missed, and] the sword stuck so tightly that it could not be withdrawn.[523]

The board with saints painted on it is clearly a panel painting placed on the rear of the altar, and corresponds to what we would call an altarpiece in this instance. Although it is true



256. Icon: Sinai, App. no. 74/1003, Dossal/iconostasis beam, total view, containing bust-length images of the Deësis and eight other saints. that there are several "Crusader icons" in the collection of the Monastery of St. Catherine's on Mount Sinai that it might be tempting to equate with this "board with saints," few would be large enough to be placed on an altar as an altarpiece, and even fewer would be substantial enough to receive a blow from a thrown sword so that the blade would be embedded in the wood and difficult to withdraw without the panel being broken. Perhaps the most likely Sinai parallel for this kind of panel would be the dossal (Figs. 256–61, App. no. 74/1003), which measures 43.3 × 168.5 cm, and which we shall consider in our discussion of the icons in Veneto-Byzantine Crusader style later.

When it comes to the art historical analysis and interpretation of Crusader icon/panel painting, we can recall that our study is also challenged by the context in which we find the surviving examples. All of the extant "Crusader" icons from this period are found in the Monastery of St. Catherine's on Mount Sinai, presumably deposited there or commissioned there by pilgrims before 1291, or collected somehow and saved there after 1291. Because of the lack of developmental artistic context for the icons, we continue to follow the methodology of attempting to compare them stylistically with the main lines of development we can see in manscript illumination, the latter of which provides us with our main semblance of documented and structured historical sequencing along with the coins to some extent. Despite the difficulties encountered in our study of these icons, we should remember that these panel paintings, done for Crusader or Eastern Christian patrons by Crusader or Byzantine artists, constitute one of the major bodies of artistic work we have from the thirteenth century.

Icons in the Franco-Byzantine Crusader Style

In light of the developments in manuscript illumination, we can wonder whether there might be a large production of panels painted in the French Gothic style, but this appears not to be the

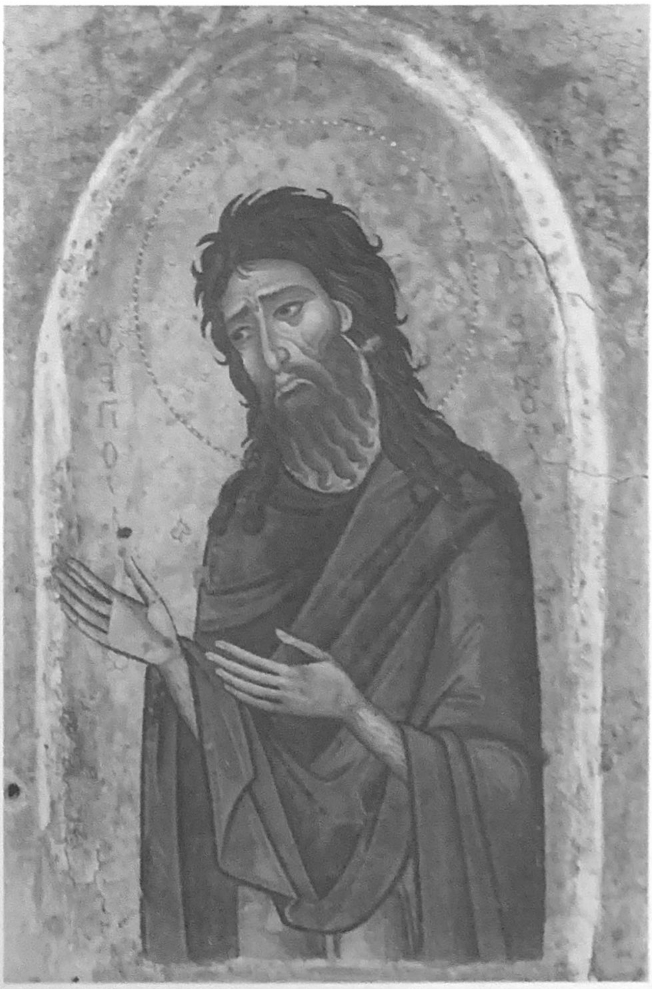
case. Although we have noted the occasional example, usually in a rather mediocre style, earlier in the thirteenth century,[524] we do not find any after 1268. This may be a matter of taste, or the accidents of survival, but icons painted in the Franco-Byzantine Crusader style do continue to be produced. They can be identified in two examples, a Last Judgment (Fig. 262, App. no. 24/212), and a Dormition of the Virgin (Fig. 263, App. no. 101/1725), first published by Kurt Weitzmann in 1966. In both of these examples the painting is very fine, extremely nicely done, with different versions of a very developed and painterly Franco-Byzantine style. In the case of the Last Judgment (Fig. 262, App. no. 24/212), the iconographical components of the image are very comparable to purely Byzantine examples in icons and other media.[525]

The Last Judgment icon[526] is remarkable because of its Byzantine organization combined with certain Western aspects in the iconography, the extraordinarily dense array of inscriptions in Greek above the figures, and the elaborate frame with paired gold lozenges set on a black frame, combined with large white dots between the lozenges, and white dots on a red outline to frame them. In register one, Christ dressed in bright red robes appears as the largest figure in a central position as part of the standard Byzantine Deësis group (Matthew 25: 31 and Deësis prayer). Flanking them instead of the apostles, however, are two types of angels, one pair blowing trumpets (Revelations 20: 13) to announce the Last Judgment, others dressed in royal court costume as the Lord's attendants. Below Christ in the second register is the '*Etimasia*, or prepared throne (Psalms 88 (89): 15 and 102 (103): 19), which emits a firey stream down to a lake of fire (Daniel 7: 10 and Revelations 20: 10, 15). The throne appears here flanked by the Twelve Apostles seated in choir stalls (Matthew 19: 28). In the third register are the elect on both sides of Christ. Below them, on the left is a vision of Paradise with the enthroned Virgin and the souls in the bosom of the prophets, in the center is the resurrection of souls and St. Michael weighing the souls, and at the right is the image of Hell with the image of Hades in the midst of the souls in torment.

As Weitzmann points out this arrangement significantly alters the Byzantine unity of Christ and the apostles sitting in council together, and the equal division of the elect and the damned, which is standard Byzantine iconography. Clearly this painter is partly reflecting the popular Last Judgment imagery found in sculpture all over France in the twelfth and thirteenth centuries. However, even the clarity of the Western



259. Icon: Sinai, App. no. 74/1003, Dossal/iconostasis beam, detail: Image of bust-length intercessory St. John the Baptist, from the central Deësis group. 260. Icon: Sinai, App. no. 74/1003, Dossal/iconostasis beam, detail: lefthand side of the beam with Sts. George, Luke, John, Peter, flanking Mary and Christ. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

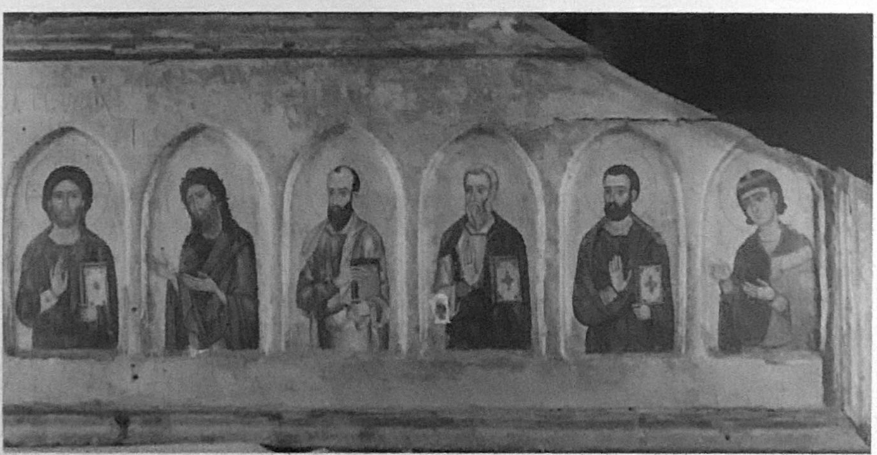
compositions is blurred in this representation because whereas the Lord blesses on the side of the elect and turns his left hand down as a sign of condemnation, this gesture only pertains to the damned in registers four and five in the lower right side, but not to the elect in register three. This image surprisingly increases the representation of the elect over most Western versions, and diminishes the emphasis on the damned often found in tympanum sculpture in France. However, the judgmental aspect is clearly evident. It is the artist's consolidation of the angels in the top register that is so unusual with the angels blowing huge trumpets, the angel rolling up the scroll of Heaven (Isaiah 34:4, Matthew 24: 9, and Revelations 6:14) at the upper left, and the huge assembly of attending angels indicated by their staffs. What is completely missing here, which is normally incorporated in such scenes in the West, is the four heavenly beasts from Revelations.

Weitzmann also compares this icon to the Last Judgment painted by T'oros Roslin in a gospel book done in Cilicia in 1262, now in the Walters Art Museum, MS W. 539, fol. 109v.[527] In the Armenian version the artist has also based his image on the Byzantine type, but made equally significant variations in the iconography, which are quite independent of the Crusader approach. T'oros Roslin simplifies the scene to four instead of five registers, enlarges the top register, and introduces an extra angel rolling up the scroll of Heaven to match the pair of angels blowing trumpets for the sake of artistic symmetry according to Weitzmann, an idea quite unknown to Byzantine representations. Un-Byzantine as well is the omission of the '*Etimasia*, with only the True Cross on Calvary retained, and the introduction of a group of veiled women at the far left, next to the seated apostles but outside the frame of the miniature, separated from the scene by a large door closed by one of the apostles. These women are clearly a reference to the foolish Virgins from the parable in St. Matthew's gospel (Matthew 25: 7–12), a motif found often in Western Last Judgment iconography, but never seen in Byzantine imagery of the final things. Der Nersessian identifies the ultimate Western origin of this imagery, but proposes to see T'oros Roslin's source as an earlier



261. Icon: Sinai, App. no. 74/1003, Dossal/iconostasis beam, detail: righthand side of the beam with Sts. Procopios, Mark, Matthew, Paul, flanking John the Baptist and Christ. 262. Icon: Sinai, App. no. 24/212, Panel with the Last Judgment in four registers. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

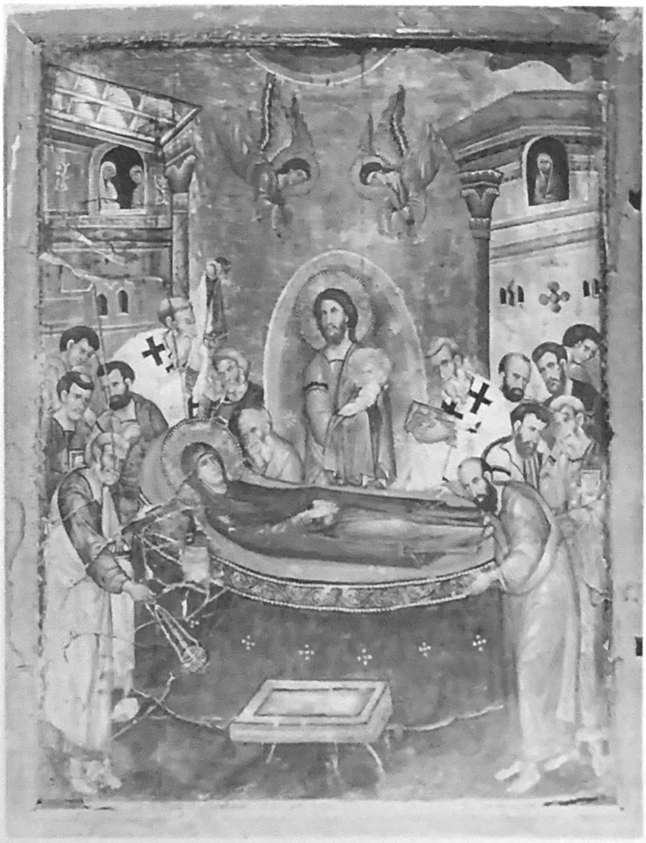
Armenian codex.[528] Der Nersessian also identifies the source of T'oros Roslin's composition of the top register and the separation of the apostles from Christ and the Deësis group as coming from earlier Armenian painting, not from any Western influence.[529]

This raises the interesting question of whether the Crusader icon artist may have known contemporary Armenian painting. We have seen how closely linked the northern Crusader States were to Cilician Armenia at this time, during the reign of Hetoum I, until his death in 1269, and then during the time of Leon III, who ruled from 1269 to 1289. It is not impossible that this icon could have been done by a Crusader painter with knowledge of Armenian iconographical ideas, but whatever the source of the inspiration, the panel must have been done for a Greek, given the elaborate Greek inscriptions. It is not impossible that it was commissioned as a gift for the Monastery of St. Catherine's on Mount Sinai as a gift from a pilgrim.

We can further judge how close this Crusader icon is to its Byzantine sources by contrasting it with yet another Last Judgment icon, which also is preserved in the Monastery of St. Catherine's on Mount Sinai (Fig. 264, App. no. 79/1128).[530] Although this icon is done in a similarly painterly Franco-Byzantine Crusader style, albeit somewhat more simplified and linear with the Acre convention for the eyes more evident, the imagery is quite different. There are many of the same Byzantine elements present, but the selection of components, and the composition of the scene is quite distinct, and one might say, much less Byzantine as a result.

Christ is of course the central figure, who here displays his open hands equally, but without the stigmata. He sits in a mandorla between the apostles and the angels on a raised dais, as if the source of this scene might have been some monumental version in an apse or chapel. The oddest aspects of this arrangement are, first, the Deësis group has been altered to find the Virgin and St. John the Baptist kneeling in prayer below and before him, and second, the choir of angels has five figures on the left side but unaccountably, only four on the right.

Below the top register, the lower portion of the icon is very damaged, but we can see the following nonetheless. In the midst of the elect at the left and the damned at the right, we find the '*Etimasia* with a large cross guarded by two monumental angels. The composition of this lower part departs from a strict register format and is strangely spatial in the way the figures surround the Prepared Throne and the Cross. Two very large figures of Adam and Eve kneel below the '*Etimasia*, echoing in their poses the figures of the Virgin and John above. In this icon the vision of Paradise is quite small, but the representation of the torments of Hell is contrastingly large. The angel rolling up the scroll of Heaven is inserted at the mid-right side, and damage to the painting prevents us from knowing for sure whether the weighing of souls was represented here. Overall this icon seems to reflect a very different, very Western taste, which emphasizes the torments of Hell, and restructures the image in an uncharacteristic and un-Byzantine hierarchical arrangement that seems to place the figures of Christ with the apostles and angels behind the figures below, as much as they



263. Icon: Sinai, App. no. 101/1725, Panel with the Dormition of the Virgin. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

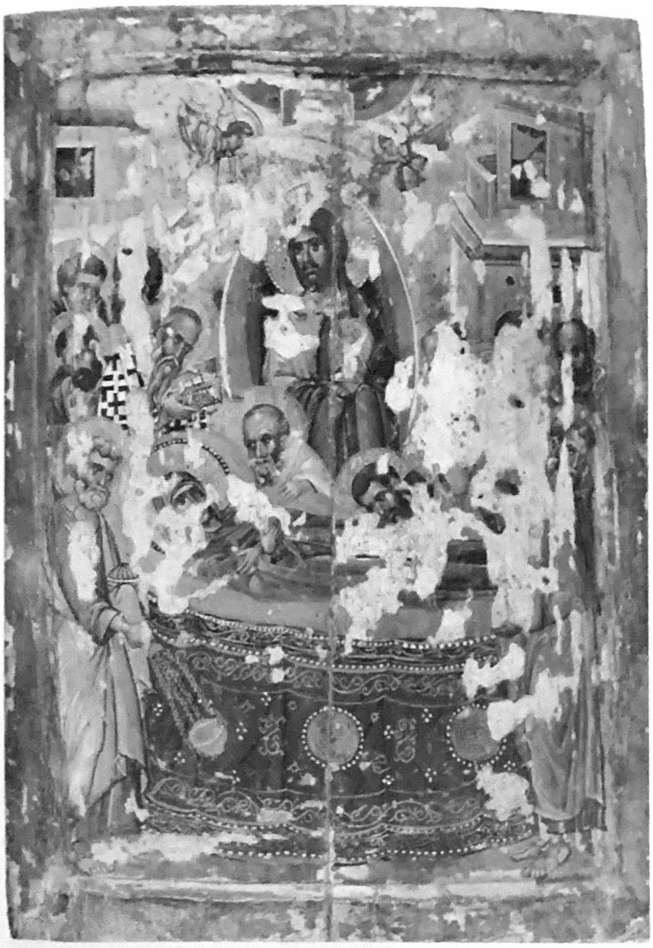
are above them. The figures also seem to be painted in two sizes, with the figures in the upper part of the icon much more monumental than those below.[531] Finally, we note among the elect, in the group of the clergy, the special costumes of the hooded figures. Are these Greek Orthodox monks, or are they from some other group of Eastern Christians? In any case, this panel and the more conventional version (Fig. 262, App. no. 24/212) both seem to reflect the interest in Last Judgment iconography popular in the thirteenth century. On the basis of their style primarily, as continuations of the Franco-Byzantine Crusader style seen in Acre in the 1260s, we propose to date them slightly later, in the 1270s, reflecting both Western interests in the theme and parallels with the continuing development of Crusader manuscript illumination in the St. Petersburg–Lyon cycles of the *History of Outremer* and the Brussels *Histoire Universelle*, MS 10175.

The other panel in Franco-Byzantine Crusader style published by Weitzmann is a very handsome panel of the Dormition (Koimesis) of the Virgin (Fig. 263, App. no. 101/1725).[532] Overall this image appears much more Byzantine than the Last Judgment, partly because of the iconographic tradition and partly because of its proximity to that Byzantine tradition. As Weitzmann points out, the Dormition (Koimesis) is a popular subject in Crusader workshops, no doubt because August 15th, the Feast of the Dormition, is one of the greatest feasts of the liturgical year, both East and West. In the Byzantine East this celebration forms part of the Dodecaorta, the Twelve Feasts, and in the West, we note the growing interest in the cult of the Virgin in those places where dormition scenes are frequently found in Gothic sculpture. In Acre we have already seen the Dormition on the Acre Triptych inner left wing (Fig. 160, App. no. 66/753), and now we have in this panel a much more Byzantine-looking depiction that follows the Comnenian-type images, which show the Virgin peacefully lying on her bier, as if asleep, with her hands folded together, quite different from the images of the Virgin from the earlier part of the middle Byzantine period where her hands were usually covered and her womanly form was sometimes indicated.

In this Dormition (Fig. 263, App. no. 101/1725) the basic Byzantine compositional format is followed with the Virgin's bier at the base, in this case with the footstool in front, with Christ standing behind holding the soul of the Virgin in his arms, and with two attending angels flying down and flanking Christ above. The inscription identifying this scene, "Η ΚΙΜΗϹΙϹ [sic] Θ[ΕΟΤΟ]Κ[Ο]Υ," is located above just beneath the semicircular glory of Heaven. The figures attending the scene include the Twelve Apostles and two bishops. This is all fairly canonically Byzantine as found, for example, in the Koimesis done in cloisonné enamel *c.*1150–1200 for the image that eventually was mounted in the Pala d'Oro in Venice.[533]

It is a matter of slight variations in the imagery that reveal the Crusader origin of this artist. Not only is more humanity expressed in this scene by the principal figure, especially the way Christ holds the soul of the Virgin as Mary held him as a baby, but also by the quiet sorrow of the assembled apostles as indicated by gesture and position of their heads, the earnest attention of the attending bishops to their current tasks – tending the censer on the part of Dionysios the Areopagite at the left, and opening his book on the part of Hierotheos at the right[534] – and the attention of three somber female witnesses above in the windows of the architecture left and right. Rarely do we find women witnessing this scene in Byzantine art. We also note the Gothic rose and blue costume of Christ, the unusual equal-arm crosses inserted into the halo of Jesus, and the typical use of white dot on black circle-type haloes for Christ, the Virgin, and the two angels.

We can imagine how important the event of the Dormition was to the Crusaders and to Western pilgrims because of the Tomb of the Virgin in Jerusalem. Fewer were able to see it now because it was no longer under Crusader control, but certain determined pilgrims still managed to visit even under the limitations and fees imposed by the Muslims, as we learn from the thirteenth-century accounts discussed earlier. Nonetheless it is interesting how the discipline of the Byzantine type seen in the Pala d'Oro enamel is observed in this Crusader version, even though there are certain revisions as mentioned. The way St. John, bending over the Virgin for a look, is tucked between Jesus and Mary, in contrast to other examples where he is much more physically in evidence, is one indication of this understated approach, even though the apostles and bishops are otherwise crowded more compactly at either end of the bier in the Crusader example.



265. Icon: Sinai, App. no. 47/496, Panel with the Dormition of the Virgin. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

One such icon where John is emphasized more with a larger presence in the image is another Crusader panel (Fig. 265, App. no. 47/496)[535] done in similar painterly Franco-Byzantine Crusader style with more deeply shadowed faces and more robust highlights. Although this icon is badly flaked and rubbed, we can see some of the interesting details that identify the special interpretation that this artist has given to the scene. The painter of this icon follows the basic configuration of the other panel, but the image is somewhat simplified, and proportionally the size of the figures is increased relative to the size of the icon so the scene seems tightly packed into the picture area. To accommodate the figures, the artist has had to reduce the number of apostles and downsize the two angels above. Furthermore, the figure of St. John now separates Christ from the Virgin quite decisively. The other "Crusader" details such as the women observers and the white dot on black (for the Virgin) and red (for Christ) circle haloes are also found here. It is also somewhat unusual here that she has her arms crossed in a more explicit deathbed manner than that in the other examples we have been looking at, Byzantine or Crusader.

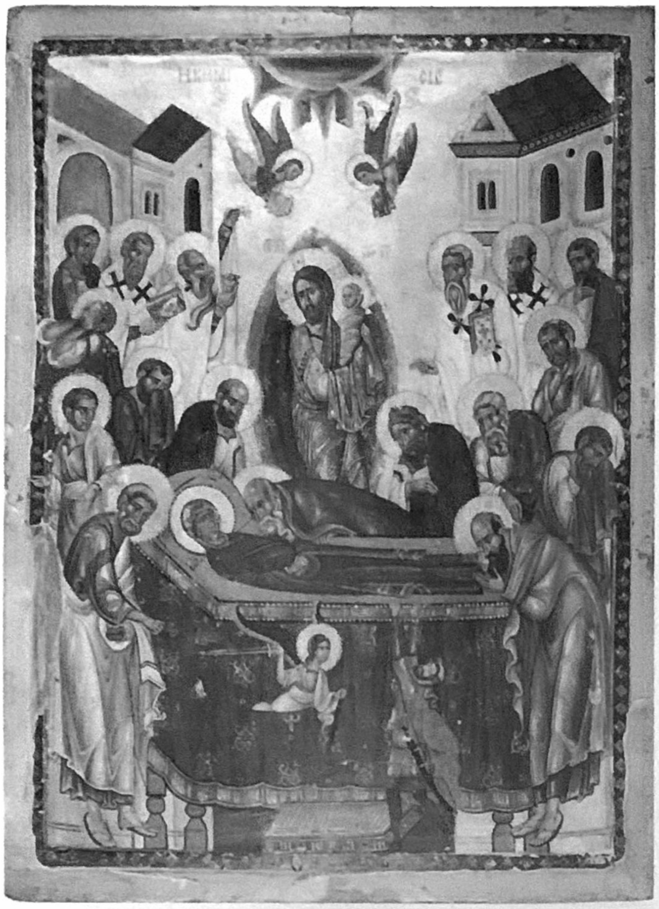
There are no specific indicators to use for dating these icons, but their Franco-Byzantine Crusader style seems to be a continuation from a number of examples we looked at earlier, placing these two icons slightly later, in the 1270s. Compare the icons of the Nativity (Fig. 188, App. no. 113/1831), the Baptism of Christ (Fig. 189, App. no. 114/1836), and the double-decker icon with the Deësis above and three saints below (Fig. 187, App. no. 33/293) from the 1250s, and the Virgin and Child Enthroned with the turbaned donor (Fig. 206, App. no. 51/573) from the 1260s, as part of this development. There was of course also the Dormition of the Virgin that appeared on the Acre Triptych (Fig. 160, App. no. 66/753), which, although in an earlier version of the Franco-Byzantine style of *c.*1260, is quite different in composition, particularly the way the center of gravity of the design is shifted to the left with the figure of Jesus almost stepping out of his mandorla to be close to Mary.

These few examples of icons painted in the Franco-Byzantine Crusader style demonstrate that this branch of production continued into the later decades of the thirteenth century, just as manuscript illumination in this style continued as well. However, whereas there are no panels extant done in this period, 1268–89, that exhibit the French Gothic style, there are many icons painted by artists in the Italo-Byzantine Crusader style, what Weitzmann characterized as the Veneto-Byzantine Crusader style.[536]

Icons in the Veneto-Byzantine Crusader Style

Weitzmann has made the case for the existence of the Crusader style that is related to Venice and simultaneously strongly influenced by Byzantine art in the later thirteenth century. Despite the paucity of extant examples of Venetian panel painting from these years, he has proposed a link between the stylistic characteristics in a number of Crusader icons and one surviving work that can serve as documented evidence, namely, the diptych of King Andrew III of Hungary now in Bern, dating from the early 1290s.[537] This style is miniature-like, colorful, and very painterly. To this work we have added the painted lid of the "cassa sepolcrale" from the Monastery of Sts. Biagio and Cataldus with the two standing title saints and a kneeling fgure of Giuliana di Collalto, dated 1262.[538] These two works give us an indication of Venetian style panel painting ranging from the more linear on the cassa to the more painterly in the diptych. Despite the existence of these two examples of what appears to be limited production of panel painting in Venice in the later thirteenth century, we find a flourishing output in the Crusader East, not of Venetian style painting, but of Veneto-Byzantine Crusader painting. This work must have been done by artists who may have been born in the Holy Land of Venetian parents and trained there by masters working in the Veneto-Byzantine Crusader style, but their link to Venice is visibly identifiable.

The Dormition of the Virgin (Fig. 266, App. no. 87/1394): It is not surprising to find, given its importance and popularity, that the Dormition of the Virgin was also commissioned and painted in an icon by a Crusader artist working in the Veneto-Byzantine style. A handsome example is preserved in St. Catherine's Monastery (Fig. 266, App. no. 87/1394), which is in very good condition.[539] We can immediately sense that this is a work by a painter from a very different background because of the more acid colors, in constrast to the pastel pinks and blues in the contemporary Franco-Byzantine works, the use of chrysography on the figure of Jesus, the strong white highlights on the draperies of the apostles, and the heightened emotional temperature of the scene. The content of this scene is increased with



266. Icon: Sinai, App. no. 87/1394, Panel with the Dormition of the Virgin. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

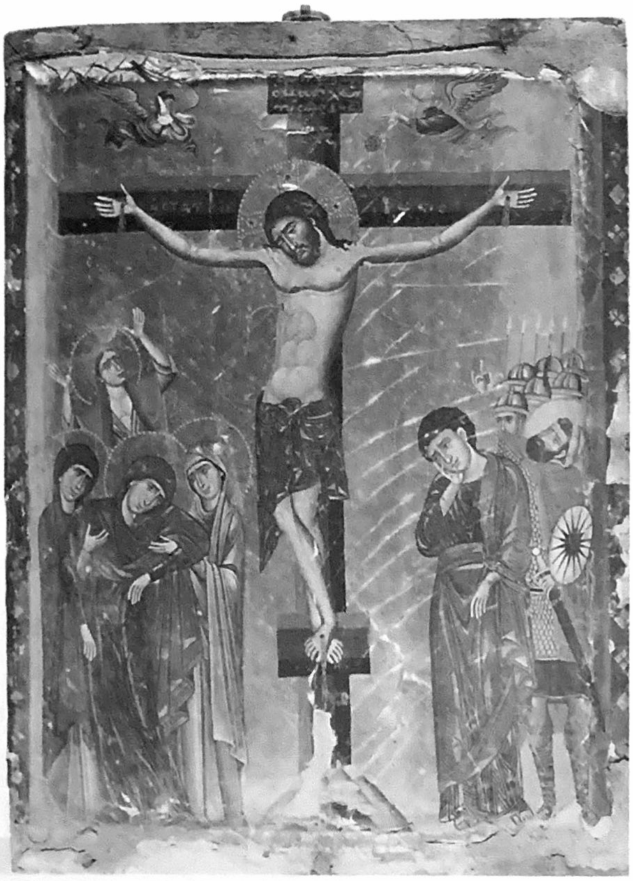
four bishops, instead of just two, and the episode of Jephonias. We can see Jephonias, the diminutive Jew, who attempts to tip over the bier, as an angel comes to punish him by cutting off his hands. A slightly different depiction of this scene appears also in the earlier Dormition on the wing of the Acre Triptych (Fig. 160, App. no. 66/753). The Dormition on the iconostasis beam (Fig. 176, App. no. 107/1746), also done by a Veneto-Byzantine crusader painter, is to be dated 1260 according to my discussion in Chapter 6, and therefore done approximately twenty-five years earlier. It is a much more crowded composition that is also different in its iconography, seen mainly in the introduction of a band of four angels at the right side of the bier, and a reduction of apostles at the left side to only six figures with a bishop.

The Veneto-Byzantine style of this work is most notable in the colorism, the slightly "inflated" limbs of the apostles with their dramatically highlighted drapery, and the "floating" positions of Sts. Peter and Paul at the ends of the bier. We can see the "Crusader naturalism" in terms of the detailed representation of the differing emotions of the apostles. St. John here projects himself over the bier between Jesus and Mary so that he can get a good look at her. Two apostles put their faces in their cloaks and wipe their tears; one at the left covers his face with his hands. These "down-to-earth" details are carried through in the representation of the solid wooden legs on which the bier is set, legs omitted on the other icons we have been considering previously, and the actions of the bishops. One bishop, Dionysios, seen in stark profile as we also found him in the Franco-Byzantine Crusader style icon (Fig. 263, App. no. 101/1725), is in the act of blowing on the coals in the thurible, and we can see the smoke of the incense drifting off to the right. Finally the greater decorativeness of the surface and the colors is enhanced by various patterns, including the chrysography on the drapery of Jesus (a type of chrysography very close to that found on the full-length figures in the frames of the diptych of St. Procopius and the Virgin *Kykkotissa* [Figs. 271, 272, App. no. 110/1783] to be discussed later), the golden decorations on the silk hanging on the bier (a design almost exactly the same as we find on the beautiful red veil of the Virgin Kykkotissa diptych [Fig. 272, App. no. 110/1783], to be discussed later),[540] and the fact that all the holy figures, a total of twenty-three, have white dot on red circle haloes, except the Virgin, whose halo circle is black with white dots. We also find on this icon the golden lozenges on a black border in the inner frame, in this case without the white dots, or "pearls."[541]

The inscription on this handsome icon is also in Greek, "H KHMICIC," divided at the top by the glory of Heaven from which the diminutive angels descend. The fact that Greek is used for this inscription is an indication that the icon may have been painted as a gift for a Greek location, in this case the Monastery of St. Catherine's, or as an authentic pilgrim's souvenir from the Holy Land. It is also not impossible that the icon was painted by an accomplished Crusader painter for a Greek patron. The good quality of this icon makes all of these three possibilities viable alternatives, but unfortunately we cannot determine the originally intended function of this icon at this time.

If this icon were the only example of the Veneto-Byzantine Crusader style in the 1270s, we would regret the lack of other works with such high-quality formal characteristics. Fortunately, however, there are several other icons of even more impressive artistic accomplishment. In fact, the icons in this style from the 1270s and 1280s are among the best-quality Crusader works we have from the thirteenth century. They include two famous works, a bilateral icon with the Crucifixion and the Anastasis (Figs. 269, 270, App. no. 97/1568) and a diptych of the Virgin Kykkotissa and St. Procopius (Figs. 271, 272, App. no. 110/1783). There are also several other works that belong with this group, an iconostasis beam with the Deësis and six saints (Figs. 256–61, App. no. 74/1003), a Crucifixion with Christ in the three-nail configuration (Fig. 267, App. no. 9/56), and a bust-length figure of St. Antipas, the first bishop of Pergamus (Fig. 268, App. no. 98/1645).

The Bilateral Icon with the Crucifixion and the Anastasis: The bilateral icon with the Crucifixion and the Anastasis (Figs. 269, 270, App. no. 97/1568) first published by Weitzmann in 1963 and subsequently repeatedly commented on by him up to 1986, with certain elaborations as to the dating, provides us with a convenient starting point.[542] This is a truly monumental icon with a Crucifixion that is iconographically firmly related to the image in the Perugia Missal on fol.182v (Fig. 149), and the contemporary icon now at Sinai (Fig. 152, App. no. 104/1732), both discussed earlier in Chapter 6. It is a Gothic "three-nail crucifixion" with the Virgin and John below in the characteristic Acre School poses of understated mourning: the Virgin with



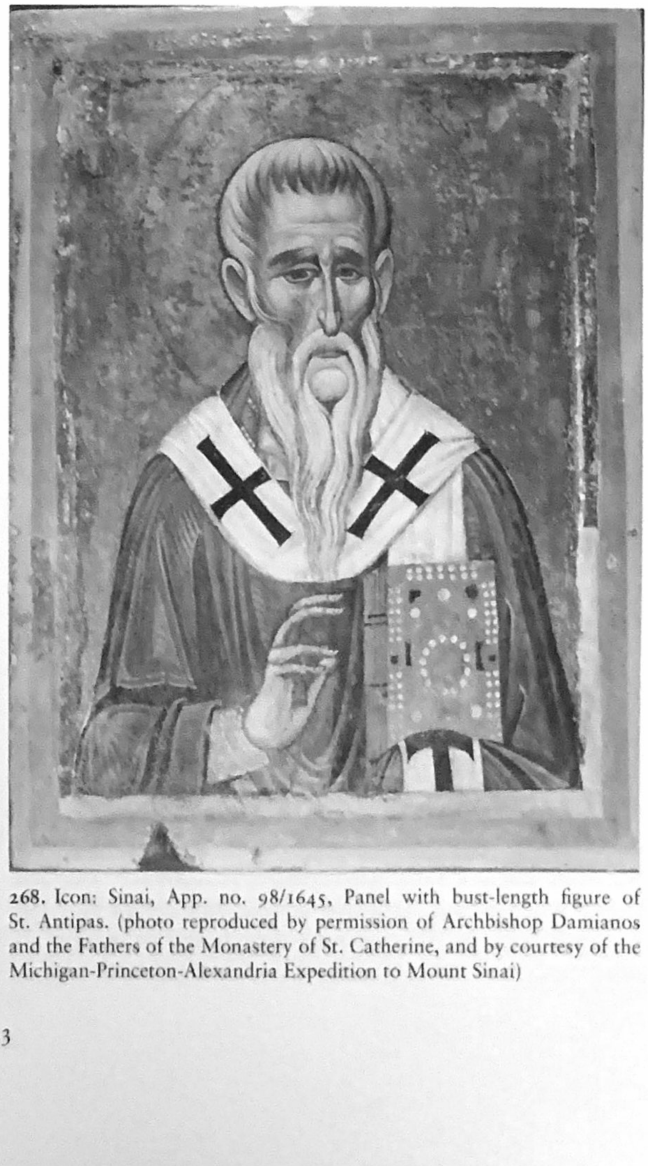
267. Icon: Sinai, App. no. 9/56, Panel with the Crucifixion between the swooning Virgin and St. John with soldiers. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

her hand held to her head and her thumb touching her nose, John with his hand held to his head and his little finger resting on his cheek. We also notice that Christ is very muscular, hardly the typically slender figure we see in Byzantine icons, and he wears a distinctive loincloth with an elaborate knot. The loincloth is very wide at the hips and features a sharp dagger-like fold on the left side. These two points of the design are very comparable to the earlier Crucifixion on the iconostasis beam (Fig. 172, App. no. 106/1745), a much more modest and mediocre work that we proposed to date 1260 in our discussion in Chapter 6. The figure of Christ on the bilateral icon is further enhanced by a tooled metal piece – no doubt a later, post-Crusader addition – that covers the inner part of his nimbus, which is otherwise a golden crossed halo with the characteristic white dot on red circle type we have previously seen frequently. Christ is nailed to a massive cross with beveled members, above which two sorrowful angels mourn his death. The unrestrained mourning of the angels contrasts with the controlled gestures and knitted brows of Mary and John.

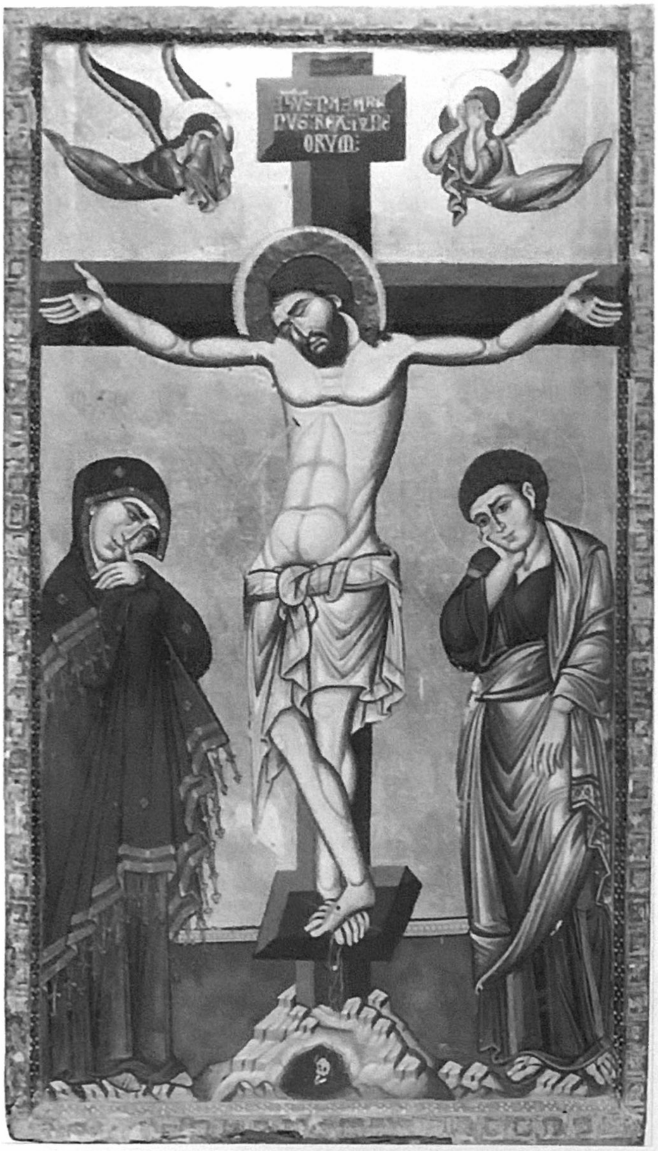
It is striking on this very handsome icon that the inscriptions are all in Latin, one of the few times this is the case with these "Crusader" icons. On the titulus we read: "⁝IHUS⁝ NAZARENUS⁝REX⁝IUDEORUM⁝" in white letters of mixed types. Over the Virgin there is: "⁝MATER⁝ ⁝DNI⁝" and over John we read: "⁝SCS⁝ ⁝IOHANES⁝". Both of the latter inscriptions are painted in red. We may presume because of these Latin inscriptions that this icon was commissioned for Latin-rite use, whatever that may have been. Weitzmann thinks the icon is too large and heavy to have served as a processional icon,[543] but the bilateral configuration strongly suggests that nonetheless.

The style of the figures on this icon is extremely high quality and rather different from the diptych of King Andrew III referred to earlier. The figures are large and monumental with substantial proportions; Weitzmann calls the body of Christ "Herculean" on more than one occasion. The draperies are quite volumetric and firmly modeled; some – as with John's overgarment – are also strongly highlighted. The flesh tones are also intensely modeled and the faces are given decisive linear definition including the spectacled eye convention. The surface of Christ's body in particular is given complex highlights, some crosshatched, some curvilinear, some geometric. Overall one can say that the linear decorativeness of the style, including the outlines and the drapery, with a variety of patterned "v" folds, is its characteristic feature.

This linear character has led Weitzmann to suggest that this is the work of an artist working in a Veneto-Byzantine style. He even called him a "Venetian painter."[544] Taking his cue from this idea and Weitzmann's *comparanda*, Otto Demus later proposed that the same Venetian artist who painted the panels of St. John the Baptist and St. Andrew now in the Correr Museum also did this Crucifixion.[545] Demus therefore called this artist the "Correr Master," but Weitzmann preferred to call him the



268. Icon: Sinai, App. no. 98/1645, Panel with bust-length figure of St. Antipas. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



269. Icon: Sinai, App. no. 97/1568, Bilateral Icon with, obverse, the Crucifixion. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

"Crucifixion-Anastasis" Master. Demus noted that the panel of St. John the Baptist has a date of 1281 painted on it by a later hand, but both he and Weitzmann think this may have simply repeated the original date of the panel. On this basis the bilateral icon appears to have been done shortly thereafter, perhaps in the mid-1280s.

On the reverse of this panel we find an equally monumental representation of the Anastasis, which is striking because of its similar high-quality style, its vertical as opposed to horizontal composition, and the strongly articulated faces of Christ – exactly comparable to the face of Christ on the Crucifixion – along with Adam, Eve, and the other worthies of the Old Testament Jesus has come to save. The color scheme of the figures is equally distinctive featuring for the most part acid pink, beige, and brown draperies, set against a beige and brown mountainous landscape above, with a dark blue sky in which large five-pointed stars float beneath the glory of Heaven.

Stylistically the same decorative linearism is found along with the patternization of the draperies, of the royal robes of David and Solomon, and of the Cross of Salvation carried by Jesus. On this panel moreover, five figures have raised gesso haloes painted with silver. Although two of these are now badly damaged – those of Christ and St. John the Baptist – it is clearly this type of halo decoration that the metal piece on the crucified Christ was intended to replicate.

It is the heads of Adam and Eve in the Anastasis, along with Christ and the elder worthies, with their strongly lined visages indicating aged wrinkled skin with especially their irregularly shaped oval cheeks, that led Demus to link the St. Andrew panel in the Correr primarily with them. He and Weitzmann also note the similarities in certain details such as the tufted eyebrows. Mouriki, however, preferred to see the Venetian link in terms of mosaics: "stylistic parallels have been noted among the figures of the mosaics of San Marco in Venice."[546] Demus even proposed to see the hand of the same artist in both the bilateral icon and the two Correr Museum panels.[547]

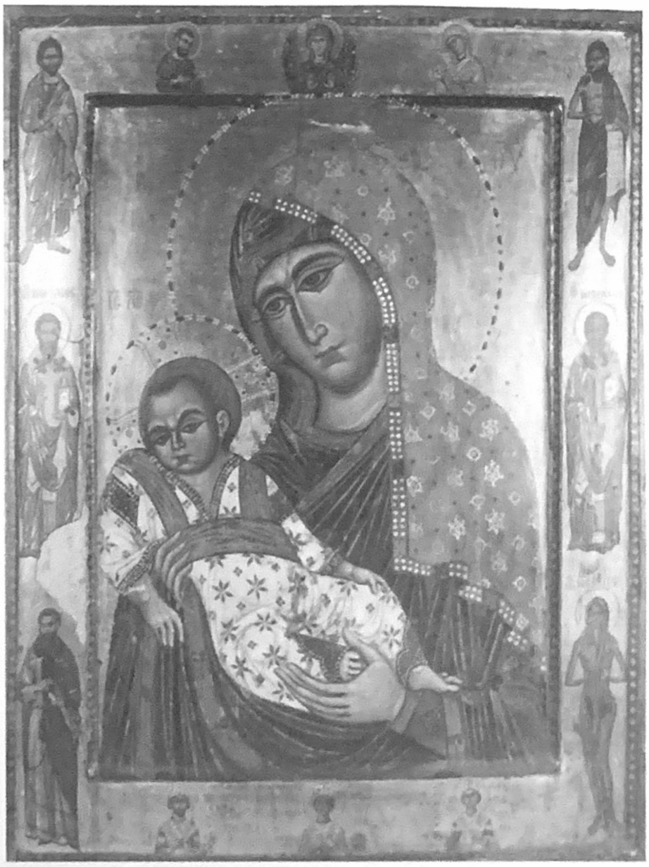
Weitzmann said, "in spite of these strong similarities, we do not feel it necessary to attribute both panels [St. Andrew and the Anastasis] to the same master; but surely we are dealing with the same atelier, some members of which we assume to have moved from Venice to the Venetian establishment in Acre."[548] Although by 1986 Weitzmann was leaning more to accepting Demus's view,[549] I would propose that Weitzmann's quote is probably a more accurate evaluation of the relationships here, but even what he says must be reconsidered. Do we really believe that a Venetian-trained painter who might have worked in the atelier that produced the two panels of St. Andrew and St. John the Baptist would suddenly change his style dramatically and begin painting in a remarkably byzantinizing mode? I think it is more likely that the Crusader artist who did the bilateral icon (Figs. 269, 270, App. no. 97/1568) had been trained in a workshop where strong Venetian and Byzantine traditions were combined for him to learn from. I insist that more study must be done on just how a mature artist fully formed in his style can change and develop into a painter who combines two major traditions in the Latin East, or in western Europe for that matter.

The issue that this Veneto-Byzantine Crusader style artist raises, of course, is whether it is possible that, just as the Paris–Acre Master worked in Paris in the 1270s and came to Acre to work in the 1280s, a Venetian artist trained in a Veneto-Byzantine style in Venice in the early 1280s could come to Acre and develop into a Veneto-Byzantine Crusader style painter producing several important works in the mid-1280s. Given the strong presence of the Venetians in Acre after the end of the War of St. Sabas in 1258 and their growing importance in the subsequent decades, it is not surprising to find this possible parallel development with Venetian painting, if this is in fact what happened. What is surprising about it of course is the fact that a master would leave Venice to go to Acre, where as we shall see, there are more major icon/panel paintings done in the 1280s and extant than in Venice! The question with the bilateral icon and with the other work closely related to this painter is, what is especially Crusader about their work? How can their hands be seen as that of a Crusader artist working in Acre, as opposed to an artist working in Venice itself?

In order to examine this issue, we can study first two other works that our master apparently did in Acre or Sinai. There is the iconostasis beam with multiple bust-length "portraits" of the Deësis group and other holy figures (Figs. 256–261, App. no. 74/1003),[550] and the icon of St. Antipas (Fig. 268, App. no. 98/1645),[551] both panel paintings quite comparable to the two panels in the Correr Museum of St. John the Baptist and St. Andrew. Looking first at the iconostasis beam, we notice immediately that this is a work with specially selected holy figures to fit the unusually short beam, certainly not the usual



272. Icon: Sinai, App. no. 110/1783, Diptych with the Virgin and Child Kykkotissa (right wing) surrounded by the Virgin "n tns batou" and eleven saints. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Byzantine arrangement. We find in the center the Deësis group, with Christ in red with a blue cloak, the Virgin in a medium blue tunic and reddish maroon maphorion, and St. John the Baptist in a light orange–brown undergarment and dark brown cloak. Flanking the central group are the figures of Peter and Paul with the four Evangelists. Peter wears a medium blue tunic with a beige cloak; Paul has on a slate blue tunic with a dusty lavender cloak. The Evangelists are similarly colorful: Matthew wears a red-rose tunic and a medium dark blue cloak, Mark is in medium blue with a reddish maroon cloak, Luke wears pink with a medium blue cloak, and John's garments have the reverse arrangement: medium blue with a pink cloak. Finally on the ends we see saints George (left) in medium blue with a beautiful red cloak studded with gold and Procopius (right) in a red tunic with a blue cloak studded with gold.

The Crusader features of the iconostasis beam seem evident. The colorism combines certain Byzantine-inspired pastels with Gothic reds, pink, and blues. Remarkably, all of these figures are located under very gracefully inset pointed Gothic arches, creating the effect of a Gothic loggia. Furthermore there is the unusual feature that the Evangelists clearly do not follow standard Byzantine iconography. Instead of John being the oldest with a long white beard, as we normally see in Byzantine gospel books, here John is beardless and very youthful. It is Matthew who has the attributes of John. Mistakes in the identification and labeling of the figures would not seem to be the answer to this imagery because the Greek inscriptions in red are done in a very fine clear display script. Apparently, the revisions to the iconography of Matthew and John were intended, perhaps at the request of the patron.

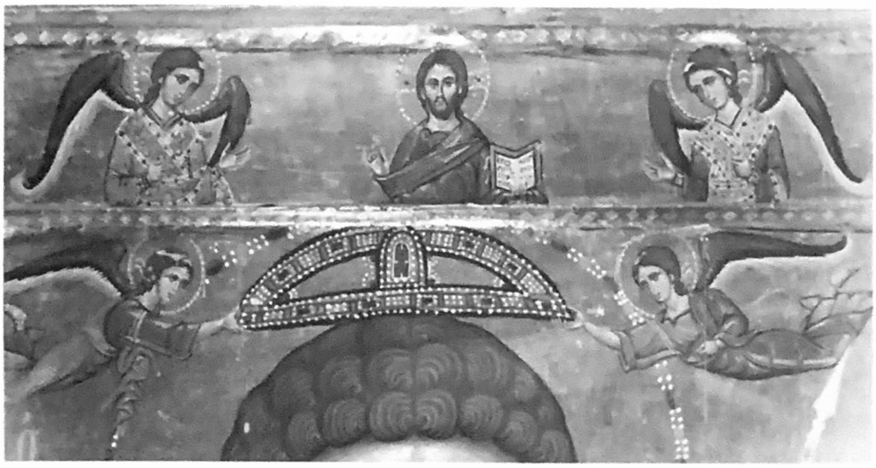
When we compare figures of Andrew and St. John the Baptist in Venice at the Correr with the iconostasis beam figures, we can see clear stylistic distinctions. They could not be the work of the same hand. Andrew and John, who both hold cross staffs, are much heavier in bodily proportions, the design of their faces is more elongated, and the painting of their faces has slightly different linear conventions for the forehead, brows, eyes, and nose. Similar differences are found in the conventions for the ears of the frontal figures and for the neck muscles. Comparing the beard of St. John the Baptist in Venice with the figure on the iconostasis beam, we see how differently the scraggly beard is handled. We also see the relative lack of definition in the painterly handling of the draperies of Andrew and John, compared to the strong, tight linearism with clear outlines and folds, and moderate use of highlighting in the figures on the iconostasis beam. Finally, the treatment of the hands are also quite distinct; they are much larger proportionately in the two panels in Venice than in the smaller, simpler, more slender versions on the beam figures. The position of the fingers to form the Greek blessing is somewhat unclearly done in the two Correr panels, whereas the figure of Christ does it quite precisely by contrast.

When we compare the two Correr saints to the panel of St. Antipas (Fig. 268, App. no. 98/1645) at Sinai, we again find clear distinctions that indicate the work of separate artists. Although Antipas is a much less well-known saint, he was a very early, first-century martyr referred to in the Book of Revelations (Rev. 2: 13) and therefore recognized as one of the heroes of the Early Church, honored with a special chapel at Sinai. In this depiction Antipas shares with Andrew and John similar proportions of their heads to their bodies, but still the bodies seem larger in the two latter cases than in the gracefully tapering shape of the arms and upper body of the former. The linear definition of the faces is more similar in this comparison than we saw with the iconostasis beam, but even though the figures of Antipas and Andrew also share the white tufted eyebrows, they are handled differently. Antipas has a more smoothed-down look versus the way the white bristles are spread out below the brows on the face of Andrew. Furthermore, the eyes of Antipas are smaller and more oval, compared to the larger, rounder eyes of Andrew and John. Again the hands are different, thinner, with the fingers more convincingly posed in a Greek blessing with Antipas, compared to the more ungainly treatment with Andrew and John. Finally the draperies are also quite different, again more clearly defined in linear terms with more complex white highlights on Antipas, compared to the less defined, less clearly legible draperies on the other two figures. The highlights of Antipas are important to note furthermore for their chrysography-like patterns and white dot and white dash designs, which will be found in a number of other icons in the Veneto-Byzantine Crusader style to be discussed later.

In sum, it appears that the Antipas figure is clearly painted by an artist different from that of Andrew and John the Baptist on the panels now in Correr Museum. Moreover it appears this artist, although closely related to the painters of the bilateral icon (Figs. 269, 270, App. no. 97/1568) and the iconostasis beam, is distinct from either one. He seems to be interested in a very strongly characterized face, with intense modeling to express both the age and the venerability of this special saint. Although it is not exactly a portrait in realistic terms, it is clearly an icon in terms of its likeness, the title saint for one of the chapels in the church in the Monastery of St. Catherine's on Mount Sinai.

To return to the question that we posed at the start of this discussion, how are the iconostasis beam and the icon of St. Antipas to be distinguished from the two Correr panels as works of Crusader artists? In the first instance we have argued they were done by different artists, so it is not the case of a single hand doing all of these icons. The style we see in the two Crusader works is rooted in the Venetian formal tradition expressed in the Correr panels and equally strongly Byzantine related, but merged with certain Crusader and even Gothic features we do not find in the images of Andrew and John. We have noted the interesting colorism and Gothic arches in the beam. What also makes these works Crusader is their function. In the case of the beam, it is a liturgical icon apparently especially tailored for a specific chapel at Sinai, quite possibly that of St. Catherine of the Franks, as Weitzmann proposes.[552] He makes this attribution in light of the fact that scratched on the beam is a graffito that says, "Fra Ludov[ico] di Luxina [?] fuit hic."[553] In the case of Antipas, it is his icon in relation to the chapel in his honor at Sinai.[554] The fact remains, however, that the inscriptions for both of these works are in Greek, apparently reflecting the context of their intended setting, in terms of either patronage or partial audience. So, once again what is Crusader about these works is very clearly rooted as much in their special style as in other important factors.

In fact, what is the touchstone for this group as the work of Crusader painters is the bilateral icon with its many Crusader features. Not only is his Veneto-Byzantine Crusader style

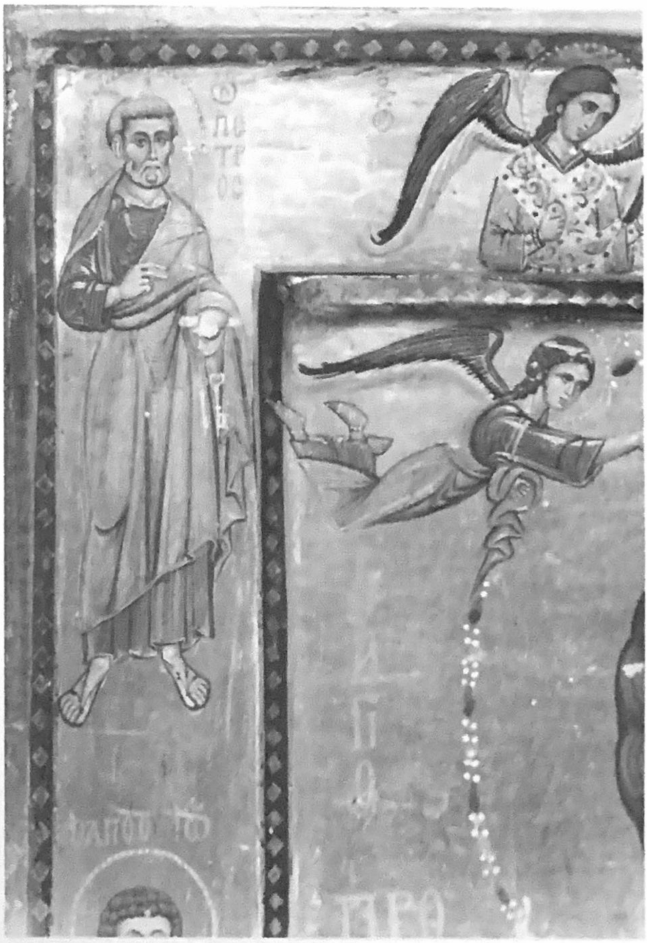


273. Icon: Sinai, App. no. 110/1783, Diptych with St. Procopios (left wing): detail of Christ and two angels. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

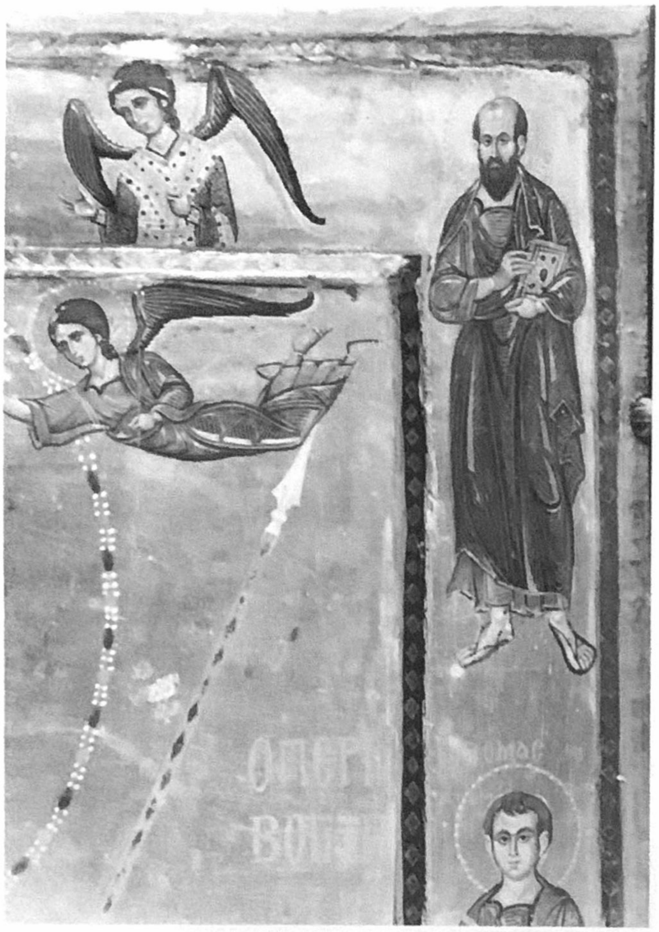
tightly linked with these icons, but also his techniques and imagery are distinctively Crusader. Besides the Latin inscriptions on this icon, we have also the remarkable colorism, especially the salmon-pink of the mandorla and the robes of certain figures in the Anastasis image. There is also the raised gesso on the haloes of many figures as noted earlier, the golden stars on the reverse, and the three-nail crucifixion with the strongly three-dimensional beveled cross on the obverse. The other work that anchors this group of icons done in a Veneto-Byzantine Crusader style is the equally famous diptych of the Virgin *Kykkotissa* and St. Procopius.

Diptych of St. Procopios and the Virgin Kykkotissa (Figs. 271–288, App. no. 110/1783): Important questions of iconography, style, patronage, function, and audience are also raised by the remarkable diptych with the Virgin *Kykkotissa* and St. Procopios.[555] This is arguably one of the finest Crusader icons; it is executed in the Veneto-Byzantine Crusader style and ranks along with the bilateral icon of the Crucifixion and the Anastasis in quality. This work has been discussed by more persons than any other Sinai icon in the "Western-influenced" or Crusader group, and the debate has raised the issue of the relationship of painting at Acre, at Sinai, and on Cyprus, which must be addressed as part of our discussion that follows.

The diptych itself is characterized by an extremely elegant representation of St. Procopios on the left wing (Fig. 271) and the Madonna of St. Luke, known as the Virgin *Kykkotissa*, from the Monastery of Kykko on Cyprus, on the right wing (Fig. 272). St. Procopios holds a red spear decorated with golden lozenges in his right hand, a sword lavishly decorated with pearls in his right, and there is a sumptuously jeweled parade shield behind his left shoulder. He wears impressive armor, with brocade and exotic floral designs on his right arm; he is being given the crown of martyrdom by two angels. Aspra-Vardavakis accounts for this lavish dress by the fact that he had been appointed duke of Alexandria. The angels crown him as his reward for the terrible ordeals he suffered as a martyr.[556] He is surrounded on the frame with a series of holy figures, including bust-length figures of Jesus and the two archangels, Michael and Gabriel, at the top (Fig. 273). On the sides are full-length paired figures of Sts. Peter (Fig. 274) and Paul (Fig. 275) at the top, then Sts. John the Theologian (Fig. 276) and Thomas (Fig. 277), and at the bottom the fellow soldier saints, Theodore Strateletes (Fig. 278) and George (Fig. 279). Finally, along the bottom are the bust-length figures of Sts. Cosmas and Damian,



274. Icon: Sinai, App. no. 110/1783, Diptych with St. Procopios (left wing): detail of St. Peter. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



275. Icon: Sinai, App. no. 110/1783, Diptych with St. Procopios (left wing): detail of St. Paul. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

paired left and right, and in the center is the figure of St. Christopher (Fig. 280).

The diminutive holy figures in the frames of both panels all have the characteristic white dot on red circle haloes we have noticed in many other icons, both on panels of the Franco-Byzantine Crusader style and primarily on those of Italo-Byzantine Crusader origin. What is particularly notable here are the very special haloes of the Virgin and Child and St. Procopios, made up of segments consisting of a double row of pearls, alternating with red and very dark blue (or black) precious stones along the outer circle.

The vivid image of the Virgin *Kykkotissa* features Mary with a splendid jeweled hem scarlet silk veil, on which are lovely golden decorations, including the same heart-shaped design with flourishes found also on the silk draping the Virgin's bier in the Dormition icon discussed earlier (Fig. 266, App. no. 87/1394). The child also wears a jumpsuit of extraordinarily sumptuous white silk with leafy and lozenge designs, with jeweled hems at the neck and sleeves, and with brocaded panels on the arms and at the ankles, outlined in pearls. His silk suit is partly covered by a dark red silk harness typical of a number of images of Christ in the *maniera cypria*.[557] At the top of this frame, we find the Virgin *orans*, *n tns Batou*, together with Joachim and Anna, her parents, all bust-length figures (Fig. 281). Three pairs of full-length figures are found on the sides of the frame. At the top there are two prophets, a fully bearded Moses at the left (Fig. 282) and an emaciated John the Baptist at the right (Fig. 283). In the center we find two Fathers of the Church, Sts. Basil (left, Fig. 284) and Nicholas (right, Fig. 285), and below are two ascetics, Sts. John Klimachus (left, Fig. 286) and St. Onouphrios (right, Fig. 287). In the lower part of the frame we see the royal bust-length figures of Sts. Constantine and Helena flanking the title saint, Catherine, in the center (Fig. 288).

As a type, this image of the Virgin and Child is somewhat comparable to the beautiful twelfth-century Sinai icon of the Virgin and Child with Prophets.[558] We can recognize this in terms of the central holy image, in this case a full-length enthroned image of the Virgin and Child *Kykkotissa*, surrounded by a selection of holy figures emphasizing prophets, which with regard to the diptych focus instead on the incarnation and on the holy site of Sinai. As for the central image, our icon panel (Fig. 272) makes two major revisions in the iconography of the

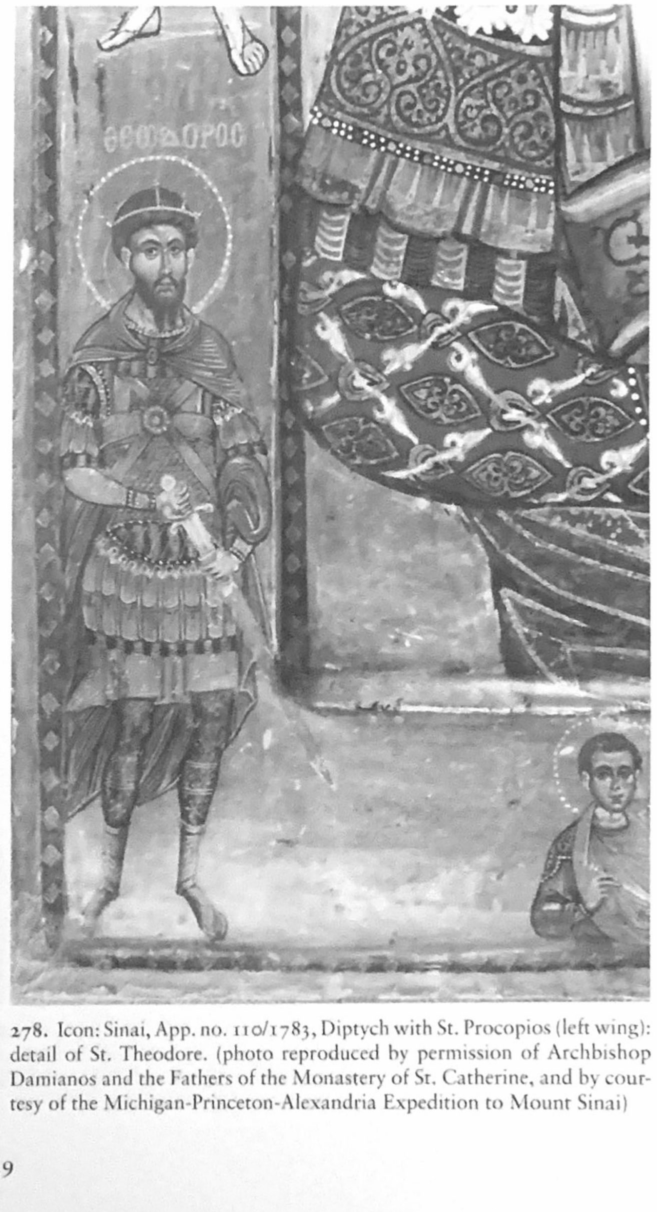
Kykkotissa, namely, the introduction of the scarlet silk veil on the Virgin's head and shoulders, and the omission of the scroll that the Virgin gives to the Child in the earlier example. Weyl Carr has, of course, discussed how that remarkable veil seems to derive from a double-sided icon from Paphos, the miracle-working icon of the Virgin *Theoskepaste* of the early thirteenth century whence it became part of the traditional imagery for the Virgin *Kykkotissa*.[559] Weyl Carr also points out that both the Paphos icon and the diptych also feature the Mother of God with her child paired with a military saint, a relatively rare combination in Byzantium.[560] We can apparently see in this program for the diptych the same interest in the imagery of holy soldiers found in the output of the earlier "Workshop of the Soldier Saints." These earlier artists also worked in a Veneto-Byzantine Crusader style in the 1260s.[561]

The inscriptions on these two panels are all in Greek, but some of the saints names are ungrammatically inscribed, and the epithet for Procopios has been read differently by Weitzmann and Aspra-Vardavakis. Sotiriou and Weitzmann read the Greek, "'ο Agios πρOKOπIOS O' πERρIBOLITEηS" even though the last word is πERρIBOLITEηS.[562] Aspra-Vardavakis, however, thinks "'ο Agios πρOKOπIOS O' πERρIBOLITEηS" is the correct interpretation.[563]

The question is whether the artist, who also incorrectly handled the spelling of some of the other inscriptions for the saints, as Aspra-Vardavakis points out, might have made a mistake in writing "πERρIBOLITEηS," but meant to inscribe "πERρIBOLITEηS." In any case, what does this inscription mean? With either version, the importance of Procopios is paramount; the issue is whether the relationship of the image of the saint to the epithet is explained primarily with regard to a famous icon of the saint in Jerusalem (Weitzmann) or primarily to Cyprus where the saint was widely venerated (Aspra-Vardavakis and Mouriki). The question can also be posed as to whether these differing interpretations have to be seen as mutually exclusive.

The iconography of the saints on the frames of the two panels is interesting from the point of view of imagery and attributes and in terms of the basic selection. Peter, for example, is remarkable because he holds in his proper left hand not only a cord from which hang his keys, but also a scroll and a cross staff. This is an unusual concentration of attributes for Peter to hold in one hand in a Byzantine icon.[564] It is remarkable that St. John the Theologian has been rendered beardless in Western fashion[565] along with Thomas, and that both standing



278. Icon: Sinai, App. no. 110/1783, Diptych with St. Procopios (left wing): detail of St. Theodore. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

soldier saints below wear notably complex and elegant parade armor. Aspra-Vardavakis also proposes that the program of saints chosen for the frame of the Procopios panel is largely based on the *synaxarion* of St. Procopios.[566] On the Virgin and Child panel, the appearance of the Virgin as a praying figure *in* the Burning Bush is new imagery, and both Weitzmann and Aspra-Vardavakis refer to its first appearance here. Moses has of course a strong Sinai link, but it is unusual for him to appear with a full dark beard as we see him here in Byzantine art, and this must be traced to Crusader images of Moses, as we saw in icons (e.g., the Crucifixion, Fig. 152, App. no. 104/1732) and in the Arsenal Bible, both works done in the Franco-Byzantine Crusader style.[567] Weitzmann notes that both Basil and Nicholas also had special chapels devoted to them at Sinai, and that both ascetics were also connected to Sinai so that therefore the Sinaitic theme was continued, despite the artist's occasional struggle to paint Byzantine costumes correctly.[568] Finally, Weitzmann noted the redundancy of having both Constantine and Helena hold a jeweled reliquary of the True Cross – which are, incidentally, decorated in precisely the same formulae as the haloes given to Mary, Jesus, and Procopios. This idea would have been acceptable for the Crusaders who were accustomed to a tradition of many reliquaries of the True Cross, but in Byzantine iconography Constantine and Helena regularly hold only one cross – the True Cross itself, not an image of a reliquary of the True Cross. He also pointed out that whereas St. Catherine holding a cross of martyrdom was a traditional Byzantine symbol, in Byzantine iconography she is not known to hold an orb as here, which seems to have been an invention of the Crusader painter to emphasize her royal status.[569] We can see, in sum, that there are numerous indications in the program that the iconography was quite unusual, prepared for a Crusader patron, and executed by a Crusader as opposed to a purely Byzantine painter.

The style of these panels also provides evidence of a Crusader painter. We can readily see in the facial types of the three main figures, in their technique and handling, strong parallels with other icons in this group. I refer to the bilateral icon of the Crucifixion and the Anastasis (Figs. 269, 270, App. no. 97/1568), as well as the iconostasis beam (Figs. 256–61, App. no. 74/1003) and the Dormition panel (Fig. 266, App. no. 87/1394), but there is also a link with earlier icons in the Veneto-Byzantine group, such as the Virgin and Child with St. John the Baptist and Moses (Fig. 194, App. no. 43/428). What distinguishes this diptych from the other examples is the precise and elegant chrysography found on most of the figures on the two panels. Chrysography is clearly an expensive and highly desireable aspect of many of the very finest icons, which we see here at its very best.[570]

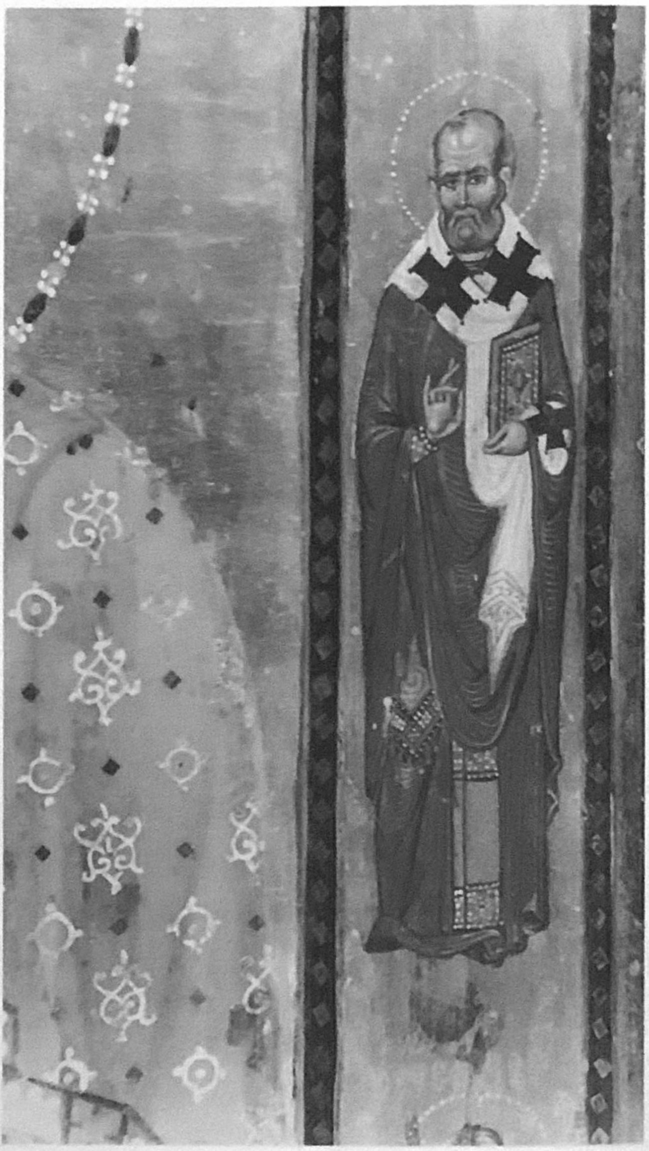
The elegant painting style found in these panels provides a remarkable example of how Crusader painting of top quality often seems to possess an "international" character, a way of bringing together many formal traditions in one work. This diptych, which more than most Crusader works suggests an artistic *lingua franca* of sorts, is characterized by links to the Veneto-Byzantine Crusader style of Acre,[571] royal Armenian style,[572] *maniera cypria* icon style linked with Syria from Cyprus,[573] and icon painting from the Monastery of St. Catherine's on Mount Sinai. Weitzmann makes his case for the Veneto-Byzantine Crusader style in his discussion of the group of icons of high quality that he groups together in the mid-1280s. He also is mindful of the Cypriot connection with the Monastery of St. Catherine's on Mount Sinai that ties this diptych to painting of the *maniera cypria*. In his view, "the affinity between our Crusader group and the Cypriote paintings can most easily be explained by assuming that a good many of the Byzantine models which the Venetian [sic= Crusader artists working in Veneto-Byzantine Crusader style] artists copied were actually works from Cyprus, which the Crusader artist may well have studied and even sometimes have copied on this island."[574] Others, however, such as G. Soteriou and D. Mouriki, think this artist is a Cypriot, and Mouriki even suggested that "it is likely that this diptych was made in one of the organized workshops in Nicosia."[575] Aspra-Vardavakis argues that the ethnic origin of the artist may explain some of the special and unusual stylistic features, and she suggests that "he was a Christian monk of Syrian origin who had some connection with Cyprus and Sinai."[576] Both Weyl Carr and Aspra-Vardavakis see links also to painting in Cilician Armenia at the royal court present here. I myself still think the notion of a "Crusader painter" working in a Veneto-Byzantine Crusader style is basic to the understanding of this icon. I also think that the various indications of Cypriot, Armenian, and even Syrian formal ties are part of the remarkably rich repertory that this artist commanded and which he was stimulated to paint in the center where he worked.

As to just where the icon may have been done, it is difficult to say. In light of the strength of the Sinaitic iconography, it is certainly possible that this project was commissioned and executed in the Monastery of St. Catherine's itself, but one could



285. Icon: Sinai, App. no. 110/1783, Diptych with the Virgin and Child *Kykkotissa* (right wing): detail of St. Nicholas. 286. Icon: Sinai, App. no. 110/1783, Diptych with the Virgin and Child *Kykkotissa* (right wing): detail of St. John Klimachus. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

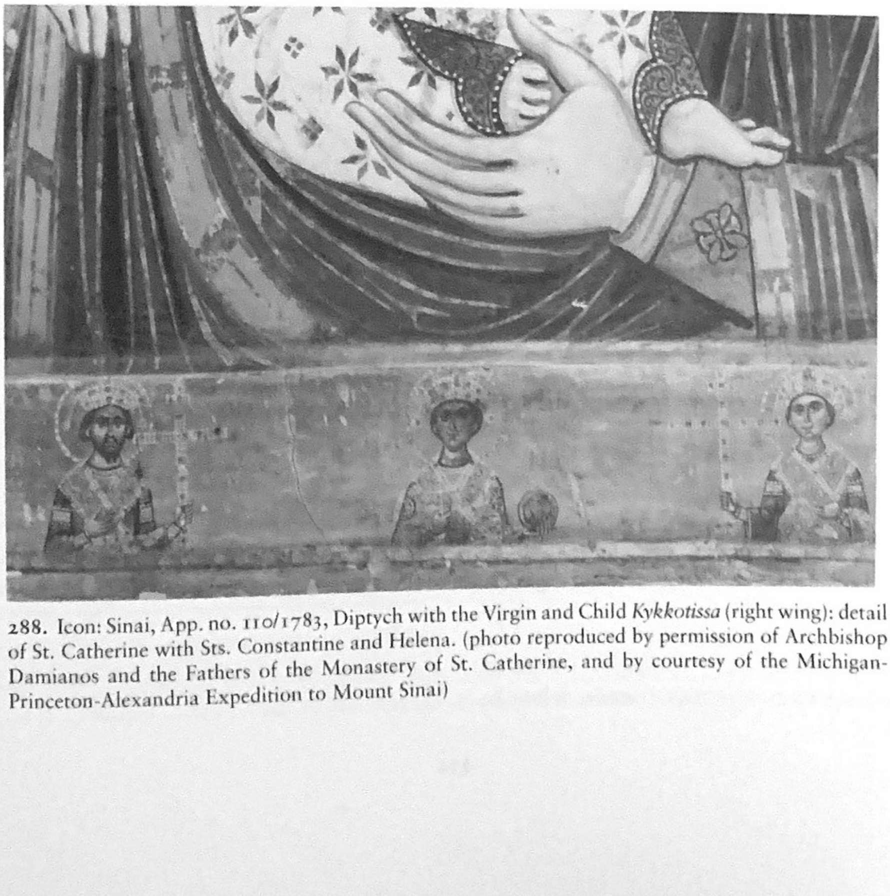
287. Icon: Sinai, App. no. 110/1783, Diptych with the Virgin and Child *Kykkotissa* (right wing): detail of St. Onouphrious. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



288. Icon: Sinai, App. no. 110/1783, Diptych with the Virgin and Child *Kykkotissa* (right wing): detail of St. Catherine with Sts. Constantine and Helena. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai) make a case for the commission being made in Acre and carried out in Sinai, or all the work being done in Acre. Unfortunately we do not have any definitive evidence to clarify these possibilities.

Sad to say, there is no documented evidence to indicate who the patron might have been, but clearly this work was done for a special commission that required work of remarkably high quality. In the absence of a documented historical figure, however, perhaps I may be permitted to speculate on who might conceiveably have ordered such an extraordinary work, linking my putative patron to the special features of the panels and their imagery. The remarkable style and unusual features of this icon suggest a special patron, who might have been Venetian. I propose to see this patron as a pious Venetian pilgrim to Sinai who was able to commission this remarkable diptych for a member of the high clergy at the Monastery of St. Catherine's. He commissions the diptych to make visual reference to the sumptuous silks that were an essential part of his business, and to Cyprus and the Armenians, where he did business from his home office and who were his trading partners, respectively. Perhaps the holy figure of Procopios was his namesake, a saint specially honored on Cyprus and honored with a famous icon in Jerusalem, the former of which was where one of his most important commercial offices was located. Perhaps he had a special devotion to the Virgin *Kykkotissa* because of the importance of this Madonna not only for himself and his family, but also because of her devotional significance to some of his most important clients on Cyprus. Perhaps this Venetian patron discovered the work of this impressive artist when visiting Acre on pilgrimage to Sinai. Perhaps this Venetian pilgrim had the diptych made as a gift for a high cleric, possibly even for the abbot himself, which he presented along with a gift of silk intended for the monks to use to decorate the tomb of St. Catherine. Whoever the patron was, this diptych is clearly one of the great accomplishments of Crusader painting in the last quarter of the thirteenth century.

The Crucifixion Icon in Veneto-Byzantine Crusader Style (Fig. 267, App. no. 9/56) and Chrysography: The diptych of St. Procopios and the Virgin and Child *Kykkotissa* (Figs. 271–88, App. no. 110/1783) is, as we have just mentioned, one of the most famous of the works done in what Weitzmann has called the Veneto-Byzantine (Crusader) style, but there is one more work, comparatively little-known, that belongs to this group of high-quality icons. The diptych is linked with this other icon also in terms of its elegant Veneto-Byzantine Crusader style. It is a handsome image of the Crucifixion (Fig. 267, App. no. 9/56).[577] Besides the style of the figures, it is the chrysography that also ties these two works together. However, consider first the iconography of this Crucifixion icon.

A slender image of Christ is crucified on a strongly beveled cross. It is a three-nail crucifixion and the figure of Jesus has unusually long arms. His loincloth with the familiar pointed fold on the left side characteristic of this group – see also the Crucifixion on the bilateral icon (Figs. 269, 270, App. no. 97/1568) – is a rich deep blue with elegant chrysography. St. John to the right stands in the usual pose of mourning, but his sorrow is emphasized by the expression of his knitted brows and the sharp inclination of his head. To the left the Virgin swoons, held up by two female friends, while behind her Mary Magdalene has bared her breast and throws her hands in the air in grief. The heightened emotional temperature of this icon is completed by the dramatic gestures of the diminutive flying angels above the cross. Despite the luxurious high quality of the icon, it is somewhat incongruous to note that the usual inscriptions in Greek were apparently written somewhat later in a not very accomplished, not to say messy, hand.

Mouriki notes the characteristic Crusader features of the iconography, as well as the typical white dot on red circle haloes for the main holy figures and the golden lozenges on a black ground for the outer frame. The other special feature she refers to is "the chrysography on the loincloth of Christ and on the garments of the Virgin and John," "elements which may be attributed to a Venetian atelier."[578] I assume that she meant by this a Crusader atelier in which the artist was working in a Veneto-Byzantine Crusader style.

The issue of the chrysography seen here and in the diptych discussed previously is important because it links a number of important icons of very high quality from the 1280s together. In Figure 267, the chrysography is notable as a linear patterned network that covers the loincloth of Jesus and the garments of the Virgin and St. John. There does not seem to be any idea of a consistent light source, nor does the golden highlighting follow the three-dimensional contours of the body. Rather it has its own designs, which follow the flow of the drapery and also articulate the parts of the body to some extent. The forms of the chrysography include both small triangular patches and broad elongated swatches from which thin linear rays spread and flow in various directions. As the chrysography lays evenly over the drapery, it tends to flatten it out.

On the diptych in Figures 271–88, the chrysography appears in two versions. The larger version is found on the figures of the Virgin and St. Procopios, where gold highlighting selectively appears on her maphorion and his cloak; it is composed of comparatively thick linear elements with few larger geometric elements. In general the linear gold highlights flow with the drapery, cover the surface, and tend to flatten rather than model the figures. There is no chrysography on the Child Jesus except on his scarlet red harness, where certain triangular swatches are visible. The smaller or finer version of the golden highlighting is found on the garments of most of the saints who appear on the frames. Only the Virgin *n tns Batou*, St. John the Baptist, and the two ascetics, John Klimachus and Onouphrios, have none. The chrysography on the rest of the figures, visible especially on Sts. Peter and Paul, John the Theologian and Thomas, and Moses, Basil, and Nicholas, is the same elegant linear network with slender swatches and small triangular patches found in Figure 267.

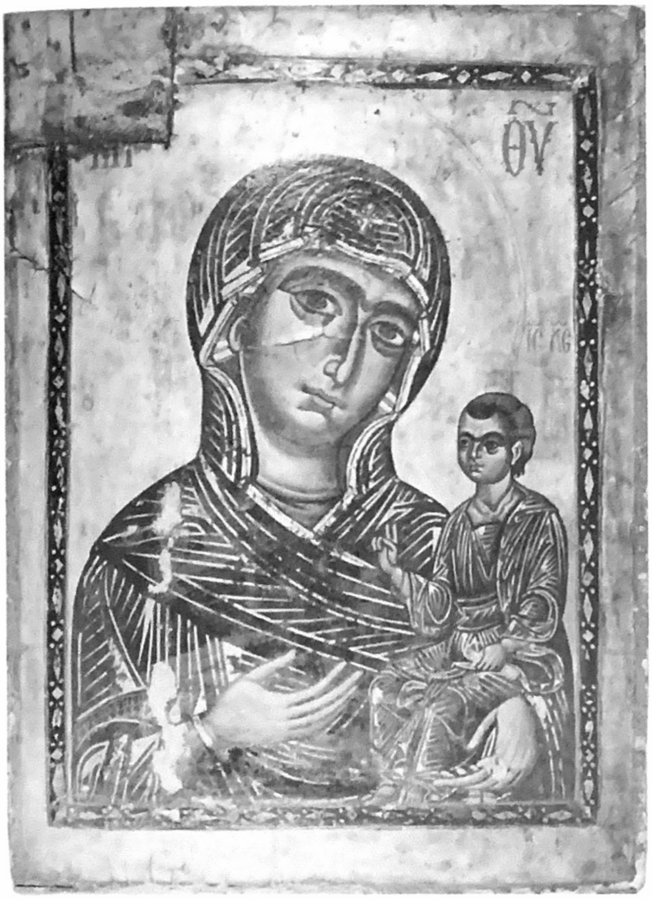
The other icon with well-executed chrysography is the Dormition icon (Fig. 266, App. no. 87/1394). This mode of ethereal highlighting is found here on the garments of Jesus, on the cloth covering his hands, on the footstool below the bier, and on the borders of the silk hanging on the bier. This chrysography is interesting because on the garments of Jesus in this case, it seems to reinforce the three-dimensional modeling of his body, while also articulating its parts. This technique seems to be one hallmark of a workshop that had artists working in the Veneto-Byzantine style of the very highest quality on these three icons at least.

Relatively few Crusader icons display any chrysography, which is an expensive luxury technique, usually appearing only on icons of very special quality. In most cases, white highlights would be used with perhaps gold hems indicated for certain important figures, as seen in the earlier icon of the Virgin and Child with St. John the Baptist and Moses (Fig. 194, App. no. 43/428). On the iconostasis beam (Figs. 256–61, App. no. 74/1003), no gold is used but the highlights are rendered in white and pastels of the basic color of the garment in shapes that sometimes resemble the patterns of chrysography. On in the bilateral icon (Figs. 269, 270, App. no. 97/1568) is there rich highlighting, but no chrysography.

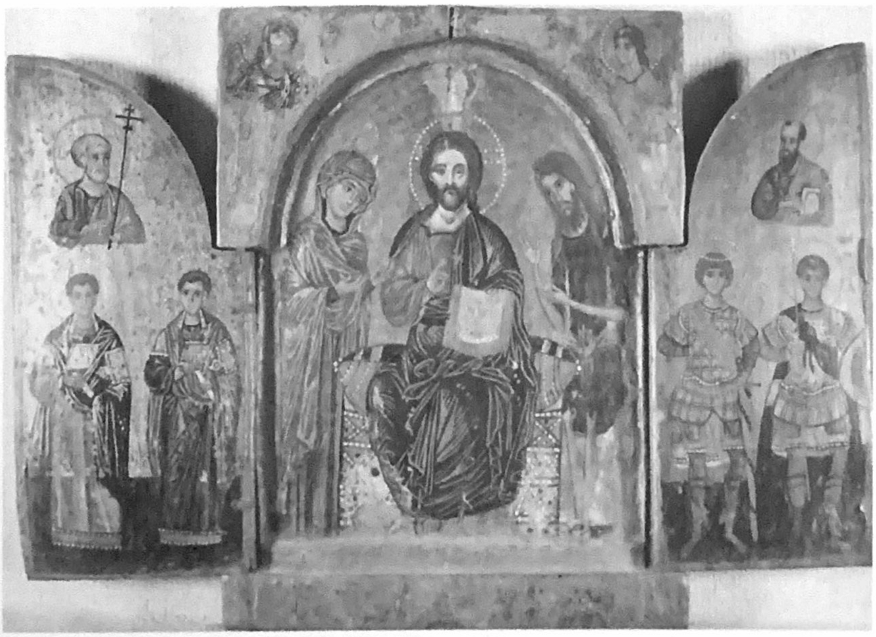
Among the few Crusader icons at Sinai that display genuine or simulated chrysography, we can mention the following:

Crusader icons with chrysography:

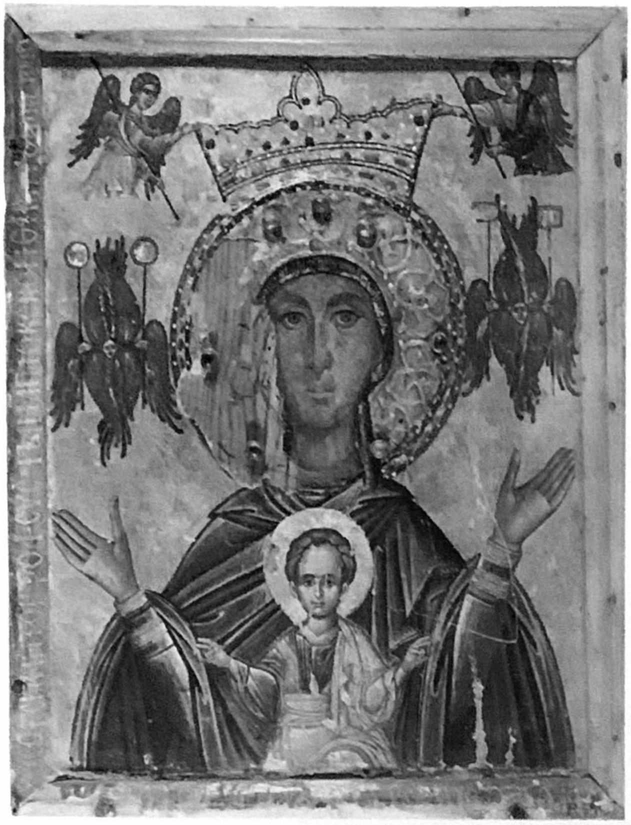
1. Virgin Hodegetria (Fig. 289, COLOR PL. 10, App. no. 22/200), garments of both Virgin and Child.[579]
2. Deësis Triptych with Saints on the wings (Fig. 290, App. no. 28/248), vigorous chrysography but somewhat undisciplined.
3. Virgin and Child Blacherniotissa (Fig. 291, App. no. 42/427), chrysography on the coif only, otherwise simulated on the highlights of the drapery.
4. St. Catherine (Fig. 292, App. no. 53/581), very damaged.
5. Virgin Galaktotrophousa (Fig. 293, App. no. 59/710), with chrysography on the Virgin's maphorion under the veil (parts repainted ?).
6. The Acre Triptych (Fig. 156, App. no. 66/753), on the Christ Child of the central panel only.
7. Simeon with Jesus (Fig. 294, App. no. 84/1352) (partly repainted ?).
8. Virgin Galaktotrophousa (Fig. 295, App. no. 100/1680), with chrysography on the Virgin's garment under the veil (parts repainted ?).



289. Icon: Sinai, App. no. 22/200, Panel with bust-length Virgin Hodegetria and striking chrysography. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai) See COLOR PL. 11.



290. Icon: Sinai, App. no. 28/248, Triptych with the Deësis on the central panel and two angels on the spandrel of the arch, and four standing and two bust-length saints on the interior surfaces of the wings. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



291. Icon: Sinai, App. no. 42/427, Panel with the bust-length Virgin and Child *Blacherniotissa*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

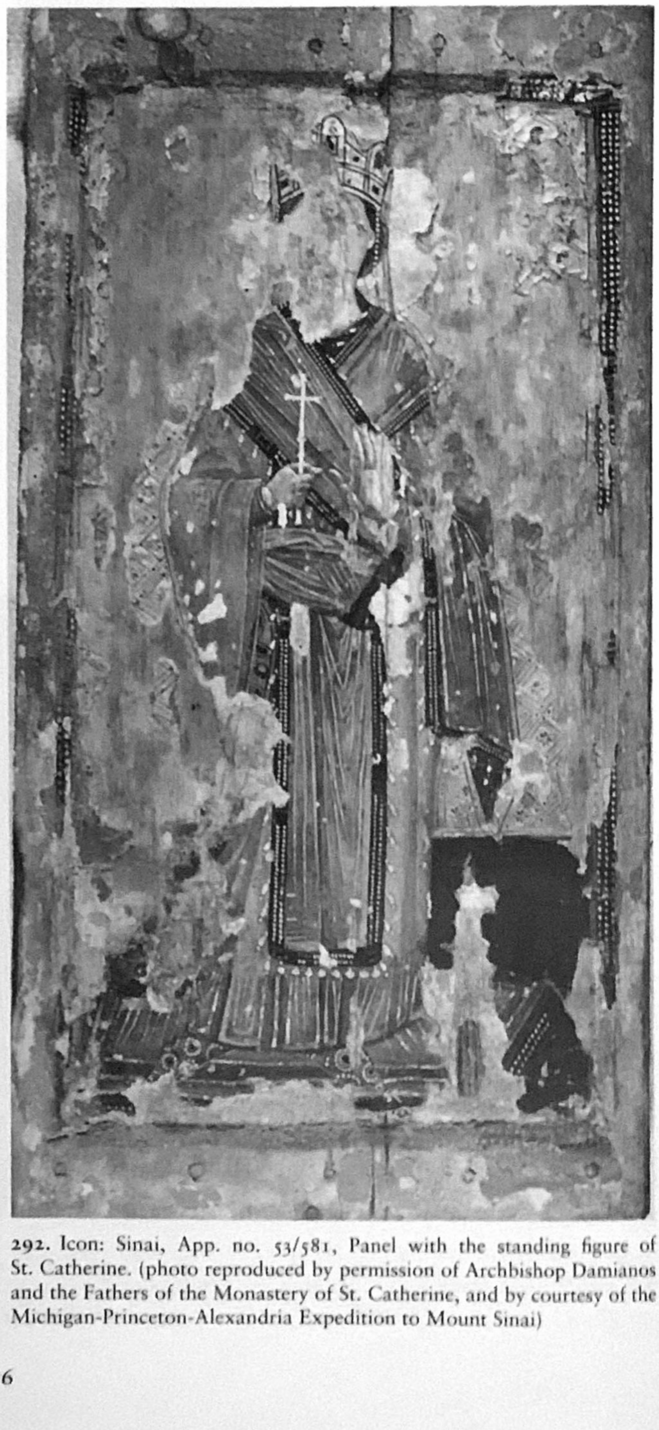
9. Two Mounted Soldier Saints: George and Theodore (Fig. 74, App. no. 94/1463), with chrysography on their garments and cloaks.
10. Dormition (Fig. 296, App. no. 103/1731), very splotchy chrysography (?).

Simulated Chrysography:

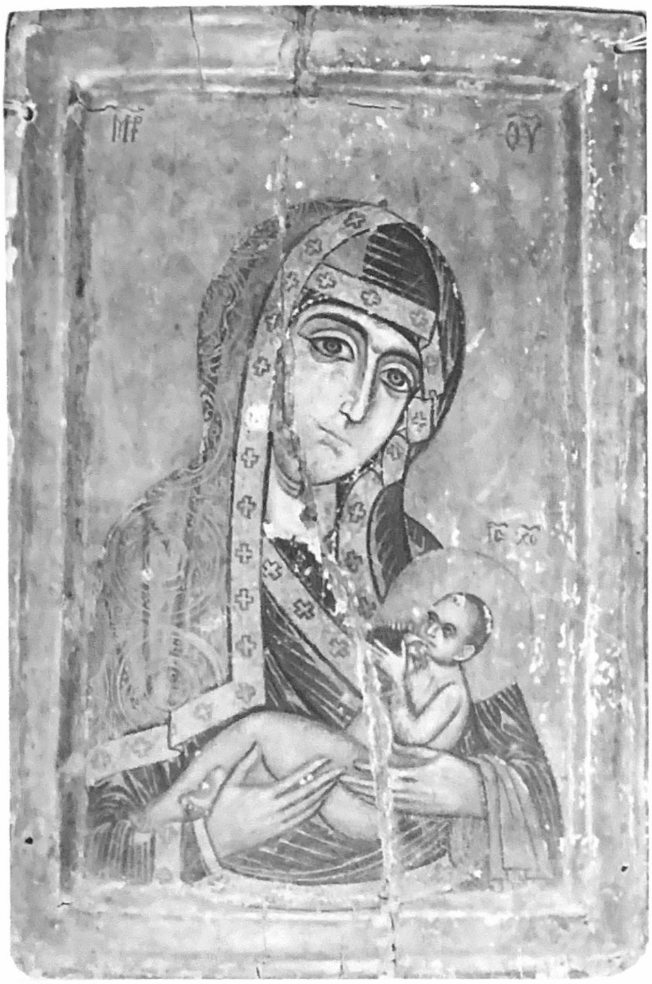
1. *Maestas Domini* (Fig. 51, App. 34/no. 308), with red chrysography-like highlights on Christ's cloak.
2. Virgin Hodegetria (Fig. 297, App. no. 56/671), chrysography simulated on the Virgin's garments (repainted).
3. Crucifixion icon (Fig. 298, App. no. 61/729), with chrysography-like yellow highlights only visible on the angels wings,
4. Christ Pantokrator (Fig. 130, App. no. 77/1025), with very sketchy, what appears to be simulated chrysography.
5. Intercessing Angel Gabriel (Fig. 124, App. no. 121/1998), simulated patterns on the right-side garment and along the top of the wings.

It is interesting in looking at this group of icons that most of them are Crusader icons done in one or other version of the Italo-Byzantine Crusader style. It is not possible to date most of them very specifically, with the exceptions of the *Maestas Domini* (Fig. 51, App. no. 34/308), the Acre Triptych (Figs. 155–62, App. no. 66/753), and Sts. George and Theodore (Fig. 74, App. no. 94/1463), all discussed earlier. However, all of the icons appear to date in the thirteenth century, and mostly the second half of the thirteenth century, although in some cases important later repainting must be taken into account in evaluating their original date. It is notable, however, that even on the well-known and important Acre Triptych, which has work done by three Crusader artists, the chrysography is on the central panel only, done in an Italo-Byzantine Crusader style by an artist with links to Tuscany where chrysography appears on the image of the Christ Child. Thus the use of chrysography in the Crusader East seems to be a feature of artists in workshops that employ the Italo-Byzantine Crusader style, and the very best examples are done by artists working in a Veneto-Byzantine Crusader style.

With this in mind it is remarkable that certain icons and fresco painting done in the *maniera cypria* on Cyprus in the years around 1200 and in the last quarter of the thirteenth century also demonstrate the use of equally sophisticated chrysography.



292. Icon: Sinai, App. no. 53/581, Panel with the standing figure of St. Catherine. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



293. Icon: Sinai, App. no. 59/710, Panel with the bust-length veiled Virgin and Child *Galaktotrophousa.* (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

With these icons it is not a question of works done in Acre or in the Monastery of St. Catherine's on Mount Sinai. They are all works done, so far as we know, in Cyprus. Consider the following well-known works:

From the twelfth century we have these works:

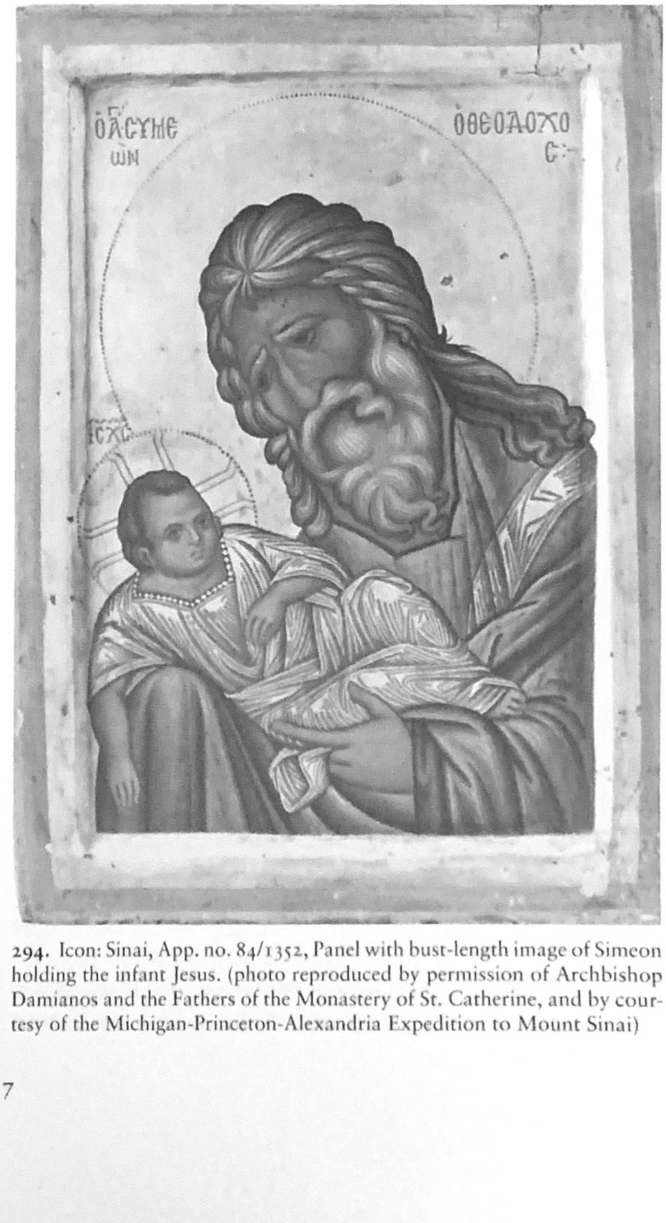
1. The Virgin *Eleousa*, from the Church of the Panagia Chrysaliniotissa in Nicosia, *c.*1100–50.[580]
2. The Virgin *Arakiotissa*, from the Church of the Panagia tou Arakos Lagoudera, c.1192.[581]
3. The Virgin and Child, from the Church of the Panagia Theoskepasti, Kato Paphos, c.1200.[582]

These icons demonstrate that use of chrysography was well-known in certain important icons made on Cyprus already by 1200.

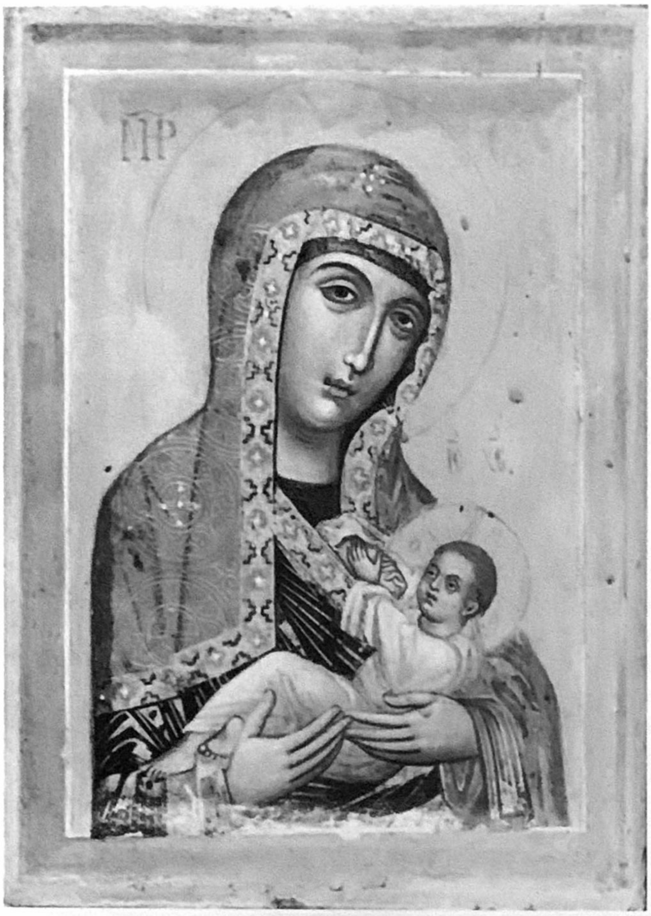
There are also several important icons, both Orthodox and Crusader, with impressive chrysography done on Cyprus in the second half of the thirteenth century:

1. The Virgin of *Kykkos*, from the Church of the Panagia *Kivotos* in Agios Theodoros, *c.* late thirteenth century.[583]
2. The Virgin Hodegetria in a fresco of the Church of the Panagia at Moutoullas, 1280.[584]
3. The Crusader icon of St. Nicholas from the Church of Agios Nikolaos tis Steyis, Kakopetria, c.1280s, done for the Ravendel family (Fig. 343).[585]
4. The Crusader icon of the Golden Virgin and Child Enthroned, from the Church of Agios Kassianos, Nicosia, c.1284–90, done for the Carmelites (Fig. 344).[586]

The other interesting parallels to these works are found in the Kahn and Mellon Madonnas, both now in the National Gallery of Art in Washington, DC. I have argued elsewhere that the Kahn Madonna (Fig. 299) was done in Constantinople c.1260,[587] and that the Mellon Madonna (Fig. 300, App. no. 132) may represent a version of the *maniera cypria* executed by a Crusader artist of Italian heritage and Byzantine training working c.1280.[588] One of the features of this remarkable work, besides its extraordinary colorism, and the throne curved at the back, which seems to be an iconographical reference to the Throne of Solomon, is surely the lavish chrysography that falls on the garments of the Virgin and Jesus, and on the cushion and the footstool of the throne. In the character of its chrysography I have argued that the Mellon Madonna relates to the altarpiece of St. Nicholas from Kakopetria (listed above as no. 3 under the thirteenth-century works).[589] We would also note that the gold ground above the throne, including the haloes



294. Icon: Sinai, App. no. 84/1352, Panel with bust-length image of Simeon holding the infant Jesus. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



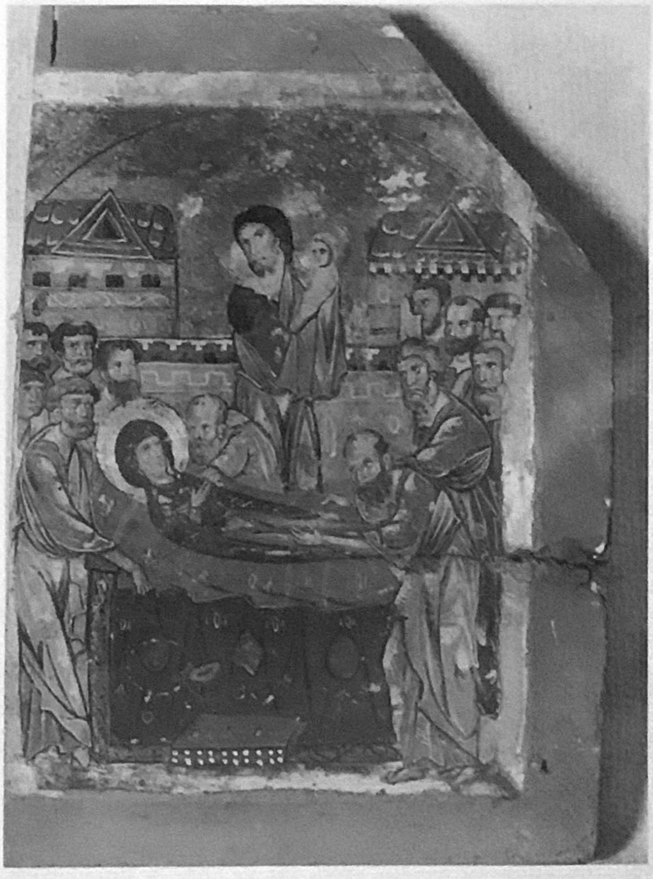
295. Icon: Sinai, App. no. 100/1680, Panel with the veiled Virgin and Child *Galaktotrophousa*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

of the Virgin and Child, and the angels in their medallions are all modern restorations, with incised decoration on the Virgin's halo modeled on Italian work of a slightly later date (*c.*1300 ff.). However, noting the parallel in the chrysography between this icon and the two contemporary altarpieces now in the Icon Museum in Nicosia – those of St. Nicholas and the Golden Madonna (Figs. 343, 344) – we might also wonder whether originally the haloes of the Virgin and Christ were not executed in raised gesso and gilded, as we see it in these other handsome examples. Whatever we may eventually determine about this possibility, it appears that the Mellon Madonna forms part of the flourishing development of Crusader icon painting on Cyprus in the later thirteenth century, which is closely related to the Crusader icons done in a Veneto-Byzantine Crusader style in Acre and/or St. Catherine's Monastery on Mount Sinai in the 1280s.

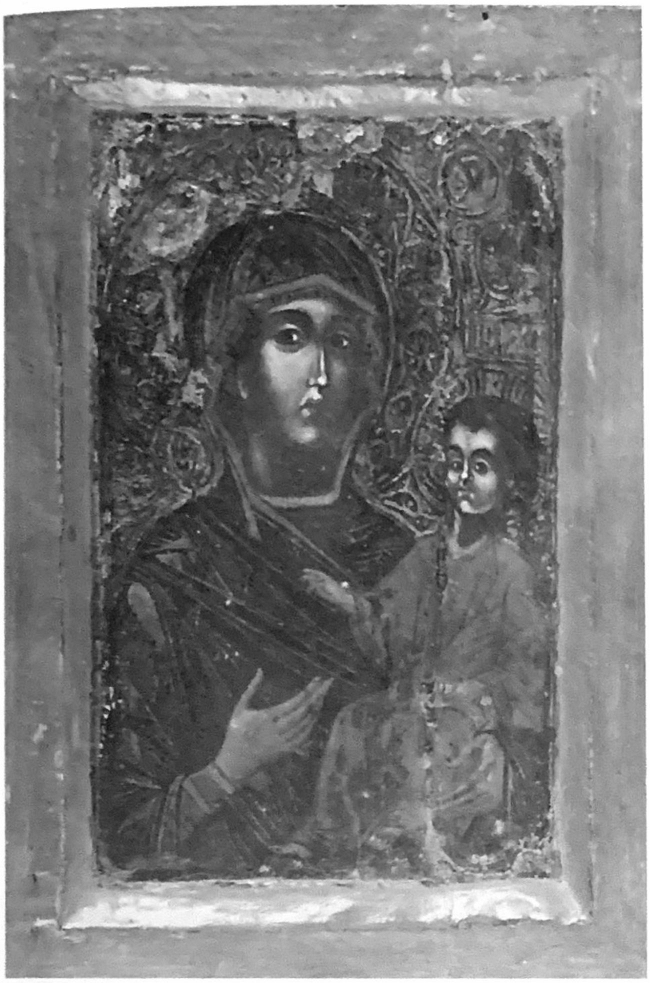
The Later Group of Icons in the Veneto-Byzantine Crusader Style: Besides the extraordinarily high-quality icons of the diptych with St. Procopios and the Virgin *Kykkotissa* (Figs. 271–88, App. no. 110/1783), the bilateral icon with the Crucifixion and the Anastasis (Figs. 269, 270, App. no. 97/1568), the iconostasis beam (Figs. 256–61, App. no. 74/1003), and the Dormition (Fig. 266, App. no. 87/1394), there is another group of icons also loosely linked to the Veneto-Byzantine Crusader style at about the same time. We noted earlier when discussing the icon of St. Antipas (Fig. 268, App. no. 98/1645) that his figure style and the style of his draperies were distinctive and that they relate to another group of icons, which we might characterize as both of mixed quality and more painterly and less linear in their handling. They seem to have been done by a series of different painters who may have all worked in the same workshop in Acre, or in a very closely related set of workshops.

The icons that belong to this group of works that were apparently done in the 1280s are the following:

1. Panel with Two Standing Figures: Aaron and Moses (Fig. 209, App. no. 12/76).[590]
2. Triptych with the Deësis in the center, and three Saints on each inner wing (Fig. 290, App. no. 28/248).[591]
3. St. Nicholas (bust length) with Christ and the Virgin above (central panel of a triptych) (Fig. 301, App. no. 41/408).[592]
4. Panel with the Transfiguration (Fig. 302, App. no. 64/742).[593]
5. Panel with Three Standing Figures: Ephrem, John the Evangelist, and Daniel (Fig. 303, App. no. 80/1144).[594]
6. Triptych with the Deësis and seven standing Saints on the central panel, and the Annunciation on the inner wings (Figs. 304–6, App. no. 81/1177).[595]
7. The Virgin and St. John, panels for a painted Cross (Figs. 307, 308, App. nos. 82/1207, 83/1208).[596]
8. Panel with Three Standing Patriarchs: Abraham, Isaac, and Jacob (Fig. 309, App. no. 92/1453).[597]



296. Icon: Sinai, App. no. 103/1731, Fragmentary panel with the image of the Dormition. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



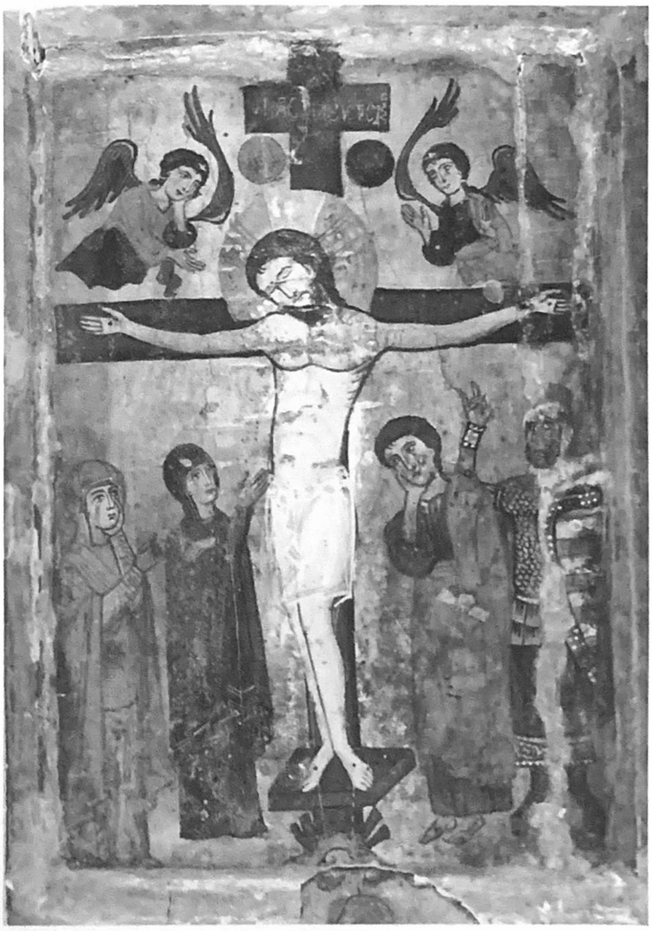
297. Icon: Sinai, App. no. 56/671, Panel with bust-length image of the Virgin and Child *Hodegetria*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

9. Panel with the Virgin and Child *n tns Batou*, with St. Stephen, and a youthful, beardless haloed figure in tunic and cloak, holding a scroll (Fig. 310, App. no. 95/1482).[598]
10. Standing Figures on Triptych Wings (?): Aaron and Moses (Fig. 311, App. no. 115/1857).[599]
11. Panel with the Three Hebrews with the Angel of the Lord above (Fig. 312, App. no. 119/1966).[600]

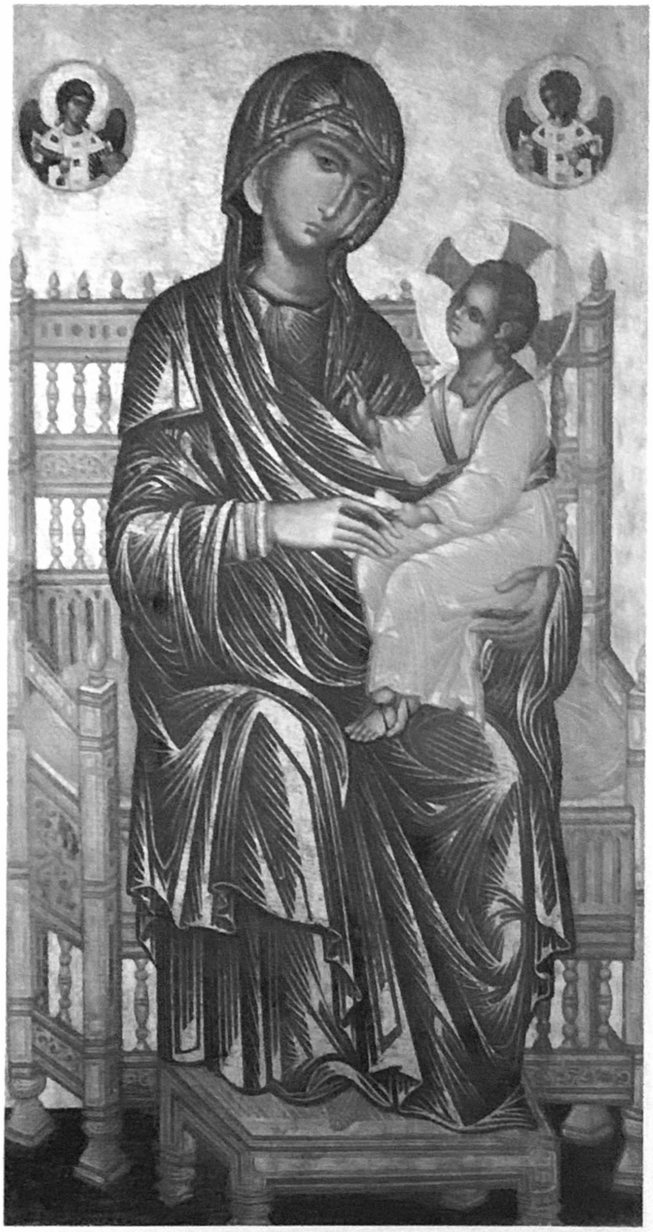
This is obviously a large and variegated group, including icons of very mixed quality, but I think the panels are stylistically, formally linked together, however loosely in some cases. Mouriki included a few of these icons as a subgroup of the Veneto-Byzantine style work related to what Weitzmann called the "Master of the Knights Templar," what we are now calling the "Master of the Soldier Saints."[601] It is much less clear who the artists are and where the panels may have been painted.

The core of this group of icons consists of a series of panels with Old Testament figures, including Abraham, Isaac, Jacob, Moses, Aaron, and the Three Hebrews. The icon with the three patriarchs, Abraham, Isaac, and Jacob (Fig. 309), is an excellent example, with important characteristics that pertain to the group to which it belongs and to the tradition of its earlier predecessors in the Veneto-Byzantine Crusader style. In terms of the linear definition of the faces and heads, the proportions of the figures, the handling of the draperies, and the white dot on red (or black) circle haloes, this panel relates to earlier icons from the 1260s such as the Sts. Catherine and Marina (Fig. 195, App. no. 90/1418), as well as certain other examples such as Sts. Sergios and Bacchus (Fig. 313) and possibly the panel with the Virgin and Child *n tns Batou* with Sts. Nicholas and Basil (Fig. 314). However, what differentiates these three Old Testament figures from those earlier versions of the style are strongly defined draperies with dark outlines and fold lines with vigorously decorative patterns on the draperies partly consisting of firmly rendered highlights with triangular and streak or ray patterns across the surface zones, and the unusual employment of white dot highlighting as a decorative motif. We find the white dots arranged mostly three in a row placed along outlines and fold lines or inserted on the surface of parts of the drapery for enrichment. They are mostly positioned vertically with a few horizontal or diagonal exceptions. They strike a note of elegance that links the white dot haloes with the body of the holy figure, which is unique to this group of icons.

Other panels in this group show the work of what appear to be different painters, but they all use a closely related version of this type of drapery style with the decorative white dot highlighting. For example, the panel with the figures of Aaron and the youthful, beardless Moses (Fig. 311) shows



298. Icon: Sinai, App. no. 61/729, Panel with the image of the Crucifixion. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

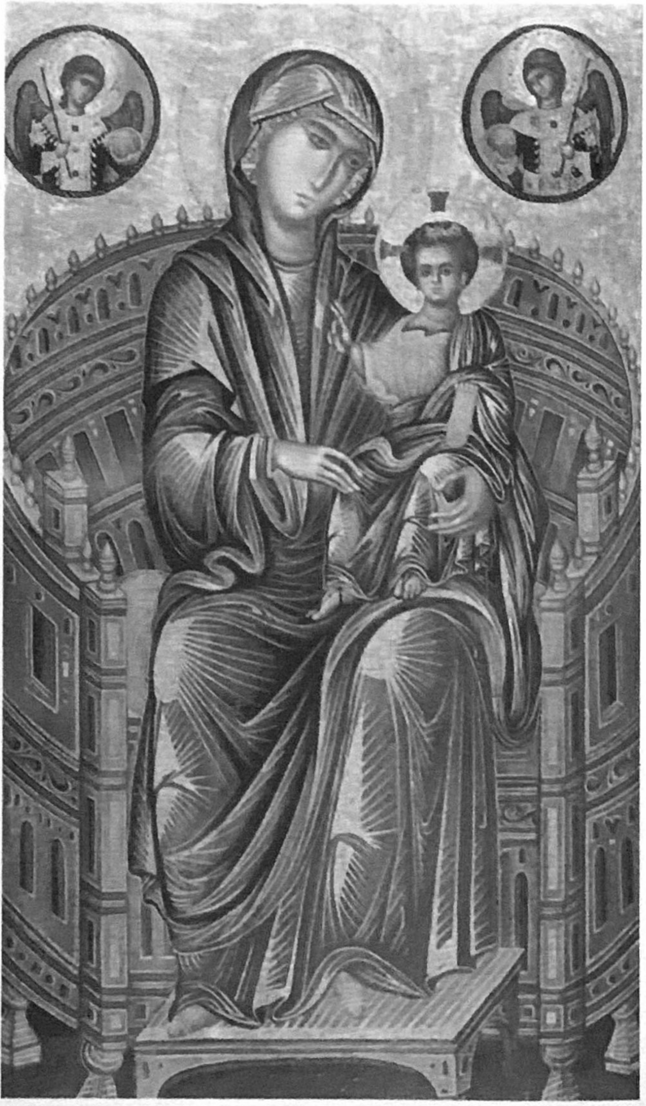


299. Icon: National Gallery of Art, Washington, D.C., App. no. 132, the Kahn Madonna. (photo by courtesy of the National Gallery of Art, Washington, D.C.)

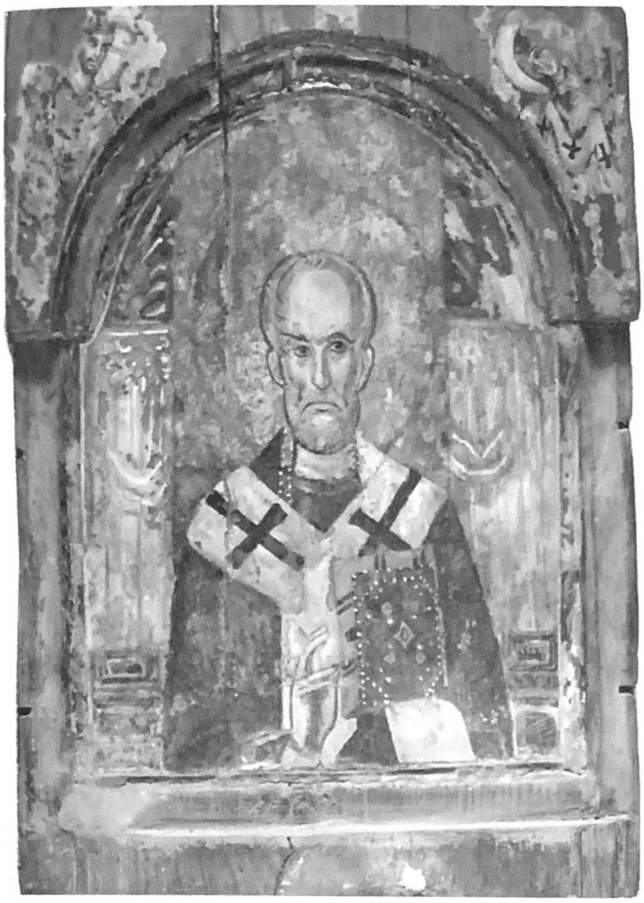
figures with slightly different proportions – larger heads, hands, and feet – but very similar drapery style that includes, especially on Moses, the white dot highlighting. Although these two figures do not have the white dot on red circle haloes seen on the three Patriarchs (Fig. 309), they do share with the three Old Testament figures the same vigorous if lightly applied painted linear highlights on the faces and necks. Another related work is the icon with the standing frontal figures of Ephrem, John the Evangelist, and Daniel (Fig. 303). This unusual grouping of holy figures must have been commissioned for some special reason, but the style of the three figures is very comparable to the three Old Testament figures (Fig. 309). The differences are that there are only red circle haloes on no. 1144 (Fig. 303) and that the three figures all hold their hands differently, whereas on no. 1453 (Fig. 309) they all bless in the "Western" manner. Ephrem holds a cross in his proper right hand, whereas John is blessing in the Western manner, but Daniel blesses in the Greek manner. This is indeed unusual iconography, which may pertain to the mixed Latin and Orthodox for which this icon was intended.

A fourth icon is that of the Three Hebrews with the angel of God above (Fig. 312). Here the figures again have very robust drapery with strongly defined highlights, some of which include the white dot variety arranged vertically. These are contrasted with the cape over the central figure, which is bright red with the three-white-dot decoration in triangular designs as a decorative motif. The painting of these faces seems simpler with less highlighting, but the use of the Acre convention for the definition of the eyes is ably followed.

Finally we can examine two different versions of this style as exemplified by a set of panels including the Virgin and St. John (Figs. 307, 308) executed for a crucifix and a small panel with Aaron and Moses (Fig. 209). In the first case, we see two figures rather more broadly proportioned and rendered in a more painterly style with nonetheless drapery designed and executed in a manner very comparable to what we found in the



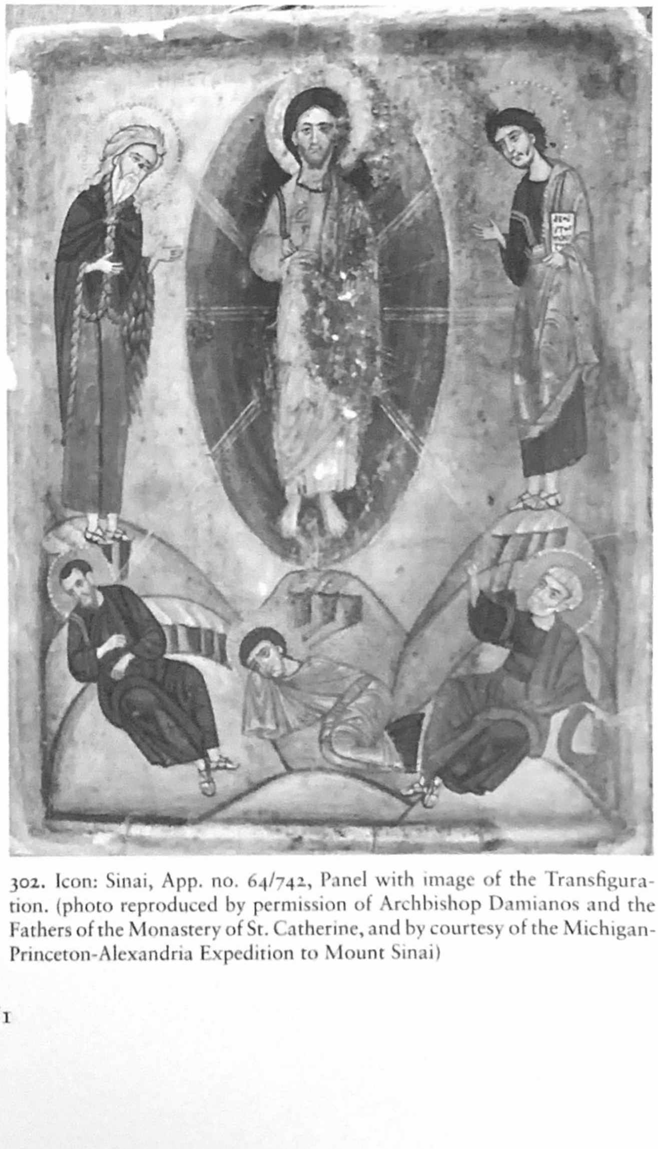
300. Icon: National Gallery of Art, Washington, D.C., App. no. 133, the Mellon Madonna. (photo by courtesy of the National Gallery of Art, Washington, D.C.)



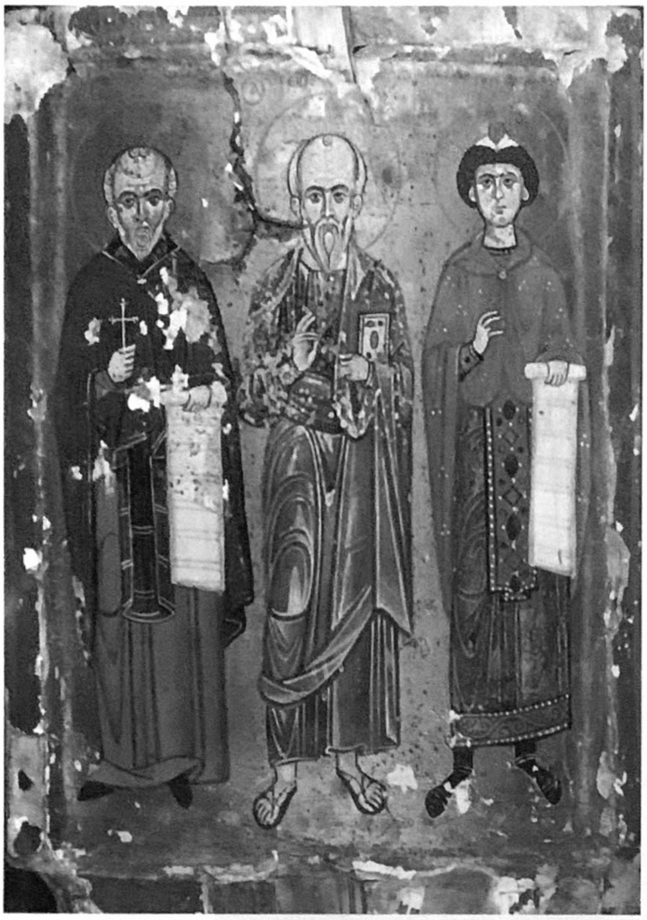
301. Icon: Sinai, App. no. 41/408, Central Panel from a Triptych with bust-length image of St. Nicholas and diminutive images of Christ and the Virgin above. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

icon with the three Old Testament figures (Fig. 309) and the two wings with Aaron and Moses (Fig. 311). The Virgin and John both have white dot on red circle haloes as we see with in Fig. 309, but are somewhat broader in conception like the figures in Fig. 311, but in their colorism and in their breadth and painterly bulk, Mary and John exceed the other panels in this group. Mary, for example, wears somber colors of brown-maroon over dark blue green and no highlights. John is in pastel colors with vigorous highlights and liberal use of the white dot decoration mostly in a vertical configuration. What distinguishes these two figures from other figures on the icons in this group is the handling and especially the shading of the faces. Mary and John have longer, bulkier noses and deep shading down their faces below the eyes. In the case of John, this produces a distinctive triangular effect not duplicated on the other panels. The large outlines, generous proportions, and vigorous fold lines – and highlights on John's drapery – as well as painterly highlights on their faces give these two figures a more folksy look perhaps than the other icons in this group. Clearly they must have belonged to an impressive painted crucifix for which the image of Christ has now been lost.[602] This must have been an interesting commission because the other painted crucifixes known from the collection of icons in the Monastery of St. Catherine's on Mount Sinai are quite small.[603] These figures of Mary and John are more in the spirit of the painted crucifixes with figures in side fields, which form such an important part of dugento Italian painting.[604] What is unusual about these panels, in contrast to the side panel figures or the panel figures placed at the ends of the cross arm of the cross on Italian crucifixions, is that they have floral carved wood sculptural decoration along both sides of each panel.

The other panel of interest to us for this group is one that Weitzmann commented on in 1963, a small icon only 20 cm high that contains very impressively painted figures of Aaron and Moses (Fig. 209). This panel stands at one extreme among the works in our group, because although it is painted in the same vigorously highlighted style, quite painterly and even quite three-dimensional in the volumetric representation of these two figures, it does not exhibit the use of either the white dot highlighting explicitly or the white dot on red circle haloes so frequently found otherwise. It does include some passages of the brocade design we referred to earlier, however, thereby linking it to yet another cross-section of the icons at Sinai. Moreover Weitzmann observed, "there is something particularly impressive about the Moses figures of our group, all of which have a passionate and soulful look in their eyes."[605] In making this reference he was comparing this Moses to what I have dated as earlier examples of this Veneto-Byzantine Crusader style. However, this diminutive Moses is very impressive, very finely painted in a hand that could also easily be at home in the small-scale work required in miniature painting.



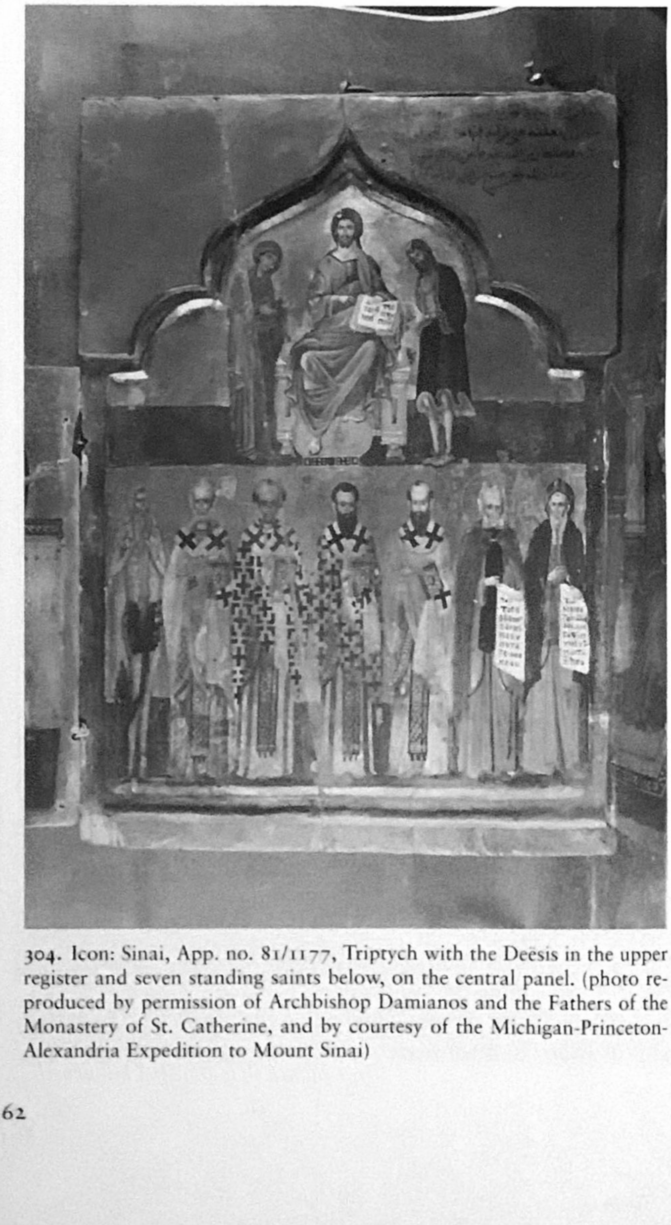
302. Icon: Sinai, App. no. 64/742, Panel with image of the Transfiguration. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



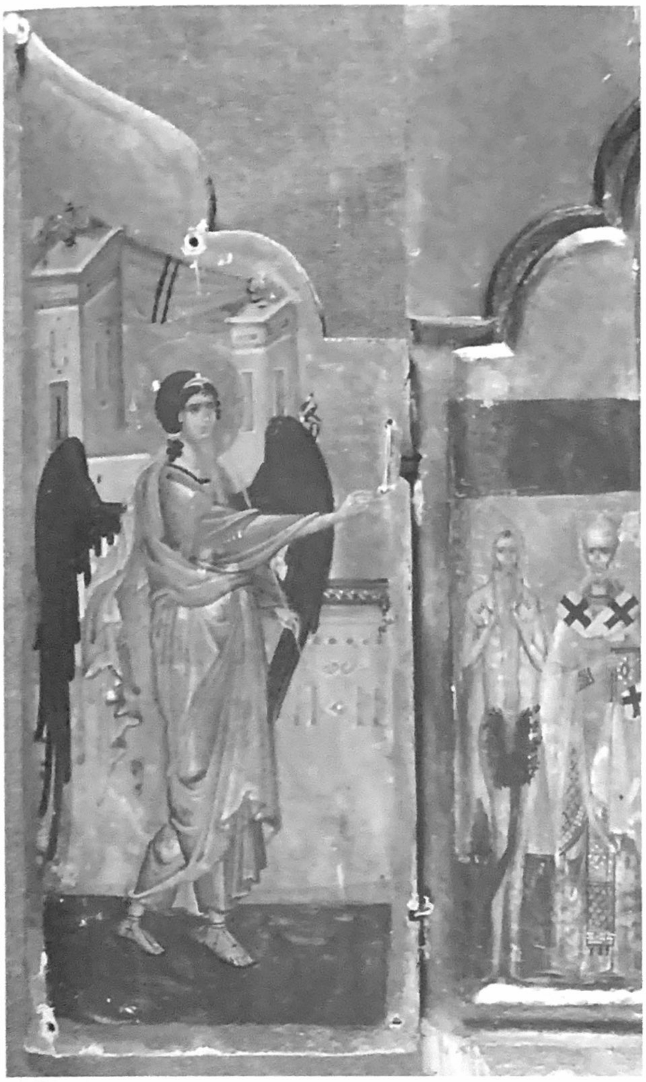
303. Icon: Sinai, App. no. 80/1144, Panel with images of three standing holy figures: Ephrem, John the Evangelist, and Daniel. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

The other panels that appear to belong to this group are more loosely related to the main formal characteristics as exhibited by the panel of the three Old Testament figures (Fig. 309), and they will need to be evaluated further when the opportunity to examine them firsthand can be realized. At this point I would only call attention to one of these panels because of certain unusual features. The image of the Virgin *n tns Batou* with two standing beardless saints (Fig. 310) is interesting for several reasons. Although we have seen several other similar panels with this Sinaitic iconography of the Virgin all probably done for personal devotional use, dating earlier, this icon has some new features not seen previously. Among the earlier panels we have introduced, there is the Virgin and Child with Moses, Elijah and St. Gregory Nazianzen (Fig. 182, App. no. 7/54) in the Franco-Byzantine Crusader style from the 1250s, and the Virgin and Child with St. John the Baptist and Moses (Fig. 194, App. no. 43/428) in the Veneto-Byzantine Crusader style from the 1260s, as two excellent examples for *comparanda*.

The choice of saints standing with the Virgin and Child in Figure 310 is unusual in the person of St. Stephan to the left and unclear because of the lack of inscription to identify the equally youthful and beardless figure at the right. The style of these figures follows in the tradition of the Veneto-Byzantine Crusader style, as does the format of the representation, with the Virgin standing on a formal podium or footstool, as in Figure 194. However, the details of the handling of the figures are plainly different and feature greater elongation, tiny heads, hands, and feet, and a somewhat crowded composition, with more room for the saint to the left than for the figure to the right. What is of the greatest interest, however, is the extensive tooling done to the frame of the icon, in the form of large and small medallions with floral decorations on the front surface, and the punch work to the inner beveled surface, the haloes of the three large figures – but not Jesus – with punch work on the outer ring and vine scroll floral motifs on the inner parts, and a low wall dado zone behind the figures with lozenge and punch work decoration. We have noted already how interested some artists were in producing icons with raised gesso decorations, as for example, with the Virgin and Child and three saints (Fig. 182, App. no. 7/54) referred to earlier. However, this is the first time we find incised and punched work decoration as here. This is interesting with reference to the production of icon painting of course, but it is also interesting with regard to the flourishing metalwork trade, which produced exquisite pieces such as the Freer Canteen from the mid-thirteenth century and the Freer d'Arenberg Basin from the 1240s, as well as the famous Baptistère de Saint Louis (Fig. 323) dated variously from the last third of the thirteenth century to the early fourteenth century.[606] These remarkable brass objects as top quality



304. Icon: Sinai, App. no. 81/1177, Triptych with the Deësis in the upper register and seven standing saints below, on the central panel. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

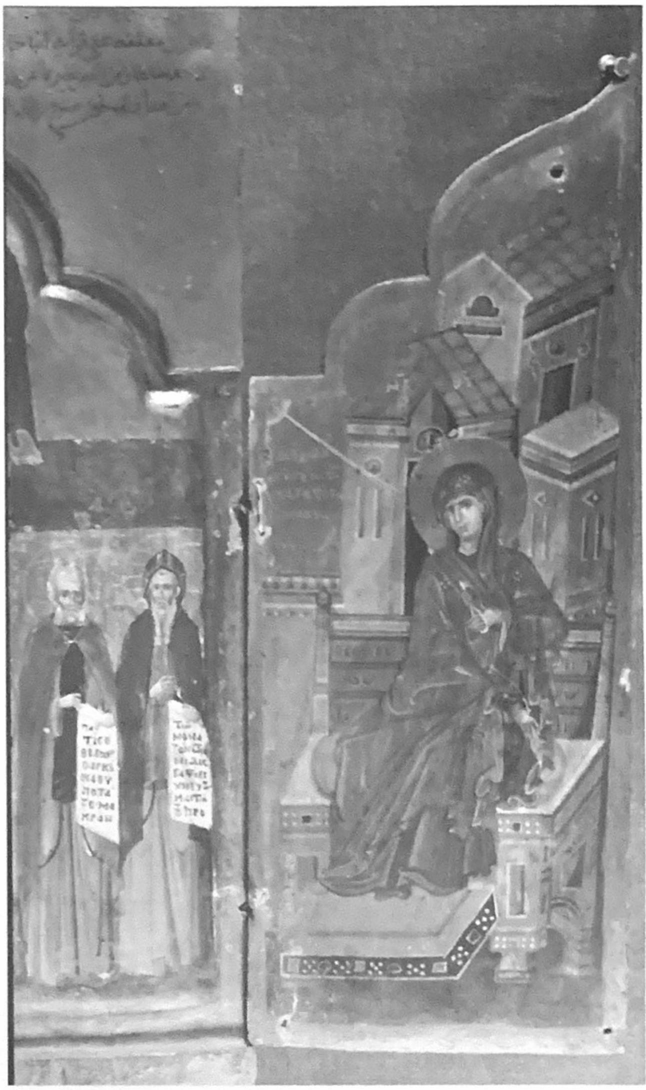


305. Icon: Sinai, App. no. 81/1177, Triptych with the angel Gabriel of the Annunciation on the left inner wing. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

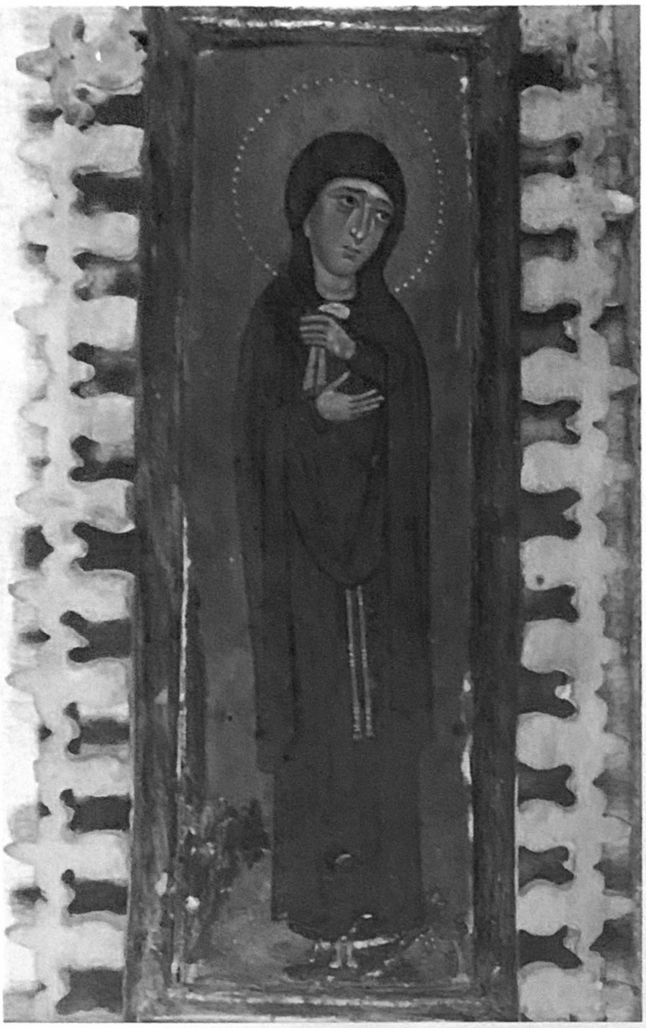
examples of what artistic metalwork was being produced feature incised decoration that is *mutatis mutandis* comparable to the effect that the artist of this icon was attempting to create. We may wonder what the relationship may be between the icon and the metalwork, but there is no doubt that the metalwork was being produced contemporaneously. The question, of course, is, is this tooled work on the panel contemporary with this icon, the painting for which was presumably done about 1275 or 1280? Detailed study and careful firsthand examination will be necessary to determine whether the incision and punchwork were done at the same time or might have been done later.[607]

The other, final work (Figs. 304–6) worth commenting on among these icon paintings is a remarkable triptych, which has a complex and what might at first glance might appear to be a much later shaped frame, no. 1177.[608] On the central panel it has a Deësis group with Christ seated on a very substantial carpentered bench throne. He is dressed in bright red with a medium blue cloak! The Virgin and St. John are in darker colors: Mary in blue green and dark red; John in a dark blue hairshirt. Below we see seven ecclesiastical saints including, left to right, Onouphrius, Nicholas, John Chrysostom, Basil in the center, Gregory of Nyssa, Sabas, and Anthony; so, two ascetics, two bishops, and three doctors of the Church. On the inner wings we find the Annunciation set against architectural backgrounds, with a tall and very elegant angel Gabriel in pastel orange over green, advancing slowly and gesturing at the left. Mary is seated at the right also on a substantial wooden throne with a straight back; she is envelopped in a cascade of drapery, wearing red over a green undergarment!

The very painterly style of this handsome triptych is obviously only distantly related to the Veneto-Byzantine Crusader style of the other icons grouped together as described, but this icon is worthy of mention for three reasons. First, it too has incised and punched decoration on the central panel, only on the haloes of the holy figures. Second, the shape of the triptych with its complex pointed arch forms is most unusual among these icons, which are almost uniformly some kind of rectangular panel. Judged by Western standards this type of arch suggests



306. Icon: Sinai, App. no. 81/1177, Triptych with the Virgin of the Annunciation on the right inner wing. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



307. Icon: Sinai, App. no. 82/1207, Fragmentary panel of the Virgin for a painted cross. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

later developments in the progress of panel painting in Europe or in the Gothic architecture of Venice.[609] Here in the Crusader East, however, this type of arch is already present in metalwork from the middle of the thirteenth century, as we see especially in the famous Freer basin as well as in the fine metalwork candlestick from Syria, now in the Musée des Arts Décoratifs.[610] Third, the style is very painterly and appears to be strongly influenced by Palaeologan painting, but it is not clear just when it might date. Very tentatively we propose an attribution to the last quarter of the thirteenth century, mindful of the questions raised earlier with regard to all three features.

Conclusions

It is evident from our discussion of the icons that major changes occurred in the production of "Crusader" icons during the years from 1268 to 1289. Despite the interest in French and Franco-Byzantine Crusader styles in manuscript illumination during this period, in icon painting we find very few examples. As we have seen it is overwhelmingly the Veneto-Byzantine Crusader style that dominates and forms the focus of production on several levels: on the level of major icons of high quality and large format, on the level of the high-quality icons of small format, and on the level of good-quality icons of small or medium format. It is notable furthermore that three of the icons in Veneto-Byzantine Crusader style that appear to date from the period 1268–89 rank among the very finest panel paintings we have among the "Western-influenced" group, namely the large Diptych with St. Procopius and the Virgin Kykkotissa (Figs. 271–288, App. no. 110/1783), the large bilateral processional icon with the Crucifixion and the Anastasis (Figs. 269 and 270, App. no. 97/1568), and the iconostasis beam (Figs. 256–61, App. no. 74/1003). Finally we notice that whereas the interest in small-sized panels presumably for devotional use continues, the commissions for icons of military saints drop off precipitously.

Our findings indicate that icon painting continues to exhibit iconographical links to Sinai, with the production of a number of works including the Virgin and Child *n tns Batou* and saints and holy men connected with Mount Sinai. However, compared to the period 1250–68, these links seem less strong. By contrast the emergence of the Veneto-Byzantine Crusader high style seems to be a very important development growing out of the work done in this style before 1268. These features make the attribution of works to Acre or Sinai even more

difficult than before 1268. Presumably production continued in both places, but it is very problematic to decide on where any particular icon was done as yet.

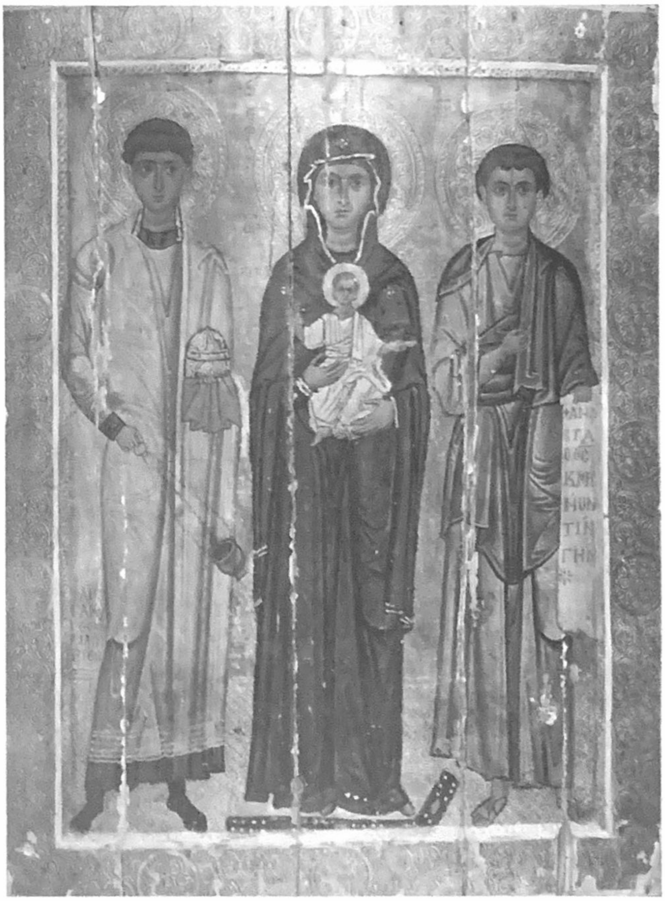
The fact that some of the icons in Veneto-Byzantine Crusader style seem to have ties to other traditions such as are found on Cyprus and the icon painting of the *maniera cypria* and Armenian manuscript illumination also suggests that as manuscript illumination grew more Franco-centric, the icon painting was becoming more cosmopolitan and more representative of artistic ideas in the Near East. Finally, the rich development of the Veneto-Byzantine Crusader style in these later years also raises questions about the relationship of panel painting in Venice, where very little has survived from the second half of the thirteenth century, and these icon paintings from Acre and Sinai, where Crusader artists with certain ties to Venice were painting numerous and, in some cases, exceptional works. The prominence of the Veneto-Byzantine Crusader style in these later years parallels the prominence of the Venetians in terms of commerce and economic power in Acre at this time. This suggests that many of these icons, if not most, were done in Acre. There is also the likelihood that some Venetian pilgrims to Sinai may account for some of these icons, and we shall look for future research to shed light on their role as patrons of these paintings.

COINS AND SEALS

Coins

In the previous period, 1244–68, we found relatively few new coin types issued by the royal mint or by feudal lords. Not surprisingly this situation does not much change during the years 1268 to 1289. Acre seems to have continued to have issued a full range of coin denominations through this period. That means a full gamut from "copper pougeoises and pieforts, to billon deniers, both Islamic and Latin-type dirhams, and imitative Islamic gold dinars."[611] However, even so royal and princely coinage was relatively meager and by comparison, baronial coinages "seem scanty" according to John Porteous.[612] Even though, or perhaps because there were no major new royal coin types introduced during this period, there was an increase in the circulation of coins from abroad. The coins of Cyprus play a role of growing importance. Coins from Italy and the kingdom of Sicily are also widely available.

Among the coins minted by feudal lords of the Latin Kingdom and those from the other Crusader States, we can mention two developments. The lords of Montfort controlled Tyre during this period; they issued copper deniers until the death of John of Montfort in 1283.[613] Philip of Montfort (1243–70)



310. Icon: Sinai, App. no. 95/1482, Panel with standing figures of the Virgin and Child "n tns batou," St. Stephen, and an unidentified youthful male saint. minted two types of coppers, one with a Gothic tower that we have seen previously and one with a temple façade. The latter has been interpreted as the great cathedral of Tyre with its four famous columns, St. Mary of the Sepulcher of Our Lady of Tyre.[614] John of Montfort (1270–83) continued this latter type. When Antioch fell in 1268, obviously its Crusader coinage ended, but Bohemond VI (1252–75), who carried on in Tripoli, succeeded by his son Bohemond VII (1275–87), produced what have been characterized as the finest Crusader coins in this period. At Tripoli there are two new types of coins to consider. (We have already discussed in Chapter 6 the controversial *Agnus Dei bezant*, which may have also been struck by Bohemond VI during his reign.)[615] There is the silver *gros* and the half-*gros*, with different types issued by Bohemond VI (Fig. 315) and Bohemond VII (Fig. 316).[616] Much controversy surrounds the relationship between these Tripolitan *gros* types and the new *gros tournois* initiated by Louis IX in France in 1266, as we have discussed in Chapter 6. As we noted there, Porteous thinks "the possibility has to be taken seriously that the larger Tripolitan *gros* was the prototype for the *gros tournois* and not vice versa."[617] As for the Tripolitan silver *gros*, the star *gros* of Bohemond VI is an extremely handsome coin, one of the finest from the Crusader States in the thirteenth century (Fig. 315). Porteous thinks the silver *gros* issued by Bohemond VII is even finer (Fig. 316). He says, "the castle coins of Bohemond VII, whose design, the castle and the cross, is so traditional to crusader coinage and so symbolic of crusading life, are among the finest of all the coins ever struck by the Franks in Syria and Palestine." He goes on. "They are also the last. Part of their beauty today lies in the fact that they mostly survive in fine condition. They were not in circulation for long before Tripoli surrendered to the onslaught of the Mamluks" in 1289. Finally, he concludes, numismatically speaking, "Tripoli is the only one of the Latin states which went down with its colors flying."[618]

Whatever we may think of the aesthetic merits of the Tripolitan *gros* compared to the coppers of Tyre issued in these years between 1268 and 1289, one thing is certain. The motifs of a Gothic tower symbolizing the fortifications of Tyre, a temple façade symbolizing the Cathedral of Tyre, and a massive three-tower castle symbolizing the fortications of Tripoli are entirely in keeping with the established mainstream of Crusader coin design. Starting in the twelfth century with the royal issues containing images of the Holy Sepulcher or the Tower of David, the Crusaders showed great partiality toward architectural imagery on their coinage. This tradition is given a final manifestation with these coins from Tyre and Tripoli in the late thirteenth century.

Seals

In the case of the seals from the years 1268–89,[619] the military orders have a certain continuity in their issues, unlike the royal

seals, and there are no new institutional types employed by the Hospitallers or the Templars, neither for the master nor for the convent.[620] One slight change is noted in the Hospitaller masters seal of Nicholas de Lorgne (1277–85), however (Fig. 317). We find under the patriarchal cross on the obverse a representation of the skull of Adam has been added. King explains this imagery as follows:

> The addition of the skull of Adam beneath the patriarchal cross is a reference to the famous medieval legend concerning the origin of the Holy Cross. The story runs that Adam was buried in the cavern beneath the hill of Golgotha, and that Seth placed in his mouth a seed, brought from Paradise. So out of the skull of Adam grew the tree from which the Holy Cross was afterwards made. The tree on Lebanon survived the flood, and was cut down by Solomon, and used in the construction of the Temple bridge. Here in ignorance of its sacred destiny it was trampled underfoot by men, until the Queen of Sheba came and recognized and adored it. At the crucifixion the tree, now become the Holy Cross, was once more planted on Golgotha over Adam's skull, on to which it is said that our Saviour's blood fell through an earthquake chasm in the rock.[621]

This story, which is told in the Golden Legend, by Jacobus de Voragine, written sometime before 1267, may have now made its way to the Holy Land.[622] Here in Acre, the Hospitaller master, Nicholas of Lorgne, apparently embellished his seal with the skull of Adam, giving additional depth to the imagery of the Hospitallers with the representation of the True Cross. When the Hospitallers were installed in their great hospice before Jerusalem was lost in 1244, they were located across from the Church of the Holy Sepulcher, where the shrine of Calvary and the great relic of the True Cross was found. It is not clear why Nicholas de Lorgne had the skull of Adam introduced on his seal.

With regard to the Templars, the extant seal used by Guillaume de Beaujeu in 1286 depicts the Dome of the Rock on the obverse with the inscription, "+ : S TVBE TEMPLI XPI :" (Fig. 318b).[623] It is a traditional type for the Templars, once again directing our attention to architectural motifs established in the twelfth century, in this case used by Templar masters stretching back to Bertrand de Blanquefort (1156–69). The

316. Tripoli: silver castle *gros* of Bohemond VII. (photo from Hazard, Harry W. and Norman P. Zacour, *A History of the Crusades*, vol. VI, copyright 1990, reprinted by permission of the University of Wisconsin Press)

contre-sceau for Guillaume de Beaujeu contains his personal arms, *d'or au lion de sable, armé et lampassé de gueules*, and the inscription, "+ S' : FRATRIS : G : BELLI : IOCI" (Fig. 318a).[624]

The seal type of the grand master of the Teutonic Knights varied, but the basic imagery was focused on the important cult image of the Virgin and Child enthroned. There exists a good example on an act dated 27 June 1286 that carries the inscription, ": S. MAGRI. HOSPIT. SCE. MARIE. TEVT. IRLM" (Fig. 319). The Virgin and Child sit on a carpentered rectangular back throne. The Virgin holds the child seated on her proper left knee. He blesses and she holds a scepter topped with a fleur-de-lis.[625] This iconography is interesting and timely in light of icons of the Virgin and Child enthroned from approximately this same time, such as the Mellon Madonna. Even though the specific iconography is different, the basic image of the Virgin and Child enthroned is a comparable variant to this important imagery in the Crusader East in the latter part of the thirteenth century.[626]

Compared to the orders, the patriarchs of Jerusalem employed more varied seals in the thirteenth century, which could depict a scene from the Holy Sepulcher, such as the Holy Women at the Tomb, or a patriarch enthroned, or, as was the case with Thomas Agni de Lentino (1272–7), the seal could carry their personal coat of arms (Fig. 320).[627] Otherwise there are very few examples of seals from the high clergy of the various surviving bishoprics in the Crusader States. Only the seal of the archbishop of Tyre, Bonacours de Gloire (1277–90), exists from the final years of the Latin Kingdom as an image of the fortified city, a very typical Crusader architectural type (Fig. 321).[628]

The royal seals of Charles of Anjou follow those of his brother, Louis IX, in type and appear with inscriptions designating him as the king of Jerusalem and Sicily as follows: "KAROLVS. SCDS. DEI. GRA. REX. IERL'M. SICIL'." For his successor as king of Jerusalem, Henry II of Cyprus, we have only a notarial description of the seal taken from an act dated in January of 1286 from Nicosia. By this act Henry founded a daily requiem Mass for his uncle, Baldwin of Ibelin, in the Church of Saint Sophia.[629]

Although few seals from the patriarchs or the bishops of Acre survive from the thirteenth century, we do have a seal from a relocated order in Acre that is extant during the reign of Adam (1281–9), abbot of the Augustinian canons of Notre Dame of Mount Sion. This handsome lead seal combines the

320. Acre: seal of the patriarch of Jerusalem, Thomas of Lentino. (photo: after Paoli, *Codice Diplomatico*)

iconography of the two major events associated with Mount Sion, namely the descent of the Holy Spirit on the Apostles at Pentecost on the obverse, with the Dormition of the Virgin on the reverse.[630] The inscriptions are very handsomely done and well-preserved (Fig. 322): Obv.: "+ SIGILL' SPC. SCI. DE. MO'TE. SYO." R.: "+ TRANSITVS. DEI. GENITRICIS :." The scenes are clear but quite abbreviated due to the comparatively small size of the seal.

There is also the seal of an abbot of the *Templum Domini* of Jerusalem relocated to Acre. It belongs to Martin Gobbé, one of the delegates sent in June 1286 to Eudes Poilechien by the king of Cyprus on the momentous occasion when King Henry demanded that the citadel of Acre be turned over to him. On this seal *en navette* we find a frontal image of the abbot standing holding his crozier and carrying a book. The inscription reads "+ S. MARTI. ABBIS. SACRL. TEPLI. DNI. I. IHRLV."[631]

It is evident that during this period there are many more seals extant from ecclesiastical sources, including the military orders, than there are from royal or aristocratic figures. This is a somewhat unexpected reversal of what we found to be the case with the seals during the preceding period, 1244–50 to 1268, discussed in Chapter 6, and a reversal of what we find, for example, in the production of illustrated manuscripts between 1268 and 1289, but it simply underscores the fragmentary survivals in both media. It may be that the number of surviving examples decreases as we move closer to 1291, but be that as it may, we hope to identify more extant examples in both categories as research continues. Once again, as in the preceding period, the design of the seals is rather conservative, but the work is high-quality. Unlike in those earlier years, we cannot obviously discern any particular growth in the Italian influence, which becomes so important for the icons, as distinct from the French influence, which plays such a major role with regard to the manuscripts. Indeed, were we only to look at the imagery of these seals as our only source of knowledge about the art of the Crusaders in the Holy Land for the period 1268–89, we might well remark on the colonial nature of the work, which shows remarkably little impact from the Near Eastern circumstances of the Crusaders, other than what the inscriptions refer to. The situation is much different with regard to the icons, some of the manuscripts, and much of what survives in the minor arts.

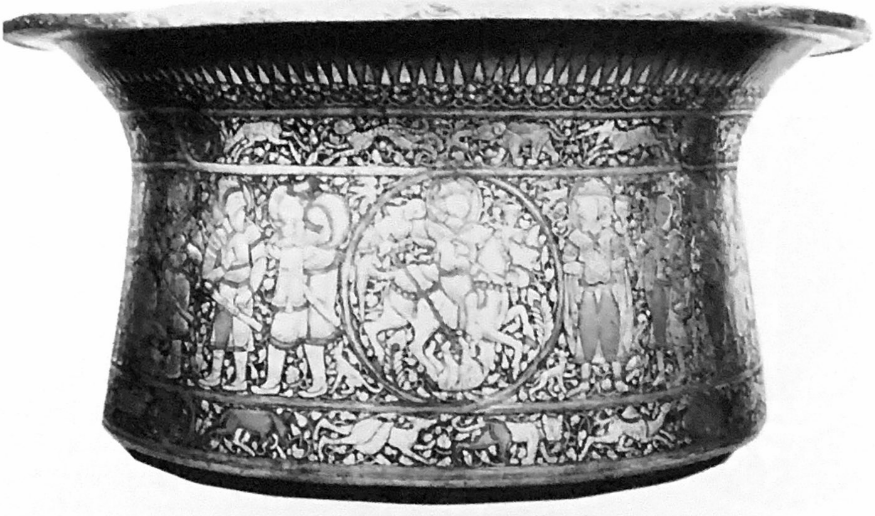
CRUSADER MINOR ARTS

In his remarkable study entitled, *Les Monuments des Croisés*, Camille Enlart focused mainly on architecture as his subtitle indicated, *Architecture religieuse et civile*. He published hardly any minor arts other than metalwork, and most of that was from the twelfth century.[632] Earlier scholars had paid more attention to the minor arts, but again mostly from the twelfth century, especially Hans Prutz.[633] It has only been since Near Eastern archaeological work in the medieval area has flourished in the second half of the twentieth century that more works have been discovered and interest has grown. Hence, certain recent works have placed a great deal more emphasis on the minor arts, especially B. Kühnel, *Crusader Art of the Twelfth Century: A Geographical, an Historical, or an Art Historical Notion?*, who also obviously focuses on the twelfth century, and A. Boas, who of course approaches his Crusader material as an archaeologist and not an art historian, but deals with both the twelfth and thirteenth centuries.[634]

Looking for the minor arts such as metalwork, glass, pottery, and textiles in the late thirteenth century, even though we might expect this period to be rich with plentiful examples, we are hard-pressed to find works precisely dated to the years 1268–89 that can be linked directly with the Crusaders. Obviously, partly this situation is due to the destruction that follows the defeat of the Crusaders in 1291, and partly this is due to the fact that with the loss of Crusader holdings between 1268



323. Syria: Paris, Louvre, *Baptistère de Saint Louis*. (photo: after Esin Atil, *Renaissance of Islam: Art of the Mamluks*)

to 1289, there were fewer venues for trade and manufacture under Crusader control. Nonetheless there are important indications of production in Levantine markets not controlled by Crusaders but accessible to them, for which important works were done.

Metalwork

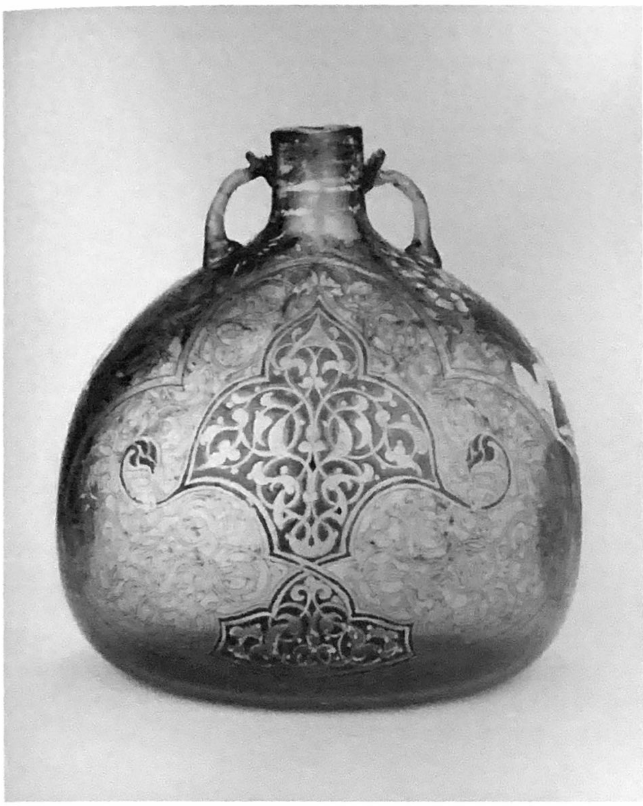
Just as we have found in the years after 1250, few religious objects in metalwork, glass, or pottery can be identified with direct Crusader connections between 1268 and 1289 from the Holy Land, at least as yet. It is likely that some pilgrim's ampullae may date from this time, but precise dating is difficult.[635] In the West, there is documented reference to over twenty relics of the True Cross dated between 1268 and 1289, but none of these can be directly linked to metalwork or ivory carving made in the Holy Land.[636]

However, just as we saw in the period 1244 to 1268, there exists a considerable market for secular objects, that is, metal vessels, as well as glass and fine pottery that are part of a luxury commodities trade in the Levantine marketplace. For these objects, a few were no doubt done to meet specific commissions, but most were done in such a way as to appeal to the consumer in the marketplace, including Christians and Muslims, whoever they were.[637]

Clearly the most remarkable example of high art metalwork, obviously done for a specific Muslim client whom we no longer know, by a master named Muhammad ibn al-Zayn, who signed the work six times but did not date it, is the famous *Baptistère de Saint Louis* now in the Louvre (L.P. 16) (Fig. 323).[638] Until recently scholars have generally dated this work in the years around 1300, that is, *c.*1290 to 1310, but since 1989 there has been one proposal to date the Baptistère to the reign of Baybars I (1260–77) and one to date it in the 1340s.[639] Although we do not know for sure whether it was done before 1289 or 1291, it is certainly possible. Nonetheless, it is one of the great masterpieces of metalwork from the Levant at this time and can serve as a standard of the very best work that was done by Mamluk artists for the Levantine market. It is a basin covered with engraved designs inlaid with gold and silver. The basin depicts many scenes of court life, hunting, and battles. It is particularly interesting for the detailed representations it provides of arms and armor, Mamluk and possibly other blazons, contemporary Muslim and other Near Eastern costumes, animals and special objects. Although it is clearly done by a Mamluk artisan whose name we know, and its association with St. Louis and the French royal family is a completely post-medieval development,[640] it is still a remarkable masterpiece of metalwork belonging to the same tradition as the Freer Canteen and the Freer basin, referred to in Chapter 6 as similar but slightly earlier examples of Levantine luxury goods production. The recent proposals that this work may date to the reign of Baybars I (1260–77), that the original coats of arms may have been intended for a European patron or recipient, and that some of the figures depicted are Mongols are all worth further serious consideration.[641]

On the basis of the *Baptistère de Saint Louis*, we might be led to think that the production of these metalwork objects with figural scenes and even Christian imagery was a growth industry, with promise for expansion in the future. However, Oleg Grabar has characterized the *Baptistère* as a "major exception" at the time of its manufacture in terms of its representational repertoire, and one that belongs to Muslim private art. We may, therefore, do well to heed his caution about overemphasizing the cross-cultural dynamics of the Levantine marketplace in Syria-Palestine, even while examining further the evidence for the existence of this market and the works associated with it.[642]

Part of this evidence can be found in certain private collections, such as that of Nuhad Es-Sahid,[643] where a number of works relevant to the "Levantine market" can be mentioned in this connection. Some of the works appear to come from the Jazira region, places such as Mosul and Siirt. One example is a candlestick done in the early fourteenth century, for Muhammad Ibn Sadr al-din Yusuf Ibn Salah al-Din, decorated with elaborate geometric strapwork and four-petal rosettes. It appears to be "an object made in Siirt in the northern Jazira for a member of an Ayyubid family proclaiming allegiance to a



324. Syria: London, British Museum, glass canteen: front view. (photo: by courtesy of the British Museum, London)

Mamluk ruler of Egypt and Syria."[644] This work, although dated slightly later than the Crusader period, raises similar problems and is related in decoration and quality to other works dated to the late thirteenth century or the early fourteenth century, some also from Siirt, some from elsewhere in the Jazira, some from Syria, and some from Egypt. See the examples listed in the following:

1. Ewer from Siirt, from the late thirteenth or the early fourteenth century, decorated with roundels containing geometric star patterns, joined by interlace bands.[645]
2. Cylindrical box from the Jazira, mid-thirteenth century, decorated with medallions containing, alternately, double-headed eagles and arabesques.[646]
3. Basin from Syria, *c.*1240–60, decorated with Nashki inscriptions above and below twenty-eight small medallions containing musicians, drinkers, and dancers.[647]
4. Candlestick from Cairo, *c.*1270, decorated with four octofoil medallions with huntsmen, musicians, and a dancer. These large medallions are linked by Nashki inscriptions and set against a background of "double-Y" pattern. Small paired round medallions appearing above and below the inscriptions separate the large medallions.[648]
5. Incense box from Egypt or Syria, made for Sultan Muhammad Ibn Kalavun (1294–1340), decorated with Nashki inscriptions and medallions with inscriptions or confronted birds.[649]
6. Incense burner from Egypt or Syria, made for Sultan Muhammad Ibn Kalavun (1294–1340), decorated with circular Nashki inscriptions, regular Nashki inscriptions, small inscriptions in medallions, and bands made of silver leafy vine-scroll designs.[650]

Forming another part of that evidence, we know of equally high-quality works done slightly later as well, in the early fourteenth century, for members of the Lusignan court on Cyprus that are also worthy of note. The two Lusignan works include a basin and a platter now in the Louvre that were exhibited in the Leventis Municipal Museum in Nicosia in 2000.[651] The basin was acquired by the Louvre in 1951 (MAO 101)[652] and the platter (MAO 1227) in 1999. The basin bears the arms of King Hugh IV of Cyprus and his wife; it is identical in shape to the *Baptistère of St. Louis*. The platter also bears Lusignan arms along with the representations of seated figures, and it was probably commissioned for or given as a gift to a prominent person in the Lusignan family. There is also a third Mamluk object, a smaller basin now in private hands, that bears the Lusignan arms and belongs with this group.

These Lusignan works are important because they demonstrate, even after 1291, that such luxury Mamluk metalwork was commissioned by and/or given to Frankish lords as gifts. Collectively these objects demonstrate what a lively market there was for luxury metalwork, and strongly indicate that the Crusaders did have access to luxury objects in Levantine markets, including works made by the very best Mamluk artisans.

Glass

The same marketplace that supplied the metalwork apparently also provided luxury glass, especially enameled glass, produced by various artists for the Crusaders after 1268, just as it had before 1268. The same problems currently found in the study of the metalwork in regard to place of origin, dating, artists, and clients are also found when dealing with the glass. In the case of the glass, however, a serious reconsideration of the fundamental study published by C. J. Lamm in 1929 and 1930, in two volumes, is required.[653]

A work that dramatically demonstrates this issue contains some imagery of possible Christian origin along with other Islamic material. It was discussed recently by S. Carboni and R. Ward, a glass canteen done in Egypt or Syria, said by Lamm to date in the third quarter of the thirteenth century, 1250–60, a date followed by Carboni, and to be from Aleppo, but redated by Ward to the mid-fourteenth century, 1340–60.[654] This work, a glass canteen, is now in London at the British Museum (Figs. 324–6). The possible Christian subject matter is primarily seen in the depiction of mounted knights or hunters. "The riders are unmistakably identified as Christian by their clothing and headdresses (the so-called kettle helmets worn by Crusader infantrymen) as well as by details in the caparison of the horses, such as the scalloped flaps of the saddle and the flanged bands at the neck and breast."[655] Carboni says we know the artists were local glass painters who knew about Christian imagery from monumental painting and icons, but it is not known for whom these vessels with mixed iconography were done. The customers could have been affluent Muslims or Christians. Ward differs in regard to some of these interpretations of the figures and their sources, in addition to the dating. Another example of this exact same type of problem is found in the case of the well-known Aldrevandinus beaker now in

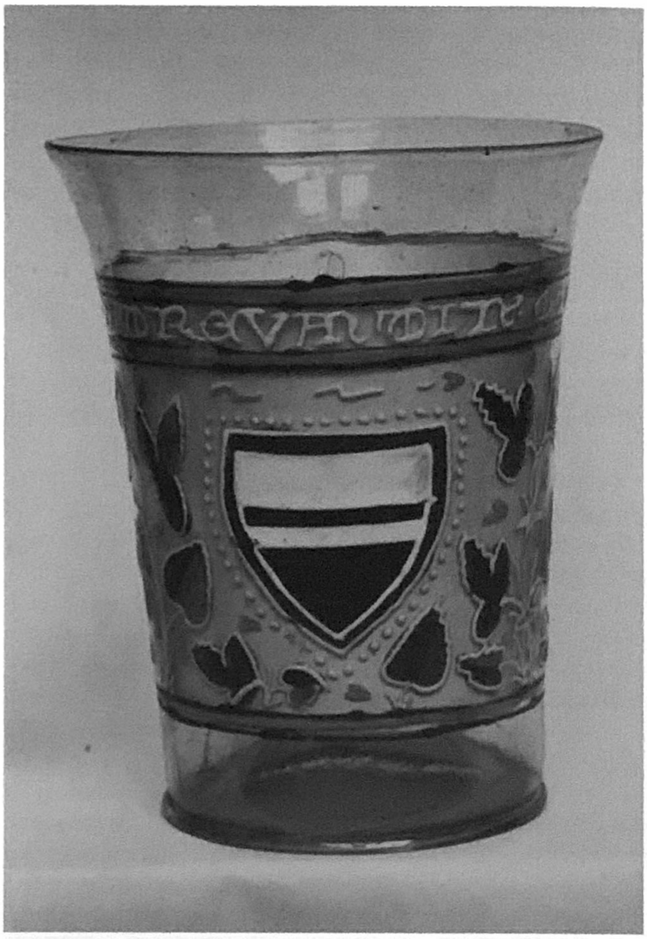
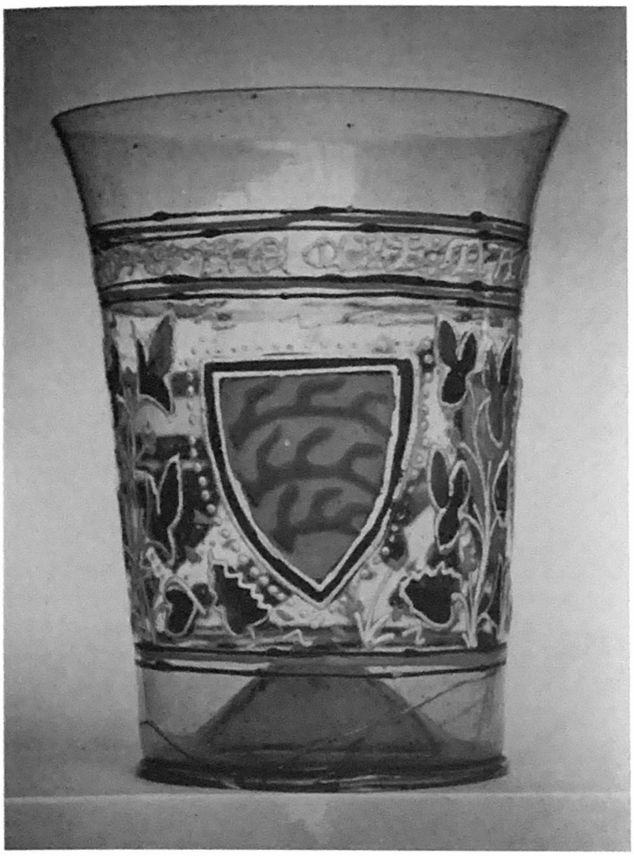
326. Syria: London, British Museum, glass canteen: side view. (photo: by courtesy of the British Museum, London)



327. Syria: London, British Museum, Aldrevandinus Beaker: view. (photo: by courtesy of the British Museum, London)

the British Museum in London (Figs. 327–8).[656] Lamm called this beaker "Syro-Frankish" and dated it in the later thirteenth century, but recent scholars have interpreted it to be the product of Western glassmakers, either Italian or German, working in Venice or in Germany under the influence of Muslim design and technique in the early fourteenth century.[657]

In light of these major issues being debated and investigated by the experts in this field, it behooves me to tread carefully in attempting to offer important examples of glass possibly made for and/or acquired by Crusaders from Mamluk sources in the period from the 1240s up to the fall of Acre. Finding relevant work dating exactly to the years 1268 to 1289 by consensus seems unrealistic at the present moment. Nonetheless there are two objects worth our attention here. One handsome example of luxury enameled glasswork is a bottle painted with four architectural and four agricultural scenes. The bottle is characterized as "the least known of all the extant Islamic enameled and gilded vessels in private collections." It "truly stands apart for its artistic accomplishment, its complex yet balanced composition, and the successful incorporation of a large variety of colored enamels."[658] It is comparable in importance and quality to the Baltimore beakers discussed in Chapter 6, and in better condition. It appears to be the only other extant work with predominantly Christian scenes made by these Syrian glassmakers.[659] The imagery deals with depictions of Christian buildings, including at least one church,



328. Syria: London, British Museum, Aldrevandinus Beaker: view. (photo: by courtesy of the British Museum, London)

defined by the cross on its façade, alternating with scenes of wine making. Although it has been attributed simply to the "mid-thirteenth century" and cannot be more precisely dated at this time, it is another excellent example of the work done for the Levantine market and presumably aimed at Christian customers, whether they might be Crusaders, Italian merchants, Frankish settlers, or Eastern Christians of one denomination or another.

A second example is a remarkable specimen known as the "Luck of Edenhall" beaker now in the Victoria and Albert Museum and usually dated simply to the thirteenth century (Figs. 329–30).[660] Not only is this work of enameled glass beautiful as an object, in its form and in its colorism, but also it has a special story connected with it that bears summarizing here.

The "Luck of Edenhall" beaker is a luxury drinking glass characterized by a graceful flaring shape. On the basis of this shape, one scholar, S. Kenesson, proposes to date the work to the mid-thirteenth century, 1225–50.[661]

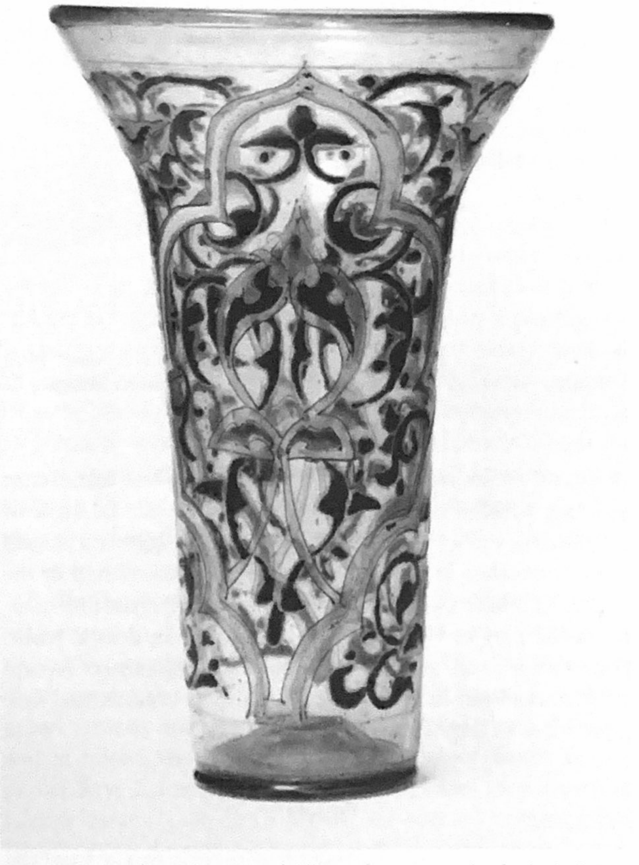
Its colorism is exquisite and its technique is refined. The glass is translucent with a slight orange tinge. Intersecting arch motifs and arabesque leaves are painted on it in red, blue, and white enamel; the linear work is outlined in gold and fine red lines.

No explicit documentation is available about this beaker, but it seems possible it was acquired by a Crusader in Syria, perhaps in the second half of the thirteenth century, who then brought it back to western Europe. Eventually the beaker came into the possession of the Musgrave family, of Edenhall in Cumberland, England, where it became known in the eighteenth century. At Edenhall it gained a reputation as a fairy cup, abandoned by fairies who had been interrupted while drinking at St. Cuthbert's well in the garden of Edenhall. Henry Wadsworth Longfellow translated the poem by Johan Ludwig Uhland about "The Luck of Edenhall," including the couplet with the curse of the fairies:

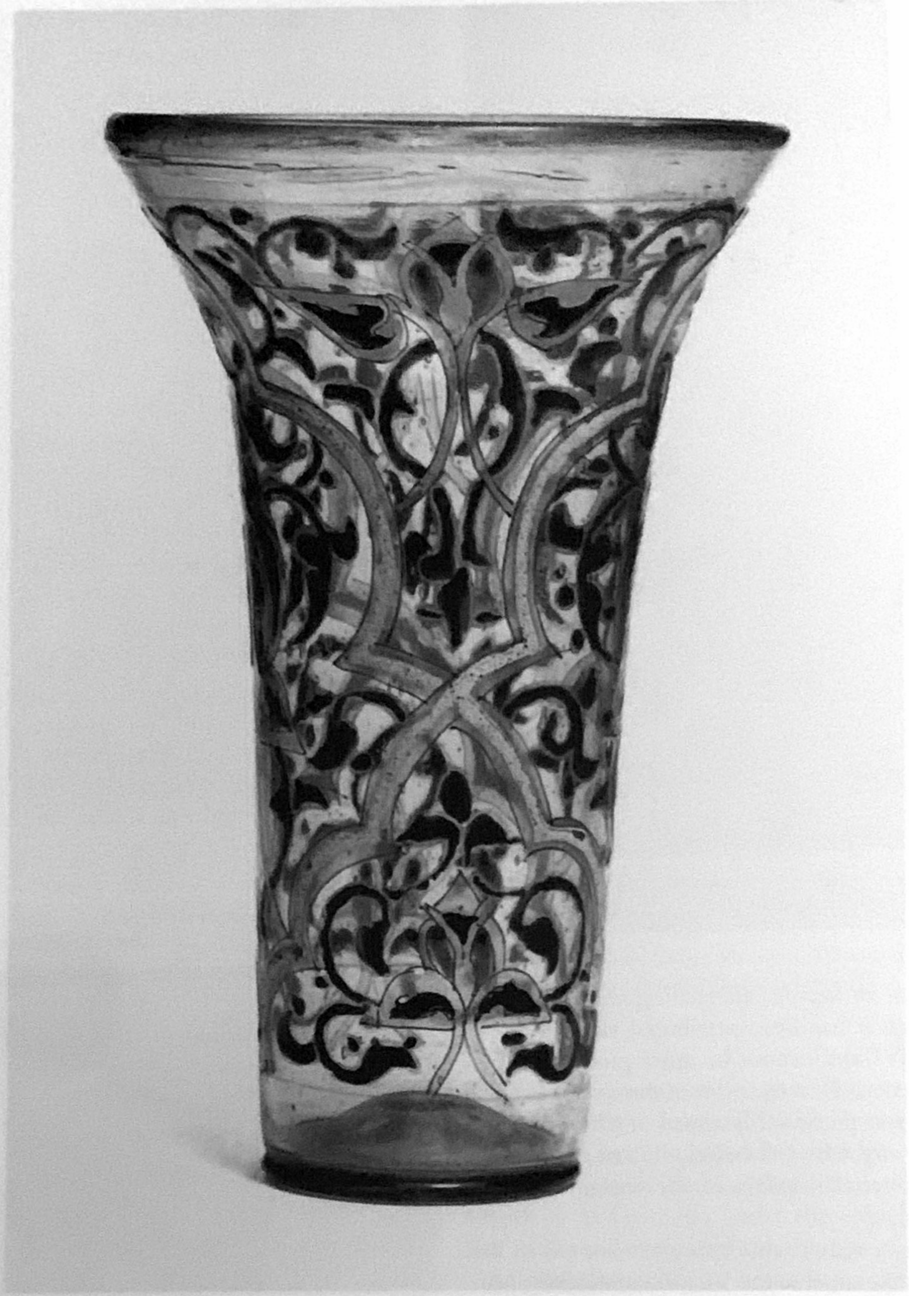
> If this glass doth fall,
> Farewell then, O luck of Edenhall!

This extraordinary beaker is now in the collection of the Victoria and Albert Museum, where it was given by the Musgrave family in 1958. There are other luxury enameled glass works of outstanding quality and striking appearance from the Near East *c.*1250–*c.*1350, but none has a more romantic story attached to it than the "Luck of Edenhall" beaker.

There is much we would like to know about these remarkable objects in metal and glass with their fascinating figural decoration. From the point of view of the years 1268 to 1289, indeed from mid-century to 1291, they seem to represent a shift in the center of gravity of the marketplace in Syria-Palestine that reflects several developments. First, we see a new cross-cultural openness whereby Mamluk artisans can do work for clients they perceive to be both Muslim and Christian. Second, this production may indicate a growing interest on the part of non-Muslim clients to acquire these kinds of objects. Third, whereas



329. Syria: London, Victoria and Albert Museum, Luck of Edenhall Cup: front view. (photo: by courtesy of the Victoria and Albert Museum, London, copyright V&A Images)



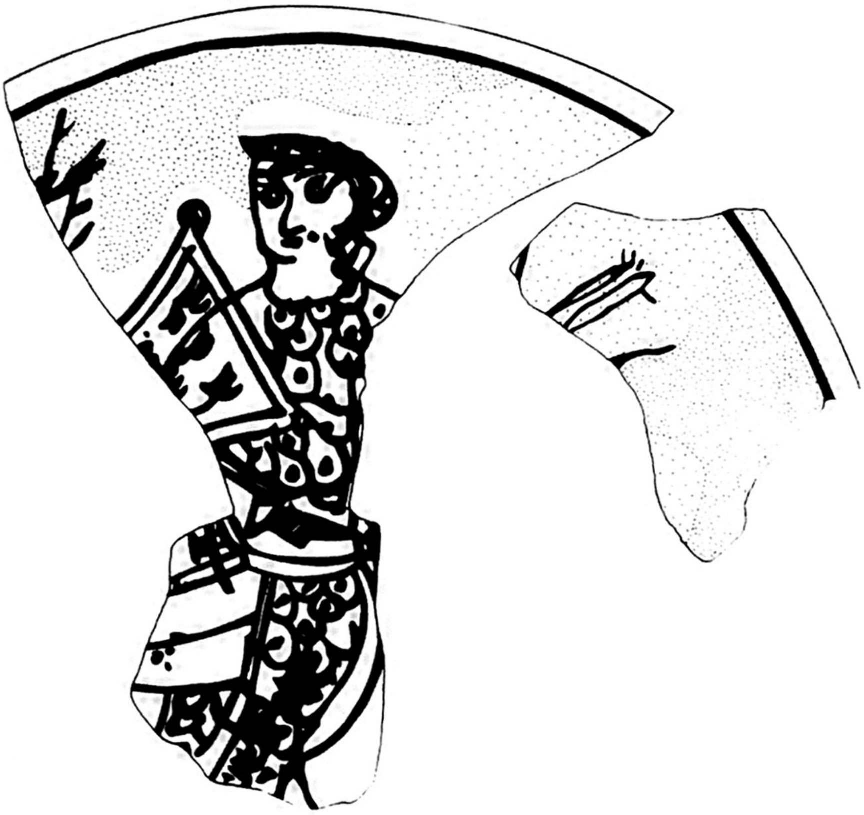
330. Syria: London, Victoria and Albert Museum, Luck of Edenhall Cup: side view. (photo: by courtesy of the Victoria and Albert Museum, London, copyright V&A Images)

Christian artists continued to focus on icon and manuscript painting, Muslim artists developed their own special areas of outstanding work in the minor arts, which suggests a certain division of labor in the marketplace in the second half of the thirteenth century, as well as recognition of expertise and quality on the part of Christian clients for Muslim artistic work. The exact sources and dating of these luxury objects remain to be worked out in light of new finds, new criteria, and new approaches to their study.

Pottery

With regard to the pottery, there is very little to say from the point of view that, as with other minor arts, few works can be specifically dated in the years 1268–89.[662] Since most major Crusader sites along the coast had their own pottery industry, the heavy losses to the Mamluks including Caesarea and Haifa (1265), Antioch and Jaffa (1268), Crac des Chevaliers and Montfort (1271), Margat (1285), and then Tripoli (1289) meant that "Crusader" production was greatly reduced. However, Boas points out, "the vast majority [of ceramics] were manufactured by local, non-Frankish potters. The second source were the neighboring Islamic states, particularly Syria and Egypt. The third source were countries under Christian rule: Cyprus in the later twelfth and thirteenth centuries, the north-eastern Mediterranean and southern Europe."[663]

With the loss of Antioch and its port, St. Symeon, the important production of incised, polychrome glazed pottery usually



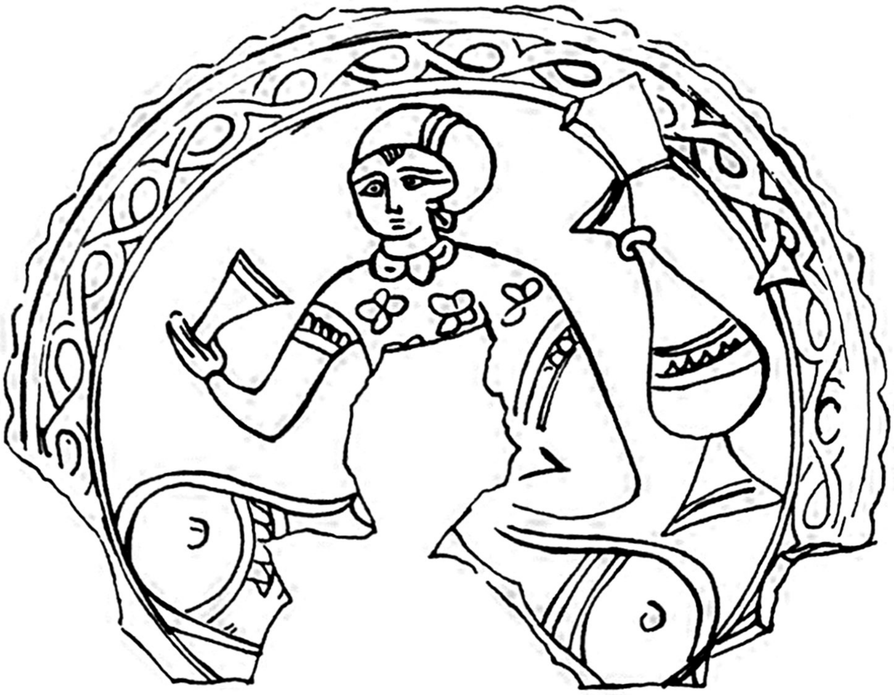
331. Syria, Kinet: Drawing of polychrome sgraffito bowl depicting mounted knight with a shield, late thirteenth century. (photo: by courtesy of Scott Redford)

called St. Symeon or al-Mina ware was now outside of Crusader control, and this probably put more emphasis on imports from Cyprus and of proto-maiolica from Italy in these later years of the thirteenth century. However, no doubt the importation of Islamic pottery from sources close at hand continued and may have even increased as part of the Levantine market that the Crusaders drew on grew.

The site of Turkish Kinet, called Hisn al-Tinat or al-Tinat by the Mamluks, and known as the Templar stronghold of Calamella by the Crusaders is a case in point. Tinat or Calamella is located on the Gulf of Alexandretta north of Antioch and due east of the port of Ayas on the opposite side of the gulf. Calamella was captured by the Mamluks in 1266 and burned, but it continued to produce pottery after this date until it was burned a third time and abandoned in the early fourteenth century.[664] Excavations have produced rich finds, attesting to the fact that even a small fortified port like Calamella was part of the booming Levantine commerce along the littoral of Syria-Palestine. Among the finds at Calamella are proto-maiolica from southern Italy or Sicily, ceramics from Venice, Zeuxippus and other Aegean wares from Cyprus and/or the Aegean, and "underglaze" painted ceramics from Egypt, Tripoli, Lebanon, and Crusader Palestine. Along with these products there are also enameled and other glass vessels from Syria. This demonstrates, as Redford argues, that Calamella was an active participant in the commercial life of the eastern Mediterranean. Furthermore, "it was also a manufacturing center in its right, producing textiles, iron implements, and ceramics."[665] Redford argues that the evidence indicates Calamella produced glazed sgraffito ceramics, what is known as St. Symeon ware, in locally run kilns (Figs. 331–3). Thus he argues St. Symeon ware is a type of ceramic produced around the Levant, especially along the northeastern Mediterranean littoral.

The other point he makes that is relevant here concerns the artistic quality of St. Symeon ware compared to other "luxury wares." Essentially he proposes that certain technical factors and the fineness of the drawing style may justify placing the St. Symeon ceramics slightly below the finest wares, such as Zeuxippus ware from the Byzantine world, luster ceramics from the Islamic world, and proto-maiolica ceramics from Italy. However, he sees an important change in the production of the luxury wares caused by decentralization and imitation, especially on Cyprus, that results in the possibility that St. Symeon ware grows much closer to these other wares in quality during the thirteenth century.[666]

Redford proceeds to discuss the Port St. Symeon-type wares with regard to their imagery of cup-bearers and other figures, decorative motifs, and possible heraldry. He concludes that these wares were not only produced and consumed in major urban centers, but also are found distributed along the coast and in inland sites. Although the cup-bearer motifs in particular have led scholars to think these wares were imitating Islamic ceramics, Redford points out that no contemporary Islamic examples can be found, and asks why all the extant examples seem to have been marketed to Christians. Finally,



332. Syria, Kinet: Drawing of a fragment of a graffito bowl with a representation of a cupbearer, late thirteenth century. (photo: by courtesy of Scott Redford)

he proposes to see that "by the thirteenth century, at least in the northern tier, the material culture of Latin and Levantine Christians on an archaeological level is indistinguishable. Not just Armenians participated . . . , but also the Arabic speaking Christians more prominent in the southern tier states of the Outremer."[667]

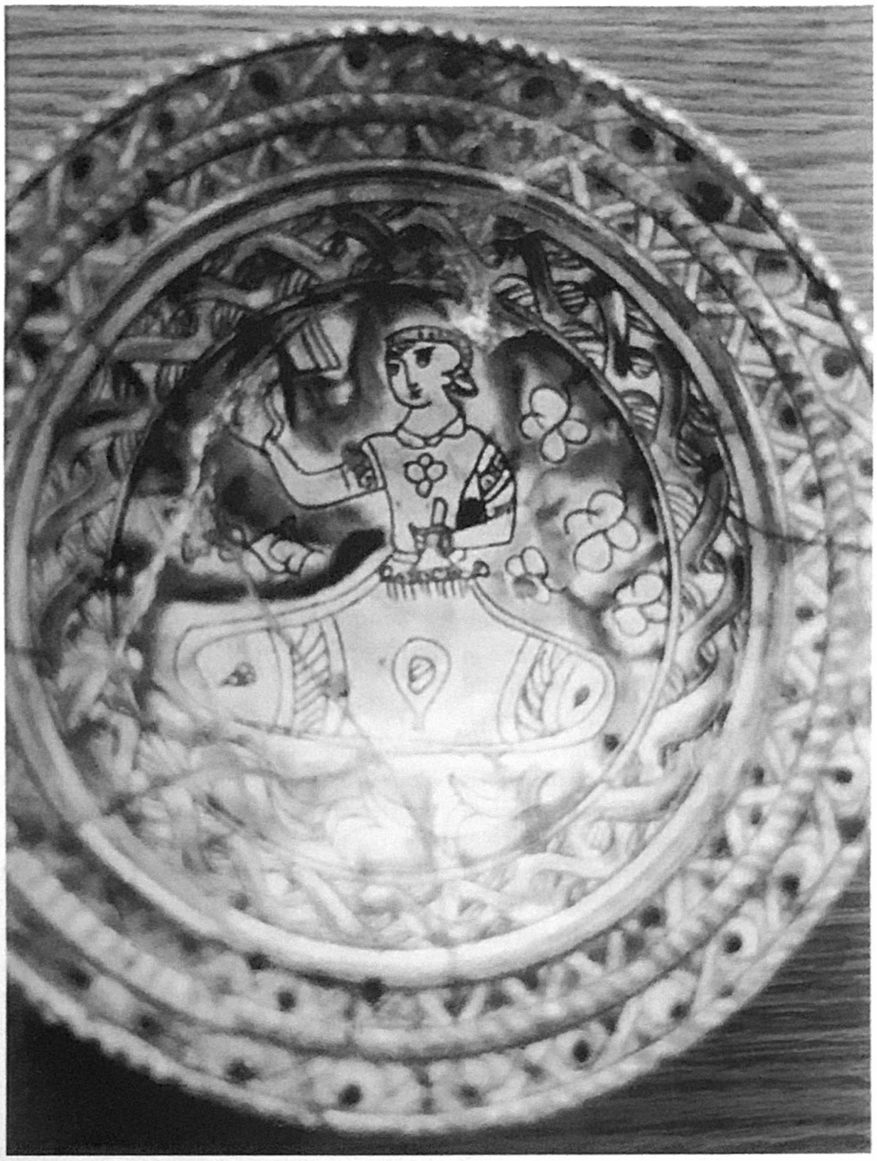
Seen in this way, I suggest that this pottery and its development forms what appears to be yet another aspect of the Levantine market that the Crusaders drew on during the later thirteenth century. Further study will clarify how ceramics relate to what happens with other minor arts such as metalwork, glass, and textiles.

Textiles

No doubt we could understand the points raised about metalwork, glass, and pottery better if we had documented examples of the textiles from this period, including luxury as well as more utilitarian specimens. Boas has referred to the excavated work found mostly on the Ile de Greye, at Caesarea, and Montfort. Furthermore he notes that "written sources frequently mention trade in textiles, textile manufacture, dyeing and the cultivation of plants used for dyes. Amongst the items that passed through the Crusader ports – besides massive imports from Western Europe – were cotton and woolen cloth, carpets, silk and luxury textiles from Damascus, Baghdad (including *siqlatin* – silk interwoven with gold),[668] Mosul and Gaza. Egypt produced fine linen and woolen cloths. Raw silk from Syria was manufactured in Damascus, Tripoli, Tyre, Gaza and Ascalon. According to Burchard of Mt. Zion, in Tripoli alone there were 4,000 weavers of silk.[669] Tyre produced famous white silk. Al-Idrisi mentions the white *tafeth* of Tyre.[670] Beirut also produced and exported silk and cotton fabrics. Cotton was grown in the plain of Akko and Tiberias and wool came from the region of Ramla."[671]

He goes on to say that "because of the perishable nature of textiles there are few finds of medieval date, and at present it is difficult to determine whether any of the fragmentary remains of textiles found in the Latin East were manufactured there or imported." Thus the few excavated examples are of great interest. A series of excavations were carried out between 1975 and 1981 on the Ile de Greye in the Red Sea, published in 1994.[672] These finds were dated by stratification with ceramics and by carbon-14 analysis to the period *c.*1175 – early fourteenth century. Thus, out of the approximately 1,500 fragments found, some must date to the late thirteenth century, but it is difficult to say which. What this sample shows us, however, is what types of fabrics are found in the Latin Kingdom. He mentions cotton, linen, felt, woolens, cloth woven from goat hair, and some silk. There is also fabric made with a silk warp with wool, and a weft of linen or cotton. Decoration on these fabrics are mostly patterns, done by dyeing or woodblock printing, along with embroidery and brocading with colored silk threads.[673] At another site east of Jericho a smaller sample was found, consisting of 768 fragments.[674] Most of these samples are of cotton and linen pieces, along with thirty-eight fragments of luxury silk variously dyed cream, ivory, red, gold, and different shades of blue. These samples are dated to a larger range, from the ninth to the thirteenth centuries, so here it is even more difficult to know what if anything may belong to the period 1268–89. Finally, a small but important find was made at Caesarea where a silk fragment was found in a tomb under the Cathedral of St. Peter. This silk cloth embroidered with gold threads is said to come from the West, not from the East, part of the evidence for imports from Europe.[675]

What we said earlier for the years 1244 to 1268 are basically also applicable for the period 1268–89. Although almost



333. Syria, Kinet: Sgraffito bowl with representation of a cupbearer, Adana Museum. (photo: by courtesy of Scott Redford)

nothing survives that can as yet be attributed directly to these years,[676] the fact is that commerce in textiles and silk was vigorous through Crusader ports during the entire thirteenth century up to 1291. Furthermore, it was especially silk that formed a main focus for one trading and production industry in which the Crusader ports were heavily involved. "The thirteenth century represented in many respects the heyday of the Mediterranean trading network, when expectations were still high, the return on voyages significant.... The products of the Near East – silks and spices, purchased on the voyages east – were redistributed in the western Mediterranean."[677]

Conclusions

The art of the Crusaders during the period 1268 to 1289 clearly focuses our attention on certain aspects of production that are vigorous and, to some extent, rather unexpected. The numerous manuscripts produced in Acre in the late 1270s and 1280s are a striking and distinctive example, and the icons produced in Acre and Sinai are another.

With regard to the manuscripts, the picture that we now have of production in Acre in the late thirteenth century is clearly different from the reservations expressed when Hugo Buchthal first published his study of *Miniature Painting in the Latin Kingdom of Jerusalem* in 1957. At this point we have much more evidence, a certain amount of specific documentation, and a clear perspective on a much more complex and thriving industry in Acre than we had when Buchthal made his pioneering contribution. The reasonable concerns expressed by C. Mango, C. R. Dodwell, and L. M. J. Delaissé in reviews published between 1958 and 1962 can be provided with responses containing substantial evidence and argument.[678] The production of illustrated manuscripts in Acre can now be seen to be much larger in number than in 1958, and even larger than in 1976. We can also see that we are most likely not dealing with one scriptorium, but actually numerous scriptoria and many artists as we have argued earlier. The concern that the attribution of the manuscripts to Acre in the thirteenth century was somehow more tentative than that to Jerusalem in the twelfth century is now also less of a problem because of the additional direct links that can be established to Acre, not only by the Perugia Missal, but also by the work of the Paris–Acre Master and his commission to illustrate the *De Rhetorica* codex in 1282, as established in 1976, and argued further later. Finally, the distinction between the place of execution and the place the manuscripts were destined for is still an issue. However, now the problematic aspect is more the place for which the manuscript was destined – some seem not to have been done for patrons resident in Acre, as, for example, the *Histoire Universelle* signed by Bernard d'Acre and the *Histoire Universelle* thought to have been given to the new king of Jerusalem, Henry of Lusignan, king of Cyprus, in 1286. It is much less of an issue in most cases to demonstrate that the Crusader manuscripts were done in Acre or, in the case of the *History of Outremer* in the Vatican, in Antioch.

In icon painting, the situation is rather different. The dominant Crusader style in this medium was not a French-related Crusader style or a French Gothic style, but instead what Weitzmann called the Veneto-Byzantine style, and what we are calling the Veneto-Byzantine Crusader style. Some of the finest work in this style has been identified as having been done in the 1280s, including the bilateral icon of the Crucifixion and the Anastasis (Figs. 269–70, App. no. 97/1568), the diptych with St. Procopios and the Virgin Kykkotissa (Figs. 271–88, App. no. 110/1783), and the iconostasis beam with the Deësis and eight saints (Figs. 256–61, App. no. 74/1003). Although this is unsurprising in relation to Acre and the Latin Kingdom, where Venice was pursuing such a vigorous commercial agenda, it presents problems with regard to the city of Venice itself, where so little panel painting is known to have been done in the second half of the thirteenth century.

It is remarkable that this situation has parallels to what we find in the metalwork and the glasspainting in certain ways. In the latter case, Carboni writes that "it should be remembered that Venice did not begin to produce enameled glass drawing upon Islamic techniques until the end of the thirteenth century; the transfer of glass making technology to Venice is often cited as dating from 1277, when near Eastern glass was sent there from Tripoli."[679] As an example of this new Venetian glass he and David Whitehouse refer to the Aldrevandinus Beaker (Figs. 327, 328), now in the British Museum in London.[680] At one time this beaker and several other closely related works, referred to as the Aldrevandinus group, were thought to be "Syro-Frankish" in origin, because "Carl Johan Lamm believed that they were produced for the Crusaders on the Syrian coast by European or Jewish glassmakers educated in the Islamic tradition.... After the group was cautiously attributed to Europe in the late 1960s, numerous new finds were studied, published and exhibited in 1988 that suggested, with some reservations, that Venice was the center of manufacture. The Venetian attribution is generally accepted at present, although some scholars suggest that other glassmaking centers in Europe may have been involved."[681]

This example in glasspainting is not exactly paralleled in icon painting because we cannot identify a direct connection between the panel painting in the Crusader East in terms of a technique taken over in Venice in the same way. It is, of course, hardly surprising to find a byzantinizing style of painting in Venice in the latter part of the thirteenth century, but the most prominent medium is that of mosaics. Nonetheless, we can imagine that Crusader panel painters with Venetian connections may have helped stimulate Venetian interest in the Byzantine tradition through the transfer of a Veneto-Byzantine Crusader style in the Latin Kingdom to Venice, where it became part of a strongly byzantinizing style of Venetian panel painting in the hands of artists such as Paolo Veneziano in the early fourteenth century.[682]

There is no comparable phenomenon in metalwork, but there is a relevant aspect in the study of late thirteenth- and early fourteenth-century metalwork discussed earlier. Rachel Ward begins her recent article on the *Baptistère de Saint Louis* (Fig. 323) as follows:

> The importance of the European market to the Mamluk metalworking industry has not been fully appreciated because "Veneto-Saracenic" metalwork (inlaid brass vessels bearing European arms but decorated in Islamic style) was thought to be the work of immigrant craftsmen in Venice. Increasing evidence that this large group of metal vessels was actually produced in the Middle East must cause us to reappraise the significance of the export market.[683]

Ward proposes to see the *Baptistère de Saint Louis* as a work done in Syria, but produced for a European patron in the early fourteenth century. I have wondered whether we should not also consider that such works might have been done in the Near East, in Syria, or Egypt, for Crusader patrons in the late thirteenth century, as we find in the manuscripts and icon painting, and possibly for the works of enameled glass. Further research is needed to evaluate this counterproposal and to see whether we can further clarify the origins of Venetian glasspainting in the Muslim enamel technique, and the origins of Venetian panel painting in Crusader icon painting, in relation to the thriving production known in the Levantine markets of Syria and Egypt, and Crusader Acre or Sinai, respectively.

In sum, it is clear that the developments in the art of the Crusaders in the Latin Kingdom during the period from 1268 to 1289 were in some ways no less momentous than what we found to be the case in the earlier time, from 1250 to 1268. Acre did not experience the tremendous stimulation caused by Louis IX in the later period, but it did enjoy periods of considerable artistic activity in both the 1270s, after 1268, and in the 1280s about the time of the coronation of the new king of Jerusalem, Henry II of Cyprus. The body of painting we have studied is of the greatest importance partly because it includes some of the highest quality Crusader work we have, partly because it demonstrates how closely linked the Latin Kingdom was artistically to Paris and to Venice, and partly because the stylistic developments reflect a more cosmopolitan outlook and production on the part of the various artists in the several workshops, both in Acre for the manuscripts and in Acre and Sinai for the icons. This cosmopolitan outlook is also manifested by the Crusader participation in the Levantine market in the Near East, exemplified in their interest in the various minor arts.

The cross-cultural circumstances in the Crusader States seem to be epitomized by the quote that we placed at the start of this chapter. Abu 'l-Fadl, pronounced colloquially as "Ebu 'l Fazl," caused a Latin inscription to be made which said:

> O homines qui transitis per viam, in caritate rogo vos orare pro anima mei, megistri Ebuli Fazle, hujus ecclesie edificatoris.

As Claude Cahen, and now B. Z. Kedar has explained it, "we have here an Oriental Christian founding a Latin church, again probably after having embraced the Latin rite."[684] The interaction between the Eastern and Latin Christians in terms of their religious activities, between the Franks and the Muslims in terms of their commercial activities, and between the western Europeans, Franks, and Levantine peoples in terms of interactive cultural dynamics becomes an even more important factor with regard to how the art of the Crusaders in the Holy Land develops in the years between 1268 and 1289. We are beginning to see this, but we need to carry on with our research in order to learn more about the specifics of what all of this meant in this important period.

8

THE FALL OF ACRE IN 1291 AND THE END OF THE CRUSADER STATES IN MAINLAND SYRIA-PALESTINE

Today too, the mistress of the nations, the princess of the provinces has been made a tributary, and the enemies of the cross of Christ reached out their sacrilegious hands as far as the most noble limb, the inner organs and the pupil of the eye, attacking and conquering the city of our redemption, that is the mother of faith....

Jacques de Vitry

When Acre was despoiled
  And all Syria laid waste,
The world longed for some good thing
  In the midst of great evils....

But they were torn apart by greed
  Into great discord and argument
And so they were greatly diminished
  And injured and brought down....

And so the land is lost
  And great harm done, as you well know.
There is great danger in their discord
  If God does not bring them to agreement.

The Templar of Tyre

Because of you no town is left in which unbelief can repair, no hope for the Christian religion!

Through al-Ashraf the Lord Sultan, we are delivered from the Trinity, and Unity rejoices in the struggle!

Praise be to God, the nation of the Cross has fallen; through the Turks the religion of the chosen Arab has triumphed!

THE FALL OF ACRE, 1289–1291: THE DESTRUCTION AND DISPERSAL OF THE ART OF THE CRUSADERS IN 1291

Looked at in hindsight, the fall of Tripoli on 26 April 1289 was an ominous indication of what lay in store for the city of Acre. The king of Jerusalem, Henry II, and the pope, Nicholas IV, were forced to take the situation very seriously, but many people in Acre apparently persisted in thinking that the commercial importance of the city would somehow preserve it from a similar fate. The Templar of Tyre reports the following:

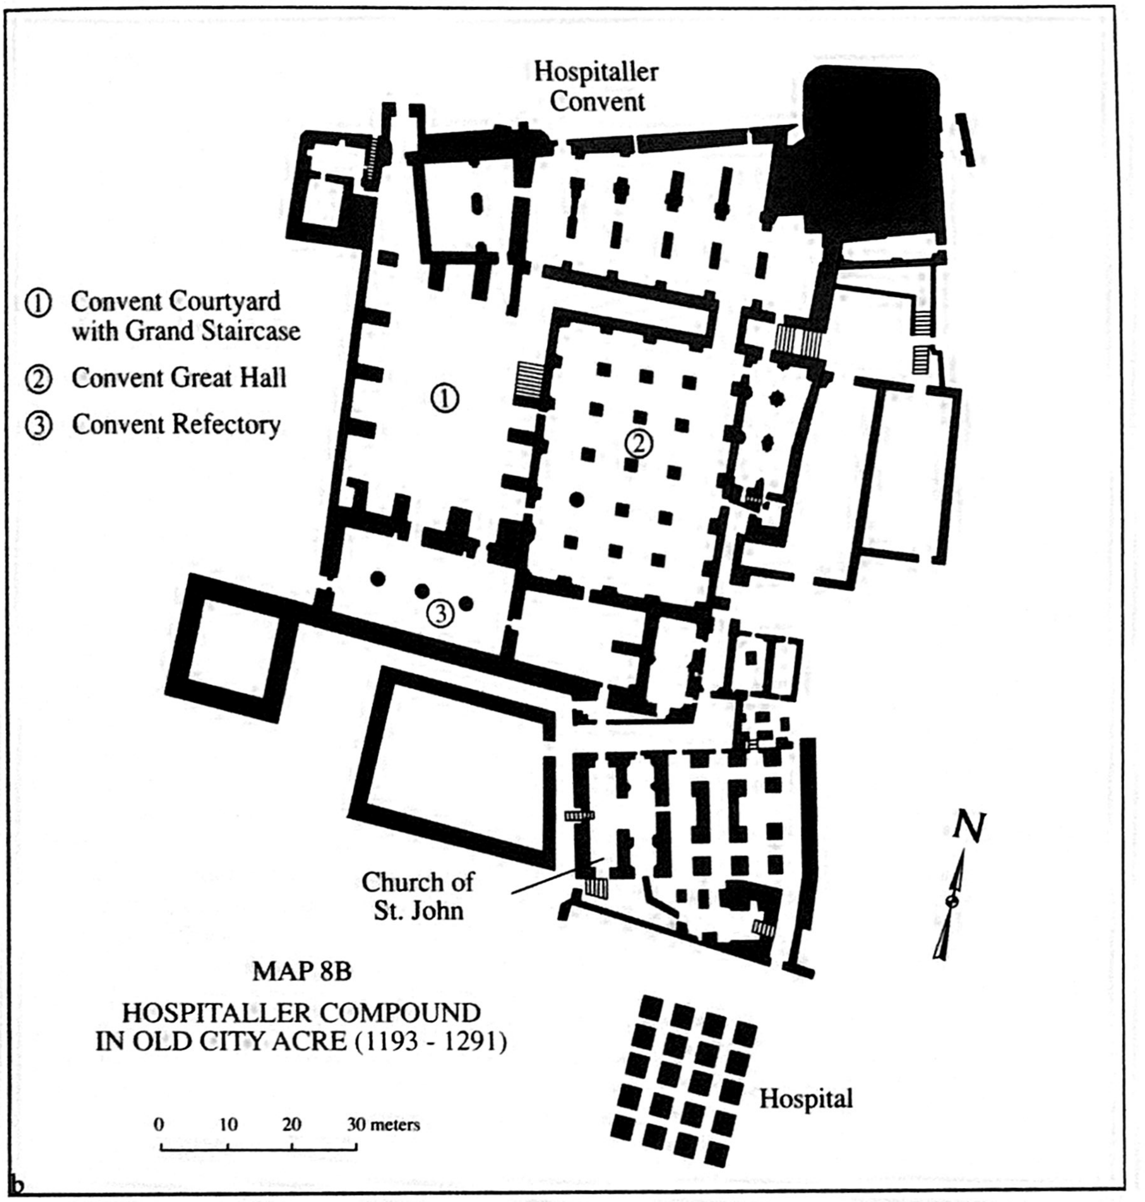
> After the loss of Tripoli, King Henry II left Cyprus, arriving at Acre four days later. He concluded a truce between Syria and Cyprus and the sultan, and the king and the sultan swore oaths to each other. In August, the sultan returned to Babylon; King Henry returned to Cyprus on the twenty-sixth of September of this year [1289], leaving his brother Sir Amaury, Lord of Tyre, in Acre in his place.

Then the Templar of Tyre makes the following audacious and ominous comment:

> Now I will tell you the way and the reason why Acre was taken by the Saracens.[1]

What follows in sections 480 to 530 of his text is the extended account of the siege and fall of Acre, which concludes with a very long poem in section 530, "on the way things have been since Acre and Syria were lost."[2]

Facing the circumstances, King Henry did conclude yet another truce with the sultan for ten years, ten months, and ten days that covered the Latin Kingdom of Jerusalem and the Kingdom of Cyprus. The new king of Armenia, Hetoum II,



Map 8B

also followed suit. Despite the truces, Henry did not put much faith in the sultan's word, and he sent John de Grailly, the head of the French regiment, as his delegate to the pope seeking aid. Then he retired to Cyprus, however, leaving his brother as *bailli* in Acre.

Despite the gravity of the loss of Tripoli in late April 1289, appeals for sending immediate aid to the Holy Land mostly fell on deaf ears. Pope Nicholas IV (1288–92) was well aware of the problem and "made it his main ambition to revive Gregory X's crusade-policy. He aimed accordingly at the general pacification of Europe, the union with the Greek Church, and the recruitment of western Christians for a massive and co-ordinated action in the East."[3] However, he also was committed to attempting to deal with the long-standing Sicilian problem, and he decided that Sicily would have to come first before any major expedition could be organized to go to the Latin East. It was a fatal mistake, and it resulted in the fact that Nicolas IV would mainly be remembered as the pope during whose reign both Tripoli and Acre were lost.

The immediate response was in any case, fairly routine. The pope of course issued an appeal, but it was some months later in September 1289. He also sent money, but he sent it, not to the king, but rather to the patriarch of Jerusalem. On 9 September 1289, a sum of 4000 *livres tournois* was loaned to Nicholas de Hanapes for the purposes of "repairing the fortifications of Acre, building war machines and redeeming prisoners."[4] Even though John de Grailly, as the head of the French regiment, was the most high-profile military commander who could have been sent to the West,[5] his efforts to win committed responses came to very little. The Genoese had attempted to attack Egyptian commercial activity as a reaction to their serious losses at Tripoli. However, the sultan neutralized them by closing the port of Alexandria to their merchants until they made peace. It was the Venetians who took the threat against Acre and their commercial interests there most seriously. As a result they sent twenty galleys under their admiral, Jacopo Tiepolo, son of the former doge, Lorenzo. This naval force was joined by five additional galleys financed by James of Aragon, king of Sicily.

The only other significant response was a large band of peasants and unemployed townsmen from Lombardy and Tuscany, whom the pope placed under the leadership of the bishop of Tripoli, Bernard of Montmajour. Bernard had come to Rome as a refugee after the fall of the city.[6]

In the meantime, life went on, and commerce was resumed under the protection of the truces with the sultan. In the following spring and summer the weather was good, farming flourished, and the harvests were bountiful. Pilgrimage continued; travelers came and went. Acre was a thriving market with the usual multicultural interchange among Muslim and Christian merchants. Into this bustling Near Eastern city came the Venetian fleet with its band of Italian Crusaders in August of 1290. The Templar of Tyre reports the result:

> When these people came to Acre, the truce which the king had made with the sultan was well-maintained between the two parties. Poor Saracen peasants came into Acre carrying goods to sell, as they were accustomed to do. It happened one day, by the agency of the Enemy from Hell (who desires to arrange evil deeds between good people), that the crusaders, who had come to do good and to arm themselves for the succour of the city of Acre, brought about its destruction, for one day they rushed through Acre, putting all the poor peasants who had brought goods (both wheat and other things) to sell in Acre to the sword. These were Saracens of the villages round about Acre. They also slew a number of bearded Syrians who were of the law of Greece [native Arabic-speaking Orthodox Christians] (they killed them because of their beards, mistaking them for Saracens).
>
> This was ill-done indeed, for Acre was taken by the Saracens because of it, as you shall hear.
>
> When the peasants were killed, as you have heard, the news was reported to the sultan in Babylon, who was most infuriated by it, and raged against the people of Acre. The blood-soaked *chemises* of those who had been killed were carried to him. Since the sultan was planning to do grievous harm to the city of Acre [anyway], he immediately sent messages to the lords of Acre, to the effect that he had had a truce with the Christians, and that they had broken the truce and slain his Saracen peasants. And he demanded that they make amends and bring justice to those who had done this.[7]

The Arabic sources agree with this account in general, with certain important differences in detail. The Arab historians do not report the story about how the Master of the Templars, William of Beaujeu, proposed to hand over to the sultan prisoners condemned to die, saying they were the ones who did the killings, in an effort to appease Kalavun.[8] (The Templar of Tyre, who as secretary to the Grand Master must have known, indicates that William had an informant inside Cairo who explained the sultan's real intentions, but no one in Acre believed the Templar Master.) However, these Arab writers discuss in particular the motivation and deliberations of the sultan, how carefully he explored the language of the truce to see whether the Crusaders had violated it. When the clause that guaranteed merchants and travelers safe conduct to, from, and in Acre was found, he acted on that and refused to be swayed by the Frankish arguments that newcomers from the West had perpetrated this evil act. Accordingly the sultan began to organize an attack on the city.[9]

At the start of October 1290, the time when Muslim pilgrims would begin their *hajj* to Mecca, Kalavun became ill. Even though he was forced to abandon his plans to perform the *hajj*, he resolutely moved ahead with preparations for the coming military campaign against the Crusaders. Having marched to a place called Masjid al-Tibr, the first stop en route north, and having given orders for siege engines to be constructed at Damascus, he grew worse and died on 11 November 1290.[10]

"When those of Acre had heard that al-Malik al-Mansour [Kalavun] was dead, as you have heard, they had rejoiced greatly, and thought that they had been saved."[11] However, they had only gained a brief respite. What they did not know was that the successor to Sultan Kalavun was equally dedicated to the same task his father had begun, and that his father had personally commissioned him to perform it.

Before he died, Kalavun is said to have summoned his eldest son, al-Ashraf Khalil, to his bedside. According to the Templar of Tyre, he told his son that he was dying, he placed the responsibility of completing the current campaign on his son's shoulders, and he warned al-Ashraf Khalil of the treachery of the emir Turuntay, who had poisoned Kalavun and who was the cause of his current fatal illness.[12] As one of the decisive acts of taking command as his father's successor, the new sultan had Turuntay killed, and except for the usual palace conspiracy, the transfer of power was accomplished with unusual speed and efficiency – unfortunately for the Crusaders.

Hearing news of the death of the sultan, the Crusaders in Acre appointed a delegation to make contact with the new Mamluk ruler, to congratulate him, and to bring him a gift – the nature of the gift is not revealed – in honor of his new position. The delegates were Philip Mainebeuf, a knight who knew Arabic well, a knight from Cyprus named Bartholomew Pisan, a Templar and a Hospitaller brother, and a scribe named George. When they appeared before al-Ashraf Khalil, however, he refused their gift and had them thrown in prison, where apparently they eventually died. The Templar of Tyre reports that the Crusaders had been warned in a letter to the Templar Master not to send a delegation, because the sultan was committed to this campaign.[13]

Knowledge of these details on the part of the Templar of Tyre seems to indicate clearly that the Templars were indeed dealt with in a special way by the Mamluk sultan. The Templar of Tyre reports that he himself translated the text of the letter into French, demonstrating that he, as an indigenous Frank, also knew Arabic. In the letter the sultan sends greetings "to the noble master of the Temple, the true and wise," showing that he held him in special regard, knowing that the Master would inform the other Crusaders of the sultan's true intentions. When the Crusaders, duly informed, paid no attention to the sultan's admonitions, he did as he said. The Mamluk campaign to besiege Acre was officially in progress, and this letter informed them that al-Ashraf Khalil was coming to right the wrongs that had been done to the Muslim peasants, merchants, and travelers.

At this point the Templar of Tyre starkly announces the following:

> The sultan came before Acre and besieged it on Thursday the 5th of April, in the year 1291 of the Incarnation of Christ.[14]

By contrast the Arabic sources go into some detail about the preparations of assembling the huge Mamluk army and the impressive array of siege engines that the sultan had commissioned for the coming battle.[15]

First, there was the ceremonial departure from Cairo, which took place in conjunction with the burial of Kalavun in his great domed tomb. The new sultan staged an elaborate round of events, including processions, prayers, and generous gifts to the poor and to the religious participants. Symbolically al-Ashraf Khalil clearly wished to associate his military campaign with that of his dead father.[16]

Second, there was the organization of the armies. Not only were there the regular Mamluk troops from Cairo, but also there were contingents from other major Mamluk cities and forts, such as Tripoli, Crac des Chevaliers, Akkar, Homs, and Damascus. In fact, it is reported that the number of volunteers from Damascus even outnumbered the regular troops from that city.[17]

Third, we learn of various participants who recorded the events. Along with two other chroniclers who were members of these contingents and provided eyewitness accounts of the siege of Acre, there were men such as Abu al-Fida, an Ayyubid prince who later became ruler of Hama. In addition there was an anonymous writer who was a soldier in the battle. There was also Baybars al-Mansuri, a Mamluk emir who was governor of Kerak and who joined the campaign at Gaza with the consent of the sultan.[18]

Fourth and finally, after a month on the march, al-Ashraf Khalil arrived at Acre, on what the Arabic sources say was 6 April 1291. Two days later the entire Syrian part of the army arrived with the siege machines. All accounts exclaim over the large number of these machines; one author says there were seventy-two mangonels of four types, and one type, the so-called Frankish type (*Ifranji*), was the largest and strongest and could fire stones weighing 45 kilograms and more. There were said to be fifteen of these "Frankish" mangonels.[19]

At this point it had been nearly eight months since the incident in Acre that had sparked the ire of the sultan. Eventually the Crusaders had realized that al-Ashraf Khalil was coming with a huge army to attack the city.

> When the Sultan reached 'Akka during the first ten days of Rabi' II, he found it fortified with all kinds of equipment and apparatus. The Franks had sought aid from the people of Cyprus and other Islands, sending messengers to their great kings, with the result that a large number of Hospitallers and Templars had gathered in the city. In their letters to the Frankish kings, monks and priests, the 'Akkans mentioned that there remained no Frankish fort on the whole coast in which they could take refuge save the fortress of 'Akka and that if it were captured there would be no place left for the Franks who remained. Accordingly the kings sent many men.[20]

With a certain exaggeration, the Templar of Tyre says that the sultan pitched his tents all over the plain outside the city, from the sea on the north side to the bay on the south side. Sober estimates of the Mamluk army ranged up to well over 200,000 men.[21] There were probably 30,000–40,000 citizens inside the city of Acre. Of these probably fewer than 15,000 were soldiers of one kind or other, but this represented all the armed forces that the Crusaders could muster.[22] Altogether the land walls of the city stretched about two kilometers in front of the Mamluk encampment.[23]

> The tent of the sultan himself, which is called the *delhis*, was on a small hill, where there was a lovely tower and gardens and vineyards of the Temple. This *delhis* was entirely red, and its door opened facing the city of Acre. It was a custom of the sultans that everyone would know that the direction in which the door of the *delhis* opened would be the direction in which he would take the road. They remained for eight days before Acre, doing nothing besides engaging in the occasional clash between our forces and theirs, in which a few were killed on either side.[24]

This means that basically for the first week the Mamluk army assembled and established their camp. The army of Hama was opposite the Templars on the right side along the northwest walls of Montmusard. The army of Damascus was opposite the Hospitallers along the sourthwest–central part of the walls of Montmusard in the center. The army of Egypt was placed along the old city walls from where the Montmusard walls joined them, around the angle of the Tower of King Hugh and King Henry II to the Patriarch's Tower at the southern end of the walls at the waters of the bay. The sultan's tent was west of the Patriarch's and the Legate's Tower. Then the Mamluks began to set up their siege engines. Some of these engines had names and were put in important emplacements. The "Furious" mangonel was placed in front of the walls entrusted to the Templar defenders. Another known as the "Victory" was positioned to fire on the Pisans' section. A third was located to fire on the Hospitallers. A fourth large mangonel was placed to fire on the Accursed Tower, which anchored the inner walls of the city at the angle where they turned from an east–west to a north–south line. The Templar of Tyre also describes how the Mamluks set up their own barricades and wicker screens behind which they could maneuver without being seen. These barricades faced the city walls and extended their entire length, and over a three-day period the Mamluk soldiers moved them up to the lip of the fosse outside the outer walls. Once these barricades were in place, they were strengthened and small, rapid-fire siege machines called *carabohas* were moved in close behind them. The stage was set for the battle to begin.[25]

To start the attack the sultan started a series of siege operations, including mining sections of the walls and certain towers – the Templar of Tyre mentions "the King's wall" and the kings' tower in front of "the Accursed Tower" (Turris Maledicta). Along with this there were pitched battles between small numbers of Muslim and Christian soldiers outside the walls, sometimes even single combat in front of the gates of the city, which the Crusaders defended heavily but left open for access to the battlefield. Meanwhile the Mamluk siege engines hurled their stones against the walls and into the city like "stunning thunderbolts" and thousands of arrows were shot "like gleaming flashes of lightning," according to Baybars al-Mansuri.[26] The Crusaders successfully attempted to attack the Hama army in the Mamluk camp from the sea "by troops landing from boats protected by wood-faced frames covered with buffalo-hides." They were finally beaten back and although many of the Franks were killed by arrows, some were able to escape back into the city through one of the open gates. Some other knights, including John de Grailly and Otto of Grandson, rode out against the same section of the Mamluk camp in an attempt to destroy the siege engines by using Greek fire. Their attack failed when the Greek fire fell short, but the Crusaders were able to capture armor and weapons from the camp of the Hama army as they fought, *spolia* and trophies that they displayed on the walls of the city the next day. The Templar of Tyre says that in this battle their three hundred men had faced over a thousand Mamluks.[27]

This was a notable victory of sorts for the Crusaders, and the sultan considered it a "humiliating defeat." He exhorted his emirs to fight harder and he took this occasion to "take action against the emirs suspected of treachery, none other than al-Amir Husam al-Din Lajin, Viceroy of Damascus and later Sultan, and his associates.... On or about the eighth of Jumada I/9 May, Lajin and two of his cohorts were arrested and Lajin's property in Damascus was placed under sequestration."[28] While these developments were underway, the Crusaders had attempted without success to attack the other sections of the huge Mamluk camp. Despite these efforts, Al-Ashraf Khalil was able gradually to move his troops close enough to the walls of the city to fill the fosse in certain places, in preparation for the coming assault.

In the meantime the king of Jerusalem, Henry, had finally arrived from Cyprus on May 4, nearly a month after the attack had begun. His presence and the reinforcements he brought stimulated joy and renewed hope among the beleaguered Crusaders defending Acre. The Muslim historian Abu l-Mahasin reports that "on the night of his arrival [they] lit great fires, greater than were ever seen before, as a sign of their joy."[29]

After assessing the situation, Henry decided to attempt to negotiate with the sultan. Henry had found the city in "dire straits," according to the Templar of Tyre, so he sent a delegation to al-Ashraf Khalil, including William of Villiers, a knight, and William of Caffran, a member of William of Beaujeu's household. The Crusaders sought to arrange a peace in exchange for tribute they would pay; they were still thinking of recent truces and thought that the Mamluks could be bought off. When the messengers came unarmed before the sultan in his red *delhis,* they were at some distance from the Gate of the Legate, probably the tower gate just north of the Tower of the Patriarch, at the southern end of the outer walls of the city. The Templar of Tyre reported the following exchange:

> When the messengers had thrice saluted him on their knees, he approached them and said, "Have you brought me the keys of the city, then?" The messengers replied that the city could not be surrendered so easily, but that they had come to him to ask for some measure of mercy for the poor people.
>
> At this the sultan said to them, "I will give you this much grace, that you cede me the bare stones [of the city] alone, and carry off everything else, and go forth and leave the place. I will do this for your king, who has come here and is a youth, just as I might have been. But I will do nothing more for you."
>
> Then the messengers said to him that this could not be, "because the people overseas would hold us to be traitors," at which he said, "Then you should go away, for I shall offer nothing more!"[30]

In preparation for this confrontation, the sultan is reported to have consulted with his emirs, who urged him not to abandon "his martyred father's cause." When the emirs had made known their support to the people, the historian al-'Ayni reports that "a great shout arose from the peddlers, vagabonds, grooms, and camel drivers accompanying the army, calling on the Sultan to continue the struggle against the accursed enemy."[31] The Mamluk siege had now become a popular cause for which the only acceptable Muslim result was total victory. This is the message that the Sultan delivered to the Crusader envoys. When a Crusader mangonel fired at the sultan's tent at the conclusion of the messengers' visit – whether accidentally or intentionally is unknown – the sultan was enraged. He eventually allowed the messengers to return unharmed, but his anger and increased resolve was a bad omen for the Crusaders. The next day, on Friday 17 Jumada I/18 May, the sultan ordered a full-scale assault on the city.

The Mamluks had prepared for this attack systematically over the previous weeks. Realizing the strength of the defensive walls of the city, they had begun by mining the walls in strategic places, especially the Tower of the King and the Wall of the King. The Mamluks had also moved their troops as close to the walls as possible and filled in the ditches in certain places, so they would have direct access to the walls with their siege ladders. Where they were successful in bringing down the walls, the fallen stones created a secondary barrier, so the Mamluks created a smooth road over them by covering the stones with sand in sacks. The stage was set.

When the Crusaders had seen the Tower of the King fall, "everyone was thoroughly demoralized, and began increasingly to send their women and children down to the ships. But on the next day, Thursday [17 May], the weather was very bad, and the sea ran so high that the women and children who had boarded the ships were unable to stay there, and they disembarked and returned to their homes."[32] The population of Acre nervously awaited the coming assault.

The Mamluks announced their attack with war drums. It must have been a fearsome experience. The Templar of Tyre reports, "Before dawn on the next day, Friday [18 May], a drum began a powerful stroke, and at the sound of this drum, which had a horrible and mighty voice, the Saracens assailed the city of Acre upon all sides."[33] Abu l-Mahani states, "at dawn on Friday 17 Jumada I the Sultan and his troops, mounted on their horses, moved in to attack before sunrise. They beat their drums, creating a terrible, terrifying noise, and the army massed under the walls."[34]

The Mamluk attack took place all along the walls. Behind the fallen towers the Crusaders attempted to defend their positions protected by their *chats,* wooden structures covered with leather, but without success. The Muslims poured in, led by soldiers behind tall shields, followed by men carrying Greek fire, by javelin throwers, and by archers, who "shot feathered arrows in such a thick cloud that [they] seemed to fall like rain from the heavens." The masters of the Templars and the Hospitallers attempted to defend St. Anthony's Gate near the citadel at the point where the walls of Montmusard met the old city walls. According to the Templar of Tyre, the enemy seemed like a "stone wall. Those of the enemy who were hurling Greek fire hurled it so often and so thickly that there was so much smoke that one man could scarcely see another."[35]

At this point the Templar of Tyre witnesses what to him was the turning point of the struggle:

> A javelin came at the master of the Temple, just as he raised his left hand. He had no shield save his spear in his right hand. The javelin struck him under the armpit, and the shaft sank into his body a palm's-length; it came in through the gap where the plates of the armor were not joined.... [Eventually, he cried out,] "my lords, I can do no more, for I am killed; see the wound here!"

> And then we saw the javelin stuck in his body, and as he spoke he dropped the spear to the ground, and his head slumped to one side. He started to fall from his horse, but those of his household sprang down from their horses and supported him and took him off, and laid him on a shield that they found cast off there, a tall, broad buckler....
>
> [The men carried him off to a safe place, and] there his household removed his armor, cutting his *cuirasse* off at the shoulders, ... Then they put him, still in his *epaulieres*, under a blanket, and took him towards the seashore,.... [They] carried him to the Temple fortress with the aid of other men, and they laid him within the house....
>
> He lived all that day without saying a word, for since he had been taken down from his horse he had not spoken, save only a word to those in the Temple; when he heard the clamor of men fleeing death, he wanted to know what was happening. They told him that men were fighting, and he commanded that they should leave him in peace.
>
> He did not speak again, but gave up his soul to God. He was buried before his tabernacle, which was the altar where they said Mass.[36]

This narrative is so detailed that we can readily imagine the Templar of Tyre by his master's side during this ordeal. What follows in the rest of his report is partly collected from others about developments elsewhere in the battle, and partly what he continued to witness at the Templar fortress. The Mamluks entered the city at several points and put everyone they saw to the sword. The carnage was terrible. John de Grailly and Otto of Grandson and the men of the French regiment fought bravely, but were forced to retreat. King Henry, observing the hopeless situation, fled to the harbor with the Hospitaller Master, where they boarded their galleys. Essentially the city had fallen by *tierce* that morning, 18 May, and the Mamluks hoisted their banners on the battlements. The city was in flames and what followed was a *sauve-qui-peut*. There was much looting by the Mamluks,[37] and the Templar of Tyre remarks,

> know, fair lords, that no one could adequately recount the tears and grief of that day.... There is no man in the world who has so very hard a heart that he would not have wept to see the slaughter. And I am sure that all Christian people who saw these things that day wept, because even some of the Saracens, as we learned afterwards, had pity on these victims and wept.[38]

The question of what ships were in the harbor and available for evacuating the Crusader refugees is a matter of great interest.[39] Clearly there were important ships owned by the major military orders, that is, the Hospitallers, the Templars, and the Teutonic Knights, which regularly called at the port of Acre.[40] Indeed, the Hospitallers even had their own dockyard at Acre.[41] However, on this fateful day, only the Templars' large ship, the *Falco*, seemed to be available; none owned by the other two Orders appears to have still been at Acre.[42] Thus we conclude that although ships of the major military orders assisted in transporting refugees from Acre before the siege began and at the start of the siege, by the eighteenth of May those ships had mostly gone with the exception of the *Falco*. It was therefore Venetian and, surprisingly, Genoese ships which were the primary source of emergency transport, both for the remaining survivors among the military orders and for other soldiers, citizens, and merchants who sought to escape.[43] In particular, Favreau-Lilie comments:

> some of the less well-situated citizens of Acre who, in contrast to the Frankish upper class and inhabitants of the Italian quarters had not had the chance to flee in time to safety before the fall... doubtless owed their lives to the Genoese – to the captains of two Genoese galleys, who retrieved many refugees from the sea, carrying them over to the larger transport vessels in front of the city.[44]

But inside the city, the battle raged on. At this point during the fateful day of 18 May, the Templar of Tyre observed that

> the greater part of the people, men and women and children, more than ten thousand persons, sought refuge within the Temple [compound], for it was the strongest place in the city. It occupied a large site on the sea, like a castle; it had at its entry a tall, strong tower, and the wall was very thick, twenty-eight feet wide. On each corner of the tower was a turret, and upon each turret was a gilded lion *passant*, as big as a donkey, which cost – the four lions and the gold and the labour together – fifteen hundred saracenate bezants, and it was the most magnificent thing to see. And on the other corner, towards the Pisan Quarter, there was another tower, and near this tower above the Street of St. Anne, there was a most noble palace which belonged to the master....
>
> The Templar fortress also had another very old tower, on the sea, which Saladin had built a hundred years before, in which the Templars kept their treasure; it was so close to the sea that the waves broke against it. And there were other lovely dwellings within the Temple compound, most noble ones of which I make no mention now.[45]

These descriptions bear witness to the firsthand knowledge that the Templar of Tyre possessed about these events and places – especially those pertaining to the Templars – during the Crusader defense of Acre. Before continuing with the account of the final days of Crusader Acre, he describes certain main structures of the city, essentially those lost on the eighteenth, concluding that "I will say no more about it [Acre], but it was one of the noble and lovely cities of the world. It was the seaport, the landfall, for all those who came to Syria, and its loss did great harm."[46] After making this reflective comment in the course of writing his text, the Templar of Tyre returns to his narrative of the fall of the city.

"Everyone," he says, "who could manage to do so came to the Temple, gathering inside. The king and the others who had retreated onto the galleys and other ships moved off and set sail, as did the *tarides* and *nefs* of the Venetian squadron. The good *prud'homme*, the patriarch and legate, Brother Nicholas [Nicholas of Hanapes, O.P.], withdrew to a *nef* of the Venetians. A sailor seized him by the hand, but he slipped and fell into the sea and was drowned." Various stories are told about this incident raising questions about how and why Nicholas died, but in fact the weather was bad, the waves were high, and he may indeed have drowned because of rough seas.[47]

As the ships set sail for Cyprus, all those remaining in the Templar compound were left to their fate, and they cried out with a great voice. Among those in Temple castle were Marshal Peter of Sevrey, the leader of the remaining Templars. There was also the Hospitaller marshal, Matthew of Clermont, along with some secular knights, women, burgesses, and other people. The Temple held out for ten days after the fall of the city, during which time Matthew of Clermont was slain in battle.

The remaining Crusaders were protected by the strong walls of the Temple castle, and after a few days some of the ships who had taken people to Cyprus came back to save those defenders still alive in Acre.[48] At this point the sultan, al-Ashraf Khalil, offered safe-conduct for the surrender of the Templar compound, and his offer was accepted. Then "the sultan... dispatched an emir to those in the Temple. The emir brought 400 horsemen inside the compound with him; these men saw the great number of refugees, and desired to seize the women who pleased them, to dishonour them. But the Christians found this conduct intolerable, drew their weapons, and flung themselves upon the Saracens, slaying them all and beheading them, so that none escaped alive. Then the Christians set themselves determinedly to defend their bodies to the death."[49] Several Muslim sources tell the story somewhat differently, and one writer claims to have been part of the Mamluk party to ride into the compound on that day who in fact survived with nine others.[50] Whatever the case, at this point Peter of Sevrey sent the commander of the Templars, Thibaud Gaudin, to Sidon by boat with their treasury under cover of night.[51] The Templar of Tyre may have been part of this group, whereby he survived, eventually to write his account of these events while living on Cyprus.

At this point the sultan renewed his offer, knowing what had happened the first time. The Templar marshal, Peter of Sevrey, "trusted the sultan," no doubt thinking of past dealings between the Templars and the Mamluk leader. However, "when the sultan had the marshal and the men of the Temple in his power, he had the heads of all the brethren and of all the other men cut off." Now it was a fight to the end.

The Mamluks began to mine the main tower of the Templar castle.[52] On 28 May the whole tower wall began to fall while Muslims and Crusaders were in mortal combat. When the tower collapsed it killed everyone fighting below, on both sides, with great loss of life. Following this catastrophe the Templar compound was taken by the Mamluk sultan.

> Et enssi fu prise et delivre la dite sité d'Acre le jour dou veredy, a. xviii. jours de may dou dit an, et la maison dou Temple .x. jours après, tout en la maniere que je vous ais devysé.
>
> And so, [reports the Templar of Tyre,] this city of Acre was taken, abandoned, on Friday the eighteenth day of May in the said year [of 1291], and the Temple compound ten days later [28 May], in the manner which I have described to you.[53]

In a famous article, G. Schlumberger concludes by saying that when Acre fell, "il y avait exactement cent quatre-vingt-douze ans que la sainte cite de Jérusalem avait été conquise par les Francs et que Godefroy de Bouillon avait été proclamé roi [sic] du Saint Royaume de Palestine."[54] It is sobering to reflect on the fact that Acre, capital of the Latin Kingdom and one of the most heavily fortified and strongly defended cities in the Near East, fell after a siege of only forty-four days![55]

The city of Acre was finally taken by al-Ashraf Khalil and the Mamluk army on 28 May 1291, but certain Muslim historians altered the date for symbolic reasons. Abu l-Fida and Abu l-Mahasin wished to note the coincidence between the taking of Acre by the Third Crusade and the fall of Acre to the Mamluks. The latter writes:

> It is marvelous to observe that Almighty God permitted the Muslims to conquer Acre on the same day and at the same hour as that on which the Franks had taken it: they gained control of Acre in 587/1191 after the famous siege on Friday 17 Jumada II/July 1191 at the third hour of the day, promised to spare the lives of the Muslims and then treacherously killed them. God permitted the Muslims to reconquer them this time at the third hour of 17 Jumada II,[56] the Sultan gave his word to the Franks and then had them slaughtered as the Franks had done to the Muslims. Thus Almighty God was revenged on their descendants.[57]

The Crusaders had essentially fought to the last man, and the three military orders along with the soldiers of the French regiment had distinguished themselves in the defense of the city. A few Templars had escaped to Sidon, where Thibaud Gaudin, former commander, was elected the new master of the order by the few surviving brethren. Nonetheless there is a negative side to the policies and conduct of the orders as well. "In view of the fact that the military orders only agreed officially to the evacuation of the population at a time when most of them could not be saved any more, they bear much of the responsibility for the death and often life-long captivity of countless individuals."[58]

Al-Ashraf Khalil's goal was to drive the Crusaders out of Syria-Palestine and into the sea. Even while the siege of Acre was underway, on 19 May, the sultan had sent a strong force to attack Tyre. The Templar of Tyre says that Tyre "was one of the strongest cities in the world. In it was a *bailli* named Sir Adam of Caffran, acting on behalf of the king. As soon as he saw the sailing ships that had left Acre, he and all the other knights and the wealthy people cleared out and abandoned the city of Tyre. The poor people remained behind and were taken prisoner, men and women and children who had no ships on which they might withdraw." Thus, although like Acre, Tyre had one of the most formidable defensive sites, was endowed with extremely strong walls, and was virtually impregnable to any attacker who did not control the sea, unlike Acre it was in effect handed over on 22 May without a fight.[59] "Shamefully," Housley comments, "the virtually impregnable port of Tyre was abandoned by its *bailli.*"[60]

Muslim sources report that few people were left in the city when it was taken. Of those that were, some Tyrians "asked for amnesty for themselves and their property in exchange for surrendering Tyre, and this was granted them."[61] The city was ordered to be destroyed and apparently substantial quantities of marble and other usable and valuable building materials were taken before any destruction was undertaken. However, as Little points out, the extent of demolition was limited because of the surrender of the city without a struggle.[62]

After Tyre and Acre had fallen, the remaining Crusader cities and fortifications along the coast were systematically attacked. Troops were sent to Sidon, Beirut, Tortosa, and Chastel Pelerin. At Sidon, a Mamluk army under Emir Sanjar al-Shuja'i [sic][63] arrived a month after the fall of Acre. In the face of this overwhelming force the defenders retreated to the sea castle, which had recently been refortified. The Templar of Tyre, who may possibly have been with the Templars in Sidon at this time, says Thibaud Gaudin "thought that he ought not to begin his term of office [as master] by abandoning the castle. He took counsel with his brethren, and with their consent he went off to Cyprus, promising them that he should send them relief." However, when no relief came and the Mamluk attackers had reached the walls of the sea castle, the remaining Templars "took counsel among themselves to abandon the place and go to Cyprus, ... [and] ... they left so noiselessly one night that the Saracens did not even realize they were gone until the morning of the next day."

"When Sidon had been thus abandoned, as I have explained to you, the Saracens took the castle and knocked it down in a heap."[64] According to Muslim sources, Sidon was taken on 17 July.[65]

Following the fall of Sidon, other towns and castles still in Crusader hands fell rapidly. Beirut was taken on 22 July, and Emir Sanjar al-Shuja'i "took the city and the castle, and knocked down the walls of the city and then razed the castle to the ground."[66] Haifa and Chastel Pelerin were taken by 30 July. "When those in Château Pèlerin saw that all was lost, they perceived clearly that they no longer had the ability to defend the castle, so they abandoned it and went to the Isle of Cyprus, and the Saracens completed their destruction of the land."[67] At this point the Templar of Tyre appears to have gone to Cyprus himself; he does not even mention Tortosa, which was also held by the Templars. The Mamluks finally captured Tortosa by 3 August. A few members of the order held out on Ruad, the small island off the coast of Tortosa until 1303, but for all intents and purposes, the Mamluk victory was complete. Abu l-Fida writes, "with these conquests the whole of Palestine was now in Muslim hands, a result that no one would have dared to hope for or to desire. Thus the whole of Syria and the coastal zones were purified of the Franks, who had once been on the point of conquering Egypt and subduing Damascus and other cities. Praise be to God!"[68]

Cyprus braced for a possible invasion, but none ever came. Meanwhile, al-Ashraf Khalil ordered Acre to be destroyed, and "at the Sultan's command the city was razed to the ground."[69] According to Little, this order was carried out by two emirs, one of whom, al-Shuja'i, "took an almost archaeological interest in the monuments of the city." It is well known that the entire portal of an 'Akkan church was transported to Cairo and later installed in the *madrasa*-mausoleum of al-Malik al-Nasir on Bayn al-Qasrayn, where it exists today.[70] Al-Shuja'i took a sarcophagus plaque, bearing a Greek/Latin (Rumi) inscription dated 222, to Damascus for decipherment; it turned out to be a prediction of the appearance of an Arab prophet who would conquer the world! Enormous quantities of marble from the churches of the city were taken to Egypt and Syria. Although the Muslim historians do not detail the measures taken to destroy the fortifications, several of them do quote a poet who says he saw it "ablaze after its walls and fortifications had been destroyed."[71]

Al-Ashraf Khalil remained in Acre until the first week of June, long enough to issue the commands to destroy the city and to send troops off to the other fortified coastal positions held by the Crusaders, but all together he stayed less than two weeks after the fall of the city. From Acre he went to Damascus, which had been informed of his great victory by carrier pigeon. When the sultan "arrived in Damascus about a month later, on the twelfth of Jumada II/12 June, accompanied by his vizier, Abu Sal'us, and the victorious troops, the entire city had been decorated, and sheets of satin had been laid along his triumphal path through the city leading to the viceregal palace. The sultan was preceded by 280 fettered prisoners; one bore a reversed Frankish banner; another carried a banner and spear from which hair of slain comrades was suspended."

At Damascus, the Sultan turned his attention to renovations and new construction in Aleppo, Baalbek, Tripoli, and Damascus itself. Eventually, in early 1292 he returned to his capital city in Egypt.[72]

> Cairo had been even more elaborately decorated than Damascus, for the agents of Mamluk emirs had worked for forty days in erecting miniature fortresses along the parade route to commemorate the victory, and again satin was spread along the parade route for the Sultan to walk on. The great campaign ended as it had begun, at the mausoleum of his father, [Kalavun], where the religious dignitaries of [the] city had re-assembled for sermons and recitations of the Qur'an, with the clear implication that al-Ashraf had fulfilled his father's wishes and the will of God with the successful completion of the campaign.[73]

The final defeat and humiliation of the Crusaders and the complete Mamluk victory and triumph had been achieved. Years later, in the mid-fourteenth century, Ludolf von Suchem reports, "since that day [when Acre fell] all Christian women, whether gentle or simple, who dwell along the eastern shore (of the Mediterranean) dress in black garments of mourning and woe for the lost grandeur of Acre, even to this day."[74]

PILGRIMAGE ACCOUNTS

The devastation in Acre and most of the other sites was substantial and the looting had been tremendous. Yet the sultan's order to raze the city to the ground must be taken as something of a figure of speech. Judging by comparing the reports of subsequent pilgrims, such as Ricoldus of Monte Croce (1293) and Ludolf von Suchem (1350), substantial parts of the city and its walls still stood.

Ricoldus of Monte Croce was a Dominican, born in Florence in 1243. He came to the Holy Land as a missionary just before the fall of Tripoli and Acre in 1288. He seems to have visited the holy sites in Jerusalem, Bethlehem, and Nazareth, which he describes in detail, before launching into a long discussion of the Muslims and the Mongols. He has very little to say about Acre, where he presumably only stayed briefly. The city of Acre, despite Crusader attempts to establish religious sites there worthy of the visit of a pilgrim, did not attract his attention. Ricoldus eventually wrote an account of his visit about 1293, just after the fall of Acre, among other texts.[75] He also wrote a series of letters from the East, which have been variously dated to 1298 or 1301.[76]

Ricoldus was in Baghdad, busy with his missionary activities, when news of the fall of Acre reached him in June 1291. Schein summarizes his situation and comments taken from his letters, as follows: "Ricoldo saw long convoys of Christians taken captive in Acre, making their way to remote parts of the Levant. He was told that more than 30,000 Christians were killed in one day in Acre. He learned from a nun 'worthy of belief,' who had been captured in Acre, about the death of all the thirty Dominicans in the city." From Baghdad he moved on to Mosul. "In Mossul he found on sale church utensils pillaged in Acre. Here he bought a missal and Gregory's 'Morals on Job.'" Ricoldus carried on with his missionary activities, but "all around him Islam was prospering. . . . For several years Ricoldo was alone in the remote parts of the Orient with no news from his order. He, 'miser et peccator,' sent to preach the faith of Christ to the Saracens, saw around him not only Mongols and others accepting Islam but even Christians converting to that victorious religion." Ricoldus faced a crisis of faith, but he clung to orthodoxy.[77]

The later pilgrim, Ludolf, was a German cleric about whom we know very little. We learn from his text that he was the rector of the Church of Suchem in the diocese of Paderborn. He apparently visited the Holy Land between 1336 and 1341, and wrote his account in 1350. Ludolf in contrast to Ricoldus gives quite a detailed report on the city of Acre, including a somewhat astonishing and exaggerated description of its past glory, an account of the final siege and Mamluk conquest, and remarks on its current state. He comments about the condition of the city when he saw it:

> The Saracens worked for many years endeavoring to utterly subvert and destroy down to their foundations all the walls, towers, castles, and palaces, lest the Christians should rebuild them; yet in hardly any place have they been able to beat them down to the height of a man, but all the churches, walls, and towers, and very many castles and palaces, remain almost entire, and if it pleased God, could with great care be restored throughout to their former state. At this day about sixty Saracen mercenaries dwell in Acre as a garrison for the city and port, and make a living out of silk and birds.[78]

These pilgrims' accounts demonstrate that Christian pilgrims continued to come to the Holy Land, during the fateful final years of the Latin Kingdom, and long after the fall of Acre. However, as we have seen consistently, these accounts only incidentally have anything much to say about the *realia* of the current circumstances – we tend to find this kind of information most in letters, when they exist – except in some unusually perceptive reports on the holy places or descriptions of relatively exotic sites. It is not surprising to find Ricoldus and Ludolf continuing the tradition of the genre of writing pilgrimage accounts, and it is only to be noticed that Ludolf does in fact pay, comparatively speaking, a great deal of attention to Acre and its disastrous loss. The source(s) of Ludolf's highly romanticized description of what Acre was like before the fall, with his ideas of the streets of the city "covered with silken cloths, . . . to keep off the sun's rays," of the "princes, dukes, counts, nobles, and barons [who] walked about the streets in royal state, with golden coronets on their heads," or "the richest merchants under heaven" remain yet to be determined. Perhaps his idealized notion of Acre springs partly from his sorrow over its fall. "Whose heart is so hard that the ruin and destruction of so great and noble a city would not melt it?" Now, he says, that Acre has fallen, "from that time forth all the glory of the Holy Land, of its kings, princes, and other lords, has been carried over into Cyprus."[79]

There is one other visitor to Acre in the later years of the thirteenth century who also merits comment at this point, Marino Sanudo. Marino Sanudo Torsello, the elder, was born in Venice around the year 1270. As a young nobleman he received an excellent education; he was accomplished in several languages including Italian, Latin, French, and probably Greek; and he traveled to Acre about 1285 where he stayed perhaps as long as two years to learn about trade in the Near East and his distinguished family's commercial interests. It is on the basis of what he learned in 1285–6, and possibly one further visit to Acre before it fell in 1291, that he eventually wrote his tripartite treatise, the *Liber Secretorum Fidelium Crucis*.[80]

Our interest in Marino Sanudo has primarily to do with the fact that, as part of his treatise on how to win back the Holy Land following the fall of Acre in 1291, he includes a well-known map of the city of Acre labeled in some detail. This map and all the maps in his treatise are thought to have been based on naval charts and information held by Italian merchants from Acre and elsewhere. Marino Sanudo apparently commissioned these maps, and he instructed the cartographers on aspects of how they were to be drawn, but fundamentally they are thought to be the work of Pietro Vesconte, a Genoese cartographer who had worked for a time in Venice. Even so, the city maps of Acre and Jerusalem seem to reflect Marino's personal knowledge and recollections of these Crusader cities. As a result these maps, including the map of the city of Acre, are often referred to as the *Mappae Sanudinae*.[81]

There had been maps of the Holy Land, including the city of Acre, done earlier, such as those done by Matthew Paris in 1253–4. However, compared to the maps of Marino Sanudo, those of Matthew Paris are somewhat simplified, sometimes preposterously inaccurate, and embellished with bright colors and pictorial vignettes.[82] By contrast the map of the city of Acre in the various manuscripts of the treatise of Marino Sanudo, though done in the early fourteenth century, present us with our most detailed cartographic information about the configuration of the city shortly before its fall in 1291.[83] A small number of maps are also attributed to Bishop Paulinus of Pozzuoli, who was a member of the pope's commission established to evaluate the various proposals to renew the Crusade movement.[84] The maps of Paulinus are very similar to those of Marino Sanudo, and so far, no critical study has been devoted to a detailed examination of these maps and their interrelationships.

The great value of the maps of Marino Sanudo lies in the detailed information he gives about the shape of the city, its main areas, and the location of its main features. He names the main towers along the walls, a total of twelve towers and fortified gates. He identifies at least fourteen sites in Montmusard and nineteen in the Old City. Yet despite the importance of his maps, no serious attempt has been made to study the codicology of the various manuscripts in relation to their maps, the differences in the scripts and titles, as well as the different scribes, the different configurations pertaining to details of the city streets, the different drawings of the various buildings, or the stemma defining the sequence of production of the maps extant.[85]

The great challenge that the map of Marino Sanudo presents is, of course, in relating its unmeasured dimensions, inconsistent proportions, and approximate locations with the city that we find today in Israel, known as 'Akko. Cartographers, planners, and various scholars have made a number of attempts to define this relationship, of which the most important recent attempts have been by Makhouly and Johns,[86] Müller-Wiener,[87] Jacoby,[88] Kesten,[89] and Kedar.[90] As of 2003, the archaeological evidence clearly supports the configuration of the city proposed by Kedar, although by no means has evidence for all the major features identified in the Marino Sanudo map been found.

THE DESTRUCTION AND DISPERSAL OF THE ART OF THE CRUSADERS IN 1291

ARCHITECTURE (MAPS 8A AND B)

The main facts about Crusader architecture in the period of these final years of the Crusader presence in the Holy Land pertain to the destruction that occurred when the Mamluks completed their conquests between May and August 1291. As we have seen in discussing the pilgrims' accounts, two facts stand out. First there was massive destruction by the Mamluks during their conquests, and only a few Crusader structures remained, some of which we can see today. In Acre major sections of the huge Hospitaller compound located inside the Old City survive (Map 8B), and this area is currently under intensive study through archaeological excavations sponsored and carried out by the Israel Antiquities Authority. By contrast the compounds of the Templars and the Teutonic Knights were both nearly totally destroyed.[91] Ruins of the Templar castle at 'Atlit, Chastel Pelerin, still survive, presumably more or less the way it was left when the Templars abandoned it in 1291.[92] Perhaps we may use its ruined state, unrebuilt in modern times, as an index to imagine the devastation of other places such as Acre, Beirut, Sidon, and Tyre, which have been reconstructed after 1291 and are currently being lived in today. Also quite a lot of the Templar fortifications at Tortosa still survive in the reconstructed city.

Second, we know that substantial amounts of building materials were taken from these sites, as the texts tell us. Whereas it is virtually impossible to identify the marble blocks, the columns, or the architectural sculpture that may have been shipped to Cairo or Damascus for reuse, we know of the relocation of certain *spolia*, such as the Gothic church portal from Acre referred to earlier (Fig. 334).[93] In neither case do we really have a clear idea as yet of the extent to which generic materials and symbolic parts of important buildings were relocated from their Crusader sites to Mamluk cities.

Very little material that can be associated with buildings in Acre from the late thirteenth century survive (Fig. 335). However, we have some architectural fragments in what may have been part of the Hospitaller compound that are of interest, although we cannot date them precisely. On the west side of the massive wall that defines the western part of the Hospitaller compound, three clustered corbel capitals with shafts survive above the roofs of current domestic dwellings (Fig. 336).[94] In their original setting they would have appeared on the east wall of some hall and/or corridor that may have been connected to or part of the Hospitaller barracks on the west side of the compound, not far from where the latrines have recently been found in the northwest corner of the compound. The style of the capitals and shafts suggests a mid- or late-thirteenth-century date, despite their heavily weathered and damaged state. Further archaeological work will be needed to help identify what part of the compound these architectural sculpture fragments can be associated with.

SCULPTURE

As might be suspected because of the tremendous damage to the various Crusader sites remaining in 1291, little sculpture of any sort, figural or otherwise, that can be firmly dated to the years 1289–91 remains. One of the categories of sculpture likely to be found is tomb sculpture, of which we know from work on Cyprus; there are three contemporary possibilities: tomb plaques or slabs with inscriptions or effigies, carved sarcophagi, and wall tombs, which may be carved and painted.[95]

Fortunately there is one fragment of a tomb slab that survives in Acre, which carries the date of 1290 (Fig. 337).[96] Clearly this is another incised effigy of a bishop in an architectural setting, somewhat comparable to the example from Jaffa in 1258 discussed earlier.[97] The prelate for whom this is his sepulchral monument, presumably placed in his residential church in Acre,[98] was William of St. John, the archbishop of Nazareth. Even though Nazareth had by 1288 been in Mamluk hands for nearly twenty-five years, Pope Nicholas IV was determined to maintain a full complement of residential clergy in the Latin Kingdom as much as possible. The pope sent him his pallium and arranged for his consecration in 1288. He died in Acre in 1290.[99]

In this case what survives is the lower third of a stone slab in two parts, which when joined measure 95 cm high × 113 cm wide × 5.5 cm thick. There is no indication of what kind of stone this is, but it is probably some kind of limestone, not marble.[100] The slab contains the lower part of a full-length standing bishop in his vestments. A chasuble containing an embroidered panel decorating the lower hem, including two eagles with wings displayed in medallions[101] and two other medallions with what appear to be unspecified heraldic designs, is indicated. He also apparently wears a pallium with fringe at the bottom and a guilloche-like decorated border. The border design is reminiscent of decorative motifs in Italy, as found in painting from central Italy; see, for example, the handsome painted cross of Alberto Sotio in Spoleto dated 1187.[102] The lower part of a stole is also indicated, along with his jeweled or embroidered buskins. Finally, the lower part of his crozier, tipped with a metal point, is also visible, held on a diagonal line across his body. The figure stands on a rectangular podium, which has a decorated geometric border. To the left of the bishop and apparently just in front of the podium, a tiny figure kneels in prayer. The figure appears to be a male wearing a long tunic and a soft cap.

Flanking these figures we find two slender columns which stand on column bases right and left. Surrounding the

figures and columns are two long inscriptions in Old French, incomplete and broken both at the top of the slab and by a wedge-shaped loss at the lower right. Prawer reconstructs the inscriptions to be read in two parts:

The epitaph, indicating his death in July 1290:

> "ICI GIST ARCHEVESQUE DE NAZARET GUILLAUME I(?)ECHE QUI TRESPASSA LE DERAIN IOR DE JUIGNET EN LAN DE LINCARNACION NOSTRE SEIGNOR IHESU CRIST MCCL XXXX."[103]

The commemoration, indicating his consecration in 1288:

> "EN LAN DE LINCARNACION NOSTRE SEIGNOR IHESU CRIST MCCLXXXVIII XVIII IORS ENTRANT JUIGNET PRIES DIEU POR LAME DE LUI E TOT(ES FEAUX)."

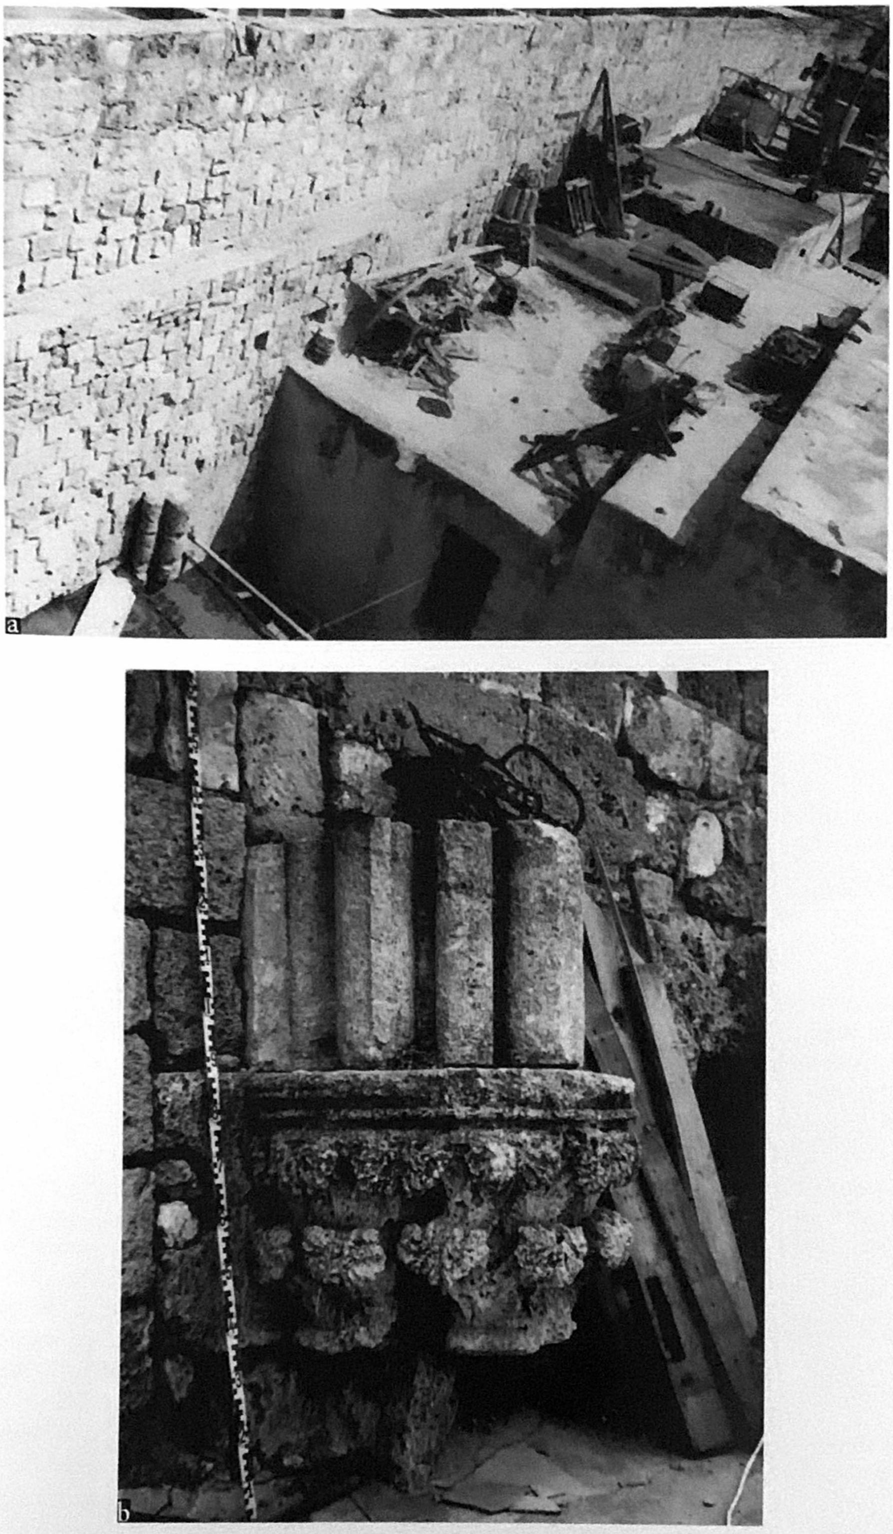
These are the full inscriptions for the lower part of the slab, but we have no idea what may have been inscribed on the upper part.

In this example there is clearly one major figure of the prelate, as reconstructed by Prawer.[104] Prawer identifies him as an archbishop, partly on the basis of the historical record, partly on the basis of the inscription, and partly on the basis of the iconography of the vestments he wears. The format of the tomb plaque is quite standard, as we have discussed earlier when dealing with the 1258 example from Jaffa. The technique is fairly simple and straightforward, with no particular refinements except the handsome decorative work on the pallium and the slippers. However, the work is done carefully, with no sign of haste.

Compared to the 1258 example in Jaffa, or the well-known Western tomb plaque of the great architect, Hugues Libergier (d. 1263),[105] we can only verify two of the basic components for these works in the Acre 1290 plaque: (1) the incised image and (2) the identifying inscription. Although there is also here a pair of columns, we do not know for sure whether there was an arch over the archbishop. Prawer does not reconstruct an arch, but it is very likely that there was one, because it is such a standard feature of these figural slabs in this period. We cannot know, however, whether there were censing or praying angels. These sometimes also appear, but it is not certain whether angels accompanied William of St. John's image here.

What is clearly one of the most interesting features of this plaque is the presence of the little kneeling and praying figure. Only 34 cm high and 8.5 cm wide, this figure is beardless and he wears a soft round cap on his head. Iconographically, the indication is that he is a layman, and his costume and small size suggest that he is a member of the bourgeoisie, not an aristocratic figure. He may have been a man of means who was the donor for this plaque. He could have been a pilgrim or a penitent, but he may have been a relative of the deceased.

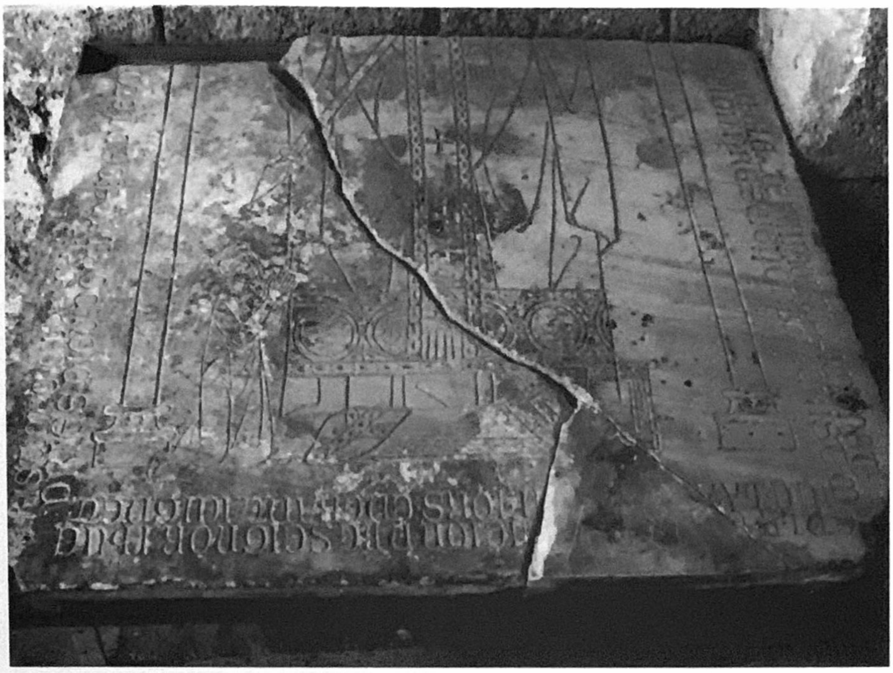
Compared to other works of Crusader art that contain such kneeling and praying donor figures, it is clear that this figure is very small in the normal relationship with the much larger holy figures, whoever they are. When we look at the comparable donor figures on the painted columns in the Church of the Nativity in Bethlehem from the twelfth century, we see that the most likely identification of these images is as pilgrims.[106] On the icons we have two major relevant examples, a male donor in simple robes and no hat, supplicating the mounted soldier saints, George and Theodore (Fig. 74, App. no. 94/1463), and



336. Acre: Corbelled capitals and shafts in situ on east wall of the west hall adjoining the possible site of the barracks in the Hospitaller Convent:
a. View of the east wall with extant capitals and shafts.
b. View of the central set of corbelled capitals with fragments of ribs springing from their abacus.

a finely dressed woman who reverences the foot of St. Sergios (Fig. 199, App. no. 14/80), who is also a mounted soldier saint. In these two cases clearly these small figures are prayerful supplicants, who may be pilgrims, but who certainly are very likely donors, that is, the persons who ordered these icons, or if not that the persons for whom the icons were commissioned.

On our tomb slab the little praying figure is very closely associated with the figure of the bishop, by virtue of the fact that he kneels just on the edge of the podium on which the bishop stands, and his praying hands seem to touch the bishop's robes. This degree of contact suggests that this figure might possibly be a relative, but if not, may well be the donor who commissioned



337. Acre: Tomb Slab (fragment) of William of St. John, archbishop of Nazareth.

this tomb slab for the archbishop. As the donor he is engaged in praying for the repose of the soul of the deceased, as well as praying that the holy bishop will remember him in Heaven. This latter aspect is clearly part of the function of the two icons, which also may have been done to commemorate relatives whom the saints depicted are meant to assist. In any case, the presence of the donor/praying figure is a standard feature of a number of types of images in the Crusader East, some connected to holy sites, some linked to holy icons, and in the case of the tomb slab, some pertaining to tomb effigies.

Stylistically it is difficult to say much other than this is a rather standard example of a Gothic-type tomb plaque. The handling of the figures, with enormous scale differences, is typical of the twelfth and thirteenth centuries. The design of the large figure in simplified linear terms, fully frontal, rather flat, and more or less weightless on feet, which suggest the figure is suspended instead of standing, is quite abstract, but not so unusual for the later thirteenth century, East or West. The pose of the little donor/praying figure is also rather abstract, with his two legs indicated and his kneeling posture in a quite uncomfortable configuration – one knee and leg behind the other – in terms of observed reality, but rather effective as a pictorial representation of what the figure is doing. This is not Gothic naturalism as we find it in France already in the 1230s, but this conservative and simplified abstract style is an effective decorative mode for a tomb plaque.

What we can say in conclusion is that this is a standard example of an incised tomb plaque from the Latin East, with no unusual features that would belie the date only months from the fall of Acre. It demonstrates that established media continue in what we know to be this last phase of work in Acre without significant change. In this case we have been able to evaluate the 1290 work against an earlier example from 1258 and have shown the essential continuity along with the minor variations. It is, however, likely that there were many such tombs done and that similar slabs have been destroyed in the interim. It would be of great interest to know whether any carved sarcophagi or wall tombs were also done in Acre at this time, but the fact is that none has survived for us to study.

In sculpture we are glad to be able to cite any examples with figural designs, just because of the destruction, and the fact that these works remained in place. In painting the situation is very different. Many more examples survived because they were portable objects that their owners could take with them when they sought refuge, either before or during the final siege.

PAINTING

In the midst of the devastation at Acre, during and after the final siege in 1291, "the libraries and works of art disappeared almost completely."[107] This was a grievous loss in 1291, just as it had been in 1187 when Saladin had captured Jerusalem. Some books were captured as spoils, and as we have seen earlier, Ricoldus of Monte Croce bought two of them in Mosul, a missal and a copy of Gregory's "Moralia in Job." Most of what survived among the books and icons, however, must have left Acre long before the final days when the city came under attack by the Mamluks.

Manuscripts

With the illustrated manuscripts it is possible to propose several works that appear to have been done in the very last years of the existence of Crusader Acre, between 1289 and 1291. The pivotal work is yet another *History of Outremer* codex, now in the library of the Laurenziana in Florence, MS PLU.LXI.10.

History of Outremer, *Florence, Biblioteca Laurenziana* MS *PLU.LXI.10:* Laurenziana MS PLU.LXI.10 is probably the last codex we can identify to have been done in Acre before it fell (Fig. 338, CD 470–95).[108] It was written by a French scribe and illustrated by the Paris–Acre Master with twenty-five panel miniatures. There is no sign of haste in its production; indeed we may even say that of all the manuscripts this master worked on, this is the most carefully done. The text is written more spaciously than we saw in Paris MS fr. 9084 and Boulogne sur Mer MS 142. The text is written with few abbreviations, there are extensive rubrics to introduce each book, and no miniatures are omitted or missing.

The text of this codex is complete as far as it went, up to 1248 on fol. 336v for the original part of the book. The remainder of the text was added by a different scribe shortly thereafter, covering the years 1248 to 1277. When the manuscript was finished, a set of annals summarizing events between 1085 and 1277 was added as a kind of preface to the book.

The codicological characteristics of this book are consistent with earlier manuscripts done in Acre by the Paris–Acre Master. The vellum is slightly better in quality although rather thick and often slightly yellowed with age, but frequently very white on the skin sides and still very pliable. The care with which this book was done is impressive, ranging from the precisely done rulings rendered faintly so as not to mar the beauty of the script, to the calligraphic decoration, or the miniatures. Each book incipit is given, along with its miniature, and the text starts with a large and handsome red and blue calligraphically decorated initial along with red and blue text frames. Compared to the earlier *History of Outremer* codices, the decorative vocabulary of the red and blue ornamental initials is increased to include not only standard floral and keyhole motifs, but also the fleur-de-lis in the "O" of Book 4 (fol. 42r).

The work of the Paris–Acre Master is stylistically polished, with active and nicely proportioned figures, but with conservative, somewhat understated colorism, which is more subdued than we find in Paris MS fr. 9084 or Boulogne sur Mer MS 142. The enhanced plasticity of the figures is rendered with more subtle shading, and a more stable emotional tenor overall, without the same intensity seen in earlier mourning scenes, for example. I find this artist here to be "at the height of his mature powers, still entirely western in his formal instinct but now smoothly blending ideas drawn from his Acre experiences."[109]

The miniature cycle in format is confined to small rectangular panels; the expanded size of the panels found in MSS fr. 9084 and Boulogne sur Mer 142 is abandoned. Overall the cycle combines ideas from its immediate predecessors, the MS fr. 9084 and MS 142 codices, and the earlier St. Petersburg–Lyon cycles along with certain new ideas. Most surprising is the fact that for Books 1 to 15, it is the older St. Petersburg–Lyon cycles that are followed, as seen with the scenes of pilgrims praying at the Holy Sepulcher at Books 1 and 9. Furthermore, it is striking that the Paris–Acre Master does not choose to follow the imagery of the first five miniatures, which are so closely related in its immediate predecessors, Paris MS fr. 9084 and Boulogne sur Mer 142. These observations suggest both that this artist is operating independently at this point, in response to this commission and his patron, and that presumably MSS fr. 9084 and 142 had already left Acre by this time.

In his approach to the miniatures in the cycle of Laurenziana MS PLU.LXI.10, the Paris–Acre Master decisively simplifies the story of each miniature to one unified event. He stresses narrative clarity in his representations even while he varies the standard iconography, and in some cases he enriches the pictorial vocabulary of the scene. In the regular cycle we find the familiar representation of Jerusalem at Book 8 enhanced by the monumental domed structure, meant to represent the Church of the Holy Sepulcher.[110] We see the standard coronation scenes varied from kneeling (Book 16) to seated (Books 10 and 19) to standing (Book 14) poses by the new king. We notice the admirable clarity given to the scene of the humiliation of the patriarch of Antioch by Raynauld de Chatillon (Book 18), with the large insects buzzing around the patriarch's head, exposed to the mid-day sun with his pate smeared with honey.

Among his most interesting innovations compared to earlier cycles, he introduces a new image, Bohemond giving Tancred custody of Antioch before his trip West, at Book 11. This theme is otherwise only found in the earlier Vatican MS Pal. Lat. 1963, which was done before 1268 in Antioch. He also offers an interesting innovation for the deathbed–coronation scene of Baldwin IV and the youthful Baldwin V at Book 23, Chapter 6. Here where the text offers no comparable narrative, the artist conflates these two events into one. However, his most notable pictorial innovations occur in the new illustrations for the continuation to the main part of the *History*. At Book 24 we find the crowned Richard I, *Coeur de Lion*, attacking Acre by ship in 1191, and at Book 25, we see the joint coronation of John of Brienne and his bride, Maria of Montferrat-Jerusalem, at Tyre in 1210.

The innovations in this cycle and the high quality of the manuscript clearly suggest that this book was commissioned for someone who ordered the special scenes and the extensive rubrics. Whoever this patron was, he – or she – apparently fled from Acre with his or her codex in hand, unfinished, as the end approached. The final portion of the text, dealing with the years 1248 to 1277, was added later along with a double-decker historiated initial. The miniature depicts Louix IX en route to Aigues Mortes with his army above, and below, sailing with his fleet to Cyprus during the Crusade of 1248–50 (CD no. 495). We know that the book was unfinished because the annals written in Acre cover the years 1085 to September 1277. When the text was completed later, it was carried on a bit further, however, to November 1277.

The written addition to the text and the final miniature in this codex are important because they provide evidence for the fact that the manuscript was begun at Acre and finished later in western Europe, presumably after the patron had arrived safely following the catastrophic events in the Near East. When and where was this final miniature done?

There can be no doubt that the format of this final miniature and the style of the artist are completely different from the Paris–Acre Master's work in this codex. The illuminated initial "L" has colorful floriated decoration along its stem and the lower parts of the letter frame a multicolored vine surmounted by a splendid winged green dragon, looking very oriental. Perhaps the artist drew his idea for this dragon from Eastern textiles.[111] In typical Italian fashion both the letter and the initial are "floated" on the same gold ground, which is outlined in black.

The miniature itself is actually a double-decker panel format image seamlessly unified with the initial by means of the gold ground and by the fact that the stem of the "L" forms the left side border for the scenes. The style of the artist is different from the Paris–Acre Master in form and color. No other work by the hand of this second artist can be found as

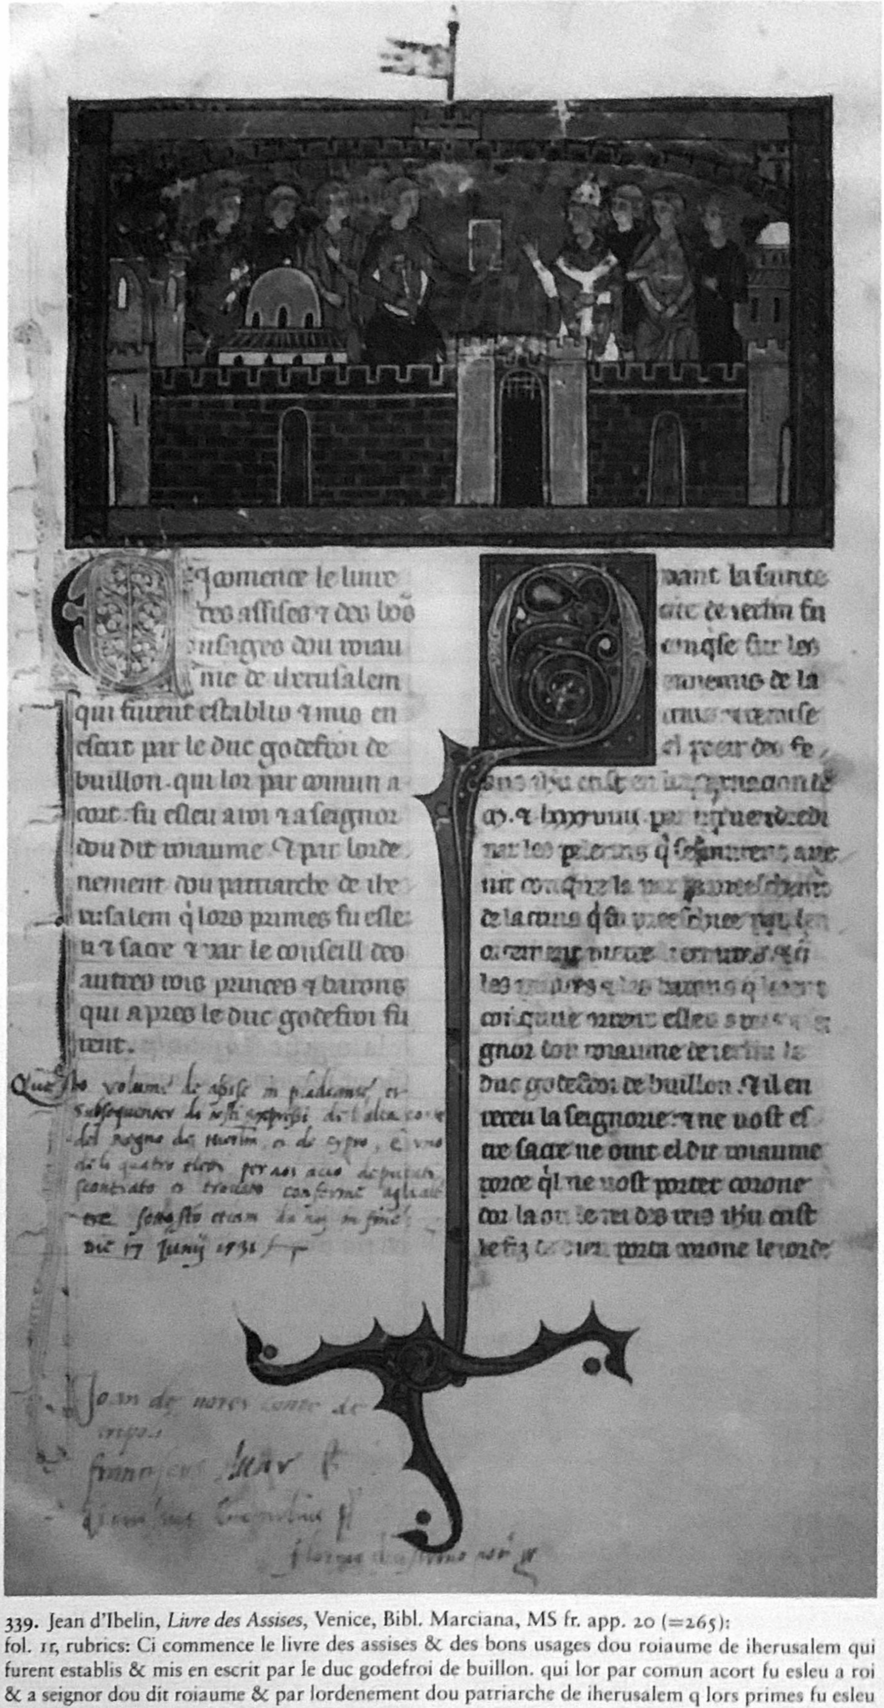
yet, but aspects of his figure style and his soldiers can be compared with several other manuscripts in what Degenhart and Schmitt call the Sanudo–Paolino group among Venetian area paintings. This group of manuscripts includes several examples of Marino Sanudo's *Liber secretorum fidelium crucis*,[112] a codex of Burchard of Mount Sion's, *Descriptio terrae sanctae*, now in Padua, Seminario MS 74,[113] two manuscripts of Geoffrey de Villehardouin's, *Conquête de Constantinople*, one in Oxford, Bodleian Library MS Laud misc. 587 and the other in Paris, BN MS fr. 4972.[114] There are also parallels with figures in the *Mariegola di S. Teodoro*, now in the Museo Correr.[115] Other works show parallels with the horses and architecture, such as in a codex of the *Liber Secretorum Fidelium Crucis*, by Marino Sanudo, now in Brussels, and the ships that sail through fluffy waves can be compared to the painting on the Pala d'Oro by Paolo, Luca, and Giovanni Veneziano.[116] On the strength of these comparisons we propose to attribute this miniature painter to Venice, although as mentioned earlier, we can find no other work by his hand. No specific dating is possible but the work appears to have been done early in the first third of the fourteenth century in Venice.

The idea that this work may have been done in Venice, and not, for example, Cyprus, is not necessarily surprising, given the strong commercial and artistic ties that existed between Venice and Acre, and the increase in painting in Venice that is known in the early Trecento. The representation of the ships in this miniature is known from Venetian work down to the details of the lateen rigging, the positions of the masts and crows nests, and the lashing of the yardarms.[117] Not only the representation of the ships, but also that of the soldiers, as well as the architecture, with its characteristic Italian battlements, seem clearly to refer to Venice. We recall the importance of Crusader artists working in a Veneto-Byzantine Crusader style painting icons in Acre and Sinai during the period from the 1260s through the 1280s.

The importance of this manuscript and its final miniature is considerable for our understanding of painting in Italy and the Crusader East. Laurenziana MS PLU.LXI.10 is the only known extant illustrated manuscript started in Acre but completed in the West, in this case apparently Venice. The addition of a final miniature painted in a high-quality Venetian style of the early fourteenth century forms a remarkable conclusion to this handsome and important manuscript and sets off the Parisian Gothic style of the other twenty-five miniatures by contrast. The incompleteness of the codex, before the last text segment and that final miniature were executed, combined with the characteristics of the Paris–Acre Master's work is all crucial evidence that the production of the book was interrupted by events in Acre as the end approached in May 1291. This suggests that this manuscript must be the last extant codex executed in Acre before the city fell. The date of the dissolution of the workshop in which the Paris–Acre Master worked in the face of the impending danger cannot be determined exactly, but we can propose March of 1291. By that time Crusader awareness of the coming attack must have turned the labor and attention of all able-bodied citizens to the grim task of defense.

What does this codex tell us about the fate of the Paris–Acre Master? The facts are that our Master did not finish this work, and that we have no later work by his hand in the Near East. We do see the influence of his style and iconography in the West through the 1290s, but we do not see another later work done by him in Europe either. This suggests clearly that he did not survive the fall of the city. We may imagine that very likely he died fighting on the walls of his adopted city during the siege by the Mamluk army in April and May 1291.

The Livre des assises*, Venice, Biblioteca Marciana, MS fr. app. 20 (=265):* The Laurenziana *History of Outremer* codex is not the only work illustrated by the Paris–Acre Master in the last years of Acre before the fall. Shortly before undertaking MS PLU.LXI.10, our Master executed a miniature panel, the headpiece that begins the *Livre des assises* by Jean d'Ibelin, the most famous of all legal treatises on the feudal customs and the workings of the *haute cour* in the Latin Kingdom.[118] This sole extant illustrated *Livre des assises* manuscript is now preserved in Venice at the Biblioteca Marciana as MS fr. App. 20 (=265) (Fig. 339, CD 496).[119] One other early manuscript of this text,



339. Jean d'Ibelin, *Livre des Assises*, Venice, Bibl. Marciana, MS fr. app. 20 (=265):
fol. 1r, rubrics: Ci commence le livre des assises & des bons usages dou roiaume de iherusalem qui furent establis & mis en escrit par le duc godefroi de buillon. qui lor par comun acort fu esleu a roi & a seignor dou dit roiaume & par lordenement dou patriarche de iherusalem q lors primes fu esleu & sacre & par le conseill des autres rois princes & barons qui après le duc godefroi furent.
[text] (Q)uant la sainte cite de ierlm fu conqse . . . (Illuminated initial below the miniature panel: pink (Q) with long tail and pinwheel flourish in the lower margin, each scalloped stem of which is embellished with a gold disc.)
Miniature panel on fol. 1r, 7.9 × 13.9 cm.
1. The *haute cour* of the Latin Kingdom meets in Jerusalem with the king and patriarch presiding. (photo: by courtesy of the Biblioteca Marciana, Venice)

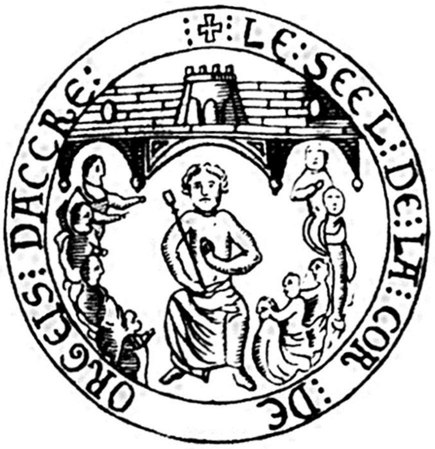
also apparently done in Acre, survives now in Paris, Bibl. Nationale MS fr. 19025, but it is unillustrated (CD 497).[120]

It is remarkable to find a legal text with figural decorations and it raises many questions, including who might have commissioned it and in what workshop might it have been executed. This miniature panel appears in a space reserved for it above two columns of text; in the left column of text we find the rubrics in fifteen lines,[121] and in the right column the text itself begins in twenty-one lines. A calligraphically decorated (C) with a blue and red text frame accompanies the rubrics. An illuminated (Q) with a long tail down the interval acting to frame the text and culminating in a pinwheel in the lower margin sets off the start of the main text.

Even though this is the only panel painted by the Paris–Acre Master for this manuscript, the miniature is remarkably rich in its references to the repertory of imagery and to the style of other works by his hand. Careful consideration of the image in terms of iconography, style including colorism, and the calligraphic decoration along with the codicological features of the book can enable us to place this work very close to his paintings in the Laurenziana codex *c.*1290. Clearly, inventing an illustration for a legal text such as this must have posed a real challenge to our Master, a challenge for which there were no known precedents available,[122] comparable to the miniatures for the Rhetoric texts in the Chantilly codex, which he did for William of St. Stephen in 1282. In this case, the Paris–Acre Master conceived of the *haute cour* meeting inside the walls of Jerusalem. The conventions for the city walls are drawn from his repertoire seen in the *History of Outremer* illustrations of Jerusalem, Antioch, or Tyre where the front and rear walls are represented.[123]

Beyond the idea of the rather large walled city, however, our Master introduces imagery with a number of interesting aspects. Whereas it is normal to find the city of Jerusalem with a domed structure, as here, it is unusual to find architecture with flying buttresses, as seen on the longitudinal building on the left side of the miniature. We have, however, seen such a buttress on the Church of St. Denis depicted in the *censier* for the Abbey of Ste. Genevieve in Paris in 1276, the earliest known work by our Master in Paris before he came to Acre.

It is also unusual in these miniatures for a banner to fly high above the city, on its highest tower, breaking the upper frame of the miniature where it is singularly visible in the upper margin of the folio. The banner marks the central axis of the picture, drawing attention to the two important figures seated beneath it, and it is interesting because of its heraldry, *argent*, a cross *geules.* It must be noted that despite damage to the pennant, it clearly is a red cross on a silver ground, and as such it is, *mutatis mutandis*, a banner comparable to the red crosses on white grounds carried by mounted soldier saints seen on a number of Crusader icons discussed earlier.[124] The silver standard and the gold ground of the city below make a splendid combination for this impressive miniature. In any case, we consider this banner to be a simplified royal ensign for the king of Jerusalem, indicating his presence at the *haute cour*.



LE SEEL DE LA COR DE ORGEIS DACCRE

340. Acre: Seal of the *cour bourgeois*, 1269. (photo after Paoli, *Codice Diplomatico*)

The question of what model the Paris–Acre Master might have used for his depiction of the *haute cour* itself leads us to consider an interesting source. The basic idea of representing the court as a deliberative body assembled in an architectural setting is easily identified from the work of the Paris–Acre Master, seen in such images as the council during the Second Crusade, in the Book 17 images of Paris MS fr. 9084 (fol. 214r), Boulogne sur Mer MS 142 (fol. 183v), and Florence MS PLU.LXI.10 (fol. 188v). However, the validation of such an image for the *haute cour* can be found in the fact that other courts, in this case, the *cour bourgeois*, has a seal with this type of imagery extant from the second half of the thirteenth century, in fact, from an act dating to 1269. Although the seal itself is no longer extant, we have its design reproduced by Paoli (Fig. 340).[125] What is significant about the imagery in our miniature, however, is the fact that not only the king, uncrowned but holding a scepter and a book, but also the patriarch is present at this assembly of the *haute cour*. Our master clearly goes beyond either model, however, in the sense that he gives the king a special green scepter, topped with a leafy trilobed design, and the book – presumably the law code, the *Livre des assises*.

The explanation for this imagery is essentially provided by the text of the *Livre des assises*, where it says that (1) Duke Godefroy de Bouillon did not wish to be crowned or anointed as king in Jerusalem where Jesus wore a crown of thorns, and that (2) Godefroy assembled the patriarch and the other members of the court where he had this book read to them. This newly copied and illustrated manuscript was the latest version of this important legal text. So what is illustrated here is the king presenting the *Livre des assises* to the *haute cour*. The *haute cour* was symbolically meeting in Jerusalem, but actually it had met in Acre since 1191. What is particularly striking about this imagery with regard to its execution in Acre in the late thirteenth century is the extraordinary prominence given to the patriarch, who appears here virtually as an equal to the king. In fact, his regalia is even more complete. This representation fully accords with the de facto temporal importance of the patriarch in the affairs of the Kingdom and his role in the city of Acre in the last decades before the fall in 1291.[126]

The style of the miniature clearly conforms in terms of proportions, poses and gestures, drapery, hair, and faces to figures that populate the three manuscripts of the *History of Outremer* by our Master: Paris MS fr. 9084, Boulogne sur Mer MS 142, and Florence MS PLU.LXI.10. We find the same formal repertory, with the same strong linear outlines, internal articulation, and flat color zones. The shapes of the eyes are round and wide open, with little of the "spectacled effect" seen in earlier Acre painting. The hair is given the signature curving flourish over the ear. The drapery is also given a version of the "keyhole" convention on the knee of the king, a configuration found early on in this Master's work. Finally, the technique is seen to be comparable to these other manuscripts, visible especially in the painting but also in the blemishes on the background. In the latter, we find patterns of damage that reveal the grainy gray gesso on which the gold ground was laid. This aspect of the technique is paralleled with others, such as the character of the rulings, the type and color of the ink, and the peculiar flaking of the ink, due in part to the method of preparing the vellum, all of which link this codex and Paris MS fr. 19025 to the Acre scriptorium in which our Master worked.

In order to propose a dating for this manuscript we can consider several aspects of this miniature. First, the Master seems to have drawn on a full repertoire of his imagery from earlier works, suggesting a date later rather than earlier in his output. Second, our Master uses a border for this miniature that seems closely related to, if not based on, the work of the painter – perhaps his assistant – in Paris MS fr. 20125, painted about 1287. The border consists of a thin gold strip enclosing vertical blue and horizontal purple elements with red squares at the corners articulated with white "x"-shaped forms. This formula corresponds exactly to the frames in MS fr. 20125, but the blue, purple, and red palette with white surface decoration is typical of the Paris–Acre Master's work between 1280 and 1291.

Another important aspect of this style is its colorism, and this too suggests a later date in this period.[127] It is evident that the colors used by our Master in this miniature are rich yet focused on the purple–pink–lavender–blue–red palette of typical Gothic works. The use of yellow, green, and red is very limited here. When we compare this rather conservative Gothic colorism with other Acre works by our master, we find that it corresponds readily with the palette of the Florence MS PLU.LXI.10 *History of Outremer*, which is the latest manuscript painted by our Master extant. Furthermore, looking closely we see that the way the colors are used reflects considerable refinement in terms of the shading of draperies and the modeling of faces.

The stylistic characteristics are paralleled by the treatment of the calligraphic decoration. Careful observation shows that the red and blue calligraphic initial was executed after the miniature was started, because of the pattern of overlap. The "keyhole" design of the "C" is a common pattern in the manuscripts of the Paris–Acre Master, although it is not necessarily the case that the painter and this decorator are the same person. In any case, the closest parallels to this example are found in the MS PLU.LXI.10 codex, as can be seen at Books 9, 14, and 17 among others.

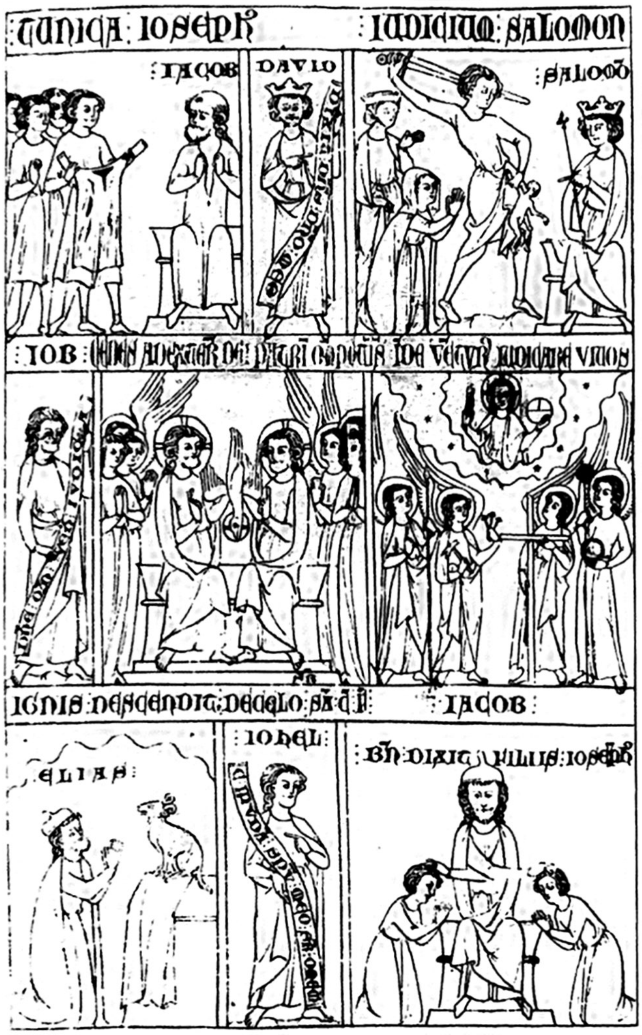
It is difficult to say with any precision just what the date of this manuscript now in Venice may be, without further information on the patron and the purpose of this book. We can observe, however, that after the coronation of the Lusignan king Henry II in 1286, the members of the Ibelin family returned to prominence along with their clients, men such as Geoffrey Le Tor, men who had been largely responsible for composing the *corpus* of Latin Syrian legal texts. It is a commission in this circle that we eventually expect to be able to identify as research continues. For the moment, therefore, we are dating this codex between 1287 and 1290, and favoring an attribution closer to 1290 based on the links with the *History of Outremer* manuscript in Florence, from *c.*1290/1. This proposal accords with the evaluation of the early part of the manuscript from the point of view of the text as stated by Peter Edbury.[128]

Finally there is one other interesting point to be made. With the discovery of this manuscript we now have two books illustrated by the Paris–Acre Master with links to the legal establishment in Acre. In 1282, shortly after his arrival in the Latin Kingdom, the Paris–Acre Master executed the Rhetoric manuscript illustrations (Chantilly, MS 433) for William of St. Stephen, one of the most distinguished jurists in the Hospitaller Order in the 1280s and 1290s. At the end of this decade, *c.*1290, the Paris–Acre Master was also commissioned to decorate the *Livre des assises* by Jean d'Ibelin, one of the most important legal texts produced in the Latin Kingdom. It is interesting that these two commissions were both given to this Paris-trained artist, and that Crusader lawyers had a significant interest in illustrated books. It suggests that other legal texts may also have been given figural decoration and that we should be alert for additional possible finds in this area. As Prawer observed years ago, "the kingdom's nobility developed . . . a passionate and even fanatic interest in law and legality. In no contemporary Christian nobility was knowledge of customary law and procedure and mastery over the intricacies of constitutional law so cultivated and cherished as in the Latin Kingdom."[129]

The* Credo *by Joinville, Paris, Bibliothèque Nationale, MS lat. 11907: Fortunately, however, this is not the only other codex by our Master from this very late period. At the Bibliothèque Nationale in Paris, we find MS lat. 11907, a compendium that contains two leaves, fols. 231 and 232, on which are found illustrations of the *Credo* by Jean, sire de Joinville (Fig. 341, CD 498–501).[130] As Scheller points out, Joinville, who is best known for his history of Louis IX, originally wrote the *Credo* in Acre in 1250–1. "The purpose of this 'commentary' on the 12 articles of the Creed was to make it impossible for Satan to take possession of the soul of a dying man in his final hours. This was achieved by reading the *Credo* aloud to him and showing him the illustrations. The text and illustrations must have been worked out in close consultation between the author and the draughtsman."[131]

It is significant that the text was revised and a second version was prepared by Joinville after he returned to France, in 1287, which survives in one manuscript, Paris, Bibliothèque Nationale MS n. a. fr. 4509, with twenty-six miniatures. There is also a French breviary in St. Petersburg with a separate set of twenty miniatures also related textually to the earlier Crusader version. It is, however, significant that the Paris MS lat. 11907 drawings are completely different in format in contrast to the other two manuscripts. The reason for the different format is that the Paris MS lat. 11907 leaves were meant to serve as a model on the basis of which monumental fresco paintings were to be done. Furthermore, these paintings were apparently to be carried out in Acre because the drawings were done there by the Paris–Acre Master.

In 1976 I offered a proposal for a chapel project that these drawings might have been intended to serve in Acre (Fig. 342).[132] Judging from the discussion by Scheller, the majority of scholars favor the idea that these drawings were done to serve as a model for such monumental paintings, including Delaborde and Lauer, van Os, and Scheller. Scheller seriously



341. *Credo* of Joinville, Paris, Bibl. Nationale, MS lat 11907: fol. 231v, 27.95 × 17.5 cm. (photo: by courtesy of the Bibliothèque Nationale de France, Paris)

entertains the idea they could have been done in Acre, but he cannot quite overcome certain doubts, which lead him to remain undecided over whether the chapel was in the Latin East or was Joinville's own chapel in Champagne, established in 1263, but no longer surviving.[133] Further discussion can perhaps clarify the issues.

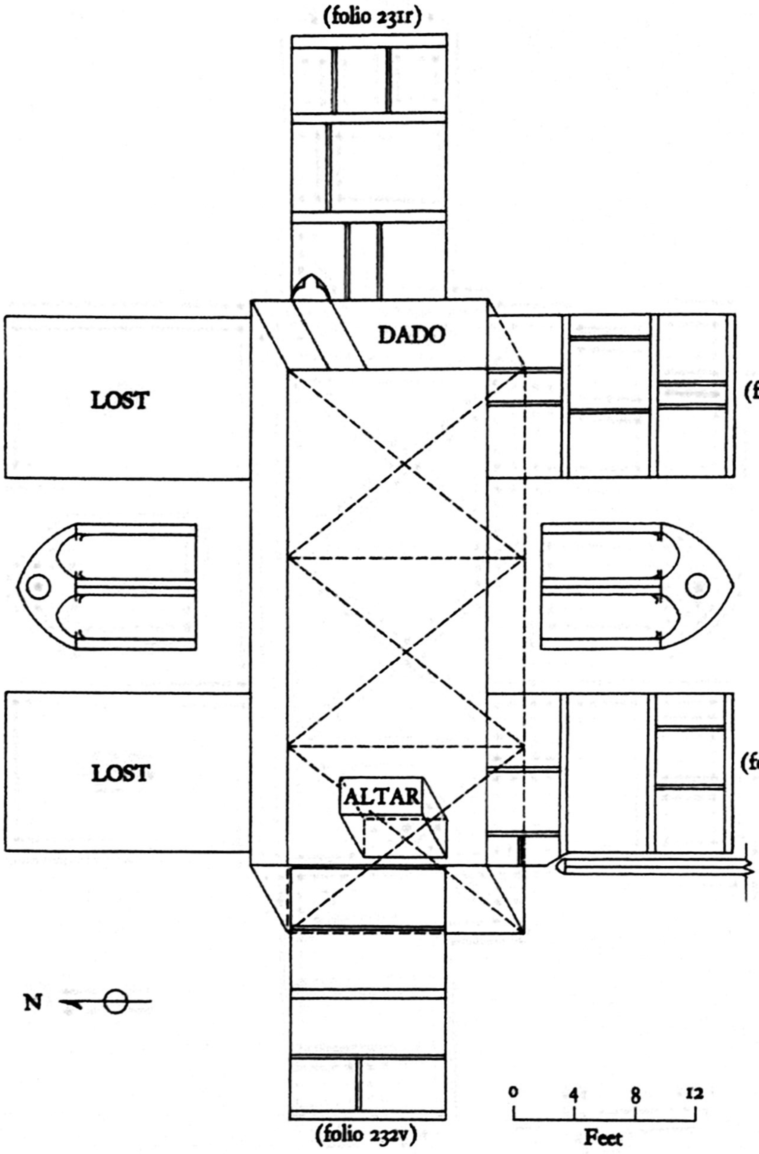
There seems to be no doubt that the artist who executed the drawings was the Paris–Acre Master, who was in Acre in the 1280s. No chapel survives in which the program was actually carried out, neither in Acre nor in Champagne. Looked at strictly with reference to their dating, these drawings seem to date in the late 1280s. Several special features of the program, besides the accomplished style of the Paris–Acre Master in the drawings, suggest the project was done in the East for a chapel project in Acre shortly before 1291. Van Os discusses the function of the program, for the saving of souls during the time of their dying, as related to the mission of an order linked to Augustinian theology and the Augustinian rule.[134] Van Os draws our attention to the unusual prominence of Augustine in the drawings (fol. 232r), with no halo, suggesting a living and privileged presence in these images. He is thinking of orders living according to Augustinian rules in France, and the fact is that the rule of the Hospitallers in the Holy Land was partly based on Augustine's rule, as explained by J. Riley-Smith.[135]

The original intention of Joinville that this program was for Crusaders in the East, with the focus of the program on serving as a visual aid to the faith of dying men, and the likely configuration of the program as reconstructed based on the drawings, seem to support a possible Acre project. Scheller notes that "one aspect of this reconstruction is open to doubt. The chapel altar would have been located at the western end, facing the entrance and below the scene of the Last Judgment. This would have been a fairly unusual arrangement."[136] Unusual or not, such an organization is possible; we know of other similar arrangements, the most famous of which is of course the much later Sistine Chapel in the Vatican, where Michelangelo's *Last Judgment* fresco is over the main altar on the west wall. However, in our proposed reconstruction, the whole point of having the Last Judgment over the altar of the chapel is to focus on the mission that this program was meant to serve here in the context not of a palatine chapel, but of a hospital chapel. As a way for dying men to keep the faith and preserve their souls from evil, having the cycle culminate over the altar with the Last Judgment behind it would ensure that the gift of grace and God's mercy and salvation would be available to those who came to Christ through the Eucharist administered during the last rites.[137]

Finally the drawings are closely related stylistically to the work of the Paris–Acre Master, as we have argued in some detail already.[138] However, what is evident about them is that they are quite nicely done, rather freely drawn, fluidly handled, comparatively spacious and well articulated, the product of a mature master, with a large-scale project in mind. Parallels for some details can be found in a number of works by his hand, including the *History of Outremer*, Paris MS fr. 9084 and Boulogne sur Mer MS 142, the Bible selections, Paris MS n. a. fr. 1404, and the *Faits des Romains*, Brussels MS 10212. Other aspects, such as the relative complexity of the draperies, are found in the cycle of paintings in Florence MS PLU.LXI.10., whereas the composition of assemblies of figures, which is such a feature of the drawings, is of course the central feature of the miniature in the *Livre des assises*.

On the basis of these further considerations, it seems likely that the drawings in Paris MS lat. 11907 were done in the very late years of the 1280s. This accords with Lauer's original dating to the late thirteenth or early fourteenth century, but our proposal offers more precision to the argument with an attribution *c.*1288–90.[139] It must be admitted, however, that it is difficult to date the Marciana MS miniature relative to the drawings of Paris MS lat. 11907, as to which came before and after. At this point they both seem to date to the late 1280s, and we shall hope that future research can uncover ways to distinguish them on this basis.

By attributing these three works from the hand of the Paris–Acre Master to the period just before the fall of Acre in 1291, and by adding a completely heretofore unknown work to this period in the form of the miniature in Marciana MS fr. app. 20 (=265), we are able to underscore an important aspect of painting in Acre. Manuscript illumination – and quite possibly fresco painting and icon painting as well, although so far we have no clearly identifiable extant example in situ for these two media in the last years – apparently continued to flourish

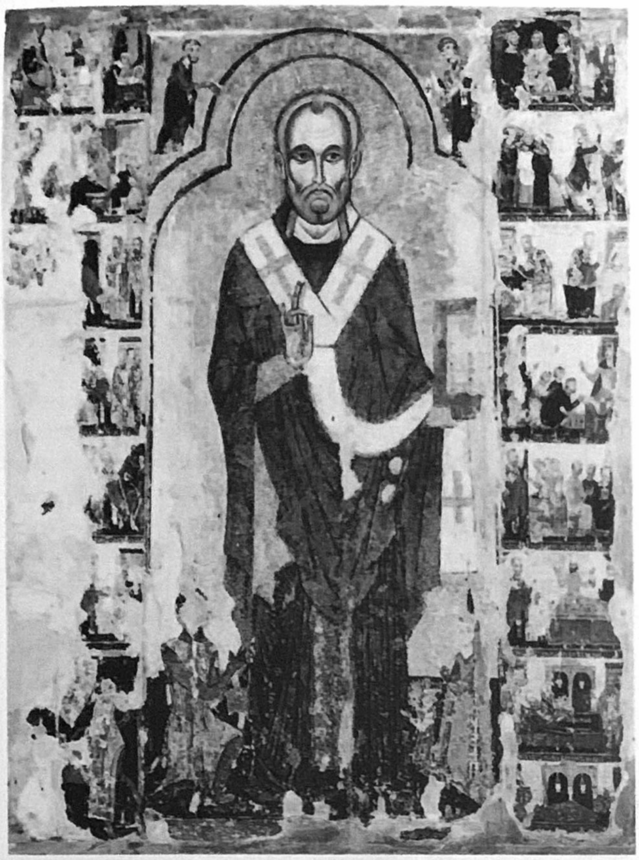


342. Acre: Proposed chapel project drawing for Joinville's *Credo*.

in Acre right up until the city fell in May of 1291. This means, and it is perhaps a somewhat surprising statistic, that between 1280 and 1291, nearly as many extant illustrated manuscripts survived from Acre, ten codices, as are found in the three previous decades: 1250–60, four codices; 1260–70, two codices; and 1270–80, five codices. Far from declining or diminishing, manuscript illumination in Acre appears to have continued to grow and develop, and the Paris–Acre Master in particular contributed eight and over 75 percent of a ninth codex to this output. It will remain for further research to determine whether the Paris Gothic style effectively displaced the more traditional Crusader styles of earlier decades in the 1280s as the current statistics would seem to indicate, or whether additional examples of the Eastern-based Crusader styles can be found.

One final observation can be suggested in regard to the surprising surge of manuscript painting in the Parisian Gothic style and the falling off of examples in the more traditional Crusader styles, of which the London *Histoire Universelle* manuscript, Add. MS 15268, is the main survivor. The fact that the Universal History codex was done in the traditional style is, as we noted in our earlier discussion of this manuscript, evidence for something important about what the barons wished to say about Crusader art and experience to their new king. The fact that all of the other extant manuscripts done in Acre in this decade, with only one exception, were, however, done in the Parisian Gothic style seems to underscore the popularity of this Paris-related artist for manuscript painting.

The fact that we could also identify a group of outstanding icons in the Veneto-Byzantine Crusader style from the mid-1280s, parallel in date to the London Add. MS 15268, suggests that the interest in these religious images in the more traditional Crusader styles continues more strongly in the icons than in the manuscripts. The fact that no "Crusader" icons can be surely identified from the final years of the Latin Kingdom, 1289–91, in any style suggests two observations. First, icons were not popular in the French Gothic style in these later years. There are very few such examples extant from the thirteenth century and all of them are earlier. Second, demand for icons in the more traditional styles apparently declined or completely disappeared, as we see with the manuscripts in the more traditional



343. Icon: Nicosia, Cyprus, Altarpiece/icon of St. Nicholas with donor figures of the Ravendel family from the Church of Saint Nicholas tis Stegis in Kakopetria. (photo: by courtesy of the Byzantine Museum of the Archbishop Markarios III Foundation, Nicosia)

styles in these last years. Therefore, with regard to the more traditional Eastern-based Crusader styles we can perhaps see certain parallels between the manuscripts and the icons in the very last years of the Latin Kingdom.

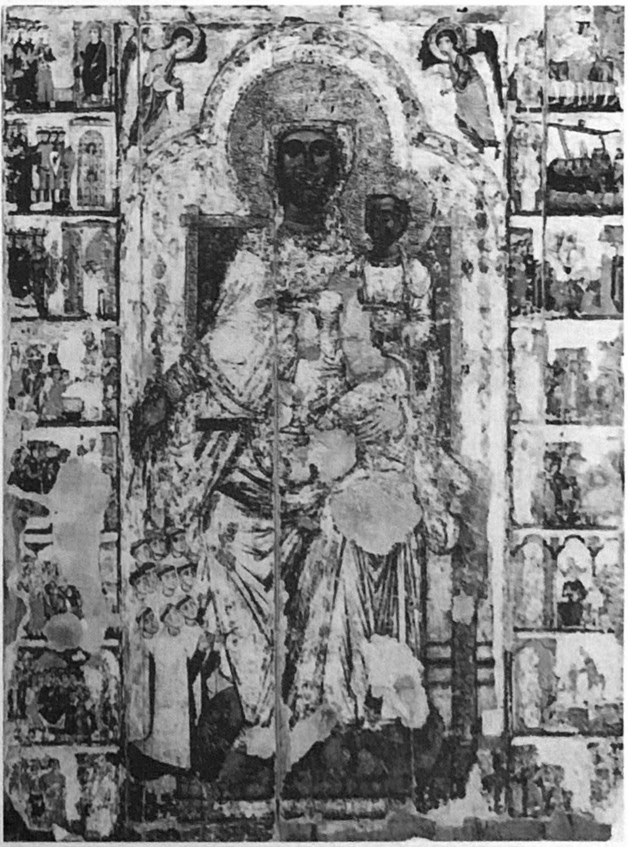
Icons

The Crusader icons preserved today at the Monastery of St. Catherine on Mount Sinai are the products of artistic work apparently done either at Sinai or in Acre, well before the final destruction at Acre. Some of them could have been painted in the safety of Sinai during the hostilities along the coast. Some of them could have been brought as gifts or were sent to the monastery by pilgrims to Sinai most likely before the siege of Acre. Some of the icons may have been collected after Acre fell and taken to Sinai. None of the icons currently in the collection at Sinai can, however, be clearly dated and identified to be the product of the years 1289–91.

Icons in Crusader Styles on Cyprus: The lack of Crusader icons from the Latin Kingdom does not of course mean that there were no icons commissioned by "Crusader" patrons in the Near East at this time. We have discussed elsewhere certain major icons that were produced on Cyprus in the years just before 1291, including, in particular, two very large panels that very likely served as altarpieces. First, there is the icon of St. Nicholas with scenes from his life and portraits of the donor, a knight of the Ravendel family, his wife and daughter, and his horse (Fig. 343). Second, there is the icon of the Golden Enthroned Virgin with scenes of the miracles of the Virgin and portraits of the Carmelites, who commissioned the work, sheltered under her robe of mercy (Fig. 344).[140] Three important points about these icons are worth repeating here:

> 1. Although not exactly the same size, they are both extraordinarily large, even by Italian standards: St. Nicholas, 2.03 x 1.58 m., the Virgin, 2.01 x 1.55 m.
> 2. Both of these large icons include images of donors who are clearly Franks.
> 3. Both icons combine Byzantine style and technique with, what [D. Mouriki] called, stongly "western" characteristics. These features and some of these so-called "western" characteristics typify the attributes of Crusader painting in the Latin Kingdom and, I propose, they exemplify in these two works a comparable if independent phenomenon of Crusader painting on Cyprus. It is independent because none of the artists working on these two panels can be found in Acre, Frankish Greece, Sinai or elsewhere on the mainland, but it is Crusader because the patrons were Latins; there are significant, what I am calling "Frankish" – not "western" – features and modifications evidently introduced to suit these patrons; and some of the artists may be Frankish.[141]

It is not possible to date these two icons exactly, but the appearance of the Carmelites gives us a special date "post-quem," namely 1287. The habit of the Carmelites was changed



344. Icon: Nicosia, Cyprus, Altarpiece/icon of the Enthroned Golden Virgin with Child and Carmelite donors from the Church of Saint Kassianos in Nicosia. (photo: by courtesy of the Byzantine Museum of the Archbishop Markarios III Foundation, Nicosia)

between the years 1284 and 1287, and after 1287, the familiar habit we see depicted on the figures in this icon was the standard adopted for Carmelites everywhere.[142] Thus it is likely that this icon dates after 1287, probably shortly after 1287. We have no similar indicator for the St. Nicholas icon, but there is an important parallel with Acre manuscript illumination. The heraldry seen on the caparisoned horse that appears on this icon is also found in a miniature (fol. 216v) of a manuscript produced in Acre, the *Histoire Universelle* now in Brussels, MS 10175, and attributed to the 1270s, as we discussed it earlier. We have suggested elsewhere the possibility – obviously the rather slender possibility – that perhaps the same person who patronized the manuscript in the 1270s also commissioned the icon shortly before 1291.[143]

These two icons done on Cyprus are important examples of a type of Crusader art distinct from that found in mainland Syria-Palestine, but clearly related to it. They help demonstrate the multicultural character of art on Cyprus. We see that Crusader art on Cyprus was not only done in Gothic style, as C. Enlart originally presented it, but also we see that it is quite parallel to the Crusader art we have found in the Crusader States to the east. As such, these artistic developments on Cyprus must also be seen in the larger context of other artistic traditions on Cyprus, especially the very strong Byzantine tradition, which is discussed by A. Weyl Carr as part of an important study that also appeared in the proceedings of the conference on "Cyprus and the Crusades" held in Nicosia in 1995.[144] The development of Crusader art on Cyprus is not our concern here, but its development in the last quarter of the thirteenth century helps us to understand what happened to this tradition after the fall of Acre in 1291, and how it has both a special richness and a distinctive identity on its own terms, and an interactive and parallel character to art in the Crusader States on the mainland to the east.

THE MINOR ARTS

Pottery and Ceramics

On a different level of production we can also briefly consider the painted ceramics that would have existed in Acre in the years 1289–91. In this case it is not a matter of extant examples that were produced precisely in this period, because no individual work can be exactly identified from this time. Such works could likely only be identified in carefully controlled circumstances, such as, for example, the excavation of a site where pottery was made just before the conquest of Acre. Rather, we can tentatively assume that there continued to be production in Acre of the standard pottery to supply the needs of the people, and we can review the types of work that must have existed in Acre when the city fell.

As we have already seen, most of our knowledge about pottery – glazed and unglazed – in the Crusader States, and especially from the Latin Kingdom, comes from archaeological excavations of the main cities and fortified sites along the coast.[145] What is evident in some of these sites, certainly the most important ones such as Acre, is that the pottery used was marked by considerable diversity. In the excavations at Acre, for example, we find unglazed utilitarian works along with undecorated storage jars, along with ornate glazed vessels of various kinds, and even luxury Chinese celadon vessels from the Far East.[146] The main sites excavated in Acre from which significant pottery finds have been made, namely the Hospitaller complex and the New Courthouse site, show evidence of burning and destruction in the late thirteenth century, evidently at the time of the fall of the city in the spring of 1291.[147]

Obviously some of these works of pottery were produced locally, and some were obtained commercially through trade. As we have seen previously, it is not always clear what the origin of some standard types of pottery may have been, although clearly with Chinese celadon and Italian proto-maiolica, there is no question but that they were imported. In any case, the main types of pottery that must have existed in Acre at the time of its fall are the following categories:[148]

1. Byzantine sgraffito yellow glazed bowls with fine incisions. This type of work was mostly imported from Byzantine territories as we have seen. It was mostly popular in the twelfth century.
2. Zeuxippus Ware (Figs. 345, 346). This pottery originated in Constantinople, but by the thirteenth century it was probably more widely produced in the Aegean area. This type of pottery is colored light green and yellow, and is decorated with thin incisions and broad lines.
3. Thirteenth-century Aegean ware. This is another type of sgraffito ware that is decorated with broad lines.
4. Port St. Symeon Ware (Fig. 347). This ware is named for the coastal town that served as the main port of Antioch where it apparently originated, but by the mid-thirteenth century, it was apparently produced widely in the Crusader States, as Scott Redford discusses on the basis of his excavations, discussed earlier in Chapter 7.

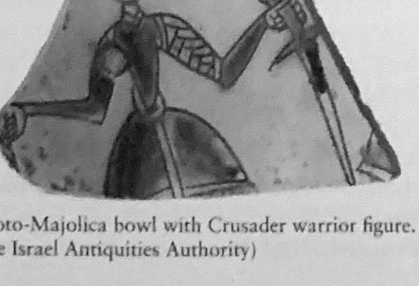
349. Acre, Proto-Majolica ware: soldier with sword and triangular shield. (photo: by courtesy of the Israel Antiquities Authority)

5. Thirteenth-century Cypriot ware. This pottery was produced largely on the western side of Cyprus in the towns of Lemba and Paphos. The potters were influenced by Byzantine and St. Symeon wares. It appears evident from the excavation finds that it is Cypriot sgraffito and slip painted ware, which was the most popular and widespread pottery imported into Acre and the Latin Kingdom in the thirteenth century.[149]
6. Proto-maiolica ware (Figs. 348, 349). Proto-maiolica was imported from Italy and was produced in southern Italy and Sicily. It is characterized as having a tin-based glaze, which creates a white background on which a painted over-glaze was applied, producing eggplant brown, yellow, light blue, and light green colors.

There are also other wares, some imported from Syria – the bulk of the wares acquired from Muslim countries – and some from much farther away, such as the Chinese examples mentioned earlier. The Syrian wares are decorated with drawings in blue and black and finished with an alkaline glaze. It remains to be seen whether any of the excavated pottery could be dated to the years just before 1291. It is likely that pottery dating *c.* 1291 can be identified on the top layers of protected excavation sites in Acre ('Akko).

Coins and Seals

With the loss of Tripoli in 1289 it appears that no further new designs in coins and probably also in seals are known from the Crusader States. Whereas with regard to coinage, Tripoli ended its Crusader period with, as Porteous put it, "its colors flying," we have no evidence that Acre was anything more than a Frankish outpost between 1289 and 1291.[150] Both Grierson and Porteous interpret the Aleppo hoard of coins, found in the 1950s, as booty from the plunder of Acre in 1291.[151] The fact that the hoard was made up primarily of approximately six hundred Florentine gold florins from the latter half of the thirteenth century, along with a few Venetian and French coins, including gold coins of Philippe le Bel struck in 1290, suggests that these were the new coins of value in Acre commerce just before the fall of the city in 1291, certainly not locally minted coins.

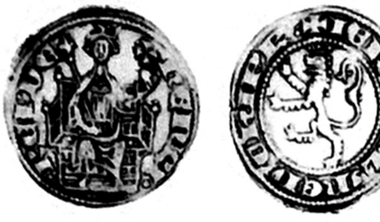


348. Acre: Proto-Majolica bowl with Crusader warrior figure. (photo: by courtesy of the Israel Antiquities Authority)

A similar but much smaller hoard has recently been found in the harbor excavations at Acre itself. This hoard consists of thirty-one Florentine gold florins minted in 1252. The interpretation offered for these coins is that they were "presumably lost when the last of the Frankish inhabitants of Acre desperately tried to board the few ships anchored in the harbor on May 18, 1291."[152]

We can compare this hoard data with information derived from the investigation of coins at Chastel Pelerin ('Atlit) recently published.[153] According to statistics derived from the study of those coins, the distribution and frequencies of currencies found at Chastel Pelerin ('Atlit), obviously a major Templar fortified site with castle and town not far south of Acre, but much smaller than Acre in terms of trade and commerce in the thirteenth century, put the Aleppo and Acre hoard coins in bold relief. At 'Atlit European currency comprised 13 percent (distribution)/17 percent (frequency), compared to 25 percent (distribution)/34 percent (frequency) of currency from the Latin Kingdom and 18 percent (distribution)/24 percent (frequency) of currency from Cyprus. Thus having a hoard of exclusively European coins, over 95 percent of which were important gold coins in the Aleppo hoard and 100 percent were gold coins in the Acre hoard, points to a very special distribution in these hoards best explained as booty from Acre in the circumstances.

Just as with other media discussed previously, such as the icons and pottery, we can see parallels between the late thirteenth-century developments in the Crusader States on the mainland and those on Cyprus with regard to both coinage and seals. The most interesting aspect pertaining to the Cypriot coinage is found with a new coin type introduced by King Henry II. When he came to power in 1285 on Cyprus Henry decided to end the minting of the pale gold *bezant*, a Byzantine-style scyphate *bezant* known as the so-called white-bezant, as the principal coinage of the realm.[154] To replace it he introduced a silver *gros*, modeled on the *gros tournois* of Louis IX of France from 1266.[155]



350. Cyprus, silver *gros* of King Henry II. (photo after the Slocum catalogue)

We have argued previously that this *gros* of Louis IX, the first heavy silver coin to be struck north of the Alps in the Middle Ages, was very likely inspired by an earlier impressive *gros* struck in Tripoli from approximately the 1250s to its demise in 1289.[156] In any case the new *gros* of Henry II is a remarkable new coin, with the king enthroned frontally on the obverse, and on the reverse is the heraldic rampant crowned lion of the Lusignan kingdom of Cyprus (Fig. 350). The inscription is in French, starting on the obverse, "henri./.rei de," and continuing on the reverse, "+ierusalem e d' chipr." This marked a dramatic shift from coinage steeped in the Byzantine tradition. With this new *gros*, Henry II clearly stated his French ancestry and heritage, and in effect, brought his coinage into harmony with the new Gothic architectural style on Cyprus. With French style royal head and draperies, with French fleurs-de-lis on the crown and scepter, with Western royal garments and an orb crowned with a cross, on the obverse, and the Lusignan lion on the reverse, Henry's point of reference was no longer the Byzantine or the Hohenstaufen Empire. Rather it was the French Gothic tradition of Louis IX who, after his Crusade of 1248–50, had had such an important impact on the Latin East.

The Lusignan *gros* initiated by Henry II went through various modifications, but the coin type was retained by his sucessors and became one of the most important coinages in the eastern Mediterranean after 1291 through the fourteenth century. However, it is ironic to note that the heraldry of the "cross of Jerusalem," that is, the arms of the Latin Kingdom, with an equal-armed cross in gold accompanied by four smaller equal-armed crosslets in silver, only appears on the later coinage of Henry II (Figs. 351, 352).[157] Thus the heraldic arms of Jerusalem that came to identify the Latin Kingdom after 1291 are actually later, emerging first on coinage from Cyprus, and are found only after Acre had fallen in 1291!

Other Minor Arts

With regard to the other minor arts we have discussed in previous chapters, principally metalwork, glass, and textiles, we have no specific new evidence to cite with regard to the years 1289–91 in terms of specific objects. For metalwork and glass the finds in the Latin Kingdom now corresponding to Israeli territory are perhaps surprisingly sparse. However, there is one category of evidence, written sources about glassmaking in Tyre, that seems to open new possibilities for future research. Robert Irwin has reminded us that among centers of glassmaking, Tyre is mentioned more often than any other site in the Latin Kingdom.[158] He points out that Jews are specifically mentioned prominently as glassmakers there in the twelfth and the thirteenth centuries. Shortly after he wrote his note, a report describing the discovery of a medieval glass factory at Tyre appeared.[159] Although the date of this factory is not specified, it must have operated between the eighth century and 1291, when the Crusaders lost Tyre to the Mamluks. In keeping with this new interest in exploring the likely production of glassmaking at Tyre as a major center, S. Carboni, G. Lacerenza, and D. Whitehouse followed up this publication with an article in which they have gathered all the known texts dealing with glassmaking in Tyre, ranging from 985 to the thirteenth century.[160] Bishop Jacques de Vitry refers to glassmaking at Tyre, probably in the 1220s. These authors, Carboni, Lacerenza, and Whitehouse, also point out the close relations between Tyre and Venice and the likelihood that Venetians in Tyre exported raw materials and/or cullet to their hometown. Finally, Irwin in the article cited earlier speculated "that it is possible that some of what is currently classified as 'Islamic' glass was actually produced by Christians or Jews in the Crusader States. Some at least of the houses in Tyre where glass was made belonged to the king of Jerusalem."[161] We may also wonder whether Muslim glassmakers might not have worked in Tyre as well.

The nature of glassmaking at Tyre in the Crusader period awaits further investigation, but we know from our discussion of earlier periods that aristocratic families in the Latin Kingdom, for example, the Ibelin family in Beirut and the Montfort family in Tyre, were wealthy and acquired elegant items both for their homes and for their clothing, including silks and jewelry. Trade and commerce carried on through Acre and other Crusader ports enabled many of these luxury items to be sent westward, where they reached "the church treasuries and noble houses of Europe." The sparse findings from excavations in the Israeli territory of the Latin Kingdom would seem to indicate on the one hand that some of the luxury goods, both religious and secular, were carried off during or before the fall in 1291, and on the other, that some of these luxury goods were manufactured in Muslim territory, in either Syria or Egypt. In either case it appears that as few works of the minor arts as possible were left by residents or by merchants in the city of Acre, or the other final holdings of the Crusaders, such as Tyre, Sidon, Tortosa, and Chastel Pelerin, at the time of their fall.[162]

CONCLUSIONS

The Aftermath of the Fall of Acre

"The news of the Mamluk conquest of Acre was received in the West with consternation rather than horror. The news had long been expected."[163] When Pope Nicholas IV learned of the fall of Acre at the end of July, he composed and promulgated an

352. Cyprus, silver *gros* of King Henry II, second reign. (photo after the Slocum catalogue)

encyclical, *Dirum amaritudinis calicem*, dated 13 August 1291. The text reported matter of factly that "Acre, the principal refuge of Christendom in the East, . . . , was taken by siege with terrible loss of life and the ruin of the city; it was a cause of most profound grief to the Church."[164] It referred to the efforts made by the Church to avert its conquest, and to the heroic defense by the defenders of the city. It also exhorted all Christian believers to avenge this terrible catastrophe and join the Crusade that was beginning to be preached for the swift recovery of the Holy Land.

Nicholas IV planned a major Crusade to take the field as soon as possible, so he did not convene a general council. In the meantime he energetically instigated an immediate policy with three main points:

1. Immediate aid for the remaining Christian strongholds in the Levant, which were now Cyprus and Lesser Armenia, the *subsidium Terrae Sanctae*;
2. the enforcement of a maritime blockade of Egypt, especially Alexandria; and
3. the organization of a general Crusade due to depart on 24 June 1293.[165]

Nicholas devoted himself intensively to the cause of the Crusade, but then his death in April 1292 intervened. In the period that followed, what Schein calls "The Years of Transition," that is, from 1292 to 1305, there was "no serious attempt on the part of the papacy, traditionally the main pillar of the crusade, to organize an expedition for the recovery of the Holy Land."[166]

Meanwhile there was an outpouring of public opinion on the fall of Acre and the loss of the Holy Land. The popular view was perhaps best expressed by an anonymous author, possibly a minor cleric who stated that he gathered opinions from those who had been present at the siege and fall of the city. He wrote the *De Excidio Urbis Acconis* shortly after the fall of Acre.[167] It was widely circulated in Latin and in French in the 1290s and the early fourteenth century. This text is a gloomy telling of the story of the events leading up to the siege, the siege itself, and the fall of the city. The author attributes the cause of this catastrophe to "hypocrisy and indifference, the selfish search for personal glory, wealth, and luxury, as well as the avarice of the rich and the upper classes in general."[168] Taking the point of view of the common man, he indicts the leaders of Christendom for their failure to defend the Holy Land, and exhorts Christian believers to avenge the insults inflicted by the Mamluks on Christ by their conquest.

Meanwhile, the failure of Christendom to respond decisively to the fall of Acre was matched by the inability of the Mamluks to capitalize on the weakness of the Christians in the East. After raids by a combined papal, Genoese, and Cypriot fleet in 1292 had attempted to attack Muslim ports in the eastern Mediterranean, Sultan al-Ashraf Khalil ordered a fleet of one hundred ships to be built to attack and conquer Cyprus. Following the Crusader conquest in 1291, however, the Mamluk emirs were unwilling to set out again so soon on this new endeavor. Then, on 13 December 1293, the sultan was assassinated. No further Mamluk attacks were mounted in the 1290s while a series of claimants unsuccessfully sought to succeed al-Ashraf Khalil, and Egypt suffered famine and a plague.[169] Despite the piecemeal survivals of Crusaders at Jubail to 1302, on the island of Ruad to 1303, and at Roche Guillaume to 1299, the era of the Crusaders in the Holy Land was over.

The End of the Art of the Crusaders in the Holy Land

With fall of the city of Acre, the evacuation of all Crusader soldiers from other fortified positions, and the end of the Crusader States, the art of the Crusaders in the Holy Land ceased to exist. For nearly two hundred years this art had been a more or less continuous witness to the Crusader presence in the Levant. It was an art that was born of the need for religious and defensive architecture, for religious prayer and services, for devotional and liturgical images, for pilgrims' souvenirs and *ex votos*, and for signifying religious, political, commercial, and military institutions and their presences. This art also served to enrich and mark important aspects of what was both a difficult and a challenging life for Crusader rulers and aristocracy, soldiers, clergy, merchants, women at all levels of class, wealth, and political standing, and pilgrims and travelers in the unique multicultural circumstances of the Latin East, what the French call *l'Orient Latin*.

When the art of the Crusaders ended in 1291, no notice was taken in the destruction and rubble that was left behind at the time. Refugees and survivors, who had been fortunate enough to save their lives, were doubly blessed if they also managed to save anything precious that belonged to them, such as an illustrated book, a holy reliquary, or a devotional image. At the time, many people assumed or imagined the absence of the Crusaders from the Holy Land would be of brief duration, and soon a new Crusade would carry the victorious banner of Christianity back to the holy sites of Jerusalem, Bethlehem, and Nazareth. Implicit in this notion was the assumption that the normal endeavors of life, including the art and architecture of the Crusaders, would resume in the Holy Land. However, no new Crusade took back the holy places; the art of the Crusaders was not resumed. Other versions of "Crusader art" continued elsewhere, especially on Cyprus, but the art of the Crusaders in the Holy Land effectively ended when Acre fell on 28 May 1291.

The art of the Crusaders in the Holy Land, what we are also calling "Crusader art," not only ended without notice in the ruins of Acre in 1291, but was also for a long time afterward largely unrecognized. It was not until the great French scholars of the nineteenth and early twentieth centuries began the task of finding and excavating, recognizing and identifying, studying and conserving, and interpreting Crusader art and architecture and its contextual history that it entered historical discourse. Whereas they saw this art as part of their national heritage, part of the *patrimoine nationale de France* in effect, we see it as a major unique and independent development in medieval art in and around the center of the world at the time. With this in mind, we can conclude this discussion by recalling some of the most significant achievements of these Crusader artists and architects, works that rank with the very best medieval architecture, sculpture, painting, and metalwork ever produced in the twelfth and the thirteenth centuries.

In architecture, the Crusader achievements of building, rebuilding, enlarging, and/or renovating the Church of the Holy Sepulcher in Jerusalem, the Church of the Nativity in Bethlehem, and the Church of the Annunciation in Nazareth rank among the most important works in medieval architecture in the twelfth century. Both their architecture and their extraordinary programs of decoration, all three distinctively different, all three lavish and enormously ambitious, all three richly multicultural in their programmatic form and content, would place these churches at the forefront of medieval artistic monuments had they survived intact. In Jerusalem, the architecture of the Church of the Holy Sepulcher has suffered serious damage and neglect, and only recently has been restored to structural integrity. Meanwhile only tiny glimpses of the magnificent medieval program of sculptural, mosaic, and other figural decoration survives and modern depradations threaten to cover or even destroy the character of the church and the message of its multicultural artistic program in the name of modern denominational politics. However, this should not obscure the fact that the Holy Sepulcher was the greatest tomb church on the pilgrimage routes in the East, built in the 1140s contemporary with the French royal burial church of St. Denis. The splendor of its mosaic and sculptural programs must have equaled not only St. Denis, but also the Cappella Palatina in Palermo.

At Bethlehem, as I am writing this chapter (April 2002), Israeli military troops have surrounded and cut off the ancient Church of the Nativity in Bethlehem from the rest of the town. This magnificent sixth-century church, redecorated in the twelfth century, and the three later monasteries which attached to it are in danger of suffering serious damage from the current hostilities that pit the local monks and clergy with Palestinians, both Muslim and Christian, inside against the Israeli forces outside. Exchanges of gunshots, the throwing of flares, and the threat of a tank attack all threaten the safety of this holy place, the lives of the people involved, and the existence of the fifteenth-century wooden roof of the church, the fragments of the huge twelfth-century Crusader mosaic program on the walls, and the stone, metal, and wood decorations on the many doors of this venerable place, which marks the traditional site of the birth of Jesus Christ. The Church of the Nativity in Bethlehem is precious and important, not only as a major early Byzantine basilica, but also for its mosaic and fresco programs. They are now quite fragmentary, but once they ranked with the greatest projects in the West at the time, in churches such as the Cathedral on Monreale and the Church of San Marco in Venice.

Compared to these medieval buildings, very little was left of the Church of the Annunciation in Nazareth following the conquest of the city by Baybars in 1263. It was only with a series of remarkable excavations in the early and mid-twentieth century that the outstanding Nazareth sculptures have come to light, best known through the five now-famous capitals. Unanimously acclaimed as some of the most outstanding medieval figural sculpture produced in the twelfth century, these capitals apparently formed part of the figural program decorating the shrine of the Annunciation on the site of the house of the Virgin. Other sculpture of comparable quality decorated the nave surrounding the shrine and the main west entrance portal to the church. In contrast to the great pilgrimage churches at the Holy Sepulcher in Jerusalem and at the place of the Nativity in Bethlehem, the primary decoration at Nazareth was in figural sculpture proclaiming the importance of the site not only as the place of the Incarnation, but also the first holy place sacred to the Virgin Mary erected by the apostles.

Among the other arts, pride of place clearly goes to the manuscript now in the British Library, Egerton MS 1139, known as the Psalter of Queen Melisende. This codex is not only the first really great work of Crusader manuscript illumination extant, which was done in Jerusalem, but it is also a magnificent example of Crusader painting, ivory sculpture, and silk embroidery of excellent quality, executed by at least six different artists at the very outset of Crusader artistic development in 1135. Among its painters, we have a Western-trained master of French background who executes the medallions of the calendar, a recently arrived painter working under Byzantine influence who does the headpieces to the prayers after the psalms, and an Eastern-born artist named Basil, who combines Byzantine and Western style and iconography with local ideas and signs his work on the last of the twenty-four prefatory miniatures to the psalter. In effect, Basil is the first "Crusader" painter we know by name. Finally, for the psalm divisions themselves, a remarkable Eastern-born artist working with sure knowledge of Islamic technique and design produces the illuminated initials in the psalter. This ensemble of artists, including four painters, an ivory carver, and a skilled silk embroiderer along with the scribes, provide us with one of the most remarkable manuscript ensembles done in the Crusader East at the very outset of artistic production. Other fine manuscripts were done by Crusader artists in the twelfth century, but none can match this early work in quality and complexity.

In the period after 1187, when the capital of the Latin Kingdom shifts to Acre, the nature of Crusader art changes substantially. The focus on the holy sites is lost and new importance is given to Crusader defensive architecture as well as Crusader painting. Arguably the greatest of the Crusader castles, Crac des Chevaliers, is significantly expanded and decorated in the first half of the thirteenth century. It is a paradigm of the best Crusader fortification that became known in the East and the West. As the greatest surviving Hospitaller castle, it provides a major example of the design and engineering achieved by Crusader architects, as well as a glimpse of the painting and decorative sculpture employed to embellish the major quarters, chapels, and important meeting rooms of the fort. We are fortunate to know about Crac because of its excellent preservation; presumably we might have known something of the same quality work at the major Templar castle of Chastel Pelerin ('Atlit) had it not been so severely destroyed, first by the Mamluks, and later even more heavy-handedly by the Ottomans. With regard to the major work of defensive fortifications among the important Crusader cities, although there must have been several magnificent examples, not only at Acre and Jerusalem but also at Tyre, Tripoli, and Antioch, virtually nothing remains intact, because of either destruction or rebuilding by the Mamluks or the Ottomans.

Surprisingly, it is in fact in the realm of Crusader painting that the greatest surviving achievements in the art of the Crusaders can still be seen from this later period in the thirteenth century. We have several manuscripts of exquisite quality, done as either special gifts or royal commissions. There is the Riccardiana Psalter of *c.*1225, possibly executed for Isabel de Brienne, second wife of Frederick II; the Arsenal Bible done in 1250 as a personal book of Bible selections for Louis IX during his sojourn in Acre; and the London *Histoire Universelle*, most probably prepared by the aristocracy of Acre as a gift for the new king of Jerusalem, Henry II, in 1286. These works *de grand luxe* are thirteenth-century illustrated books comparable to the Psalter of Queen Melisende in quality and importance. They demonstrate the broadening range of the art of the Crusaders in terms of form and content, the first codex done in a Sicilian-Byzantine Crusader style, the second in a Franco-Byzantine Crusader style, and the third in a Veneto-Byzantine Crusader style. What is exceptional about the third work, however, is that not only does it contain a rich program that includes characteristics drawn from Islamic, Byzantine, and Levantine sources, but also it appears to be a collaborative effort on the part of at least six painters demonstrating once again, as we saw with the Melisende Psalter, that outstanding commissions could be handled by major Crusader workshops in relatively short periods of time.

If we only knew these major manuscripts, Crusader painting could be recognized for having produced important achievements in the thirteenth century albeit limited to the tradition of manuscript illumination begun in the twelfth century. However, many significant works are also found in two relatively new types of Crusader painting, which greatly increase the depth and interest of the Crusader achievement between 1187 and 1291. The first new type of art is panel painting in the form of icons. The second type is manuscript painting for purely secular manuscripts in the vernacular.

Although it is somewhat mysterious why the most numerous and most important panel paintings by Crusader artists appear only in the second half of the thirteenth century, the fact is that there are a number of icons painted then that are truly extraordinary. The Acre Triptych (Figs. 155–62, App. no.66/753) is one such work, done by three painters at the end of the 1250s in Acre. In this remarkable ensemble we find two Crusader artists with central and northern Italian connections linked with a Franco-Byzantine Crusader artist to produce an important Levantine *Maestá* of the Virgin and Child enthroned. Three other magnificent works are done by artists working in what we are calling Veneto-Byzantine or Cypriot Crusader styles. There is the dossal with the Deësis accompanied by eight saints (Figs. 256–61, App. no. 74/1003), probably produced to be used as an iconostasis beam. There is the bilateral icon with the Crucifixion and the Anastasis (Figs. 269–70, App. no. 97/1568), a monumental processional icon with Latin inscriptions closely related to Venetian painting in the second half of the thirteenth century. Finally, there is the extraordinary diptych with St. Procopios and the Virgin *Kykkotissa* (Figs. 271–88, App. no. 110/1783), a work of exquisite painting style closely related to Cypriot work and conceivably done by an artist in a Cypriot-Byzantine Crusader style in the Monastery of St. Catherine's on Mount Sinai in the 1280s. In this last icon, the work is distinguished not only by the refinement of the style of the figures, but also the exquisite chrysography and the sumptuous garments and jewels depicted in a technique closely related to the best Byzantine work.

In manuscript illumination, it is extraordinary that we find in Acre a parallel to the development of secular illustration in Paris in the second half of the thirteenth century. Not only do we find a wide range of manuscripts, ranging from historical studies such as the *History of Outremer*, the *Histoire Universelle*, and the *Faits des Romains*, along with a variety of treatises on military science and rhetoric, but also we have an illustrated law book, the celebrated *Livre des assises* of Jean d'Ibelin. It is a remarkable fact that of the secular codices that survive with illustrations from Acre, the earliest ones are done in the "traditional" Crusader style, which combines Byzantine, Western, and Levantine form and content previously found in religious manuscripts such as the Arsenal Bible, the Riccardiana Psalter or the Psalter of Queen Melisende. None of the later examples done in purely Gothic style from Acre *c.*1280–91 would rank as a great work of art, that is, works of truly outstanding quality. However, perhaps one of the secular manuscripts done in a Parisian Gothic style of the 1270s by an artist recently arrived from Paris in 1280 ranks as an outstanding work. It is the *History of Outremer* now in Florence, Laurenziana MS PLU.LXI.10, probably the last Crusader manuscript illustrated in Acre that survives. Its charming illustrations by the Paris–Acre Master capture the elegance of Parisian Gothic painting in terms of colorism and active poses, whereas the simplicity and clarity of the style embodies the innocence and immediacy of this painter's version of Gothic naturalism suitable for this new venture in rendering the story of the Latin Kingdom and which accompany the Old French translation and continuations of the words of the celebrated archbishop, William of Tyre.

It is these works as distinguished from other Crusader artistic products discussed previously that exemplify the best of Crusader work. Ultimately what is important about all of these extraordinary works and the numerous other works of lesser quality, but no less interest, is that they are works of Crusader art and architecture, works that express in form and content their unique Frankish–Byzantine–Levantine Crusader character and their special circumstances of patronage, production, audience, and function.

In conclusion, we may recall what estimates have been made about the phenomenon of the Crusades and their impact on Europe and the Near East. Overall the negative and dismal aspects greatly seem to outweigh the more positive achievements in the modern perception. We remember the comments of famous eighteenth-century writers such as Diderot, who saw the results of "these horrible wars" to be "the depopulation of its nations, the enrichment of monasteries, the impoverishment of the nobility, the ruin of ecclesiastical discipline, contempt for agriculture, scarcity of cash and an infinity of vexations." Gibbon commented that the Crusades "have checked rather than forwarded the maturity of Europe. The lives and labours of millions which were buried in the East would have been more profitably employed in the improvement of their native country: the accumulated stock of industry and wealth would have overflowed in navigation and trade; and the Latins would have been enriched and enlightened by a pure and friendly correspondence with the climates of the East."[170]

Not surprisingly, the romanticized view of the Crusades in the nineteenth century produced much more positive reflections, especially on the great heroes if not the great cultural contributions. The English commissioned a great bronze statue of Richard I, *Coeur de lion*, by Baron Marochetti in front of the Houses of Parliament.[171] The Belgians likewise memorialized their national hero, Godefroy de Bouillon, in a bronze statue by Simonis for the Gran'Place in Brussels.[172] The French assembled an impressive array of paintings in the *Salle des Croisades* at Versailles to commemorate what Siberry calls "a pictorial history of French participation in the crusades."[173] Even Mark Twain succumbed to the lure of the Crusades. After visiting the battlefield of Hattin during his tour of the Holy Land, he was inspired by the reputed sword of Godefroy de Bouillon to write, "no blade in Christendom wields such enchantment as this – no blade of all that rust in the ancestral halls of Europe is able to invoke such visions of romance in the brain of him who looks upon it... It stirs within a man every memory of the holy wars that has been sleeping in his brain for years and peoples his thoughts with mail clad images... It speaks to him of Baldwin and Tancred, and princely Saladin and great Richard of the Lionheart."[174] Perhaps the most bizarre of these romantic reactions, however, can be seen in the bronze wreath that Kaiser Wilhelm of Germany laid on the tomb of Saladin in Damascus in 1898. On the wreath is inscribed, in Arabic, "from one great emperor to another"![175] It is astonishing to recall that scholarly investigation of the history of the Crusades had already long been underway by the time of Wilhelm's visit to Near East, since 1806 in fact, yet Wilhelm still conceived Saladin to have been an emperor in Western terms.[176] Ironically, the wreath was captured by Lawrence of Arabia as a trophy of World War I and taken to England, where it is now on view in the Imperial War Museum in London.

The flow of history has indeed changed the perspectives and cultural values that have produced such widely varying opinions of the Crusades and the Crusaders. However, when we return to the source material itself from the twelfth and thirteenth centuries, on the positive side of the ledger we may recall that the art of the Crusaders in the Holy Land was one of the greatest of Crusader contributions to medieval culture. This art deserves to be recognized for what it is, and it is to be celebrated as an important, unique, and independent chapter in the history of medieval art, the importance of which we are only starting to understand. Crusader art has suffered from destruction in the changed circumstances of its native land, and from neglect and lack of recognition in its refugee status while the Mamluks and Ottomans occupied the Holy Land for so long. Unlike other medieval art in Europe – in France, Italy, England, or Germany – Crusader art work had no country of origin that would shelter and protect it as its patrimony. In one way, the purpose of this study is to identify and recognize the art of the Crusaders so that it can begin to take its appropriate place in the history of medieval art. Crusader art in the Holy Land was short-lived, and the production of the art of the Crusaders in the Holy Land may have finished abruptly and definitively on 28 May 1291, but the importance of that art and the role that it played in the developments of the later Middle Ages, from the twelfth century onward, can now be more fully studied and appreciated, and its contributions to medieval civilization more fully understood.

Postscript

And so the crusader cities and fortifications of Acre, Tyre, Sidon, Beirut, Tortosa, and Chastel Pelerin were stripped of their decorations and emptied of their goods in 1291. For the most part the figural art that we have discussed previously was preserved in most cases because it was taken westward where eventually it ended in safe hands. The conspicuous exceptions are of course the extraordinary collection of icons done by Crusader artists for Crusader patrons now in the safe haven of the Monastery of St. Catherine's on Mount Sinai, and the works that have been found in modern excavations. Undoubtedly the most exceptional finds from archaeological sources are the figural capitals and other sculpture found on the site of the Church of the Annunciation in Nazareth. It is all these works, however they were preserved, that have provided us with the material to study the art of the Crusaders in the Holy Land between 1098 and 1291.

In ending our study, we should point out that art from the period of the medieval Crusader states, 1098–1291, is not the only art commissioned by "Franks" for the holy sites. Some was commissioned later, after 1291, and is found today at the holy sites, principally in Jerusalem, Bethlehem, and Nazareth. With the establishment of the Franciscan custody of the Holy Land in the fourteenth century, the Latin presence at the holy sites has been maintained through the centuries up to the present day along with that of other, Eastern Christians.[177] Works of art, some of them lavish and beautiful, have been bestowed on the holy sites or given to the various Franciscan houses in the Holy Land, and constitute a little-known *corpus* of works ranging from fourteenth- and fifteenth-century illuminated manuscripts,[178] to liturgical vessels and ecclesiastical vestments of the fifteenth through the nineteenth centuries.[179] Given or commissioned as gifts for use at the holy sites, these works of art form a chapter in the history of art yet to be written. These works cannot be said to be latter-day examples of Crusader art, but they are related to the artistic stimuli and the efforts to embellish the holy sites that generated much of the art of the Crusaders in the Holy Land in the first place.

9

CONCLUSION: WHAT IS CRUSADER ART?

In 1972 Joshua Prawer wrote:

> There is no study which deals with the arts of the Latin Kingdom as a whole.[1]

By this he apparently meant there was no recent study, no study since the time of Camille Enlart.[2] The first to attempt to remedy this situation was of course T. S. R. Boase, who produced a series of publications leading up to his chapters in volume IV of *A History of the Crusades*, which Prawer mentions as in process.[3] Prawer's views were then echoed by those of Bernard Hamilton, who wrote in 1980 that while the Franks were in the Holy Land "they built new cathedrals, in many cases because there had been none there before; and they founded churches and chapels in large numbers in their cities, their castles, and on some of their rural estates, of which no systematic survey has yet been made."[4] With regard to the churches, the *corpus* of Crusader churches in preparation by R. D. Pringle is providing a critical art historical, archaeological, and historical survey to meet that need.[5] My current study is intended to fill the gap articulated by Prawer in a different way, by identifying, analyzing, discussing, and interpreting all recognizeable works of Crusader art. I am of course including architecture, the traditional medium for the study of Crusader art between 1860 and 1977, but I am focusing especially on the figural arts. My goal is to examine how they are interrelated and how they function, change, and develop in historical context. However, here at the end of this study, this examination of Crusader artistic activity leaves us with a very important question. Having looked at what can be identified as the art of the Crusaders in the Holy Land in the twelfth and the thirteenth centuries, "what is Crusader art?" How can this remarkable phenomenon be defined on its own merits, and in relation to the other major traditions on which it drew, that is, Byzantine art and the art of other Eastern Christians, Romanesque art, Gothic art, and even Muslim art, all in the context of the Levant?

One inescapable fact that plays a very strong role in determining our view of what constitutes Crusader art is the *corpus* of works of art and architecture that is extant. The impressive result of the Crusader presence in situ is the legacy of churches and castles they built to provide both for the religious services of the Frankish settlers and the pilgrims who came to worship at the holy sites and for the defense of these churches and holy sites, as well as residences and strategic sites the Crusaders occupied in establishing and maintaining their various holdings.[6]

Given that so much has been destroyed, however, one is constantly forced to deal with partial survivals in architecture and very fragmentary remains when it comes to the figural arts, that is, manuscript illumination, panel painting, fresco painting, mosaics, monumental stone sculpture, ivory carving, metal work, enamels, and even coins and seals. Part of the reason for the fragmentary survivals is that in 1291, when the Latin Kingdom of Jerusalem and the Crusader States in Syria-Palestine came to an end, production stopped abruptly and much that existed was destroyed or lost. Furthermore, among portable objects, pilgrimage souvenirs, and the like, much had to be left behind in the *sauve qui peut* that followed the Mamluk conquest. Indeed we can even think of what some people chose to save when they had to flee. Bernard Hamilton writes, "when the Latin clergy finally left the Holy Land what they took with them were their titles to properties which they hoped might one day be restored to them, rather than liturgical or devotional books which they knew they could replace."[7] Similar choices, *mutatis mutandis*, were no doubt made by merchants, soldiers, and members of the artistocracy. Consideration of these choices suggests that what has survived among portable works of art was largely the result of objects taken somewhere safe well before the final battles for the kingdom began in 1291.

Part of the nature of Crusader art is its finite, specific existence. It came into being when the Crusaders arrived in the Holy Land, started new settlements, and began establishing the Crusader States. It ceased to exist as a living, developing tradition when the Crusaders were defeated by the Mamluks and forced to leave the Holy Land in May 1291.

Part of what defines Crusader art is its function, and of course that function itself changed and developed. In the twelfth century, the primary function of Crusader pictorial art was clearly religious. The churches and the figural art were meant to provide for public worship. This worship was initially focused on the unique holy sites that the Crusades were substantially called to liberate and protect, especially the holy sites that commemorated the Incarnation, the Birth, the Passion, Death, and Resurrection of Jesus Christ in Palestine. The art produced for these sites was meant to identify and glorify the holy places and to serve the pilgrims who came there, to facilitate and give meaning to their pilgrimage. In the thirteenth century, Crusader art changed in function, expanding its private, devotional use along with the public religious aspect, for institutional and liturgical use. It also developed an important new secular function in terms of manuscript illumination, but secular art also continued to exist from earlier manifestations in terms of mosaics and the imagery on coins.

One of the most distinctive and perhaps unexpected features of Crusader art is its richly multicultural character. On the one hand, its largely religious function up into the mid-thirteenth century meant that it was produced mainly for Latin patrons and the places where Latins worshipped. However, the main pilgrimage sites were open to all Christians and the Crusader art produced for these sites reflected this multiculturalism from an early point in the twelfth century. One of the most remarkable examples of this Crusader multiculturalism can be found in the sculptural program of the south transept façade of the Church of the Holy Sepulcher in Jerusalem from *c.*1149.[8] Other Crusader religious art followed suit when the opportunity presented itself.

This artistic evidence has only recently been taken into serious account in the larger contextual picture.[9] Since the 1950s historians have debated the old notion that the Crusaders developed some kind of a "Franco-Syrian society," choosing instead to see the Franks as a separate ruling class.[10] Ellenblum has now argued for a more nuanced view of Frankish settlements, and Riley-Smith has pushed part of the argument further, seeing some examples of synthesis.[11] These issues need to be investigated further with regard to the art, because the evidence for Crusader art has been largely identified as produced in the major cities, in important religious establishments, for example, the Monastery of St. Catherine on Mount Sinai, or in major fortified sites, for example, Crac des Chevaliers or Chastel Pelerin. Nonetheless, it appears that there is a clear paradox with the religious art. On the one hand, the Crusaders and their Church in the Crusader States to a large extent remained separate from the Eastern religious traditions in which they found themselves,[12] in terms of basic attitudes toward theology, doctrine, liturgy, discipline, language – most of the things that defined Latin-rite Catholicism. On the other hand, Crusader art to some extent embraced important Eastern Christian traditions. We can see this especially with regard to the Orthodox traditions of Byzantine icons, mosaics, frescoes, and manuscripts, Armenian manuscripts, and Syrian Orthodox manuscripts.

We can also see this in the public ritual of the Crusader churches. Worship was focused on the public performance of the Latin liturgy in suitable churches in Syria-Palestine for the faithful, both transient and resident. It is perhaps in the interaction of the resident Franks with Eastern Christians that greater understanding developed about each other's liturgy and ritual, about their artistic traditions, and about how this art functioned. It is perhaps in observing how the Eastern Christians used art in their worship that the Latin Christians learned to admire and value icons, as well as the Byzantine-inspired tradition of imagery. Worship was also conducted privately, and clearly some of the illustrated manuscripts and the panel paintings were produced to serve individual devotional needs. In myriad ways Crusader art served the religious life and experience of these people, that is, the residents and travelers, be they aristocratic or bourgeois, laymen or clergy, merchants or soldiers, whoever they were. They came from western Europe to fight, to visit, to live briefly or to settle permanently, and to worship in the Holy Land where the Christian religion had its origins. As residents and pilgrims they interacted to some extent with other Christians during their stay, those Christians being both resident Eastern Christians, especially the Greek and Syrian Orthodox, Maronites, and Armenians, and pilgrims who belonged to these Eastern Christian churches.

Burchard of Mount Sion comments on who those Eastern Christian pilgrims were as follows:

> Who could tell how many monks and nuns from Georgia, Greater and Lesser Armenia, Chaldaea, Syria, Media, Persia, India, Aethiopia, Nubia, Nabatenia, of the Maronite, Jacobite, Nestorian, Greek, Syrian and other sects, at this day roam over that land in troops of one or two hundred each, more or less, visit each holy place, and with burning zeal kiss the castle and worship the spots on which they have heard that sweet Jesus sat, stood, or wrought any work?...
>
> Well may we groan over the lukewarmness of the Christian people of our time, who having so many and such great examples before their eyes, hesitate to snatch away from the hands of the enemy that land which Christ Jesus hallowed with his blood, and whose praises are daily sung by the Church throughout all the world; for what hour is there of the day or night all the year round wherein every devout Christian doth not by singing, reading, chanting, preaching, and meditating, read what hath been done or written in this land and in its cities and holy places?[13]

Seen in these contexts and serving these functions for Latin and to some extent for Eastern Christians as well, we can readily understand the interest that the Crusaders manifested for an art that combined the Byzantine tradition with the local Levantine traditions of the Eastern Christians and their western European heritage. By contrast, it was Crusader secular art that seems to have begun to grow more Western in character. Although the first examples of this art in the mid-thirteenth century are produced in the "traditional" Crusader styles rooted in the East, the stimulus for secular art was in Paris and northern France at this time, and its popularity spread to the Latin Kingdom from there. The arrival of the Paris–Acre Master in Acre *c.*1280, and a second painter, who did the *Histoire Universelle* now in Paris after 1285,[14] was in effect part of the spread of French Gothic art. Just as Gothic architecture had been exported from the Ile de France starting in the late twelfth century, here is a latter-day example of the spread of the new Parisian Gothic style in the late thirteenth century. Bearing in mind that the evidence of these two painters provides a very fragmentary picture of developments in Crusader manuscript illumination, this evidence nonetheless seems to suggest that there was a second wave of Gothic influence into Acre, after the first phase stimulated by the patronage of King Louis IX there in the early 1250s.

In sum, the art of the Crusaders in the Holy Land was a complex phenomenon, very different in certain functions and styles in the thirteenth century compared to those in the twelfth. The art of the Crusaders shows remarkable development over its nearly two hundred years of existence, yet it was consistently multicultural until cultural values and artistic emphases began to change in its very last decade with some of its latest practitioners. Crusader art was always very closely linked to the patrons and functions it was meant to serve in the Crusader States, and it remained strikingly independent as a uniquely Eastern chapter in the history of European medieval art.

But what is "Crusader art"?

WHAT IS CRUSADER ART?: INTRODUCTION

To some extent this question is paralleled by the vigorous debate that has been going on among historians of the Crusades since the 1960s over the issue, "What is a Crusade?"[15] Nearly everyone agrees that in the Middle Ages, a Crusade was a holy war called by the pope and that those who, as we say, "took the Cross," made a solemn public vow to participate. In return for signing themselves with the Cross by an insignia often attached to their shoulder, these Crusaders were guaranteed certain legal privileges and spiritual indulgences, including the remission of all sins. The major differences of opinion have arisen over the breadth of the concept in regard to purpose and application. There are those who are identified as "traditionalists," like Hans Mayer, who effectively initiated this debate between 1965 and 1972, followed indirectly by Jean Richard.[16] They essentially view the Crusade as a holy war called by the pope, which was specifically directed to aid Christians in the Holy Land and to regain the holy sites, in particular, the Holy Sepulcher in Jerusalem, but also the place of the Nativity in Bethlehem, and the house of the Virgin where the Incarnation of Christ took place in Nazareth.

There are others, such as Carl Erdmann and Ernst-Dieter Hehl, writing in 1935 and 1994, respectively,[17] who are sometimes referred to as "generalists." They also view the Crusade as a holy war called by the pope, but understand that the participants might be directed to fight any number of enemies of the Christian religion. What was important was the belief that the war was being fought for God in order to further His intentions for humankind. This discussion has been continued by C. Tyerman, who contributed a study dealing with the issue of when the Crusade was institutionalized by the Church, and argued against the idea of a "Crusade movement." His work nuances the traditionalist and generalist positions with interesting if debatable points, and it offers argumentation on the significance of papal policy toward and control of the Crusades.[18]

Several French historians have argued that the essence of crusading arose and was found in the peasantry and the urban proletariat where it was stimulated by prophetic, eschatological, and collective motivation. This approach, identified as the "popularist" approach, can be found most recently in the works of Jean Flori.[19]

Finally there are the "pluralists" who agree with the traditionalists on the Crusade as a holy war called by the pope with privileges and indulgences, but understand that the participants might be directed to fight enemies of the Church in a variety of locations. For example, they would say that along with the Crusades against the Muslims in the Holy Land, there were also Crusades against heretics such as the Albigensians in southern France, against the Muslims in Spain, against the pagan Slavs in eastern Europe, or even against secular rulers in western Europe, such as the Hohenstaufen emperors in South Italy and Sicily. Along with Riley-Smith, Norman Housley affirmed this viewpoint writing on the later Crusades, that is, Crusading activity after the fall of the Latin Kingdom. Where traditionalists see the end of the Crusades in 1291 with the conquest of Acre by the Mamluks, the pluralists see the Crusades extending through the later Middle Ages to Nicopolis in 1396, and beyond, to Lepanto in 1571.[20]

For our purposes in discussing the idea of Crusader art, we do not have to argue the merits of these various interpretations here; the issues are complex and there is important evidence to be weighed on each point.[21] For the purpose of discussing Crusader art, however, I can state forthrightly that I am espousing a traditionalist view in regard to the idea of the Crusade. In terms of the question, "What is Crusader art?," I define a Crusader as someone who has taken the Cross and is specifically directed toward regaining and controlling the Holy Land, especially the holy sites in Syria-Palestine, and in liberating the Christians living there, Frankish or Eastern, from the yoke of their Muslim oppressors. Furthermore, I would like to contribute to the debate over the definition of a Crusade in relation to Crusader art, first, by emphasizing the importance of Christian pilgrimage to the holy places as an essential aspect of the origins of the Crusade idea. Second, as I see it, the idea of a Crusade – whatever its later development – can be characterized partly on the basis of that phenomenon, which nearly everyone agrees defined the movement at the beginning and served as its single most successful expedition, namely, the First Crusade. It was, of course, begun by Pope Urban II in 1095 at Clermont and resulted in the conquest of Jerusalem on 15 July 1099. Indeed, I would argue that just as the Crusades to the Holy Land in the twelfth and the thirteenth centuries grew out of the pilgrimage to Jerusalem to become armed expeditions to or at least toward the Holy Land, Crusader art also began as a phenomenon focused on the holy sites in Syria-Palestine that were the objects of the main Crusader expeditions and only later diversified, for the most part after 1187.

If then, as outlined earlier, there is considerable disagreement on the historical definition of a Crusade, one will not find it surprising that there is also no consensus on our question here, "What is Crusader art?"[22] There are several reasons for this, but in general the differences of opinion on this art historical issue derive from considerations mostly quite separate from the historical debate.

First, the study of Crusader art has tended to lag behind research on the history of the Crusades themselves. This lag in part reflects how the study of the Crusader East has developed. Prior to 1917, whereas historians studied both the Crusade expeditions and the Crusader States in the Levant, few scholars spent significant time researching the sites and monuments or learning the terrain firsthand. Since that time, interest in Crusader art and the pursuit of research on the topic have developed more or less directly in proportion to the increased opportunities for study in former Crusader-held territory. This access was occasioned by the British and French Mandates after World War I, and the subsequent establishment of four states at the time of World War II and shortly thereafter, the Republic of Lebanon, the Syrian Arab Republic, the Hashemite Kingdom of Jordan, and the State of Israel, all of which facilitated the opening of Syria-Palestine and the Sinai peninsula to Western scholars.

Second, our knowledge of art associated with the Crusader States has grown prodigiously since World War I, and especially after World War II, with the result that new notions of Crusader art have also emerged, changed, and developed. The earliest studies between 1860 and the 1930s emphasized architecture or architectural sculpture and saw things from a distinctly western European, and in some cases, specifically French perspective. As Camille Enlart wrote in 1925, one could easily imagine the churches of the Latin Kingdom at home in the valleys of the Rhone, the Allier, and the Garonne Rivers of France.[23] Five years later, when Paul Deschamps wrote about the Nazareth sculptures among others, he entitled his article, "La Sculpture française en Palestine et en Syrie à l'époque des Croisades."[24]

More recent studies of the Latin Kingdom since World War II, as well as increased interest in the art of the Mediterranean world, East and West, in the eleventh, twelfth, and thirteenth centuries, especially since the 1950s,[25] have enlarged our scope to include all major media of the medieval period, that is, painting, sculpture, metalwork, numismatics, and glass, pottery, and textiles,[26] as well as architecture. Furthermore, we have altered our point of view to see the Crusader Levant from a much more pluralistic, one might also say, multicultural Eastern outlook.

Nonetheless, what is the point of asking the question, "What is Crusader art?" in 2005? After all, to some extent we know what Crusader art is now.

1. In architecture, it is exemplified by the Church of the Holy Sepulcher, dedicated in 1149.[27] Here the Crusaders took an essentially Byzantine architectural complex and, by adapting the flexible plan of Romanesque pilgrimage road churches, transformed the rotunda of the Holy Sepulcher and the *triporticus* into a double-domed, Gothic rib-vaulted ecclesiastical structure, worthy of the greatest holy site in Christendom.
2. In sculpture, it is exemplified by the Nazareth capitals, carved in the 1170s.[28] These remarkable capitals were designed as part of a figural program for the holy site of the House of the Virgin where the Incarnation took place. Unique in their overall iconography, style and design, and programmatic function among Crusader works, these capitals directly reflect the special circumstances of the holy site for which they were done, their Crusader patronage, and the levantine *ambiente* in which the artist worked.
3. In painting, Crusader art is exemplified by manuscript illumination, by fresco painting, by mosaics, and by icons and panel painting, which span the period from 1130 to 1291. From the earliest dated painting, the enthroned Madonna holding the Child Jesus on the south aisle column of the Church of the Nativity in Bethlehem dated 1130,[29] to the famous royal manuscripts done in Jerusalem and Acre, such as the Melisende Psalter[30] and the Arsenal Bible,[31] to the latest identifiable extant work – manuscript illustrations by the Paris–Acre Master in a codex of William of Tyre's *History of Outremer* left unfinished at the fall of Acre in 1291[32] – we can see a remarkable range of talent and a number of high-quality painters in the service of Crusader patrons.
4. In metalwork and numismatics, Crusader art is exemplified by reliquaries done in the Holy Land between *c.*1125 and 1187, or by coinage issued by the Crusader kings and barons during the twelfth and thirteenth centuries. The reliquary of the True Cross, now in the Württembergisches Landesmuseum in Stuttgart, is a typical example of a vessel produced in Jerusalem to contain a precious relic, in this case, about 1130, and then brought to the West where it was preserved for centuries in the Monastery of the Holy Cross in Denkendorf.[33] Two coins, struck in the 1150s and 1160s by Kings Baldwin III and Amaury I, respectively, are distinctively Crusader because of their architectural imagery referencing specific important sites in Jerusalem – the Tower of David, on the one hand, and the Holy Sepulcher on the other.[34] This architectural imagery is continued into the thirteenth century.

What is immediately apparent from the examples just cited is that most of these readily identified works of "Crusader art" belong to the twelfth century, with one or two exceptions. What our study in the current volume attempts to argue is that equally important Crusader art existed in the thirteenth century, however different it may be. In architecture there is not only the Cathedral of Our Lady at Tortosa, which was completed in the thirteenth century,[35] but also the great castle of Crac des Chevaliers, which effectively took on its current configuration through the major changes and additions made after the 1202 earthquake.[36] In stone carving there are the impressive fragments of thirteenth-century castle sculpture, both figural and decorative work, from Chastel Pelerin ('Atlit),[37] Montfort,[38] and Crac des Chevaliers.[39]

In painting there is the series of somewhat controversial illustrated manuscripts for what appear to be commissions for royal patrons or gifts, including the Riccardiana Psalter possibly done for Queen Isabel of Brienne in 1225; the Arsenal Bible, already mentioned, for King Louis IX, which I am dating to 1250; and the London *Histoire Universelle* commissioned as a gift to King Henry II of Cyprus and Jerusalem in 1286.[40] There are interesting secular works, such as the *Rhetoric* manuscript executed in 1282 for William of St. Stephen, a Hospitaller jurist. There is also an impressive series of major panel paintings including the Acre Triptych done in the late 1250s, a series of handsome devotional icons featuring mounted soldier saints in the 1260s, and a group of outstanding later works, including a very large bilateral processional icon with the Crucifixion and the Anastasis, a dossal with the Deësis and eight saints, and a diptych with St. Procopius and the Virgin and Child *Kykkotissa*, from the 1280s.[41]

And in metalwork and coinage there is the extraordinary Resafa treasure, containing handsome examples of both liturgical and secular goldsmithswork,[42] along with a series of remarkable coins. Some of the most beautiful coins were issued by the count of Tripoli, including two types of *gros*, including the "star" *gros* of Bohemond VI and the "city gates" *gros* of Bohemnd VII, the former of which may have inspired the *gros tournois* of King Louis IX.[43] Among the issues of the Latin Kingdom is a handsome gold bezant from Acre in 1257, imitating the gold coinage of Caliph al-Amir, but with Christian inscriptions in Arabic and an equal-armed cross on the reverse. There is also the rare "Agnus Dei" bezant, a gold coin issued before the fall of Acre with the image of the Lamb of God on the obverse, containing the liturgical prayer.[44]

These exemplary documented works from the thirteenth century are indicative of Crusader production, which demonstrates both that art in the Crusader States continues to develop rapidly and that Crusader art done between 1187 and 1291, especially from 1250 to 1291, is very different from that produced in the twelfth century. These twelfth- and thirteenth-century examples taken together, however, merely enable us to make a provisional and very general formulation of what Crusader art is. Simply put, it is all artistic work done in the Crusader States of Syria-Palestine for Crusader/Frankish/merchant patrons and/or by Crusader artists between 1098 when Antioch and Edessa fell into the hands of armies on the First Crusade and 1291 when the Crusaders were thrown into the sea at St. Jean d'Acre.

WHAT IS CRUSADER ART?: THE CURRENT DEBATE

Whereas most of us would endorse the elementary and very general proposition just stated, it is worth noting that not everyone is happy even with that, and certainly no agreement exists on more sophisticated conceptualizations of Crusader art. Moreover, not only is there as yet no book comparable to Jonathan Riley-Smith's historical discussion, *What Were the Crusades?*, recently reissued in a third edition,[45] that deals with the subject "What is Crusader art?", but also there is as yet no consensus on which to base such a book for both the twelfth and the thirteenth centuries. Even for the twelfth century two recent books have addressed the basic issues with rather different approaches. B. Kühnel's study of Crusader art in the twelfth century asks the question in her subtitle: "A Geographical, an Historical or an Art Historical Notion?"[46] My study of the art of the Crusaders in the Holy Land, 1098 to 1187, proposes to interpret Crusader art as a distinctive art historical phenomenon in a unique historical, cultural, religious, and geographical setting.[47] This lack of consensus pertains to what we identify as "Crusader art," that is, the works of art we call Crusader, who the artists and patrons were, and how we define what is Crusader about any given work of art. Consider the following example:

There is a missal, MS 6 in the Biblioteca Capitolare in Perugia published by Hugo Buchthal in 1957,[48] which we discussed earlier in Chapter 6. This codex, written by a French scribe and done in the early 1250s, contains direct liturgical evidence of its origin in St. Jean d'Acre. In the calendar, there is the entry, "Dedicatio ecclesie Acconensis" for July 12, commemorating the reconquest of Acre in July of 1191. This entry stands out particularly due to the absence of the usual Jerusalem commemorations found in earlier codices from the Crusader scriptorium of the Holy Sepulcher.

This manuscript is also illustrated. For the canon of the Mass we find a full-page miniature of the Crucifixion and a half-page headpiece for the text featuring a bust of Christ flanked by worshipping angels. Buchthal compared these paintings to the wing of a diptych said to be Venetian, the Ryerson Diptych in Chicago, and concluded that the illuminator, while working in Acre under French and Byzantine influence, came from Venice. We have argued that this manuscript artist in fact is working in a Franco-Byzantine Crusader style and that his work can be most closely compared to a Crucifixion icon from the Monastery of St. Catherine on Mount Sinai, which, of course, Buchthal did not know in 1957. The important thing here, however, is what Buchthal had to say about this manuscript and the others grouped with it at the time, by way of introducing the idea of "Crusader art."

> Miniature painting in the Crusading Kingdom... was not a colonial art. It had a distinctive style of its own, which was not derived from any single source, but emerged as the result of copying illuminations from a variety of Byzantine and western manuscripts, and of developing certain features of these models in a highly original and individual manner.... Thus miniature painting in the Crusading Kingdom developed into a very composite art, subject to influences which were the result of local conditions, and which differed with each succeeding generation.... The surprising thing is... that, in spite of the obvious lack of continuity, something like a local style and a local tradition of unmistakable identity should have emerged.[49]

This "local style" and "local tradition of unmistakable identity" is apparently what Buchthal was thinking of as what he later termed "Crusader illumination,"[50] and what we are calling explicitly "the art of the Crusaders in the Holy Land," or Crusader art.

Kurt Weitzmann also discussed the Crucifixion in the Perugia Missal in his pioneering article on Crusader icons, published in the *Art Bulletin* six years later.[51] Weitzmann expanded the possible *comparanda* for the Perugia Missal, and he specifically compared the Perugia Crucifixion with similar scenes on an icon and on an image on an iconostasis beam, both from Sinai. While proposing that this latter icon was done by a different if inferior painter, he concluded with an important formulation of the artistic phenomenon that also built on Buchthal's earlier comments. "The painter [of the icon]," he wrote,

> could actually have been an Italian. Yet we hasten to say that attempts to distinguish the nationalities of the icon painters may not always be successful, simply because Italian and French artists working side by side and apparently having models from both countries available, gradually developed a style and iconography which, when fused with Byzantine elements, resulted in what one might simply call Crusader art.[52]

Thus Buchthal and Weitzmann effectively first coined the terms "Crusader illumination" and "Crusader art," respectively, in the comparatively recent publications just mentioned. It is significant to note that these innovations hinged on the study of painting, a medium heretofore little associated with the Crusaders. This marked an important turning point in the evolution of the idea of Crusader art worth commenting on before we continue.

Prior to 1957/1963, scholars like Charles Melchior de Vogüé, (1860),[53] Hughes Vincent and F.-M. Abel (1914–26),[54] Camille Enlart (1925–8),[55] Paul Deschamps (1927–73),[56] and even T. S. R. Boase, starting out in 1938, referred to the art of the Crusaders, but not Crusader art. They thought of the art of the Crusaders as effectively a transplant, essentially European and mostly from France. This also means they thought of the artists and the architects as coming primarily from western Europe to the Holy Land to work for the Crusaders. In 1939, for example, Boase characterized the Nazareth sculptor as a Romanesque artist, a "personal genius" who had worked at Plaimpied in the Bourbonnais.[57] Such artists were Franks working for the Crusaders; in other words, they were from somewhere else. Even Boase, who early on in his career clearly saw the Crusaders as part of the East–West artistic exchange in the twelfth and thirteenth centuries,[58] does not think of these artists as primarily Crusader settlers, in the sense of being born in the Crusader Kingdom, like the great historian, William of Tyre.[59]

Boase also introduced a second major point: "While recent work [1925–39] has done so much to recall the unexpected richness of the crusading kingdom in ecclesiastical building, its great achievement still remains that of fortification."[60] This is clearly an unspecified reference to the major works of castle-building as well as church architecture and in particular to the studies of Camille Enlart, Paul Deschamps at Crac des Chevaliers, C. N. Johns at 'Atlit, and the survey of the Church of the Holy Sepulcher by William Harvey.[61] Boase's comment refocused scholarly attention on extant Crusader architecture in Syria-Palestine. By contrast the later work of Buchthal and Weitzmann introduced the study of the painted figural arts as a new focus for research.

When Buchthal and Weitzmann studied the manuscripts and the icons done for the Crusaders, moreover, they discovered that this art was certainly not a European transplant: It was something different and distinctive. Thus with the new identification of manuscripts and icons that could be associated with the Crusader States in Syria-Palestine, the concept of Crusader art and its definition took on new meaning. As a result, new problems and difficulties swiftly emerged, partly in response to Buchthal (1957) and Weitzmann (1963, 1966), and partly stimulated by the publication of the fourth volume of *A History of the Crusades*, published in 1977. Volume IV was an attempt to summarize retrospectively what was known about "Art and Architecture in the Crusader States," a work of synthesis by T. S. R. Boase in particular, who wrote chapters on "Ecclesiastical Art in the Crusader States in Palestine and Syria" and "Military Architecture in the Crusader States in Palestine and Syria," as well as "The Arts in Cyprus" and "The Arts in... Rhodes." In these various chapters of the volume he surveyed the monuments, but Boase made no serious attempt to define "Crusader art."[62]

With that in mind, the late Otto Demus in effect opened the current debate on the idea of Crusader art in an important review of volume IV, published in 1979, as we pointed out in our introductory Chapter 1.[63] There we commented briefly on what Demus and others had to say about Crusader art as a thirteenth-century phenomenon. Here we shall explore what they have to say about the issue, "What is Crusader art?" Demus stated that "it is... questionable whether this label [Crusader art] should be used at all for the sum total of the art that originated in the Crusader territories." He immediately qualifies this view, however, by saying,

> some branches may be legitimately designated in this way, especially miniature and icon painting... but others do not seem to qualify for such a definition. There is, for instance, hardly such a thing as 'Crusader Sculpture,' the few surviving works being stylistically so heterogeneous that they cannot be brought under a common heading.[64]

While Demus was at work on his review, Hans Belting was mounting a much more fundamental challenge to the idea of Crusader art. We get a glimpse of this already in 1978, when Belting published an article on thirteenth-century German manuscript illumination in Saxony and its sources in Byzantine-influenced model books entitled, "Zwischen Gotik und Byzanz."[65] In the course of this article Belting introduced the idea of a "lingua franca" in art, adapting the linguistic model so extensively studied by Henry Kahane, and relating it to artistic phenomena.[66] In his analysis he identified cases of Byzantine influences on German painting in which the Byzantine "source" appeared to be later than the Western "follower." He proposed to explain this puzzling situation by postulating a Mediterranean artistic "lingua franca" that stood behind both the Byzantine and the Western works as the source from which their artists drew. This means that he is proposing the existence of works of art in which painters working in the Mediterranean region integrated fully understood Byzantine principles with certain western European aspects so seamlessly that we cannot discern the artists' place of origin.

Belting significantly enlarged on his characterization of the artistic lingua franca in his papers for the session on "Near East and West in Thirteenth Century Art" in the Acts of the 24th International Congress of the History of Art held in Bologna in 1979.[67] He proposed that certain thirteenth-century works like the Icon of St. George from Kastoria or the Mellon Madonna in the National Gallery in Washington, DC, exemplified an art neither Western nor Byzantine, but which developed a new synthetic language of components from sources difficult to distinguish. He insisted this art could only be identified in terms of specific works, which embodied an East–West synthesis in the particular historical circumstances of the Mediterranean in the thirteenth century after 1204. This art, in his view, was distinct from the old notion of the Italian "maniera greca," which was a general concept derived from Vasari in the sixteenth century and lacking specificity. By contrast, the art of the lingua franca was very specific and could also be called "l'art du commonwealth méditerranéen de Venise."[68] Finally, Belting threw down the gauntlet by declaring the following: "we must reserve the expression 'Crusader art' for the twelfth century. Its existence is only relevant for the understanding of western art at the level of ideas and programs, not at the level of artistic form and techniques."[69]

Belting's views immediately raise a series of questions:

1. What is the relationship of Belting's idea of the lingua franca in art to Weitzmann's notion of Crusader art?
2. What has Weitzmann's response been to the idea of the artistic lingua franca?
3. What are the implications and uses of Belting's analysis and formulation of the artistic lingua franca for the study of Crusader art?

First, it is clear that Belting in proposing his idea of the art of the lingua franca has, in effect, challenged Weitzmann's definition of Crusader art quoted earlier. The art of the lingua franca belongs to the wider context of the Mediterranean world, but only after 1204. Moreover Belting distinguished Crusader art from the art of the lingua franca in historical and chronological terms and proposed that at least some of what has been identified as Crusader art in the thirteenth century was in fact subsumed into the artistic lingua franca.

Second, at the same International Congress of the History of Art held in Bologna in 1979, Kurt Weitzmann gave a paper later published in 1984 as "Crusader Icons and Maniera Greca."[70] In his introduction, Weitzmann remarks on Belting's attempt to introduce the concept of the lingua franca as a more comprehensive term for the Byzantine manner in Mediterranean art of the thirteenth century that affected not only Italy, but more or less the whole of western Europe. Weitzmann then rejects the term lingua franca in the following words: "for our purpose we propose to adhere to the old fashioned term *Maniera Greca* because our study will predominantly, though not exclusively, be concerned with Italian panel paintings."[71] In sum, Weitzmann is not willing to relinquish either the idea of the "maniera greca" when dealing with the issue of Italian painting in the Byzantine manner, or the idea of Crusader art as distinct from the maniera greca in the thirteenth century.

In regard to the third question mentioned earlier – what are the implications and uses of Belting's idea of the lingua franca for the study of Crusader art? – let me say that I cannot accept the idea that Crusader art (or Byzantine art for that matter) as we know it in the thirteenth century should be subsumed into a Mediterranean artistic lingua franca. It is my position that there are fully documented works of Crusader art in the thirteenth century, that is, after the German Crusade of 1198 and then after the conquest of Constantinople in 1204 by the Fourth Crusade with its tremendous sack of the city and its treasures, which are distinctive and characteristic works of architecture, sculpture, and painting in the surviving Crusader States in Syria-Palestine. As I have argued in my earlier chapters, some are strongly Byzantine-influenced works with Western aspects for which the origin of their artists are known, and some are not, but all of these works to some extent form an independent artistic phenomenon that I propose we can and should identify as Crusader art.

Having said this, there are nonetheless some obvious implications of Belting's idea of the artistic lingua franca for the study of Crusader art: In the first place, Crusader art in the thirteenth century does differ markedly from that of the twelfth century, with variable degrees of continuity, depending on the medium involved and the circumstances of production. There is no doubt that most scholars would agree on the differences, but we should not forget that Buchthal has quite explicitly affirmed that we find in manuscript painting a surprising emergence of local style and workshop tradition, which Weitzmann has significantly expanded in terms of icons, mainly in the thirteenth century. Belting's contribution here is to sharpen our perception of the nuances and the subtle differences, and to help provide an enhanced notion of the broader context by relating the Crusader works to the new art of what he called "the Mediterranean commonwealth" in the thirteenth century.

Secondly, I regard Belting's idea of the artistic lingua franca in the Mediterranean world of the thirteenth century as comparable in certain aspects to the later phenomenon of the so-called international Gothic style around the year 1400 in Europe,[72] or the idea of Byzantine painting on Crete as a multicultural international style in the fifteenth century.[73] In pointing out certain characteristics of style and technique, program, ideas and ideals found in courtly centers all over Europe around the year 1400 in paintings like, for example, the Très Riches Heures of 1413–16, we can also see the work in terms of Gothic realism and Franco-Flemish manuscript illumination for Jean, duc de Berri, by the Limbourg Brothers. At the same time there are certain equally famous works related to it, like, for example, the Wilton Diptych, which belong to the same international Gothic movement, but for which the origin of the artist, the function, the precise meaning of the iconography, and the date remain controversial and to some extent unresolved. Even as research continues on the Wilton Diptych,[74] we should not stop discussing Bohemian, Italian, Franco-Flemish, English, Netherlandish, or German painting exclusively in favor of the international Gothic. *Mutatis mutandis*, there may well be Crusader works that will continue to defy certain modes of analysis and interpretation, but they can and should be discussed in terms of Crusader art as related to the useful idea of an art of the lingua franca.

Thirdly, it is clear that, strictly speaking, Belting's idea of the lingua franca and Weitzmann's conception of Crusader art are two different notions that are largely mutually exclusive. However, their ideas of the maniera greca do overlap in certain carefully defined ways. Belting's art of the lingua franca is in fact interpretable as a nonexclusively Italian phase of the maniera greca on the way to Duccio's "dolce stil nuovo" at the end of the thirteenth century. It is specifically that phase in which the Byzantine tradition is so substantially and fully integrated with other elements, be they Crusader, Italian, German, or French, that the artist's place of origin is often not identifiable. Weitzmann's idea of the maniera greca is the more generally held idea of Byzantine-influenced art that is specifically Italian in origin. However, ironically, it is what Weitzmann calls Crusader art that may have at least partly served as a transmitter of knowledge of Byzantine artistic tradition in the Mediterranean world to Italy and elsewhere during the thirteenth century, the role that Belting identifies as that of the art of the lingua franca.

Finally, it is evident that as yet the ramifications of Belting's and Weitzmann's ideas about Crusader art in relation to the lingua franca and the maniera greca have been little explored in print; surely they have not been resolved. Indeed, it is certain that Crusader art plays a significant role in shaping the art of the lingua franca that Belting proposed. In any case, the attractiveness of Weitzmann's idea of Crusader art lies in the fact that he affirms the distinctiveness of its artistic traits – in materials and technique, form and content, style and iconography, function and patronage – without insisting that we must know the origins of the artist(s) involved.[75] Belting's concept of the lingua franca in art is also attractive, as an analogue to the pluralistic linguistic phenomenon known primarily in the venues of Mediterranean commerce, that is, the common language of sailors and the documents of shipping. To some extent, what English is for air transport worldwide at the start of the twenty-first century, the lingua franca was for sea transport in the thirteenth-century Mediterranean. In artistic terms, the art of the lingua franca was practiced in the thirteenth-century Mediterranean world by numerous artists from a variety of backgrounds. It is an art partly made possible by the contacts and interaction of artists through increased trade and commerce. However, the art of the lingua franca is not congruent with Crusader art; both have their own separate identity even if they overlap.

Belting's challenge to the idea of Crusader art was perhaps the first important one since 1963, but it certainly has not been the last. Meanwhile, also in 1979, Marie-Luise Bulst proposed some very different questions about the issue of "What is Crusader Art?" in the Introduction to her important study of the mosaic decoration on the Church of the Holy Sepulcher in Jerusalem.[76]

Bulst starts by quoting the famous passage at Book III, Chapter 37 of Fulcher of Chartres in his *Historia Hierosolymitana*, written *c.*1127:

> For we who were Occidentals have now become Orientals. He who was a Roman or a Frank has in this land been made into a Galilean or a Palestinean.[77]

These words she says, perhaps best clarify the special character of the so-called Crusader art. Bulst states forthrightly that, in her opinion, Crusader art is better and more correctly characterized, however, as the "art of the Frankish colonialists in the Kingdom of Jerusalem." In particular she points out that it was not the Crusaders, that is, the actual *crucesignati*, who came as soldiers and/or pilgrims, who built, painted, or sculpted the works we call Crusader art. It was mainly the resident Franks and the Italians from Genoa, Pisa, and Venice, that is, the settlers: western Europeans who came and stayed, some to intermarry, and their children, who generated the art either as patrons or even as the artists. However, she cautions, as orientalizing as the Latin Kingdom may have seemed to Fulcher, who was after all writing at the end of the first generation of settlers, the Kingdom of Jerusalem remained a Western colony, and this colonial outlook characterized Crusader art.[78]

We should remark at the outset that in contrast to Belting or Weitzmann, Bulst was focusing her attention on art of the Crusaders in the twelfth as opposed to the thirteenth century. Moreover, she renders a signal service in drawing attention, first, to the importance of patronage in defining Crusader art, and, second, by focusing on those patrons as mainly the resident Franks, the settlers, as distinct from those marked with the Cross who came and went on Crusade. We need only recall, as one important example, that the patronage of the Melisende Psalter is to be associated with the reigning king and queen of Jerusalem in the 1130s, in the time of the Second generation of settlers.[79] In the case of the Church of the Holy Sepulcher dedicated on 15 July 1149, it is remarkable that virtually no direct connection can be made between the participants of the Second Crusade (1147–8) and that major project.[80] Viewed from a different angle, we can also point out that no extant Crusader manuscripts from the twelfth or thirteenth centuries have been attributed to a patron in western Europe.[81] There surely were commissions of Crusader art by patrons on Crusade, the most important example being the Arsenal Bible done 1250 for King Louis IX,[82] but resident settlers and pilgrims were no doubt responsible for most patronage.

As for the artists themselves, Robin Cormack wrote in 1984:

> Recent studies have made it much easier to make attributions to the period of the Crusades, and to unravel the mesh of artistic and religious traditions. The pioneering studies are by Hugo Buchthal and Kurt Weitzmann.... But there is no agreement yet over the proper use of the term "Crusader Art", and the methods for discovering whether individual artists involved were trained in western Europe or Byzantium need assessment and refinement.[83]

In 1986, this issue with regard to the problem of determining the "nationality" of individual Crusader painters was raised again by Valentino Pace. The problem of assessing who the Crusader painters may have been is clearly extremely important, and Weitzmann and Pace appear to have advanced two completely different proposals in this regard. When Weitzmann first proposed his idea of Crusader painters in icon painting in the 1960s, he apparently envisioned the notion that the artists were Westerners who came to the East and developed into Crusader style painters by gradually learning to combine Byzantine style and technique with their own native tradition. In discussing his section on "Venetian Masters" in his 1966 article, for example, he writes "That some of the Crusader artists . . . were Italian is beyond doubt. It is only when one tries to determine the provinces whence they came that difficulties arise."[84]

In 1986, however, Valentino Pace advanced a completely different point of view.[85] In discussing Weitzmann's ideas with regard to French artists whom he assumes to have painted the Perugia Missal, Pace proposes that "the very nature of 'Crusader painting' eludes all efforts to verify the nationality of its artists; we could go so far as to say that if the origin of the artist can really be detected, his work must no longer be labeled as 'Crusader.'"[86]

If we view these interpretative comments by Weitzmann and Pace in a wider perspective, it appears that they are in effect referring to two different phases of development among Crusader painters. Weitzmann is speaking of an earlier phase, one that is somewhat rare, where perhaps a young painter, having apprenticed to a Western master, is still learning to be an artist, something that he effectively completes with a Crusader master in the East. This clearly would have been a normal occurrence among the first generation of artists in the Crusader States in the first third of the twelfth century, but probably only infrequently after that. Pace, however, is speaking of a later phase in this developmental paradigm, where the artist is perhaps born in the Latin East and has learned to be an artist by studying with fellow Crusader painters, and possibly with Eastern Christian painters as well. In this case the artist would not typically have served a separate apprenticeship with a native French or Italian master. In both cases, links with one or other European tradition may be visible in the Crusader artist's work to a greater or lesser degree, but that fact ipso facto does not disqualify the painter from being identified as a Crusader artist.

Looking at Crusader artists and Crusader style in the thirteenth century with this perspective in mind, we find that Kurt Weitzmann's 1963 formulation about Crusader art requires certain revisions. His text reads:

> attempts to distinguish the nationalities of the icon painters may not always be successful, simply because Italian and French artists working side by side and apparently having models from both countries available, gradually developed a style and iconography which, when fused with Byzantine elements, resulted in what one might simply call Crusader art.[87]

Weitzmann's characterization only fits the very early phase of Crusader artistic development. In fact, I propose that what we normally have in a Crusader workshop is not "Italian and French artists working side by side," but *Crusader artists working side by side.*

It is of course possible that from time to time a young Western artist may have come to Acre, for example, and joined the painting establishment. Such an artist theoretically could have learned a Crusader style on the spot, transforming whatever training he might already have received. The problem with this scenario is that we have very few, if any, documented examples of such a painter. In the early twelfth century, we do have the case of the Melisende Psalter, of course, in which we see several artists at work, each of which comes with a distinctly different background and training. In the case of Basil, the main painter, he clearly appears to have been born in the East and trained there, whereas in the case of the painter of the headpieces to the prayers, he seems to be a Westerner perhaps recently arrived in Jerusalem and learning to be a Crusader painter. In the latter case, the problem is that we do not have work done by him in the West before he came to the Holy Land by which to document this interpretation.

In the thirteenth century, however, we have certain evidence that when one mature European artist came to Acre to work, the Paris–Acre Master, he largely retained his own style, the Parisian Gothic style of his primary training. In this case we have his work documented first in Paris in the 1270s in the form of three manuscripts and their miniatures, and then followed by eight illustrated codices that he did in Acre between 1280 and 1291. What this artist demonstrates is that in his case someone who came from Paris mature and fully formed as a painter continued his work in essentially the same style. He did not suddenly or even gradually become a Crusader artist, that is, working in a Crusader style during the approximately eleven years he worked, even though he clearly worked for Crusader patrons. His case forces us to consider that without documented evidence to the contrary, it is on balance unlikely that a fully mature artist would change his painting style in any fundamental way from that in which he had been trained when moving from one place to another, no matter what change of circumstances he may have experienced.

The appearance of the Paris–Acre Master in Acre also raises the issue of Crusader art as a colonial art, which is an equally difficult and complex problem. This issue arises partly from the debate about the Crusader States in general and the Latin Kingdom in particular. Peter Edbury refers to "the vexed question of the extent to which the Latin regimes can be labeled 'colonial.'"[88] It is Joshua Prawer who argued that "the Latin Kingdom of Jerusalem" should be seen as a colonial venture, in his 1972 study of the same name, subtitled "European Colonialism in the Middle Ages."[89] The majority view is, however, voiced by Jonathan Phillips, for example, in which he says:

> It is a controversial issue whether these territories [the Crusader States] were an early example of western European colonialism. Some historians believe that the concept of colonialism carries too many emotive associations to be useful when discussing the history of the crusades because it tends to evoke images based upon episodes such as the British settlement of North America or the Spanish invasion of the New World. They maintain that traditional definitions suggest that a colony is politically directed by, or economically exploited for the benefit of the homeland, or subject to really large-scale migration. These do not fit the Latin settlements in the Levant before 1291.[90]

This argument has moved on, as we see in Riley-Smith's recent comments on the Latin Kingdom viewed as a frontier society:

> Every frontier society was different in makeup and few were culturally homogeneous. Pluriformity was a feature of Palestine in the twelfth and thirteenth centuries.... The nature of colonial society in the Latin East and the extent to which there was assimilation is once again under discussion.[91]

I will not enter here into a further historical discussion of the Latin Kingdom as a colonial enterprise, nor is this the place to attempt a full discussion of colonial art as related to the characteristics of Crusader art.[92] However, if we look at Crusader art merely as colonial art, the way Enlart among others did in the past and as Bulst urges us to do now, it seems we miss two very important aspects.

First, a point that Valentino Pace has made, we miss the significant differences between Crusader work and the western European art to which it may be compared and contrasted.[93]

Second, if we contemplate a brief paradigm of the phenomenon of colonial art taken from other examples, for instance American art in the seventeenth century, we see very little correspondance to what we find in Crusader art. Using two well-known colonial American works as examples, the anonymous painting of Mrs. Elizabeth Freake and Baby Mary (*c.*1675, Worcester Art Museum), and "St. Luke's" Church (The Old Brick Church) in Smithfield, Virginia (*c.*1632–82), consider the following points:[94]

1. Much early American colonial art resolutely clung to ancestral English traditions in a posture of dependency.
2. Artists in the colonies were inferior to those in England during the early period and came from provincial centers.
3. Furthermore, the development of art in the colonies was decidedly retardataire in contrast to the major centers in England.

In contrast to the American experience, early Crusader artists (to *c.*1150) demonstrate a rich and varied cultural background, as in the Melisende Psalter and the sculptors on the Church of the Holy Sepulcher. Moreover, they embraced the local Christian artistic tradition, which was mainly Byzantine and Orthodox, whereas American colonial artists drew little at first from the artistic traditions they found in North America. Crusader artists like Basil in the Melisende Psalter were not inferior in quality to artists in the West, and Basil, who may have studied in Constantinople, cannot be said to have come from the provinces, wherever his home may originally have been. Crusader art clearly drew on some sources that may have been retardataire, but they were not primarily western European, for example, eleventh-century Byzantine manuscript painting, and they created a new and different art in the Near East that was reasonably *au courant* with contemporary developments from western Europe, however distinct. In evaluating the Arsenal Bible from the mid-thirteenth century, similar things can be said, except that the Byzantine models were ninth and tenth century of remarkable quality as were the thirteenth-century French models derived from such outstanding works as the Morgan Old Testament Picture Book, MS 638, and the *Bibles Moralisées*, both from the first half of the thirteenth century in Paris.[95]

In sum, these minimal considerations allow us to suggest that whereas there is undoubtedly a colonial aspect to Crusader art, this colonial aspect is limited and needs to be carefully identified in each individual case. To some extent the issue of how Crusader art is related to the phenomenon of colonial art is discussed in my first volume, where I partly concluded "it is... possible to speak of colonialism in Crusader art, but it is not accurate to speak of Crusader art as simply a colonial art."[96] The fact that Crusader art is a product directly associated with the Holy Land elevates it to a special status. To see Crusader art merely as a colonial art is to fail to see what makes it distinctive and unique in the twelfth and thirteenth centuries.

That is not to say there is no colonial aspect to the art of the Crusaders in the thirteenth century. The perhaps surprising feature of this colonial aspect, and one that Bulst chose not to mention, is that one of its most accomplished practitioners – or at least the Crusader painter working in the purest French Gothic style – arrives in the Crusader East, in Acre, about 1280, that is, at the very end of the existence of the Crusader Kingdom on the mainland in the thirteenth century, not at the beginning. The artist in question, a man we originally called the "Hospitaller Master" and now have renamed the "Paris–Acre Master," works in the Gothic style found in Paris in the 1270s. Indeed he comes from Paris, where we find his work in 1276 and the later 1270s.[97] Here specifically we see the transfer of an artist and his style, essentially unaltered, from France in western Europe to Acre in the Levant. It is precisely what the French art historians of the early twentieth century, as well as Boase and Borg in regard to the artist of the Nazareth capitals, all cited earlier,[98] were claiming as the general and essential nature of Crusader Art, by which, however, they mainly meant architecture and architectural sculpture. However, so far the Paris–Acre Master is virtually an unique case in terms of the identity of the artist, his work as a painter, and the documentation of his activity. His work is surely a valid example of Crusader art: It is art commissioned by crusader patrons such as William of St. Stephen in 1282. In this case it is the patronage that defines it. However, in terms of what we now know, by no means is the work of the Paris–Acre Master a typical example of what constitutes Crusader art. Quite the contrary, in many ways the art of the Paris–Acre Master, painting that is so quintessentially based on the Parisian style of the 1270s, is quite atypical in relation to the overall *corpus* of what we identify as the art of the Crusaders, even in the period 1250–91. The art of the Paris–Acre Master is colonial Crusader art, because even though it is commissioned by Crusader patrons, it is heavily dependent on the French Gothic art of his homeland, even though it is far from provincial and certainly not inferior in quality to other contemporary Parisian work in illustrated manuscripts.

The Paris–Acre Master is clearly a special case, but nonetheless, when Crusader, French, Italian, English, German, Byzantine, Armenian, and local Christian Arab artists, their patrons, and their art came together in the special circumstances of the Holy Land, the Crusader States, and especially the Latin Kingdom, this phenomenon produced a context quite different from centers of contemporary art in western Europe. The results of their interaction – however great or small – in this setting were also different and usually quite distinctive: It is what we call Crusader art.

These debates over the nature and development of Crusader art notwithstanding, we should not lose sight of the fact that at the heart of the discussion are the works of art themselves and the criteria we use to identify these works as Crusader. It is clearly evident that the controversy over what works should be part of the *corpus* and what can be identified as Crusader about them is very much alive. Questions along this line have recently been voiced *à propos* of painting and especially with regard to certain icons, those most difficult and fascinating monuments in regard to Crusader artistic developments.

In 1986, for example, the late Doula Mouriki published a major monograph entitled "Thirteenth-Century Icon Painting in Cyprus" followed by other lectures and articles on kindred icons.[99] Related to the important examples of Cypriot icons that she discussed are several that Weitzmann first published as Crusader from Acre in the period 1250–80, in particular, two icons with mounted soldiers: St. Sergios with a kneeling female donor (App. no. 1480), and a bilateral icon of Sts. Sergios and Bacchos and a Virgin Hodegetria (App. no. 1063).[100]

It is interesting that Weitzmann in his original publication of the icons with the mounted soldiers attributed them to Apulian painters working on Sinai, but he qualified this by saying, "I must admit that in this case [this group of icons] I do not feel as sure about the provenance as I do in the case of the French and the two Venetian ateliers." Weitzmann wonders whether the artists might be South Italian, but with strong ties to Venetian art. Here again is a case of icon painting where the origin of the artist is in doubt: Weitzmann sees them as "Crusader."[101] Belting would call these prime exemplars of the artistic lingua franca. Mouriki deals cautiously with these icons, pointing out their Cypriot and Syrian characteristics, and concludes that they were probably done by a Cypriot artist of Syrian background on Sinai.[102] Meanwhile, Lucy-Anne Hunt has recently argued that these two icons were possibly done by a Syrian Orthodox painter in the County of Tripoli, comparing them to wall paintings at Qara and in the region of Qalamoun, probably before 1271 when Crac des Chevaliers fell to Baibars.[103] She argues further that the kneeling female donor in the St. Sergios icon was the patron of that particular icon, and discusses the issue of women's spirituality at some length as an important factor during the Crusader period. At this point in the unresolved debate, Mouriki's and Hunt's arguments are more provocative and persuasive than Weitzmann's tentative idea that they were done by a South Italian artist, or that they were done on Cyprus itself as George Sotiriou had originally proposed.[104]

Mouriki's and Hunt's discussions of these icons bring out two important points. In the case of the icons with the mounted soldier saints, it is clear that, despite the integration of East and West that these works exemplify and the iconographic features that identify these panels with Crusader patrons – the military saints, the red cross banners and eclectic representation of arms and armor, the kneeling female figure with a black veil –, they are still problematic in regard to their place of origin – Sinai, Cyprus, Acre, Tripoli? – and the origins of the artists who did them – South Italian, Venetian, Cypriot, Syrian? They are, however, in my opinion, no less Crusader because of these difficulties. Unless the Crusader characteristics can be shown to be misinterpretations, which is not the case here, these works merit a place in the *corpus* of Crusader art.

In this instance the need for continual reexamination of these icons, for which Weitzmann repeatedly called, is obvious without necessitating the removal of this work from the hypothetical Crusader *corpus* of painting in Syria-Palestine. As Mouriki said, "we may wonder if Crusader painting, according to the traditional definition, is a less substantial reality than has been assumed."[105] There can be no doubt that many difficult questions remain to be answered about these paintings, but as research continues, the idea of Crusader art will not be any less valid as a concept even though its definition can and must evolve as studies move ahead. This process of reevaluation will proceed as we learn more about Crusader art in Syria-Palestine, Byzantine and Crusader art in Constantinople and on Cyprus, Frankish art in Greece, and other Mediterranean artistic traditions.

The questions raised by Demus, Belting, Bulst, Pace, Mouriki, and Hunt referred to earlier have generated fruitful debates about the idea of Crusader art to date, but they are by no means the only significant ones. Bianca Kühnel, Annemarie Weyl Carr, Lucy-Anne Hunt, Doula Mouriki, Barbara Zeitler, and Robin Cormack in particular, among others, have raised other issues with substantial and important discussions.[106] The first scholar focused on aspects of Crusader art in the twelfth century, which formed the foundation for Crusader developments in the thirteenth, but she did not create limits beyond which the later works and their artists could explore. Bianca Kühnel attempts to draw the most systematic picture, concluding with the following comments:

> The element of continuity and unity in this apparently chaotic artistic life of the Crusader kingdom, as it emerges... was assured by the general sensibility towards the *loca sancta*, and by the obvious attention accorded to their artistic history and appearance.... The receptivity of the Crusader artist, whatever his place of origin or his training, towards Eastern sources, Byantine, Muslim, or local, went far beyond that of contemporary Western artists working in the West. All these factors together confer its specific character upon Crusader art.

She then speculates that one alternative interpretation of this idea derives from how we understand "local" factors.

> All the sources of influence labeled and documented as Byzantine, provincial-Byzantine, local early Christian, and Muslim, may be considered as one, local. They may well be separate features with a common denominator, different aspects of a Christian school of art existing with no interruption from the early Christian period,... experiencing a revival with the re-establishment of Christian rule over the holy places. The driving force behind the preservation of a Christian artistic presence in the Holy Land before the Crusades would naturally be local Orthodox Christianity under the Byzantine Protectorate. So we can easily imagine that when Christian rule was renewed in Jerusalem and the arts flourished in the service of new masters, the local Orthodox Christian artists were enrolled. Perhaps [this happened] not immediately after the conquest [in 1099], but after a little while, and in cases where local skill was needed, either because Western artists were not always sufficiently available, or because the locals had particular crafts unknown in the West, and therefore especially attractive.[107]

This is an interesting reflection on the early circumstances of the art of the Crusaders and who the artists were. She further nuances this idea as follows:

> It seems... more correct to... seek the local character of Crusader art in its local roots and not in hypothetical attributions to putative locally-bred artists of an unbroken tradition. As we have seen, "local" does not necessarily and exclusively mean local artists, but mainly local past, local interests, local beliefs. This definition of the local character of Crusader art may be much more productive than the search for lost identities or indirect, written proofs of artistic activities. Its advantage consists in giving priority to monuments, weight to their similarities and dissimilarities, preference to form and style, and importance to content and intrinsic message.[108]

Her view represents a significant expansion of the role of the local in the art of the Crusaders. In proposing it she goes far beyond what Buchthal identified as "local style" or "local tradition," privileges workshops over artists, and because she is focusing on the twelfth century, we do not know how this will play out in the thirteenth. However, the emphasis she places on the likely role of the Eastern Christian artistic tradition and their workshops and artists as part of Crusader developments is an important contribution to the construction of a fully articulated idea of Crusader art.

Lucy-Anne Hunt also contributed to the discussion and critique of Crusader art conceptualized as a colonial art, and as Kühnel's predecessor, she first emphasized the role of indigenous Christians in the development of Crusader art. She writes that the idea of Crusader art had developed out of a Eurocentric frame of reference, that

> The art historical concept of "Crusader" art is grounded... in a preoccupation with colonialization from a western point of view. It is envisaged as a composite, the output of western artists of different nationalities confronting Byzantine art.[109]

However, she argues on the basis of her analysis of the major project to decorate the Church of the Nativity in 1167–9, during the reign of King Amaury I, that Crusader art here was rooted in the dynamics of the local Christian tradition. She concludes her discussion by saying that

> there is, then, every reason to suppose that the mosaic work at Bethlehem belongs within a lively artistic tradition maintained by indigenous artists throughout the period of the Latin Kingdom. The major building and renovation projects of the twelfth century were understandably undertaken with an eye to surpassing the major local Muslim monuments of the past....
>
> This interpretation of the mosaic program at Bethlehem identifies a third, indigenous, dimension to an understanding of art in the Latin East, challenging the concept of an exclusively bipolar western-Byzantine "Crusader" art.[110]

This, in effect, in 1991 laid the basis for the interpretation of Kühnel in 1995.

Annemarie Weyl Carr as a Byzantinist has mostly addressed the art of the Crusaders in the Holy Land indirectly, but she has devoted a substantial part of her scholarly career to the art of medieval Cyprus. Dealing with Cyprus, she has raised important issues that have relevance to the art of the mainland Crusader States. For example, in 1995 she wrote:

> On many levels – of style, iconography, ornament, Morellian detail – thirteenth-century Cyprus belongs with Syria and South Italy to an artistic commonwealth. Its shared elements are as yet impossible to sort out and assign to a one-way stream of artistic influence, be it eastward from Italy to Cyprus and Syria, be it westward from Cyprus and Syria to Italy. Bound in the twelfth century to the Constantinopolitan circle of influence, Cyprus became in the thirteenth a constituent in a very different circle that stretched from Italy to the Syrian mainland. The play of artistic borrowing within this circle is not well understood. Syrian immigration to Cyprus was heavy in the thirteenth century, but if one explains the

> appearance of similar forms in Italy as a radiation of influence from Cyprus, then the Orthodox art of Cyprus in the thirteenth century acquires a centrality that is still hard to imagine. What seems clear, however, is that the island had an Orthodox artistic tradition, a tradition that was sturdy enough to subsume within it the patronage of westerners who sojourned on Cyprus. Moreover, it was an artistic tradition with its own geography. Though it incorporates elements that are seen in the west, these elements are in no sense specifically Lusignan or in any clear sense Crusader: they can be called Crusader only in the most generic sense, in which sense "Crusades" serves as a shorthand for the vast range of commercial and religious networks that spun across the Mediterranean in the twelfth and thirteenth centuries.[111]

As for direct interaction between the art of Cyprus and the mainland Crusader States, she too sees the development largely in terms of a shift from the Latin Kingdom to the Kingdom of Cyprus in the late thirteenth century.[112] Despite the fact of joint rule by the kings of Cyprus over both the island and the Latin Kingdom, starting in 1268 with Hugh III, very little is known of Crusader art patronage on Cyprus until later. "Only when the fall of Acre dispatches a group of practiced patrons to Cyprus does Latin patronage make its visible appearance. This is a full century after the Lusignans had arrived on the island."[113]

Beyond Cyprus, Annemarie Weyl Carr has also studied the painting of Cilician Armenia and its relationship to both Byzantine and Crusader art in the thirteenth century. It is out of her discerning analysis of stylistic links between certain Sinai icons with regard to Cilician Armenian work that one of the most difficult and fascinating issues is identified yet again. In discussing a late-thirteenth-century double-decker icon now in the Monastery of St. Catherine, which contains the Crucifixion above and the Nativity below Sinai, she draws attention to its remarkable characteristics, both hybrid and unique.[114] The combination of these two scenes presented in this manner is unusual, and it is particularly notable that the Crucifixion is represented in a smaller image than the Nativity. The dramatic colorism, the preponderance of eight-pointed stars, the explosive star of Bethlehem, the angular forms, and jagged outlines all suggest a vigorous Armenian style related to the early fourteenth-century artist, Sargis Pitsak. However, in the end, Weyl Carr wonders whether the icon might not conceiveably be Latin. She notes the Gothic style three-nail Crucifixion, the style of Christ's loincloth, the nature of the stars, the bursts of light, and the colors, along with the lack of any Armenian inscriptions. The only inscriptions are, in fact, the standard Greek abbreviations, done in letters of variable size and shape. The iconography is challenging, not only the Crucifixion type, but also the exotic three magi, two with Armenian-type headdress and one swarthy and oriental-looking with an intriguing round type of cap. The issue is, clearly, who could the artist be? What is the artist: Is he Armenian or Crusader, or something else? It is one of the classic issues that one faces constantly when studying painting in the multicultural context of the Near East in this period. We are still searching for new ways to evaluate this problem.

Another Byzantinist who has also contributed to the discussion of Crusader art is Robin Cormack. As he noted in his 1984 article, "there is no agreement yet over the proper use of the term 'Crusader Art,' and the methods for discovering whether individual artists involved were trained in western Europe or Byzantium need assessment and refinement."[115] This discussion has been proceeding as we have indicated. However, now Cormack has recently followed Hans Belting in identifying the Venetian sphere of influence in the Mediterranean as constituting a crucial multicultural zone within the Byzantine orbit in which the Crusaders also operate. Cormack has lately drawn particular attention to the importance of artistic developments on Crete in the period 1210 to 1669, during which time it was under the jurisdiction of Venice.[116] He points out that Crete offers an exceptional opportunity for modern scholars to understand better the process of icon making, because of the late medieval practice of signing and dating icons, by among others, more than 120 painters who lived and worked in Candia in the second half of the fifteenth century. Noting that Kurt Weitzmann decided that the first step in dealing with hundreds of unstudied icons in the Monastery of St. Catherine on Mount Sinai was to "identify the leading ateliers," a similar approach can be tried on Crete. The difference is that notarial records associated with Crete may be combined with signed and dated icons to help us understand how work was carried out, for whom, and for what purposes. None of the same type of documentary evidence exists for the Crusader icons on Sinai, but careful study of the material relating to Crete in the fifteenth century may substantially assist research on the icons from somewhat different circumstances in thirteenth-century Sinai. Interpretation of the new material will be challenging. Nonetheless, these Cretan icons in the fifteenth century offer the best opportunity – better than those on Cyprus – to observe the final stage in the history of the Byzantine icon, a stage in which the artists knew Western ideas from material on the island, or from direct knowledge of Italy, in particular the art of Venice. *Mutatis mutandis*, this is a situation comparable to the production of the so-called Crusader icons at St. Catherine's Monastery on Sinai, *c.*1250–91, in which Western ideas and contact with Italy were also important factors.

We can also mention Maria Georgopoulou's work in presenting our remarks here. Along with Robin Cormack and other Byzantinists of late, such as George Galavaris, among others, Georgopoulou has also focused her attention on Crete, most directly on the late medieval architecture.[117] However, she has also sought an understanding of the Levantine market as it existed in the later Middle Ages in the eastern Mediterranean, beginning with the thirteenth century. In this art historical material, she has endeavored

> to view the arts of the crusades as a product of a rich and complex society that reflects its multiethnic makeup and actively constructs its identity. The crusader states which were established in the area of Greater Syria in the twelfth and thirteenth centuries offer paramount examples of polyglot and multicultural societies. The eclectic/hybrid arts produced in this environment are usually viewed (and taught) as products of two clashing traditions, East and West. In the end of the twentieth century distinctions between East and West are not only unhelpful, but are increasingly difficult to sustain and theoretically suspect. First, the vagueness of such essentialist terms makes them hard to define – especially for the study of artifacts and buildings which were made in the plural societies of the crusades. Second, this reasoning posits a constant struggle between Western Latin, Byzantine Orthodox or other Oriental Christian, and Islamic cultures and implicitly denies the possibility of any consensus among the ethnic

groups residing in this area. In fact, such paradigms recall the testimony of the medieval "Western" settlers who grouped all the inhabitants of the crusader states into one category.[118]

Finally, we should note that the debate over the nature of Crusader style, the identification of Crusader artists, and the idea of Crusader art continues at a brisk pace with a wide spectrum of views. Following on from Mouriki's proposal that "we may wonder if Crusader painting, according to the traditional definition, is a less substantial reality than has been assumed,"[119] one art historian has recently written: "Perhaps another question emerges from the preceeding discussion [of two iconostasis beams from Sinai]: does it not appear that the concept of 'Crusader icons' is the figment of an art historical imagination?"[120] Taking a more constructive view is Robin Cormack in his recent article on "Crusader Art and Artistic Technique: Another Look at a Painting of St George." Here he discusses the views of Doula Mouriki published in 1986 and 1990, shortly before her untimely death, and adds his own valuable analysis and comments. He observes that,

> as a consequence of her systematic studies on the icons of Cyprus and Sinai, she [Mouriki] reached the conclusion that the category of Crusader icons which Weitzmann had proposed should almost entirely be deconstructed. The category as a whole represented a very small amount of the surviving icons from Sinai, something like 120 icons out of the thousands in the collection, and only a few pieces in this small group seemed to her indisputably linked to the production of artists from the West. She was overall critical of the binary framework set up by Buchthal and Weitzmann, in whose analysis it was implied that Western artists produced the *maniera greca* for the contemplation of Western patrons, while Byzantine artists produced traditional "pure" Byzantine imagery for Orthodox patrons.
>
> The criticisms of the binary division of Crusader art into "pure" and "composite" made by Mouriki and other art historians is clearly fundamental. Such a polarity does not do justice to the complex artistic production and viewing of any multi-cultural society, nor indeed to the variety of Byzantine art itself.[121]

I certainly agree that this binary paradigm and the assumptions associated with it constitute an oversimplification with regard to Crusader painting in the thirteenth century, one that I have attempted to discuss in the chapters in this book at some length. Viewed from the perspective of whom the artists may have been and what we can know about them, it seems to me we must change our assumptions about and understanding of who made Crusader art. Some artists seem to have been purely Byzantine trained, with all the variety and complexity that that implies. Some artists seem to have been purely Western trained, such as the Paris–Acre Master. A few artists may have been Westerners who came to the Latin East early in their lives and were mostly trained in the Latin East, but it is difficult to identify very many of them. However, the majority of the artists we seem to have doing Crusader art appear to have been Crusader artists, that is, Frankish artists mostly born locally and trained locally by other Crusader artists.

To this expanded and reconfigured paradigm, I gladly add the suggestion introduced by Cormack in his article, in which he proposes that, in addition to traditional art historical methods of stylistic and iconographic analysis, "an alternative approach must be to ask whether technical considerations might be able to offer the possibility of progress over the nature of production of some of these paintings."[122] However, I think we should be realistic about the fact that although scientific study can no doubt help us, technical considerations can only help to some extent. Interpreting the best data correctly will still be the challenge and the serious task of the art historian, and as we have seen in other such endeavors in other fields – I am thinking of Early Netherlandish Painting, or the Rembrandt Project – technical considerations often raise as many questions as they answer. That being said, it would nonetheless be quite wonderful if arrangements could be made to submit the Crusader icons at the Monastery of Saint Catherine on Mount Sinai to scientific study in a first-rate conservation laboratory.

CRUSADER ART VIEWED TODAY

The ideas and the discussions cited in the previous section have all contributed to our idea of "What is Crusader art?" and to what works of art and architecture constitute the *corpus* of this art. What, then, have our researches enabled us to see about Crusader art in the thirteenth century since 1957–63? It appears that more of the ecclesiastical architecture and the architectural sculpture is to be dated to the twelfth century, whereas even though many castles are built in the twelfth century, more fortification architecture seems to have been built in the thirteenth century – newly built, added on to, repaired, rebuilt – as we have seen. Crusader painting is spread – however unevenly – over the nearly two-hundred-year period, 1099 to 1291. In architecture, clearly R. D. Pringle's efforts to survey and publish a *corpus* of Crusader churches, the first two volumes of which were published in 1993 and 1998,[123] is a truly major contribution, but there are major *desiderata* as yet unclaimed: a monograph on the Holy Sepulcher, and monographs on other major churches like the Church of Notre Dame in Tortosa. We need major architectural studies of Crusader Jerusalem and Acre like that of Michael Burgoyne on Mamluk Jerusalem,[124] and more archaeological work on major sites. We have a recent book on Jerusalem,[125] but we need others on sites like those of Margat Castle, Saone (Sahyun), Antioch (Antakya), and Edessa (Urfa). In architectural sculpture, the *corpus* of Crusader sculpture begun by the late Zehava Jacoby is still in need of completion and publication. Although it is true, as we mentioned earlier, that much work has been done on Crusader sculpture since 1977, only when we have a complete catalogue raisonnée can we fully assess the charge that Demus laid in his review, namely, that the sculpture was so heterogeneous as to defy a common label such as Crusader art.[126]

Meanwhile in the realm of monumental painting, Gustav Kühnel will hopefully publish shortly a study of Crusader mosaics, focusing his attention on the extremely important mosaics in the Church of the Nativity in Bethlehem, a companion volume to his excellent work on Crusader fresco painting, which appeared in 1988 with outstanding plates.[127] Although we have significantly more extant monumental painting – mosaics and fresco painting – in the twelfth century, which accords with the extant architectural work, manuscript illumination and icons are important media demonstrating that the figural arts link Crusader developments of the twelfth and the thirteenth centuries. On the other hand, we should remember that the significant majority of illustrated manuscripts and icons appears to date to the period from 1250 to 1291, yet not all the known material is fully published in either medium. The fact remains that of the approximately 120 "Crusader" icons at Sinai with Greek and Latin inscriptions, something just over half have been previously published, and we have added certain other icons from this group at St. Catherine's in this volume, along with a preliminary illustrated handlist to introduce the others into the scholarly debate.[128]

Other media in the so-called minor arts – ivories, textiles, metalwork, seals, and coins – need to be brought more fully into the overall picture of Crusader artistic developments. Recently the famous ivory covers on the Melisende Psalter have received serious study by Bianca Kühnel, and several other studies are in progress.[129] Two recent publications of Crusader numismatics have expanded our knowledge of this essential field,[130] and we also await the publication of the Grierson collection of Crusader coins in the Fitzwilliam Museum, Cambridge. Also the varied and important metalwork recently published needs to be integrated into the picture of Crusader developments in the Near East. It is the coins and the metalwork in particular, along with some of the icons and frescoes, that are opening up our view of Crusader art outside of the Latin Kingdom, that is, in the northern Crusader States, such as Antioch and Tripoli. We especially need further investigation into the metalwork, enameled glass, and other minor arts of the "Levantine market" to shed further light on the identifiable objects, the artists, and the dynamics of Crusader minor arts all through the thirteenth century.

In sum, it is certain that the study of Crusader art, especially thirteenth-century Crusader art, is currently a lively field of inquiry – witness the debates over what it is and about which works of art belong to the *corpus*, as well as the major projects underway at this moment. It continues to be invigorated by certain new discoveries, recent finds, and important publications that have been published in the decade of the 1990s up to the present day. Let me mention just a few:

1. Martin Biddle and his team are in the process of doing a full photogrammetric study of the aedicule of the Holy Sepulcher in Jerusalem and have already made a number of finds of significance for the structure in the Crusader period as seen in his recent book (1999) and in previous articles.[131]
2. Thilo Ulbert's volume on the Crusader period silver treasure discovered in the excavations at Resafa in Syria appeared in 1990, greatly expanding the type of metalwork known from Crusader ateliers *c.* 1200.[132] We look forward to future archaeological discoveries and publications of this importance to further deepen our understanding of Crusader metalwork.
3. In 1991 Peter Edbury, in the course of his work on a new edition of the *Livre des Assises* by Jean d'Ibelin, discovered a "new" manuscript illustrated by the Paris–Acre Master in Acre – the artist formerly known as the Hospitaller Master – in a codex of the *Livre des Assises*, now in the Marciana Library in Venice.[133]
4. In 1997 John Porteous published the catalogue of the John J. Slocum collection of Crusader coins. This collection contains fine examples of all the major issues of the thirteenth century, and this catalogue is clearly an important contribution to the further study of Crusader numismatics.[134]

We look forward to other important new finds and new publications in the future.

What then can we say about the nature of Crusader art today? Over 107 years ago, in 1897, the great French Byzantinist and Orientalist, Charles Diehl, published a paper on "Les monuments de l'orient latin."[135] His Crusader monuments were limited to major castles, churches, sculptures, mosaics, frescoes, and coins – he cited no manuscripts, no metalwork, no panel paintings – and he characterized the art as produced by a "société latine transplanté dans la terre de Syrie." Nonetheless he clearly understood that this society was both composite and complex, and that the art reflected the same character.

In 2004, Crusader art looks very different to us in many ways: impressively expanded in the *corpus* of examples, significantly richer in its variety and multiculturalism with significant artistic interpenetration, and more complex in terms of its development. Moreover in contrast to Diehl, today we are beginning to distinguish clearly among separate developments in the greater Crusader East: Along with the art of the Crusaders in the Holy Land (1098–1291), we also find Crusader art on Cyprus after 1191, the art of Frankish Greece after 1204, and the art of the Latin Empire in Constantinople (1204–61), not to mention the art of the Armenians in Cilician Armenia, and of the Maronites and Melkites, Greek Orthodox, and Syrian Orthodox in mainland Syria-Palestine.

It seems clear that all of these Eastern Christian developments are important for understanding Crusader art. Whereas the art on Cyprus and Armenian art have both received a certain amount of attention,[136] the other developments remain somewhat mysterious and require further investigation. Important studies have been published in all of these other areas, but more attention is needed to understand the relationship between Crusader art and these local traditions. For the art of the Latin Empire, the pivotal work remains the frescoes of the St. Francis chapel in what is now the Kalenderhane Djami,[137] but important questions exist with regard to the production of illustrated manuscripts and icons in Constantinople, as well as frescoes elsewhere in the lands of the Latin Empire in this period.[138] The work of local Christian artists in Syria-Palestine during the era of the Crusader States is particularly crucial in assessing artistic identity and workshops, for which we have a number of recent studies that contribute substantial new light on very difficult, but very fascinating and rewarding material.[139]

In sum, then, our proposition here is that the major art produced in the mainland Crusader States between 1098 and 1291 was produced for Frankish or Crusader patrons, by local Crusader or even Frankish and sometimes indigenous Christian artists, many or even most of whom were associated with the Crusade movement. As such it merits being called the "art of the Crusaders in the Holy Land," rather than "colonial art in the Crusader States," or the "art of the Crusader settlers," the "art of the 'lingua franca,'" or even primarily "Crusader art," although we regularly use this last term as a shorthand reference. This art is diverse and includes pilgrimage art, ecclesiastical art, royal art, art for the military orders, especially the Hospitallers, Templars, and Teutonic Knights, religious and secular art for knights, men, and women of the aristocracy, bourgeoisie, and merchants, most of whom initially were Franks from the West, and later many were Frankish settlers in the Crusader States of Jerusalem, Tripoli, Antioch, and Edessa. By contrast, this art does not include the work of indigenous Christians done for their own communities, be they Orthodox Greeks or Arabs, Syrian Orthodox or Jacobites, Maronites, or Armenians, Copts, or Ethiopians, but the work of these Eastern Christians is crucial for understanding what is Crusader about the art of the Crusaders as I have indicated previously. By our working hypothesis then, a Crusader work was either commissioned by a Crusader or Frankish patron and/or produced by a Crusader artist in the Crusader States. We have also addressed questions of function, of form, of content, of technique, even of medium, but these cannot as yet be fully spelled out in Crusader terms in all examples.

So, even if we cannot as yet fully answer the question, "What is Crusader art?" on mainland Syria-Palestine, we can say that it is a major chapter in the history of European and Near Eastern art in the Mediterranean world of the twelfth and thirteenth centuries that is now starting to take shape. We can also say that just as dramatic advances were made in the study of Crusader art in the periods from 1910 to 1934 and 1957 to 1977, the two decades from 1990 to 2010 promise equally significant contributions in light of all the important work currently underway by so many scholars. No doubt when we observe the 900th anniversary of the Crusader capture of Tripoli on 12 July 1109, in 2009, and in 2099 the 1,000th anniversary of the taking of Jerusalem by the First Crusade on 15 July 1099, the answers to the question "What is Crusader art?" will be much more clearly in view!

THE END OF CRUSADER ART AND REFLECTIONS ON THE IMPACT OF THE ART OF THE CRUSADERS ON WESTERN EUROPE

To conclude this discussion we can briefly comment on the phenomenon of Crusader art in terms of how it ended. It is a remarkable fact that when Saladin inflicted a catastrophic defeat on the Crusaders at Hattin in 1187 and then invaded the Latin Kingdom capturing Jerusalem, he nearly succeeded in ending the Crusader States during his mostly successful campaign, 1187–9. For a brief time there was in effect an hiatus in the production of Crusader art until the Third Crusade reconquered Acre, at which time Crusader art resumed there, so to speak, in the new capital of the kingdom. When Acre fell in 1291, however, the Crusaders were effectively eliminated from mainland Syria-Palestine, with only a few small holdings left, such as the Templars on the small island of Ruad off the coast of Tortosa until 1303.

In these new circumstances Crusader art only continued, at a much reduced level, not on Ruad, but on the island of Cyprus. It was recognizably Crusader, but a different version. Perhaps the surprising thing is that it did not reidentify itself as the new Crusader art, as we saw it happen in Acre in 1191. Crusader artists and patrons did not choose to continue the developments seen in the previous decades, under the influence of the refugee Crusaders from Acre in 1291, especially the Hospitallers and the Templars, and the fleeing clergy. Rather it developed as the Crusader art of Lusignan Cyprus, which is distinctive and separate despite a brief period of what we might call overlap and interactive dynamics in the late 1280s and early 1290s.

When Crusader art on the Syro-Palestinian mainland ceased to be produced, we notice certain important consequences. One effect in certain media is like that of turning out the lights. In panel painting, for example, we do not, perhaps cannot, know whether any Crusader work was continued at St. Catherine's Monastery on Mount Sinai after 1291, but it appears that such work stopped. This suggests clearly that patronage for such works stopped, and the Crusader artists who had been there were no longer available. What happened in the West of course was that the substantial impact that Byzantine-influenced painting and Byzantine- or Crusader-trained painters had been having, in the second half of the thirteenth century especially, declined precipitously in strength and importance. Such stimulus did not stop after the fall of the Latin Empire in 1261, but it ceased after 1291. In Tuscany, for example, the strongly Byzantine-influenced styles of Cimabue and Duccio gave way to the art of Giotto in the early fourteenth century. To some large extent this must mean that the stimulus provided by Crusader panel painting in terms of actual works, painters and their techniques and styles, as well as their patrons, and the functions of the art they produced was terminated, and so Western art changed accordingly. The specific details of how, when, and where this happened remain to be worked out.

It is, however, notable and important to observe that in manuscript illumination, the French Gothic style of the Paris–Acre Master did live on in the West briefly, for about a decade after 1291.[140] We see this in the output of French artists working in the style of the Paris–Acre Master, producing a series of miniature cycles done between 1291 and the early fourteenth century. See, for example, a codex with two *romans* (Paris, BN MS fr. 19166) and a manuscript of the *Miracles de Nostre Dame* (Paris, BN MS fr. 1533). There are also manuscripts of *Tristan* (London, Brit. Lib. Royal MS 20.D.II), of the Arthurian vulgate cycle (Tours, Bibl. Mun. MS 951), and, not surprisingly, of the *History of Outremer* (Brussels, Bibl. Roy. MS 9492-3). Overall these manuscripts contain the work most closely related to the style of the Paris–Acre Master, and this last codex is important as containing the illustrations in which the stylistic tradition of the Paris–Acre Master finds its strongest reflection in the West.[141]

There are other manuscripts in which the style of the Paris–Acre Master is followed more distantly. We have a manuscript in Lyon, unfortunately now very damaged (Lyon, Palais des Arts MS 29), which has a fragmentary cycle from the *History of Outremer*, but is the work of an artist closely linked to the Brussels codex (MS 9492-3) just mentioned. There is also a *Histoire Universelle* codex now in Brussels (Brussels, Bibl. Roy. MS 18295) that is related more distantly. In Epinal we have another *History of Outremer* (Epinal, Bibl. Mun. MS 45), which is very handsomely done by two artists, obviously related to the group of manuscripts done under the influence of the Paris–Acre Master, but demonstrating a rather independent approach to the imagery of the cycle. Finally, at the end of these developments, we have two other manuscripts, one in Milan, a *Guillaume* *d'Orange* (Milan, Bibl. Trivulziana, MS 1025), and the other a Bible in Copenhagen (Copenhagen, Royal Library, Thott MS 7) in which the style related to that of the Paris–Acre Master is last seen in any recognizable form.[142]

It is perhaps not surprising that the Crusader styles found in the miniature cycles in Acre had much less of an impact in formal terms. There is, of course, the case of the *Histoire Universelle* now in Paris, BN, MS fr. 9682, dated about 1300, which Buchthal characterized as "a faithful and very unattractive second-rate copy of a manuscript from Acre, in a style clearly derived from that of the miniatures in Dijon [MS 562] and Brussels [MS. 10175]."[143] There is also the case of the single miniature in the Vegetius manuscript now in the Fitzwilliam Museum in Cambridge, a case still unresolved.[144] However, beyond this the impact of Acre school miniatures seems otherwise to have been mainly effected in iconographical terms. Indeed, we can see the spread of miniature cycles from the Acre school into not only France and England, but also Italy and the Netherlands. Some of these examples are found in the manuscripts cited earlier related to the French Gothic tradition of the Paris–Acre Master. From Italy, however, we have manuscripts in very different styles, a *History of Outremer* (Paris, BN, MS fr. 2631) possibly done in Lombardy after 1291, and two other codices, one a *History of Outremer* and the other a *Fait des Romains*, both done in Rome in 1295 and 1293, respectively, for a member of the Savelli family (Paris, BN, MS fr. 9082, and Brussels, Bibl. Roy. MS 10168-72).[145]

The Epinal codex mentioned earlier raises another issue that is also part of the impact of the Acre school miniatures on the West. In most cases these manuscripts done in the West follow Western cycles for the texts involved, but we do have some cases of manuscripts done in the West in a local Western style that follow Acre school iconographic paradigms. Such is the case for a manuscript in Baltimore (Walters Art Museum, MS 137), which follows some of the same models used by the Epinal codex, but reflects their common sources more faithfully. Such is also the case for another manuscript in Baltimore (Walters Art Museum, MS 142), which follows Acre school iconographic cycles and format for nineteen of its twenty-two historiated initials.[146]

The irony of the situation is that the latest manuscripts of the *History of Outremer* to show links with Crusader Acre simply add a new text to, as it were, finish the story. Two codices exist in which this new text is also given an illustrated panel (Rome, Bibl. Apost. Vat. MS Reg. Suec. Lat. 737) or an historiated initial (Paris, BN MS fr. 2825), both done *c.*1300 or shortly thereafter. These illustrations demonstrate that the narrative style of earlier cycles could be drawn on for use with a new text, namely, the account known as the "*De Excidio Urbis Acconis.*" Thus in both of these manuscripts the basic translated text of William of Tyre's History is combined with the continuation to 1261, which is the usual continuation found in the West. Then the intervening thirty years are ignored and the story of the fall of Acre, in the form of the "*De Excidio Urbis Acconis,*" is appended to bring the story up to 1291. Just as the first illustrations are being done for texts about the fall of Acre, all connections are being lost with the Crusader art that had been done there.[147]

Amazingly enough, however, it is worth observing that the greatest impact of Crusader art on the West in the thirteenth century so far recognized is associated with the painting medium, which has most recently been identified to have a strong Crusader development. The problem is that our understanding of what that impact was and the dynamics of how it occurred are still to be explained in detail. Whereas with icons and panel painting there seems to be clear indication that Crusader painting played an important role in the transmission of Crusader- and Byzantine-inspired ideas to the West, the specific mechanisms for understanding the process are still to be revealed. The situation with manuscripts is also quite unclear, but there seems to have been much less influence in the West than that with the icons.

In other media, even though mosaics were very important in the twelfth century in the Crusader East, in the thirteenth century the largest Crusader mosaic project appears to have been a program of secular decorations carried out for the palace at Beirut, whereas by contrast it is religious mosaics that are most important in the West, especially in Venice at San Marco and in Florence in the baptistery of the Duomo. There are so few extant examples of fresco painting and stained glass from the Crusader States yet identified in the thirteenth century that it is difficult to know what the relationship may have been in comparison with the prodigious output in Italy and France, for example, in these media at this time.

Other media, especially those in the so-called minor arts, are linked to the West in different ways. Clearly the coinage of the Crusader States has its own distinctive character, but as the thirteenth century moves along, and especially in the second half of the century, the interactive links between the Crusader East and France especially grow stronger. Just as Crusader panel painting may have played an important role in stimulating Italian Dugento artists, especially in Tuscany, it is also likely that Crusader coinage stimulated developments in France, especially in regard to the introduction of the *gros Tournois* in 1266.

The coins and seals are invaluable documents for certain types of development in the imagery of the Crusader States. The media of metalwork and glass, silk and luxury textiles are, however, more of a mystery to some extent. Although we have important examples in the first two media, as we have discussed earlier, the majority of works appear to be the products of Mamluk rather than Crusader workshops, but they are works attuned to the Levantine market in which the Crusaders participated. Does this mean that the production of luxury metalwork and glass devolved largely into the hands of Muslim artists accessible to the Crusaders? How and why are these media in particular specifically then associated with Venice from the end of the thirteenth century onward? To what extent were the Crusaders handling the commerce in silk, and to what extent were they contributing to its production, manufacture, and distribution? With regard to the minor arts referred to earlier, future research offers the potential for significant advances in our understanding as the dynamics of the Levantine market with regard to metalwork and glass, the study of silk making and the silk trade, and the further and fuller documentation of the production and distribution of pottery all become better known.

What is clear is that our picture of thirteenth-century art of the Crusaders in the Holy Land is very fragmentary, that much remains to be learned about the developments in certain media, and that our knowledge of what was produced for the Crusaders is very incomplete. The explanations for this are no doubt several, but we attribute the main reasons to be because of the serious destruction that surrounded the exit of the Crusaders from the Holy Land in 1291, the many works that must have been lost because of the upheavals that surrounded the momentous events of the turbulent years from 1268 to 1291, and even the impact that the establishment of the Latin Empire had on art production in the Crusader States farther east.

Finally we can reflect on the fact that after 1291, besides a few European attempts to reconquer the Holy Land in the ensuing decade,[148] a new attitude toward the Holy Land emerged in the West, a new mentality expressed in the "recovery" treatises that started to be written shortly after 1300.[149] Interest in the recovery of the Holy Land was still great and enthusiasm for the Crusade was still strong, as the widely circulated story of the Il Khan's, Ghazan's, recapture of Jerusalem in 1300 demonstrates.[150] However, the reality of the old Crusader Kingdom was gone. Not only had the Crusaders left the Holy Land, but also one of the main Crusader institutions was about to disappear, the Knights Templar. Furthermore, Pope Boniface VIII continued to be preoccupied with Sicily and France, and the French king, Phlippe IV le bel, was focused on royal power in the face of papal claims. To this latter end to some extent the Templars fell victim, and in 1312 the abolition of the Order of the Templars was announced by Pope Clement V. Everywhere on Cyprus and in Europe, except in the Iberian Peninsula, their possessions were given to the Hospitallers. In Spain, the possessions of the Templars were given partly to the Hospitallers, and partly to a new order approved by the pope, the Order of Montesa, in Valencia in the kingdom of Aragon. In Portugal, a second new order was established, the Order of Christo, which received the Templar possessions there.[151]

The trial of the Grand Master, Jacques de Molay, resulted in his imprisonment as a relapsed heretic on 18 March 1314. However, in the face of his vigorous protests and the retraction of his confession, he was condemned to burn at the stake as an obdurate heretic.[152] It was a dramatic end to a sordid chain of events, which had effectively started on Friday, 13 October 1307. Thus by the spring of 1314, the Knights Templar as an institution, which had been one of the pillars of the Crusader States in the Near East, had effectively disappeared from the scene; only individual and mostly isolated Templars survived.[153] Although the pope arranged for their possessions to go mostly to the Hospitallers, in order to maintain these resources for the recovery of Jerusalem, as he said,[154] the era of the great Crusades was past. Few future Crusader expeditions would touch the coast of Syria-Palestine, and these endeavors mostly took the form of raids, such as those by Peter of Cyprus in 1367 and 1369 or Jean Boucicaut in 1403. No more Crusader art would be produced on the mainland of what had been the Crusader States. Also the Crusader art on Cyprus, sponsored by the Lusignans, and on Rhodes, sponsored by the Hospitallers, now belonged to a new and different late medieval phase of European and Near Eastern history. Following the fall of Acre in 1291, the era of the art of the Crusaders in the Holy Land was abruptly and definitively over.

APPENDIX

ANNOTATED HANDLIST OF WESTERN-INFLUENCED ICONS FROM THE MONASTERY OF ST. CATHERINE AT MOUNT SINAI AND ELSEWHERE

Presented in the following the reader will find a brief handlist of the Western-influenced icons from the collection found in St. Catherine's Monastery. The identification of these Sinai icons as Western influenced, or "Crusader," was initially made by Kurt Weitzmann and has been discussed and, in some cases, expanded by others as research has continued. The information contained in each entry includes the following:

- List number, which refers to my listing in the Appendix;
- Kurt Weitzmann's inventory numbers; his personal system of numbering the icons is retained here for art historical interest;
- The inventory number of the Michigan–Princeton–Alexandria Expedition to Mount Sinai and the Sinai Archive located in the Department of Art History at the University of Michigan; and
- Figure number, which refers to the reproduction in this book.

For example, in the following reference, "1. Gp 2-4/36 (Fig. 126)":

"1." is our handlist number;
"Gp 2-4" is the Weitzmann inventory number for group 2, number 4, in his system;
"36" is the unique sequential inventory number at the Sinai Archive of the University of Michigan; and
"Fig. 126" is the number of the reproduction in this book.

In citing these icons in my text, I have referred to the Michigan Sinai Archive inventory number because of the practical value of having a listing with numbers that are both sequential and distinctive for ease of reference and identification. Please note that the Sinai Archive number is neither a catalogue number for the photos of icons in the Sinai Archive nor a catalogue number for the icons in the Monastery at Mount Sinai; they are inventory numbers unique to the Sinai Archive. They came into existence according to the needs of the leaders of the Michigan–Princeton–Alexandria Expedition as their campaigns of photography progressed through the years. I use them to help identify the icons clearly for purposes of discussion.

This information is followed in each catalogue entry by four other components as available:

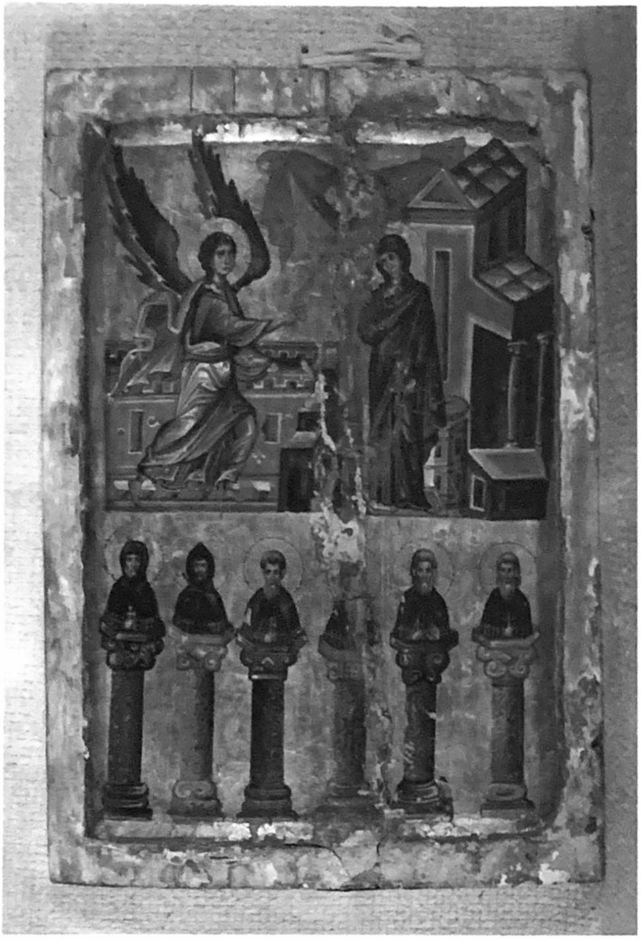
- Nature of the panel and measurements;
- Identification of the imagery of the icon, briefly stated;
- Condition notes; and
- Basic working bibliography.

This bibliography is meant to include important bibliographical references to the individual icons, but it should be understood that with the constant and widespread appearance of new publications on these icons, the bibliography cannot possibly hope to be complete. Readers should regard this as a working bibliography in progress, a point of departure.

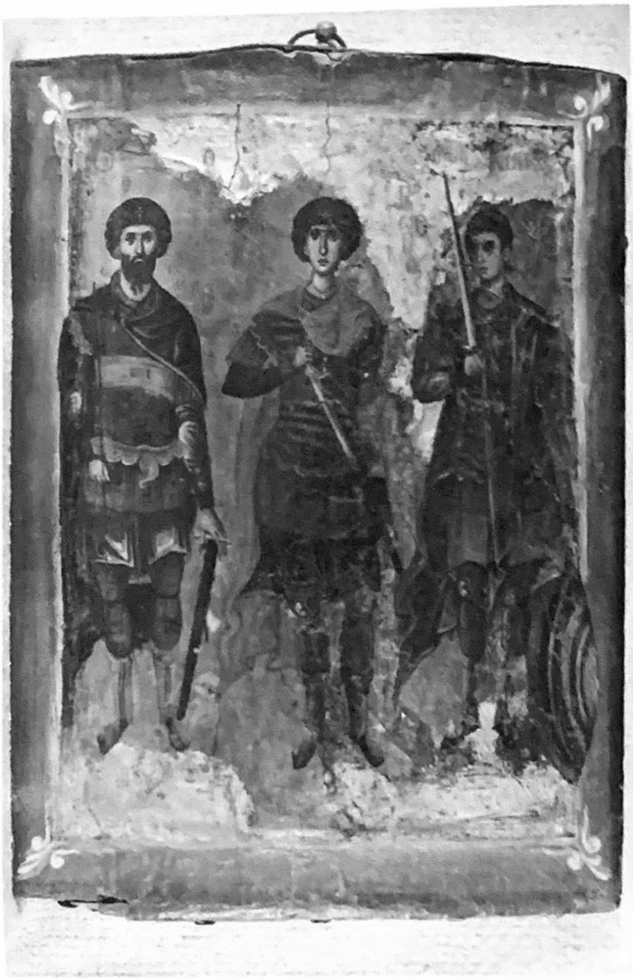
Please note that the abbreviations used throughout this Appendix are presented earlier in the List of Abbreviations at the start of this volume.

"Western-Influenced" or "Crusader" Icons in the Collection of the Monastery of St. Catherine on Mount Sinai: A Handlist

1. Gp 2-4/36 (Fig. 126), panel: Intercessory Virgin, bust-length.
    Unpublished.
    Folda, *ACHL* 2, Chs. 5 and 6.
2. Gp 2-3/37 (Fig. 125), panel: Christ *Pantocrator*, bust-length.
    Unpublished.
    Folda, *ACHL* 2, Chs. 5 and 6.
3. Gp 2-21/38 (Fig. 127), panel: Intercessory St. John the Baptist, bust-length.
    Unpublished.
    Folda, *ACHL* 2, Chs. 5 and 6.
4. Gp 3-10/41 (Fig. 353), panel: Two register panels with Annunciation above, six stylite saints below.
    Unpublished.
5. Gp 3-8/44 (Fig. 180), small panel in excellent condition:
    Annunciation.
    Belting, "Introduction," *Il Medio Oriente e l'Occidente nell'Arte del XIII Secolo*, Bologna, 1982, p. 2, and Fig. 3.
    Folda, *ACHL* 2, Ch. 6.
6. Gp 4-32/53 (Fig. 354), medium-sized panel:
    Three standing soldier saints: Saints George, Theodore, and Demetrius.
    Benesevic, V. N., *Monumenta Sinaitica Archaeologica et Palaeographica*, fasc. 1 [in Russian], Leningrad, 1925, col. 45, and Pl. 24.
    Folda, *ACHL* 2, Ch. 6.
7. Gp 4-24/54 (Figs. 182, 355), small- to medium-sized panel, 32.0 cm h × 25.5 cm w × 2.0 cm (thick):
    Obverse: Virgin and Child standing, *n tns Batou*, with three holy figures: Moses, Elijah, and St. Nicholas/St. Gregory Nazianzen.
    Reverse: painted double-armed cross, and label with no. 263.
    Wood seriously warped with some splitting. Frame partly separated from the panel.



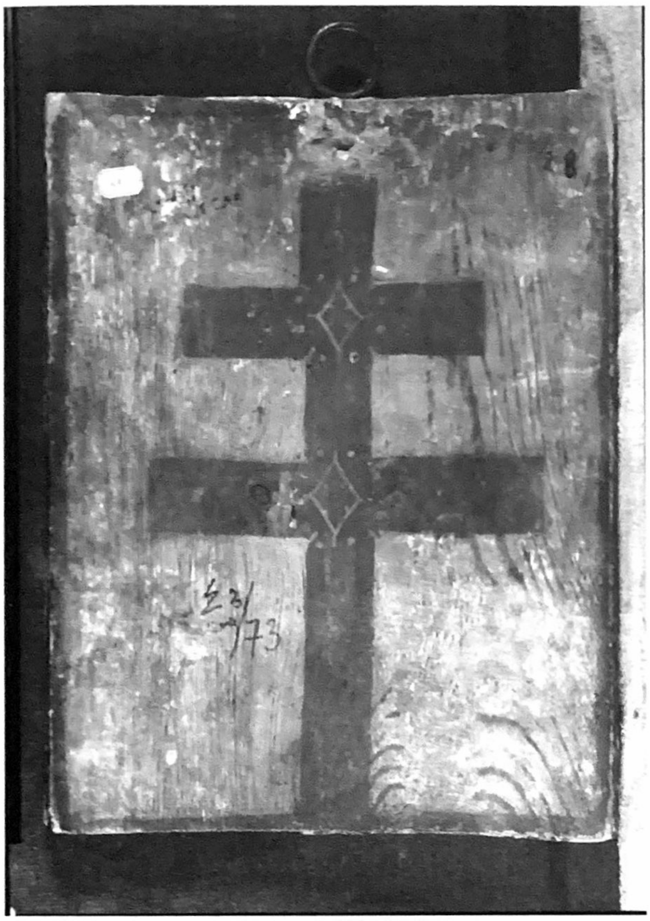
353. Sinai, App. no. 4/41. Annunciation and six Stylite Saints. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



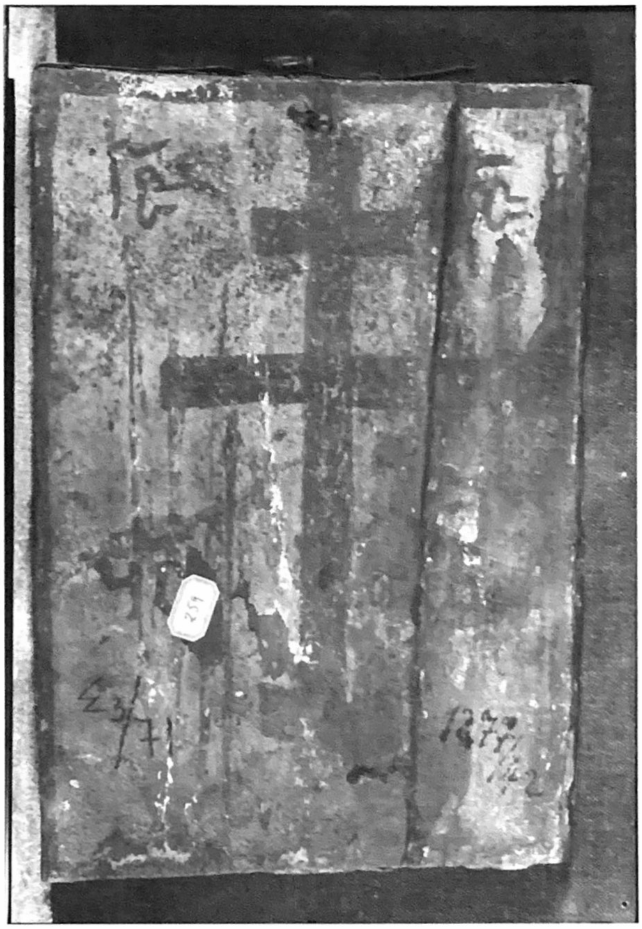
354. Sinai, App. no. 6/53. Standing Soldier Saints: Sts. George, Theodore and Demetrius. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Benesevic, V. N., *Monumenta Sinaitica Archaeologica et Palaeographica*, fasc. 1 [in Russian], Leningrad, 1925, cols. 39 ff., and Pl. 21.
Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 199–200.
Weitzmann, "An Encaustic Icon with the Prophet Elijah at Mount Sinai," [4 (1966)], pp. 720–2.
Weitzmann, *The Icon* [11 (1982)], pp. 217, 218, "French artist working at Sinai." Weitzmann changes his identification of the bishop from Gregory of Nazianzen to Nicholas in this discussion without explanation.
Icons, the Fascination, p. 72, "French artist working on Mount Sinai."
Folda, *ACHL* 2, Ch. 6.

8. Gp 4-23/55 (Figs. 181, 356), small-sized panel, 24.5 cm h × 18.0 cm w × 1.7 cm (thick):
    Virgin and Child *Hodegetria Dexiokratousa*, bust-length.
    Reverse: double-armed cross, and label with no. 254.
    Weitzmann, "Thirteenth Century Crusader Icons" [1 (1963)], p. 200, Fig. 22.
    Weitzmann, *The Icon* [11 (982)], p. 219, "French artist working at Sinai."
    Folda, *ACHL* 2, Ch. 6.
9. Gp. 1-37/56 (Fig. 267), medium-sized panel, 33.7 × 26.6 cm:
    Crucifixion with Virgin swooning, John and four others.
    Sotiriou, *Icones*, 1, Fig. 194, 2, p. 177.
    Mouriki, *Sinai Treasures*, pp. 118, 193, no. 67; this work could have been produced "in an area of the Eastern Mediterranean where Venetian control was strong, such as Cyprus or Crete. I consider the work 'Crusader' since it may have been painted by a Western artist in the Latin-occupied East. However, there are no indications that the icon was commissioned by a Crusader."
    Derbes, A., "Siena and the Levant in the Later Dugento," *Gesta*, 28 (1989), pp. 192–7.
    Carr, A. Weyl, "Icon-Tact: Byzantium and the Art of Cilician Armenia," *Treasures in Heaven: Armenian Art, Religion, and Society*, Symposium Papers (1994), ed. T. Mathews, New York, 1998, pp. 96–8.
    Evans, H. C., "224. Icon with the Crucifixion," *Byzantium: Faith and Power: 1261–1557*, pp. 367–8.
10. Gp 1-20/63 (Figs. 197–8), very large panel, 94.2 cm h × 62.8 cm w × 3.8 cm (thick):
    Bilateral icon; good condition, but major split in the wood down the center.
    Reverse: Two mounted soldier saints, Sergios and Bacchus; paint surface in excellent condition.
    Obverse: Virgin and Child *Hodegetria*, bust-length; paint surface heavily flaked; some repainting done in modern times.
    Sotiriou, *Icones*, 1, Figs. 185, 186, 2, pp. 170–1.
    Galey, *Sinai*, Fig. 99.



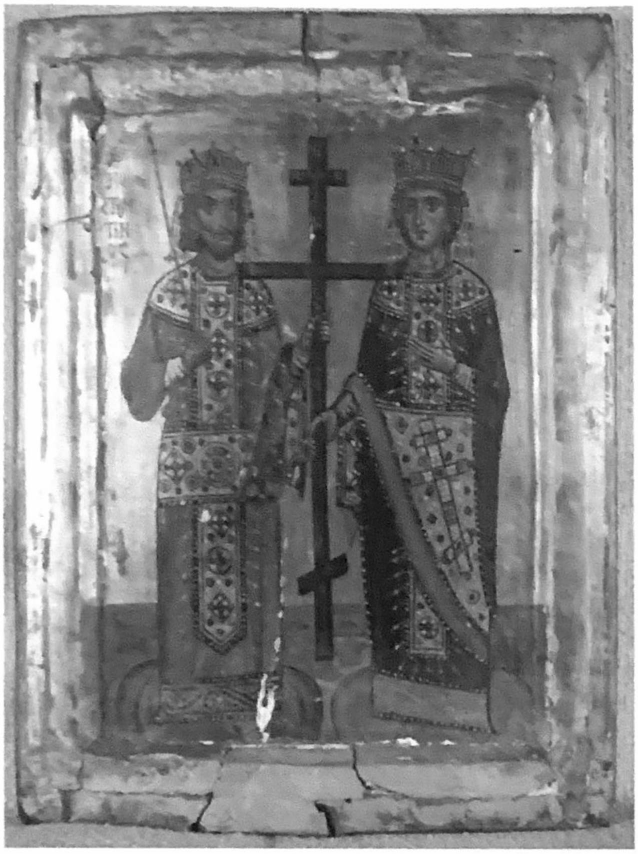
355. Sinai, App. no. 7/54. [Front: Virgin and Child *n tns Batou* with Moses, Elijah and St. Gregory Nazianzus] Reverse: Image of the True Cross. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



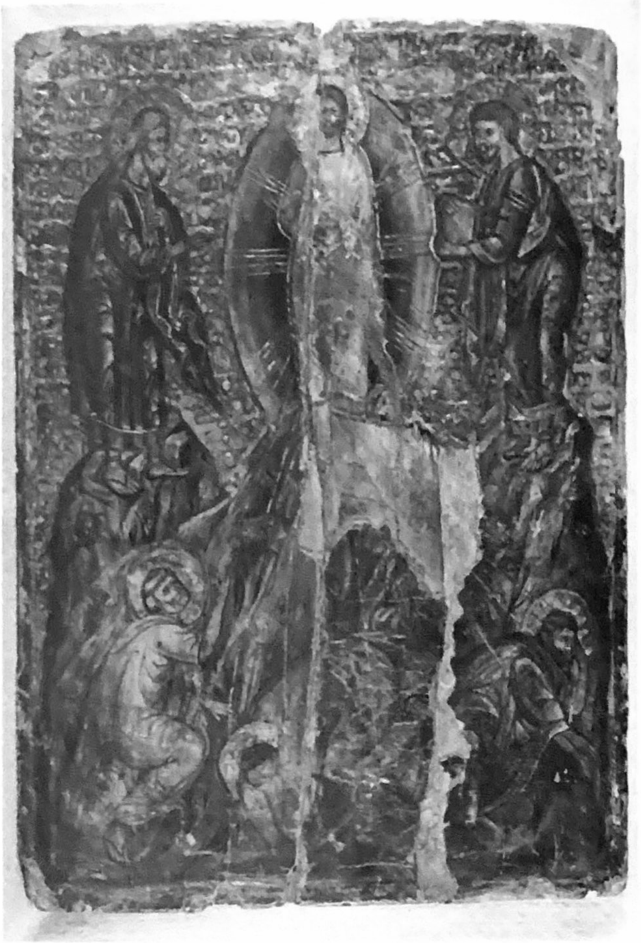
356. Sinai, App. no. 8/55. [Front: Virgin and Child *Hodegetria Dexiokratousa*] Reverse: Image of the True Cross. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Weitzmann, "Crusader Icons and Maniera Greca," [14 (1984)], pp. 148–9, Figs. 3, 4, by an "artist who may, perhaps, have come from the South of Italy, though this is still an open question, and who . . . worked at Sinai."
Mouriki, "Thirteenth-Century Icon Painting in Cyprus," pp. 67–71, 112 Figs. 63, 64.
Pace, "L'analisi 'stilistica'," pp. 515, 525 Fig. 5.
Hunt, "A Woman's Prayer," p. 97, Figs. 2, 3.
Mouriki, *Sinai Treasures*, pp. 119, 192, no. 66, "dated to the end of the 13th century and attributed to a Crusader workshop located in Cyprus . . . and more specifically, to the resident Syrian minority."
Sinai, Byzantium, Russia, pp. 252–4, #S 63, "artist is likely to have been an Armenian icon-painter from Cilicia commissioned by a knight of the Kingdom of Antioch around 1260–1270."
Paliouras and Damianos, *The Monastery*, p. 26 and Figs. 125, 126.
Gerstel, S., "Art and Identity in the Medieval Morea," *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. Laiou and R. Mottahedeh, Washington, DC, 2001, p. 268, and Fig. 5.
Folda, "230. Two-Sided Icon with the Virgin . . . and Saints . . . ," *Byzantium: Faith and Power: 1261–1557*, pp. 374–5.
Folda, *ACHL* 2, Ch. 6.

11. Gp 1-15/64 (Fig. 193), medium-sized panel, 33.0 × 25.0 cm:
    St. Simeon stylites and St. Barbara.
    Sotiriou, *Icones*, 1, Fig. 184, 2, pp. 169–70.
    Weitzmann, "Icon Painting," [3 (1966)], pp. 70–1, Fig. 46.
    Hunt, "A Woman's Prayer," p. 98, Fig. 7.
    Folda, *ACHL* 2, Ch. 6.
12. Gp 2-11/76 (Fig. 213), small panel, 20.0 × 16.0 cm:
    Aaron and Moses standing.
    Sotiriou, *Icones*, 1, Fig. 179, 2, pp. 166–7.
    Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 198.
    Folda, *ACHL* 2, Ch. 7.
13. Gp 2-9/78 (Fig. 211), small triptych, central panel with wings open, 42.0 × 29.0 cm:
    Crucifixion triptych with round hole in the central panel; Moses and Aaron on the wings.
    Sotiriou, *Icones*, 1, Fig. 193, 2, p. 175.
    Weitzmann, "Crusader Icons and the Maniera Greca," p. 153, Fig. 11, "French painter from the third quarter of the 13th century."
    Folda, *ACHL* 2, Ch. 6.
14. Gp 1-19/80 (Fig. 199), small panel, 28.7 cm h (28.9 right side, 28.1 left side) × 23.2 cm w × 2.5 cm (thick):



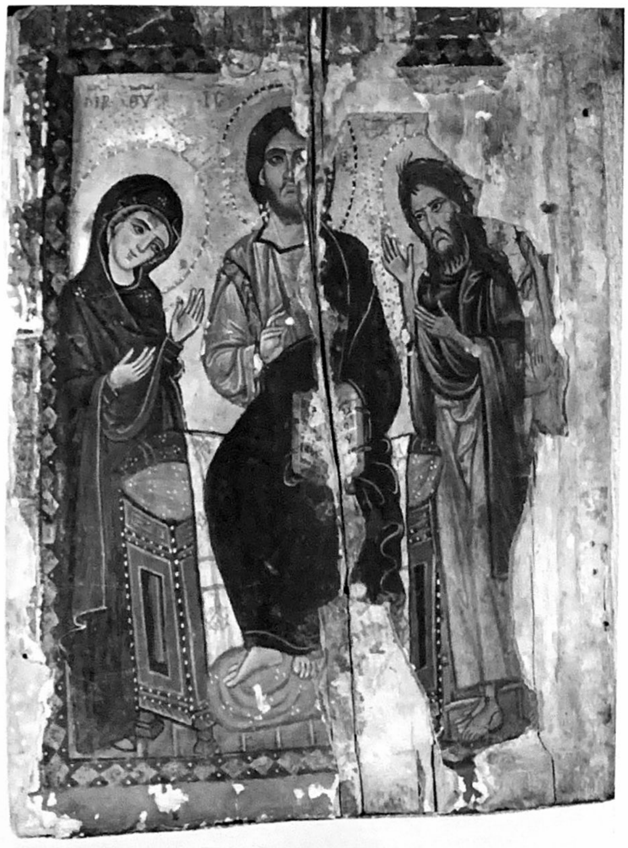
357. Sinai, App. no. 17/125. Sts. Constantine and Helena with the True Cross. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



358. Sinai, App. no. 19/154. Transfiguration. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Good condition, but serious split in the wood on the right side.
Mounted soldier St. Sergios, with kneeling female donor/supplicant.
Sotiriou, *Icones*, 1, Fig. 187, 2, p. 171.
Weitzmann, "Icon Painting," [3 (1966)], pp. 71, 72, Fig. 49.
Weitzmann, *The Icon*, [11 (1982)], p. 232, "Italian artist, perhaps Apulian, working at Sinai."
Hunt, "A Woman's Prayer," pp. 96–124, Fig. 1.
Icons, The Fascination, p. 73, "Italian artist working on Mount Sinai."
Gerstel, S., "Art and Identity in the Medieval Morea," *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. Laiou and R. Mottahedeh, Washington, DC, 2001, p. 268, and Fig. 4.
Folda, "229. Icon with Saint Sergios on Horseback...," *Byzantium: Faith and Power: 1261–1557*, p. 374.
Folda, *ACHL* 2, Ch. 6.

15. Gp 2-14/109 (Fig. 128), panel:
    Intercessory Virgin bust-length.
    Unpublished.
    Folda, *ACHL* 2, Chs. 5 and 6.
16. Gp 2-13/110 (Fig. 129), panel:
    Christ *Pantokrator* from a *Deësis*.
    Sotiriou, *Icones*, 1, p. 179.
    Bakalova, E., "217. Icon with Christ *Pantokrator*," *Byzantium: Faith and Power: 1261–1557*, p. 359.
    Folda, *ACHL* 2, Chs. 5 and 6.
17. Gp 4-34/125 (Fig. 357), panel:
    Sts. Constantine and Helena.
    Unpublished.
18. Gp 2-2/137 (Figs. 177–9), large panel, 66.0 cm h × 45.5 cm w × 3.6 cm (thick):
    Deësis with 14 standing Evangelists and Apostles.
    Good condition, but major split down the center of the panel with some serious flaking of the paint; paint surface heavily varnished and very dirty.
    Weitzmann, "Four Icons on Mount Sinai," [5 (1972)], pp. 279–88, Figs. 1–7.
    Folda, *ACHL* 2, Ch. 6.
19. Gp 4-27/154 (Fig. 358), panel:
    Transfiguration.
    Unpublished.
20. Gp 1-31/172 (Fig. 359), panel:
    Dëesis.
    Unpublished.
21. Gp 1-4/180 (Figs. 360, 361), central panel of a tiny triptych:
    Virgin and Child *Hodegetria Dexiokratousa*, bust-length.
    Reverse: decorative painted scroll design reflecting textile pattern.
    Unpublished.
22. Gp 1-39/200 (Fig. 289), medium-sized panel, 37.3 cm h × 27.6 cm w × 1.7 cm (thick):
    Virgin and Child *Hodegetria*, bust-length with chrysography.



359. Sinai, App. no. 18/137. *Deësis.* (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

Good condition, but major loss in upper left corner has been replaced with modern wood insert, unpainted; panel is heavily varnished and very dirty.

Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], p. 81.

Aspra-Vardavakis, M., "Observations on a Thirteenth-Century Sinaitic Diptych," pp. 97 and 103, Fig. 7.

Folda, *ACHL* 2, Ch. 7.

23. Gp 2-8/205 (Fig. 191), medium-sized panel, 31.0 × 24.8 cm:

Virgin and Child *n tns Batou* with four standing saints and Moses and Elijah.

Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], 192, Fig. 17.

Weitzmann, "The Icons of the Period of the Crusades," [11 (1982)], p. 221, "French artist working at Sinai."

Folda, *ACHL* 2, Ch. 6.

24. Gp 4-2/212 (Fig. 262), medium-sized panel, 39.5 × 32.4 cm:

The Last Judgment in five tiers.

Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], p. 58.

Folda, *ACHL* 2, Ch. 7.

25. Gp 2-7/220 (Fig. 208), Virgin and Child *Hodegetria* (bust-length), small panel.

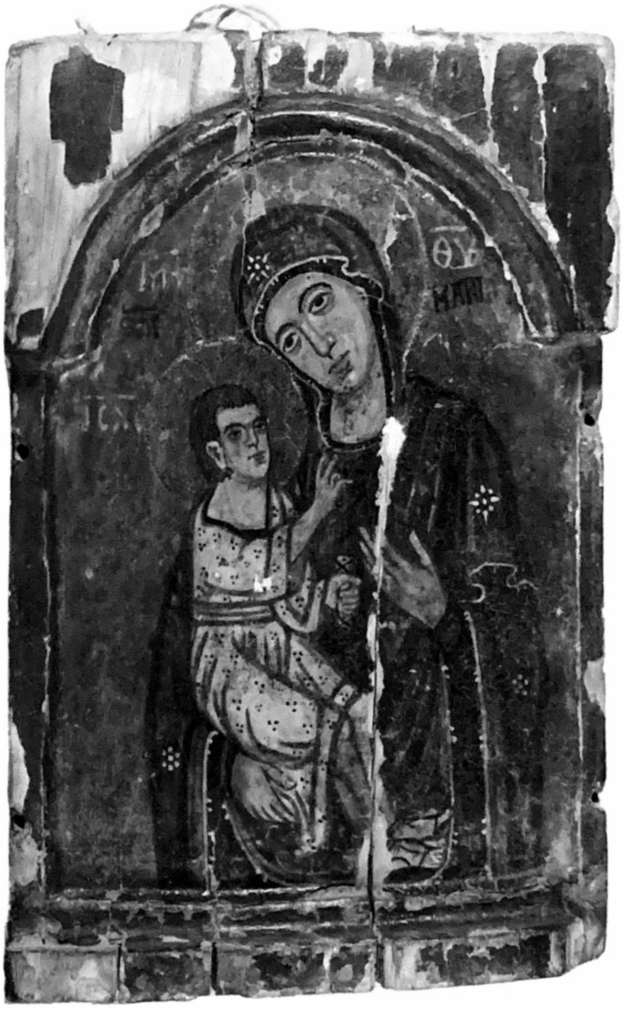
Unpublished.

Folda, *ACHL* 2, Ch. 6.

26. Gp 1-26/224 (Fig. 362), panel:

Virgin and Child *Eleousa* (bust-length).

Byzantium: Faith and Power: 1261–1557, p. 351, no. 210.



360. Sinai, App. no. 21/180: Front, Virgin and Child *Hodegetria Dexiokratousa.* (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

27. Gp 4-9/242 (Fig. 363), panel:

St. Nicholas, with Christ and Virgin (all bust-length), panel.

Unpublished.

28. Gp 3-9/248 (Fig. 290), triptych:

Deësis central panel.

Two standing saints with Peter (bust-length), left wing, and two standing soldier saints with Paul (bust-length), right wing.

Unpublished.

Folda, *ACHL* 2, Ch. 7.

29. Gp 4-8/260 (Fig. 364), panel:

St. Nicholas standing with Christ and Virgin (bust-length), panel.

Unpublished.

30. Gp 3-2/261 (Fig. 365), panel:

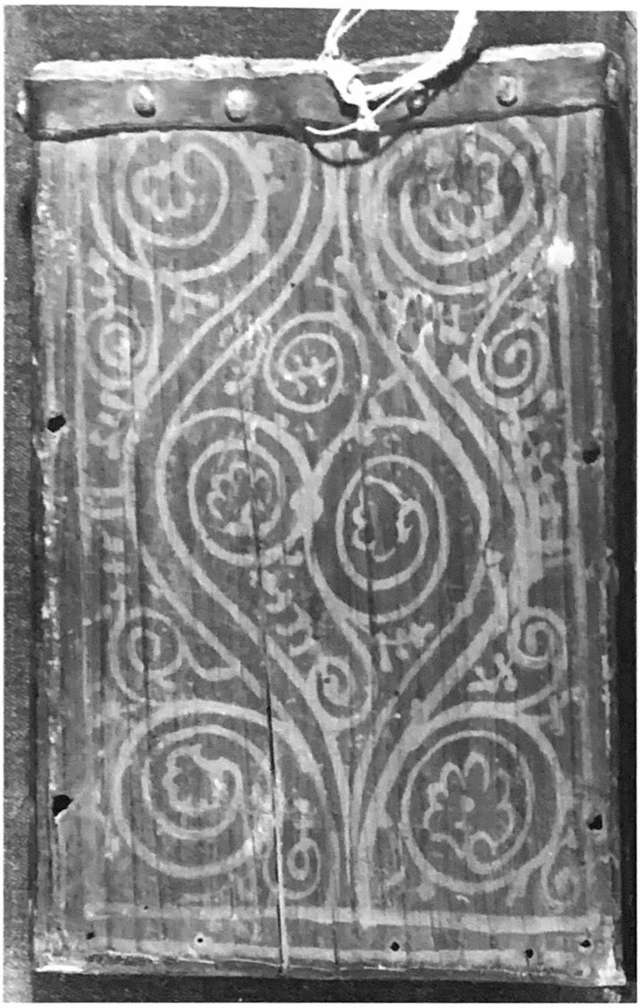
Crucifixion surrounded by bust-length saints on frame including Deësis and 15 saints, and a diminutive nimbed monk(?) donor(?) at the lower central left position (cf App. no. 104, Gp 3-1/1732, for a closely related example, perhaps a model for, or copy of, no. 261 (?)).

Folda, *ACHL* 2, Ch. 6.

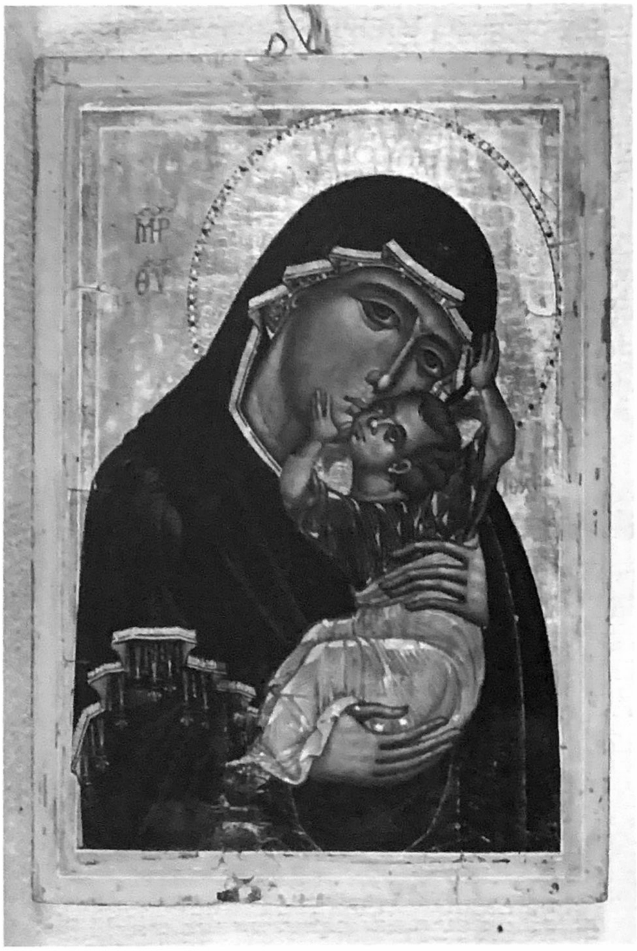
31. Gp 1-10/273 (Fig. 366), panel:

Archangel Michael standing with staff and orb.

Galey, Fig. 66.



361. Sinai, App. no. 21/180: Reverse: Vine Scroll Textile pattern. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



362. Sinai, App. no. 26/224. Virgin and Child *Eleousa*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

32. Gp 4-17/285 (Fig. 75), medium-sized panel, 38.5 × 28.0 cm:
    Crucifixion, with Virgin swooning with two women, John and a soldier, two mourning angels.
    Mouriki, *Sinai Treasures*, p. 184, no. 58.
    Hunt, L.-A., "Manuscript Production by Christians in 13th–14th Century Greater Syria and Mesopotamia and Related Areas," *ARAM*, 9 & 10 (1997–8), p. 303, Fig. 15.
    Folda, *ACHL* 2, Ch. 4 and Ch. 5.
33. Gp 3-7/293 (Fig. 187), small double-decker panel, 27.0 cm h × 19.1 cm w × 2.5 cm (thick):
    Deësis above in upper register, with three standing saints below.
    Small split at the top, otherwise in excellent condition; extremely heavily varnished.
    Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 194, Fig. 18.
    Folda, *ACHL* 2, Ch. 6.
34. Gp 4-4/308 (Fig. 51), small panel, 21.1 cm h × 13.9 cm w × 1.3 cm (thick):
    Maestas Domini.
    Serious flaking with most of the front surface of the border lost; cable border along the concave inner border from underpainting of phase one of the icon. Two levels of painting on the main central surface evident with bits of the original painted seated figure and cushion visible overpainted with current seated figure.

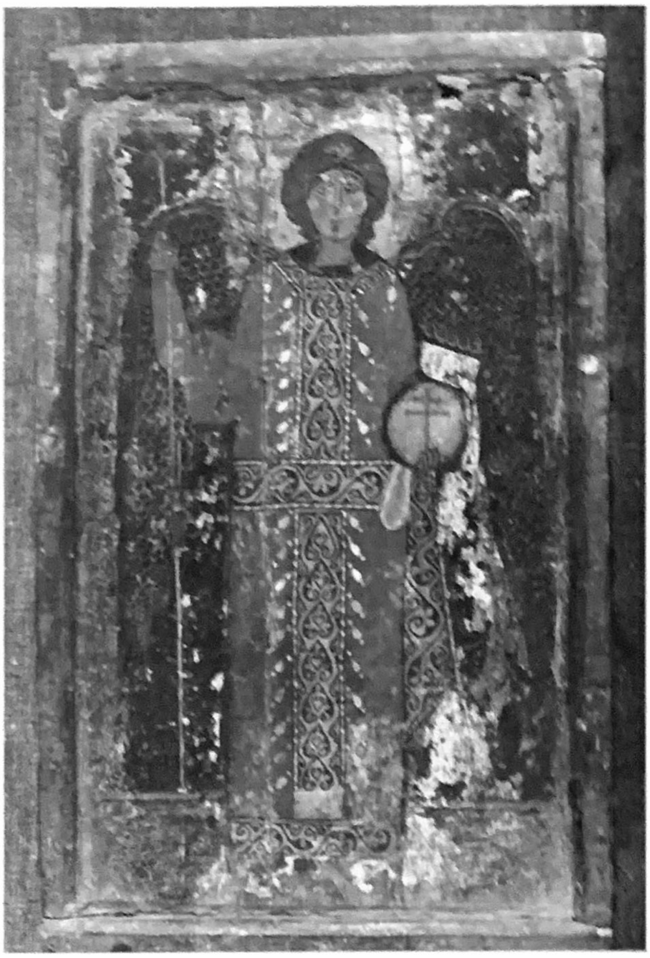
Icons, the Fascination, p. 72, "Venetian artist."
Folda, *ACHL* 2, Ch. 6.

44. Gp 1-9/460 (Fig. 371), panel:
   St. Catherine, crowned, standing.
   Unpublished.
45. Gp 2-26/470 (Fig. 131), panel (damaged):
   St. John the Baptist interceding (bust-length), right panel of a small Deësis (?).
   Folda, *ACHL* 2, Chs. 5 and 6.
46. Gp 3-6/477 (Fig. 372), panel (damaged):
   Forty Martyrs.
   Unpublished.
47. Gp 4-5/496 [or 647 (?)] (Fig. 265), panel (badly flaked):
   Dormition.
   Unpublished.
   Folda, *ACHL* 2, Ch. 7.
48. Gp 1-5/544 (Fig. 200), panel (damaged):
   Virgin and Child *n tns Batou* with Archangel Michael and St. John the Baptist, all standing.
   Folda, *ACHL* 2, Ch. 6.
49. Gp 1-6/557 (Fig. 373), panel (badly damaged with much flaking):
   Nativity scene.
   Unpublished.
50. Gp 4-31/571 (Fig. 374), panel (badly flaked):
   Crucifixion with Virgin and figure, John and soldier, background wall.
   Unpublished.



366. Sinai, App. no. 31/273. Archangel Michael standing. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

51. Gp 2-27/573 (Fig. 210), medium-sized panel, 43.0 cm h × 31.0 cm w × 1.7 cm (thick):
   Enthroned Virgin and Child *n tns Batou* with kneeling donor in turban, two nimbed Old Testament figures, Solomon left, and Abraham right, in the spandrels.
   Serious split down the center of the panel with flaking of the paint surface; wings lost. Central panel of a triptych with broad pointed arch over central figures and Virgin on ivory (?) throne.
   Sotiriou, *Icones*, 1, Fig. 171, 2, pp. 157–8.
   Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 198–9. Weitzmann said he located the missing wings, n. 106, but he did not publish them.
   Folda, *ACHL* 2, Ch. 6.
52. Gp 2-5/574 (Fig. 186), panel (damaged):
   Double-decker icon with Virgin and Child enthroned and Burial of Moses, above, and Banquet of Herod and St. John the Baptist below.
   Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 190–3, 198, Fig. 15.
   Folda, *ACHL* 2, Ch. 6.
53. Gp 1-33/581 (Fig. 292), panel (badly damaged):
   St. Catherine, crowned, standing.
   Unpublished.
   Folda, *ACHL* 2, Ch. 7.

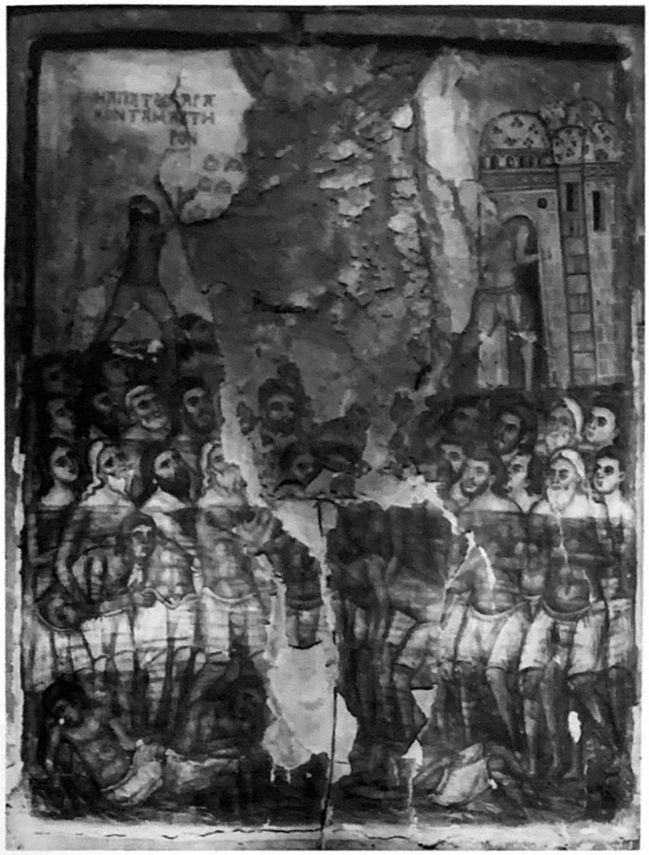
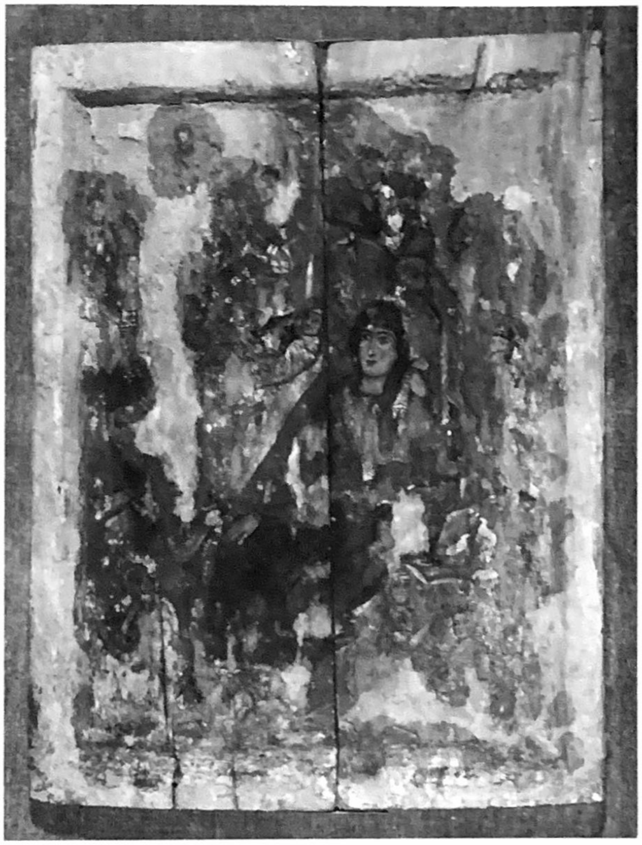
54. Gp 2-6/588 (Fig. 375), panel (badly flaked):
    Virgin and Child *Hodegetria Dexiokratousa* with Latin inscriptions.
    Unpublished.
55. Gp 4-15/589 (Fig. 376), panel (raised gesso, badly damaged):
    Three standing male saints.
    Unpublished.
56. Gp 4-26/671 (Fig. 297), Virgin and Child *Hodegetria* (bust-length), panel (repainted (?) and damaged).
    Unpublished.
    Folda, *ACHL* 2, Ch. 7.
57. Gp 4-33/679 (Fig. 76), medium-sized panel, 38.6 × 26.9 cm:
    Virgin and Child *Hodegetria Dexiokratousa* (bust-length).
    Mouriki, Sinai Treasures, p. 185, no. 59.
    Hunt, L.-A., "Manuscript Production by Christians in 13th–14th Century Greater Syria and Mesopotamia and Related Areas," *ARAM*, 9 & 10 (1997–8), p. 306, Fig. 25.
    Folda, *ACHL* 2, Ch. 4 and Ch. 5.
58. Gp 4-16/681 (Fig. 377), panel (repainted(?), with raised gesso):
    Virgin and Child *Hodegetria* (bust-length).
    Unpublished.
59. Gp 1-28/710 (Fig. 293), small panel, 25.0 cm h × 17.3 cm w × 1.8 cm (thick):
    Virgin (with special veil) and Child *Galaktotrophousa* (bust-length).
    Good condition, but panel split down the center with flaking along the split. Reglued together using Greek parchment manuscript pieces, with metal strip nailed to the top surface.
    Unpublished, but see forthcoming study by E. Bolman.
    Folda, *ACHL* 2, Ch. 7.
60. Gp 4-28/715 (Fig. 378), panel damaged, repainted and with raised gesso:
    Virgin and Child *Hodegetria* (bust-length).
    Unpublished.
61. Gp 1-3/729 (Fig. 298), panel (damaged and repainted):
    Crucifixion with Virgin and female companion, St. John and soldier, two mourning angels.
    Galey, *Sinai*, Fig. 90.
    Folda, *ACHL* 2, Ch. 7.



372. Sinai, App. no. 46/477. The Forty Martyrs of Sebaste. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



373. Sinai, App. no. 49/557. Nativity. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

62. Gp 4-3/730 (Fig. 379), panel:
    Three standing bearded male saints.
    Unpublished.
63. Gp 2-29/741 (Fig. 380), panel fragment, right side missing:
    Two standing soldier saints.
    Unpublished.
64. Gp 1-7/742 (Fig. 302), panel (damaged).
    Transfiguration.
    Unpublished.
    Folda, *ACHL* 2, Ch. 7.
65. Gp 2-28/743 (Fig. 190), Small central panel fragment, 34.0 × 10.5 cm:
    Christ enthroned.
    Sotiriou, *Icones*, 1, Fig. 176, 2, pp. 163–4.

    Folda, *ACHL* 2, Ch. 6.
66. Gp 4-14/753 (Figs. 155–162), Central panel and box-like frame: 56.8 cm h × 47.7 cm w × 5.1 cm (thick). Central panel: 56.8 cm h × 47.0 cm w × 1.3 (thick), to which strips are added to make the central box. Strips of wood on side: 56.8 cm h × 3.7 cm w × 2.1 cm (thick); on top: 43.0 cm w × 3.9 cm deep × 2.5 cm (thick). Left wing: 53.7 cm h × 21.7 cm w × 1.1 cm (thick). Right wing: 53.8 cm h × 21.0 cm w × 1.1 cm (thick). N.B.: the hinges on each wing are set at 7.0, 27.0, and 46.5 cm from the top of the wings.

Triptych with Virgin and Child enthroned with full-length angels, wings with on the inside four scenes of the life of Christ and the Virgin, and on the outside two standing saints, St. Nicholas and St. John the Baptist.

Good condition, some small losses, some termite damage visible on the upper right interior, varnished.

The Acre Triptych: central panel with Virgin and Child Enthroned flanked by standing angels (dimensions above); inside wings, life of Christ and the Virgin; right: (above) Finding of Christ in the Temple, 24.2 cm h × 20.4 w, (below) Threnos, 28.7 cm h × 20.4 w; left: (above) Coronation of the Virgin, 20.4 cm h × 21.5 w, (below) Dormition, 28.5 cm h × 21.5 w; outside wings, St. Nicolas (left), St. John the Baptist (right).

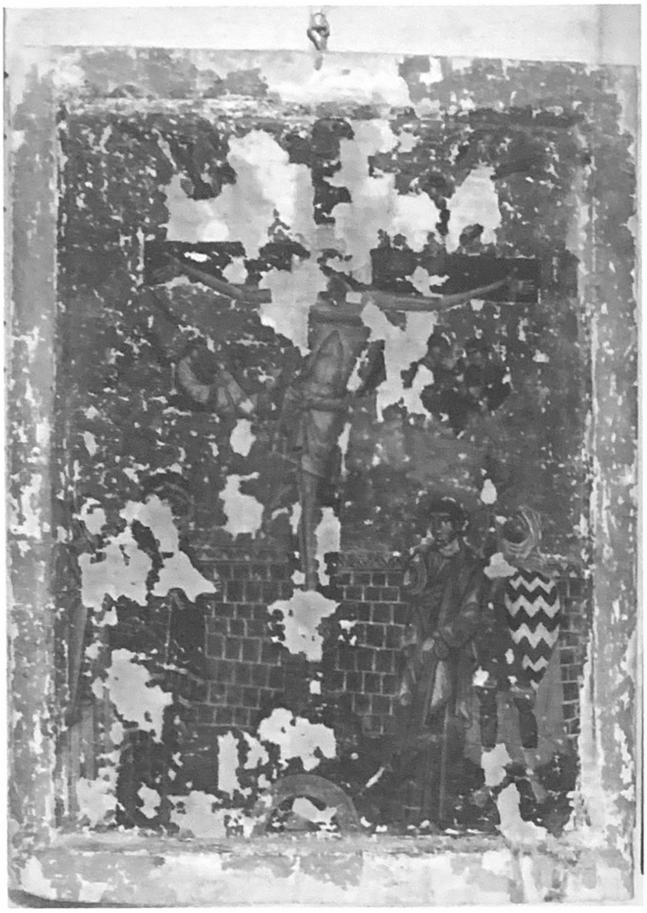
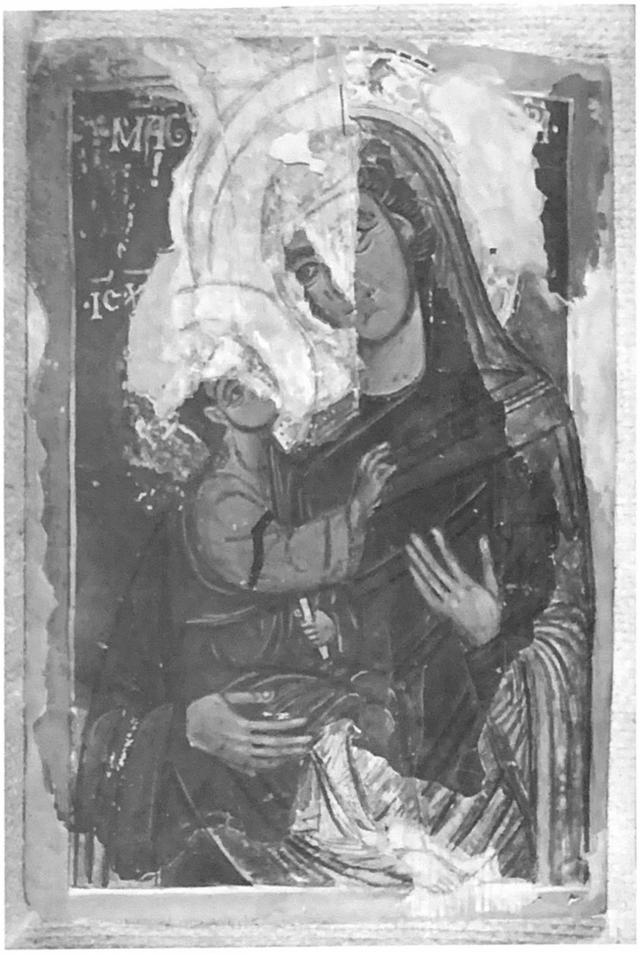
Folda, *ACHL* 2, Ch. 6.



374. Sinai, App. no. 50/571. Crucifixion with Virgin, St. John, and two witnesses. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



375. Sinai, App. no. 54/588. Virgin and Child *Hodegetria Dexiokratousa*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

67. Gp 4-11/786 (Fig. 381), panel:
    Deposition.
    Unpublished.
68. Gp 1-23/792 (Fig. 382), Outer wings of triptych:
    Sts. Peter and Paul.
    Unpublished.
69. Gp 1-32/809 (Fig. 383), Central panel fragment (damaged):
    Crucified Christ.
    Unpublished.
70. Gp 4-10/822 (Fig. 209), triptych with central panel:
    Small triptych: central panel, 20.8 cm h × 13.6 cm w × 1.9 cm (thick) (N.B.: Where the two wings attach the thickness is only 1.1 cm.)
    Wings: each wing 17.3 cm h maximum (11.9 cm h at the point where the wing joins the central panel) × 10.4 cm w.
    Virgin and Child *Galaktotrophousa* enthroned, flanked by two diminutive female saints and two kneeling donors below; two saints in the spandrels; inner wings have, at right, scenes of the life of Christ: Crucifixion and Maries at the Tomb at right; left side badly damaged; likely scenes are Nativity (lower) and Annunciation to the Shepherds (upper). On reverse, metalwork-like cross painted in white.
    Very damaged condition. Central panel flaked down the left central portion. Left inside wing almost entirely flaked. Triptych now varnished.
    Unpublished.
    Folda, *ACHL* 2, Ch. 6.
71. Gp 4-29/[844 or] 884 (Fig. 384), panel (damaged, with raised gesso):
    St. John the Baptist standing.
    Unpublished.
72. Gp 4-19/886 (Fig. 385), small triptych, central panel, 23.5 × 14.0 cm, large wing, 20.5 × 14.0 cm. (N.B.: the large outer wing originally covered the small inner wing, which is now missing.):
    Triptych with 12 standing male saints on the inner side of the larger outer wing, scenes of Moses and Elijah in the arch above, and two saints in the spandrel above; central scene on missing central panel, unknown.
    Weitzmann, "Four Icons on Mount Sinai," pp. 287–8, Fig. 9.
    Folda, *ACHL* 2, Ch. 6.
73. Gp 4-21/909 (Fig. 386), double-decker panel with raised gesso:
    Flight into Egypt above; below, Herod and the Magi, Magi and the Virgin and Child.
    Unpublished.

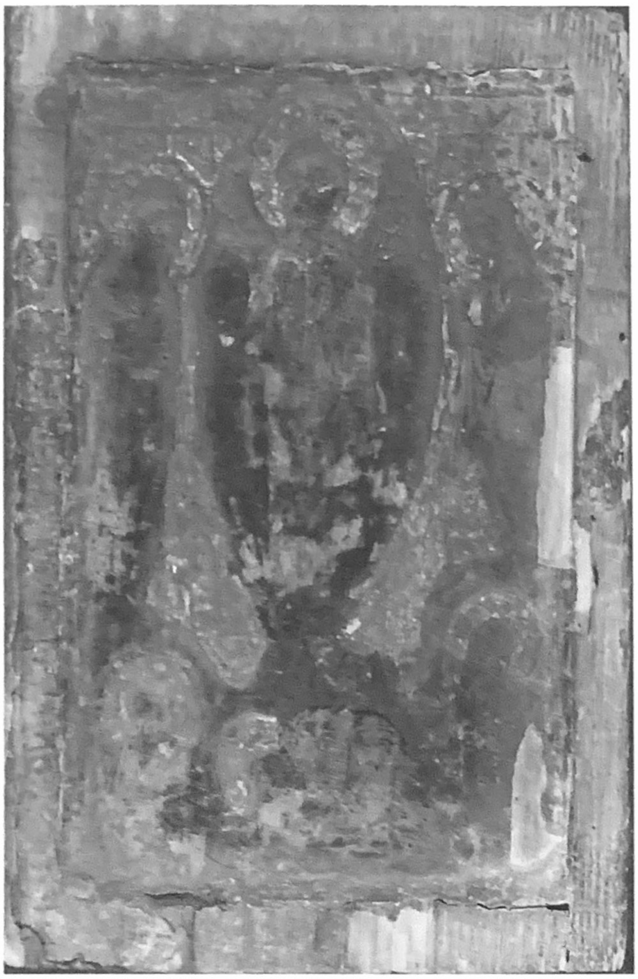
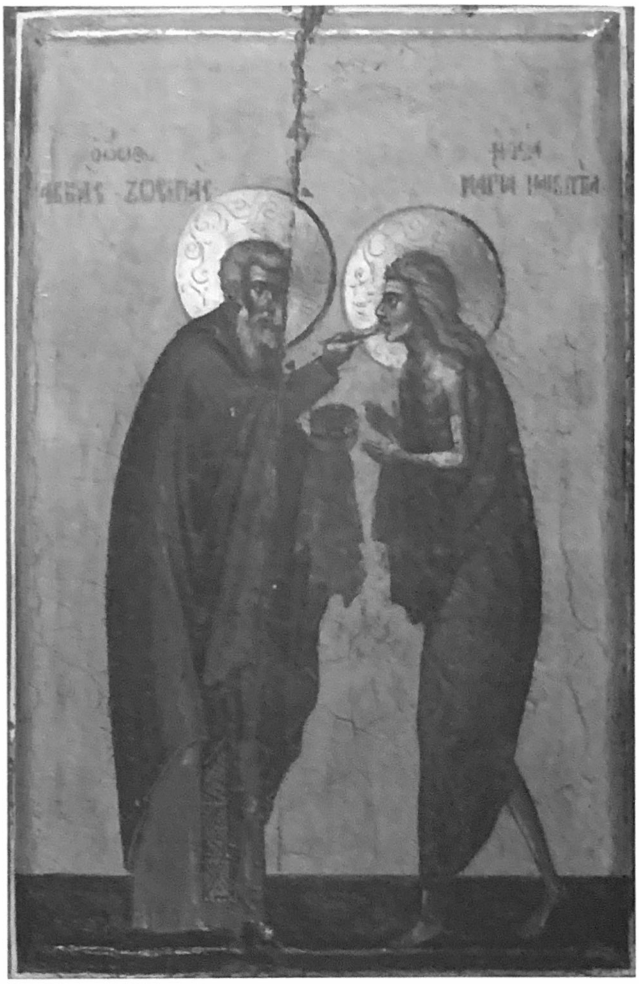
99. Gp 2-31/1654 (Fig. 390), panel:
    St. Simeon stylites on his column with two standing saints below, and two flanking angels.
    Unpublished.



387. Sinai, App. no. 75/1012. Transfiguration. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



388. Sinai, App. no. 86/1365. St. Zosimos, abbot, gives the Eucharist to St. Mary the Egyptian. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

100. Gp 1-27/1680 (Figs. 295, 391), small panel, 23.2 cm h × 17.4 cm w × 1.8 cm (thick):
Virgin with special veil and Child *Galaktotrophousa* (bust-length); reverse, Cross of Victory with inscriptions: IC, XC, VC, Theta V, and vine scroll at bottom.
Excellent condition but heavily repainted in modern times. Appears to have been modeled on no. 710 (Fig. 293), or common model.
Unpublished, but see forthcoming study by E. Bolman.
Folda, *ACHL* 2, Ch. 7.

101. Gp 2-17/1725 (Fig. 263), medium-sized panel: 40.2 × 32.0 cm:
Dormition.
Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], pp. 60–1.
Folda, *ACHL* 2, Ch. 7.

102. Gp 3-?/1730 (Fig. 392), Iconostasis beam fragment:
Five scenes: (a) Entry into Jerusalem, (b) Crucifixion, (c) *Anastasis*, (d) Ascension, (e) Pentecost.
Unpublished.

103. Gp 3-?/1731 (Fig. 296), small-sized panel:
The *Koimesis*, with top right corner cut off diagonally.
Unpublished.
Folda, *ACHL* 2, Ch. 7.

104. Gp 3-1/1732 (Fig. 152), medium-sized panel, 37.3 cm h × 26.7 cm w × 2.0 cm (thick):
Crucifixion with Virgin and John sorrowing, two mourning angels; around the frame: Deësis, with fifteen saints, all bust-length, panel (cf no. 261, which seems to be a copy of or model for this one).
Good condition but Cross of Christ is heavily flaked, paint surface very heavily varnished.
Weitzmann, "Thirteenth Century Crusader Icons on Mount Sinai," [1 (1963)], pp. 180–1.
Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], pp. 56–8.

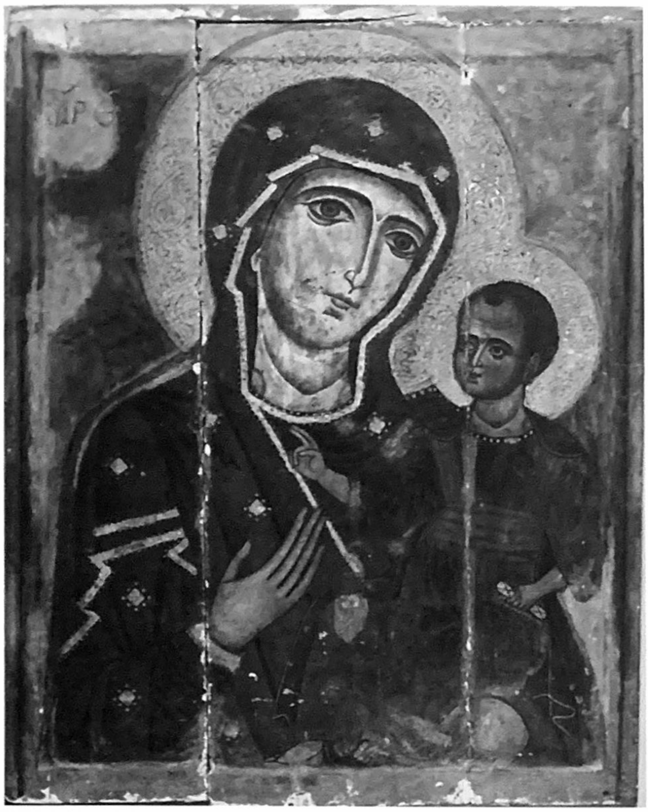
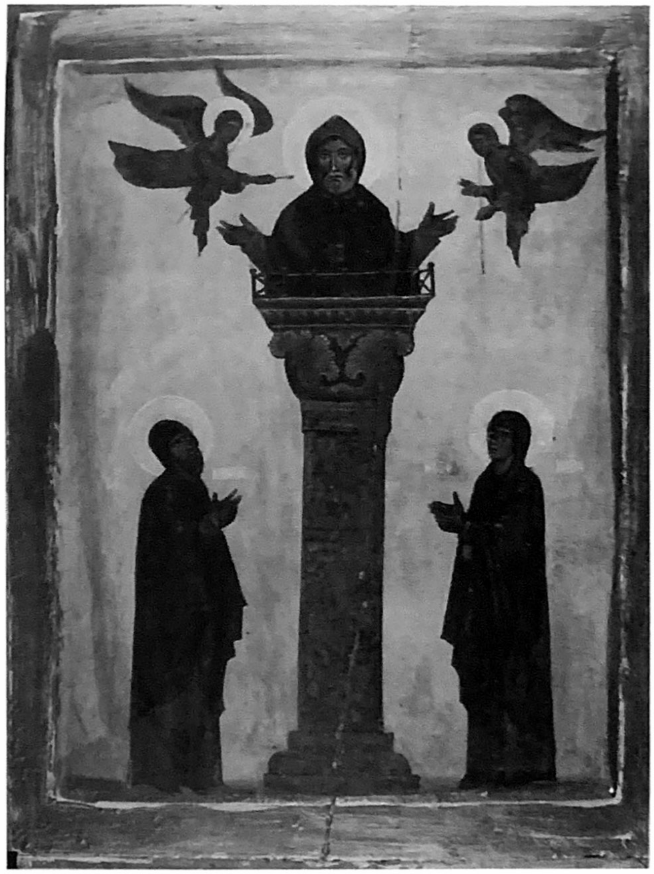
Folda, *ACHL* 2, Ch. 6.

105/106/107. Gp 3-4/1744, 1745, 1746:
Iconostasis beam, with 13 scenes, articulated into three panels that hook together to form the whole beam.
Total width: 225.3 cm (= 2.253 m).
Beam in good condition, unfinished on the left panel with red dividers found on central and right panels left unexecuted; incidental damage and varnished surface.
Cotsonis, J., "220. Templon Beam with Feast Scenes," *Byzantium: Faith and Power: 1261–1557*, pp. 362–3.



389. Sinai, App. no. 96/1518. Virgin and Child *Hodegetria*. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)



390. Sinai, App. no. 99/1654. St. Symeon Stylites with two standing male saints. (photo reproduced by permission of Archbishop Damianos and the Fathers of the Monastery of St. Catherine, and by courtesy of the Michigan-Princeton-Alexandria Expedition to Mount Sinai)

105. Gp 3-4/1744 (Figs. 164–7, 393), Left-hand panel (first set – four scenes):

  Annunciation (15.5 cm w), Nativity (17.2 cm w), Presentation in the Temple (16.5 cm w), Baptism of Christ (16.5 cm w).
  First, left hand section of iconostasis beam: 28.9 cm h × 68.0 cm w (front surface) × 3.5 cm (thick).
  Weitzmann, "Thirteenth Century Crusader Icons on Mount Sinai," [1 (1963)], pp. 181–3.

Addendum

134. An Additional Crusader Icon from the Monastery of St. Catherine, Mount Sinai:

In the exhibition, *Byzantium: Faith and Power: 1261–1557*, which closed in New York at the Metropolitan Museum on 4 July 2004, Helen Evans included an icon of the Virgin Blachernitissa (Fig. 415). Although Elka Bakalova calls this icon "Byzantine" in the catalogue entry, Helen Evans herself thinks it is a Crusader icon and it was presented as such in the audio tour produced for visitors to the show. Some years ago Doula Mouriki discussed some of the Crusader characteristics found in this icon,but she decided to attribute it, along with several other icons – stylistically very close to each other – to a Syrian or a Cypriot artist probably working at Sinai. I agree with Helen Evans, however, and I propose that this icon is done in the same Veneto–Byzantine Crusader style seen in the bilateral icon with the Virgin Hodegetria on the obverse, and Saints Sergios and Bacchus on the reverse, App. No. 10, Gp 1-20/63 (Figs. 197, 198). This view is seconded by Titos Papamastorakis in the article cited below from the catalogue of the Benaki Museum exhibition in the summer of 2004.

CHAPTER 1: REFLECTIONS ON THE HISTORIOGRAPHY OF THE ART OF THE CRUSADERS IN THE THIRTEENTH CENTURY

1. J. F. Michaud, *Histoire des Croisades*, first published Paris, 1811–17, in three volumes; then expanded to six volumes in the 4th edition, Paris, 1825–7. See J. Richard, "De Jean-Baptiste Mailly à Joseph-François Michaud: un moment de l'historiographie des croisades (1774–1841), *Crusades*, 1 (2002), pp. 1–12, for the story of Michaud and the evolution of his work. On Michaud, see also H. Bordeaux, *Voyageurs d'Orient*, vol. 2, Paris, 1926, pp. 133–95.

2. The *Recueil des Historiens des Croisades* was guided by an editorial committee of five members, MM. Hase, Quatremère, Reinaud, Guérard, and Beugnot, and published in Paris between 1841 and 1906.

3. Louis Felicien de Saulcy, *Numismatique des Croisades*, Paris, 1847, rpt. 1974.

4. Part of the context for French scholarship in the nineteenth century on the Crusaders was the political stance of France since 1740 in regard to the Holy Land. When the Sultan Mahmud I and Louis XV signed the Capitulations of 1740, it accorded to France the confirmation of a firman granted by Sultan Murad IV to Louis XIII in 1620. By these agreements, all Christian pilgrims to Jerusalem were placed under the protection of the French flag, and all Frankish (Roman Catholic) clergy were guaranteed certain rights and privileges at the holy places.

9. Ibid., pp. 40–2.

10. Ibid., pp. 42–3.

11. Ibid., p. 43.

12. Ibid., p. 392.

13. Ibid., pp. 394–400.

14. J. Wigley, *Archaeological Studies in Jerusalem*, London, 1856.

15. De Vogüé, *Les Eglises de la Terre Sainte*, p. 399.

16. Ibid., pp. 403–4.

17. Ibid., p. 405.

18. G. Rey, *Etude sur les monuments de l'architecture militaire des Croisés en Syrie et dans l'Ile de Chypre*, Paris, 1871.

19. E. G. Rey, "Etude sur la topographie de la ville de Saint-Jean d'Acre au XIIIe siècle," *Memoires de la Société Nationale des Antiquaires de France*, vol. XXXIX, Miscellanea Historica, VI, 33 pp.

20. See Bordeaux, *Voyageurs d'Orient*, vol. 1, Paris, 1926, pp. 77–100; P. Deschamps, *Les Châteaux des Croisés en Terre Sainte*, vol. I, *Le Crac des Chevaliers*, Paris, 1934, p. ix, nt. 1; and H. Kennedy, *Crusader Castles*, Cambridge, 1994, p. 3. Bordeaux reports that Deschamps lived in Chartres during his last years, at 12 rue de Beauvais, but somewhat as a recluse except for visits to use the municipal library.

21. Rey, *Etude sur les monuments*, pp. 14–16.

22. Ibid., pp. 16–17.

23. Ibid., p. 17.

24. Rey himself drew most of the plans published in the plates and in the text, presumably based on his on-site research, with the one exception of Kerak, plan by C. Mauss. The isometric views, however, seem to be by a variety of people with the famous reconstruction of Crac des Chevaliers having been executed by L. Sauvageot, an architect. Incidentally, this reconstruction of Crac distorts its proportions drastically, emphasizing the height of its walls and the overall verticality of its aspect, while shrinking the size and prominence of its round towers. Crac in this drawing is transformed into a medieval French castle.

25. Ibid., pp. 19–38, 255–64, pls. II–III. Rey cites the wrong date for the gift of Margat to the Hospitallers.

26. Ibid., pp. 39–67, 265–72, pls. IV–VII. Rey also cites the wrong date for the gift of Crac to the Hospitallers.

27. Ibid., pp. 69–83, pl. VIII. Rey also discusses the city walls of Tortosa later on pp. 211–14, illustrated in plan on pl. XX.

28. Here again Rey gives a wrong date for the installation of the Templars at Tortosa.

29. Ibid., p. 76.

30. Ibid., pp. 85–92, pl. IX.

31. Ibid., pp. 93–100, pls. X–XI.

32. Ibid., pp. 101–4; the example he uses is Karmel, south of Hebron, but he gives no date for it.

33. Ibid., pp. 105–13, pl. XII, and note the plan on p. 107, rendering the castle as oddly short and wide.

34. Ibid., pp. 115–21, pl. XXI. Rey uses Gibelet to discuss his idea of the way a Crusader castle reflected the function of similar structures in France with its feudal aristocracy, but he imagines the Crusaders were more cultured than we are disposed to think of them today. He refers to them in terms of their poetry, legal writings, and their oratory, as well as their military exploits. He even cites the evidence of the Assises of Jerusalem written in the thirteenth century as evidence of their accomplishments, even though it has nothing directly to do with Gibelet, which he dates between 1109 and 1197.

35. Ibid., pp. 127–39, pl. XIII.

36. Ibid., pp. 134–6, pl. XIV.

37. Ibid., pp. 141–2.

38. Ibid., pp. 143–51, pl. XV.

39. Ibid., pp. 153–9, pl. XVI.

40. Ibid., pp. 161–2.

41. Ibid., pp. 163–78.

42. Ibid., pp. 179–227, with a remarkably long discussion of Antioch, pp. 183–204.

43. Ibid., pp. 229–52.

44. E. Rey, "Etude sur la Topographie de la Ville d'Acre au XIIIe Siècle," *Mémoires de la Société nationale des antiquaires de France*, 39 (1879), pp. 115–45, idem, *Les Colonies Franques de Syrie aux XIIe et XIIIe siècles*, Paris: A. Picard, 1883, rpt. New York: AMS Press, 1972. It is interesting that this book appeared at a point in the Third Republic when French colonialism was a strong issue articulated by Jules Ferry.

45. Ibid., pp. 1–108. Rey describes the French, Italian, and Levantine characteristics of Crusader society, politics, commerce, and cities, set against the ever-present fact of Frankish domination.

46. Rey, *Les Colonies*, pp. 297–524. Included in this section are concise discussions on major sites not dealt with elsewhere, for example, Jerusalem (p. 387: note that Rey mentions a study in preparation which apparently never was published), Nazareth (p. 443), Jaffa (pp. 410–11), Acre (pp. 448–71), and Tyre (pp. 500–8).

47. Rey, *Les Colonies*, p. 28–30.

48. Ibid., pp. 51–4.

49. Ibid., pp. 6–8, Wilbrand von Oldenbourg, "Peregrinatio," *Peregrinatores Medii Aevi Quatuor*, ed. J. C. M. Laurent, Leipzig: J. C. Hinrichs Bibliopola, 1864, pp. 166–7.

50. Wilbrand von Oldenbourg, p. 167.

51. Rey (*Les Colonies*, pp. 215) mentions Tyre, Tripoli, Antioch, Tarsus, and Damascus as centers for silk production.

52. Rey (*Les Colonies*, pp. 211–13) mentions Jaffa, Beirut, Tyre, and Damascus as centers for production of fine pottery.

53. Rey (*Les Colonies*, pp. 224–6) mentions Tyre, Antioch, Hebron, Tripoli, Acre, and Damascus as important centers for glass production. In all three of these cases – silk, pottery, and glass – Rey does not seem to be making much of a distinction between the twelfth and the thirteenth centuries.

54. A. M. Chazaud, "Inventaire et comptes de la succession d'Eudes, Comte de Nevers," *Memoires de la Société des Antiquaires de France*, 32 (1871), pp. 164–206. Rey does not entertain the problem of which objects may have been produced or acquired in the Levant and which came from western Europe.

55. Rey, *Les Colonies*, pp. 228–31. The inventory list that Rey partially cites is interesting, including as it does, liturgical vessels, reliquaries, ivory combs, and evangelaries and epistolaries with bindings of gold, silver, and pearls. It does not, however, mention any icons. Rey's source for this inventory is S. Pauli, *Codice diplomatico del sacro militare ordine Gerosolimitano di Malta*, vol. 1, Lucca, 1733, pp. 97–8, no. XCIII.

56. Ibid., p. 231. Rey is one of the earliest scholars to cite the Psalter of Melisende in modern times and the only one to notice the ivory bindings with the silk spine. Some of the details he cites are, however, no longer seen on the manuscript binding as it exists today.

57. Ibid., pp. 231. On this cross, see Ferdinand Courtroy, *Le Trésor du Prieuré d'Oignies aux Soeurs de Notre-Dame à Namur et l'Oeuvre du Frère Hugo* (Brussels: Editions de la Librairie Encyclopédique, 1953), pp. 85–95, no. XXIV. Rey also cites an Armenian inventory from Hromkla that lists the orfèvrerie of the patriarchal church. Cf. *Recueil des Historiens des Croisades: Documents Arméniens*, ed. Dulaurier, vol. I (Paris, 1869), p. 641. This inventory apparently dates from the thirteenth century.

58. Rey, *Les Colonies*, p. 63.

59. The view that Arabic was studied by more than a very few Crusaders has not found many supporters since Rey's time. John L. LaMonte was interested in the issue *c.*1940, but now Hussein Attiya has argued that knowledge of Arabic among the Franks was much more extensive than most historians have thought. See H. M. Attiya, "Knowledge of Arabic in the Crusader States in the Twelfth and Thirteenth Centuries," *Journal of Medieval History*, 25(1999), pp. 203–13. I cannot say whether Attiya would agree with Rey that "most" Franks in the Crusader East knew some Arabic, but this interesting article will cause us to reconsider the issue. My thanks to Malcolm Barber, editor of the *Journal of Medieval History*, for drawing my attention to this article.

60. Rey, *Les Colonies*, p. 181.

61. Ibid., pp. 171–8. The manuscripts he cites are Paris, B. N. MS lat. 4939, dated 1310, and Vatican lat. 1960, *c.*1300.

62. One notable aspect of his presentation is the characterization and discussion of art (ibid., pp. 211–34) under the rubric, "l'art industriel." In fact, this category accords quite well with medieval art, mutatis mutandis, and underlines the late-nineteenth-century ideas about art with regard to the "beaux arts" in France.

63. Rey, *Les Colonies*, p. 2.

64. A. Pératé and G. Brière, *Musée National de Versailles: Catalogue*, vol. I, Compositions Historiques (Paris: Musées Nationaux, 1931), pp. 5–20, nos. 25–145. A nice selection of these paintings (some in color) is illustrated by P. Lesourd and J. M. Ramiz, *On the Path of the Crusaders*, ed. M. Ismojik, trans. J. O'Dell (Israel: Masada Press, 1969), pp. 266–71 (list of illustrations).

65. G. Constable, "The Historiography of the Crusades," *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, D.C., 2001, p. 9.

66. G. Schlumberger, *Numismatique de l'Orient Latin*, Paris, 1878, supplement, Paris, 1882, rpt. 1954.

Kitchener, *The Survey of Western Palestine: Memoirs of the Topography, Orography, Hydrography and Archaeology*, vol. I, *Galilee*, London, 1881; vol. II, *Samaria*, London, 1882; and vol. III, *Judaea*, London, 1883.

68. H. Prutz, *Kulturgeschichte der Kreuzzüge*, Berlin, 1883. Book 5, part II, deals with "Die bildenden Künste bei den Franken und die Einwirkung der Kreuzzügge auf die bildenden Künste im Abendlande," pp. 416–35, 566–7.

69. C. Diehl, "Les Monuments de l'Orient Latin," *Revue de L'Orient Latin*, V (1897), pp. 295–6.

70. Ibid., p. 301.

71. Diehl in fact sees the continuum as running from 1098 on well beyond the fall of Acre and the elimination of the Crusader States on the mainland, to Cyprus and then on to Rhodes, that is, to 1571. In some sense, the focus of Diehl's conception was indeed Lusignan Cyprus. It is worth remembering that Lusignan Cyprus is also where Camille Enlart began his work with the publication of *L'Art gothique et de la Renaissance en Chypre*, in 1899.

72. H. Vincent and F.-M. Abel, *Jérusalem: Recherches de topographie, d'archéologie et d'histoire*, vol. II, *Jérusalem nouvelle*, fasc. I–II, Paris, 1914; fasc. III, Paris, 1922; fasc. IV, Paris, 1926.

73. P. Viaud, *Nazareth et ses deux églises de l'Annonciation et de Saint-Joseph*, Paris, 1910.

74. Enlart started on the basis of the studies by de Vogüé and Rey, and he also relied heavily on the work of V. Guérin, *Description géographique, historique et archéologique de la Palestine: Judée*, in 3 vols., Paris, 1868–1869, *Samarie*, in 2 vols., Paris, 1874–1875, and *Galilée*, in 2 vols., Paris, 1880.

81. Ibid., p. 5.

82. Ibid., p. 4.

83. Ibid., pp. 8–9.

84. Ibid., p. 10.

85. Ibid., pp. 20–2.

86. Ibid., pp. 22–5. For signatures he mentions twelfth-century examples such as Ode, Ogier, Johannes, Jordanis, and refers to Armenian signatures at Nazareth (Ibid., pp. 24–5).

87. Ibid., p. 32.

88. Ibid., p. 34.

89. Ibid., p. 134.

90. J. Folda, *ACHL* 1, pp. 469–71.

91. Enlart, *Les Monuments*, I, pp. 134–6.

92. Camille Enlart, *Manuel d'Archéologie Française depuis les temps Mérovingiens jusqu'a la Renaissance*, in 3 vols., I: *Architecture Religieuse*, II: *Architecture Civile et Militaire*, III: *Le Costume*, Paris, 1902, 1904, 1916, respectively. Enlart's conceptual framework, organization, discussion, and terminology is completely based on the methods of analysis and interpretation published in the *Manuel*.

93. Enlart, *Les Monuments*, I, pp. 136–7.

94. Ibid., pp. 137–48.

95. Enlart, *Les Monuments*, album 1, pl. 52, fig. 164.

96. Ibid., I, pp. 155–201.

97. Ibid., p. 159.

98. It is an obvious concern reading Enlart today that because he was focused so strictly on the French aspect of Crusader material, he did not recognize the Italian, English, or German aspects of Crusader art, not to mention the Byzantine or Eastern Christian aspects, which according to his analysis were non-Crusader by definition. This is unfortunate because in the course of his research in the 1920s, he would have been in a position to see and study a certain amount of material no longer available to us today.

99. Ibid., pp. 162–3.

100. Folda, *ACHL* 1, pp. 136–7.

101. Enlart, *Les Monuments*, I, p. 164. The whole issue of iconostasis screens and liturgical enclosures in the Byzantine East was addressed at the Dumbarton Oaks Symposium in May 2003. Although no paper was given on the evidence for liturgical screens in Crusader churches, papers by S. Gerstel, E. Bolman, M. Hall, and J. Jung offered important new insights on the functions and importance of these screens, both East and West. In addition to the published papers forthcoming from that symposium, see also the articles by M. Hall, "The Italian Rood Screen: Some Implications for Liturgy and Function," *Essays Presented to Myron P. Gilmore*, eds. S. Bertelli and G. Ramakus, vol. II, Florence, 1978, pp. 213–18; and J. Jung, "Beyond the Barrier: The Unifying Role of the Choir Screen in Gothic Churches," *Art Bulletin*, LXXXII (2000), pp. 622–57.

102. Gabriel Bar Kala'ì, "Poème sur la chûte de Tripoli," introduction by R. Röricht, transl., I. Guidi, *AOL*, II, pp. 462–6. The relevant part of the poem is on p. 466. This poem in Syriac, which dates to the mid-sixteenth century, is the last of a type, "Laments" for Crusader cities captured and destroyed in the late thirteenth century. Further research will be required to evaluate whether Enlart's interpretation is tenable here, but the possibility of such enclosures modeled on Orthodox church decoration is an important issue to consider.

103. Enlart, *Les Monuments*, I, pp. 165–71.

104. Ibid., p. 174. This miter is published in Courtoy, *Le Trésor du Prieuré d'Oignies*, pp. 103–5. Because of the unusual embroidered "lunules," that is, the crescent designs, J. Braun proposed to locate the manufacture of this miter in Sicily. Courtoy disagrees, but this issue will have to be revisited. A Crusader attribution is clearly possible for other reasons.

105. Enlart, *Les Monuments*, I, pp. 174–5.

106. Ibid., pp. 175–9.

107. Ibid., pp. 179–99. Some of this material I have already discussed as Crusader work of the twelfth century (e.g., the reliquary of St. John now in the Museum of the Greek Patriarchate, Folda, *ACHL* 1, pp. 297–9).

108. Folda, *ACHL* 1, pp. 152–3, 157–9.

109. Enlart, *Les Monuments*, I, p. 200. Courtoy (*Le Trésor du Prieuré d'Oignies*, pp. 107–8) entertains various other opinions about this crozier.

110. Ibid., p. 34. Enlart acknowledges that circumstances did not permit him to deal with the Principality of Antioch, the County of Edessa, Cilician Armenia, or trans-Jordan.

111. Folda, *ACHL* 1, p. 11.

112. Paul Deschamps, *Les Châteaux des Croisés en Terre Sainte*: vol. 1, *Le Crac des Chevaliers*, Paris, 1934; vol. 2, *La Défense du Royaume de Jérusalem*, Paris, 1939; vol. 3, *La Défense du Comté de Tripoli et de la Principauté d'Antioche*, Paris, 1973.

115. H. Kennedy, *Crusader Castles*, Cambridge, 1994, p. 3.

116. Folda, *ACHL* 1, p. 12. I should like to record my gratitude here to Madame Deschamps and to Pierre Coupel for their gracious and helpful responses to my requests for information about the work of Paul Deschamps at Crac des Chevaliers.

117. J. Folda, "Crusader Art and Architecture: A Photographic Survey," in *HC* 4, pp. 281–8. Vol. 2 of Louis de Clercq's albums, *Voyage en Orient* (1859–60), "Châteaux," dealt with the Crusader castles.

118. Lawrence's thesis was published first in 1936 and reprinted in 1986, but now the essential new edition with detailed scholarly notes is the following: T. E. Lawrence, *Crusader Castles*, ed. with notes by R. D. Pringle, Oxford, 1988. Lawrence had made numerous notes and revisions on his thesis but died before any final changes were made. Pringle's annotated edition is essential for understanding the state of the thesis at the time of publication and the thoughts of the author in regard to the issues he addressed.

119. Deschamps, *La Défense du Royaume de Jérusalem*, p. 122, n. 1.

120. T. S. R. Boase, "The Arts in the Latin Kingdom of Jerusalem," *JWCI*, 2 (1938–39), p. 20.

121. For a biographical summary of the remarkable career of T. S. R. Boase, see his vita in *The A. W. Mellon Lectures in the Fine Arts: Fifty Years*, Washington, D.C.: National Gallery of Art, Center for Advanced Study in the Visual Arts, 2002, p. 221.

122. T. S. R. Boase, *Castles and Churches of the Crusading Kingdom*, London, 1967; and idem, *Kingdoms and Strongholds of the Crusaders*, London, 1971.

123. T. S. R. Boase (ch. III), "Ecclesiastical Art in the Crusader States in Palestine and Syria: A. Architecture and Sculpture, B. Mosaic, Painting and Minor Arts"; (ch. IV) "Military Architecture in the Crusader States in Palestine and Syria"; (ch. V) "The Arts in Cyprus: A. Ecclesiastical Art"; and (ch. VI) "The Arts in Frankish Greece and Rhodes: A. Frankish Greece (with D. J. Wallace), B. Rhodes, *HC* 4, pp. 69–195, 208–50.

124. Boase, "Ecclesiastical Architecture and Sculpture," *HC* 4, p. 74.

125. Boase, *Castles and Churches*, twenty-four color plates. Actually Paul Deschamps was the first to use color photography to illustrate his book, *Terre Sainte Romane*, Abbaye Ste-Marie de la Pierre-Qui-Vire, 1964, but there are only four color plates printed in a strangely dark process that gives the scenes an eerie, abandoned look.

126. Boase engaged Dr. Richard Cleave to do the photography. Cleave's excellent photographs were part of a large archive he amassed over a period of many years in the Near East, eventually surpassing Alistair Duncan's and Anthony Kersting's photo collections.

127. Boase, *Kingdoms and Strongholds*, fig. 74, p. 105 (Melisende Psalter), and fig. 140, p. 205 (Riccardiana Psalter).

128. Buchthal, *MPLKJ*, Oxford, 1957.

129. Ibid., pp. xxxii–xxxiii.

130. Ibid., p. 93.

131. Ibid., p. 95.

132. N.B. I wish to remind the reader that I use my special set of abbreviations for Weitzmann's articles on icons, when citing his works, starting here.

K. Weitzmann, "Thirteenth-Century Crusader Icons on Mount Sinai" [1 (1963)], pp. 179–203; idem, "Icon Painting in the Crusader Kingdom" [3 (1966)], pp. 51–83.

133. Weitzmann, "Thirteenth-Century Crusader Icons on Mount Sinai" [1 (1963)], p. 182.

134. Buchthal, *MPLKJ*, p. 105.

135. Ibid. The three great masters were the painters of the Riccardiana Psalter now in Florence (*c.*1235), the Arsenal Bible now in Paris (*c.*1250–4), and the main master who worked, collectively, with the group of artists who painted the Histoire Universelle now in London (*c.*1285).

136. Ibid., p. 105.

137. Weitzmann, "Icon Painting in the Crusader Kingdom" [3 (1966)], p. 74.

138. Ibid.

139. Ibid., pp. 74–83.

140. Buchthal, as in n. 128.

141. Weitzmann, as in n. 132. Besides these two articles, Weitzmann also published several others that presented additional Crusader icons to the discussion: idem, "Four Icons on Mount Sinai: New Aspects in Crusader Art" [5 (1972)], pp. 279–93; idem, "Three Painted Crosses at Sinai" [6 (1972)], pp. 23–31.

142. D. Weiss, *Art and Crusade in the Age of Saint Louis*, Cambridge, 1998.

143. Here I use the term "lords" advisedly, instead of "barons." Jonathan Riley-Smith (*The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, London and Basingstoke, 1973, pp. 16–20) discusses the terminology of feudal lords, nobles, and barons in the Latin Kingdom of Jerusalem, stressing the very technical meaning of baron and the baronage according to John of Jaffa, the greatest of the Crusader jurists.

144. Following World War II, C. N. Johns and B. Bagatti were the most important figures in archaeology working individually on Crusader-related sites. With the establishment of the State of Israel, however, a number of scholars took the field. In the area of Crusader history, Joshua Prawer inspired a generation of students to look at history and its physical context. After 1948, new sites were accessible in the Holy Land, for example, Belvoir Castle, and after 1967, archaeologists were able to move ahead on Crusader sites hitherto closed, for example, the Old

City of Jerusalem. When Meron Benvenisti published *The Crusaders in the Holy Land* in 1970, it provided in effect the outline of an agenda for future research.

197. R. Cormack, "Crusader Art and Artistic Technique: Another Look at a Painting of St George," *Byzantine Icons: Art, Technique and Technology*, ed. M. Vassilaki, Heraklion, 2002, pp. 166, 168.

198. It is also clear that the political situation in the Holy Land has changed completely since the nineteenth century. With the breakup of the Ottoman Empire at the time of World War I, the British and French Mandates following the war, and the emergence of the new states of Israel, Lebanon, Jordan, and Syria along with Egypt and Turkey, and now very recently the Palestinian Authority on the West Bank and in Gaza, a variety of viewpoints quite different from the old French and English colonial perspectives have been fostered.

199. In the various fields mentioned in this chapter, some of the important new contributions are the following: T. Ulbert, *Resafa III: Der kreuzfahrerzeitliche Silberschatz aus Resafa-Sergiupolis*, Mainz am Rhein: Verlag Philipp von Zabern, 1990; C. Connor, *The Color of Ivory: Polychromy on Byzantine Ivories*, Princeton: Princeton University Press, 1998; D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd edn., London: Cambridge University Press for the Royal Numismatic Society and the Society for the Study of the Crusades and the Latin East, 1995; A. Muthesius, *Byzantine Silk Weaving: AD 400 to AD 1200*, eds. E. Kislinger and J. Koder, Vienna: Verlag Fassbaender, 1997. In monumental painting there is the newly published work of Erica Dodd on fresco painting in the Lebanon. In architecture, there is the remarkable and invaluable work of R. D. Pringle that I have cited frequently in this chapter: idem, *The Churches of the Crusader Kingdom of Jerusalem: A Corpus*, vol. 1, A–K, Cambridge: Cambridge University Press, 1993; vol. 2, L–Z, Cambridge: Cambridge University Press, 1998, vol. 3, forthcoming; and idem, *Secular Buildings in the Crusader Kingdom of Jerusalem: An Archaeological Gazetteer*, Cambridge: Cambridge University Press, 1997.

CHAPTER 2: SALADIN'S CONQUEST OF JERUSALEM AND THE AFTERMATH

1. M. W. Baldwin, "The Decline and Fall of Jerusalem," *HC* I, pp. 615–21. At the time, the defeat at Hattin overshadowed everything. See P. Cole, "Christian Perceptions of the Battle of Hattin (583/1187)," *Al-Masaq*, 6 (1993), pp. 9–39. Eventually, however, Christian opinion refocused on the magnitude and significance of the subsequent loss of Jerusalem.

2. B. Z. Kedar and R. D. Pringle, "La Fève: A Crusader Castle in the Jezreel Valley," article XI in B. Z. Kedar, *The Franks in the Levant, 11th to 14th Centuries*, Aldershot and Brookfield, 1993, p. 170.

3. Baldwin, "The Decline and Fall of Jerusalem," *HC* I, pp. 615–16.

4. Lyon Eracles, *La Continuation de Guillaume de Tyr (1184–1197)*, ed. M. R. Morgan, Paris, 1982, p. 66.

5. Paris Eracles, *RHC: Historiens Occidentaux*, II, p. 70. Certain coins have tentatively been identified as these special strikes. I discuss this issue later; see nt. 76.

6. *Itinerarium Peregrinorum et Gesta Regis Ricardi I*, Chronicles and Memorials of the Reign of Richard I, ed. W. Stubbs, London, 1864, p. 21; translation: H. J. Nicholson, *Chronicle of the Third Crusade*, Aldershot and Brookfield, 1997, p. 38.

7. Lyon Eracles, *La Continuation*, p. 67; translation: Edbury, *The Conquest of Jerusalem*, p. 59. The True Cross reliquary owned by the Syrians in the Church of the Holy Sepulcher was mentioned by the pilgrim Theodoric in the 1170s: J. Wilkinson, *Jerusalem Pilgrimage: 1099–1185*, London, 1988, p. 283. It is significant that the Christians in Jerusalem were banding together to the extent that they used each others holy relics for processions in a time of emergency.

8. C. Brand, "The Byzantines and Saladin, 1185–1192," *Speculum*, 37 (1962), p. 170 and n. 7.

9. Paris Eracles, *RHC: Hist. Occ.* II, p. 71; translation, P. Edbury, *The Conquest of Jerusalem and the Third Crusade*, Aldershot and Brookfield, 1996, p. 62.

10. Ibn al-Athir, *The Perfect History*, ed. and trans., F. Gabrieli, *Arab Historians of the Crusades*; trans. from the Italian, E. J. Costello, 2nd edn., London, 1969, p. 142. It is interesting that the Lyon Eracles records a different payment schedule, namely, ten bezants for each man, five for each woman, but only one for each child. Lyon Eracles, *La Continuation*, p. 69.

11. Ibn al-Athir, *The Perfect History*, p. 144.

12. Lyon Eracles, *La Continuation*, p. 75.

13. Although a "normal" passage from Acre or Tyre to Italy at this time might take four weeks, in the unlikely event of consistently favorable winds a ship might do the trip in half that time. See, for example, J. Pryor, "The Naval Architecture of Crusader Transport Ships," *Mariner's Mirror*, 70 (1984), pp. 378–86, or the examples cited by S. Menache, "The Crusades and Their Impact on the Development of Medieval Communication," in *Kommunikation zwischen Orient und Okzident Alltag und Sachkultur*, ed. H. Kuhnel, Vienna, 1994, pp. 77–8. In light of this information, it is not impossible that preliminary word of the fall of Jerusalem on 2 October could have reached Rome by the 19th or 20th, about two and a half weeks later.

14. Gregory VIII, "Audita tremendi," dated 3 November 1187 and sent to Germany, in *The Crusades: Idea and Reality, 1095–1274*, eds. L. Riley-Smith and J. Riley-Smith, London, 1981, pp. 64–6.

15. Quite possibly one source of the pope's details about Hattin was the letter Heraclius, Patriarch of Jerusalem, sent to him in Rome, dated 20 September. See B. Z. Kedar, "Ein Hilferuf aus Jerusalem vom September 1187," *Deutsches Archiv*, 38 (1982), pp. 112–22.

16. C. T. Maier, "Crisis, Liturgy and the Crusade in the Twelfth and Thirteenth Centuries,"

Journal of Ecclesiastical History, 48 (1997), p. 632. Maier places more emphasis on the defeat at the Battle of Hattin than on the loss of Jerusalem three months later. It appears that this is mostly the result of the first word coming to Rome and the West of Hattin, and that the news of the conquest of Jerusalem by Saladin only came later.

17. One can imagine other sites sacred to the Muslims, like Hebron, to have been cleansed as well. Furthermore, although the chronicles do not seem to discuss it, in those Crusader cities captured by Saladin, mosques that had been transformed into churches at the time of the Crusader conquest in 1099 and the years following can be expected to have been reclaimed for Islam and converted back into Muslim use.

We also have the examples of what are now the main mosques at Ramla, Gaza, and Sebaste, which were built in the twelfth century as Crusader churches but which then were later converted for Muslim use. Cf. Folda, *ACHL* 1, pp. 306–13. The difficulty with these sites, and certain others like them, is that they changed hands a number of times between 1187 and 1291, so it is not clear which specific modifications were done to these buildings at any one of the changeovers. In any case, whatever was done at the time of Saladin is difficult to determine because of lack of evidence, written or archaeological, and what we see today of course reflects the latest transformation, after 1291, with possibly modern additions.

18. With regard to the continuations of William of Tyre's great work, I draw the reader's attention to the analysis given by M. R. Morgan, *The Chronicle of Ernoul and the Continuations of William of Tyre*, Oxford, 1973, pp. 1–21. In particular, the analysis of the various texts of these continuations given on pp. 10–11 is important. My principle for using these texts is to rely most heavily on those versions of the continuations which are extant in manuscripts done in the Holy Land in the thirteenth century and that reflect the Eastern, that is, Crusader points of view. So, for example, for the period 1185–97, I am using the texts of the "Lyon Eracles," D the *La Continuation* edition (manuscript "d" [Lyon, Bibl. Mun., MS 828]), sometimes called the text of Ernoul, and the "Paris Eracles" = the *RHC: Hist. Occid.* II, edition (manuscript "b" [Paris, Bibl. Nat., MS fr. 2628]). Those manuscripts that contain the name of Ernoul in the story about the castle of La Fève (cf. Morgan, *The Chronicle of Ernoul*, p. 41), namely, St. Omer MS 722, Bern MS 41, Bern MS 115, and Brussels MS 11142, are all Western in origin. See also the remarks of P. Edbury on the complexities of using these continuations: P. Edbury, *The Conquest of Jerusalem and the Third Crusade*, Aldershot and Brookfield, 1996, pp. 3–8; and, more recently, in idem, "The Lyon *Eracles* and the Old French Continuations of William of Tyre," *Montjoie*, Aldershot and Brookfield, 1997, pp. 139–53.

19. Lyon Eracles, *La Continuation*, p. 75. It is not clear if by "le Temple" he means the Dome of the Rock, the Templum Domini in Crusader terms, or the Templum Salomonis, that is, the Aqsa Mosque, or the whole Temple Mount, which means the Haram al Sharif, the entire noble sanctuary in which the Aqsa and the Dome of the Rock are contained. From the context it appears that he is referring to the Dome of the Rock, but the broader meaning is also possible.

20. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 22–3, trans. H. J. Nicholson, *Chronicle of the Third Crusade*, p. 39,

21. Folda, *ACHL* 1, pp. 441–56.

22. M. Burgoyne, *Mamluk Jerusalem*, Buckhurst Hill, 1987, p. 48; M. Rosen-Ayalon, "Art and Architecture in Ayyubid Jerusalem," *Israel Exploration Journal*, 40 (1991), p. 305.

23. Imad ad-Din, *History of the Fall of Jerusalem*, ed. and trans., F. Gabrieli, *Arab Historians of the Crusades*, trans. from the Italian by E. J. Costello, 2nd edn., London, 1969, p. 169.

24. Later, in 1196–9, al-Malik al-Aziz, son of Saladin and Ayyubid governor of Jerusalem, commissioned a wooden screen to be placed around the rock. Cf. Rosen-Ayalon, "Art and Architecture in Ayyubid Jerusalem," p. 308.

25. Ibn al-Athir, *The Perfect History*, in *Arab Historians of the Crusades*, pp. 144–5.

26. Folda, *ACHL* 1, pp. 249–53.

27. Ibid., pp. 266–9, pls. 8A.7a–f, p. 554, n. 76. See also the review by M. Burgoyne and J. Folda cited in n. 34.

28. Ibid., p. 269, pl. 8A.7g, and Rosen-Ayalon, "Art and Architecture in Ayyubid Jerusalem," p. 309. The Qubba Nahwiyya was a later foundation by the nephew of Saladin, al-Malik al-Mu'azzam Isa, dated 1207–8.

29. Folda, *ACHL* 1, pp. 319, pl. 8B.22, p. 565, n. 134.

30. Ibid., p. 271, pl. 8A.8c.

31. Ibid., p. 452.

32. Ibid., pp. 442–52, pls. 10.13a–w, 10.14a–d.

33. Ibid., pp. 449–52, pls. 10.15a–d.

34. Ibid., p. 448, pls. 10.14c–d, and M. Burgoyne and J. Folda, review of H. Buschhausen, *Die süditalienische Bauplastik im Königreich Jerusalem von König Wilhelm II. bis Kaiser Friedrich II.*, Vienna, 1978, in the *AB*, 63 (1978), pp. 321–4, and pl. 3.

35. Ibid., pp. 253–61, pls. 8A.5a–ii, and figs. 7 and 8. Could any of these marble slabs have been among those taken from the covering over the rock in the Dome of the Rock? See also Rosen-Ayalon, "Art and Architecture in Ayyubid Jerusalem," p. 308.

36. Rosen-Ayalon, "Art and Architecture in Ayyubid Jerusalem," pp. 305–14.

37. Burgoyne, *Mamluk Jerusalem*, p. 48, specifies the following establishments: the Salahiyya Khanqah was endowed in 1189 and placed in the former patriarchal residence, the Salahiyya Madrasa was endowed in 1192 and placed in St. Anne's Church, the Mosque of al-Afdal was endowed in 1193 and located in part of the Hospital opposite the Church of the Holy Sepulcher. See also Rosen-Ayalon, "Art and Architecture in Ayyubid Jerusalem," p. 307.

38. Imad ad-Din, *History of the Fall of Jerusalem*, in *Arab Historians of the Crusades*, pp. 174–5.

39. Folda, *ACHL* 1, pp. 177–245.

40. There were also the entries to the church through the Franks Chapel, to the right of the main doors on the south transept façade, and into the Rotunda from the Patriarch's residence, at the west end of the rotunda. Both of these doors have now also been walled up, but we do not know when this was done.

41. S. de Sandoli, *The Church of the Holy Sepulchre – Keys, Doors, Doorkeepers*, Jerusalem, 1986, p. 15.

42. B. Z. Kedar ("The Patriarch Eraclius," *Outremer*, eds. B. Z. Kedar, H. E. Mayer, and R. C. Smail, Jerusalem, 1982, pp. 177–204) discusses the reputation of Heraclius at length and his somewhat unjustified treatment at the hands of modern historians.

43. The Muslim sources say that he took treasure from the Dome of the Rock and the Aqsa Mosque, but those sites had, of course, been consecrated as churches by the Crusaders, so what he was doing was taking Christian religious works from these Christian churches before they were returned to Muslim use.

44. Imad ad-Din, *History of the Fall of Jerusalem*, in *Arab Historians of the Crusades*, p. 162. Note that Imad ad-Din says gold plating even though the Old French continuations refer to silver. In fact, by the late twelfth century the aedicule and the tomb had both. See J. Folda, *ACHL* 1, pp. 62 and 82.

45. Ibid., p. 144. It is interesting that Ibn al-Athir says he went to Tyre in the Gabrieli and Costello edition of the text. Kedar ("The Patriarch Eraclius," p. 202) reads the text as saying, "to the unconquered Frankish possessions along the Syrian littoral." Without commenting specifically on Heraclius, P. Edbury (*John of Ibelin and the Kingdom of Jerusalem*, Woodbridge, 1997, p. 17) says that "the majority of the people were escorted to Christian-held territory in the county of Tripoli."

46. Philippe de Novare, "Livre de Philippe de Navarre," quoted by P. Edbury, "Law and Custom in the Latin East: Les Letres dou Sepulcre," *Intercultural Contacts in the Medieval Mediterranean*, ed. B. Arbel, London and Portland, OR, 1996, pp. 71–2.

47. Edbury, "Law and Custom in the Latin East," pp. 73–8.

48. Peter Edbury does not think it is likely there were replacements made. He points out that in the text of the *Livre de Jean d'Ibelin* (*RHC: Lois* I, p. 430), even though the question of replacements is raised, nothing indicates anything was done.

49. P. Edbury and J. Folda, "Two Thirteenth-Century Manuscripts of Crusader Legal Texts from Saint-Jean d'Acre," *Journal of the Warburg and Courtauld Institutes*, 54 (1994), pp. 243–54, and pls. 31–3.

50. Lyon Eracles, *La Continuation*, p. 70.

51. De Sandoli, *The Church*, pp. 3–4, 25–8, 49, nn. 5, 6. I am assuming that the doors to the Church of the Holy Sepulcher were destroyed in the fire of 1808 and that they, and the lock and key, therefore had to be replaced.

52. Imad ad-Din, *History of the Fall of Jerusalem*, in *Arab Historians of the Crusades*, pp. 161–2.

53. S. Pauli, *Codice Diplomatico del sacro militare ordine Gerosolimitano oggi di Malta*, vol. 1, Lucca, 1733, pp. 97–8, num. XCIII. This text, edited in a more modern edition by J. Delaville le Roulx, is discussed in Chapter 3.

54. A. M. Chazaud, "Inventaire et comptes de la succession d'Eudes, Comte de Nevers,"

Memoires de la Société Nationale des Antiquaires de France, 32 (1871), pp. 164–206.

55. See, for the True Cross relic, Folda, *ACHL* 1, p. 35; for the reliquary from the Church of St. John the Baptist now in the museum of the Greek Orthodox Patriarchate in Jerusalem, see Folda, *ACHL* 1, pp. 297–9, and Frolow, *La Relique de la Vraie Croix*, pp. 361–2, no. 404.

56. R. B. Rose, "The Native Christians of Jerusalem: 1187–1260," *The Horns of Hattin*, ed. B. Z. Kedar, Jerusalem and London, 1992, pp. 242–6. Rose does not comment on Greek-speaking Orthodox residents.

57. J. Folda, *The Nazareth Capitals and the Crusader Shrine of the Annunciation*, University Park and London, 1986, pp. 19, 72 n. 22. Enlart believed that the capitals were buried in 1263, but he does not explain why the shrine they were meant to decorate was never erected or why they would have lain in the workshop untouched between 1187 and 1263 when all the rest of the sculpture had been put up on the church. C. Enlart, *Les Monuments des Croisés dans le Royaume de Jérusalem*, vol. II, Paris, 1928, p. 295.

58. P. Viaud, *Nazareth et ses deux églises de l'Annonciation et de Saint-Joseph d'après les fouilles recentes*, Paris, 1910, pp. 55–7.

59. H. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, pp. 1–38.

60. See the discussion of this church in Folda, *ACHL* 1, pp. 275–8. See also the important photo of this portal by Sgt. J. McDonald, exhibited at the Dahesh Museum in New York City and reproduced in the catalogue of the show, K. S. Howe, *Revealing the Holy Land*, Santa Barbara, 1997, p. 78.

61. A. Frolow, *La Relique de la Vraie Croix*, Paris, 1961, pp. 286–347, vs. p. 349.

62. For the narrative of the period discussed in this section, see Lyon Eracles, *La Continuation*, pp. 52–85, trans., Edbury, *The Conquest of Jerusalem*, pp. 45–76; S. Runciman, *A History of the Crusades*, 2, Cambridge, 1952, pp. 455–73; J. Prawer, *Histoire du Royaume Latin de Jérusalem*, 2nd edn., Paris, 1975, pp. 641–80; J. Riley-Smith, *The Crusades: A Short History*, New Haven and London, 1987, pp. 84–7, 109–18; H. E. Mayer, *The Crusades*, trans. J. Gillingham, 2nd edn., Oxford, 1988, pp. 134–40; H. Wieruszowski, "The Norman Kingdom of Sicily and the Crusades, *HC* 2, pp. 36–42; and the maps in J. Riley-Smith, *The Atlas of the Crusades*, London, 1991, pp. 60–1.

63. Lyon Eracles, *La Continuation*, p. 76, trans. Edbury, *Conquest of Jerusalem*, p. 68.

64. Ibid., p. 69. Muslim historians matter-of-factly refer to the need of the men to disperse after rendering their service (e.g., al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, trans. R. J. C. Broadhurst, Boston, 1980, p. 86), but the vigorous defense of Tyre led by Conrad of Montferrat clearly staved off the ultimate disaster.

65. C. Brand, "The Byzantines and Saladin, 1185–1192: Opponents of the Third Crusade," *Speculum*, 37 (1962), p. 171.

66. H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 84–96.

67. Ibid., pp. 79–84.

68. Kedar, "The Patriarch Eraclius," p. 202, n. 89. However, the text of Ibn al-Athir is interpreted by Gabrieli to indicate that he went to Tyre. See Gabrieli, *Arab Historians of the Crusades*, p. 144.

69. The inventory of the cathedral treasury in Antioch, dated 1209, as in n. 53, is discussed in Chapter 3.

70. B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 244–5.

71. D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd edn., London, 1995, p. 66.

72. "Donc vint Balian et li patriarches, si firent descovrir le monument dou Sepucre qui estoit toz covers d'argent; si l'en firent oster por batre monoie, por doner as chevaliers et as sergens." Paris Eracles, *RHC: Historiens Occidentaux* II, p. 70, lines 19–21. C. J. Sabine, "Numismatic Iconography of the Tower of David and the Holy Sepulchre," *Numismatic Chronicle*, 7th ser., 19 (1979), p. 129.

73. Paris Eracles, *RHC: Historiens Occidentaux* II, pp. 67–73, chs. XLV–XLVII.

74. Sabine, "Numismatic Iconography of the Tower of David and the Holy Sepulchre," pp. 122–32. Sabine calls these coins "an emergency coinage struck during the siege of Jerusalem, 1187." This coin is also discussed in the following: N. du Quesne Bird, "Two Deniers from Jordan," *Numismatic Circular*, 73 (1965), p. 109; Metcalf, *Coinage of the Crusades*; p. 77, J. Porteous "Crusader Coinage with Greek or Latin Inscriptions," *HC* 6, pp. 380–1, n. 81, p. 401, no. 62; J. Porteous, *The John J. Slocum Collection of Coins of the Crusades*, Sotheby's, London, 1997, pp. 36, 40, no. 288; and pl. fig. 288; A. G. Malloy et al., *Coins of the Crusader States*, New York, 1994, pp. 63, 82, no. 51. Only Malloy disagrees with the emergency issue hypothesis of Sabine, interpreting this instead as a pilgrim coin issued by the Hospitallers.

75. Only six examples of this coin survive, and the imagery is not exactly the same for the Tower of David on each example. See the discussion later in the chapter.

76. Porteous, "Crusader Coinage," p. 401, no. 62, Porteous, *The Slocum Collection*, p. 40, no. 288; Sabine, "Numismatic iconography of the Tower of David and the Holy Sepulchre," pp. 123–4.

77. It is not however unique among Crusader coins from Jerusalem both before and after 1187. See the discussion by M. Metcalf, *Coinage of the Crusades*, pp. 75–9.

78. See Folda, *ACHL* 1, p. 289.

79. Metcalf, *Coinage of the Crusaders*, p. 77 and pls. 10 and 11; Porteous, "Crusader Coinage," pp. 397, 398, 401. Metcalf also points out that tests of the metal include "60% silver together with enough zinc to suggest that some scrap brass entered into the alloy" (p. 77).

80. Folda, *ACHL* 1, p. 290.

81. Ibid., pp. 289–90.

82. For the latter, see Sabine, "Numismatic Iconography," pl. 17, 1; and Porteous, *The Slocum Collection*, p. 40, no. 288.

83. Numismatic iconography includes various protrusions from the sides of a tower, including references to attached fortification, usually lower down on the tower, diagonal elements usually interpreted as glacis, and these protrusions higher up and straight out from the side of the tower, with or without an L-shaped ending up or down. Two other coin types show the third type of protrusions: first, there is the coin of Roupen II of Cilician Armenia (1175–87), published by Paul Bedoukian. See P. Z. Bedoukian, "Coins of the Baronial Period of Cilician Armenia (1180–1198)," *American Numismatic Society: Museum Notes*, 12 (1966), pl. XLI, 9; and Porteous, *The Slocum Collection*, p. 60, no. 481. This protrusion goes straight out from the side. Second, there is a later coin of Philippe de Montfort at Tyre with the L-shaped protrusions; see Malloy, *Coins of the Crusader States*, p. 143, nos. 1a and 1b.

84. Folda, *ACHL* 1, pp. 334–7.

85. Sabine, "Numismatic Iconography," pp. 124–6, and although I cannot see or accept all of the elements he identifies (e.g., the winged angel or the skull), the basic idea of the superstructure seems in keeping with other familiar comparanda, considered in general terms. The question is, what exactly does that superstructure represent?

86. The coin types are mostly *Amalricus* deniers issued by Amaury and his successors from 1163 up to 1235. See Metcalf, *Coinage of the Crusades*, pl. 11. For examples of seals, see the later Hospitaller seals: G. Schlumberger, *Sigillographie de l'Orient Latin*, Paris, 1943, pls. XI, nos. 8, 11, 12, and XII; and E. J. King, *The Seals of the Order of St. John of Jerusalem*, London, 1932, pp. 8–19, pls. II and III. The 1187 coin reverse design in general seems to be an early version of what we find later on the seals or in the manuscripts, but the question is to what specifically the superstructure refers.

87. For a discussion of what we know about the aedicule, see M. Biddle, "The Tomb of Christ: Sources, Methods and a New Approach," *'Churches Built in Ancient Times,' Recent Studies in Early Christian Archaeology*, ed. K. Painter, London, 1994, pp. 73–147; L. Kötzsche, "Das Heilige Grab in Jerusalem un seine Nachfolge," *Jahrbuch für Antike und Christentum*, Ergänzungsband 20, 1, Akten des XII, Internationalen Kongresses für Christliche Archäologie, 1991, Münster, 1995, pp. 281–3; and J. Wilkinson, "The Tomb of Christ: An Outline of Its Structural History," *Levant*, 4 (1972), pp. 83–97. See also now, the new book of Martin Biddle, *The Tomb of Christ*, Phoenix Mill, 1999, pp. 89–119.

88. For the superstructure of the Church of the Holy Sepulcher and of the aedicule in illustrated manuscripts, see J. Folda, *Crusader Manuscript Illumination at Saint-Jean d'Acre, 1275–1291*, Princeton, 1976, pls. 23, 118, 126 (aedicule) and pls. 112, 129, 134, 140, 148, 158 (Church of the Holy Sepulcher); and Buchthal, *MPLKJ*, pl. 130a, 131i, 135f (aedicule) and pl. 131f, (Church of the Holy Sepulcher).

89. Metcalf, *Coinage of the Crusades*, pp. 66–7.

90. For the chapel frescoes at Margat and its history, see J. Folda with Pamela French and Pierre Coupel, "Crusader Frescoes at Crac des Chevaliers and Marqab Castle," *Dumbarton Oaks Papers*, 36 (1982), pp. 196–210, nn. 71–6, pls. 23–40. For the general history of the castle, see also Kennedy, *Crusader Castles*, pp. 163–79.

91. The dimensions of the northeast room are as follows: 3.43 meters long along the north wall × 1.635 meters wide at the west end and 2.69 meters wide at the east end.

92. Folda, "Crusader Frescoes," p. 207. The local comparisons are found in Qar'a, the Church of Sts. Sergius and Bacchus, at Amioun, the Church of Mar Phocas, and at Bahdeidat, the Church of Mar Tadros. See now for these frescoes, Y. Sader, *Peintures Murales dans des Eglises Maronites Médiévales*, Beirut, 1987, pp. 11–22 (Bahdeidat); for the extant fragments at Qar'a, E. C. Dodd, "The Monastery of Mar Musa al-Habashi, near Nebek, Syria," *Arte Medievale*, 6 (1992), p. 116, fig. 64; and L.-A. Hunt, "A Woman's Prayer to St Sergios in Latin Syria: Interpreting a Thirteenth-Century Icon at Mount Sinai," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 107–8, figs. 4 and 5. See also Erica Dodd's book on these frescoes, *Medieval Painting in the Lebanon* Wiesbaden, 2004, which has recently appeared.

93. Folda, "Crusader Frescoes," pp. 206–7.

94. Compare the apostles at Margat (Folda et al., "Crusader Frescoes," pp. 199–203, figs. 30–7) with those at Mar Musa (Dodd, "The Monastery of Mar Musa," pp. 97–107, figs. 40, 44–6).

95. Folda et al., "Crusader Frescoes," p. 203, fig. 38.

96. For somewhat later regional examples of these standing saints under arches, see the mid-thirteenth-century paintings at Qara, just north of Nebek, and the mid-thirteenth-century paintings in the Maronite Church of St. Theodore at Bahdeidat in Lebanon. See Dodd, "The Monastery of Mar Musa," pp. 116–17, figs. 64–5; and Sader, *Peintures Murales*, pp. 11–22.

97. Folda, "Crusader Frescoes," pp. 198–9.

98. Ibid., pp. 208–9.

99. On the dates of earthquakes, see D. H. Kallner-Amiran, "A Revised Earthquake Catalogue of Palestine," *Israel Exploration Journal*, 1 (1951), p. 228.

100. K. Molin, "The Non-Military Function of Crusader Fortifications, 1187–circa 1380," *Journal of Mediaeval History*, 23 (1997), p. 376.

101. Folda, *ACHL* 1, pp. 398–404.

102. Molin, "The Non-Military Functions of Crusader Fortifications," p. 369.

103. For the discussion of this part of the narrative, I am using the following works, besides the continuations of William of Tyre's History and the *Itinerarium Peregrinorum et Gesta Regis Ricardi*: Ambroise, *The Crusade of Richard Lion-Heart*, trans. H. J. Hubert, New York, 1941; Runciman, *A History of the Crusades*, vol. 3, pp. 3–75; S. Painter, "The Third Crusade: Richard the Lionhearted and Philip Augustus"; and E. N. Johnson, "The Crusades of Frederick Barbarossa and Henry VI," *HC* 2, pp. 45–122; H. E. Mayer, *The Crusades*, Oxford, 1988, pp. 137–51; J. Richard, *The Latin Kingdom of Jerusalem*, vol. A, Amsterdam, New York, Oxford, 1979, pp. 185–99; J. Prawer, *Histoire du Royaume Latin de Jérusalem*, vol. 2, Paris, 1970, pp. 9–68; J. Riley-Smith, *The Crusades, A Short History*, New Haven and London, 1987, pp. 109–18; and P. Cole, *The Preaching of the Crusades to the Holy Land: 1095–1270*, Cambridge MA, 1991, pp. 62–79; and J. Richard, *The Crusades, c. 1071–c. 1291*, trans. J. Birrell, Cambridge, 1999, pp. 216–42.

104. Lyon Eracles, *La Continuation*, p. 82.

105. Ibid., p. 84.

106. Not surprisingly it is the *Itinerarium Peregrinorum et Gesta Regis Ricardi*, p. 32, which records this point. The text is newly translated by H. J. Nicholson, *Chronicle of the Third Crusade*, Aldershot and Brookfield, 1997, p. 47.

107. C. Tyerman, *England and the Crusades, 1095–1588*, Chicago and London, 1988, pp. 74–80, 83–5.

108. The colorful story told in the Old French continuation about why Frederick chose to march overland, although fanciful, does indicate how unusual it was to choose the land instead of the sea route. Mayer attributes the choice to the unavailability of ships for the size of Frederick's army. Lyon Eracles, *La Continuation*, p. 98; Mayer, *The Crusades*, p. 140.

109. Lyon Eracles, *La Continuation*, p. 93, trans., Edbury, *The Conquest of Jerusalem*, p. 84.

110. The terms of this alliance are much debated, the details of which do not concern us here. Suffice it to say that Saladin and the Byzantine emperor found each other's support important in this period because of their common claims in regard to Syria-Palestine and their mutually held enmity, although on different levels, toward the Seljuks and the Franks. See Brand, "The Byzantines and Saladin," pp. 168–72, 181; and R.-J. Lilie, *Byzantium and the Crusader States, 1096–1204*, rev. edn., Oxford, 1993, pp. 230–41.

111. Brand, "The Byzantines and Saladin," p. 171. Brand notes that the weapons had all been captured from William II of Sicily in recent battle.

112. Rose, "The Native Christians of Jerusalem, 1187–1260," pp. 239–41; and Lilie, *Byzantium and the Crusader States, 1096–1204*, pp. 241–2.

113. Brand, "The Byzantines and Saladin," p. 171.

114. Ibid., pp. 171–2.

115. Ibid., p. 172.

116. Lyon Eracles, *La Continuation*, p. 85.

117. Lyon Eracles, *La Continuation*, 98, trans., Edbury, *The Conquest of Jerusalem*, p. 89.

118. R. D. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, eds. I. Corfis and M. Wolfe, I, Woodbridge, 1995, p. 87. The other cities mentioned – Latakia, Jabala, and Jubail – are in the County of Tripoli or the Principality of Antioch, and therefore not discussed by Pringle, who focuses on the Latin Kingdom.

119. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, p. 56, trans., Nicholson, *Chronicle of the Third Crusade*, p. 66.

120. Lyon Eracles, *La Continuation*, p. 98, trans., Edbury, *The Conquest of Jerusalem*, p. 88.

121. The vexed question of where and how Frederick I was buried in Tyre was the subject of intense investigation and debate in 1879 and 1880: J. N. Sepp, "Kaiser Friedrich Barbarossas Tod und Grab," *Sammlung gemeinverständlicher wissenschaftlicher Vorträge*, ser. 14, Heft 333, 1879; H. Prutz, *Kaiser Friedrichs I. Grabstätte. Eine kritische Studien*, Danzig, 1879; P. Scheffer-Boichorst, "Das Grab Barbarossas," first publ. 1879, reprt. *Gesammelte Schriften*, 2, 1905; J. N. Sepp, "Das Resultat der deutschen Ausgrabungen in Tyrus," *Historische Zeitschrift*, 44 (1880), pp. 86–109; and H. Prutz, "Replik," *Historische Zeitschrift*, 44 (1880), pp. 110–15.

122. Mayer, *The Crusades*, p. 142 and n. 71.

123. R. L. Nicholson, *Joscelyn III and the Fall of the Crusader States, 1134–1199*, Leiden, 1973, p. 176.

124. Lyon Eracles, *La Continuation*, p. 86. The sources seem to differ about the details of this episode. See Runciman *A History*, 2, pp. 462–3 and n. 4; idem, *A History*, 3, pp. 19–21; Nicholson, *Joscelyn III*, p. 181.

125. J. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem: 1174–1277*, London, 1973, pp. 113–14. Riley-Smith points out, however, that the sources refer to several different reasons why Conrad refused to yield Tyre to Guy.

126. Lyon Eracles, *La Continuation*, p. 89, trans., Edbury, *The Conquest of Jerusalem*, p. 81. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 63–72, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 71–80.

127. For descriptions of the siege, see Lyon Eracles, *La Continuation*, pp. 89–125; *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 61–232; R. Rogers, *Latin Siege Warfare in the Twelfth Century*, Oxford, 1992, pp. 212–36; Runciman, *A History*, 3, pp. 18–51.

128. Lyon Eracles, *La Continuation*, pp. 80–1.

129. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 71–2, trans., Nicholson, *Chronicle of the Third Crusade*, p. 80.

130. B. Z. Kedar, "A Western Survey of Saladin's Forces at the Siege of Acre," *Montjoie*, pp. 113–22. It should be noted that whereas most Western sources refer to the Turks as the main soldiers in the Muslim army, this text identifies the Kurds as the greatest fighters, perhaps, as Kedar points out, from firsthand experience at Acre. In any case Saladin was himself a Kurd.

131. B. Hamilton, "Women in the Cruader States: The Queens of Jerusalem (1100–1190)," *Medieval Women*, ed. D. Baker, Oxford, 1978, p. 172 and n. 146. Hamilton gives the date as 25 July 1190 and points out that Sybilla had had four daughters. It is not clear whether they all died at this time or whether two had predeceased her. Ernoul says Sybilla died with her four daughters (*Chronique d'Ernoul et de Bernard le Trésorier*, ed. L. de Mas-Latrie, Paris, 1871, p. 267).

It is not clear where Sibylla was buried. The favored burial site for Crusader queens before 1187 had been in the valley of Jehosaphat (Folda, *ACHL* I, p. 324), but obviously this was no longer available after 1187.

132. Lyon Eracles, *La Continuation*, p. 105.

133. Ibid., pp. 105–6. All the major sources have extensive discussion of this important episode: Paris Eracles, *RHC: Hist.Occ.* II, pp. 151–4, *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 119–23; trans., Nicholson, *Chronicle of the Third Crusade*, pp. 121–5; Ambroise, *The Crusade of Richard Lion-Heart*, trans. M. J. Hubert, New York, 1941, pp. 177–9; *Chronique d'Ernoul*, p. 267. See also the important study by H. E. Mayer, "Das Pontifikale von Tyrus und die Krönung der Lateinischen Könige von Jerusalem," *Dumbarton Oaks Papers*, 21 (1967), pp. 190–1.

134. D. Jacoby, "Conrad, Marquis of Montferrat, and the Kingdom of Jerusalem (1187–1192)," Atti del Congresso Internazionale, *Dai feudi Monferrini e dal Piemonte ai nuovi mondi oltre gli oceani*, Alessandria: Società di storia, arte

e archeologia, 1993, pp. 187–238, esp. pp. 187–201. This article discusses Conrad's dealings with the maritime powers of Pisa, Genoa, and Venice at some length.

135. Lyon Eracles, *La Continuation*, p. 107, trans., Edbury, *The Conquest of Jerusalem*, p. 97.

136. The famine was terrible during that winter. See *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 123–37; trans., Nicholson, *Chronicle of the Third Crusade*, pp. 126–37.

137. Lyon Eracles, *La Continuation*, p. 109, trans., Edbury, *The Conquest of Jerusalem*, p. 98. Note that at this point in the edition by M. R. Morgan (*La Continuation*, pp. 108, 109), she presents the text of the Lyon Eracles on the odd-numbered pages with the corresponding text of Florence Eracles on the even-numbered pages. See also Morgan, *La Continuation*, p. 108, n. 1.

138. Lyon Eracles, *La Continuation*, p. 111, trans., Edbury, *The Conquest of Jerusalem*, p. 99.

139. See Paris Eracles, *RHC: Hist. Occ.* II, pp. 188–90, *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 188–204, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 182–95, G. Hill, *A History of Cyprus*, vol. II, Cambridge, 1940, pp. 67–8; J. A. Brundage, "Richard the Lion-Heart and Byzantium," *Studies in Medieval Culture*, 6–7 (1970), pp. 64–6, 69, n. 19; S. Painter, "The Third Crusade: Richard the Lion-hearted and Philip Augustus," *HC* 2, pp. 63–4; and E. C. Furber, The Kingdom of Cyprus: 1191–1291," *HC* 2, pp. 600–2.

140. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 231–4; Lyon Eracles, *La Continuation*, pp. 123, 125; Florence Eracles, *La Continuation*, p. 124; Paris Eracles, *RHC: Hist. Occ* II, pp. 171–4, Ambroise, *The Crusade of Richard Lion-Heart*, pp. 193–218.

141. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 233–4, trans., Nicholson, *Chronicle of the Third Crusade*, p. 221. One wonders what these banners and flags looked like, what they were made of, how the heraldic arms were represented.

142. Baha ad-Din, *Sultanly Anecdotes*, in *Arab Historians of the Crusades*, p. 222.

143. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 234–5, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 221–2.

144. We would like to know the extent of the losses, and whether the images damaged or destroyed were frescoes, mosaics, panel paintings, enamels, metalwork, or some other medium. Who commissioned repairs for those images that could be saved; were replacements ordered for those that had been destroyed? What artists were available to carry out this work?

145. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, p. 195, trans., Nicholson, *Chronicle of the Third Crusade*, p. 188; Brundage, "Richard the Lion-Heart and Byzantium," pp. 65, 69 n. 13.

146. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 235–6, trans., Nicholson, *Chronicle of the Third Crusade*, p. 222; Ambroise, *The Crusade of Richard Lion-Heart*, pp. 210–11.

147. P. Perdrizet, "De la Véronique et de Sainte Véronique," *Seminarium Kondakovianum*, V (Prague, 1932), p. 3; A. Chastel, "The Legend of the Veronica," *FMR*, 67 (1999), pp. 29–30. There is, of course, an enormous bibliography of studies on the Veronica.

148. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, p. 240, trans. Nicholson, *Chronicle of the Third Crusade*, p. 227.

149. D. Jacoby, "Montmusard, Suburb of Crusader Acre: The First Stage of Its Development," *Outremer*, p. 211 and n. 33; Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, 1, pp. 81–2.

150. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 75–76, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 83–4.

This is an interesting observation about the rock that marks the juncture where the three parts of the world meet. When the pilgrims wrote about Jerusalem earlier in the twelfth century, they wrote about the center of the world being located in the Church of the Holy Sepulcher. See Folda, *ACHL* 1, pp. 213; 225; 537, n. 54; 543, n. 112; 546, n. 148; 557, n. 109. Now that Jerusalem is no longer in Crusader hands at the time the author of the *Itinerarium* was writing, the center of the world has been relocated in this account to a point outside of Acre.

151. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, p. 242, trans. Nicholson, *Chronicle of the Third Crusade*, p. 230.

152. Baha ad-Din, *The Life of Saladin, PPTS*, vol. 12, p. 271.

153. A Frolow, *La Relique de la Vraie Croix*, Paris, 1961, pp. 347–9, no. 377.

154. *Chronicle of the Third Crusade*, pp. 227, 229.

155. Jacques de Vitry, *The History of Jerusalem*, *PPTS*, vol. 11, p. 112.

156. The conventional figure is 2,700 Muslims killed (*Chronicle of the Third Crusade*, p. 231); Baha ad-Din says, "more than three thousand" (Baha ad-Din, The Life of Saladin, PPTS, 12, p. 273), and the Lyon Eracles says 16,000 were killed (*La Continuation*, p. 129).

157. Jacques de Vitry, *The History of Jerusalem*, PPTS, vol. 11, p. 113.

158. *Itinerarium Peregrinorum et Gesta Regis Ricardi*, pp. 249–50, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 236–7.

159. R. D. Pringle, *Secular Buildings in the Crusader Kingdom of Jerusalem*, Cambridge, 1997, pp. 43–5, no. 76, Caesarea was occupied by the Crusaders between 1101–87, and 1191–1265. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, 1, p. 89, p. 112, fig. 8. Pringle cites evidence that suggests that the twelfth-century walls had no outworks, except perhaps for a ditch, but were by no means as strong as the thirteenth-century fortifications built in 1217, 1228, and 1251–2. Caesarea illustrates the problem of assessing most of the Crusader work in 1191, because of later damage and rebuilding after the Third Crusade. The extant walls are mostly from the time of Louis IX, Pringle, ibid., pls. 5–10.

In the twelfth century, the "Sacro Catino" was found there and taken back to Genoa where it is found today in the cathedral treasury of St. Lawrence, but otherwise no twelfth-century Crusader art is known from there. See Folda, *ACHL* 1, p. 48, and the other bibliography is as follows: Avinoam Shalem, *Islam Christianized: Islamic Portable Objects in the Medieval Church Treasuries of the Latin West*, Frankfurt am Main, Berlin, Bern, New York, Paris, Vienna: Peter Lang, 1996 (Ph.D. diss., Edinburgh, 1995), pp. 73–4; I. M. Botto, "Region: Liguria, Genova," *Bulletin de l'Association Internationale pour l'Histoire du Verre*, 9 (1981–1983), pp. 109–11, T. E. Haevernick, "Zu einigen antiken Gläsern in Kirchenschätzen," *Trierer Zeitschrift für Geschichte und Kunst des Trierer Landes und seiner Nachbargebiete*, 36 (1973), pp. 113–16; C. Marcenato, *Il Museo del Tesoro della Cattedrale a Genova*, Milan, 1969, p. 6, tav. I; and M. Conway, "The Sacro Catino at Genoa," *Antiquaries Journal*, 4 (1924), pp. 11–18.

160. *Itinerarium Peregrinorum et Regis Ricardi*, p. 256, trans., Nicholson, *Chronicle of the Third Crusade*, p. 242.

161. Pringle, *Secular Buildings*, p. 20, no. 19, Arsuf, the town was in Crusader hands between 1101 and 1187 and 1191 and 1265. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," pp. 94–5 and 115, fig. 11.

162. Pringle, *Secular Buildings*, p. 21, no. 20, Ascalon, the town was in Crusader control from 1153 to 1187, in 1192, and from 1239 to 1247.

In the twelfth century, Byzantine-style fresco fragments from a small church have been discovered in excavations just inside the Jerusalem Gate: cf. Folda, *ACHL* 1, pp. 299, 561 n. 67. This is quite a fortuitous find given the destruction that Ascalon suffered.

163. R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. 1, Cambridge, 1993, pp. 208–20, nos. 92–4, Gaza, although a Crusader, a Greek Orthodox, and an Armenian church still stand from the medieval period, no evidence of medieval walls was found in the 1920 excavations.

The Crusader Church of St. John dates from the mid-twelfth century, and survives as the main mosque of the city: cf. also, Folda, *ACHL* 1, pp. 308–9.

164. Pringle, *Secular Buildings*, p. 46, no. 80, Dair al-Balah, castle built by King Amaury, lost to Saladin in 1187, retaken by Richard in 1191, and dismantled by Saladin in 1192.

165. Pringle, *Secular Buildings*, p. 84, no. 169, Qaratiya, only the remains of a tower is found there today.

166. Ibid., p. 93, no. 194, Tall as-Safi, castle with four towers originally built by King Fulk in 1142. On Blanchegarde, see also Folda, *ACHL* 1, p. 130.

167. Pringle, *Secular Buildings*, p. 52, no. 110, Jaffa, port town with walled castle and walled faubourg.

168. Ibid., pp. 108–9, no. 233, Yazur, castle with tower and enclosure walls, fortified by the Templars in 1191, dismantled by Saladin in August 1192.

169. Ibid., p. 26, no. 29, Bait Dajan, castle refortified by Richard I in 1191, destroyed by Saladin in August 1192.

170. R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. 2, Cambridge, 1998, pp. 9–27, nos. 137, 138, Lydda, the Cathedral of St. George was demolished by Saladin in 1191 over a ten-day period. The church appears to have remained in ruins through the thirteenth century (p. 13). On the Crusader

church at Lydda, see also, Folda, *ACHL* 1, p. 307.

171. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 181–99, no. 188–9, Ramla, the castle of Ramla was destroyed by Saladin in 1191, but the Crusader Church of St. John was apparently left standing. On the important Church of St. John, see also, Folda, *ACHL* 1, pp. 306–7.

172. Pringle, *Secular Buildings*, p. 96, no. 207, Suba, Hospitaller castle built *c.*1150 and destroyed in 1191.

173. Ibid., pp. 64–5, no. 136, Latrun, Templar castle existing by 1169–71 that was destroyed in 1191. There is no evidence of rebuilding in the thirteenth century.

Two extremely handsome Crusader capitals commissioned by the Templars that survived at Latrun are preserved today in the National Archaeological Museum in Istanbul. See Folda, *ACHL* 1, pp. 452–4.

174. Pringle, *Secular Buildings*, pp. 106–7, no. 231, Yalu, destroyed by Muslims in 1106, rebuilt in 1132–3, owned by the Templars by 1179, destroyed by Saladin in 1191. See also on Castellum Arnaldi, Folda, *ACHL* 1, p.123.

175. Pringle, *Secular Buildings*, pp. 32–3, no. 46, Belvoir Castle, Hospitaller castle held from 1168 to 1189, then by the Ayyubids until 1219.

Some extremely handsome figural sculpture commissioned by the Hospitallers in the early 1170s, which survived the Ayyubid occupation, is extant. See Folda, *ACHL* 1, pp. 393–8.

176. Pringle, *Secular Buildings*, pp. 67–8, no. 144, Majdal Yaba, castle for independent lordship from 1152 to 1187. Held by Ayyubids 1191–2 and probably not destroyed by Saladin despite what the *Itinerarium* says (p. 67).

177. Ibid., pp. 75–6, no. 157, Montreal, Crusader castle from 1115 to 1189, significant Ayyubid and Mamluk additions. See also on Montreal Folda, *ACHL* 1, pp. 69–70.

178. *Itinerarium Peregrinorum et Regis Ricardi*, p. 280, trans., Nicholson, *Chronicle of the Third Crusade*, p. 261. Farther north, the walls of Sidon were also destroyed. Pringle, *Secular Buildings*, pp. 94–5, no. 201, Sidon, the city was in Crusader hands between 1110 and 1187, held by the Muslims from 1187 to 1192, held jointly from 1192 to 1227, Crusader from 1227 to 1249, Muslim 1249–50, and Crusader from 1250 to 1291; Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, 1, p. 88 and n. 137.

179. Baha ad-Din, *Life of Saladin*, trans. C. W. Wilson, *PPTS*, 13, p. 297.

180. R. D. Pringle, "King Richard I and the Walls of Ascalon," *Palestine Exploration Quarterly*, 116 (1984), p. 136.

181. The most extensive archaeological work on Crusader Jaffa and the other sites in the Latin Kingdom mentioned by the *Itinerarium* and elsewhere has been done by Denys Pringle in the following publications: Pringle, *Secular Buildings in the Crusader Kingdom of Jerusalem*, Cambridge, 1997; idem, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, 1, 1995, pp. 69–115; idem, "Towers in Crusader Palestine," *Chateau-Gaillard: Etudes de castellologie médiévale*, vol. 16, *Actes du colloque internationale tenu à Luxembourg*, 1992, pp. 335–60; idem, "Belvoir Castle," in *The Dictionary of Art*, ed. J. S. Turner, vol. 3, London, 1996, pp. 691–2; idem, "King Richard I and the Walls of Ascalon," *Palestine Exploration Quarterly*, 116 (1984), pp. 133–47; idem, *The Red Tower*, London, 1986. He is also publishing, *The Churches in the Crusader Kingdom of Jerusalem*, vol. 1, Cambridge, 1993, vol. 2, Cambridge, 1998, vol. 3, in progress.

182. *Itinerarium*, pp. 289–90, trans., Nicholson, *Chronicle of the Third Crusade*, p. 268.

183. *Itinerarium*, p. 296, trans., Nicholson, *Chronicle of the Third Crusade*, p. 273.

184. *Itinerarium*, pp. 308–9, trans., Nicholson, *Chronicle of the Third Crusade*, p. 283.

185. *Itinerarium*, p. 312, trans., Nicholson, *Chronicle of the Third Crusade*, p. 286.

186. *Itinerarium*, pp. 315–17, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 288–9.

187. Pringle, "King Richard I and the Walls of Ascalon, pp. 133–4. The inscription today is extant in two pieces, both located in the Institute of Classical Archaeology, University of Oslo. This inscription was previously published by S. de Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, Jerusalem, 1974, pp. 305–6, no. 407, but de Sandoli thought the inscription came from Acre and dated it to the mid-thirteenth century.

188. Pringle, "King Richard I and the Walls of Ascalon," pp. 137–8.

189. Ibid., pp. 140–2, with a table (table 1) describing the masonry as located on a map of the city walls (fig. 4).

190. Ibid., figs. 5 and 6, and Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," pls. 1–3.

191. Baha ad-Din, *Life of Saladin*, *PPTS*, 13, pp. 327–9.

192. It was on the Saturday before Easter that the *Itinerarium* records a curious story of Saladin at the Holy Sepulcher. Saladin had brought Christian prisoners to the Holy Sepulcher to see if the story of the Holy Fire was true. When the fire ignited, Saladin had it put out twice, and twice it was miraculously restored. "The sultan was astonished and painfully moved by the sight of this miracle.... Inspired by a prophetic spirit, he declared firmly: 'Without doubt, either I will soon leave this life, or I will lose possession of this city'" (*Itinerarium*, p. 328, trans., Nicholson, *Chronicle of the Third Crusade*, p. 297). Saladin died less than a year later, 4 March 1193.

This is not the only miracle that Saladin is reported to have witnessed. P. Cole has discovered in a letter written to Frederick Barbarossa by unnamed ecclesiastical officials in the Latin Kingdom in July 1187, a story of how Saladin attempted to burn the relic of the True Cross after its capture at Hattin. The relic, however, jumped out of the flames undamaged. Saladin recognized the miracle and ordered that the relic be put into his treasury for safekeeping (P. Cole, "Christian Perceptions of the Battle of Hattin (583/1187)," *Al-Masaq*, 6 (1993), pp. 10–11).

193. For the council and subsequent events, see *Itinerarium*, pp. 334–51, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 302–14. See also B. Hamilton, "King Consorts of Jerusalem and Their Entourages from the West from 1186 to 1250," *Die Kreuzfahrerstaaten als multikulturelle Gesellschaft*, ed. H. E. Mayer, *Schriften des Historischen Kollegs*, Kolloquien 37, Munich, 1997, pp. 14–15.

194. Although the Latin kings had been crowned in Jerusalem before 1187, when the Holy City was no longer available, Tyre, as the second city of the realm, was the site of choice. The archbishop of Tyre was second in rank to the patriarch of Jerusalem in the Latin Kingdom. See H. E. Mayer, "Das Pontifikale von Tyrus und die Krönung der lateinischen Könige von Jerusalem," *Dumbarton Oaks Papers*, 21, 1967, pp. 191, 192; and J. Prawer, *The Latin Kingdom of Jerusalem*, London, 1972, p. 101.

195. On the background of this, and the later sale of Cyprus to Guy de Lusignan, see J. Riley-Smith, "The Crusading Heritage of Guy and Aimery of Lusignan," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 40–1.

196. Mayer, "Das Pontifikale von Tyrus," pp. 191–2.

197. P. Edbury, *The Kingdom of Cyprus and the Crusades: 1191–1374*, Cambridge, 1991, p. 28. See also Brundage, "Richard the Lion-Heart and Byzantium," pp. 69–70, n. 19.

198. *Itinerarium*, p. 362, trans., Nicholson, *Chronicle of the Third Crusade*, p. 323.

199. *Itinerarium*, p. 376, trans., Nicholson, *Chronicle of the Third Crusade*, p. 333.

200. *Itinerarium*, pp. 377–8, trans., Nicholson, *Chronicle of the Third Crusade*, p. 334.

201. *Itinerarium*, p. 408, trans., Nicholson, *Chronicle of the Third Crusade*, p. 355.

202. *Itinerarium*, pp. 427–9, trans., Nicholson, *Chronicle of the Third Crusade*, p. 371; Baha ad-Din, *The Life of Saladin*, *PPTS*, 13, pp. 380–7. Al-Maqrizi (*A History of the Ayyubid Sultans of Egypt*, ed. R. J. C. Broadhurst, Boston, 1980, p. 97) says three years and three months. The continuations only say ten years: Lyon Eracles and Florence Eracles, *La Continuation*, pp. 153 and 152, respectively. The terms of this treaty are reported slightly differently by the various sources, in the absence of the actual text of the diplomatic instrument. This is a constant problem, but the terms of these treaties with their truces must be understood in terms of Muslim diplomatic principles. See the useful discussion in P. H. Holt, *Early Mamluk Diplomacy (1260–1290)*, Leiden, New York, Köln, pp. 1–11.

203. *Itinerarium*, pp. 432–8, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 374–9, Ambroise, *The Crusade of Richard Lion-Heart*, pp. 433–43.

204. *Itinerarium*, p. 438, trans., Nicholson, *Chronicle of the Third Crusade*, pp. 378–9. It is interesting that after March 1192, the Crusaders do not continue to attempt to include the return of the relic of the True Cross as part of their terms in the negotiations with Saladin for the settlement of the Crusade expedition. Of course in June Richard is the beneficiary of the return of two relics of the True Cross while in camp at Beit Nuba, and the pilgrims who go to Jerusalem after the truce is signed are allowed to see and venerate the relic in the Church of the Holy Sepulcher.

205. *Itinerarium*, p. 436, trans., Nicholson, *Chronicle of the Third Crusade*, p. 377. One wonders to which place the *Itinerarium* is referring

in this last reference: Is it the chapel of the Repose along the street of Jehosaphat, or is it the "Prison of Christ" in the northeast corner of the Church of the Holy Sepulcher, where the Muslims were now stabling their horses? See Folda, *ACHL* 1, pp. 318–21, or pp. 194, pl. 7.3n; 204, 208–9 pls. 7.6h–k; 536 n. 33, respectively.

206. Ambroise, *The Crusade of Richard Lion-Heart*, p. 440.

207. Rothelin Eracles, *RHC: Hist. Occ.* II, p. 490, trans., J. Shirley, *Crusader Syria in the Thirteenth Century*, Aldershot and Brookfield, 1999, p. 9.

208. *Chronique d'Ernoul et de Bernard le Trésorier*, ed. L. de Mas Latrie, Paris, 1871, pp. 189–210; H. Michelant and G. Raynaud, *Itinéraires à Jérusalem, Descriptions de la Terre Sainte*, Geneva, 1882, pp. 29–52. See also M. R. Morgan, "The Rothelin Continuation of William of Tyre," *Outremer*, p. 249.

An edition of "La Citez de Jherusalem" from 1187 is also published by M. de Vogüé, ed., *Les Eglises de la Terre Sainte*, Paris, 1860, rpt. Toronto, 1973, ed. J. Prawer, pp. 433–51. This text is distinct from the text known as the *De Situ Urbis Jerusalem*..., apparently written in the 1150s, and also published by M. de Vogüé, ed., in *Les Eglises de la Terre Sainte*, Paris, 1860, rpt. Toronto, 1973, ed. J. Prawer, pp. 412–33.

209. Rothelin Eracles, *RHC: Hist. Occ.* II, pp. 490–507, "Livre des Assises de Jerusalem," *RHC: Lois* II, pp. 531–4. These later versions have received two additional sections to the basic text, and there are other longer supplements to be found as well. We shall consider the content of these supplementary descriptions of Jerusalem and the Holy Land at the appropriate moment when discussing developments in 1229 and later.

There is an earlier edition by T. Tobler, *Descriptiones Terrae Sanctae*, Leipzig, 1874, pp. 196–224. This edition merges the text found in Ernoul with that of the continuations to 1261.

210. "The City of Jerusalem," trans. C. R. Conder, *PPTS* 6, pp. 1–49, and J. Shirley, trans., *Crusader Syria in the Thirteenth Century: The Rothelin continuation of the History of William of Tyre with part of the Eracles or Acre continuation*, Aldershot and Brookfield, 1999, pp. 9–19.

211. Folda, "Manuscripts of the *History of Outremer* by William of Tyre: A Handlist," *Scriptorium*, 27 (1973), p. 93, nos. 16–26.

212. Ibid., pp. 94–5, nos. 52–78.

213. Folda, *ACHL* 1, pp. 404–6.

214. The Rothelin Eracles, *RHC: Hist. Occ.* II, p. 495, states: "Au chevez de cel monument comme au chief de l'autel par deforz a un autel c'on apele Cavet." I interpret this to mean that in the chevet of the church (i.e., the choir and apse with ambulatory and radiating chapels at the east end) there was an altar called "Cavet," which, as the author goes on to explain, was used to sing Mass at dawn each day. The language here appears to be Picard.

215. See Folda, *ACHL* 1, p. 213.

216. The True Cross chapel of the Syrians was located between the aedicule and the prison of Christ. See Folda, *ACHL* 1, p. 391. It is particularly curious that there is no mention of the Syrian chapel because of the fact that initially Saladin is said by some sources to have allowed Syrian clergy alone to conduct services at the Church of the Holy Sepulcher, and the *Itinerarium* and *Ambroise* both report a Syrian bishop brought a relic of the True Cross to Richard in 1192.

217. Rothelin Continuation, *RHC: Hist. Occ.* II, p. 500, trans., Shirley, *Crusader Syria in the Thirteenth Century*, p. 18.

218. Rothelin Continuation, *RHC: Hist. Occ.* II, p. 504, trans., Shirley, *Crusader Syria in the Thirteenth Century*, pp. 20–1. This is an interesting claim, but the fact is Byzantine mosaics with the head of Adam imagery are known from at least as early as the eleventh century. It is true that whereas the *c.*1135 Crucifixion image in the Melisende Psalter (ACHL 1, pl. 6.80) does not have the head of Adam, certain – but not all – thirteenth-century Crusader missals and sacramentaries do. See the Sacramentary, B. L. MS Egerton 2902, fol. 14v, and the Perugia Missal, Perugia, Bibl. Capit. MS 6, fol. 182v. The head of Adam also appears in certain Crusader icons now at Sinai. See Sinai icon panel, no. 103, Gp 3-1/1732 and the image on an iconostasis beam, no. 104 B. Gp 3-4/1745 "Crucifixion." These works are all discussed in Chapters 6 and 7 of this volume.

219. Rothelin Continuation, *RHC: Hist. Occ.* II, p. 505, trans., Shirley, *Crusader Syria in the Thirteenth Century*, p. 22.

220. Besides the Tomb of the Virgin, there were other royal tombs (e.g., that of Queen Melisende of Jerusalem) in this abbey Church of St. Mary. Despite Saladin's destruction of the abbey in 1187, neither these tombs nor the church were touched. See Folda, *ACHL* 1, pp. 324–8.

221. Rothelin Continuation, *RHC: Hist. Occ.* II, p. 506, trans., Shirley, *Crusader Syria in the Thirteenth Century*, p. 18.

222. Rothelin Continuation, *RHC: Hist. Occ.* II, p. 507, trans., Shirley, *Crusader Syria in the Thirteenth Century*, pp. 18–19.

223. See below, Chapter 5, notes 285–301.

224. It would be worth checking the archival collections in Malta to see if any additional manuscripts of this text could be found. I am indebted to J. Riley-Smith for this suggestion.

225. "Acre Archive," *Sotheby's Sale Catalogue of Western Manuscripts*, London, 23 June 1987, pp. 28–35.

226. Ibid., p. 28.

227. Ibid., pp. 32–35.

228. H. Pinoteau, "Une coupe héraldique trouvée en Syrie," *Bulletin de la Société Nationale des Antiquaires de France*, 1984, pp. 158, 161, trans. as, "Heraldische Untersuchungen zum Wappenpokal," in T. Ulbert, *Resafa III*, Mainz am Rhein, 1990, pp. 79, 80.

229. See our discussion of this remarkable piece of secular metalwork, along with other important pieces of liturgical silver in the Resafa hoard, in Chapter 3.

230. A useful introductory essay to the coinage of this period is by D. M. Metcalf, "Describe the currency of the Latin Kingdom of Jerusalem," *Montjoie*, pp. 189–98, esp. pp. 193–4 for the period 1187–92.

231. Metcalf, *Coinage of the Crusades*, pp. 66–71; J. Porteous, "Crusader Coinage with Greek or Latin Inscriptions," *HC* 6, pp. 377–87; A. Malloy, I. F. Preston, and A. J. Seltman, *Coins of the Crusader States: 1098–1291*, New York, 1994, pp. 57–8. See also R. Pesant, "The *Amalricus* coins of the Kingdom of Jerusalem," *Coinage in the Latin East, The Fourth Oxford Symposium on Coinage and Monetary History*, eds. P. Edbury and D. M. Metcalf, Oxford, 1980, pp. 105–21. Pesant inclines to the view that the immobilized "Amalricus" deniers as a type ended in 1187, but D. M. Metcalf, in the discussion published with this paper, pp. 116–20, argues that they very likely continued into the early thirteenth century.

232. See especially the views of D. M. Metcalf cited in n. 230.

233. Metcalf, *Coinage of the Crusades*, p. 65.

234. Metcalf, *Coinage of the Crusades*, pp. 71, 177–80; Porteous, "Crusader Coinage," p. 398, no. 49.

248. Porteous, "Crusader Coinage," p. 381.

249. Metcalf, *Coinage of the Crusades*, pp. 75–7, pl. 9, no. 146 (uncertain date); Porteous, "Crusader Coinage," pp. 380, 398 (c. 1190); Malloy et al., *Coins of the Crusader States*, p. 82 (1231–43); and L. Y. Rahmani, "Two Hoards of 'Moneta Regis' Coins Found in Northern Israel," *Israel Numismatic Journal*, 4 (1980), pp. 72–6 (*c.*1190–*c.*1), with the older bibliography. This coin type was first published by M. de Vogüé, "Monnaies inédites des Croisades," *Revue Numismatique*, 10

(1865), pp. 296–300, pl. XIII, no. 4; and G. Schlumberger, *Numismatique de l'Orient Latin*, Paris, 1879, pp. 90–2.

250. For the denier, see Folda, *ACHL* 1, pp. 170–1, and 530, n. 173; for the seals of the Hospitaller grand masters, see E. J. King, *The Seals of the Order of St. John of Jerusalem*, London, 1932, pp. 8–16, pl. II.

251. On the importance of the True Cross for the Crusaders in the twelfth century, see Folda, *ACHL* 1, pp. 29, 43, 49, 83, 97, 240, and 487, n. 28; 489, n. 35; 490, n. 9; 499, n. 75; 519, n. 26. See also the recent articles by Alan Murray, "'Mighty against the Enemies of Christ': The Relic of the True Cross in the Armies of the Kingdom of Jerusalem," *The Crusades and Their Sources*, Aldershot and Brookfield, 1998, pp. 217–38; and Deborah Gerish, "The True Cross and the Kings of Jerusalem," *The Haskins Society Journal*, 8 (1996), pp. 137–55.

252. P. Cole, "Christian Perceptions of the Battle of Hattin (583–1187)," *Al-Masaq*, 6 (1993), pp. 9–39.

253. One of the early examples of the cross with the alpha and the omega is found in the well-known apse mosaic of Sant' Apollinare in Classe from the mid-sixth century.

254. A. Frolow, *Les Reliquaires de la Vraie Croix*, Paris, 1965; and Folda, *ACHL* 1, pp. 97–100, 167–9, 290–4, 293, 392.

255. King, *The Seals of the Order of St. John of Jerusalem*, pls. II and IV; and Schlumberger, *Sigillographie de l'Orient Latin*, p. 101, pl. XX, 11. Bishop John of Acre used this iconography on his seal, but all other bishops of Acre up to Jacques de Vitry appear to use the double-armed cross with a crescent and a star below: cf. pp. 102–4, pl. XX, 9. Whatever the specific iconography of the bishop's seal, however, it is evident that the cross depicted was the True Cross because the Cathedral of Acre was dedicated to the Holy Cross.

Folda, "Reflections on Art in Crusader Jerusalem about the Time of the Second Crusade: c. 1140–c. 1150," *The Second Crusade and the Cistercians*, ed. M. Gervers, New York, 1992, pp. 171–82.

275. C. Morris, "Picturing the Crusades: The Uses of Visual Propaganda, c. 1095–1291," *The Crusades and Their Sources*, eds. J. France and W. G. Zajac, Aldershot and Brookfield, 1998, p. 195. On preaching the Crusades and Crusade propaganda, see also P. Cole, *The Preaching of the Crusades to the Holy Land, 1095–1270*, Cambridge MA, 1991, pp. 62–78; N. Daniel, "Crusade Propaganda," *HC* 6, pp. 39–97; and see now C. T. Maier, *Crusade Propaganda and Ideology: Model Sermons for the Preaching of the Cross*, Cambridge, 2000.

276. This is a remarkable interpretation of the image. One wonders what the tradition was, or even if there was any tradition, in Islam for the depiction of Muhammed.

277. Ibn al-Athir, *The Perfect History*, in *Arab Historians of the Crusades*, pp. 182–3; and Morris, "Picturing the Crusades," p. 197. Morris refers to the likelihood that placards were employed in recruiting. P. Cole does not comment on this aspect of preaching the Crusades.

278. Baha ad-Din, *Sultanly Anecdotes*, in *Arab Historians of the Crusades*, pp. 208–9; and Morris, "Picturing the Crusades," p. 197.

279. See n. 68 and the discussion on the whereabouts of Heraclius after he left Jerusalem.

280. We can also imagine other possible paintings for materials stimulated by the fall of Jerusalem in 1187. In view of the new liturgies created for the Third Crusade, what laments appear and what illustrations, if any, appear to illustrate these laments? What holy images are used in these liturgies? Are there new liturgical texts with Gregory's new prayers? Are any of these texts decorated?

281. See L.-A. Hunt, "'Excommunicata Generatione': Christian Imagery of Mission and Conversion of the Muslim Other between the First Crusade and the Early Fourteenth Century," *Al-Masaq*, 8 (1995), pp. 92, 103–6, figs. 8, 20–2.

282. M. A. Kohler, *Allianzen und Verträge zwischen fränkischen und islamischen Herrschern im Vorgeren Orient*, Berlin and New York, 1991. See also J. Riley-Smith ("King Fulk of Jerusalem and 'the Sultan of Babylon'," *Montjoie*, Aldershot, 1997, pp. 55–66), who discusses an important Egyptian diplomatic mission to Jerusalem in 1131.

283. See n. 10.

284. See n. 144.

285. See n. 203.

286. We have seen this explicitly in the diplomatic exhanges between Saladin and the Byzantine emperor referred to above. See nn. 112, 113.

287. A. Cutler is at work on a study of diplomatic gifts in regard to Byzantium and the Muslims in this period, which will be of great value for our inquiry. See, for example, an early article on this subject, "Les Échanges de Dons entre Byzance et l'Islam (IXe-Xie Siècles), *Journal des Savants*, Janvier-Juin, 1996, pp. 51–66, and note the references on p. 52, n. 2; see now, idem, "Gifts and Gift Exchange as Aspects of the Byzantine, Arab, and Related Economies," *Dumbarton Oaks Papers*, 55 (2001), pp. 245–76.

288. See n. 7.

289. See nn. 142, 152.

290. See nn. 201, 202.

291. See n. 204. This was according to Saladin, the relic he had captured at Hattin and which he would not return to the Crusaders.

292. We do not know when this would have happened. The new patriarch, Aimery, named following the death of Heraclius in 1190, did not take office until 1197. Possibly the new bishop of Acre, Theobald, elected in August 1191, could have put the relic(s) in place.

293. King, *The Seals of the Order of St. John of Jerusalem*, pls. II, III. King notes only that the on the seal of Garin de Montaigu, the base of the cross is "triangular" (p. 12), but on later seals, such as that of Nicholas le Lorgne, he identifies the skull of Adam under the cross instead of seeing it as a stand for the reliquary (p. 14). In regard to this question, I invite the reader to study the photographic reproductions of the seals on these two plates in contrast to the older and somewhat unreliable line drawings on pl. IV.

294. On this question we must recall that there are few records of reliquaries being sent to Europe from the Holy Land between 1187 and 1192, as noted earlier.

295. Lyon Eracles, *La Continuation*, pp. 32–3, trans. Edbury, *The Conquest of Jerusalem*, p. 26. In this text the word used is "tresor" for the place where the crowns were kept. This implies both a room and a box or trunk within the room.

296. Rose, "The Native Christians of Jerusalem, 1187–1260," pp. 242–3. See also J. Prawer, "Social Classes in the Crusader States: The 'Minorities'," *HC* 5, pp. 65–82.

297. C. Cahen, "Indigènes et Croisés," Syria, 15 (1934), pp. 351–60, cited by Hamilton, *The Latin Church in the Crusader States*, p. 186.

298. The work of Lucy-Anne Hunt and Robert Nelson will be important in our quest to identify such work. See, for example, L.-A. Hunt, "Eternal Light and Life: A Thirteenth-Century Icon from the Monastery of the Syrians, Egypt, and the Jerusalem Pascal Liturgy," *Jahrbuch der Österreichischen Byzantinistik*, 43 (1993), pp. 349–66, and R. Nelson, "An Icon at Mount Sinai and Christian Painting in Muslim Egypt during the 13th and 14th Centuries," *AB*, 65 (1983), pp. 201–18.

299. See Folda, *ACHL* 1, pp. 350–7.

300. See O. Demus, *Byzantine Art and the West*, New York, 1970, pp. 133–60, 163–95, 205–18; K. Weitzmann, "Byzantium and the West around the Year 1200," *The Year 1200: A Symposium*, New York, 1975, pp. 53–93.

301. Runciman, *A History of the Crusades*, 3, pp. 52, 74.

302. *MGH, Scriptores*, vol. XXVI, p. 131, quoted in P. Perdrizet, "De la Véronique et de sainte Véronique," *Seminarium Kondakovianum*, V (Prague, 1932), pp. 1–15, esp. p. 3.

303. On the Veronica, see, in addition to Perdrizet, mentioned earlier, the fundamental studies of K. Pearson, *Die Fronica, ein Beitrag zur Geschichte des Christusbildes im Mittelalter*, Strassburg, 1887; and E. von Dobschütz, *Christusbilder: Untersuchungen zur christlichen Legende*, Leipzig, 1899. See also the recent discussions of the Veronica tradition along with other important material by Ian Wilson and Eva Kuryluk.

304. For information on the Latin Church after 1187, see Hamilton, *The Latin Church in the Crusader States*, pp. 243–5.

305. My comments in this paragraph are based on the ideas of R. Ellenblum, *Frankish Rural Settlement in the Latin Kingdom of Jerusalem*, Cambridge, 1998, p. 279.

307. The "T'iaysi" are interpreted to be the people of Thrace by Dulaurier. See ibid., p. 64, n. 2.

308. Weitenberg, "Literary Contacts in Cilician Armenia," pp. 63–4, lines 784–1.

CHAPTER 3: THE ESTABLISHMENT OF ACRE AS THE CAPITAL OF THE LATIN KINGDOM OF JERUSALEM FOLLOWING THE THIRD CRUSADE

1. The terms of the Treaty of Jaffa vary in the reports. Some sources say the truce was to last for three years and three months. See Chapter 2, n. 202. Meanwhile, there was a separate truce signed in 1192 by Bohemond III and Saladin in the north, for ten years.

2. G. J. Wightman, *The Walls of Jerusalem*, Mediterranean Archaeology suppl. 4, Sydney, 1993, p. 277.

3. The years 1192–7 in the Crusader States are given relatively brief attention in the sources, such as the Lyon Eracles (*La Continuation*, pp. 155–99) and the Paris Eracles (*RHC: Hist. Occ.* II, pp. 200–19) and in the major secondary studies. Useful discussions are found by S. Runciman, *A History of the Crusades*, 3, pp. 76–100; J. Prawer, *Histoire du Royaume Latin de Jérusalem*, 2, Paris, 1970, pp. 101–17; and M. N. Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 522–30.

4. H. E. Mayer, "Das Pontifikale von Tyrus und die Krönung der lateinischen Könige von Jerusalem," *Dumbarton Oaks Papers*, 21 (1967), pp. 191–2. Henry's marriage to Isabel was regarded as bigamous.

5. The fact is that although Isabel was the legitimate heir to the throne, she had not yet been crowned and would not be until 1198.

6. Lyon Eracles, *La Continuation*, p. 159; J. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, London, 1973, pp. 153–4; Runciman, *A History of the Crusades*, 3, pp. 83–4; Hardwicke, "The Crusader States, 1192–1243," pp. 524–5; M.-L. Favreau-Lilie, *Die Italiener im Heiligen Land, 1098–1197*, Amsterdam, 1989, pp. 312–15.

7. Baha ad-Din, *Arab Historians of the Crusades*, p. 252. Despite his great power and influence as sultan, Saladin was a man of modest personal means. His modern tomb, put there by Kaiser Wilhelm II, hardly reflects the reality of the man Saladin was. The tomb is partially illustrated in M. Billings, *The Cross and the Crescent*, New York, 1990, p. 123.

8. Baha ad-Din, *Arab Historians of the Crusades*, p. 251. M. C. Lyons and D. E. P. Jackson (*Saladin: The Politics of the Holy War*, Cambridge, 1982, p. 374) quote a slightly different translation of the last part of this text: "I have heard people say that they would like to ransom those dear to them with their own lives, but this has only been said figuratively in my hearing, except on the day of his death. For I know that had our sacrifice been accepted, I and others would have given our lives for him."

9. King Fulk was fifty-three at his death; Baldwin III, thirty-three; Amaury I, thirty-eight; Baldwin IV, twenty-four; Baldwin V, nine. H. E. Mayer, *The Crusades*, Oxford, 1988, p. 163. At this date, 1193, the ex-king, Guy de Lusignan, was still alive but in Cyprus, and Conrad of Montferrat had been assassinated before he could be crowned.

10. Both the Lyon Eracles and the Florence Eracles (*La Continuation*, pp. 172, 173) say 1195, but the Lyon Eracles also was mistaken about the date of the death of King Guy de Lusignan, placing it one year after the fact. The Paris Eracles (*RHC: Hist. Occ.* II, pp. 217, 218) says 1197, and the Noailles Eracles (=Paris, MS fr. 9082, Beugnot's MS "G", *RHC: Hist. Occ.* II, p. 211) also says 1195. Ernoul (*Chronique d'Ernoul*, p. 304) says 1197.

11. The formula of the oath was the following:

> First, from this moment I dedicate and consecrate all my deepest feelings to al-Malik an-Nasir for as long as he lives, binding myself to sacrifice in the defence of his state myself, my possessions, my sword and my men, in obedience to his orders and awaiting his pleasure; and after him to his son al-Afdal 'Ali and his heirs. In God's name I shall be loyal to him, defend his state and territory with my person, my wealth, my sword and my men, and obey his command and prohibition. This I both profess openly and inwardly adhere to. God is the guarantee of what I say. (Baha ad-Din, *Sultanly Anecdotes*, *Arab Historians of the Crusades*, pp. 249–50)

The oath was said with reference to Al-Afdal in Syria before Saladin died, but other family members controlled Egypt to the south and Aleppo to the north. Thus the disintegration of Saladin's hold on power as Ayyubid Sultan began.

12. The consecration of Monachus presumably took place in the Church of the Holy Cross in Acre, but the ceremony is not located or described in the sources. This church would serve as the cathedral for both the patriarch and the bishop of Acre after 1191.

13. The incident between Henry and the canons is recorded in the Lyons Eracles (*La Continuation*, p. 161), the Florence Eracles (*La Continuation*, p. 160), and the Noailles Eracles (*RHC: Hist. Occ.* II, pp. 203–5). There is discussion in the following secondary studies: Runciman, *A History of the Crusades*, 3, pp. 82–3; Hardwicke, "The Crusader States, 1192–1243," pp. 525–6; B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 244–5. P. Edbury examines the whole case in a larger context and comments on the confusion over the name of the new patriarch, Monachus not Aimery, in "William of Tyre and the Patriarchal Election of 1180," *The English Historical Review*, 93 (1978), pp. 14–18. The use of this name, Monachus, is also supported by H. E. Mayer, "Die Nachfolge des Patriarchen Monachus von Jerusalem," *Basler Zeitschrift für Geschichte und Altertumskunde*, 74, (1974), pp. 109–30.

14. Lyon Eracles, *La Continuation*, pp. 159, 161.

15. See discussion in Chapter 2.

16. Lyon Continuation, *La Continuation*, p. 177; Runciman, *A History of the Crusades*, 3, pp. 84–5; G. Hill, *A History of Cyprus*, II, pp. 44, 57–8.

17. Runciman, *A History of the Crusades*, 3, p. 84.

18. Lyon Eracles, *La Continuation*, p. 171; Florence Eracles, *La Continuation*, p. 170, C. Cahen, *La Syrie du Nord à l'Époque des Croisades et la Principauté Franque d'Antioche*, Paris, 1940, pp. 582–8; Runciman, *A History of the Crusades*, 3, pp. 87–9; Hardwicke, "The Crusader States, 1192–1243," pp. 526–7; and R. W. Edwards, *The Fortifications of Armenian Cilicia*, Washington, DC, 1987, pp. 7–9.

19. On Baghras Castle, see R. W. Edwards, "Bagras and Cilician Armenia, *Revue des Etudes Arméniennes*, n.s. 17 (1983), pp. 415–32, with the older literature on p. 416, n. 1, and plates on pp. 433–55. The important findings of Edwards's survey are the paucity of Armenian masonry and construction on this castle site and the fact that Baghras is isolated, lacking intervisibility with any other fortification. But even if it was not regarded as a major fortress in the defense of Cilician Armenia to the north, it was of major importance in the defense of nearby Antioch to the south and west. See also H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 142–4;

and W. Müller-Wiener, *Burgen der Kreuzritter*, Munich/Berlin, 1966, pp. 48–9.

20. Lyon Eracles, *La Continuation*, p. 171. We are not given any details about what specifically these gifts may have been.

21. Paris Eracles, *RHC: Hist. Occ.* II, p. 209.

22. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, p. 31; Hill, *A History of Cyprus*, II, pp. 48–9.

23. Paris Eracles, *RHC: Hist. Occ.* II, p. 212; Ernoul, *Chronique d'Ernoul*, pp. 302–3, Edbury, *The Kingdom of Cyprus*, pp. 31–2, Hill, *A History of Cyprus*, II, p. 49. Henry VI died on 28 September.

24. Cahen, *La Syrie du Nord*, pp. 585–90.

25. Lyon Eracles, *RHC: Hist. Occ.* II, p. 221.

26. Ibid. Since the Old French says "le Change" this means the exchange, presumably the main market, not the *cathena*. The *Chronicle of Ernoul* (p. 307), says only, "Si enfoirent le cors el moustier Sainte Crois."

We have no information on what Henry's sepulcher looked like. Quite possibly his family may have wished to emulate and evoke the tombs of the Crusader kings before 1187 in the Church of the Holy Sepulcher at his burial site in the Church of the Holy Cross in Acre. On the other hand, as we shall see, in the thirteenth-century burials with plaques containing figures inscribed or in low relief become the norm for most grave markers with figural decoration.

27. It is not altogether clear why Monachus was opposed, but Hamilton suggests it may have been because her former husband, Humfrey of Toron, was still alive. In any case, after the decision was made, the patriarch had cordial relations with the new king and queen. Hamilton, *The Latin Church*, p. 245.

28. Hamilton (*The Latin Church*, p. 245) says that the marriage ceremony took place on Cyprus and was performed by the archbishop of Tyre. His source for this is unclear.

29. For clarification of my nomenclature, I am referring to the same person, Aimery, as constable of the Latin Kingdom and king of Cyprus, but as Aimery II when he becomes king of Jerusalem (1197–1205). I shall call the king of Jerusalem who ruled 1163–74 as Amalric.

30. Lyon Eracles and Florence Eracles, *La Continuation*, pp. 199 and 198 respectively; Paris Eracles, *RHC: Hist. Occ.* II, p. 223; Ernoul, *Chronique d'Ernoul*, p. 310. None of these sources comments on the ceremony or its location, when the ceremony took place and who was there, or the regalia used. All of the continuations focus on the fact that on this occasion, Isabel is crowned queen for the first time. Mayer argues that patriarch Monachus performed the ceremony and that the coronation took place in Tyre, the latter partly on the evidence of the Pontifical of Tyre; see Mayer, "Das Pontifikale von Tyrus," pp. 192–3. It is also explicit from the *Livre des Assises*, by Jean d'Ibelin written in the 1260s, that the principle by that time was that when Jerusalem was not available, the coronation would take place in Tyre (*RHC: Lois* I, p. 29). Obviously, the coronation of Aimery II and Isabel may have been the origin of that practice.

31. Lyon Eracles and Florence Eracles, *La Continuation*, pp. 199 and 198, respectively; Paris Eracles, *RHC: Hist. Occ.* II, p. 223; and Ernoul, *Chronique d'Ernoul*, p. 310.

32. As Runciman reports, Roger of Hoveden says that the pair were married and crowned in Beirut, which is clearly unlikely. Whatever Roger's sources may have been, the various continuations place the siege and capture of Beirut by the German Crusaders after the coronation of Aimery and Isabel. See, for example, the Paris Eracles, *RHC: Hist. Occ.* II, pp. 223–5.

33. For the German Crusade, see among the sources: Lyon Eracles, *La Continuation*, pp. 187–99; Paris Eracles, *RHC: Hist. Occ.* II, pp. 219–30; Ernoul, *Chronique d'Ernoul*, pp. 304–17; and for the secondary studies, see J. Prawer, *Histoire du Royaume Latin de Jérusalem*, 2, Paris, 1970, pp. 112–18; J. Richard, *The Latin Kingdom of Jerusalem*, vol. A, Amsterdam, New York, Oxford, 1979, pp. 203–7; E. N. Johnson, "The Crusades of Frederick Barbarossa and Henry VI," *HC* 2, pp. 119–21; Runciman, *A History of the Crusades*, 3, pp. 91–8; Mayer, *The Crusades*, pp. 149–51; and J. Riley-Smith, *The Crusades: A Short History*, New Haven and London, 1987, pp. 118–19.

34. Henry I of Brabant and count of Louvain, was the son of Geoffrey III of Lower Lorraine.

35. Prawer, *Histoire du Royaume Latin*, 2, pp. 116–17.

36. The beginning and ending dates of the German Crusade are clear and basically uncontroversial; the Crusaders arrived in the Holy Land in September 1197 and sailed for home in February 1198. Furthermore, the dates of the attacks on Beirut and Toron are clear. However, the sequence and chronology of events as recounted in the continuations are confused and need attention in regard to the relationship between the events of the German Crusade and the activities of King Aimery II before and after his coronation. There is also some disagreement in the secondary studies about the dates of certain basic events and the sequence of certain important events, including when and where the coronation of Aimery II took place. See Runciman, *A History of the Crusades*, 3, pp. 90–8; Hardwicke, "The Crusader States, 1192–1243," pp. 528–31; and Johnson, "The Crusades of Frederick Barbarossa and Henry VI," pp. 119–22; Riley-Smith, *The Crusades, A Short History*, pp. 118–19; Mayer, *The Crusades*, pp. 149–51; Richard, *The Latin Kingdom of Jerusalem*, A, pp. 203–7; and Prawer, *Histoire du Royaume Latin*, pp. 113–18.

37. Runciman, *A History of the Crusades*, 3, p. 98, quotes the period as five years and eight months, apparently based on the texts of Abu Shama and Ibn al-Athir (p. 98, n. 2). Al-Maqrizi, however, says the truce was for three years. See *A History of the Ayyubid Sultans of Egypt*, ed. R. J. C. Broadhurst, Boston, 1980, p. 124. Typically, the Crusader sources such as the continuations and the Chronicle of Ernoul refer to the truce, but do not necessarily give details on the duration; see Paris Eracles, *RHC: Hist. Occid.* II, p. 228; *Chronique d'Ernoul*, pp. 316–17. The exact provisions of these treaties are often unclear without having their texts to refer to. Once again the reader can refer with profit to the discussion of Muslim treaty making and diplomatic policy in P. H. Holt, *Early Mamluk Diplomacy (1260–1290)*, Leiden, New York, Köln, 1995, pp. 1–11.

38. Runciman, *A History of the Crusades*, 3, pp. 97–8.

39. J. Sayers, *Innocent III, Leader of Europe, 1198–1216*, London and New York, 1994, pp. 15, 23, 27, 171.

40. Frederick II was the main protagonist as Holy Roman emperor. He died in 1250, followed by his successors, Conrad and Conradin, the latter who died in 1268.

41. Hamilton, *The Latin Church in the Crusader States*, pp. 244–9, is the fundamental work for this issue. See also J. Richard, "The Political and Ecclesiastical Organization of the Crusader States, D. The Establishment of the Latin Church," *HC* 5, pp. 242–50.

42. See Hamilton, *The Latin Church in the Crusader States*, p. 247; and G. Fedalto, *La Chiesa Latina in Oriente*, vol. II, Hierarchia Latina Orientis, Verona, 1976, pp. 60, 165, 234, and 26, 56, 57, 142, 201, 206, 227.

43. See Prawer, *The Latin Kingdom of Jerusalem*, p. 168.

44. Hamilton, *The Latin Church in the Crusader States*, pp. 299–300. Interestingly, these communities correspond almost exactly to those abbots and priors who are listed as suffragan to the patriarch of Jerusalem in the *Livre de Jean d'Ibelin* dating to the 1260s (*RHC: Lois* 1, pp. 415–16).

45. R. B. Rose, "The Native Christians of Jerusalem, 1187–1260," *The Horns of Hattin*, pp. 239–49.

46. Hamilton, *The Latin Church in the Crusader States*, pp. 160, n. 3; 163–4; 182, n. 4; 347–9. In contrast to Jerusalem one did not find in Acre large numbers of Armenians, Georgians, Maronites, Copts, or others mentioned by John of Würzburg in his catalogue of Eastern Christians. See J. Wilkinson, *Jerusalem Pilgrimage, 1099–1185*, London, 1988, p. 273. See also J. Prawer, "Social Classes in the Crusader States: the 'Minorities'," *HC* 5, pp. 59–115.

47. See A. Forey, *The Military Orders*, Toronto and Buffalo, 1992, pp. 6–23; J. Prawer, *The Latin Kingdom of Jerusalem*, London, 1972, pp. 269–79.

48. On the Hospitallers, see J. Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus, 1050–1310*, London, 1967, pp. 106–44; and a new summary volume, idem, *Hospitallers: The History of the Order of St. John*, London, 1999; H. Nicholson, *The Knights Hospitaller*, Woodbridge, 2001; on the Templars, see M. Barber, *The New Knighthood: A History of the Order of the Temple*, Cambridge, 1994, pp. 115–47; and H. Nicholson, *The Knights Templar, A New History*, Gloucestershire, 2001, pp. 53–84. On the Orders of St. Lazarus and St. Thomas of Canterbury, also known as St. Thomas of Acre, see A. Forey, *The Military Orders*, pp. 17–23; and S. Shahar, "Des Lepreux pas comme les autres," *Revue Historique*, 267 (1982), pp. 19–41.

49. I. Sterns, "The Teutonic Knights in the Crusader States," *HC* 5, pp. 315–78; and Forey, *The Military Orders*, pp. 17–22. See also U. Arnold, "Eight Hundred Years of the Teutonic Order," *The Military Orders*, ed. M. Barber, Aldershot and Brookfield, 1994, pp. 223–8.

50. Arnold, ibid., p. 269.

51. Prawer, *The Latin Kingdom of Jerusalem*, pp. 391–8. Tyre was known for its glass production and its white silk. Antioch and Tripoli were more famous for their textiles, including silks and camlot at Tripoli and silk and brocades at Antioch.

52. See D. Jacoby, "Crusader Acre in the Thirteenth Century: Urban Layout and Topography," *Studi Medievali*, 3rd ser., 20 (1979), pp. 19–36; and M.-L. Favreau-Lilie, *Die Italiener im Heiligen Land*, Amsterdam, 1989, pp. 390–421, 436–7 (maps).

53. Jacoby, "Crusader Acre in the Thirteenth Century; . . . ", pp. 36–9. Favreau-Lilie (*Die Italiener im Heiligen Land*, p. 436) indicates the Marseillaise quarter as between the Venetians and the Genoese, east and west, and bordering the cathena on the south. It is not clear where the market for the Barcelona traders was located.

54. Prawer, *The Latin Kingdom of Jerusalem*, pp. 85–93.

55. See Prawer, *The Latin Kingdom of Jerusalem*, pp. 391–415.

56. H. E. Mayer, *The Crusades*, 2nd edn., Oxford, 1988, p. 180. Mayer says there were no guilds, and Prawer does not mention them, but one must consider the possibility that they may have existed inside the Italian communes at least.

57. Prawer points out that the Venetians, and to some extent the Genoese, had settlers in their communes in the Latin Kingdom from the patrician or knightly classes; see Prawer, "Social Classes in the Latin Kingdom, . . . D. The Communes," *HC* 5, pp. 182–5.

58. It has been argued lately that confraternities can be identified very early in the Crusader East, as early as the time of the First Crusade. See T. Asbridge, *The Creation of the Principality of Antioch: 1098–1130*, Woodbridge, 2000, pp. 104–7. The fact is, however, that even if they may have existed at that early time, their development in the Latin Kingdom only began to flourish in the port city of Acre after its reconquest by the Third Crusade.

59. J. Riley-Smith, "A Note on Confraternities in the Latin Kingdom of Jerusalem," *Bulletin of the Institute of Historical Research*, 44 (1971), pp. 301–2.

60. Riley-Smith, "A Note on Confraternities," p. 302; Favreau-Lilie, *Die Italiener im Heiligen Land*, pp. 406–7.

61. Riley-Smith, "A Note on Confraternities," p. 302; Favreau-Lilie, *Die Italiener im Heiligen Land*, pp. 408–9, 521–8.

62. J. Richard, "The Political and Ecclesiastical Organization of the Crusader States, C. Monarchical Institutions," *HC* 5, p. 230.

63. Riley-Smith, "A Note on Confraternities . . . ," pp. 302–3.

64. Richard, "The Political and Ecclesiastical Organization of the Crusader States, . . . ," pp. 230–1; Prawer, *The Latin Kingdom of Jerusalem*, pp. 115–16; and Riley-Smith, "A Note on Confraternities . . . ," pp. 303–5.

65. Ibid., pp. 305–6.

66. On rural settlement and the agriculture, the older views are presented by J. Richard, "Agricultural Conditions in the Crusader States, A. Agriculture in Frankish Syria" *HC* 5, pp. 251–66; and J. Prawer, *Crusader Institutions*, Oxford, 1980, pp. 85–200; and idem, *The Latin Kingdom of Jerusalem*, pp. 355–81. The important new study is by R. Ellenblum, *Frankish Rural Settlement in the Latin Kingdom of Jerusalem*, Cambridge, 1998, pp. 3–38, where the earlier models are contrasted with his new and persuasive hypotheses based on extensive survey analysis and interpretation.

67. Prawer, "Social Classes in the Latin Kingdom: The Franks, B. The Nobles," *HC* 5, pp. 139–40; and "C. The Burgesses," *HC* 5, pp. 145–7.

68. Estimates of the size of the population vary, but Prawer suggests that whereas by the late twelfth century Acre may have had 30,000 people, the city could well have doubled its population by the late thirteenth century. Prawer, *The Latin Kingdom of Jerusalem*, p. 82. With a population of 50,000 or 60,000, Acre would have been certainly the largest Crusader city on the coast of Syria-Palestine, the largest Frankish city in the Levant with the exception of Constantinople under the Latin Empire, and one of the largest cities on the Mediterranean east or west. See also, Folda, *Crusader Manuscript Illumination*, pp. 7–8, n. 21.

69. See Jacoby, "Crusader Acre in the Thirteenth Century: Urban Layout and Topography," pp. 41–2; and idem, "Montmusard, Suburb of Crusader Acre: The First Stage of Its Development," *Montjoie*, pp. 205–17. The new suburb had begun to develop long before 1187, but the influx of population after the Crusaders reconquered the city in 1191 caused it to grow dramatically. Construction on a wall for Montmusard started by 1198 and was completed by 1212 (p. 213), but the suburb did not receive its full fortification until the time of Louis IX, 1250–4.

70. Ernoul, *Chronique d'Ernoul*, pp. 27–8.

71. M. Greilsammer, "Structure and Aims of the *Livre au Roi*," *Outremer*, pp. 218–26. Greilsammer concludes this article by stating: "Given the fact that the work was most certainly prepared for King Amalric [Aimery II], this monarch's aim was to facilitate the restoration of a strong monarchy rather than to set down in writing the old assizes lost in 1187" (p. 226).

72. *Livre au Roi*, ed. M. Greilsammer, Paris, 1995, and the older edition, ed. Comte Beugnot, *RHC: Lois* I, pp. 601–44. See P. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, Woodbridge, 1997, p. 105.

73. Hardwicke, "The Crusader States, 1192–1243," p. 531; Runciman, *A History of the Crusades*, 3, pp. 103–4; Edbury, *The Kingdom of Cyprus and the Crusades*, pp. 33–4.

74. H. E. Mayer, "Two Unpublished Letters on the Syrian Earthquakes of 1202," *Medieval and Middle Eastern Studies in Honor of Aziz Suryal Atiya*, ed. S. A. Hanna, Leiden: E. J. Brill, 1972, pp. 295–310.

75. According to Kallner-Amiran, the seismic grade was 20.5, and the earthquake struck from Egypt through Palestine and Syria to Cyprus. Although not as strong as the three biggest quakes of the twelfth century, especially the 1170 earthquake, which was rated 29.6 on the Mercalli-Cancani scale, the 1202 quake was heavily destructive. D. H. Kallner-Amiran, "A Revised Earthquake-Catalogue of Palestine," *Israel Exploration Journal*, 1 (1951), p. 228.

76. Mayer, "Two Unpublished Letters," p. 307.

77. Paris Eracles, *RHC: Hist. Occid.* II, pp. 258–63, *Chronique d'Ernoul*, pp. 355–60.

78. Ibid.

79. For a detailed discussion of the problems surrounding the Antiochene succession, see C. Cahen, *La Syrie du Nord à l'Époque des Croisades et la Principauté franque d' Antioche*, Paris, 1940, pp. 597–608; Hardwicke, "The Crusader States, 1192–1243, pp. 532–6; Hamilton, *The Latin Church in the Crusader States*, pp. 216–18; Runciman, *A History of the Crusades*, 3, pp. 99–103; Mayer, *The Crusades*, pp. 252–3.

80. See n. 77. J. Richard dates the Fuwah incursion to 20–25 May 1204 (Richard, *The Latin Kingdom of Jerusalem*, A, p. 210). It is difficult to understand why these incursions did not in fact break the truce!

81. The extant narrative sources for the Fourth Crusade, although important and interesting, have some conspicuous gaps. There is for example no contemporary chronicle written from the Venetian point of view, a surprising omission given the pivotal role the Venetians played in this adventure. Donald Nicol has pointed out that the earliest Venetian source is a work by Martin da Canal, *Les Estoires de Venise*, written by about 1275, much later than the Crusade itself and even dating after the demise of the Latin Empire (1204–61). See D. M. Nicol, *Byzantium, Venice and the Fourth Crusade*, An Inaugural Lecture by the Director of the Gennadius Library, Athens, 1990, pp. 12–16. Martin da Canal's version of the story is very different from those of Villehardouin or Robert of Clari. Would that we had a more detailed systematic account told from the point of view of the Latin Kingdom of Jerusalem.

82. The basic sources used here are the Paris Eracles, *RHC: Hist. Occid.* II, pp. 241–80; *Chronique d'Ernoul*, pp. 331–77; Geoffrey de Villehardouin, *La Conquête de Constantinople*, 2 vols., ed. E. Faral, Paris, 1961; Robert de Clari, *La Conquête de Constantinople*, ed. P. Lauer, Paris, 1924; and Gunther of Pairis, *Hystoria Constantinopolitana*, ed. P. Orth, Hildesheim and Zurich, 1994. For basic secondary studies of the Fourth Crusade, see D. Queller and T. Madden, *The Fourth Crusade: The Conquest of Constantinople*, 2nd edn., Philadelphia, 1997, pp. 1–203; E. H. McNeal and R. L. Wolff, "The Fourth Crusade," *HC* 2, pp. 153–85; K. M. Setton, *The Papacy and the Levant (1204–1571)*, Philadelphia, 1976, pp. 1–26; J. Riley-Smith, *The Crusades: A Short History*, New Haven and London, 1987, pp. 121–30; H. E. Mayer, *The Crusades*, 2nd edn., Oxford, 1988, pp. 196–204; J. Richard, *The Latin Kingdom of Jerusalem*, vol. A, Amsterdam, New York, Oxford, 1979, pp. 208–11; and C. Brand, *Byzantium Confronts the West, 1180–1204*, Cambridge, MA, 1968.

83. On Fulk of Neuilly, see E. H. McNeal, "Fulk of Neuilly and the Tournament of Ecry," *Speculum*, 28 (1953), pp. 371–5; and the account of Fulk by Jacques de Vitry, *Historia Occidentalis*, ed. J. R. Hinnebusch, Fribourg, 1972, pp. 89–90, 94–101, with information and bibliography on pp. 273–4.

84. *Chronique d'Ernoul*, p. 338.

85. Geoffrey de Villardouin (*La Conquête de Constantinople*, ed. E. Faral, I, Paris, 1961, pp. 4, 6, 8) and Robert de Clari (*La Conquête de Constantinople*, ed. P. Lauer, Paris, 1924, pp. 1–4) both give long lists of knights who took the Cross, but only Geoffrey names the place where the tournament took place.

The Paris Eracles, *RHC: Hist. Occid.* II, pp. 243–4, and *Chronique d'Ernoul*, pp. 337–8, include this event with a list of participants that differ slightly, but neither cites the specific place, only the region of France.

86. Robert de Clari, *La Conquête de Constantinople*, ed. E. Faral, Paris, 1924, p. 3, trans. E. H. McNeal, *The Conquest of Constantinople*, New York, 1936, p. 33. Although we know of the use of banners in the twelfth century as a "vexillum," McNeal (p. 33, n. 11) points out that this is one of the earliest appearances of the Old French term "baniere," in its technical sense as a standard carried in battle.

The making of these banners, either by painting them or by methods of stitching and sewing textiles, or by both means together, was a commission that even the most important artists received. Although no banners made for the Crusaders are known to survive, we can imagine that in the thirteenth century, male manuscript painters and fresco painters as well as female makers of intricate textiles were called on for such works. We know that later Jan van Eyck made banners for the duke of Burgundy, and of course much later the first American flag was made by Betsy Ross.

87. Geoffrey de Villehardouin was one of the major nobles to take the Cross, and his account of the Fourth Crusade is the most detailed we have. He became marshal of Champagne in 1185, a position which prepared him well for his duties on this delegation to Venice.

88. Oddly enough, the Paris Eracles (*RHC: Hist. Occid.* II, pp. 245–6) and *Chronique d'Ernoul* (pp. 338–9) describe the Crusaders as having discussions with the Venetians in France over the arrangements for the ships. These texts appear to conflate and simplify a large section of the early arrangements for the Crusade, which is reported in some detail by Geoffrey de Villardouin. Despite this apparent mistake about where the negotiations took place, the Crusaders are reported as only having dealt with the Venetians for their ship transport.

89. Queller and Madden, *The Fourth Crusade*, pp. 9–16. For the text of the treaty, see G. L. Fr. Tafel and G. M. Thomas, eds., *Urkunden zur älteren Handels- und Staatsgeschichte der Republik Venedig*, vol. 1, Vienna, 1856, rpt., Amsterdam, 1964, pp. 362–8.

90. The choice of Egypt represented a shift in strategy by the Crusaders, to strike at the heart of Muslim power first, and presumably then to liberate the Holy Land. This idea had already surfaced during the Third Crusade as we have seen, and King Aimery II viewed sending a raiding party to Rosetta and Fuwah as a worthwhile maneuver. The fact is also that the treaties made by Richard I and the rulers of the Latin Kingdom, starting in 1192, with truces declared in effect for several years may have been a consideration, but could not have been the determining factor here. See Queller and Madden, *The Fourth Crusade*, pp. 14–15, n. 41. Gunter of Pairis (*Hystoria Constantinopolitana*, ed. P. Orth, Hildesheim and Zurich, 1994, p. 121, trans. A. Andrea, *The Capture of Constantinople*, Philadelphia, 1997, p. 77) discusses the strategy openly, referring also to drought and famine in Egypt as factors which would make an attack there effective. Robert of Clari (*The Conquest of Constantinople*, trans. E. H. McNeal, New York, 1936, p. 36) refers to the goal of going to Egypt as a matter of common knowledge in his position as a rank-and-file Crusader. Jonathan Riley-Smith has now made a persuasive case for Alexandria as the agreed on objective, in papers given in conferences on the Fourth Crusade in Athens and Istanbul. These papers will be published in due course.

91. As he lay dying, Thibaut selected Renaud de Dampierre to fulfill his Crusader vow for him and gave him the wherewithal to undertake the journey. See A. J. Andrea, "Adam of Perseigne and the Fourth Crusade," *Cîteaux*, 36 (1985), p. 30 and nn. 52, 53.

92. Boniface was well-connected with the royal family in the Latin Kingdom, but he never visited the Holy Land while on the Fourth Crusade or in Frankish Greece before his death in 1207. See J. Longnon, *Les Compagnons de Villehardouin: recherches sur les Croisés de la Quatrième Croisade*, Geneva, 1978, pp. 227–34. L. Usseglio, *I Marchesi di Monferrato in Italia ed in Oriente*, vol. 2, Turin, 1926, pp. 170–83.

93. A. J. Andrea, "The *Historia Constantinopolitana*": An Early Thirteenth-Century Cistercian Looks at Byzantium," *Analecta Cisterciensia*, 36 (1980), pp. 271–4, comments on the Order's special connection with this Crusade.

94. Paris Eracles, *RHC: Hist. Occid.* II, p. 244, *Chronique d'Ernoul*, p. 338.

95. Queller and Madden, *The Fourth Crusade*, p. 33. See also J. Folda, "The Fourth Crusade, 1201–1203: Some Reconsiderations," *Byzantinoslavica*, 26 (1965), pp. 278–83, and Brand, *Byzantium Confronts the West*, pp. 275–6.

96. There is no doubt that both Boniface of Montferrat and Philip of Swabia also had quite independent personal and political reasons for finding the plea for support from Alexius interesting. See Queller and Madden, *The Fourth Crusade*, pp. 35–7. Even Robert of Clari (*The Conquest of Constantinople*, pp. 59–66) has a long story to tell about why the marquis of Montferrat had a family score to settle with the emperor of Byzantium.

97. The standard work on relations between the pope and Byzantium in this period before Setton, *The Papacy and the Levant (1204–1571)*, 1, 1976, was W. Norden, *Das Papsttum und Byzanz*, Berlin, 1903. Norden discusses how Innocent III tried to maneuver Alexius III into agreeing to a church council to discuss unification, and how Alexius III avoided it (Norden, p. 142). Setton (pp. 4–8) discusses the interaction of Innocent III and Alexius III in the wider framework of relationships between East and West, and Setton also has some important comments on Norden's book (Setton, p. 3, n. 5).

98. Migne, *PL*, 214, *Gesta Innocentii III*, ch. 83, cols. 131–2. See also, Queller and Madden, *The Fourth Crusade*, p. 38.

99. Queller and Madden, *The Fourth Crusade*, pp. 44–51.

100. It is interesting that Geoffrey de Villehardouin discusses the defections of soldiers and controversies over the goals of the Crusade at length all through his account, but Robert of Clari by contrast has hardly anything to say on these topics.

101. Longnon, *Les Compagnons de Villehardouin*, pp. 149–50.

120. Queller and Madden (*The Fourth Crusade*, pp. 60 and 238, n. 22) address the question of the date when Enrico took the Cross. They argue the case persuasively for Sunday, the feast of the Nativity of the Virgin, 8 September 1202.

121. Unfortunately we do not have a copy of this letter, but we know of its existence. See A. J. Andrea and I. Motsiff, "Pope Innocent III and the Diversion of the Fourth Crusade Army to Zara," *Byzantinoslavica*, 33 (1972), pp. 9–14. On the timing of the letter, see Queller and Madden, *The Fourth Crusade*, pp. 65–6.

122. In the treaty the Crusaders made with Venice in 1201, the breakdown was 4,500 knights, 9,000 squires, and 20,000 foot soldiers (Queller and Madden, *The Fourth Crusade*, p. 11). Of these numbers then, the leaders – great nobles, high clergy, and their staffs – were a small percentage, perhaps 5 percent or less. Although the Crusader army in October 1202 was smaller than half that number, the proportions and the percentage of "leaders" must have been comparable.

123. Queller and Madden, *The Fourth Crusade*, pp. 67–8 and n. 65.

124. Robert of Clari was a Picard knight of modest means who was a vassal of Pierre d'Amiens and served under his banner on the Fourth Crusade.

125. Robert de Clari, *La Conquête de Constantinople*, ed. E. Faral, Paris, 1924, p. 13, trans. E. H. McNeal, Robert of Clari, *The Conquest of Constantinople*, New York, 1936, pp. 42–3.

126. It is ironic that the city surrendered on 24 November, the Feast of St. Chrysogonus, patron saint of Zara. See T. G. Jackson, *Dalmatia*,

the Quarnero, and Istria, vol. 1, Oxford, 1887, p. 288.

127. Villardouin, *La Conquête de Constantinople*, 1, pp. 92–4.

128. Migne, *PL*, 214, *Epistolae Innocentii III*, letter V, 161, col. 1178. This letter, written in the second half of December, is translated by A. Andrea, along with a slightly later one, written probably in February 1203 (letter V, 162); both are discussed in A. J. Andrea, *Contemporary Sources for the Fourth Crusade*, Leiden/Boston/Cologne, 2000, pp. 39–48.

129. This is not the first time that errant Crusaders had apparently been excommunicated. Urban II and Paschal II were said to have pronounced this sentence on those among the First Crusaders who left the ranks before reaching Jerusalem. See J. A. Brundage, *Medieval Canon Law and the Crusader*, Madison, Milwaukee, and London, 1969, pp. 37–8. Nonetheless, excommunication was a terrible pronouncement and, it must be said, one rarely applied to Crusaders before 1203.

130. Villehardouin, *La Conquête de Constantinople*, 1, pp. 94, 96, 98, 100.

131. Ibid, p. 98, Shaw, trans., *Joinville and Villehardouin*, p. 51.

132. Longnon, *Les Compagnons de Villehardouin*, pp. 99–100.

133. Ibid., p. 124.

134. Ibid., pp. 115–16.

135. Ibid., pp. 165–7.

136. Villehardouin, *La Conquête de Constantinople*, 1, p. 106.

137. Villehardouin suggests that Robert left to go to Syria before the delegation ever got to see the pope in Rome (Ibid., p. 106). Robert of Boves is one of the few defectors that Robert of Clari mentions, and he says Robert of Boves went oversea from Rome (*The Conquest of Constantinople*, p. 45). The Paris Eracles (*RHC: Hist. Occid.* II, p. 255) says Robert went to Rome and delivered his message before he left for Apulia and sailed to Acre.

138. Gunther of Pairis, *Hystoria Constantinopolitana*, pp. 124–30, trans. A. J. Andrea, *The Capture of Constantinople*, pp. 80–5.

139. A. J. Andrea and J. C. Moore ("The Date of Reg. 6:102: Pope Innocent's Letter of Advice to the Crusaders," *Medieval and Renaissance Venice*, eds. E. E. Kittell and T. F. Madden, Urbana and Chicago, 1999, pp. 109–23) discuss the convoluted relationships among the pope, the barons, and the Venetians as the result of the capture of Zara and the dating of a series of papal letters to the Crusaders pertaining to their experiences at Zara. A. Andrea has published a translation and a further commentary on this letter in which he changes his mind about its date. See Andrea, *Contemporary Sources for the Fourth Crusade*, pp. 64–9.

140. Longnon, *Les Compagnons de Villehardouin*, pp. 249–50.

141. Gunther of Pairis, *Hystoria Constantinopolitana*, pp. 131–2, trans. A. J. Andrea, *The Capture of Constantinople*, pp. 85–6; 158–9, nn. 116, 118. The text says he arrived on 25 April, but Andrea argues this was a mistake and that in fact this was his date of departure from Apulia.

142. On the character of the vow, see Brundage, *Medieval Canon Law and the Crusader*, pp. 30–65, and especially pp. 115–31 for the content and the obligations of the Crusader vow.

160. Ibid., pp. 128–9.

161. Ibid., pp. 212–13.

162. Ibid., p. 213.

163. Ibid., p. 212.

164. Paris Eracles, *RHC: Hist. Occid.* II, pp. 246–9.

165. Queller and Madden, *The Fourth Crusade*, p. 48. Renaud was only able to return home in 1233; see Longnon, *Les Compagnons de Villehardouin*, pp. 60–3.

166. Paris Eracles, *RHC: Hist. Occid.* II, pp. 256–7. John of Nesles was a second-time Crusader, having been on the Third Crusade as well. He never made it back to Europe this time, dying on 14 July 1204 in the East; see Longnon, *Les Compagnons de Villehardouin*, pp. 149–50.

167. Paris Eracles, *RHC: Hist. Occid.* II, pp. 244–5, *Ernoul Chronique*, p. 338. The manuscripts of the Eracles vary as to which city walls they mention. The Paris Eracles mentions only Tyre and Acre, but the Lyon Eracles mentions only Acre and Beirut, and Paris, B. N. MS fr. 9086 (=MS "C", *RHC: Hist. Occid.* II), mentions Acre, Tyre, and Beirut, as does Ernoul.

168. Paris Eracles, *RHC: Hist. Occid.* II, pp. 250–2, *Ernoul Chronique*, pp. 343–6. Queller and Madden, *The Fourth Crusade*, pp. 51, and 235, n. 84.

169. Paris Eracles, *RHC: Hist. Occid.* II, pp. 255–7.

170. Paris Eracles, *RHC: Hist. Occid.* II, pp. 258–9.

171. Gunther of Pairis, *Hystoria Constantinopolitana*, pp. 131–4, trans. A. J. Andrea, *The Capture of Constantinople*, pp. 86–8. Andrea thinks that 25 April is the date of Martin's embarkation from Apulia and not the date of his arrival in Acre. See Andrea, p. 159, n. 118.

In fact, it is puzzling that although a fair number of soldiers are mentioned in the Western sources who sail to Syria to arrive in Acre, we hear about relatively few of them in the Latin Kingdom from the Paris Eracles or Ernoul (e.g., Renaud de Montmirail, Martin of Pairis, or Peter Capuano). It remains to be seen if they, and others like them, can be accounted for in other sources not brought into this discussion as yet. It is possible, however, that in some cases, either they arrived in Acre to find problems with the plague and died there unrecorded or they turned around and sailed away to save themselves, like the contingent mentioned by Geoffrey de Villehardouin (*La Conquête de Constantinople*, 1, p. 124). Martin of Pairis, on the other hand, visited Acre, rejoined the Crusaders at Constantinople and then returned to the Holy Land before going home. The account of his journeys from Constantinople back to Acre and then home by Gunther of Pairis is of great interest as we shall see later.

172. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, pp. 144–7.

173. Paris Eracles, *RHC: Hist. Occid.* II, p. 263, and *Ernoul Chronique*, p. 360.

174. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, pp. 145–6. See also Runciman, *A History of the Crusades*, 3, p. 103; Richard, *The Latin Kingdom of Jerusalem*, A, pp. 209–11.

175. See the detailed discussion in Queller and Madden, *The Fourth Crusade*, pp. 100–203.

176. Geoffrey de Villardouin, *La Conquête de Constantinople*, 1, p. 124. In fact, Geoffrey does not say they were fleeing the plague. This is the interpretation put on this passage by Queller and Madden, *The Fourth Crusade*, pp. 103–4.

Surprisingly the Paris Eracles does not mention the plague, but Gunther of Pairis (*Hystoria Constantinopolitana*, pp. 131–4, trans. A. J. Andrea, pp. 86–8) does discuss the plague in Acre at some length. Abbot Martin of Pairis apparently arrived in Acre shortly after the men in these two ships mentioned by Villehardouin must have departed, and he stayed until early November 1203. Gunther describes the plague as having occurred mainly in the summer of 1203, but there obviously could have been an earlier outbreak in the spring.

177. Geoffrey of Villehardouin, *La Conquête de Constantinople*, 1, pp. 194–6; Queller and Madden, *The Fourth Crusade*, pp. 136–7.

178. Villehardouin, *La Conquête de Constantinople*, 1, p. 194, transl. Shaw, *Joinville and Villehardouin*, p. 76.

179. Robert de Clari, *La Conquête de Constantinople*, pp. 81–90.

180. Villehardouin, *La Conquête de Constantinople*, 1, pp. 200–2, trans. Shaw, *Joinville and Villehardouin*, pp. 77–8. It is odd that Villehardouin refers to the goals of the Crusaders this way, as going first to Syria and then making expeditions to Egypt. Perhaps his perception of what would happen had changed from the original strategy of sailing first to Egypt and then going to the Holy Land, because of the large number of Crusaders who had split off from the army and gone to Syria directly.

181. The Mitaton mosque was a particularly sensitive issue with the Crusaders because this was the mosque that Isaac II had erected as the

result of his negotiations with Saladin in the 1180s. See Queller and Madden, *The Fourth Crusade*, p. 145; and C. Brand, "The Byzantines and Saladin, 1185–1192: Opponents of the Third Crusade," *Speculum*, 37 (1962), p. 172.

This fire was one of three the Crusaders set in Constantinople that inflicted terrible damage on the city. See T. Madden, "The Fires of the Fourth Crusade in Constantinople, 1203–1204: A Damage Assessment," *Byzantinische Zeitschrift*, 84–5 (1992), pp. 72–93. Madden says they devastated one-sixth of the city, making one-third of the inhabitants homeless.

182. Runciman, *A History of the Crusades*, 3, p. 119.

183. See B. Hendrickx and C. Matzukis, "Alexios V Doukas Mourtzouphlos: His Life, Reign and Death (?–1204)," *Hellenika*, 31 (1979), pp. 108–22.

185. *Devastatio Constantinopolitana*, ed. and trans., A. J. Andrea, in *Historical Reflexions* 19 (1993), p. 148; see also Queller and Madden, *The Fourth Crusade*, pp. 191–2.

186. Nicetas Choniates, *Historia*, ed. J.-L. van Dieten, *Corpus Fontium Historiae Byzantinae*, XI, 1, Berlin and New York, trans., H. J. Magoulias, *O City of Byzantium, Annals of Niketas Choniates*, Detroit, 1984, pp. 314–20. Besides his descriptive narrative of the terrible events of the Crusader attack and the sack of the city, Nicetas also gives a moving account of his harrowing personal experiences in those dangerous days and how he and his family were able to escape when all was lost (Ibid., pp. 323–5).

187. Ibid., p. 317.

188. Paris Eracles, *RHC: Hist. Occid.* II, p. 275. Virtually the same passage is also found in the *Chronique d'Ernoul*, p. 375.

189. Robert de Clari, *La Conquête de Constantinople*, pp. 80–1, trans. E. H. McNeal, *The Conquest of Constantinople*, p. 101.

190. Geoffroy de Villehardouin, *La Conquête de Constantinople*, 2, p. 52, trans. Shaw, *Joinville and Villehardouin*, p. 92.

191. No source known to me specifies that manuscripts were plundered for their covers or that major libraries were destroyed in the fires set by the Crusaders. See Queller and Madden, *The Fourth Crusade*, p. 291 n. 19.

192. The main Greek source for this is Nicetas Choniates, "De signis," the last section of his *Historia*, pp. 647–55, esp. 647–8, trans., Magoulias, pp. 357–62. See Queller and Madden, *The Fourth Crusade*, pp. 195–6, and 291–2, nn. 20–4.

193. On these horses, see M. Jacoff, *The Horses of San Marco and the Quadriga of the Lord*, Princeton, 1993; and L. Borelli Vlad and A. Guidi Toniato, "The Origins and Documentary Sources of the Horses of San Marco," *The Horses of San Marco*, ed. G. Perocco, London, 1979, pp. 127–36. On the treasury of San Marco, see D. Buckton et al., eds., *The Treasury of San Marco, Venice*, Milan, 1984; and the remarks of M. Frazier, "Byzantine Enamels and Goldsmith Work," pp. 113–14, with regard to identifying works in the treasury that came to Venice in 1204.

194. The topic of the relics captured and taken away or destroyed in Constantinople during and after the Fourth Crusade is enormous. Two basic publications for investigating this problem are the following: P. Riant, "Des Dépouilles religieuses enlevées à Constantinople au XIIIe siècle, et des Documents Historiques nés de leur transport en Occident," *Mémoires de la Société Nationale des Antiquaires de France*, 4e sér., 6 (1875), pp. 1–214; and idem, *Exuviae Sacrae Constantinopolitanae*, 3 vols., Geneva and Paris, 1877, 1878, 1904, the last volume published by F. de Mély after Riant's death. For a valuable introduction to this whole issue, see J. Durand, "Reliques et reliquaires arrachés à l'Orient et à Byzance au temps des Croisades," *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, pp. 378–89.

195. Riley-Smith, *The Crusades, A Short History*, p. 129. Clearly the relics acquired by the Crusaders in Constantinople were a major factor in the rise of attested True Cross relics catalogued by Frolow for the thirteenth century. See Frolow, *La Relique de la Vraie Croix*, pp. 110–13, 144–7.

196. A. J. Andrea and P. Rachlin, "Holy War, Holy Relics, Holy Theft: The Anonymous of Soissons' *De terra Iherosolimitana*: An Analysis, Edition, and Translation," *Historical Reflections*, 18 (1992), p. 156.

197. Gunther of Pairis, *Hystoria Constantinopolitana*, pp. 158–61, trans. A. J. Andrea, pp. 109–12. See also the older editions published by Paul Riant: Guntheri Alemanni, *Historia Constantinopolitana*, Geneva, 1875; and idem, Guntheri Parisiensis, "Historia Constantinopolitana," *Exuviae Sacrae Constantinopolitanae*, I, Geneva, 1877, pp. 57–126. The new modern edition is by Peter Orth: Gunther von Pairis, *Hystoria Constantinopolitana*, Spolia Berolinensia: Berliner Beiträge zur Mediävistik, vol. 5, Hildesheim and Zurich, 1994, pp. 106–81.

Gunther also provides a list of the relics Abbot Martin brought with him back to Pairis after the Crusade. I discuss this important list in due course.

198. Paul Riant begins the discussion of the sources about these relics in his 1875 study "Des Dépouilles religieuses enlevées à Constantinople . . . , pp. 85–176.

199. Andrea and Rachlin, "Holy War, Holy Relics, Holy Theft," pp. 172–4. Paul Riant had published this text in 1877: Anonymi Suessionensis, "De Terra Iherosolimitana, & quomodo ab urbe Constantinopolitana ad hanc ecclesiam allate sunt reliquie," *Exuviae Sacrae Constantinopolitanae*, I, pp. 3–9, with these relics listed on pp. 7–8.

200. Andrea and Rachlin, "Holy War, Holy Relics, Holy Theft," p. 172.

201. Ibid., p. 173.

202. Ibid., p. 172.

203. Ibid., p. 173.

204. Ibid., p. 172.

205. Ibid., p. 173.

206. Ibid., p. 174.

207. Ibid., p. 172, n. 56.

208. K. M. Setton, *The Papacy and the Levant (1204–1574)*, vol. 1, Philadelphia, 1976, pp. 13–20.

209. Ibid., p. 13. This letter, Register VII, 152, has now been translated and discussed by A. Andrea, *Contemporary Sources for the Fourth Crusade*, pp. 98–112.

210. Ibid., p. 20.

211. Ibid.

212. Ibid., p. 14.

213. Queller and Madden, *The Fourth Crusade*, p. 202, point out that when their year was up, most of the remaining army boarded Venetian ships and sailed for the West.

214. Gunther of Pairis, *Hystoria Constantinopolitana*, p. 168, trans. A. J. Andrea, pp. 118–19.

215. Villehardouin, *La Conquête de Constantinople*, II, pp. 124, 126.

216. Gunther of Pairis, *Hystoria Constantinopolitana*, p. 169, trans. A. J. Andrea, pp. 120, 177–8, nn. 298, 299. See also A. J. Andrea, "Conrad of Krosigk, Bishop of Halberstadt, Crusader, and Monk of Sittichenbach: His Ecclesiastical Career, 1184–1225," *Analecta Cisterciensia*, 43 (1987), pp. 49–50.

217. Gunther of Pairis, *Hystoria Constantinopolitana*, ed. P. Orth, pp. 175–7, trans. A. J. Andrea, pp. 125–7.

218. Ibid., pp. 125–7. These relics existed in Pairis in the late fourteenth century, as witnessed by a letter guaranteeing an indulgence for visiting the relics in the monastery there. By the eighteenth century all of the relics had disappeared except for the blood of Christ and a fragment from the Virgin's sepulcher. These relics also disappeared at the time of the French Revolution (Ibid., p. 179, n. 316).

219. Paul Riant, ed., Guntheri Alemanni, Scholastici, Monachi et Prioris Parisiensis, *Historia Constantinopolitana*, Geneva, 1875, p. 90, referred to in idem, "Récits contemporains," *Exuviae Sacrae Constantinopolitanae*, 1, p. lxxxvi, n. 3. Riant's comment in the notes on Guntheri Alemanni (p. 90) is as follows:

> Cette relique & les seize suivantes devaient former un seul & même reliquaire: il est douteux qu'elles provinssent de Constantinople; Martin les avait plutôt rapportés de Terre Sainte, où, faute de reliques insignes (la plupart ayant été anciennement transportées à Constantinople), on donnait aux pèlerins des fragments du sol des lieux consacrés par les scènes de l'Ecriture Sainte.

220. See the discussion of the relics acquired by Abbot Martin of Pairis, nn. 178, 179.

221. C. R. Morey, "The Painted Panel from the Sancta Sanctorum," *Festschrift zum sechzigsten Geburtstag vom Paul Clemen*, Bonn and Düsseldorf, 1926, pp. 150–66.

222. Durand, "Reliques et Reliquaires," *Les Croisades*, ed. Rey-Delqué, p. 379; and M.-M. Gauthier, *Les Routes de la Foi*, Fribourg, 1983, pp. 37, no. 15 (illustrates the example of the oliphant given by Albert III of Hapsburg to the convent of Muri in Switzerland, in 1199), and p. 94, no. 50 (illustrates a reliquary purse, early thirteenth century).

223. Ibid., and see also A. Shalem, *Islam Christianized: Islamic Portable Objects in the Medieval Church Treasuries of the Latin West*, Frankfurt and Berlin, 1996.

224. See Durand, "Reliques et Reliquaires," *Les Croisades*, ed., Rey-Delqué, pp. 378–89.

225. Frolow, *La Relique de la Vraie Croix*, pp. 388–9, no. 462, and see n. 99 of the present chapter.

226. Ibid., pp. 385–6, no. 457, and n. 218 of the present chapter.

227. Ibid., pp. 386–7, no. 459; and see A. J. Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade: Popular Religiosity in the Early Thirteenth Century, *Historical Reflections*, 22 (1996), p. 475.

228. Note that the anonymous author of the *Gesta episcoporum Halberstadensium* specifies that Conrad sailed from Constantinople to the Holy Land specifically "in order to discharge his pilgrimage vow." Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade," p. 469.

229. Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade," pp. 469–70; and idem, "Conrad of Krosigk, Bishop of Halberstadt,..., pp. 48–9.

230. Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade," p. 470. Clearly the apologetic nature of this text comes through in a passage like this.

231. Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade," p. 470; and idem, "Conrad of Krosigk, Bishop of Halberstadt,..., pp. 48–9. On the shrine of the Virgin in the Church of Notre Dame in Tortosa, see Folda, *The Nazareth Capitals*, pp. 35–6. Slightly later pilgrimage texts, *Les Pelerinages por aler en Iherusalem* (*c.*1231) and *Les Chemins et les pelerinages de la Terre Sainte* (*c.*1260–63), refer to the church at Tortosa as the first church of Notre Dame commissioned by Saint Peter. See H. Michelant and G. Raynaud, *Itinéraires à Jérusalem*, Geneva, 1882, pp. 103, 187–8.

232. Andrea, "Conrad of Krosigk, Bishop of Halberstadt,..., pp. 19–23.

233. Ibid., p. 49.

234. Ibid., p. 54.

235. Gesta Episcoporum Halberstadensium: ed. P. Riant, Anonymi Halberstadensis," De peregrinatione in Greciam...", *Exuviae Sacrae Constantinopolitanae*, I, Geneva and Paris, 1877, pp. 20–1, trans., A. J. Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade," pp. 475–6.

236. Robert of Clari, *La Conquête de Constantinople*, p. 90, trans. E. H. McNeal, p. 112.

237. I. Wilson has proposed this argument in a number of works, the latest being *The Blood and the Shroud*, New York, 1998, pp. 111–75; and his earlier study, *The Shroud of Turin*, Garden City, NY, 1978, pp. 66–183. Wilson even proposes the controversial idea that the Holy Shroud was the same object as the Mandylion.

238. Robert de Clari, *La Conquête de Constantinople*, pp. 81–2, trans. E. H. McNeal, p. 103.

239. Robert de Clari and Geoffrey de Villehardouin are the most reliable among several sources which record this incident; Alberic of Trois-Fontaines, who wrote long after the event, provided the most fanciful description with a number of errors of fact. See Queller and Madden, *The Fourth Crusade*, pp. 165–6, and 278 nn. 122, 123.

240. Robert of Clari, *La Conquête de Constantinople*, pp. 66–7, trans. E. H. McNeal, p. 90. The word "ansconne," here meaning icon, is notable as a rare Old French word in one of its earliest usages.

241. Geoffrey de Villehardouin, *La Conquête de Constantinople*, 2, p. 28, trans. M. R. B. Shaw, p. 86.

242. Nicetas Choniates, *Historia*, trans. H. J. Magoulias, *O City of Byzantium*, p. 312.

243. N. Baynes, "The Supernatural Defenders of Constantinople," *Analecta Bollandiana*, 67 (1949), pp. 171–6. Baynes discusses the variety of holy relics that protected Constantinople and especially the relics and image of the Virgin which were established in tradition long before 1204.

244. Robert of Clari, *La Conquête de Constantinople*, p. 67, trans., E. H. McNeal, p. 90.

245. Robert of Clari, ibid., pp. 92–5, trans., McNeal, pp. 115–16. See also the comments of R. L. Wolff, "The Latin Empire of Constantinople, 1204–1261," *HC* 2, pp. 189–90.

246. Besides the important chapters of Wolff, "The Latin Empire of Constantinople, *HC* 2, pp. 187–233; and J. Longnon, "The Frankish States in Greece, 1204–1311, in *HC* 2, pp. 235–74, see also P. Lock, *The Franks in the Aegean, 1204–1500*, London and New York, 1995; and the important publications of B. Hendrickx, "Regestes des Empereurs Latin de Constantinople (1204–1261/1272)," *Byzantina*, 14 (1988), pp. 1–220; and idem, "Recherches sur les documents non conservé concernant la Quatrième Croisade et les premières années de l'existence de l'empire latin de Constantinople, 1200–1206, *Byzantina*, 2 (1970), pp. 107–84.

247. See Lock, *The Franks in the Aegean*, pp. 40–3; E. H. McNeal and R. L. Wolff, "The Fourth Crusade," *HC* 2, pp. 182–3; and the text of the pact in Tafel and Thomas, *Urkunden zur älteren Handels- und Staatsgeschichte*, 1, pp. 444–52. A. J. Andrea has translated and discussed this document, called the "March Pact" as it appears in the papal registers (Register VII, 205); Andrea, *Contemporary Sources for the Fourth Crusade*, pp. 140–4.

248. Lock, *The Franks in the Aegean*, pp. 45–51; Wolff, "The Latin Empire of Constantinople," pp. 190–3; J. Longnon, "The Frankish States in Greece, 1204–1311, *HC* 2, pp. 235–9; and the text of the pact in, Tafel and Thomas, *Urkunden zur älteren Handels- und Staatsgeschichte*, 1, pp. 464–501.

249. R. Grousset, *Histoire des Croisades et du Royaume Franc de Jérusalem*, vol. III, Paris, 1936, pp. 173–4. In papers delivered in Athens and Istanbul in 2004, Benjamine Kedar has argued there were short-term and long-term benefits to the Latin Kingdom of Jerusalem from the Fourth Crusade. On balance, however, the impact seems to have been largely negative.

250. Runciman, *A History of the Crusades*, 3, p. 129.

251. Longnon, *Les Compagnons de Villehardouin*, p. 105.

252. Ibid., pp. 114–16.

253. Ibid., pp. 32–41.

254. Villehardouin, *La Conquête de Constantinople*, 2, pp. 122, 124, 136.

255. Paris Eracles, *RHC: Hist. Occid.* II, p. 278; and *Chronique d'Ernoul*, p. 378.

256. Runciman, *A History of the Crusades*, 3, p. 130.

257. Hamilton, *The Latin Church in the Crusader States*, pp. 248–9, deals with the Soffredus case at length.

258. John Faicete of Noyon, the new bishop of Acre in 1202, was also chancellor of Flanders. See Queller and Madden, *The Fourth Crusade*, pp. 85 and 201; and Longnon, *Les Compagnons de Villehardouin*, pp. 165–7.

259. Hamilton, *The Latin Church in the Crusader States*, p. 249. Villehardouin (*La Conquête de Constantinople*, p. 170) says both Peter of Bethlehem and John of Acre died at Adrianople.

260. See R. L. Wolff, "The Organization of the Latin Patriarchate of Constantinople," *Traditio*, 6 (1948), pp. 33–60; and Fedalto, *La Chiesa Latina in Oriente*, 1, pp. 27, 58, 143, 165, 227.

261. Folda, *ACHL* 1, pp. 34–5, 82–4, 97–100, 166–9, 290–9, 391–3.

262. Riant, "Des Dépouilles religieuses enlevées à Constantinople...," pp. 45–51, 62–5, 180–9.

263. Frolow, *La Relique de la Vraie Croix*, pp. 387–8, nos. 460–1.

264. Ibid., pp. 393–5, no. 467, 401, no. 479.

265. Ibid., pp. 427–30, no. 530.

266. Ibid., pp. 389–91, no. 464, 391–3, no. 465. See also, Riant, "Des Dépouilles religieuses enlevées à Constantinople," pp. 190–203.

267. Richard, *The Latin Kingdom of Jerusalem*, A, p. 210.

268. Paris Eracles, *RHC: Hist. Occid.* II, p. 305, and more briefly, Ernoul, *Chronique d'Ernoul*, p. 407.

269. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, p. 34.

270. Paris Eracles, *RHC: Hist. Occid.* II, p. 305. Three years later, Hugh married Alice, daughter of Henry of Champagne and Isabel of Jerusalem (ibid., pp. 308–9).

271. See J. M. Buckley ("The Problematical Octogenarianism of John of Brienne," *Speculum*, 32 (1957), p. 320) who offers his reinterpretation of the age of John of Brienne. See also my Chapter 4, n. 2.

272. Paris Eracles, *RHC: Hist. Occid.* II, pp. 306–12, with variant versions from other manuscripts, including the Eracles of Paris, MS fr. 9086; and the Lyon Eracles, both printed at the bottom of these pages. See also Runciman, *A History of the Crusades*, 3, pp. 132–3, LaMonte, *Feudal Monarchy in the Latin Kingdom of Jerusalem, 1100–1291*, pp. 45–8.

273. Paris Eracles, *RHC: Hist. Occid.* II, pp. 311–12.

274. Setton, *The Papacy and the Levant*, pp. 27–39; Edbury, *The Kingdom of Cyprus and the Crusades*, pp. 39–47.

275. See Cahen, *La Syrie du Nord à l'Époque des Croisades*, pp. 608–23; Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 532–6; Der Nersessian, "The Kingdom of Cilician Armenia," *HC* 2, pp. 649–51; and Hamilton, *The Latin Church in the Crusader States*, pp. 217–20.

276. Cahen, *La Syrie du Nord à l'Époque des Croisades*, pp. 611–13.

277. Hamilton, *The Latin Church in the Crusader States*, pp. 218–19.

278. Ibid., pp. 219–20. Hamilton makes the point that the new patriarch, Peter II, was Peter

of Ivrea, not Peter of Locedio, as Cahen claimed (Cahen, *La Syrie du Nord*, pp. 616–17). Peter of Locedio had traveled in northern Syria earlier in 1205.

279. The inventory of this treasure survives and is published in the General Cartulary of the Hospitallers, no. 1336. I discuss this inventory later.

280. On Baghras, see A. W. Lawrence, "The Castle of Baghras," T. S. R. Boase, *The Cilician Kingdom of Armenia*, New York, 1978, pp. 34–83.

281. Cahen, *La Syrie du Nord à l'Époque des Croisades*, pp. 619–21.

282. Benvenisti, *The Crusaders in the Holy Land*, p. 107.

283. Eliezer Stern, "The center of the order of the Hospitallers in Acre," *Qadmoniot*, 33 (2001), pp. 4–12 (in Hebrew).

284. The essential studies on Crac des Chevaliers are all based on the following: P. Deschamps, *Les Chateaux des Croisés en Terre Sainte*, vol. I, *Le Crac des Chevaliers*, Paris, 1934, pp. 121–6, 150–4, 166–7, 188–92, 233–7 (stone quality samples), 239–51 (mason's marks), 256–67, 279–83. Other interpretative studies include H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 146–63; T. S. R. Boase, "Military Architecture in the Crusader States in Palestine and Syria," *HC* 4, pp. 152–6; and W. Müller-Wiener, *Burgen der Kreuzritter*, Munich and Berlin, 1966, pp. 61–3.

285. Deschamps proposed to place all of these developments in what he calls the second Frankish campaign which he dates to the late twelfth and the early thirteenth centuries. I am arguing here to locate these constructions to the post-1202 earthquake period specifically on the basis that, even if work was planned and started shortly before 1202, it would have had to be repaired or rebuilt after the earthquake, and that this phase therefore as we see it, is essentially postearthquake 1202. In any case, all of this construction belongs to our period, 1192–1210, according to Deschamps; I am merely proposing to focus it more in 1202–3 than before.

286. Kennedy, *Crusader Castles*, pp. 152–6.

287. Among the innovations are new arrow slits and box machicolation, see Deschamps, *Le Crac des Chevaliers*, pp. 257–61, 262–6.

288. Crac's design is the most fully concentric of all the major Crusader castles.

289. The introduction of a full set of round towers is notable here, bearing in mind that the towers are round facing the enemy to strengthen the defensive system of the walls, but that they are usually rectangular in the inner or rear section.

290. These arrow slits are sophisticated, angled down and slightly enlarged at the bottom to facilitate firing at attackers close to the walls. Kennedy calls this system of "wall-head defenses" the most elaborate and developed found anywhere in the Latin East. Kennedy, *Crusader Castles*, pp. 153–5.

291. Ibid., pp. 154–5.

292. Kennedy, *Crusader Castles*, pp. 155–6. Kennedy does not speculate on what these parallels mean, but we should entertain questions they raise. Consider the problems of how knowledge of architectural developments were learned on each side, of what the makeup of masons yards for military architecture of this sort may have been, and at least the possibility that Muslim masons may have been employed in this work as part of the team, given the large manpower requirements for huge projects of this sort under relatively isolated circumstances. What Kennedy does say that is important is that even though we cannot be certain of the relative dating of Crusader versus Muslim construction in this period, "the evidence for cross-cultural transmission of military design is indisputable" (p. 156).

293. Opinions differ somewhat on how Baybars captured Crac des Chevaliers in 1271. See Kennedy, *Crusader Castles*, p. 150. But the facts seem clear: Baybars, having mounted a formidable siege, sent forged letters, allegedly from Hospitallers in Tripoli, to the garrison ordering them to surrender. See C. Marshall, *Warfare in the Latin East, 1192–1291*, Cambridge, 1992, p. 235. I discuss this problem in Chapter 7.

294. On the Church of Notre Dame at Tortosa, see T. S. R. Boase, "Ecclesiastical Architecture and Sculpture," in *HC* 4, pp. 108–10; idem, *Castles and Churches of the Crusading Kingdom*, pp. 93–6; P. Deschamps, *Terre Sainte Romane*, Abbaye Sainte-Marie de la Pierre-qui-vire, 1964, pp. 231–6; M. Pillet, "Notre-Dame de Tortose," *Syria*, 10 (1929), pp. 40–51; and C. Enlart, *Les Monuments des Croisés dans le Royaume de Jérusalem: Architecture religieuse et civile*, vol. 2, Paris, 1928, pp. 395–426.

295. See Enlart, *Les Monuments des Croisés*, 2, pp. 403–8; and Folda, *The Nazareth Capitals*, pp. 33–6.

296. The existence of an icon in the shrine of the Virgin at Tortosa seems to be a post-medieval report, but one that may reflect medieval practice. See Enlart, *Les Monuments des Croisés*, 2, pp. 403–8.

297. Enlart, *Les Monuments des Croisés*, 2, pp. 420–2.

298. Ibid., Album, 2, Paris, 1926, pls. 158, fig. 502; 159, figs. 505 and 506; 164, fig. 498; 165, fig. 524; 167, fig. 525; 171, fig. 541.

299. Andrea, "The Anonymous Chronicler of Halberstadt's Account of the Fourth Crusade," pp. 469–70.

300. It is, of course, notable that in this region, it was the Templars in Tortosa and the Hospitallers nearby in Margat and Crac des Chevaliers who were the major architectural patrons.

301. The obvious known *comparanda* are the chapels in the great castles of Crac des Chevaliers, which was repaired and partly rebuilt after the 1202 earthquake, and at Margat, but there may have been a number of others.

302. Runciman, *A History of the Crusades*, 3, pp. 385–6.

303. On the issue of degenerate coinage types of the *Amalricus* denier, see A. G. Malloy et al., ed. A. G. Berman, *Coins of the Crusader States*, New York, 1994, pp. 58–60, 77–9.

304. D. M. Metcalf, *Coinage of the Crusades and the Latin East*, London, 1995, p. 66.

305. Ibid., pp. 71–2; and J. Porteous, "Crusader Coinage with Greek or Latin Inscriptions," *HC* 6, p. 381.

306. Porteous, "Crusader Coinage," pp. 381–2.

307. Metcalf, *Coinage of the Crusades*, pp. 73–4. See also the remarks of A. G. Malloy, I. F. Preston, A. I. Seltman, et al., *Coins of the Crusader States*, ed. A. G. Berman, New York, 1994, pp. 61–2, where the coin is dated after 1210.

308. J. Porteous, "Crusader Coinage," p. 399; and Porteous, *The John J. Slocum Collection of Coins of the Collection*, Sotheby's London, 1997, p. 38, no. 259. See also Malloy et al., *Coins of the Crusader States*, ed. Berman, pp. 78–9.

309. Malloy et al., *Coins of the Crusader States*, ed. Berman, pp. 58–9.

310. M. L. Bates and D. M. Metcalf, "Crusader Coinage with Arabic Inscriptions," *HC* 6, pp. 444–6; and Metcalf, *Coinage of the Crusaders*, pp. 44, 47–50; and Porteous, *The John J. Slocum Collection*, p. 41, no. 295. See also Malloy et al., *Coins of the Crusader States*, ed. Berman, pp. 117–18.

311. Metcalf, *Coinage of the Crusaders*, pp. 107–16. See also Malloy et al., *Coins of the Crusader States*, ed. Berman, pp. 65–9, 86–9.

312. Porteous, "Crusader Coinage," p. 382. Porteous cites the passage in the "Livre au Roi," (*RHC: Lois* I, p. 617): "nul home ne deit aver port, euvreneour ne monee labourant, fors li rois, par dreit ne par l'assize." He notes that the minting of coins was a crime punishable by loss of fief.

313. Metcalf, *Coinage of the Crusaders*, pp. 92–5.

314. Metcalf, *Coinage of the Crusaders*, pp. 89–90; Porteous, "Crusader Coinage," pp. 383–4. Porteous thinks the coins of Reynaldus ended with Saladin's conquest; Metcalf is not so sure.

315. Metcalf, *Coinage of the Crusaders*, p. 91; Porteous, "Crusader Coinage," pp. 383–4.

316. Malloy et al., *Coins of the Crusader States*, ed. Berman, p. 156, interprets this building as the mosque converted into the cathedral of Sidon. Porteous, "Crusader Coinage," p. 384, says the building is unidentified.

317. Metcalf, *Coinage of the Crusaders*, p. 151.

318. Metcalf, *Coinage of the Crusaders*, pp. 164–7, and pl. 21, nos. 534–42.

319. Metcalf, *Coinage of the Crusaders*, pp. 130–2.

320. Metcalf, *Coinage of the Crusaders*, pp. 135–6.

321. Metcalf, *Coinage of the Crusaders*, pp. 169–70.

322. I discussed this contribution in n. 167.

323. Gunther of Pairis, *Hystoria Constantinopolitana*, pp. 175–7, trans. A. J. Andrea, *The Capture of Constantinople*, pp. 125–7. See my discussion of these relics in nn. 217, 218.

324. M.-M. Gauthier has been one of the few scholars to discuss the appearance of Western metalwork in the Crusader Levant. See her communication, "Objets d'art du métal en Terre Sainte," séance du 27 Juin, *Bulletin de la Société Nationale des Antiquaires de France*, 1984, pp. 177–84, esp. pp. 182–3.

325. See n. 210.

326. The Western objects apparently given to the bishop of Bethlehem, and still found in the collection of the Franciscans in Jerusalem, are concrete examples of Western gifts to holy sites. The question is when these various gifts were made and what other gifts like them may have been made to other churches in the Holy Land.

See M. Piccirillo, *The Studium Biblicum Franciscanum Jerusalem Museum*, Jerusalem, 1983, pp. 82–4. "The Treasure of Bethlehem" includes two bronze bowls, two nielloed candlesticks, an enamelled candlestick, an enamelled crozier found in 1863, and a peal of 13 bells and 250 copper organ pipes found in 1906. I discuss some of these objects in relation to Bethlehem later.

327. None of the recent articles on the metalwork seems to consider this; see, for example, D. Thurre, "Les reliquaires au temps des croisades d'Urbain II à saint Louis, (1096–1270), pp. 362–7, and A. Ducellier, "Le sac de Constantinople en 1204 et sa posterité," pp. 368–77, both in *Les Croisades*, ed. Rey-Delqué.

328. Gunther of Pairis, *Hystoria Constantinopolitana*, pp. 168–9, trans. A. J. Andrea, *The Capture of Constantinople*, pp. 119–20.

329. J. Delaville le Roulx, *Cartulaire Général de l'Ordre des Hospitallers de S. Jean de Jérusalem (1100–1300)*, vol. 2, Paris, 1897, pp. 112–13, no. 1336.

330. We know that since the mid-twelfth century the patriarch of Antioch possessed the castle of Cursat (Qusair), just south of Antioch, which he used as a residence and for the purpose of safeguarding ecclesiastical treasure (Kennedy, *Crusader Castles*, p. 84). It is puzzling therefore in this inventory to find that the patriarchal treasure was placed in the hands of the Hospitallers. Perhaps it was some kind of traveling collection that was part of the cappella of the patriarch? See the discussion later on the issue of a prelate's cappella. My thanks to J. Riley-Smith for his thoughts on the matter.

331. In trying to think about what was included in this treasury, I am the beneficiary of comments from my colleague Richard Pfaff, with his knowledge of liturgics and liturgical history in the Middle Ages. I would like to express my gratitude to him for sharing his thoughts in response to this text and my questions about it. He is, however, in no way responsible for my speculations about the objects presented in this important list.

It is particularly unfortunate that we cannot know exactly what kind of a golden cross this was, decorated with precious stones. As possible parallels we have, for example, the golden crosses preserved in the Treasury of Oignies for general comparison. We have wondered why no reliquaries were included in this treasury. Is this golden cross possibly a reliquary of the True Cross; is this what we should understand by "veram crucem"?

332. "Texta" presumably refers to gospelbooks here, so we must imagine a handsome gospelbook with a treasure binding referred to by this entry.

333. I am puzzled by this entry; what would a set of small ritual knives be used for in the liturgy. Could they have been used for circumcision rituals?

334. Among this array of liturgical garments, it is interesting to consider what a special stole would look like that was only to be used for confirmation rites. Similarly in the following entry, what does a silver vase commissioned to be used at confirmation rites look like?

335. It is interesting to note how many liturgical girdles or belts there are in this list. One wonders exactly what function each of them might have had.

336. This is presumably a thurible, that is, a vessel for incense.

337. It is curious in this list that there are sandals but no episcopal stockings.

338. One wonders if this "iconia" might not be a panel painting encased in a silver riza, therefore giving direct evidence for the use of such holy images by Latin clergy.

339. The punctuation is not always reliable in this list, but here these two entries seem to refer to a cope with gold orphreys.

340. These entries appear to refer to a set of liturgical vestments, including a saffron-colored silk tunic, casula, and dalmatic.

341. As another example of how these entries seem to go together, is this not a red stole maniple for use at Mass?

342. In the case of all three of these service books, the missal, the gospelbook, and the epistolary, we are left to wonder if they may have been painted with figural decorations?

343. These golden pins might have been used to hold special liturgical vestments in place, such as a pallium.

344. I am not sure what "Narengi" refers to. This is presumably where this samite comes from.

345. As discussed later in Chapter 4, Jacques de Vitry apparently commissioned a miter to be made for him in Acre while he was resident there as bishop. We may wonder how many of the objects presented in this list might have been made in the East and how many came from western Europe.

346. There are several specialized liturgical belts presented in this list. I wonder what this type of belt, a "zone," was used for. Does it have anything to do with Eastern, that is, Orthodox liturgical vestments?

347. See the textiles in the following exhibitions: R. Grönwoldt, "Kaisergewänder und Paramente," *Die Zeit der Staufer*, I, pp. 607–30; mostly from Sicily; and the English miter in Hoffmann, *The Year 1200*, I, p. 330, no. 338. See also the examples in *Les Trésors des Eglises de France*, 2nd edn., Paris, 1965, for example, no. 426, pl. 8; no. 502, pl. 32; no. 842, pl. 9.

348. I would cite in particular the Musée Historique des Tissus at Lyon, with its important collection and its research library. The textiles identified as "Sicilian" in this collection and in other collections seem to me to bear further study with regard to possible Crusader origins.

349. I discuss this in Chapter 2. Despite the idea that Heraclius sought refuge in Antioch found in a later source, the likelihood remains he would have gone to Tyre or Tripoli, which were closer, and, more importantly, Tyre was the second city in ecclesiastical rank in the Latin Kingdom. It is odd, however, that Heraclius disappears from view in the written sources for many months after he leaves Jerusalem in October 1187.

350. G. Fagniez, "Inventaire du Trésor de Notre-Dame de Paris de 1343 et de 1416," *Revue Archéologique* (1974), pp. 157–65.

351. On the St. Denis treasury, see D. Gaborit Chopin, "Documents, inventaires, conservation des objets," *Le Trésor de Saint-Denis*, Paris, Musée du Louvre, 1991, pp. 26–38; and for Sainte-Chapelle, see K. Gould, "The Sequences *De Sanctis Reliquis* as Sainte-Chapelle Inventories," *Medieval Studies*, 43 (1981), pp. 315–41. Gould's article includes an appendix that lists twenty-three major relics kept in the Grande Châsse as recorded in seven documents (pp. 336–41).

Whereas the Sainte-Chapelle treasury contained well-known dominical relics from the Holy Land, such as the Crown of Thorns, the St. Denis treasury featured royal joyaux instead of relics associated with Christ. That is not to say there were no objets from the Near East in the St. Denis treasury; one notes a number of vessels of Fatimid origin, and there is the Vase d'Aliénor that was Sassanid in origin. One wonders if any of these could have entered the treasury as Crusader gifts. See *Le Trésor de Saint-Denis*, pp. 160–72.

On the Eleanor Vase, G. Beech has now proposed that it came to France from the last king of Saragossa, Imad al-Dawla (1110–30), as a diplomatic gift. See G. Beech, "The Eleanor of Aquitaine Vase, William IX of Aquitaine and Muslim Spain," *Gesta*, 30 (1993), pp. 3–10; and idem, "The Eleanor of Aquitaine Vase: Its Origins and History to the Early Twelfth Century," *Ars Orientalis*, XXII (1995), pp. 69–79.

Folda, "Les manuscrits enluminés dans les états de la Terre Sainte," *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, pp. 302; 403, no. 87; pls. on pp. 307, 311.

The main contents/decoration of this codex, Naples, Bibl. Nazionale MS.VI.G II, is as follows: Missal in Latin:

237 folios, 26.5 × 18.5 cm, 32 lines written in one column.
two full-page miniatures, fifteen illuminated initials of which three are large and one of these three includes a figural design.
[Incomplete at the beginning (lacking a calendar) and the end.]
fol. 1r, *Proprium de tempore*
  2r, (*Oratio in die natalis domini*)
  Initial C(*oncede de quesumus*)
81r, (*sequuntur orationes solempnes*)
  Initial O(*remus dilectissimi*)
82v, (*Benedictio cerei*)
  Initial E(*xultet iam*)
95r, Initial D(*eus qui hanc sacratissimam*), medallion portrait of Christ
96v, Panel Miniature, Crucifixion (19.7 × 13 cm)
97r, Panel Miniature, *Maestas Domini* (19.4 × 12.8 cm)
97v, Preface
  Initial P(*er omnia secula*), large letter (21.9 × 10.7 cm)
98r, Initial V(*ere dignum*), in panel (7.8 × 7.5 cm)
98v, Canon
  Initial T(*e igitur*), in panel (10.5 × 8.5 cm)
100r, Initial R(*esurrexi et adhuc*)
  Initial D(*eus qui hodierna die*)
115r, Initial V(*iri galilei*)
118v, (*in die pentecosten*)
  Initial S(*piritus domini*)
  Initial D(*eus in hodierna die*)
160r, *Proprium sanctorum*
161r, (*in natale s. silvestri pp.*)
  Initial S(*acerdotes tui*)
168v, (*in purificatione s. marie*)
  Initial O(*mnipotens sempiterne deus*)
206v, (*in die omnium sanctorum*)
  Initial O(*mnipotens sempiterne deus*)
221v, *Comune sanctorum*
237r, *Officium mortuorum*
[Incomplete at the end.]

370. These manuscripts are the Missal, Paris, Bibl. Nat., MS lat. 12056; and the sacramentary, Rome, Bibl. Angelica, MS D.7.3, and Cambridge, Fitzwilliam Museum, McClean MS 49. See Buchthal, *MPLKJ*, pp. 140–2, cat. Nos. 4 and 2/3, and Folda, *ACHL* 1, pp. 159–63 (Missal) and pp. 100–5 (sacramentary).

371. Buchthal, *MPLKJ*, p. 34.

372. Folda, *ACHL* 1, pp. 137–59.

373. See *Les Croisades*, ed. Rey-Delqué, p. 307, for a full-page color reproduction.

374. Buchthal, *MPLKJ*, p. 34.

375. Ibid.

376. See, *Les Croisades*, ed. Rey-Delqué, p. 311, for a full-page color reproduction.

377. Folda, *ACHL* 1, pp. 463–7. V. Pace has argued that the MS was done in south Italy in the 1190s (idem, "Un'ipotesi par la storia sella produzione libraria italo-meridionale: la Bibbia 'Bizantina' de San Daniele del Friuli," in *La Miniatura Italiana in Età Romanica e Gotica*, ed. G. V. Schoenburg, Florence, 1979, pp. 131–57. More recently, L.-A. Hunt has argued the Bible should be localized in Jerusalem in the third quarter of the twelfth century and that the Bible was available in Syria when the Buchanan Bible was made. I find Hunt's argument more interesting, but I think the reason the Bible was available was that it was made in Antioch just before 1187. See L.-A. Hunt, "The Syriac Buchanan Bible in Cambridge," *Orientalia Christiana Periodica*, 57 (1991), pp. 354–5.

378. All Sinai icons discussed in this volume are illustrated in the text and/or in the Handlist, presented as the Appendix here.

379. The plaque is located on the left door along the carved vertical member between the third and fourth wood panels on the inner side. The location can be seen in the photo published by D. Bahat, "The Doors of the Monastery of St. Catherine at Mt. Sinai," *Le Porte di Bronzo dall'Antichità al secolo XIII*, ed. S. Salomi, Rome, 1990, text, pp. 135–7, album, pl. CXXIX, no. 1; or (less good) by J. Galey, *Sinai and the Monastery of St. Catherine*, Garden City, NY, 1980, fig. 26. Weitzmann illustrates the plaque: K. Weitzmann, *Illustrated Manuscripts at St. Catherine's Monastery on Mount Sinai*, Collegeville MN, 1973, p. 26, fig. 36.

The problem with this enamel plaque is that we do not know exactly when it was done, or at what date it may have been nailed to the wooden doors. It obviously could have appeared there well after the Crusader period, even though the book that it came from may have been in the library at St. Catherine's in the twelfth or the thirteenth century, quite possibly the gift of a Crusader.

It should be pointed out that there is a second *Maestas* enamel plaque at Sinai, now preserved in the library, dating from about 1225–35, probably made in central Italy. There is an excellent color plate in Y. Ikonomaki-Papadopoulos, "Church Metalwork," *Sinai: Treasures of the Monastery of St. Catherine*, ed. K. Manafis, p. 279, fig. 1. For the references to the "Star Group" enamels to which this plaque appears to belong, see nn. 35–7, p. 390. I discuss this plaque in Chapter 5.

380. K. Weitzmann, "Four Icons on Mount Sinai," [5 (1972)], pp. 291–3. See also Chapter 4 for further discussion on this icon, nn. 341 ff.

381. Ibid., p. 292.

382. R. Nelson, "An Icon at Mt. Sinai and Christian Painting in Muslim Egypt during the Thirteenth and Fourteenth Centuries," *AB*, 65 (1983), pp. 201–12, L.-A. Hunt, "Christian-Muslim Relations in Painting in Egypt of the Twelfth to mid-Thirteenth Centuries: Sources of Wallpainting at Deir es-Suriani and the Illustrations of the New Testament MS Paris Copte-Arabe 1/Cairo, Bibl. 94," *Cahiers Archéologiques*, 33 (1985), p. 141.

383. Nelson, "An Icon at Mt. Sinai...", p. 207, n. 31.

384. On the Qara frescoes, see the works cited in n. 391; on the Margat paintings, see Chapter 2.

385. L.-A. Hunt, "The Syriac Buchanan Bible in Cambridge (Cambridge University Library, MS. Oo.1. 1,2)," *Orientalia Christiana Periodica*, 57 (1991), pp. 331–69, fig. 8 (fol. 191r).

386. See the discussion in Chapter 4.

387. We know that the castle chapel at Crac received some kind of program of fresco painting and that the castle chapel at Margat was intended to have such a program. We have no evidence for the Church of Notre Dame at Tortosa, but we would expect there may have been plans for a program there even if no evidence survives to modern times.

388. J. Folda and P. French with P. Coupel, "Crusader Frescoes at Crac des Chevaliers and Marqab Castle," *Dumbarton Oaks Papers*, 36 (1982), pp. 181–7. P. Deschamps published only a single photograph of it in his later general survey, *Terre Sainte Romane*, p. 137, pl. 40, with brief descriptive comments.

389. Folda et al., "Crusader Frescoes," pp. 182–3.

390. The monastery of Mar Musa al-Habashi in western Syria has paintings fairly securely dated in the 1190s, for example. Even though the hand of our artist is not found there, the same type of robust and rustic style can be seen. This is one possible site with local artists from which our painter might have learned. On Mar Musa, see E. Dodd, *The Monastery of Mar Musa al-Habashi, near Nebek, Syria*, Toronto: Pontifical Institute of Medieval Studies, 2000; and the publication of

Dr. Dodd cited in n. 391. There are other possible sites as well, but none quite so securely dated to this period.

391. A number of Orthodox and Maronite establishments are known in this area, from Mar Marina, just south of Tripoli, stretching north and eastward to Qara and Mart Schmuni in Syria, east of Crac. Their paintings date from the mid-twelfth to the late thirteenth centuries. Although no Presentation of Christ scene painted in fresco is extant in any of these monuments, the existence of such an image or icons with this scene is obviously possible. Determination of the complete repertoire of paintings can now be seen in the recent publication by Dr. Erica Dodd, *Medieval Painting in the Lebanon*, photographs: Raif Nassif, Syriac Inscriptions: Amir Harrak, Architectural Plans: George Michell and Jean Yasmine, Wiesbaden, 2004.

The primary publications for current research are the following: Ch.-L. Brossé, "Les Peintures de la Grotte de Marina près Tripoli," *Syria*, 7 (1926), pp. 30–43; M. Tallon, "Peintures byzantine au Liban: Inventaire," *Mélanges de l'Université St. Joseph*, 38 (1962), pp. 279–94; J. Leroy, "Découvertes de Peintures Chrétiennes en Syrie," *Les Annales Archéologiques Arabes Syriennes*, 25 (1975), pp. 95–113; Y. Sader, *Peintures Murales dans les Eglises Maronites Médiévales*, Beirut, 1987; E. C. Dodd, "Notes on the Wall Paintings of Mart Shmuni," in *Archéologie au Levant, Recueil Roger Saideh, Collection de la Maison de l'Orient Méditerranéen*, 12, série archéologique 9, Lyon, 1982, pp. 451–62; and E. C. Dodd, "The Monastery of Mar Musa al-Habashi, near Nebek, Syria," *Arte Medievale*, 6 (1992), pp. 61–132. Additional comments are found on these paintings in J. Folda, "The Saint Marina Icon: *Maniera Cypria*, *Lingua Franca*, or Crusader Art?" *Four Icons in the Menil Collection*, ed. B. Davezac, Houston and Austin, 1992, pp. 118–25; and L.-A. Hunt, "A Woman's Prayer to St Sergios in Latin Syria: Interpreting a Thirteenth-Century Icon at Mount Sinai," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 98, 107–10.

392. A less successful job of integrating Byzantine and Western formulations can be seen, for example, in the Deësis chapel in the Church of the Nativity at Bethlehem, which admittedly suffers from the modern renovation work done on it. See Folda, *ACHL* I, pp. 165–6. Some of the most successful examples of achieving this kind of integration in Crusader monumental painting can be found in the twelfth-century mosaics done at the Holy Sepulcher or in the transepts of the Church of the Nativity at Bethlehem (Folda, *ACHL* I, pp. 236–8, 352–3, 358) or the contemporary frescoes from the Damascus Gate Chapel (Folda, *ACHL* I, pp. 380–1).

393. Folda et al., "Crusader Frescoes," pp. 187–96.

394. Compare the St. George fragments (Folda et al., "Crusader Frescoes," p. 192, fig. 22) with the frescoes of St. Sergios and St. George (Dodd, "The Monastery of Mar Musa," pp. 85–7, figs. 28, 29).

395. Compare the drapery design of the seated figure at Crac (Folda et al., "Crusader Frescoes," pp. 190–1, and fig. 15) with those of the seated figures in the Last Judgment (Dodd, "The Monastery of Mar Musa," pp. 96–107, figs. 43, 44, 47).

396. Note, however, the proposed attribution to this period of one layer of the paint surface found on the Maestas Domini icon, discussed earlier.

397. J. Folda, "The Freiburg Leaf: Crusader Art and *Loca Sancta* around the Year 1200," *The Experience of Crusading*, vol. 2, *Defining the Crusader Kingdom*, eds. P. Edbury and J. Phillips, Cambridge, 2003, pp. 113–34; idem, "Entry 318. The Freiburg Leaf," in *The Glory of Byzantium: Art and Culture of the Middle Byzantine Era, A.D. 843–1261*, eds. H. C. Evans and W. D. Wixom, New York, 1997, p. 482; R. W. Scheller, *Exemplum: Model-Book Drawings and the Practice of Artistic Transmission in the Middle Ages, (ca. 900–ca. 1470)*, Amsterdam, 1995; pp. 136–43, cat. No. 8 (with additional bibliography on pp. 137–8); E. Sebald, "Blätter aus einem Musterbuch," *Ornamenta Ecclesiae*, vol. I, Cologne, 1985, pp. 316–18, no. B 89 (with excellent full-page color reproduction); R. Kroos, "Einzelblatt aus einem Musterbuch," *Die Zeit der Staufer*, vol. 1, Stuttgart, 1977, pp. 542–3 (with extensive bibliography), vol. 2, pl. 513; K. Hoffmann, "Christ and Zacchaeus; St. Theodore and companion riding," *The Year 1200*, vol. I, New York, 1970, pp. 272–3, no. 268.
Freiburg-im-Breisgau, Augustinermuseum, inv. No. G. 23/fols. 1a–c.

The main contents/decoration of these leaves is as follows:
Parchment, three leaves:
Fol. 1a, 32.2 × 20.0 cm:
Recto: catalogue of the manuscript in which these leaves were found, including descriptions of 78 scenes from the Bible and the lives of the saints.
The entries for the drawings on fol. 1c, listed below, are as follows:
"Ubi Zacheus in arbore," and
"Theodorus equitans cum alio."
Verso: ruled for musical notation, with Sequence on the Virgin.
Fol. 1b, 35.5 × 22.1 cm:
Recto: hymn to St. Nicholas.
Verso: Marian Sequence.
(N.B. Neither the Sequences nor the hymns on fols. 1a or 1b are listed in the contents on 1a recto.)
Fol. 1c, 31.0 × 20.2 cm:
Recto: two drawings:
Upper register: Christ and Zacchaeus (Luke 19: 1–10) in silverpoint, with inscriptions "Christus" and "Zachaeus" in brown ink by a hand later than the drawing.
Lower register: Mounted Soldier Saints, St. George (left) and St. Theodore (right) in sepia, with inscriptions "consodalis" and "Theodorus" over the soldiers in brown ink by a hand later than the drawing; to the far right of Theodore's head, "lxxv," in red ink referring to the entry of this image on fol. 1a (recto).
The drawings also have bistre washes and a few touches of red.
Verso: homily on 1 Corinthians 3:8 ff.
The "Freiburg Leaf" as we use it here refers to fol. 1c recto with these two drawings.
These two drawings are the only ones extant from this artist's sketch book, which apparently contained seventy-eight drawings, judging from the list of contents on fol. 1a (recto).

398. E. Kitzinger, "Norman Sicily as a Source of Byzantine Influence on Western Art in the Twelfth Century," in *Byzantine Art – An European Art, Lectures*, Athens, 1966, pp. 135–40. See also O. Homburger, "Das Freiburger Einzelblatt – Der Rest eines Musterbuch der Stauferzeit?" *Studien zur Kunst des Oberrheins, Festschrift für Werner Noack*, Konstanz and Freiburg, 1959, pp. 16–23.

399. O. Demus, *The Mosaics of Norman Sicily*, London, 1950, p. 446: "The artist, probably an Augustinian monk himself, seems to have been a learned man, interested in the humanities."

400. Scheller, *Exemplum*, pp. 139, 141.

401. O. Demus, *Byzantine Art and the West*, New York, 1970, pp. 34–5.

402. K. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], pp. 78–9.

403. To the left, "consodalis," and to the right, "theodorus." Consodalis has been interpreted a number of ways but appears to mean simply "companion soldier." The left-hand saint has been identified as Constantine, Demetrius, Theodore Tiro, or George. See Scheller, *Exemplum*, pp. 142–3, n. 12.

404. Weitzmann, "Icon Painting in the Crusader Kingdom [3 (1966)], p. 79.

405. Weitzmann illustrates a Byzantine example from Sinai, an icon with Sts. Victor, Menas, and Vincent, ibid., p. 79, and fig. 63.

406. Most of our five Crusader examples of mounted soldier saints are from the years 1250–91 (nos. 63, 80, 357, 386, 1463), but there is no reason there could not have been earlier examples. See Weitzmann, ibid., pp. 79–80.

407. Weitzmann, ibid., pp. 80–1.

408. As I have already discussed, there seems to be evidence that an early layer of paint on the Maestas Domini icon panel from Sinai may date to this period.

409. I. Sterns, "The Teutonic Knights in the Crusader States," *HC* 5, pp. 319–22.

It is also possible that the artist might have made a pilgrimage to St. Catherine's Monastery on Mount Sinai from Acre while he was traveling in the Holy Land, but this seems much less likely given the evidence at hand. In any case we do not have a specific icon which exactly corresponds to these two saints in these two poses at Sinai or anywhere else at the moment.

410. G. Schiller, *Iconography of Christian Art*, trans. J. Seligman, vol. I, Greenwich, CT, 1971, p. 156, fig. 441.

411. See O. Demus, *The Mosaics of San Marco in Venice*, vol. I, Chicago and London, 1984, pp. 116, 123, 124, pl. 149 (south transept, east vault, south half, lower tier), twelfth century.

412. See, for example, Wilbrand of Oldenburg (1212) and Thietmar (1217): Wilbrand of Oldenburg, in D. Baldi, *Enchiridion Locorum Sanctorum*, Jerusalem, 1982, pp. 351–2, no. 555; and Thietmar, in J. C. M. Laurent, *Mag. Thietmari Peregrinatio*, Hamburg, 1857, p. 31.

413. J. Wilkinson, *Jerusalem Pilgrimage. 1099–1185*, London, 1988, p. 138 (trans. W. Ryan).

414. See Folda, *ACHL* 1, pp. 456 and 459, pls. 10.18a–b.

415. L.-A. Hunt ("A woman's prayer to St Sergios in Latin Syria . . . ," p. 112, see also Brossé, "Les Peintures de la Grotte de Marina près Tripoli," pp. 5–6, pl. VII, 2, right side) proposed the idea that the artist saw a fresco with this scene at the grotto of Mar Marina near Tripoli. In fact she suggested that the artist might have gotten the idea for both of his sketches at Mar Marina, but the fact is that the Zacchaeus image only has the publican in the tree without the other figures, and no pair of mounted soldier saints exists there, only a single figure of the mounted St. Demetrius spearing a figure on the ground. Hunt is correct to point to the existence of sources for our artist in the Holy Land, but I think the artist was using an icon from Acre and a image of the Zacchaeus story in Jericho, as indicated in my earlier discussion.

416. H. Flamm, "Eine Miniatur aus dem Kreise der Herrad von Landsberg," *Repertorium für Kunstwissenschaft*, 37 (1915), p. 130.

417. It is evident from reading the list of subjects on folio 1a (recto) that the array of images was somewhat random but could be seen to have been done in groups, in the manner that we find in the sketchbook of Villard de Honnecourt dating to the 1230s in France. In the earlier discussion, I dealt with listings found in one such group. This issue requires further study in the case of the Freiburg model book.

418. Folda, "The Freiburg Leaf," *Experience of Crusading*, p. 132.

419. On the Crusader confraternities, see J. Riley-Smith, "A Note on Confraternities in the Latin Kingdom of Jerusalem," *Bulletin of the Institute of Historical Research*, XLIV (1971), pp. 301–8. There is a large bibliography on the Italian confraternities, of which the following are representative: J. Henderson, *Piety and Charity in Late Medieval Florence*, Oxford, 1992; B. Wilson, *Music and Merchants: The Laudesi Companies of Republican Florence*, Oxford, 1992, I. Hueck, "La tavole di Duccio e la Compagnia delle Laudi di Santa Maria Novella," *La Maestà di Duccio restaurata, Gli Uffizi Studi e Ricerche*, 6 (1990), pp. 33–46; C. Barr, *The Monophonic Lauds and the Lay Religious Confraternities of Tuscany and Umbria in the Late Middle Ages*, Kalamazoo, 1988; and G. G. Meersseman, *Ordo Fraternitatis: Confraternite e pietà dei laici nel medioevo*, Rome, 1977.

420. J. Folda, "Crusader Painting the Thirteenth Century: The State of the Question," *Il Medio Oriente e l'Occidente nell'Arte del XIII Secolo*, Bologna, 1982, pp. 103–7.

421. Z. Jacoby, "The Impact of Northern French Gothic on Crusader Sculpture in the Holy Land," *Il Medio Oriente e l'Occidente nell'Arte del XIII Secolo*, pp. 123–7.

422. See, for example, B. Porée, "Le Royaume de Jérusalem aux XIIe et XIIIe siècles: les céramiques croisées, témoins des échanges culturels et commerciaux," *Pèlerinages et Croisades*, Paris, 1995, pp. 333–50; and R. D. Pringle, "Pottery as Evidence for Trade in the Crusader States," *I Comuni italiani nel regno crociato di Gerusalemme*, eds. G. Airaldi and B. Z. Kedar, Genoa, 1986, pp. 451–75.

423. The relics of the True Cross recorded in the period 1192 to 1210 reflect diminished activity in the Holy Land as supplier during this period. See A. Frolow, *La Relique de la Vraie Croix*, Paris, 1961, pp. 352–404, nos. 387–486. Many of the works cited came from Constantinople as the result of the Crusader sack of the city in 1204. The source of many others is not known and warrants further research. But the lack of identifiable relics of the True Cross originating specifically from the Holy Land in these years seems to indicate a reduction of the importance of the Crusader States as compared with its role before 1187.

424. I have discussed this text earlier; see Chapter 2, nn. 208–10. The question remains as to exactly when the conditions described for Christian pilgrims visiting Jerusalem under the Muslims contained in this text can be identified as first appearing. At present we cannot determine this with any certainty, but it is possible, even likely, that such conditions first existed after 1198 when access to the holy places was eased under the truce signed that year. The questions of when the text of "the condition of the city of Jerusalem" was first written and what its model or models may have been, and when it was first revised, remain to be answered.

425. One of the only specific examples of such diplomatic gifts known to me is the robe sent to Count Henry by Saladin. On 2 September 1192, an envoy of Saladin was sent to Henry to confirm the treaty that had been signed between Richard I and Saladin. Ibn al-Athir reports that, "He [Henry of Champagne] asked him [Saladin] for the gift of a robe of honour, and said: 'You know that to put on the *qaba* and the *sharbush* is not approved of among us, but I would put them on if they came from you, because of the regard I have for you.' Saladin sent him sumptuous robes of honour, among them a *qaba* and a *sharbush*, and he wore them in Acre." The *qaba* is a kind of robe, and the *sharbush* is a tall triangular cap (cited in A. Shalem, *Islam Christianized*, Frankfurt am Main, 1996, p. 47).

CHAPTER 4: THE CRUSADER STATES IN THE TIME OF KING JOHN OF BRIENNE AND THE FIFTH CRUSADE

THE ADVENT OF KING JOHN OF BRIENNE, 1210–1225

1. S. Runciman, *A History of the Crusades*, 3, Cambridge, 1954, p. 132.

2. J. M. Buckley, "The Problematical Octogenarianism of John of Brienne," *Speculum*, 32 (1957), p. 320, proposes this revised estimate of his age. Virtually every other modern historian, including Runciman, estimates that he was about sixty at the time of his first marriage! In light of the lack of comment in the sources on him being so aged with regard to his (eventually) three marriages and to his prowess in battle with the Fifth Crusade and later as Emperor of the Latin Empire, it seems that based on documentary evidence, Buckley's interpretation is correct.

3. Paris Eracles, *RHC: Hist. Occid.*, II, p. 308.

4. All three versions of the Eracles record the events of the marriage and coronation, but only the Paris Eracles gives the dates, ibid. The coronation could not have taken place on the first of October if it occurred eighteen days after the 14th of September as the text states. Hence it must have been October 2, 1210. See also Marsanne Eracles (=Paris, BN MS fr. 9086), *RHC: Hist. Occid.*, II, p. 308 (first variant), and Lyon Eracles, ibid. (second variant).

5. The Paris Eracles (*RHC: Hist. Occid.*, II, pp. 315–16) tells a story that indicates Walter was forced to leave Cyprus under duress for what Runciman calls suspicion of "gross peculation." (Runciman, *A History of the Crusades*, 3, p. 138.)

6. Paris Eracles, *RHC: Hist. Occid.*, II, p. 317

7. G. J. Wightman, *The Walls of Jerusalem*, Sydney, 1993, pp. 278–9. Al-Mu'azzam was known to be involved in a number of building activities in Jerusalem during these years, possibly right up to the time of the Fifth Crusade.

8. Runciman, *A History of the Crusades*, 3, p. 133; M. N. Hardwicke, "The Crusader States, 1192–1243," *HC* 2, p. 537.

9. Paris Eracles, *RHC: Hist. Occid.*, II, p. 317. Al-Maqrizi says only that the truce between al-Adil and the Franks was signed, without giving any details.

10. Lyon Eracles, *RHC: Hist. Occid.*, II, pp. 308–9 (second variant).

11. J. Sayers, *Innocent III*, London and New York, 1994, pp. 164–71.

12. For the Albigensian Crusade, see B. Hamilton, *The Albigensian Crusade*, London, 1974, and A. P. Evans, "The Albigensian Crusade," *HC* 2, pp. 277–324; for the Crusade in Spain, J. Riley-Smith, *The Crusades: A Short History*, New Haven, 1987, pp. 139–41.

13. Riley-Smith, *The Crusades*, pp. 130–2.

14. N. P. Zacour, "The Children's Crusade," *HC* 2, pp. 325–42. One wonders if these popular Crusade movements were not some kind of spontaneous demonstrations directed at Jerusalem to counter the growing number of papal-sponsored military operations elsewhere.

15. C. R. Cheney and W. H. Semple, *Selected Letters of Pope Innocent III Concerning England (1198–1216)*, London and Edinburgh, 1953, pp. 144–7.

16. Innocent III, "Quia maior," trans. L. and J. Riley-Smith, *The Crusades, Idea and Reality: 1095–1274*, London, 1981, pp. 119. In this phrasing, Innocent was no doubt responding to the plea of King John of Brienne.

17. As C. T. Maier has pointed out, what was new about these liturgical directives was that they were not being installed in the wake of a major disaster or an immediate crisis. Instead Innocent obviously envisioned that these liturgical practices would help to build momentum toward the coming Crusade, whose date of departure, at the time of this encyclical in 1213, had not even been set. C. T. Maier, "Crisis, Liturgy and the Crusade in the Twelfth and Thirteenth Centuries," *Journal of Ecclesiastical History* 48 (1997): 634.

18. Innocent III, "Quia maior," transl. L. and J. Riley-Smith, *The Crusades, Idea and Reality: 1095–1274*, p. 123–4.

19. The infant queen is widely referred to in the literature as Yolande, probably to try to avoid confusion, but her name is Isabel.

20. The issues surrounding John of Brienne's kingship/regency in these years were complicated, issues that J. Riley-Smith alludes to in, idem, *The Feudal Nobility and the Kingdom of*

Jerusalem, 1174–1277, London and Basingstoke, pp. 186–7.

21. J. La Monte, *Feudal Monarchy in the Latin Kingdom of Jerusalem, 1100–1291*, Cambridge, MA, 1932, pp. 49–50.

22. B. Hamilton, "King Consorts of Jerusalem and Their Entourages from the West from 1186 to 1250," *Einwanderer und Minderheiten. Die Kreuzfahrerstaaten als multikulturelle Gesellschaft*, ed. H. E. Mayer, Munich, 1997, p. 20.

23. J. Prawer, *Histoire du Royaume Latin de Jérusalem*, vol. 2, rev. edn., Paris, 1970, p. 124.

24. P. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, Woodbridge, 1997, pp. 32–3.

25. P. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, pp. 47–8.

26. Buckley, "The Problematical Octogenarianism of John of Brienne," p. 320, proposes that he was in his early forties and not in his mid-sixties as he has been seen by other historians. Given the fact that he has children by both of his first two wives, the younger age seems more realistic and is supported by the documents.

27. Ernoul, *Chronique d'Ernoul*, p. 411. Although the account by Ernoul is admittedly very compressed and not a little confusing, it is interesting to think of the possibility of the king of Armenia visiting Acre, furthering the strong ties between Acre and Sis during these years.

28. S. Der Nersessian, "The Kingdom of Cilician Armenia," *HC* 2, pp. 650–1. Miss Der Nersessian points out that court positions and their nomenclature at Sis were modified along Frankish lines, that the Armenian feudal system was modified according to Frankish feudal principles, and that for a lawcode, the Armenians eventually adopted the Assizes of Antioch, the last after Levon's death. It remains to be seen to what extent the influence of Frankish art is evident during this time. Miss Der Nersessian has always maintained that Frankish artistic influence meant influence from the West, but given the direct ties between the Latin Kingdom and Sis in the years 1214–19 by virtue of John of Brienne's marriage to Princess Stephanie, we must reconsider the possibility of Crusader influence.

29. Ibid., p. 651, n. 33.

30. Edbury, *The Kingdom of Cyprus*, p. 46 and nn. 28, 29.

31. My comments are based primarily on the brief passages in the Paris Eracles (*RHC: Hist. Occid.*, II, pp. 313–14, 318) and the following studies: C. Cahen, *La Syrie du Nord*, pp. 600–15; Runciman, *A History of the Crusades*, 3, pp. 135–9; Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 535–8; and S. Der Nersessian, "The Kingdom of Cilician Armenia," *HC* 2, pp. 649–51; B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 217–25; and H. E. Mayer, *The Crusades*, trans. J. Gillingham, Oxford, 1988, pp. 252–4. Even compared to the Eracles, the *Chronique d'Ernoul* has very little to say about the situation in Antioch after about 1208.

32. Hamilton, *The Latin Church in the Crusader States*, p. 221 and n. 1.

33. It was not unusual to have a Greek Orthodox bishop serving under a Latin patriarch in the Crusader States, especially in the patriarchal see of Jerusalem, as Hamilton has pointed out (*The Latin Church in the Crusader States*, pp. 181–2), but it was exceptional to have a Greek serving as the patriarch in place of or along with the Latin patriarch. It is noteworthy also that most Orthodox bishops served as coadjutors; that is, they administered the Orthodox community within a Latin diocese, but they had no territorial jurisdiction. There had not been Orthodox coadjutors in the see of Antioch before 1206, but after the advent of Symeon there were (ibid., p. 314). In fact there was only one Orthodox archbishop who was recognized with full diocesan jurisdiction, namely, the archbishop abbot of Sinai at St. Catherine's Monastery. There were of course no Franks residing in the Sinai Peninsula, which was his territory. Curiously, however, the archbishop of Sinai appeared in the ecclesiastical lists as suffragan to the Latin metropolitan bishop of Petra (ibid., p. 182).

34. Mayer, *The Crusades*, p. 253.

35. Hamilton, *The Latin Church in the Crusader States*, pp. 313–15.

36. Cahen, *La Syrie du Nord*, p. 620; J. Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus, 1050–1310*, London, 1967, p. 139.

37. This Raymond was the son of Bohemond III and brother of Bohemond IV. He had married Alice of Armenia.

38. At this point Buckley, "The Problematical Octogenarianism of John of Brienne," p. 320, interprets John of Brienne's age to be mid-forties, not sixty-nine as he is conventionally thought of. Again the younger age is more likely given the rigors of the Crusade he was beginning, and the fact that none of the sources remarks on him being unusually old.

39. Unfortunately we know comparatively little about the life of Jacques de Vitry despite the importance of his activities in the Holy Land and the relatively large number of his writings that survive. Besides the comments of the various versions of the Eracles, and the *Chronique d'Ernoul*, as well as the narrative sources for the Fifth Crusade, especially the *Historia Damiatina* of Oliver of Paderborn (*Die Schriften des kölner Domscholasters, späteren Bischofs von Paderborn und Kardinal-Bischofs von S. Sabina*, ed. Herman Hoogeweg, Tübingen, 1894, pp. 159–282) the following works are essential when dealing with the life and works of Jacques de Vitry in the Latin Kingdom: R. B. C. Huygens, *Lettres de Jacques de Vitry*, Leiden, 1960; P. J. Cole, *The Preaching of the Crusades in the Holy Land*, 1095–1270, Cambridge MA, 1991, pp. 132–41; Jacques de Vitry, *Historia Occidentalis*, ed. J. F. Hinnebusch, Fribourg, 1972, pp. 3–31; Jacques de Vitry, *Histoire Occidentale*, trans. G. Duchet-Suchaux, Paris, 1997, pp. 1–58; P. Funk, *Jakob von Vitry: Leben und Werk*, Berlin, 1909, rpt. Hildsheim, 1973, pp. 4–75; and T. F. Crane, ed., *The Exempla... of Jacques de Vitry*, 1890, rpt. New York, 1971, pp. xxii–xxxiv. See also now, especially, J. Longère, "Jacques de Vitry: La Vie and les Oeuvres," in Jacques de Vitry, *Histoire Occidentale*, trans. Duchet-Souchaux, pp. 7–49.

40. The wording of the Paris Eracles (*RHC: Hist. Occ.*, II, p. 319) suggests that the author thought Jacques de Vitry was present at the council. A number of other prelates from the Holy Land were also in attendance. The patriarchs of Jerusalem, Antioch, and Constantinople were there along with many of their suffragan bishops. In addition the Primate of the Maronites and a representative of the Melkite archbishop of Alexandria was there. See R. Foreville, *Histoire des Conciles Oecumeniques*, vol. VI, Latran I, II, III, IV, Paris, 1965, pp. 391–5, 444–9, 457–8. Foreville does not include the bishop of Acre in his list, but of course Jacques de Vitry was not consecrated bishop until after the Council. Neither Funk nor Longère comment directly on this matter.

41. Huygens, *Lettres*, pp. 53, 83.

42. After Jacques de Vitry returned to Europe in 1226, he served for three years in the diocese of Liège. In 1228 Gregory IX formally accepted his resignation from the "difficult" see of Acre. Subsequently he was made cardinal bishop of Tusculum, and he served in the Roman curia from 1229 to 1239. He died on 1 May 1240 in Rome and his remains were taken to Oignies for burial. See Longère, "Jacques de Vitry: La Vie and les Oeuvres," pp. 14–16.

43. Paris Eracles, *RHC: Hist. Occ.*, II, p. 319. Both the Lyon Eracles and the Marsanne, which focus on the Fifth Crusade without the details on local history in the Latin Kingdom and the northern Crusader States (after sections on the Latin Empire and the activities of Frederick II to 1227), have similar passages about Jacques de Vitry.

44. "Est... modica et sanctissima capella, quam beatus Petrus, dum transiret Antiochiam, in honore beate Virginis edificavit, que fuit prima ecclesia in honore beate Virginis, ut dicitur, edificata, in qua dominus tot miracula facit, quod non solum christiani, sed et etiam Sarraceni ad eam causa peregrinationis veniunt." Huygens, *Lettres*, p. 94.

45. Cole, *The Preaching of the Crusades*, pp. 133–9. Cole analyzes the content and argument of two model sermons. See also J. Powell, *Anatomy of a Crusade, 1213–1221*, Philadelphia, 1986, pp. 51–65.

46. Cole, *The Preaching of the Crusade*, p. 134, and Powell, *Anatomy of a Crusade*, p. 55.

47. Cole, *The Preaching of the Crusade*, pp. 134–7, and Powell, *Anatomy of a Crusade*, pp. 55–6. One of the important aspects of this indulgence was that for the first time it was decreed by the Council that someone who equipped another person for the Crusade for the requisite three years should receive the same plenary indulgence as the genuine Crusader.

48. The *exempla* appeared in his "sermones vulgares" and were collected for use by others later in the thirteenth century. Because Jacques de Vitry was such a popular preacher, there were a number of these collections and there are a large number of *exampla* attributed to him. See Crane, *The Exempla*, pp. xl–liii.

49. There are only two stories that refer to other Crusades, one to the Albigensian and one to the Iberian Crusade.

50. Crane, *The Exempla*, nos. LXXXVI, LXXXVII, XC, pp. 38–9, 41.

51. Ibid., nos. LXXXVIII, p. 39, XC, p. 41, CLXIII, pp. 70–1.

52. Ibid., no. CXIX, pp. 54–5.

53. Ibid., nos. LXXXVI, p. 39, LXXXVII, p. 39, LXXXIX, p. 41, XC, p. 41, CXXI, pp. 55–56, CXXII, p. 56, CXXIV, p. 57.

54. Out of 314 *exempla*, 12 deal directly with the Crusades to the East in some manner; 9 of these 12 are positive, only 3 are negative in content.

55. Hamilton, *The Latin Church in the Crusader States*, pp. 316–17.

56. J. Gardner, "Altars, Altarpieces, and Art History: Legislation and Usage," *Italian Altarpieces, 1250–1550*, ed. E. Borsook and F. S. Gioffredi, Oxford, 1994, p. 6.

57. With this matter in mind, it must be said that one of the most difficult issues to determine in the Crusader States is the situation in the churches for the celebration of the liturgy. Just as the jubé, rood screen, or tramezzo typically found in most Latin churches during the thirteenth century in the West were mostly swept away in later periods in the face of Baroque design and/or Counter-Reformation policy, so too the altar and its accoutrements in Crusader churches have been lost almost entirely. This loss has occurred mostly either by destruction or by the changeover of use from that of a Christian church to that of a Muslim mosque. In the case of those few churches maintained in continuous Christian use, like the Church of the Holy Sepulcher, the loss has occurred by a combination of destruction (e.g., the 1808 fire in the Church of the Holy Sepulcher), changes of jurisdiction, e.g., from Latin to Greek Orthodox as in the Church of the Nativity in Bethlehem, and changing liturgical practices through the centuries. There is no example known to me of a Crusader church in which the original Crusader altar is extant, much less an altar with its original candlesticks, crucifix, and other accoutrements from the thirteenth century. We also need to consider what it meant to have a "crucifix" on the altar, whether such a crucifix was sculptured or painted, how large it was, and where it was to be placed.

58. Prawer, *The Latin Kingdom of Jerusalem*, p. 189.

59. Hamilton, *The Latin Church in the Crusader States*, p. 315.

60. Hamilton cites the case of how Honorius protected the property of the Monastery of St. Catherine's on Crete in the 1210s and 1220s from tithes and confiscation.

61. For the Fifth Crusade, the main sources and studies I have relied on include the following works. Among the sources there are the various versions of the continuations, especially the Paris and the Lyon Eracles, the *Chronique d'Ernoul*, the *Historia Damiatina* of Oliver of Paderborn, and the letters of Jacques de Vitry, for which, see previously, n. 39. For a complete citation of all sources relevant to the Fifth Crusade and a major interpretative study, see J. Powell, *Anatomy of a Crusade, 1213–1221*, Philadelphia, 1986; T. C. Van Cleve, *HC* 2, pp. 377–428; H. E. Mayer, *The Crusades*, trans. J. Gillingham, Oxford, 1988, pp. 220–7; J. Riley-Smith, *The Crusades, a Short History*, New Haven and London, 1987, pp. 145–9; J. Richard, *The Latin Kingdom of Jerusalem*, vol. A, trans. J. Shirley, Amsterdam, New York, Oxford, 1979, pp. 216–27; J. Prawer, *Histoire du Royaume Latin de Jérusalem*, vol. 2, Paris, 1970, pp. 127–74; Runciman, *A History of the Crusades*, 3, pp. 132–70; and J. P. Donovan, *Pelagius and the Fifth Crusade*, Philadelphia, 1950, pp. 25–97.

62. R. Röhricht, *Studien zur Geschichte des Fünften Kreuzzüges*, Innsbruck, 1891, rpt. Aalen, 1968, pp. 79–135, published a critical list of participants documented as having gone on the Fifth Crusade. This list is reevaluated, revised, and expanded with important criteria added, by Powell, *Anatomy of a Crusade*, pp. 209–58. The documented names indicate that whereas the participation of Germans and Austrians was predictably high, the number of French, Italians, and English was also very high, and indeed the French may outnumber any other group in these listings. The most surprising finding, however, is that there are almost no Hungarians, fewer than ten are listed in a total of 1,273 names; the total is 1,060 if the names in the "Collection Courtois" are invalid because these documents are forgeries. These statistical facts of course only reflect the particularities of the sources used to compile them, and indicate that caution must be used in assessing the sources of manpower from lists like these. Nonetheless such lists are extremely useful for other indications about who took the Cross and where they were from, who went and who did not, who returned and who did not.

63. Powell, *Anatomy of a Crusade*, pp. 123–7.

64. Paris Eracles, *RHC: Hist. Occ.*, II, pp. 321–3.

65. Oliver of Paderborn, *Historia Damiatina*, ed. H. Hoogeweg, *Die Schriften des Kölner Domscholasters, späteren Bischofs von Paderborn,...*, Tübingen, 1894, pp. 163–4. Van Cleve claims that this relic was the remnant of the True Cross lost at Hattin, but there is no evidence for this interpretation. Van Cleve, "The Fifth Crusade," *HC* 2, p. 390. See below.

66. This must have been a different relic of the True Cross from that lost by the Crusaders at the battle of Hattin. That relic was said to still be in Muslim hands and would again become a bargaining point at Damietta later on. It is not known what relic this might have been, but we do know that Duke Leopold of Austria had received a large relic of the True Cross in 1205 (Frolow, *La Relique de la Vraie Croix*, p. 389, no. 463 [Frolow has Leopold VII, but he presumably means Leopold VI]). Perhaps this relic had been brought by Duke Leopold, but no chronicle identifies it as such. Other than the case of Martin of Pairis, discussed earlier, we hear very little of Crusaders or pilgrims who bring relics to the Holy Land, but we must consider this possibility.

67. Powell, *Anatomy of a Crusade*, p. 130, interprets this action as a "reconnaissance in force" to locate food supplies. Abu Shama's account of this campaign supports this interpretation: Abu Shama, "Livre des Deux Jardins: Complément," *RHC: Hist. Orient.*, V, p. 162.

68. Paris Eracles, *RHC: Hist. Occ.*, II, pp. 323–4.

69. Oliver of Paderborn, *Historia Damiatina*, pp. 163–8. Powell, *Anatomy of a Crusade*, p. 130, points out that Oliver did not arrive in the Holy Land until April 1218, just after these early operations. This may explain why his account of these three forays are so neatly outlined and organized. For a map succinctly illustrating these three campaigns, see Prawer, *Histoire du Royaume de Jérusalem*, vol. 2, p. 139, map 3.

70. See above, n. 17.

71. One source says that Andrew had been poisoned during his stay in Acre and had to recover his health. See Van Cleve, "The Fifth Crusade," *HC* 2, p. 393, n. 54.

72. Johannes de Thurocz, *Chronica Hungarorum*, vol. I, textus, eds. E. Galántai and J. Kristó, *Bibliotheca Scriptorum Medii Recentisque Aevorum*, ser. 9, vol. VII, Budapest: Akadémiai Kiadó, 1985, p. 136.

73. Ibid., and Runciman, *A History of the Crusades*, 3, p. 149 and n. 3. The text of the chronicle says that along with the specific relics mentioned already there were, "et alie multa, quas potuit tunc congregare" (p. 136).

74. Tripoli is also possible as a place of acquisition, because just before he decided to go home, Andrew had attended the wedding of Bohemond IV and Melisend, the half-sister of King Hugh of Cyprus. Andrew was, however, only there briefly for the wedding so it is unlikely that he had much time to look for relics. It was there that Hugh died on 10 January and shortly thereafter, when Andrew returned to Acre that he had announced his decision to return to the West. See Runciman, *A History of the Crusades*, 3, p. 149.

75. Oliver of Paderborn, *Historia Damiatina*, p. 168.

76. Paris Eracles, *RHC: Hist. Occ.*, II, p. 325.

77. Ibid., p. 326.

78. Oliver of Paderborn, *Historia Damiatina*, pp. 169–72. See also H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 124–7; C. N. Johns, "Guide to 'Atlit," *Pilgrim's Castle ('Atlit), David's Tower (Jerusalem), and Qal'at ar-Rabad ('Ajlun)*, ed. R. D. Pringle, Aldershot and Brookfield, 1997, pp. 14–18; T. S. R. Boase, "Military Architecture in the Crusader States in Palestine and Syria," *HC* 4, pp. 157–9; and P. Deschamps, *La Défense du Royaume de Jérusalem*, vol. II, *Les Châteaux des Croisés en Terre-Sainte*, texte, Paris, 1939, pp. 24–33.

79. "Inventa est etiam ibi pecunia in moneta modernis ignota, collata beneficio filii Dei militibus suis ad alleviandos sumptus et labores." Oliver of Paderborn, *Historia Damiatina*, p. 170.

80. We do not have many reports of the Crusaders discovering coin hoards like this one. Presumably these were Phoenician coins, since 'Atlit is known now to have been built on an ancient Phoenician site.

81. Paris Eracles, *RHC: Hist. Occ.*, II, pp. 325–6. Prawer points out the castle was also called "Castrum Filii Dei," by Oliver of Paderborn, but the name given it by Walter of Avesnes is the one by which it became known. Prawer, *Histoire du Royaume Latin de Jérusalem*, vol. 2, p. 147, n. 36. Johns, "Guide to 'Atlit," ed. Pringle, *Pilgrim's Castle ('Atlit)*, I, p. 16.

82. There had also been attacks mounted on Egypt by the Crusaders earlier, in the 1160s, but after 1187, it was Richard I and the Fourth Crusade that refocused Crusader military thinking on invading Egypt as an effective way of recapturing Jerusalem.

83. On Damietta as reconstructed in its medieval context, see A. G. Guest, "The Delta in the Middle Ages," *Journal of the Royal Asiatic Society...*, October, 1912, pp. 941–4, 970–1, with detailed map of the Delta region. Note that the medieval city of Damietta was razed by the Mamluks in 1250. For the location of the

medieval city of Damietta compared to that of modern Damyat, see the map in Powell, *Anatomy of a Crusade*, p. 139.

84. Runciman, *A History of the Crusades*, 3, p. 151.

85. Ibid., pp. 113–14.

86. Oliver of Paderborn, *Historia Damiatina*, p. 175–6.

87. Paris Eracles, *RHC: Hist. Occ.* II, p. 329.

88. Oliver of Paderborn, *Historia Damiatina*, p. 237.

89. Oliver of Paderborn, *Historia Damiatina*, pp. 178, 183.

90. Powell, *Anatomy of a Crusade*, p. 144.

91. Paris Eracles, *RHC: Hist. Occ.*, II, p. 334, and Ernoul, *Chronique d'Ernoul*, pp. 421–3. There is some ambiguity about the date of al-Mu'azzam's attack on Caesarea, but Ernoul links it with with the feast of the decapitation of St. John the Baptist on 29 August, which seems accurate from other considerations. See also Johns, "Guide to 'Atlit," ed. Pringle, *Pilgrim's Castle ('Atlit)*, I, pp. 18, 20 and n. 2.

92. Oliver of Paderborn, *Historia Damiatina*, p. 193; Powell, *Anatomy of a Crusade*, p. 148; Donovan, *Pelagius and the Fifth Crusade*, p. 52, n. 73.

93. Johannes de Tulbia, *De Domine Johanne Rege Ierusalem*, ed. R. Röricht, *Quinti Belli Sacri: Scriptores Minores*, Geneva, 1879, p. 125, and the *Gesta Obsidionis Damiate*, ed. R. Röricht, *Quinti Belli Sacri: Scriptores Minores*, Geneva, 1879, p. 83, says, "sexta pars exercitus mortua est." Powell, *Anatomy of a Crusade*, pp. 147–9, gives overall casualty estimates from a modern scholarly perspective.

94. Powell, *Anatomy of a Crusade*, pp. 147–50; Van Cleve, "The Fifth Crusade," *HC* 2, pp. 406–9; Donovan, *Pelagius and the Fifth Crusade*, pp. 51–3; Runciman, *A History of the Crusades*, 3, pp. 156–7, places less emphasis on the activities of Pelagius at this point than the others.

95. Donovan, *Pelagius and the Fifth Crusade*, p. 44, and nn. 29 and 30.

96. Johannes de Tulbia, *De Domine Johanne Rege Ierusalem*, p. 124.

97. *Gesta Obsidionis Damiate*, ed. Röhricht, pp. 84–5.

98. Ibn al-Athir, *The Perfect History*, ed. F. Gabrieli, *Arab Historians of the Crusades*, p. 258. It is at this point, in February, that some historians believe that al-Kamil began the process of opening negotiations with the Crusaders leading toward a possible truce. The evidence is unclear, but certainly the Muslims were now at a very vulnerable point in their attempt to defend Egypt against the invading Crusaders. See Van Cleve, "The Fifth Crusade," *HC* 2, pp. 409–10.

99. On the French, see J. Greven, "Frankreich und der fünfte Kreuzzug," *Historisches Zeitschrift*, 43 (1923), pp. 41–50.

100. Jacques de Vitry, *Lettres de Jacques de Vitry*, p. 118.

101. Powell, *Anatomy of a Crusade*, p. 157.

102. Ibn al-Athir, *The Perfect History*, p. 260, and Abu Shama, see n. 113.

103. Wightman, *The Walls of Jerusalem*, pp. 278–82.

At this point, some modern historians including Van Cleve and Mayer (Van Cleve, *The Fifth Crusade*, p. 409, and Mayer, *The Crusades*, pp. 223–4) have proposed the idea that al-Kamil attempted to make a truce with the Crusaders. Neither Powell nor Runciman, nor for that matter Donovan, agree with this. Powell states categorically that an offer of truce by al-Kamil at this time was unlikely given the circumstances, and points out that part of the basis for thinking there was an offer is based on a mistake in the translation of an Arabic source. Furthermore, he says that the passage in the Paris Eracles sometimes thought to support the notion there was a truce does not belong to this period or these circumstances. See Powell, *Anatomy of a Crusade*, p. 155, n. 61.

104. This quotation is from Wightman, *The Walls of Jerusalem*, p. 278. The source text is by Abu Shama, "Livre des Deux Jardins: Complément," *RHC: Hist. Orient.*, V, pp. 173–4.

105. *History of the Patriarchs of the Egyptian Church*, eds. and trans. A. Khater and O. H. E Khs-Burmester, vol. IV, part 1, Cyril III, Ibn Laklak (1216–43), Publications de la Société d'Archéologie Copte, Textes et Documents, XIV, Cairo, 1974, pp. 61–2.

106. Paris Eracles, *RHC: Hist. Occ.*, II, p. 339. The Paris Eracles only mentions Toron and Safed. Runciman, *A History of the Crusades*, 3, p. 158, also mentions Baniyas, but I am not certain of his source. He seems to be looking at a source mentioning slightly later developments and reading it back into this situation. In any case, the history of Baniyas is complicated and must be separated from that of Qalat Nimrud nearby. See Folda, *ACHL* 1, pp. 108–9, and 515 n. 113.

107. These actions are all reported in Oliver of Paderborn, *Historia Damiatina*, pp. 211–18; *Gesta Obsidionis Damiate*, pp. 93–7, 101–4; John of Tulbia, *De Iohanne Rege Ierusalem*, pp. 129–33, as synthesized by Powell, *Anatomy of a Crusade*, pp. 152–3, 157–8, and Runciman, *A History of the Crusades*, 3, pp. 158–9.

108. The story of Francis and Sultan al-Kamil is contained in the lives of the saint, in the *Acta Sanctorum* for October 4, pp. 612–17, and in the *Chronique d'Ernoul*, see n. 109. The Paris Eracles does not mention Francis until after the Crusaders take Damietta, just before he leaves to return home, and it does not tell the story of his visit with Sultan al-Kamil (Paris Eracles, *RHC: Hist. Occ.*, II, p. 348).

There is a large bibliography on Francis's visit to Damietta during the Fifth Crusade. I found the following studies useful: B. Z. Kedar, *Crusade and Mission: European Approaches toward the Mission to the Muslims*, Princeton, 1984, pp. 119, 121–6; J. Powell, "Francesco d'Assisi e la Quinta Crociata: Una Missione di Pace," *Schede Medievali*, 4 (1983), pp. 68–77; Hinnebusch, *The Historia Occidentalis of Jacques de Vitry*, bibliography on "Saint Francis in the Orient," p. 291; R. B. C. Huygens, "Les passages des lettres de Jacques de Vitry relatifs à saint François d'Assise et à ses premiers disciples," *Hommages à Léon Herrmann, Latomus*, 44 (1960), pp. 446–53; M. Roncaglia, "San Francesco d'Assisi in Oriente," *Studi Francescani*, 50 (1953), pp. 97–106; L. Lemmens, "De Sancto Francisco Praedicante coram Sultano Egypti," *Archivum Franciscanum Historicum*, 19 (1926), pp. 559–78; V. Ortroy, "S. François d'Assise et son voyage en Orient," *Analecta Bollandiana*, 31 (1912), pp. 451–65; and G. Golubovich, *Biblioteca bio-bibliografica della Terra Santa e dell'Oriente Francescano*, vol. I, Quaracchi, 1906, p. 94.

The most insightful analysis of the content of the story of St. Francis meeting with the Sultan is found in C. T. Maier, *Preaching the Crusades: Mendicant friars and the Cross in the Thirteenth Century*, Cambridge, 1994, pp. 8–17.

109. This version of the meeting between al-Kamil and Francis is based on the story told by Ernoul, *Chronique d'Ernoul*, pp. 431–5. Even though the text only refers to ".II. clers" and does not refer to Francis by name, the story appears to refer in detail to the episode of Francis and the sultan.

The story of Francis's encounter with the sultan is told in a number of the lives of St. Francis, including "The First Life of St. Francis," by Thomas of Celano. Written at the command of Pope Gregory IX, it was completed on 25 February 1229. In this version, the earliest among the various lives of the saint, there are fewer details of the encounter, but the sultan is portrayed as receiving Francis honorably, and offering him many gifts. In the later lives, such as the "Major Life of Saint Francis" by St. Bonaventure (1260–3), and in the "Little Flowers of Saint Francis (early fourteenth century), Francis is portrayed more heroically as a saint. See *St. Francis of Assisi, Writings and Early Biographies*, ed. M. A. Habig, 3rd rev. edn., Chicago, 1973, pp. 276–7 (Thomas of Celano, Ch. XX, paragraph 57), pp. 702–5 (St. Bonaventure, ch. IX, sects. 7–9), and pp. 1353–6 (the "Little Flowers," ch. 24).

110. It should be noted at this point that there is a major problem of determining the exact timing of certain events in regard to this Crusade, in terms of both when they happened and how they relate to the sequencing of other events, in the narrative sources. This is notable especially with the Paris Eracles and the *Chronique d'Ernoul* in relation to Oliver of Paderborn. Modern historians, especially Powell, Van Cleve, and Runciman, therefore frequently differ on their interpretation of the sequencing of events and their causal relationship. The questions of when truce proposals were made and how many such proposals there were is one important problem throughout this Crusade.

111. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 341–2. See also the discussion of Van Cleve, "The Fifth Crusade," *HC* 2, pp. 414–15, and Runciman, *A History of the Crusades*, 3, pp. 160–1.

112. Oliver of Paderborn, *Historia Damiatina*, p. 218, reports that a Christian prisoner brought word of this temporary truce some time early in September. Runciman, *A History of the Crusades*, 3, p. 160.

113. If they were thinking of Frederick II's army, however, they would be sadly disappointed, because despite Pelagius's optimism, Frederick would not come east until 1228, long after the Fifth Crusade was over.

114. *Gesta Obsidionis Damiate*, ed. Röhricht, p. 104. We must treat these figures with due caution, but the size of this estimate makes clear that the departure appeared to be a very large Crusader contingent.

115. Oliver of Paderborn, *Historia Damiatina*, pp. 218–19.

116. Lyon Eracles, *RHC: Hist. Occid.*, p. 340. The count of Nevers was banished from camp for neglecting his canton.

117. Van Cleve, "The Fifth Crusade," *HC* 2, p. 418. This is an edited quote from Oliver of Paderborn, *Historia Damiatina*, pp. 224–5, ch. 32. Reports vary as to the date of the fall of Damietta: Oliver of Paderborn says 5 November, ibn al-Athir says 8 November (ibn al-Athir, *The Perfect History*, ed. Gabrieli, p. 259), and the Paris Eracles says that the city was captured on a Thursday in January 1219, which is completely inaccurate and uncorroborated by other chronicles (Paris Eracles, *RHC: Hist. Occ.*, p. 346).

118. Jacques de Vitry, *Lettres de Jacques de Vitry*, p 135.

119. Oliver of Paderborn, *Historia Damiatina*, p. 236. Other source have different numbers, but the ratio of survivors is similarly small.

120. *History of the Patriarchs of the Egyptian Church*, eds. Khater and Khs-Burmester, vol. IV, part 1, pp. 66–8.

121. "Aurum, argentum, pretiosos lapides, purpuras, samitos, ornamenta carissima & vasa aurea & argentea sine numero." *Gesta Obsidionis Damiate*, ed. Röhricht, p. 114.

122. Ibn al-Athir, *The Perfect History*, ed. Gabrieli, p. 260.

123. Powell, *Anatomy of a Crusade*, pp. 161–5; R. Röhricht, *Studien zur Geschichte des Fünften Kreuzzuges*, pp. 41–8.

124. Powell, *Anatomy of a Crusade*, pp. 162–3, and Mayer, *The Crusades*, p. 225; Runciman, *A History of the Crusades*, 3, p. 162.

125. D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd rev. edn., London, 1995, pp. 80–5.

126. Ibid., p. 74.

127. We shall discuss later the vexed question of these deniers with the controversial image of the king on the obverse and the "+DAMIETA" legend on the reverse.

128. Powell, *Anatomy of a Crusade*, p. 164; Jacques de Vitry, *Lettres de Jacques de Vitry*, p. 102.

129. Ernoul, *Chronique d'Ernoul*, pp. 414–15.

130. Runciman, *A History of the Crusades*, 3, p. 164.

131. Oliver of Paderborn, *Historia Damiatina*, pp. 240–1.

132. Ibid., p. 239, and Johannes de Tulbia, *De Iohanne Rege Ierusalem*, ed. Röhricht, pp. 139–40.

133. Powell, *Anatomy of a Crusade*, p. 176.

134. Ibid.

135. The Paris Eracles, *RHC: Hist. Occ.* II, p. 349, more or less accounts for John's departure from Damietta in terms of dealing with the rights of his wife in Cilician Armenia.

Ernoul, *The Chronique d'Ernoul*, pp. 427–8, has a curious story about Stephanie's death resulting from a severe beating that King John gave her. This report seems unlikely because Stephanie and their son were his means to claim the throne of Armenia.

136. Richard, *The Latin Kingdom of Jerusalem*, vol. A, pp. 224–5. Richard also reports that King John had sought help from Hermann of Salza, master of the Teutonic Knights, after the conquest of Damietta, who gave him half of his share of the spoils.

137. Powell, *Anatomy of a Crusade*, p. 176–7, 180; Donovan, *Pelagius and the Fifth Crusade*, p. 70; Van Cleve, "The Fifth Crusade," *HC* 2, pp. 420–1; Runciman, *A History of the Crusades*, 3, pp. 164–5. Powell (p. 180) clarifies the idea of "temporalia" in regard to Pelagius's authority, pointing out it means he had authority for the parceling out of land taken by conquest, but not that he was appointed as the military commander of the Crusade.

138. Richard, *The Latin Kingdom of Jerusalem*, vol. A, p. 224.

139. Jacques de Vitry, *Lettres de Jacques de Vitry*, p. 135, "Rex autem Ierusalem cum omnibus fere militibus suis exercitum deseruit."

140. "Multas causas pretendens ad excusationem sui," see Oliver of Paderborn, *Historia Damiatina*, p. 248.

142. "Inertes et effeminati commessationibus et ebrietatibus, fornicationibus et adulteriis, furtis et lucris pessimis infectus est populus." Oliver of Paderborn, *Historia Damiatina*, p. 252.

143. Powell, *Anatomy of a Crusade*, p. 117.

144. As far as we know these imperial contingents, and most of the others since May 1218, came directly to Egypt and did not stop at Acre going in either direction. Thus again, as with the Fourth Crusade, the activities of the Crusade in the field were drawing resources away from the Latin Kingdom when, at this point, conceiveably soldiers from the West could have been helpful to King John of Brienne in defending the Holy Land from al-Mu'azzam. Thus the fulfillment of a Crusade vow was continuing to become more like a feudal obligation to a lord, in this case the pope, and less directly tied to Jerusalem and the Holy Land.

145. Oliver of Paderborn, *Historia Damiatina*, pp. 248–9.

146. Oliver of Paderborn, *Historia Damiatina*, pp. 254–6; see also Kennedy, *Crusader Castles*, p. 127, and R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. I, Cambridge, 1993, pp. 69–71.

147. Powell, *Anatomy of a Crusade*, p. 184.

148. Ibid., pp. 184–5.

149. Oliver of Paderborn, *Historia Damiatina*, p. 257.

> 150. Si manda li soudans al cardinal et as Crestiens que s'il li voloit rendre Damiete, il li renderoit toute le tiere de Jherusalem, si comme il l'avoient tenue, fors le Crac; et si refremeroit Jherusalem à son coust et tous les castiaus qui estoient abatu, puis qu'il murent à aler à Damiete; et si donroit trives [à] .xxx. ans, tant qu'il poroient bien avoir garnie le tiere des Crestiens. (Ernoul, *Chronique d'Ernoul*, p. 442.)

151. Powell, *Anatomy of a Crusade*, p. 184; Runciman, *A History of the Crusades*, 3, p. 166.

152. Powell, *Anatomy of a Crusade*, p. 186.

153. Ibid., pp. 185–7; Runciman, *A History of the Crusades*, 3, pp. 166–7.

154. Ibid., p. 187, discusses the issue of how many soldiers were part of the attacking force and how many were in the garrison at Damietta. The surprising finding is that more than half the army stayed in Damietta to defend it from possible attack, and the clear implication is that Louis of Bavaria's limited objective was truly reflected in the size of the army that marched south toward Talkha-Mansourah. Whatever dreams of grand conquest Pelagius may have been harboring, Duke Louis was facing the limited reality of what was in fact militarily practicable in the circumstances.

155. Oliver of Paderborn, *Historia Damiatina*, p. 270.

156. *History of the Patriarchs of the Egyptian Church*, ed. Khater and Khs-Burmester, vol. IV, part 1, p. 76.

157. Paris Eracles, *RHC: Hist. Occ.*, II, p. 351; Ernoul, *Chronique d'Ernoul*, p. 445–6; Oliver of Paderborn, *Historia Damiatina*, pp. 275–6.

158. "Il rendi une crois, mès ce ne fu mie li crois qui fu perdue en le bataille [of Hattin]." Ernoul, *Chronique d'Ernoul*, p. 446.

159. "Ensi fu perdue la noble cité de Damiate par peché e par folie et par l'orgueil et la malice dou clergé et des religions, la quel avoit esté conquise a grant cost et a grant travail." Paris Eracles, *RHC: Hist. Occ.*, II, p. 352.

160. Powell, *Anatomy of a Crusade*, p. 163, comments, "In no other crusade did an absent leader exercise such a decisive influence on the course of events."

161. On developments in Antioch and Cilician Armenia in this period, see Cahen, *La Syrie du Nord*, pp. 628–35; Mayer, *The Crusades*, pp. 252–4; Der Nersessian, "The Kingdom of Cilician Armenia," *HC* 2, pp. 651–2; Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 539–41; and Runciman, *A History of the Crusades*, 3, pp. 171–3.

162. On the history of Baghras, see A. W. Lawrence, "The Castle of Baghras," in T. S. R. Boase (ed.), *The Cilician Kingdom of Armenia*, New York, 1978, pp. 34–83.

163. See our discussion of pilgrims accounts, dealing with Wilbrand and Thietmar, in the next section.

164. Runciman, *A History of the Crusades*, 3, p. 173.

165. Paris Eracles, *RHC: Hist. Occ.* II, p. 355.

166. The Paris Eracles notes that Hermann von Salza was in Rome ahead of King John, and later says that Hermann "pourchacé le mariage," but says nothing about the leader of the Teutonic Knights initiating the idea of a marriage between Frederick II and Isabel. Both the Paris Eracles and Ernoul in effect give the pope credit for the idea. See the Paris Eracles, *RHC: Hist. Occ.*, II, pp. 355–6, and Ernoul, *Chronique d'Ernoul*, pp. 449–50. As interpreted by Powell and Runciman (Powell, *Anatomy of a Crusade*, p. 196; Runciman, *A History of the Crusades*, 3, p. 174), the Paris Eracles in particular describes the discussion over the regency, and notes that Hermann von Salza had conveyed the notion to John of Brienne that the emperor had said that John would retain his position of regent for life. See the Paris Eracles, *RHC: Hist. Occ.*, II, p. 358; Ernoul, *Chronique d'Ernoul*, pp. 451–2.

167. Runciman, *A History of the Crusades*, 3, p. 174.

168. Paris Eracles, *RHC: Hist. Occ.*, II, pp. 357–8. See also B. Hamilton, "King Consorts of Jerusalem and Their Entourages from the West from 1186 to 1250," *Die Kreuzfahrerstaaten als multikulturelle Gesellschaft*, ed. H. E. Mayer, pp. 21–2.

After the wedding, when John of Brienne confronts Frederick II over the regency, Runciman dramatizes the event as follows: "Frederick then coldly announced that he had never promised that John should continue as regent. There was no written agreement, and the King had no legal claim once his daughter was married. John found himself shorn of his position." Ibid., p. 176.

THE ART OF THE CRUSADERS,
1210–1225

169. I am only considering Christian pilgrims, who often were interested in the artifacts as well as the holy sites, but there were certainly Muslim and Jewish travelers, including pilgrims, in Palestine. For the Muslim travelers, see the publications of G. Le Strange.

For the Jewish travelers, see J. Prawer, *The History of the Jews in the Latin Kingdom of Jerusalem*, Oxford, 1988. Chapter 7, entitled, "The Hebrew Itineraries of the Crusader Period," discusses ten itineraries, of which five are dated in the thirteenth century.

170. To assess the number of pilgrims, see R. Röhricht, *Bibliotheca Geographica Palaestinae*, Berlin, 1890, rpt., Jerusalem, 1963, pp. 45–65.

171. These comments are based mainly on the publications of A. Grabois, "Les Pèlerins occidentaux en Terre Sainte au Moyen Age," *Studi Medievali*, 3e sér., 30 (1989), pp. 36–40; idem, "Medieval pilgrims, the Holy Land and Its Image in European Civilisation," *Pillars of Smoke and Fire*, Johannesburg, 1988, pp. 71–3; and idem, "Christian Pilgrims in the Thirteenth Century and the Latin Kingdom of Jerusalem: Burchard of Mount Sion," *Outremer*, pp. 285–7.

172. The standard text edition is Wilbrandi de Oldenborg, *Peregrinatio*, ed. J. C. M. Laurent, *Peregrinatores Medii Aevi Quatuor*, Leipzig, 1864, pp. 160–91. The Latin text is reprinted and given an Italian translation, with an introduction by S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, vol. III, Jerusalem, 1983, pp. 195–249.

173. On Wilbrand and his journey, see A. Grabois, "Terre Sainte et Orient Latin vus par Willebrand d'Oldenbourg," *Gesta dei per Francos*, ed. M. Balard et al., Aldershot, 2001, pp. 261–8. Curiously, R. Röhricht, *Die Deutschen im Heilige Lande*, Innsbruck, 1894, rpt. Darmstadt, 1968, does not mention Wilbrand von Oldenburg.

174. The standard text edition is *Magister Thietmari Peregrinatio*, ed. J. C. M. Laurent, Hamburg, 1857, pp. 1–80. The Latin text is reprinted and given an Italian translation, with an introduction, by S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, vol. III, Jerusalem, 1983, pp. 251–95.

It should be noted that the text of the 1864 edition published by Laurent is significantly different from the earlier 1851 edition by T. Tobler, published by Sandoli. See our discussion on Thietmar.

175. M.-L. Favreau-Lilie, "The German Empire and Palestine: German Pilgrimages to Jerusalem between the 12th and 16th century," *Journal of Medieval History*, 21 (1995), pp. 321–41, discusses neither Wilbrand nor Thietmar, but her observations on mostly later German pilgrims are interesting and relevant to the specific experiences of these two pilgrims.

176. Wilbrandi de Oldenborg, *Peregrinatio*, p. 163. Wilbrand's description of Acre suggests that the new suburb of Montmusard had received a newly built protective wall by 1212. See the discussion in the section "St. Jean d'Acre," and n. 250.

177. Ibid., p. 167. See below for a discussion of this passage in some detail, n. 328.

178. "Eicon Domini a Iudeis crucifixi effudit sanguinem et aquam." Ibid.

> 179. Et est in ea ecclesia parua maxime uenerationis, quam beatus Petrus et Paulus, cum Antiochiam properarent, ex angelica admonitione propriis manibus ex incultis lapidibus sancte Marie tunc primo composuerunt; ac si dicerent: "Flebile principium melior fortuna sequetur."
>
> Hec erat prima ecclesia, que in honore domine nostre semperque uirginis Marie fuit edificata et dedicata. Et est in ea hodie sedes episcopalis. Ubi domina nostra, Dei genitrix, semper uirgo Maria eciam ipsis in infidelibus Sarracenis multa prestat beneficia.
>
> (Ibid., p. 170.)

180. Ibid., p. 169.

181. Ibid., pp. 172–3.

182. Rainmaking icons of the Virgin are also known on Cyprus at this time, as my colleague, Annemarie Weyl Carr, points out, but I know of no other such icon in the Crusader States. Of course there are other icons known for their miracle-working powers, such as the famous Saidnaya icon, in the monastery of the same name near Damascus.

183. Wilbrandi de Oldenborg, *Peregrinatio*, p. 173.

184. For further information on the Templars and the Teutonic Knights in Cilician Armenia, see J. Riley-Smith, "The Templars and the Teutonic Knights in Cilician Armenia," in Boase (ed.), *The Cilician Kingdom of Armenia*, pp. 92–117.

185. Ibid., p. 174.

186. The sequence of towns is convoluted and indirect, which suggests that he is compiling notes about places from information given to him, but does not necessarily mean that he visited each site. For the location of sites in Cilician Armenia at this period, the most useful maps are found in R. W. Edwards, *The Fortifications of Armenian Cilicia*, Washington, DC, 1987, Fig. 2, using Armenian place names (see index for cross-references) and T. S. R. Boase (ed.), *The Cilician Kingdom of Armenia*, New York, 1978, front and back flyleaves. For certain less well-known sites Wilbrand mentions, it will also be necessary to consult Cahen, *La Syrie du Nord*, pp. 140–50, and passim.

187. Ibid., p. 176.

188. Wilbrand also mentions the body of St. George lying in a certain monastery of the Syrians at Ramla, but he does not comment on the condition of the church, that is, how much of it had been destroyed by Saladin in 1191. See Pringle, *The Churches of the Crusader Kingdom*, II, p. 13.

189. "Igitur sole oriente desiderata illa Hierusalem nostro aspectui oriebatur. Ubi tanto perculsi sumus gaudio et admiratione, ut eciam illam celestem Hierusalem nos uidere putaremus." Wilbrand de Oldenborg, *Peregrinatio*, p. 185.

190. See our discussion of this text in Chapter 2.

191. The text of the "Cité" contained in the *Chronique d'Ernoul* explains the situation as follows:

> Par cele porte [Porte Saint Estevene] entroient li pelerin en le cité, et tout cil qui par deviers Acre venoient en Jherusalem, . . . Dehors celle porte, . . . avoit. I. moustier de monsigneur Saint Estevenes. Là dist on que Saint Estevenes fu lapidés. Devant cel moustier, à main seniestre, avoit une grant maison c'on apeloit l'Asnerie. Là soloient gesir li asne et li sommier de l'Hospital; pour çou avoit à non l'Asnerie. Cel moustier de Saint Estevene abatirent li Crestien de Jherusalem devant chou que il fuscent assegié, pour che que li moustiers estoit près des murs. L'Asnerie ne fu pas abatue. A main destre de le porte Saint Estevene estoit li Maladerie de Jherusalem, tenant as murs. Tenant à le Maladerie avoit une posterne c'on apeloit le Posterne Saint Ladre. [Par] là metoient li Sarrasin les Crestiens en le cité pour [aler] couvertement al Sepulcre. (Ernoul, *Chronique d'Ernoul*, pp. 199–200.)

192. Wilbrandi de Oldenborg, *Peregrinatio*, p. 185.

193. The "Cité de Jérusalem" text is less detailed than Wilbrand in this particular section, suggesting that possibly it dates earlier than Wilbrand's account, so between 1187 and 1212.

194. Wilbrandi de Oldenborg, *Peregrinatio*, p. 185.

195. "Ipsa vero ecclesia marmoreis tabulis et aureis picturis ualde est ornata." Ibid., p. 186.

196. Ibid., pp. 186–7.

197. See, Folda, *ACHL* 1, pp. 380–1. There were three shrines here, the Church of the Savior, also known at the Church of the Agony, the Grotto of the Agony, and the Tomb of the Virgin. Up on the Mount of Olives was the church dedicated to the Pater Noster founded at the time of Constantine, but no longer in use in the Crusader period. The popular name mentioned by Wilbrand seems to be a conflation of the Pater Noster church with the Crusader church in the Garden of Gethsemane.

198. Pringle, *The Churches of the Crusader Kingdom*, I, p. 157. He does not mention the Chapel of the Savior at Bethphage with the painted stele.

199. "Cenobium" or "coenobium" can mean either a cathedral church or a large monastery in the usage of medieval Latin. See A. Blaise,

Dictionnaire Latin-Français des Auteurs du Moyen-Age, Turnholt, 1975, p. 194.

200. On which churches Wilbrand may have seen at Bethany, and what the state of the Abbey of St. Lazarus was in in 1212, see Pringle, *The Church of the Crusader Kingdom*, I, p. 124.

201. Wilbrandi de Oldenborg, *Peregrinatio*, p. 189.

202. Ibid., pp. 189–90.

203. Clearly a modern critical edition of Thietmar, indeed all the thirteenth-century pilgrims, is needed. Those text editions currently available include that of Tobler, republished by Sandoli, which is based on a single manuscript now in Basel, MS B.X.35 (fourteenth century), and Laurent's edition first published in 1852 with a later version by him in 1857. Laurent's edition is based on texts found in seven manuscripts, including most of the earliest extant codices from the thirteenth and fourteenth centuries. See Röhricht, *Bibliotheca Geographica Palaestinae*, Berlin, 1890, rpt., Jerusalem, 1963, p. 47–8. We are basically following Laurent's 1857 edition with constant reference to the shorter text published by Sandoli.

204. Sandoli's text reads, "Ego magister Thietmarus" Sandoli, *Itinera Hierosolymitana Crucesignatorum*, 3, p. 254, but that of Laurent, *Magister Thietmari Peregrinatio*, p. 1, does not.

205. *Magister Thietmari Peregrinatio*, p. 1.

206. R. Röhricht, *Die Deutschen im Heiligen Lande*, Innsbruck, 1894, rpt., Darmstadt, 1968, p. 115, notes that one scholar in 1874 attempted to identify Thietmar as a canon of the Holy Cross Church in Hildesheim, and later as bishop of Paderborn, who died in 1234. This suggests that the scholar in question confused Wilbrand of Oldenborg with Thietmar, perhaps explaining why Röhricht omitted any mention of Wilbrand.

207. It is not exactly clear what truce he is referring to. In July of 1217, the earlier truce was due to end, so it may have been a local truce pertaining to ongoing things, like pilgrim visits to Jerusalem. In any case, as we know, a new truce was a constant issue throughout the Fifth Crusade, from 1217 to 1221, as we have discussed previously.

208. *Mag. Thietmari Peregr.*, pp. 9–11.

209. Ibid., p. 13.

210. The texts differ as to the length of time spent in Damascus. Tobler's text says eight days (p. 258); Laurent's edition says six days (p. 13).

211. The twelfth-century pilgrim, Burchard of Strassburg, described the monastery of Saidnaya as three miles from Damascus in 1175. Thietmar's account in 1217 differs in some details. In both descriptions, however, the icon becomes incarnate and exudes holy oil. See Pringle, *The Churches of the Crusader Kingdom*, II, pp. 219–20.

212. *Magister Thietmari Peregrinatio*, pp. 14–17. For the literature on the icon of Saidnaya, see the following publications: D. Baraz, "The Incarnated Icon of Saidnaya," *Muséon*, 108 (1995), pp. 181–91; P. Devos, "Les premières versions occidentales de la légende de Saidnaia," *Analecta Bollandiana*, 65 (1947), pp. 245–78; P. Peeters, "La légende de Saidnaia," *Analecta Bollandiana*, 25 (1906), pp. 137–57; and G. Raynauld, "Le miracle de Sardenai," *Romania*, 11 (1882), pp. 519–37, and 14 (1885), pp. 82–93.

213. *Magister Thietmari Peregrinatio*, p. 16.

The miracle-working icon at Saidnaya continues to function in our time. W. Dalrymple visits Seidnaya [sic] in September of 1994 and reports that in 1966 Colin Thubron saw the face of the icon of the Virgin Mary shedding tears. Dalrymple himself did not see this but he saw a "miracle" of a different sort, namely, Muslims as well as Christians coming to this icon in prayer, because the Virgin of Saidnaya is said to bring fertility to sterile women, or women having difficulty conceiving babies. W. Dalrymple, *From the Holy Mountain: A Journey among the Christians of the Middle East*, New York, 1997, pp. 186–91.

214. Thietmar appears to have taken the normal coastal route, which was at least nominally under Crusader control. Nonetheless he also mentions inland sites that he passes but does not in fact visit; for example, he gives a long discursus on Mount Carmel (pp. 21–3) and Sebastia (p. 25).

215. "Civitas ista est fortissima, muris et turribus munita." Ibid., p. 26.

216. Ibid.

217. Ibid., pp. 26–7.

218. Ibid., p. 30. See also Pringle, *The Churches of the Crusader Kingdom*, I, pp. 223–39, and T. S. R. Boase, "A. [Ecclesiastical] Architecture and Sculpture," *HC* 4, pp. 95, 303, pl. XV a and b.

219. He mentions Zacchaeus as being short in stature, but he does not mention the house of Zacchaeus in Jericho, although it is possible he may have seen it.

220. *Magister Thietmari Peregrinatio*, p. 31.

221. Ibid., pp. 32–5.

222. "Hinc perveni ad aliam civitatem magnam in alto montis sitam, muris et turribus munitam, que dicitur Crach." Ibid., p. 36. See Folda, *ACHL* 1, pp. 128–9.

223. "Veni ad montem, qui dicitur Petra Latine, Gallice Monreal, Sarracenice Scobach." *Magister Thietmari Peregrinatio*, p. 37. See Folda, *ACHL* 1, pp. 69–70.

224. *Magister Thietmari Peregrinatio*, pp. 38–40. It is interesting that Thietmar has such long passages on these biblical regions and events, compared to his few comments on what he can see himself as he travels, that is, the *realia* of what he experiences. Perhaps he is able to supply the details he gives with reference to his Bible, and possibly some other pilgrim's account he knows, at the point when he has the leisure to write up his account after the trip is over.

225. *Magister Thietmari Peregrinatio*, pp. 41–7. Thietmar's description of this monastery is the longest and most detailed we have from any pilgrim in the Crusader period. For an English translation of a substantial part of his description of the monastery, see Pringle, *The Churches of the Crusader Kingdom*, II, pp. 52–3.

226. Ibid., p. 42. For the interior of the Chapel of the Burning Bush, see *Sinai: Treasures of the Monastery of St. Catherine*, ed. K. A. Manafis, Athens, 1990, p. 56, Fig. 25, and for an early thirteenth-century Byzantine icon of Moses and the Burning Bush, see, ibid., p. 166, Fig. 36. See also J. Galey, *Sinai and the Monastery of St. Catherine*, Garden City NY, 1980, Pl. 38.

There is of course a mosaic image of Moses before the Burning Bush on the mosaic of the apse of the church, up above the Transfiguration, flanking the clerestorey windows on the left side. See Manafis, p. 80, Fig. 8, for a cropped image, and Galey, Figs. 119, 127, with full photos of the location and the mosaic image.

227. "Vidi perspicue facie ad faciem sine ambiguo corpus beate Katerine, et capud eius nudum deosculabar." *Magister Thietmari Peregrinatio*, pp. 43–4. For the current situation of the tomb, see Manafis, *Sinai*, p. 54, Fig. 23, and Galey, *Sinai*, Pl. 39.

228. *Magister Thietmari Peregrinatio*, pp. 43–5.

229. Ibid., pp. 45–8.

230. For information on the various holy sites Thietmar visited on Mount Sinai, see Pringle, *The Churches of the Crusader Kingdom*, II, pp. 58–61.

231. Ibid., p. 48.

232. Ibid.

233. Sandoli, *Itinera*, III, pp. 286–7. This information about Alexandria must have been an interpolation found in one or more of the manuscripts. In fact, the information about Egypt must have been entirely an interpolation by Thietmar. One might speculate that he could have used manuscripts from the library of the Monastery of St. Catherine for this purpose.

234. "Arrepto itaque itinere Dei gracia et vita comite Accon incolumis sum regressus." *Magister Thietmari Peregrinatio*, p. 51.

235. Ibid., pp. 51–4.

236. R. B. C. Huygens, ed., *Peregrinationis Tres*, Turnholt, 1994, pp. 137–138.

237. Sandoli, *Itinera*, III, p. 292.

238. *Magister Thietmari Peregrinatio*, p. 1.

239. See n. 44.

240. J. Bongars (ed.), *Gesta Dei per Francos, sive Orientalium expeditionum et regni Francorum Hierosolymitani historia*, Hanoviae, 1611, pp. 1047–145, transl. A. Stewart, *The History of Jerusalem, Palestine Pilgrims Text Society*, London, 1896, pp. 1–127, esp. 38–45.

241. On the dates of his composition of the *Historia*, see Longère, "La Vie et les Oeuvres," in Jacques de Vitry, *Histoire Occidentale*, pp. 31–2; Hinnebusch, *The Historia Occidentalis of Jacques de Vitry*, pp. 16–20 (mostly on the *Historia Occidentalis*). The fact that, as Longère points out, Jacques refers to the dismantling of the walls of Jerusalem in 1219 is only evidence that he was au courant with current events, but there is nothing in his account, compared to the earlier pilgrims, Wilbrand of Oldenburg and Master Thietmar, that would indicate he had visited the main pilgrimage sites in Jerusalem, or in Bethlehem or Nazareth for that matter.

242. See Longère, "La Vie et les Oeuvres," p. 14; J. Richard, *La Papauté et les Missions d'Orient au Moyen Age (XIIIe–XVe siècles)*, Collection de l'Ecole française de Rome, 33, Rome-Paris, 1977, pp 34–43; Funk, *Jakob von Vitry: Leben und Werke*, pp. 37–55. As Richard makes clear, Jacques de Vitry was very interested in missionary activity, but not necessarily in pilgrimage.

243. He "s'en parti e fu une piece en Surie, et puis s'en rala en son pais." Paris Eracles, *RHC: Hist. Occ.*, II, p. 348.

244. M. Roncaglia, *St. Francis of Assisi and the Middle East*, 3rd edn., Cairo, 1957, p. 29 and nn. 58, 59. Roncaglia's view, in effect, that Francis

would not have gone to the Holy Land without going to the Holy Sepulcher is obviously problematic. Many other prominent figures, religious and otherwise, who went to the Holy Land never made it to Jerusalem when it was in Muslim hands, most notably Richard I and Louis IX – Saint Louis – both of whom could have gone if they had been willing.

245. Golubovich, *Biblioteca Bio-Bibliographica della Terra Santa*, I, pp. 95–8.

246. On the latter, see K. Krüger, *Der frühe Bildkult des Franziskus in Italien*, Berlin, 1992.

247. The other important site in Muslim control after 1187, besides the three main dominical holy sites, that Christian pilgrims often visited in the thirteenth-century was the tomb of St. John the Baptist in Sebaste. See Pringle, *The Churches in the Crusader Kingdom*, II, pp. 286–7. Neither Wilbrand nor Thietmar say they visited Sebaste, however.

248. R. D. Pringle, "Town Defenses in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, I, 1995, pp. 76–8.

249. Ibid., p. 78.

250. D. Jacoby, "Montmusard, Suburb of Crusader Acre: The First Stage of Its Development," *Outremer*, eds. B. Z. Kedar et al., Jerusalem, 1982, p. 212, and n. 38, and Wilbrandi de Oldenborg, *Peregrinatio*, p. 163.

251. Jacoby, "Montmusard, Suburb of Crusader Acre," p. 213, and see also additional discussion by Pringle, "Town Defenses in the Crusader Kingdom of Jerusalem," pp. 83–4.

252. See H. E. Mayer, *Das Itinerarium peregrinorum*, Schriften der Monumenta Germaniae Historica, 18 (Stuttgart, 1962), p. 317, lines 23–5 ("Hec formam sortita triangulam").

253. Ibid., p. 209. The two maps are those found in Oxford, Bodleian, MS Tanner 190, fol. 207r, by Pietro Vesconte, *c.*1320, and in Rome, Bibl. Apostolica Vaticana, MS Lat. 1960, fol. 268v, *c.*1323 (?).

254. Pringle, "Town Defenses in the Crusader Kingdom of Jerusalem," p. 84.

255. Ibid., p. 83–4.

256. B. Dichter, *The Maps of Acre: A Historical Cartography*, Acre, 1973, pp. 18–30.

257. R. Frankel, "The North-Western Corner of Crusader Acre," *Israel Exploration Journal*, 37 (1987), pp. 260–1. Frankel links the small tower on the map of Bishop Paulinus that appears in certain manuscripts (Venice, Marciana MS Lat. 394, and, Rome, Biblioteca Apostolica Vaticana, MS Lat. 1960), but not others. Dichter, *The Maps of Acre*, p. 29, illustrates the map in Venice. His other illustrations cut off the left side of the image, making it impossible to see whether the small tower is represented. The two maps mentioned earlier are also illustrated by J. Prawer, "Historical Maps of Acre," [in Hebrew] *Eretz Israel*, 2 (1953), Pl. XXI:2, and p. 181, Fig. 2, respectively.

258. Pringle, "Town Defenses in the Crusader Kingdom of Jerusalem," p. 92, and C. N. Johns, "Guide to 'Atlit: The Crusader Castle, Town and Surroundings," ed. R. D. Pringle, in *Pilgrims' Castle ('Atlit)*, I, pp. 67–85.

259. It is interesting that there is also a rounded tower at the northwest corner of the walls along the coast at Acre, as Frankel points out: Frankel, "The North-Western Corner of Crusader Acre," pp. 260–1.

260. Johns, "Excavation at Pilgrims' Castle, 'Atlit (1932–3): Stables at the South-West of the Suburb," ed. R. D. Pringle, in *Pilgrims' Castle ('Atlit)*, VI, p. 57.

263. For an excellent photo of the castle at 'Atlit viewed from the southwest, see H. Nicholson, *The Knights Templar: A New History*, Sparkford, 2001, p. 61, Pl. 2.11.

264. Oliver of Paderborn, *Historia Damiatina*, pp. 169–72, 290–1.

265. Pringle, *The Churches of the Crusader Kingdom*, I, p. 70.

266. For a detailed plan, see Pringle, "'Atlit," *The Churches of the Crusader Kingdom*, I, p. 72.

267. A. Cadei, "Architettura sacra Templare," in G. Viti, A. Cadei, and V. Ascani (eds.), *Monaci in Armi: L'Architettura sacra dei Templari attraverso il Mediterraneo*, Certosa di Firenze, 1995, pp. 23–9.

268. Johns, "Guide to 'Atlit," in idem, *Pilgrims' Castle ('Atlit)*, I, p. 24.

269. C. Enlart, *Les Monuments des Croisés dans le Royaume de Jérusalem*, vol. II, Paris, 1928, p. 95. See also E. Lambert, *L'Architecture des Templiers*, Paris, 1978, pp. 30–1.

270. M. Barber, *The New Knighthood*, Cambridge, 1994, pp. 194–5.

271. Oliver of Paderborn, *Historia Damiatina*, p. 171.

272. Boase, "Military Architecture," p. 159, points out that Oliver of Paderborn refers to the original towers as having only two storeys. For illustrations of these corbels, see J. Folda, "Painting and Sculpture in the Latin Kingdom of Jerusalem, 1099–1291," *HC* 4, pp. 279, 312 Pl. XXIV a–d. For the town church, see Pringle, "'Atlit," *The Churches of the Crusader Kingdom*, I, p. 76 (plan).

273. For the location, see the site sketch in Johns, "Guide to 'Atlit," in Pringle, *Pilgrims' Castle ('Atlit)*, I, p. 6, Fig. 1, reprinted in Pringle, *Secular Buildings*, p. 23, Fig. 8.

274. Johns, "Guide to 'Atlit," in Pringle, *Pilgrims' Castle ('Atlit)*, I, pp. 92–4, and Fig. 37 with thirteen designs. Besides the predominant cross designs on the slabs, there are also symbols of a person's metier in life, a hammer, a square, or a mason's plummet. See the example from 'Atlit published in A. Re'em, "Burial Customs in the Crusader Kingdom of Jerusalem," *Knights of the Holy Land: The Crusader Kingdom of Jerusalem*, Jerusalem, 1999, p. 292.

275. Enlart, *Les Monuments des Croisés*, I, Paris, 1925, p. 169. He notes this is one of five types of burials found in the Crusader East (pp. 165–71).

276. Ibid., pp. 92, 94.

277. Many Frankish burials have been studied on Cyprus and in Frankish Greece. For the tomb plaques on Cyprus (mostly dated after 1291) see the publication by T. J. Chamberlayne, *Lacrimae Nicossienses, Recueil d'inscriptions funéraires*, vol. I, Paris, 1894, with twenty-nine plates (vol. II never appeared). For Frankish Greece, see E. A. Ivison, "Funerary Monuments of the Gattelusi at Mytilene," *Annual of the British School at Athens*, 87 (1992), pp. 423–37 (fourteenth- and fifteenth-century tombs), and "Latin tomb monuments in the Levant 1204–ca. 1450," *The Archaeology of Medieval Greece*, eds. P. Lock and G. D. R. Sanders, Oxford, 1996, pp. 91–106.

278. See C. N. Johns, "Medieval Slip-Ware from Pilgrims' Castle, 'Atlit (1930–1)," in Pringle (ed.) *Pilgrims' Castle ('Atlit)*, III, pp. 136–44, with nine plates, and R. D. Pringle, "Some More Proto-Maiolica from 'Atlit (Pilgrims' Castle) and a Discussion of Its Distribution in the Levant," *Levant*, 14 (1982), pp. 104–17, with four plates.

279. Few castles have been excavated, e.g., 'Atlit, Belvoir, and Montfort, and serious excavations are underway in certain walled Crusader cities such as Acre, Ascalon, and Caesarea, among others. Hervé Barbé is currently excavating at Safed, for the Israel Department of Antiquities. The British School of Archaeology in Jerusalem has excavated Belmont, a smaller castle just south of Jerusalem. Crac des Chevaliers, in the County of Tripoli, was cleared by the French Monuments Service under Paul Deschamps, and further studies are being undertaken by German scholars there. For a survey of the information on the archaeological work on the Crusader castles, see Kennedy, *Crusader Castles*, pp. 199–216, and more recent bibliography in the annual issues of the *Bulletin of the Society for the Study of the Crusades and the Latin East*.

280. The following works deal with Crusader ceramics in the broader context of the eastern Mediterranean world: R. D. Pringle, "Pottery as Evidence for Trade in the Crusader States," in *I Communi Italiani nel Regno Crociato di Gerusalemme*, eds. G. Arnaldi and B. Z. Kedar, Genoa, 1986, pp. 451–75; idem, "The Medieval Pottery of Palestine and Transjordan (A.D. 636–1500): An Introduction, Gazetteer and Bibliography," *Medieval Ceramics*, 5 (1981), pp. 45–60; G. Vannini, "La Ceramica 'crociata': un documento archeologico da costruire," in *Toscana e Terrasanta nel Medioevo*, ed. F. Cardini, Florence, 1982, pp. 345–90; and B. Porée, "Le royaume de Jérusalem aux XIIe et XIIIe siècles: les céramiques croisées,

témoins des échanges culturels et commerciaux," in *Pèlerinages et Croisades*, ed. L. Pressouyre, Paris, 1995, pp. 333–50.

For pottery from other specific Crusader coastal sites, see A. Lane, "Medieval Finds from al-Mina in North Syria," *Archeologia*, 87 (1937), pp. 19–78 (from the port of Antioch); H. Salamé-Sarkis, "Céramiques médiévales dans la région de Tripoli," *Les Dossiers de l'Archéologie*, 12 (1975), pp. 61–7 (Tripoli); E. J. Stern, "Excavation of the Courthouse Site at 'Akko: The Pottery of the Crusader and Ottoman Periods," *'Atiqot*, 31 (1997), pp. 35–70 (Acre, with two excellent color plates); R. D. Pringle, "Medieval Pottery from Caesarea: The Crusader Period," *Levant*, 17 (1985), pp. 171–202 (Caesarea).

An interesting comparative site is Alexandria, for which see W. B. Kubiak, "Overseas Pottery Trade of Medieval Alexandria as Shown by Recent Archaeological Discoveries," *Folia Orientalia*, 10 (1969), pp. 5–30. The most surprising finding here during the Ayyubid period is the plentiful appearance of Far Eastern pottery.

281. See A. Lane in n. 280.

282. See the articles by R. D. Pringle in n. 280, and A. J. Boas, "The Import of Western Ceramics to the Latin Kingdom of Jerusalem," *Israel Exploration Journal*, 44 (1994), pp. 102–22.

283. See E. J. Stern, "Export to the Latin East of Cypriot Manufactured Glazed Pottery in the 12th–13th Century," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 325–35.

284. See A. H. S. Megaw, "Zeuxippus Ware," *Annual of the British School at Athens*, 63 (1968), pp. 67–88; idem, "Zeuxippus Ware Again," *Recherches sur la céramique byzantine*, eds. V. Déroche and J. M. Speiser, Actes du colloque organisé par l'Ecole Française d'Athenes, Athens, 1989, pp. 259–66; and idem, "An Early Thirteenth Century Aegean Glazed Ware," in *Studies in Memory of D. T. Rice*, eds. G. Robertson and G. Henderson, Edinburgh, 1975, pp. 34–45.

285. E. Stern explains the "sgraffito ware" as follows: "The sgraffito technique of decorating pottery was widely used in the Near East. After the white slip was applied to the bowl, a decoration was incised with a fine instrument. The incision removed the slip and exposed the fabric. After that, a transparent glaze was applied. The bowl was fired and the incised area appears darker than the slipped area." Stern, "The Courthouse Site: The Pottery," p. 51.

286. Although the remains of a kiln were found at 'Atlit (Johns, "Medieval Slip-Ware from Pilgrims' Castle, 'Atlit (1930–1)," ed., Pringle, *Pilgrims' Castle ('Atlit)*, III, pp. 136, 137), this kiln was probably used to manufacture the non-slipped pottery and coarser wares. All of the slip-ware and sgraffito pottery at 'Atlit appears to have been imported. It should be pointed out, however, that Scott Redford, excavating at Kinet on the Gulf of Iskanderun (=Crusader Callamella) argues that the production of Port St. Symeon ware was widespread at sites all along the coast, and not confined to Port St. Symeon itself. See S. Redford, "On *Saqis* and Ceramics, Systems of Representation in the Northeast Mediterranean," *France and the Holy Land: Frankish Culture at the End of the Crusades*, eds. D. Weiss and L. Mahoney, Baltimore and London, 2004, pp. 282–312.

287. Lane, "Medieval Finds from Al-Mina," p. 47, Fig. 8A.

288. Ibid., p. 46.

289. Ibid., Pls. XXII–XXV, and see also the excellent color reproduction of this type ware on the cover of, J. D. Frierman, *Medieval Ceramics, VI to XIII Centuries*, Los Angeles, 1975, p. 54, no. 111. For excellent examples of Port St. Symeon ware in the United States, see the Dambarton Oaks amphora and four bowls: N. P. Ševčenko, "Some Thirteenth-Century Pottery at Dumbarton Oaks," *DOP*, 28 (1974), pp. 353–60, and S. Redford, "244, Amphora," *Byzantium: Faith and Power*, ed. Helen C. Evans, pp. 398–9.

290. Frierman, *Medieval Ceramics*, p. 53, no. 106.

291. Stern, "The Courthouse: The Pottery," p. 57, no. 95.

292. Pringle, "Pottery as Evidence for Trade in the Crusader States," p. 459. For drawings of carinated bowls found at Acre, see Stern, "The Courthouse Site: The Pottery," pp. 51, 52.

293. Lane, "Medieval Finds from Al-Mina," pp. 53, 54.

294. Ibid., p. 54. For examples of these figures, see *Medieval Cypriot Pottery from the Collection of Mr. Christakis Loizides: Loan Exhibition*, intro. A. H. S. Megaw, Nicosia, 1947, Figs. 3 (woman with a long veil and a water jug), 4 (woman in long gown and veil embracing soldier); and Frierman, *Medieval Ceramics*, p. 26, no. 8 (female figure). For other examples, with excellent color plates, see D. Papanikola-Bakirtzis, "Glazed Pottery in Byzantine Medieval Cyprus (12th–15th centuries)," eds. D. Papanikola-Bakirtzis and M. Iacovou, *Byzantine Medieval Cyprus*, Nicosia, 1998, pp. 129, 135, and pp. 143, no. 75 (thirteenth century), 144–5, nos. 76–9 (fourteenth century). See also L. L. Haddjigavriel, *A New Collection of Medieval Pottery at the Leventis Municipal Museum*, Nicosia, 1996, pp. 10–82, which publishes Cypriot Museum pottery mainly of the thirteenth and fourteenth centuries categorized according to their designs: birds, knights, flowers, geometric, the sun, and the key.

295. Pringle, "Some More Proto-Maiolica from 'Atlit (Pilgrims' Castle)," p. 104.

296. Ibid., p. 105, no.6, Pl. 10c, has the city wall motif.

297. One other interesting type of pottery found at 'Atlit is an unglazed stamp impressed storage jar (Pringle, "Pottery as Evidence for Trade in the Crusader States," p. 463 and Pl. IV). Pottery of this type was apparently manufactured in north Africa and Muslim Spain, and imported to the eastern Mediterranean. It is of interest because of the star-shaped punch designs. Similar designs become very popular in gesso work found on Crusader panel painting later in the century. It remains to be seen, of course, whether there is any connection between the pottery designs and those found in the gesso work on the panel painting.

298. Stern, "The Courthouse: The Pottery," p. 36, lists twenty-two different kinds of pottery from this one site in Acre.

299. Pringle, "Some More Proto-Maiolica from 'Atlit (Pilgrims' Castle)," p. 112.

300. Pringle, "Pottery as Evidence for Trade in the Crusader States," pp. 467–8.

301. "Les Pelerinaiges por aler en Iherusalem," eds. H. Michelant and G. Raynaud, *Itinéraires à Jérusalem de Descriptions de la Terre Sainte*, Paris, 1882, rpt. Osnabrück, 1966, p. 91 (*c.*1231). See also "Les Chemins & les Pelerinages de la Terre Sainte" (before 1265), Michelant and Raynaud, *Itinéraires*, p. 180. Despite the confusing reference given by Johns ("Guide to'Atlit," ed. Pringle, *Pilgrims' Castle ('Atlit)*, I, p. 55, n. 1), this information is given in the "Pelrinages et Pardouns de Acre" of about 1280, in Michelant and Raynaud, Itinéraires, at p. 229. Finally reference to the relics of St. Euphemia at 'Atlit is also given by a thirteenth-century pilgrim named Philipp de Busseris (*c.*1285): "Philippi descriptio Terrae Sanctae," ed. W. A. Neumann, "Drei mittelalterliche Pilgerschriften III," *Österreichische Vierteljahresschrift für katholische Theologie*, 9 (1872), p. 76, also published in Frater Philippus de Busseriis, *Liber Peregrinationum*, ed. S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, IV, Jerusalem, 1984, p. 246, sect. LVI.

302. A. Kazhdan and N. P. Ševčenko, "Euphemia of Chalcedon," *The Oxford Dictionary of Byzantium*, vol. 2, eds. A. Kazhdan and A.-M. Talbot, New York – Oxford, 1991, pp. 747–8.

303. On this, see H. Nicholson, "The Head of St Euphemia: Templar Devotion to Female Saints," *Gendering the Crusades*, eds. S. B. Edgington and S. Lambert, Cardiff: University of Wales Press, 2001, pp. 3–5. See also Johns, "Guide to 'Atlit," ed. Pringle, *Pilgrim's Castle ('Atlit)*, I, p. 55, followed by Pringle, " 'Atlit," *The Churches of the Crusader Kingdom*, vol. 1, p. 71.

304. F. Tommasi, "I Templari e il Culto delle Reliquie," in *I Templari: Mito e Storia*, Siena, 1989, pp. 208–9.

The relics now in the patriarchal Church of St. George in Istanbul (Constantinople) were apparently not the relics originally preserved at 'Atlit. The relics from 'Atlit eventually made their way via the Hospitallers where they were placed in a new reliquary in the sixteenth century. Nicholson thinks this reliquary was carried off by Napoleon's troops in 1798 and lost at sea when Napoleon's flagship, "L'Orient," sank on 1 August 1798 off the coast of Egypt. See Nicholson, "The Head of St Euphemia," p. 4.

For a photo of the relics preserved now in the patriarchal Church of St. George in their nineteenth-century reliquary, see H. Nicholson, *The Knights Templar: A New History*, Sparkford, 2001, p. 146, Pl. 5.7.

305. See n. 301, for the reference to Philipp.

306. Nicholson, *The Knights Templar: A New History*, p. 147.

307. M. Barber, *The New Knighthood: A History of the Order of the Temple*, Cambridge, 1994, p. 199, and Nicholson, "The Head of St Euphemia," pp. 3–5. Barber and Nicholson go on to point out that the relics of St. Euphemia were apparently moved by the Templars to Nicosia in 1291, and then eventually came into the possession of the Hospitallers (Barber, pp. 199–200; Nicholson, pp. 3–4). Barber also mentions the relics of St. Euphemia at 'Atlit in *The Trial of the Templars*, Cambridge, 1978, p. 138, and n. 38.

308. P. Riant, "Les Dépouilles religieuses enlevées à Constantinople au XIIIe siècle," *Mémoires de la Société Nationale des Antiquaires de France*, 4 ser., 6 (1875), pp. 1–214.

314. For a discussion of the archaeological findings and their possible interpretations, see Pringle, *The Churches of the Crusader Kingdom*, I, pp. 166–79.

315. Pringle, *The Churches of the Crusader Kingdom*, I, pp. 208–16, and Folda, *ACHL* 1, pp. 308–9.

316. Pringle, *The Churches of the Crusader Kingdom*, I, pp. 111–15, and Folda, *ACHL* 1, pp. 70–1.

317. Folda, *ACHL* 1, pp. 302–5.

318. The church that can eventually be compared to the Cathedrals at Caesarea and at Beirut is the Cathedral of Notre Dame at Tortosa. As we have seen the shrine of the Virgin had become an important pilgrimage site, which both Wilbrand and Jacques de Vitry visited. However, there is no indication that the Tortosa cathedral was completed until the second quarter of the thirteenth century. See n. 44 (Jacques de Vitry) and n. 179 (Wilbrand).

319. Pringle, *The Churches of the Crusader Kingdom*, I, pp. 61–2.

320. Ibid., p. 265.

321. Pringle, "Town Defenses in the Crusader Kingdom of Jerusalem," p. 88.

322. Ibid., pp. 80–1.

323. Pringle, *The Churches of the Crusader Kingdom*, I, pp. 120–1.

324. Pringle, *The Churches of the Crusader Kingdom*, II, pp. 67, 206, 367.

325. Pringle, *The Churches of the Crusader Kingdom*, I, p. 287, II, pp. 304–5.

326. See the recent article by P. Antaki, "Le Château Croisé de Beyrouth: Etude Préliminaire," *ARAM*, 13–14 (2001–2), pp. 326–9, 343.

327. The text says "cisterna" but this is a special fountain with mosaics in the manner of domestic waterworks for pleasure found in Roman villas.

328. Wilbrandi de Oldenborg, *Peregrinatio*, pp. 166–7. See also the French translation by J. Richard, "Un Palais à Beyrouth au début du XIIIe siècle," *Res Orientales*, 8 (1996), p. 140, and the Italian translation by S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, III, pp. 205–6.

329. Camille Enlart expressed the opinion that the mosaics in the palace of Beirut were the work of indigenous artists, but he thought they may have been done before the arrival of the Crusaders (Enlart, *Les Monuments des Croisés*, I, Paris, 1925, p. 159). This, however, seems impossible because Wilbrand describes the palace as being located in a tower of the castle recently built.

330. *L'Islam dans les collections nationales*, Paris, 1977, p. 216, no. 486, Inv. No. 7674. See also M. S. Dimand, *A Handbook of Mohammadan Art*, New York, 1958, pp. 117–18.

331. For the wooden panels at the Church of the Nativity in Bethlehem, see Z. Jacoby, "The Medieval Doors of the Church of the Nativity at Bethlehem," *Le Porte di Bronzo dall'antichita al secolo XIII*, ed. S. Salomi, Rome, 1990, pp. 126–34, Pls. CXVI, CXXII–CXXVII.

332. Pringle, *The Churches of the Crusader Kingdom*, I, pp. 139, 154–5. It is worth noting that these inscriptions reckon the date of the panels by the Armenian calendar on the one hand, and by the Muslim calendar on the other, indicating that Bethlehem was still under Muslim control when they were done, just as Bethlehem was when Thietmar saw it.

333. Oliver of Paderborn, *Historia Damiatina*, p. 239, transl. R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. 1, Cambridge, 1993, p. 203.

334. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 1, pp. 202–3. See also A. Gayet, "Les Monuments de Damiette et Mansourah contemporains de l'époque des Croisades," *Revue de l'art ancien et moderne*, Paris, 1899, pp. 71–8. According to Gayet, the mosques associated with the period of the Crusaders in "the old part" of Damietta mentioned by Gayet are either newly rebuilt or in ruins. There is nothing in the modern city of Damietta, which was built southeast of the thirteenth-century city site, which seems to relate to the Crusader period. Old Damietta was of course completely razed in 1250 by the sultan of Cairo, and rebuilt on a site located farther inland. See Chapter 6. No obvious remains of the Crusader period could be identified in any part of modern Damietta by the author during a visit in the spring of 1999.

335. I am indebted to Scott Redford of Georgetown University for his discussion of the dynamics of pottery production and trade in the eastern Mediterranean, based on his archaeological work in the area, especially at Kinet or Hisn al-Tinat = Crusader Callamella. For the location of Callamella, see J. Riley-Smith (ed.), *The Atlas of the Crusades*, London, 1991, p. 107, and our map no. 4. See S. Redford, "On *Saqis* and Ceramics, Systems of Representation in the Northeast Mediterranean," *France and the Holy Land: Frankish Culture at the End of the Crusades*, eds. D. Weiss and L. Mahoney, Baltimore and London, 2004, pp. 282–312. Redford et al.,"Excavations at Medieval Kinet, Turkey: A Preliminary Report," *Ancient Near Eastern Studies*, 38 (2001), pp. 58–138.

336. For an interesting possible example of painting on parchment, however, see the discussion of one of the miters of Jacques de Vitry, nn. 363–5.

337. Messier Piere [Chappe] me fist lire devant lui en un romans: messier Rau dist que je lisoie moult bien. Après fu messier Rau [Raoule de Tibériade] malade, et messier Piere Chape, à la requeste de messier Rau, me manda lirre devant lui. Issi avint que trois mois et plus y fu; et moult me desplaisoit ce que moult me deust pleire: messier Rau dormet poi et malvaisement; et quant je avoie leu tant com il voleit, il meismes me conteit moult de chozes dou royaume de Jerusalem et des us et des assises, et disoit que je les retenisse. Et je, qui moult doutai sa maniere, otreai tout.

Philippe de Novarre [sic], *Livre de Philippe de Navarre, RHC: Lois*, I, p. 525, ch. XLIX, as quoted by D. Jacoby, "La Littérature française dans les états latins de la Méditerranée orientale à l'époque des Croisades: diffusion et creation," *Essor et Fortune de la Chanson de Geste dans l'Europe et l'Orient Latin*, Actes du IXe Congrès International de la Société Rencesvals..., Modena, 1984, pp. 617–18.

338. See ibid., p. 619.

339. A recent Ph.D. dissertation at King's College, London, is being prepared for publication that may offer some additional information on Crusader manuscripts. See Cristina F. Dondi, "The Liturgy of the Holy Sepulchre of Jerusalem (XII–XVI Centuries): With special reference to the Practice of the Orders of the Temple and St John of Jerusalem," Ph.D. dissertation, University of London, 2000.

340. See Chapter 3, nn. 380, 382, and 397.

348. For these two examples see K. Weitzmann, "The Icons of Constantinople," *The Icon*, New York, 1982, pp. 62 and 75.

349. The patron's name, "George Parisi," has sometimes been interpreted as "George from Paris," but it appears more likely that it is a Greek surname. This is a known surname even into modern times. For assistance on this issue, I am indebted to my colleague Angela Hero in New York City. Valentino Pace originally proposed this interpretation; see V. Pace,"Italy the Holy Land:... Apulia," *Crusader Art in the Twelfth Century*, Oxford, 1982, p. 254.

350. For the epithet "diasorites," see G. Demetrokalles, "Ho naos tou Agiou Georgiou tou Diasoritou tes Tragaias Naxou," *Technika Chronika*, 217 (1962), p. 17. For examples of images with this epithet, see, e.g., S. E. J. Gerstel, "Art and Identity in the Medieval Morea," *The Crusades from the Perspective of the Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, DC, 2001, p. 284, and E. N. Tsigaridas, "La Peinture à Kastoria et en Macédoine Grecque Occidentale vers l'année 1200: Fresques et Icones," *Studenica e l'Art Byzantin autour de l'Année 1200*, ed. V. Korac, Belgrade, 1988, pp. 309–10, and note 4. I thank my colleagues Sharon Gerstel and Angela Hero for their generous assistance with this difficult issue.

351. L.-A. Hunt, "Christian Art in Greater Syria and Egypt: A Triptych of the Ascension with Military Saints," *Al-Masaq*, 12 (2000), p. 18, for the quote, and her earlier article, idem, "A woman's prayer to St Sergios in Latin Syria," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 106–7.

352. Hunt, "Christian Art in Greater Syria and Egypt," p. 18, for the quote.

353. I have not been able to find this style in the wall paintings, nor do I think that the St. Sergios with the kneeling female donor (no. 80) belongs stylistically with this icon. The question of where the artist of the latter icon came from will be addressed in Chapter 6.

354. This icon (no. 285) is 38.5 × 28 cm. See D. Mouriki, "Icons of the 13th Century," *Sinai: Treasures of the Monastery of St. Catherine*, ed. K. Manafis, Athens, 1990, pp. 119–20 and 184, no. 58.

355. This icon (no. 679) is 38.6 × 26.9 cm. See Mouriki, "Icons of the 13th Century," *Sinai*, pp. 119–20 and 185, no. 59. Mouriki first published comments on this icon in her monograph, idem, "Thirteenth-Century Icon Painting in Cyprus," *The Griffon*, nos. 1–2 (1985–6), pp. 32, 34, 83, Fig. 6.

356. For a discussion of bold frame designs like this, on an icon from the second half of the thirteenth century, see J. Folda, "The Saint Marina Icon, *Maniera Cypria*, *Lingua Franca*, or Crusader Art," *Four Icons in the Menil Collection*, Menil Collection Monographs, 1, Austin and Houston, 1992, pp. 110–12.

357. F. Courtoy, *Le Trésor du Prieuré d'Oignies aux soeurs de Notre-Dame à Namur et l'Oeuvre du Frère Hugo*, Bruxelles, 1953, p. 5. See also the review of this work by A. Lanotte, "Le Trésor du prieuré d'Oignies et l'oeuvre du frère Hugo," *Namurcum: Chronique de la Société archéologique de Namur*, 27e année (1953), pp. 49–53.

358. Funk, *Jakob von Vitry, Leben und Werke*, Hildesheim, 1973, pp. 67–8; J. Longère, "La Vie et les Oeuvres," in Jacques de Vitry, *Histoire Occidentale*, Paris, 1997, pp. 14–16. See also the narrative of F. Courtoy, *Le Trésor du Prieuré d'Oignies*, pp. 9–12. One of the important historical sources for information on the founding of this priory and the connection of its treasury with Bishop Jacques de Vitry is found in a charter written by Prior Siger in the late thirteenth century. It was later transcribed and eventually published by E. Martène and U. Durand (eds.), *Veterum scriptorum et monumentorum historicorum, dogmatoricum, moralium, amplissima collectio*, vol. 6, Paris, 1730, cols. 1278–80.

359. Courtroy, *Le Trésor du Prieuré d'Oignies*, pp 85–95, no. XXIV, and A. Frolow, *La Relique de la Vraie Croix*, Paris, 1961, pp. 479–80, no. 652. For the considerable bibliography on this reliquary cross, see nn. 360 and 363.

360. Mosan: J. Weale, *Instrumenta Ecclesiastica*, Brussels, 1866, Pl. 1, along with J. Marquet de Vasselot and Père de Jerphanion, as reported by Courtoy, pp. 91–2. Byzantine: Canon Reusens, *Exposition rétrospective*, Brussels, 1888, catalogue p. 29, no. 36. Orientale: C. Diehl, *Manuel d'art byzantin*, 2eme edn., Paris, 1926, vol. II, p. 688.

361. See J. Durand, "Reliques et reliquaires arrachés à l'Orient et à Byzance au temps des Croisades," *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, pp. 380–1, 420, no. 251; S. Ratz, *Le Temps des Croisades*, Brussels-Huy, 1996, p. 127; U. Henze, *Ornamenta Ecclesiae*, vol. 3, Cologne, 1985, p. 117, no. H 34; and J. Lafontaine-Dosogne, *Splendeur de Byzance*, Brussels, 1982, p. 194, no. E 6.

362. J. Folda, *ACHL* 1, pp. 290–4.

363. F. Courtroy, *Le Trésor du Prieuré d'Oignies*, pp. 100–5.

364. The dimensions are: total height with lappets, 58 cm, width, 28 cm. Courtoy, ibid., p. 102, says that this miter entered the treasury from Jacques de Vitry: See the 1628 inventory quoted in his appendix, p. 136.

365. The two winged symbols in the corners are quite normal, the winged lion and the eagle. However, the notion of combining them with two seated Evangelist symbols is quite unusual, and indeed it is rare to find any Evangelist symbols seated. On top of that, we can recognize that the animal-headed symbol of Luke, with the ox head on the human body, is in itself an unusual type that goes back to Spanish Romanesque iconography. However, mixing regular, seated, and animal-headed symbols is unique to this program, so far as I know.

366. Courtoy, *Le Trésor*, p. 100.

367. Ibid., p. 102, and J. Braun, "Die Paramente im Schatz der Schweistern U. L. Frau zu Namur," *Zeitschrift für Christliche Kunst*, 19 (1906), cols. 289–304.

368. The date of this commission is debatable. J. Greven, "Die Mitra des Jakob von Vitry und ihre Herkunft," *Zeitschrift für Christliche Kunst*, 20 (1907), cols. 217–22, proposes that it was done in late 1216 or 1217, when Jacques de Vitry first arrived in the Holy Land, and that he had it sent back from the East as a gift to the prior of Oignies. I prefer to think that if the iconography is closely related to Jacques de Vitry as C. Cannuyer argues (C. Cannuyer, "Les emblèmes sigillaires de Jacques de Vitry reproduits sur trois pièces du trésor d'Oignies," *La Vie Wallonne*, Liege, 1984, pp. 117–26), and as we are proposing here, he used the miter in Acre and brought it back with him in 1225. Thus it may be dated to 1216–25.

369. S. Paoli, *Codice Diplomatico del sacro militare ordine Gerosolimitano oggi di Malta*, vol. 1, Lucca, 1733, p. 114, Pl. V, no. 52, and G. Schlumberger et al., Sigillographie de l'Orient Latin, Paris, 1943, p. 104.

370. Courtroy, *Le Trésor du Prieuré d'Oignies*, pp. 96–7; Cannuyer, "Les emblèmes sigillaires de Jacques de Vitry...," pp. 118–19.

371. Courtoy notes what he calls an "aspect archaique, d'accent byzantin" about the saints. He says the painting is nonetheless done by a French atelier, and the miter is not of Eastern origin as others have suggested. See notes 367 and 368.

The idea of French painters working in the Latin Kingdom is of course well-known in the second half of the thirteenth century. See the discussion of the Paris–Acre Master, formerly known as the "Hospitaller Master," as recently presented by J. Folda, "The Hospitaller Master in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 51–9, 269–72. The problem here is to find specific evidence to show that already in the first quarter of the thirteenth century, French artists recently arrived from the West were working in Acre.

372. Courtoy, *Le Trésor du Prieuré d'Oignies*, pp. 103–5. The dimensions are: total height with lappets, 61 cm, width, 28 cm. This miter is quite possibly mentioned in the inventory of 1628 as having come from Jacques de Vitry.

373. J. Braun, "Die Paramente im Schatz der Schwestern U. L. Frau Namur," *Zeitschrift für Christliche Kunst*, 19 (1906), cols. 293–4.

374. Courtoy, *Le Trésor du Prieuré d'Oignies*, p. 105.

375. Metcalf, *Coinage of the Crusades and the Latin East*, p. 82.

376. A. G. Malloy et al., *Coins of the Crusader States*, ed. A. G. Berman, New York, 1994, p. 77, no. 32a (Jerusalem), and Metcalf, *Coinage of the Crusades and the Latin East*, Pl. 24, no. 628 (Cyprus). Recall that Guy de Lusignan also used two different types of crown (see Chapter 2). It is not clear whether this reflects current characteristics of the Crusader regalia, or whether the change in the iconography of the crown as seen on different coins is related to some historical event or is meant to signify a change in royal status.

377. These circles and dots or pellets can be clearly seen on the examples illustrated by Metcalf, *Coinage of the Crusades and the Latin East*, Pl. 12, nos. 202–5, and by J. Porteous, *The John J. Slocum Collection of Coins of the Crusades*, Sotheby's, London, 1997, pp. 38–40, nos. 260–82.

378. H. Longuet, "La Trouvaille de Kessab en Orient Latin," *Revue Numismatique*, 4th ser., 38 (1935), pp. 173–4.

379. Metcalf, *Coinage of the Crusades and the Latin East*, Pl. 23, nos. 594–5.

380. See Chapters 2 and 3.

381. Metcalf, *Coinage of the Crusades and the Latin East*, p. 66.

383. Ibid., p. 265.

CHAPTER 5: THE LATIN KINGDOM OF JERUSALEM: 1225–1244

THE LATIN KINGDOM OF JERUSALEM IN THE TIME OF JOHN OF IBELIN AND FREDERICK II

1. Paris Eracles, *RHC: Hist. Occid.*, II, p. 366; Ernoul, *Chronique d'Ernoul*, p. 454. See also J. Prawer, *Histoire du Royaume Latin de Jérusalem*, vol. 2, Paris, 1970, pp. 183–4, and S. Runciman, *A History of the Crusades*, 3, Cambridge, 1954, pp. 175–7.

2. I have used the following essential works on Emperor Frederick II: D. Abulafia, *Frederick II: A Medieval Emperor*, London, 1988, esp. pp. 148–201; T. C. Van Cleve, *The Emperor Frederick II of Hohenstaufen, Immutator Mundi*, Oxford, 1972; and E. Kantorowicz, *Frederick the Second: 1194–1250*, trans. E. O. Lorimer, New York, 1931; with idem, *Kaiser Friedrich der Zweite, Ergänzungsband*, Düsseldorf and Munich, 1963. The following essays are also indispensable: K. J. Leyser, "The Emperor Frederick II," *The Listener*, August 16, 1973, republished in idem, *Medieval Germany and Its Neighbors, 900–1250*, London, 1982, pp. 269–76; and D. Abulafia, "Kantorowicz and Frederick II, *History*, 62 (1977), pp. 193–210, republished in idem, *Italy, Sicily and the Mediterranean: 1100–1400*, London, 1987, article II.

3. Kantorowicz, *Frederick the Second*, p. 136, and Abulafia, *Frederick II*, p. 149.

4. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 358–66; Ernoul, *Chronique d'Ernoul*, pp. 451–4; Abulafia, *Frederick II*, pp. 151–2; T. C. Van Cleve, "The Crusade of Frederick II," *HC* 2, pp. 440–3; Kantorowicz, *Frederick the Second*, pp. 137–9; Prawer, *Histoire du Royaume Latin*, 2, pp. 172–4; and Runciman, *A History of the Crusades*, 3, pp. 175–7.

5. Van Cleve, "The Crusade of Frederick II," *HC* 2, pp. 445–6; D. Abulafia, *Frederick II*, pp. 164–7; Kantorowicz, *Frederick the Second*, pp. 170–5.

6. "Encyclica Gregorii Papae," *Historica Diplomatica Friderici Secundi*, ed. J.-L.-A. Huillard-Bréholles, vol. 3, Paris, 1852, rpt. Turin, 1963, pp. 23–30.

7. The charges made by Gregory IX and Frederick's response are discussed by Van Cleve, "The Crusade of Frederick II," pp. 447–8; idem, *The Emperor Frederick II of Hohenstaufen*, pp. 196–9; Abulafia, *Frederick II*, pp. 166–70; and Kantorowicz, *Frederick the Second*, pp. 171–6.

8. Abulafia, *Frederick II*, p. 152.

9. Ibid., p. 170.

10. On John of Ibelin, see P. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, Woodbridge, 1997, pp. 24–57; J. LaMonte, "John d'Ibelin, the Old Lord of Beirut, 1177–1236," *Byzantion*, 12 (1937), pp. 417–48; and Runciman, *A History of the Crusades*, 3, pp. 180–1, 205–6.

11. B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 256–8.

12. Peter des Roches of Winchester and William Brewer of Exeter were two of the most powerful bishops in England. They brought with them a large contingent of English Crusaders and provided important clerical counsel and support for Frederick II during his Crusade. See K. R. Giles, "Two English Bishops in the Holy Land," *Nottingham Medieval Studies*, 31 (1987), pp. 46–57.

13. Prawer, *Histoire du Royaume Latin*, II, pp. 179–80. Giles, "Two English Bishops in the Holy Land," p. 53, points out that Peter des Roches used his considerable wealth to promote the refortification of Sidon.

14. Paris Eracles, *RHC: Hist. Occid.*, II, p. 365, transl. H. Kennedy, *Crusader Castles*, 1994, p. 122. See also Ernoul, *Chronique d'Ernoul*, pp. 458–9.

15. We shall discuss this briefly along with some of the other considerable architectural work of the Crusaders in this period in the following subchapter.

16. Prawer, *Histoire du Royaume Latin*, 2, pp. 180–3.

17. D. Pringle, "A Thirteenth-Century Hall at Montfort Castle in Western Galilee," *Antiquaries Journal*, 66 (1986), pp. 52–4, and Kennedy, *Crusader Castles*, pp. 129–31.

18. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 363–4; Van Cleve, "The Crusade of Frederick II," pp. 447–8; and M. N. Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 542–3. See also R. D. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, I, eds. I. Corfis and M. Wolfe, 1995, pp. 89, 93; and Prawer, *Histoire du Royaume Latin*, II, p. 183.

19. Bishop Peter des Roches played a major role in financing the rebuilding of Jaffa. See Giles, "Two English Bishops in the Holy Land," p. 53.

20. G. J. Wightman, *The Walls of Jerusalem*, Sydney, 1993, p. 283. The Rothelin Continuation of the Eracles, which covers the years 1229–61, states that, in regard to the year 1229, "The Saracens had demolished all the fortifications, except the Tower of David." (*Crusader Syria in the Thirteenth Century*, trans. J. Shirley, Aldershot and Brookfield, 1999, p. 9; Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 489.) Even though the writer of this text in the Soissons region in the 1260s conflated all the demolitions of Jerusalem's walls with the time of the Fifth Crusade, the reference to the Tower of David suggests that the citadel was the object of the later destructions, which, according to other Crusader and Muslim sources, escaped damage during the earlier demolitions in 1219. See Max van Berchem, *Matériaux pour un Corpus Inscriptionum Arabicarum*, II: *Syrie du Sud*, 1a: *Jérusalem ville*, *Mémoires de l'Institut Français d'Archéologie Française du Caire*, vol. 43, Cairo, 1922–3, p. 136, n. 5.

21. Van Cleve, "The Crusade of Frederick II," *HC* 2, pp. 448–51, and idem, *The Emperor Frederick II of Hohenstaufen*, pp. 202–5.

22. The Paris Eracles, *RHC: Hist. Occid.*, II, pp. 366–7, is quite brief on the voyage. We have more details from the following: *Breve chronicon de rebus siculis...*, in *Historica Diplomatica Friderici Secundi*, ed. Huillard-Bréholles, I, pt. 2, pp. 898–900.

23. Quoted in Van Cleve, *The Emperor Frederick II of Hohenstaufen*, p. 207.

24. John of Ibelin, Lord of Beirut, was technically acting on behalf of the young Henry of Lusignan's widowed mother, Alice, who was regent.

25. The most recent edition of Philip's section of the *Gestes des Chiprois* was prepared from the unique fourteenth-century manuscript, Turin, Royal Library, MS Varia 433: Filippo da Novara, *Guerra di Federico II in Oriente (1223–1242)*, ed. S. Melani, Naples, 1994, pp. 66–242. The older editions were prepared from a nineteenth-century copy of that manuscript: *Les Gestes des Chiprois*: Phelippe de Nevaire, *Estoire de la Guerre qui fu entre l'empereor Frederic & Johan d'Ibelin*, ed. G. Raynaud, Publications de la Société de l'Orient Latin: série historique, vol. 5, Geneva, 1887, pp. 40–4, and the older edition, *Les Gestes des Chiprois, RHC: Documents Arméniens*, vol. 2, Documents Latin et Français relatifs à l'Arménie, Paris, 1869, pp. 678–9, English translation in Philip de Novare, *The Wars of Frederick II against the Ibelins in Syria and Cyprus*, transl. with notes and introduction by J. La Monte, New York, 1936, pp. 77–80. For comments on the new edition, see P. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 34, n. 42. For a discussion of the relationship of Philip of Novare's memoires to the *Gestes des Chiprois*, see P. Jackson, "The End of Hohenstaufen Rule in Syria," *Bulletin of the Institute of Historical Research*, 59 (1986), pp. 20–1. For the sections of the *Gestes* that appear to make up the *Mémoires*, see Philippe de Novare, *Mémoires (1218–1243)*, ed. C. Kohler, Paris, 1913, pp. 1–101.

26. J. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, London, 1973, p. 160.

27. However, as Peter Edbury has pointed out, at least John of Ibelin retained his freedom. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 42.

28. LaMonte, "John d'Ibelin, the Old Lord of Beirut, 1177–1236," *Byzantion*, 12 (1937), p. 430.

29. Filippo da Novara, *Guerra*, p. 100; Paris Eracles, *RHC: Hist. Occid.*, II, p. 369; Philippe de Novare, *Mémoires*, 23; Philip de Novare, *The Wars of Frederick II*, pp. 87–8.

30. The sources for the time Frederick II was in the Holy Land, that is, from September 1228 until May 1229, are slight. See Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 167–8. We have assembled the main developments in our narrative that follows.

31. Giles, "Two English Bishops in the Holy Land," p. 54, points out:

> The transformation was undertaken with the advice of the patriarch and the magnates of the kingdom, who were no doubt keen to stress the military needs of the crusading states, but the reform was equally in line with the military outlook and career of the bishop himself. The situation of the house at Acre was also changed, from a site near the German hospital on the eastern

> side of the city, to a more suitable location in the northern quarter of Montmusard.

See also A. J. Forey, "The Military Order of St Thomas of Acre," *English Historical Review*, 92 (1977), pp. 487–8.

32. Ernoul, *Chronique d'Ernoul*, p. 462; Paris Eracles, *RHC: Hist. Occid.*, II, p. 370; Van Cleve, *The Emperor Frederick II of Hohenstaufen*, pp. 215–16; Runciman, *A History of the Crusades*, 3, pp. 183–4. Runciman suggests that news now had reached Palestine that Frederick had been excommunicated again, for setting out on the Crusade before being absolved from the first ban imposed on him.

33. On the negotiations between Frederick and al-Kamil, besides the works of Abulafia, Van Cleve, and Kantorowicz, cited previously, see the following older studies: N. Barbour, "The Emperor Frederick II, King of Jerusalem and Sicily, and His Relations with the Muslims," *Orientalia Hispanica, sive studia F. M. Pareja octogenario dicata*, ed. J. M. Barral, vol. 1, *Arabica Islamica*, Leiden, 1974, pp. 77–95, esp. pp. 84–6; and E. Blochet, "Relations diplomatiques des Hohenstaufens avec les sultans d'Égypt," *Revue Historique*, 80 (1902), pp. 51–64, esp. 55–8.

34. Ibn Wasil, *The Dissipator of Anxieties Concerning the History of the Ayyubids*, ed. F. Gabrieli, trans. E. J. Costello, *Arab Historians of the Crusades*, London, 1969, pp. 268–9.

35. Ibid., pp. 269–70.

36. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 370–2; Ernoul, *Chronique d'Ernoul*, pp. 461–4; Runciman, *A History of the Crusades*, 3, p. 186.

37. Ibn Wasil, *The Dissipator of Anxieties*, ed. Gabrieli, p. 270.

38. The exchange of gifts between Frederick and al-Kamil is a subject of great potential interest that has been very little studied. Frederick is said to have received wonderful things from the sultan in the fall of 1228, including an elephant, ten dromedary camels, ten Arabian stallions, monkeys, wonderful stones and vessels, and sumptuous textiles of silk and gold in diverse colors. See Paris Eracles, *RHC: Hist. Occid.*, II, pp. 371–2; also reported by R. Röhricht, *Geschichte des Königreichs Jerusalem (1100–1291)*, Innsbruck, 1898, rpt. Amsterdam, 1966, pp. 780–1, and Van Cleve, "The Crusade of Frederick II," *HC* 2, p. 453. It would be very interesting to pursue the whole issue of gift exchange here and in other relevant negotiations, especially if specific objects can be identified and linked to these diplomatic exchanges. See, on this problem, the remarks of A. Shalem, *Islam Christianized: Islamic Portable Objects in the Medieval Church Treasuries of the Latin West*, Frankfurt am Main and Berlin, 1996, and our comments earlier in Chapter 3.

39. Letter of Patriarch Gerold to Pope Gregory IX, *Historia Diplomata Friderici Secundi*, ed. Huillard-Bréholles, vol. 3, p. 104, "quod cum maxima verecundia referimus et rubore, imperatori Soldanus, audiens quod secundum morem sarracenicum se haeret, misit cantatrices que et saltatrices dicuntur et joculatores, personas quidem non solum infames, verum etiam de quibus inter christianos haberi mentio non deberet." The English translation is found in Van Cleve, *The Emperor Frederick II Hohenstaufen*, p. 217.

40. M. Michaud, *Bibliothèque des Croisades*, vol. 4, trans. M. Reinaud, Paris, 1829, rpt. New York, 1978, pp. 429–30, cites this letter in French as coming from the work of Déhébi = Schemseddin Mohammed (1247–1347), who wrote a chronicle entitled *Chronique de l'Islamisme*. The English translation is given in Van Cleve, *The Emperor Frederick II of Hohenstaufen*, p. 219. Van Cleve notes that whether or not this letter is authentic, it "reveals how desperately Frederick desired to bring the expedition to a successful conclusion." It also indicates what al-Kamil was apparently prepared to accept in terms of a proposal from Frederick in the eyes of the Muslim people.

41. Van Cleve, "The Crusade of Frederick II," *HC* 2, p. 454, and Runciman, *A History of the Crusades*, 3, pp. 186–7.

42. Filippo da Novara, *Guerra*, p. 100, Philippe de Novare, *Mémoires*, p. 23, Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 48–9, Philip de Novare, *The Wars of Frederick II*, pp. 88–9.

43. Philip de Novare, *The Wars of Frederick II against the Ibelins in Syria and Cyprus*, trans. with notes and introduction, by J. La Monte, New York, 1936, pp. 36–7.

44. Al-Maqrizi (*A History of the Ayyubid Sultans of Egypt*, trans. R. J. C. Broadhurst, Boston, 1980, p. 206) states, "At last it was agreed that the Frankish sovereign should receive Jerusalem from the Muslims, the city to remain dismantled as it was, with no repairs to the walls."

45. John La Monte reconstructed the provisions of this treaty from a series of documents that he cites in detail, Philip de Novare, *The Wars of Frederick II*, p. 37, nt. 4. In addition to the sources he cites there, see also *History of the Patriarchs of the Egyptian Church*, eds. and trans. A. Khater and O. H. E. Khs-Burmester, vol. IV, part 1, Cyril III, Ibn Laklak (1216–43) Publications de la Société d'Archéologie Copte, Textes et Documents, XIV, Cairo, 1974, p. 109. See also Prawer, *Histoire du Royaume Latin*, 2, pp. 198–200, n. 37.

46. P. M. Holt, *Early Mamluk Diplomacy, 1260–1290*, Leiden, 1995, p. 4. Holt cites the work of the Mamluk lawyer al-Qalqashandi (1355–1418) as the basis for the acceptability of truces lasting between four months and ten years. According to certain views in the later, Mamluk, period, recorded by al-Qalqashandi, a truce should not exceed four months if the Muslims were "strong and secure," but it could last for ten years if they were "in weakness and fear." We do not have a similar study on Ayyubid diplomacy, but clearly the ten-year limit was in consistent use, with the extra time added in order to accommodate the Frankish calendar.

47. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, p. 168, and n. 109.

48. The specifics of how problematic Gerold found this treaty to be, along with other activities of Frederick II in the Holy Land, are spelled out in a letter the patriarch sent to the West recorded by Matthew Paris. See E. Peters (ed.), *Christian Society and the Crusades, 1198–1229*, trans. by D. C. Munro ("Letters of the Crusaders," *University of Pennsylvania Translations and Reprints from the Original Sources of European History*, vol. 1, no. 4, Philadelphia, 1896, pp. 25–9), Philadelphia, 1971, pp. 165–70.

49. Hamilton, *The Latin Church in the Crusader States*, pp. 258–9; Runciman, *A History of the Crusades*, 3, pp. 186–8.

50. Sibt Ibn al-Jauzi, *The Mirror of the Times*, ed. F. Gabrieli, trans. E. J. Costello, *Arab Historians of the Crusades*, London, 1969, pp. 273–4.

51. Ibn Wasil, *The Dissipator of Anxieties*, ed. Gabrieli, p. 270.

52. Ibid., p. 271.

53. Ibid.

54. Paris Eracles, *RHC: Hist. Occid.*, II, p. 374. The fact is that this account is by comparison quite specific compared to other contemporary reports, and the wording of the Paris Eracles may indeed have been the source of some of the confusion over the significance of this event as a crown-wearing, not a self-coronation.

55. H. E. Mayer, "Das Pontifikale von Tyrus und die Krönung der Lateinischen Könige von Jerusalem," *Dumbarton Oaks Papers*, 21, 1967, esp. pp. 200–10.

56. Besides the sources that Mayer cites, the papal register and Roger of Wendover (ibid., p. 203), the Paris Eracles and the *Chronique d'Ernoul* all simply refer to the fact that the emperor wore his crown: "li emperere . . . porta corone" (Ernoul, *Chronique d'Ernoul*, p. 465). The Lyon and the Marsanne Eracles – in contrast to the Paris Eracles – are both comparable to the *Chronique d'Ernoul* in their treatment of the event (*RHC: Hist. Occid.*, II, p. 375, lower variants).

57. J. Richard, *The Latin Kingdom of Jerusalem*, vol. A, Amsterdam, 1979, p. 252, says the original crown was held at Baghdad since 1187, so this possibility is unlikely.

58. On the regalia of Frederick II, see P. E. Schramm, *Kaiser Friedrichs II. Herrschaftszeichen, Abhandlungen der Akademie der Wissenschaften in Göttingen*, Philologisch-Historische Klasse, 3e folge, nr. 36, Göttingen, 1955, pp. 11–41, 125–41, with frontispiece; P. E. Schramm, *Herrschaftszeichen und Staatssymbolik*, Schriften der Monumenta Germaniae historica, vol. 13/III, Stuttgart, 1956, pp. 884–919, Pls. 97–101; and P. E. Schramm and F. Mütherich, *Denkmale der deutschen Könige und Kaiser*, Munich, 1962, pp. 189–98, 441–64. Besides these important publications, see also the catalogue of *Die Zeit der Staufer*, ed. R. Haussherr, Stuttgart, 1977, which has interesting numismatic material from the time of Frederick II, vol. 1, e.g., pp. 169–70, vol. 2, Pl. 126, and includes the famous torso of the emperor, sometimes said to be Frederick II, now in Barletta, vol. 1, pp. 669–70, vol. 2, pl. 627.

In regard to what kind of crown it was, I know of no text nor any image that describes or depicts the crown in detail.

59. Letter of Hermann von Salza, *Historia Diplomatica Friderici Secundi*, ed. Huillard-Bréholles, vol. 3, p. 101.

60. Prawer, *Histoire du Royaume Latin*, II, p. 209; Van Cleve, "The Crusade of Frederick II," *HC* 2, p. 458; Runciman, *History of the Crusades*, 3, p. 189. Van Cleve's account of Frederick's interest in the reconstruction of Jerusalem is somewhat different in *The Emperor Frederick II of Hohenstaufen*, p. 226, where he reports

that the emperor intended to rebuild Jerusalem and that he left a contingent of soldiers to carry out the work. He notes that these soldiers were probably Teutonic Knights, but that others from the Templars and the Hospitallers also eventually volunteered to help. Runciman, p. 188, reports that Frederick "ordered that the Tower of David and the Gate of St. Stephen were to be repaired at once, and he handed over the royal residence attached to the Tower of David to the Teutonic Order." There is no evidence that any of the work he had in mind was ever carried out.

61. Paris Eracles, *RHC: Hist. Occid.*, II, p. 375; Van Cleve, *The Emperor Frederick II of Hohenstaufen*, p. 227; Prawer, *Histoire du Royaume Latin*, 2, p. 209.

62. Filippo da Novara, *Guerra*, pp. 103–4; Philippe de Novare, *Mémoires*, p. 25; Phelippe de Nevaire, *Estoire de la Guerre*, ed. Raynaud, p. 50, English trans., Philip de Novare, *The Wars of Frederick II*, pp. 91–2.

63. In the *RHC: Hist. Occid.*, II, see the Paris Eracles, p. 375; the Marsanne Eracles (Paris, B.N., Ms. fr. 9086), p. 376 lower margin upper variant; the Lyon Eracles, p. 376 lower margin lower variant; and Ernoul, *Chronique d'Ernoul*, p. 466.

64. Opinions of modern historians vary widely on this passage. Abulafia (*Frederick II*, pp. 191–2) sees it as a story in praise of John d'Ibelin, who refused to let the king of Jerusalem be dishonored, whatever he thought about him personally. Van Cleve (*The Emperor Frederick II of Hohenstaufen*, pp. 227–8) says this "incredible tale" only appears in writers who were pro-Cypriot, especially pro-Ibelin. He suggests it was formulated to derogate the emperor while praising John of Ibelin. Kantorowicz (*Frederick the Second*, p. 205) specifically identified the papalists whom Frederick had fought with in Acre – the patriarch, the Templars, and their supporters – as responsible for inciting the populace to throw filth at him when he was departing. Runciman (*A History of the Crusades*, 3, pp. 191–2) saw the whole popular demonstration as an indication that Acre was "seething with discontent," a situation that John and Eudes belatedly dealt with, but with no thanks from Frederick. Röhricht (*Geschichte des Königreichs Jerusalem*, p. 795) is, however, quite neutral and matter-of-fact about the incident.

65. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, p. 173.

66. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 376–9; Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 174–5.

67. As Hans Mayer points out, the Lombard War was so named, not because Frederick's German and Italian mercenaries came from Lombardy, but because many of them came from south Italy, the former province of Langobardia.

68. *Crusader Syria in the Thirteenth Century*, trans. J. Shirley, pp. 32–3; Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 525–6.

69. The Riccardiana Psalter, now in Florence in the Biblioteca Medicaea-Riccardiana, MS. 323, is attributed to his patronage by Hugo Buchthal, in *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, pp. 39–46. Further research suggests that it is unlikely Frederick II personally had anything to do with it directly, and it certainly does not reflect his interest in the classical tradition found in other works linked to his patronage. We shall discuss this remarkable manuscript in more detail later.

70. On William Brewer, see Giles, "Two English Bishops in the Holy Land," p. 52. Bishop Brewer, for example, is said to have brought back costly embroideries from Baghdad.

71. C. A. Willemsen et al., "Handschriften aus dem Umkreis Friedrichs II," and "Skulptur aus dem Umkreis Friedrichs II," in *Die Zeit Der Staufer*, ed. R. Haussherr, Stuttgart, 1977, pp. 645–63, and 664–74, respectively, and T. Van Cleve, "Frederick II, Patron of Art," in *The Emperor Frederick II of Hohenstaufen*, pp. 333–46.

72. Paris Eracles, *RHC: Hist. Occid.*, II, p. 379. It is at this point that the *Chronique d'Ernoul* ends. See Ernoul, *Chronique d'Ernoul*, pp. 466–7 in two of the manuscripts: MS. C= Brussels, Bibl. Royale, MS. 11142, Flanders in the second quarter of the fourteenth century, one of the principal codices followed for the *Chronique d'Ernoul* edition by L. de Mas-Latrie in 1871, and MS. E = Paris, B.N. MS. fr. 781, N. France *c.*1300, one of the texts in which Ernoul is named. Cf L. de Mas-Latrie, "Essai de classification," in *Chronique d'Ernoul*, pp. 481–2. However, see now, of course, M. R. Morgan, *The Chronicle of Ernoul and the Continuations of William of Tyre*, Oxford, 1973, pp. 1–7.

73. Van Cleve, *The Emperor Frederick II of Hohenstaufen*, pp. 230–1.

74. Roger of Wendover, quoted by Van Cleve, *The Emperor Frederick II of Hohenstaufen*, p. 237.

75. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 526–7.

76. On the political, institutional, and legal developments see especially Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 145–213, and Prawer, *Histoire du Royaume Latin*, 2, pp. 215–26. Prawer characterizes this as a development, "d'une monarchie féodale à une fédération oligarchique."

77. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 380–436. The years in which the Paris Eracles is so thin correspond roughly to the years that the patriarch of Jerusalem, Gerold, spent in Rome, away from the Latin Kingdom.

78. Hardwicke, "The Crusader States, 1192–1243," *HC* 2, p. 546, calls the "sarrasins" "a mass of unorganized beduins."

79. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 384–6.

80. John agreed to be co-emperor and "senior partner" of the Latin Empire for life. Baldwin was to marry Marie de Brienne immediately and when he reached age twenty, he would be given the kingdom of Nicaea, which the Latins did not control in 1229. When John of Brienne died, Baldwin would become the sole emperor. See P. Lock, *The Franks in the Aegean, 1204–1500*, London and New York, 1995, p. 63.

81. On John of Brienne as Latin Emperor, see Lock, *The Franks in the Aegean*, pp. 62–3; J. M. Buckley, "The Problematical Octogenarianism of John of Brienne," *Speculum*, 32 (1957), pp. 315–22; and J. Longnon, *L'Empire Latin de Constantinople et la Principauté de Morée*, Paris, 1949, pp. 169–77.

82. Philip de Novare, *The Wars of Frederick II*, p. 118, and J. La Monte, "Introduction," in Philip de Novare, *The Wars of Frederick II*, pp. 42–3.

83. Philip de Novare, *The Wars of Frederick II*, pp. 118–37.

84. We do not have any indication of what this great hall of the palace looked like, but it is noteworthy that it was fully functional at this time. Furthermore, since the palace would have been the residence of the king and queen had they been in Acre, it is significant that the palace can be used by the bailiff for important gatherings of this sort. Prawer says this was the customary venue for the high court.

85. Frederick II is notable for his use of golden seals among the rulers of the Latin Kingdom, who otherwise regularly use lead or wax seals. See G. Schlumberger et al., *Sigillographie de l'Orient Latin*, Paris, 1943, pp. 14–26. See also R. Haussherr (ed.), *Die Zeit der Staufer*, vol. I, p. 35, no. 51, and vol. III, pl. 21. The seals in question would have read as follows: obverse, "Fridericus dei gratia Romanorum imperator et semper Augustus et rex Ierusalem et Sicilie." The image of the seated emperor on the obverse features him wearing a simple royal crown, not obviously an imperial crown. Frederick uses gold seals of this kind with the "rex ierusalem" indication after the Treaty of Jaffa in 1229.

86. Paris Eracles, *RHC: Hist. Occid.*, II, p. 388. On Filangieri's procedural step here, see the views of Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 179–80, who says that it was not unprecedented for the members of the Haute Cour and the Cour des Bourgeois to meet together, and Prawer, "Estates, Communities and the Constitution of the Latin Kingdom," pp. 54–5, who argues that this was a special gathering that included mostly participants from Acre, not necessarily from the entire kingdom.

87. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 389–90. A complete English translation of this speech and the succeeding text pertaining to the commune of Acre is given by John La Monte in Philip de Novare, *The Wars of Frederick II*, pp. 121–3, n. 3.

88. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, p. 176.

89. Prawer, "Estates, Communities and the Constitution of the Latin Kingdom," in *Crusader Institutions*, Oxford, 1980, p. 58.

90. This is the summary given by Riley-Smith (*The Feudal Nobility and the Kingdom of Jerusalem*, pp. 176–7) of the speech recorded in the Paris Eracles, cited in n. 87.

91. Paris Eracles, *RHC: Hist. Occid.*, II, p. 391.

92. J. Prawer, "Estates, Communities and the Constitution of the Latin Kingdom," p. 54.

XIII, pp. 443–57; Prawer, "Estates, Communities and the Constitution of the Latin Kingdom," pp. 46–82; and J. La Monte, "The Communal Movement in Syria in the Thirteenth Century," *Charles Homer Haskins Anniversary Essays in Medieval History*, Boston and New York, 1929, pp. 117–31.

94. In his study of the commune of Tyre, Mayer states: "It is the outstanding achievement

of Prawer's paper to have proved beyond any doubt this transition from urban welfare fraternities into nuclei of Estates." Mayer, "On the Beginnings of the Communal Movement in the Holy Land: The Commune of Tyre," in *Kreuzzüge und lateinische Osten*, no. XIII, p. 444. See also Prawer's remarks on the commune at Acre in *Histoire du Royaume Latin*, 2, pp. 239–42.

95. On the problematic imagery found on the seal of the Confraternity of St. Andrew, see Prawer, "Estates, Communities and the Constitution of the Latin Kingdom," pp. 61–3, and G. Schlumberger, "Neuf sceaux de l'Orient Latin," *Revue de l'Orient Latin*, 2 (1894), p. 177, and Pl. I,1. No seal is extant from the commune.

96. Filippo da Novara, *Guerra*, p. 202; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 113.

97. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 391–2; Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 177–9; Richard, *The Latin Kingdom of Jerusalem*, vol. A, pp. 274–85; and Runciman, *A History of the Crusades*, 3, pp. 195–7. For the other important special studies, see Prawer, "Estates, Communities, and the Constitution of the Latin Kingdom," pp. 46–82, esp. pp. 54–67; J. Riley-Smith, "The *Assise sur la Ligèce* and the Commune of Acre," *Traditio*, 27 (1971), pp. 179–204; idem, "A Note on the Confraternities in the Latin Kingdom of Jerusalem," *Bulletin of the Institute of Historical Research*, 44 (1971), pp. 301–8; and H. E. Mayer, "Zwei Kommunen in Akkon?", in *Kreuzzüge und lateinischer Osten*, London, 1983, no. XIV, pp. 434–53.

98. Prawer, "Estates, Communities, and the Constitution of the Latin Kingdom," pp. 65–6.

99. In fact there was no resident king in the Latin Kingdom, other than Frederick II's brief sojourn, between 1225 and 1268, during which time the Hohenstaufen kings of Jerusalem were occupied with their problems in Italy or Germany. See Richard, *The Latin Kingdom of Jerusalem*, vol. A, p. 288.

100. Gerold was indeed opposed to Frederick II as we have seen, but it was in particular because of Frederick's Treaty of 1229, his high-handed tactics in relation to Jerusalem, and his wearing the crown in the Church of the Holy Sepulcher, Gerold's patriarchal church, that the emperor incurred Gerold's wrath.

101. Hamilton, *The Latin Church in the Crusader States*, pp. 259–60. The venerable archbishop of Caesarea, Peter died in 1237, after a reign of thirty-eight years, and the archbishop of Nazareth, Hugh, had died after reigning for seventeen years. The church and the kingdom could ill afford to lose such experienced leaders in the midst of the civil war.

102. Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 547–8.

103. Philip de Novare, *The Wars of Frederick II*, p. 134.

104. *Le Cartulaire du Chapitre du Saint-Sépulchre de Jérusalem*, ed. G. Bresc-Bautier, no. 184, pp. 341–2, and see B. Hamilton, "The Latin Church in the Crusader States," *East and West in the Crusader States: Context – Contacts – Confrontations*, *Acta* of the congress held at Hernen Castle in May 1993, Louvain, 1996, p. 19, n. 105.

105. Hamilton, *The Latin Church in the Crusader States*, pp. 259–61; Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 547–8.

106. B. Hamilton, "The Latin Church in the Crusader States," *East and West in the Crusader States: Context – Contacts – Confrontations*, p. 19.

107. On the twelfth-century history of Casale Imbert, also known as Casale Humberti de Pace in the Crusader period, and Akhzive today, see R. Ellenblum, *Frankish Rural Settlement in the Latin Kingdom of Jerusalem*, Cambridge, 1998, pp. 65–71.

108. Philip de Novare, *The Wars of Frederick II*, p. 137–41, 143, 144, 145 and n. 1; Paris Eracles, *RHC: Hist. Occid.*, II, pp. 395–8.

109. Filippo da Novara, *Guerra*, pp. 176–94; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 96–107; Philip de Novare, *The Wars of Frederick II*, pp. 146–55; Paris Eracles, *RHC: Hist. Occid.*, II, pp. 399–402. See also Richard, *The Latin Kingdom of Jerusalem*, vol. B, pp. 314–15, and Runciman, *A History of the Crusades*, 3, pp. 198–201.

110. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 47. I am assuming that he is distinguishing the "Latin East" from "Frankish Greece" and the Latin Empire, the latter which was founded, of course, when the Fourth Crusade attacked the Greeks in Constantinople.

111. Filippo da Novara, *Guerra*, pp. 172–4; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 94; Philip de Novare, *The Wars of Frederick II*, p. 143.

112. Filippo da Novara, *Guerra*, p. 180; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 99; Philip de Novare, *The Wars of Frederick II*, p. 149.

113. N. Coureas, *The Latin Church in Cyprus, 1195–1312*, Aldershot and Brookfield, 1997, pp. 281–3.

114. See, P. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, pp. 64–8, and Coureas, *The Latin Church in Cyprus, 1195–1312*, pp. 37–40.

115. Filippo da Novara, *Guerra*, pp. 190–2; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 105–6; Philip de Novare, *The Wars of Frederick II*, p. 157.

116. The story is also recounted in the Paris Eracles, *RHC: Hist. Occid. II*, pp. 402–3, and see Runciman, *A History of the Crusades*, 3, p. 202, and G. Hill, *A History of Cyprus*, vol. II, Cambridge, 1948, pp. 101, 123–4.

117. La Monte, "Introduction," Philip de Novare, *The Wars of Frederick II*, pp. 157–8, n. 1. See also E. Bertaux, "Les Français d'Outremer en Apulie et en Épire," *Revue Historique*, 85 (1904), pp. 224–51.

118. Edbury, *The Kingdom of Cyprus and the Crusades, 1192–1374*, p. 66. King Henry is reported to have disinherited the liegemen who had opposed him in battle, by Philip de Novare: Filippo da Novara, *Guerra*, pp. 196–8; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 108–9; Philip de Novare, *The Wars of Frederick II*, pp. 157–8.

119. Paris Eracles, *RHC: Hist. Occid.*, II, p. 403–6; Cahen, *La Syrie du Nord*, pp. 642–66; Hardwicke, "The Crusader States, 1192–1243," *HC* 2, pp. 549–50; Runciman, *A History of the Crusades*, 3, pp. 206–8.

120. It is odd that Philip de Novare does not name this bishop, who occupied the see of Sidon between the reign of Ralph de Merencourt (†1224) and that of Geoffrey Ardel (1236 ff.). See Hamilton, *The Latin Church in the Crusader States*, pp. 251–6, 260. G. Fedalto, *La Chiesa Latina in Oriente*, vol. II, Verona, 1976, p. 206, indicates that Symeon, archbishop of Tyre, held this position during a hiatus among occupants of the see of Sidon.

121. Odo of Montbéliard was appointed bailiff of Acre by Frederick in 1231 along with Balian of Sidon, but he continued to serve as the constable of the Latin Kingdom until 1243.

122. Filippo da Novara, *Guerra*, p. 202; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 112–13; Philippe de Novare, *Mémoires*, Paris, 1913, pp. 84–5; Philip de Novare, *The Wars of Frederick II*, pp. 162–4; and Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 201–3.

123. Philip writes: "Little was he esteemed; it was said that he bedecked his face like a woman and that he was most intimate with the bailli of Tyre." Filippo da Novara, *Guerra*, p. 202; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 112; Philip de Novare, *The Wars of Frederick II*, pp. 162–3.

124. Filippo da Novara, *Guerra*, pp. 204–6; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 114–15; Philip de Novare, *The Wars of Frederick II*, pp. 166–7.

125. Filippo da Novara, *Guerra*, p. 208; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 116; Philip de Novare, *The Wars of Frederick II*, p. 167. One wonders whether John of Ibelin, or Philip de Novare for that matter, may have had an illustrated manuscript of the fables of Renard the fox, as the source of his knowledge of this story.

126. It is worth noting that at this point in the Paris Eracles, that is, at Chapters 40 and 41 of Book 33, the text suddenly has very little to say about the years 1234 to 1238, and unaccountably does not even mention the death of Jean d'Ibelin in 1236. See Paris Eracles, *RHC: Hist. Occid.*, II, pp. 405–8.

127. Paris Eracles, *RHC: Hist. Occid.*, II, p. 406.

128. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, pp. 49–50; Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 203–6.

129. Paris Eracles, *RHC: Hist. Occid.*, II, p. 407. See also Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 50; Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, p. 207.

130. La Monte, "John d'Ibelin, the Old Lord of Beirut, 1177–1236," p. 446.

131. Among the events of 1233/4 to 1238 that the Paris Eracles fails to mention in the Latin Kingdom, the death of Jean d'Ibelin is perhaps the most important. This suggests that the author was away from the Holy Land during these years.

132. The *topos* of a major figure like this being killed in a hunting accident is a familiar one, reminding us of the death of King Fulk in 1142. See Folda, *ACHL* 1, pp. 173–4.

133. Filippo da Novara, *Guerra*, p. 210; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 117–18; Philippe de Novare, *Mémoires*, p. 89; clear and idiomatic translation by Edbury, *John of Ibelin and the Kingdom of Jerusalem*, pp. 50–1. John La Monte also gives a full translation of this passage: Philip de Novare, *The Wars of Frederick II*, pp. 169–70.

John of Ibelin was not the first prominent Crusader to die of a riding accident or to enter a religious order during his last days. We can recall the fate that befell King Fulk, mentioned in n. 132, and the fact that King Baldwin II had become a canon of the Holy Sepulcher at the time of his death in 1131 (Folda, *ACHL* 1, p. 114).

We may wonder, however, to what extent the Templars and Hospitallers played a special role in royal obsequies and those of prominent nobles; for example, Baldwin V's funeral was placed in the care of the Templars in 1186 (Runciman, *A History of the Crusades*, 2, p. 447). It is in any case interesting that members of the Ibelin family and other people were said to be sad to see John of Ibelin become a Templar.

134. La Monte, "John d'Ibelin, the Old Lord of Beirut, 1177–1236," p. 448.

135. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, pp. 51–7.

136. On Philip d'Aubigny, see C. Tyerman, *England and the Crusades, 1095–1588*, Chicago and London, 1988, pp. 91, 98–9, and the comments in N. Vincent, *Peter des Roches: An Alien in English Politics, 1205–1238*, Cambridge, 1996, pp. 132 n. 105, 155, 161–2, 182, 193, 200, 214, 250 and n. 110, 278, 285, 287, 308 n. 235, 323, 365, 432 n. 15.

137. Mayer, *The Crusades*, p. 259.

138. Tyerman, *England and the Crusades, 1095–1588*, pp. 91, 98–9, 138. Tyerman describes Philip d'Aubigny further as a royalist civil war commander in England, who was tutor and councillor to Henry III. He quotes Matthew Paris as saying that Philip's grave in front of the Church of the Holy Sepulcher was one for which "he had long yearned in life" (p. 99).

139. The coat of arms has four lozenges on the shield. The inscription and part of the shield below are illustrated in S. de Sandoli (ed.), *Corpus Inscriptionum Crucesignatorum Terrae Sanctae (1099–1291)*, Jerusalem, 1974, pp. 64–5, no. 74, Fig. 15. The best illustration appears in A. Re'em, "Burial Customs in the Crusader Kingdom of Jerusalem," *Knights of the Holy Land: The Crusader Kingdom of Jerusalem*, ed. S. Rozenberg, Jerusalem, 1999, p. 296, Fig. 7. Unfortunately, however, the photograph is reversed and the inscription is illegible.

140. The tomb plaque is published by C. Clermont-Ganneau, *Archaeological Researches in Palestine during the Years 1873–1874*, vol. 1, London, 1896, p. 106, and C. Enlart, *Les Monuments des Croisés dans le Royaume de Jérusalem*, vol. 1, Paris, 1925, p. 169. It is unclear what Enlart means when he says the following: "Sur le parvis du Saint-Sépulchre, celle de Philippe d'Aubigny (1236), retrouvée dans l'intérieur de l'eglise, porte son épitaphe and son blason."

141. One assumes that this tomb slab was done in Jerusalem, where Christian pilgrims had been buried for centuries, and where presumably the making of tomb slabs continued before and after the Treaty of Jaffa in 1229.

142. Despite his prominence, and the fact that he died in Templar quarters in Acre, we do not know where John of Ibelin was buried.

143. Runciman, *A History of the Crusades*, 3, pp. 205–6, enumerates the eight most important sons, nephews, and cousins who carried on the Ibelin legacy in the years after John's death. See also the geneological charts of the Ibelin family in Edbury, Riley-Smith, Runciman, and La Monte: Edbury, *John of Ibelin and the Kingdom of Jerusalem*, pp. xv–xviii; Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 315–16, Runciman, *A History of the Crusades*, 3, Appendix III: Genealogical Trees, on fold-out sheet; and La Monte, *Feudal Monarchy in the Latin Kingdom of Jerusalem*, p. 251.

144. Prawer, *Histoire du Royaume Latin*, 2, pp. 263–5; and Runciman, *A History of the Crusades*, 3, pp. 210–11.

145. Al-Ashraf died on 27 August 1237, and the redoubtable al-Kamil died in Damascus on 8 March 1238. Al-Kamil would always be remembered in the Islamic world for having ceded Jerusalem to the Crusaders, but even Sibt ibn al-Jauzi, who preached the sermon in Damascus about this, writes about him "in admiring terms as brave and sagacious, a lover of learning, and just and generous in the highest measure." H. A. R. Gibb, "The Aiyubids," *HC* 2, p. 705.

It seems remarkable that the Paris Eracles records the death of al-Kamil in 1238, marking a point where this text returns to a more detailed narrative, whereas it omits the death of John of Ibelin in 1236 altogether. See Paris Eracles, *RHC: Hist. Occid.*, II, pp. 407–8.

146. The co-emperor of the Latin Empire, John of Brienne, died on 23 March 1237, leaving the government in the hands of the young Baldwin II.

147. For the Crusades of Theobald of Champagne and Richard of Cornwall, see P. Jackson, "The Crusades of 1239–1241 and Their Aftermath," *Bulletin of the School of Oriental and African Studies*, 50 (1987), pp. 32–60; Prawer, *Histoire du Royaume Latin de Jérusalem*, 2, pp. 265–87; S. Painter, "The Crusade of Theobald of Champagne and Richard of Cornwall, 1239–1241," *HC* 2, pp. 463–85; and R. Röhricht, "Die Kreuzzügge des Grafen Theobald von Navarra und Richard von Cornwallis nach dem heiligen Lande," *Forschungen zur Deutschen Geschichte*, 26 (1886), pp. 67–102, and the study of M.-L. Bulst, "Zur Geschichte der Ritterorden und des Königreichs Jerusalem im 13. Jahrhundert bis zur Schlacht bei La Forbie am 17. Okt. 1244," *Deutsches Archiv*, 22 (1966), pp. 197–226. On the Crusade of Thibaut de Champagne, see also the recent important studies of M. Balard, "La Croisade de Thibaud IV de Champagne (1239–1240)," *Les Champenois et la Croisade*, eds. Y. Bellenger and D. Quéruel, Paris, 1989, pp. 85–95; and C. Taittinger, *Thibaud le Chansonnier, comte de Champagne*, Paris, 1987, pp. 241–68.

Besides the Paris Eracles and the Rothelin Continuation, another important source for these two Crusades is the *Chronica Majora* of Matthew Paris, ed. H. R. Luard, *Rolls Series* (=*Rerum Britannicarum Medii Aevi Scriptores*), vol. 57, parts 3, 4, and 6, London, 1870, 1877, 1882, respectively. This chronicle is particularly important because the part written by Matthew Paris contains quotations from important original documents by Gregory IX, Frederick II, the Master of the Templars, and Richard of Cornwall. Richard of Cornwall is of particular importance for Matthew Paris, because they were friends and clearly Richard was one of Matthew's most significant sources for his knowledge of the Crusades of 1239–41 and of the Holy Land. Matthew Paris only left England once – to visit Norway in 1248 – and certainly never visited the Crusader East, but his contacts in England were remarkable – he was known at the royal court and by important clerics. Furthermore, his monastery was well situated, enabling him to keep abreast of current events. St. Albans was located about a day's ride north of London on the main road, it was a large and important monastery, and many important persons stayed at St. Albans during their travels. Richard Vaughan reports that Henry III visited St. Albans no fewer than nine times. R. Vaughan, *The Illustrated Chronicles of Matthew Paris*, Cambridge, 1993, pp. viii–x.

148. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 413–14; Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 526–9, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, pp. 33–4.

149. Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, pp. 43–5.

150. On the circumstances surrounding this ban of excommunication, see Van Cleve, *The Emperor Frederick II of Hohenstaufen*, pp. 427–41. Otherwise see, Painter, "The Crusade of Theobald of Champagne," *HC* 2, pp. 468–72.

151. The Paris Eracles says, however, that they left from Marseilles and Aigues Mortes en route to Acre (Paris Eracles, *RHC: Hist. Occid.*, II, p. 413).

152. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 531–2; Shirley, *Crusader Syria in the Thirteenth Century*, p. 35; Hamilton, *The Latin Church in the Crusader States*, p. 261.

153. Jackson, "The Crusades of 1239–1241," p. 38; Painter, "The Crusade of Theobald of Champagne," *HC* 2, p. 473, and n. 13.

154. Balard, "La Croisade de Thibaud IV de Champagne," p. 89.

155. In an effort to keep the principal figures clearly identified, the names of the main Ayyubid princes are given in the text according to the usages of both P. Jackson ("The Crusades of 1239–1241") and al-Maqrizi (*A History of the Ayyubid Sultans of Egypt*, ed. R. J. C. Broadhurst, pp. 352–3, Table III), the latter in parentheses.

156. Ibid., p. 37; al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, pp. 233–5.

157. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, pp. 248–9. This has the sound of a mythological story; both Baybars and Shajar al-Durr would be future rulers of Egypt! However, this Baybars may be the emir who led Ayyub's army at La Forbie, not the formidable Baybars who became the Mamluk sultan of Egypt in 1260.

158. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 413–14; Balard, "La Croisade de Thibaud IV de Champagne," p. 90; Jackson, "The Crusades of 1239–1241," pp. 38–9; Painter, "The Crusade

of Theobald of Champagne," *HC* 2, pp. 473–4; Runciman, *A History of the Crusades*, 3, p. 213.

159. Painter, "The Crusade of Theobald of Champagne," *HC* 2, p. 473.

160. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 533–6; Shirley, *Crusader Syria in the 13th Century*, pp. 37–9.

161. The Rothelin Continuation reports the following knights belonged to this second raiding party: Henry, count of Bar, Amaury, count of Montfort, and Henry IV, duke of Burgundy, were joined by Walter of Brienne, count of Jaffa, John of Ibelin, count of Arsuf, and the two bailiffs of Acre, Balian of Sidon and Odo of Montbéliard. See Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 538–40; Shirley, *Crusader Syria in the 13th Century*, pp. 41–2.

162. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 546; Shirley, *Crusader Syria in the 13th Century*, p. 46.

163. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 414–15.

164. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 548–9; Shirley, *Crusader Syria in the 13th Century*, pp. 47–8.

165. For additional perspective on this battle with regard to Thibaut of Champagne as commander, see Balard, "La Croisade de Thibaud IV de Champagne," pp. 89–90.

166. R. Stephen Humphreys, *From Saladin to the Mongols: The Ayyubids of Damascus, 1193–1260*, Albany, 1977, p. 261.

167. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, p. 251, explicitly dates the battle at Gaza before al-Nasir Daud's attack on Jerusalem. The chronology is erroneously reversed in the Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 529–30; Shirley, *Crusader Syria in the 13th Century*, pp. 35–6. The same report and the same confused chronology appears in the Paris Eracles, *RHC: Hist. Occid.*, II, pp. 529–31.

The Rothelin Continuation places an-Nasir's attack on Jerusalem before the Crusader war council and the decision to march south leading to the defeat at Gaza. This, however, seems completely unsupportable. It makes no sense that according to these texts the Crusaders newly arrived and eager for military action would have watched the Muslims recapture Jerusalem under their noses, and then decided lamely to march off to Ascalon and Gaza without even discussing the possibility of an attack on the Holy City.

168. C. M. Bennett and B. Hennessy, "The Crusader Barbican," in *The Damascus Gate, Jerusalem*, ed. G. J. Wightman, pp. 45–60, and general fieldplan, p. 119, and G. J. Wightman, *The Walls of Jerusalem*, Sydney, 1993, p. 285, and Fig. 82, nos. 18, 22, 25, 26, 28.

169. The problem with this view is that the terms of the treaty on this point are not completely clear. Ernoul, *The Chronique d'Ernoul*, p. 465, says, for example, that the Crusaders could restore the city walls and gates, but could not build new ones.

170. Wightman, *The Walls of Jerusalem*, pp. 284–6.

171. Hamilton, *The Latin Church in the Crusader States*, p. 261, 288–9. Hamilton thinks the main source of this money was from the patriarch's share of the offerings made by pilgrims at the Church of the Holy Sepulcher while the holy sites were accessible to Christians under the terms of Frederick's treaty, 1229–39, and then later, 1243–4.

The act of depositing this substantial sum of money with the Templars is reminiscent of the treasury of the patriarch of Antioch, which had been deposited with the Hospitallers in 1209, as we have seen earlier. These acts attest to the increasing importance of the two major military orders for security for holdings of the Church in the embattled Crusader States.

172. Hamilton, *The Latin Church in the Crusader States*, pp. 261–2.

173. Paris Eracles, *RHC: Hist. Occid.*, II, p. 416; Jackson, "The Crusades of 1239–1241," pp. 40–1; and Runciman, *A History of the Crusades*, 3, p. 216.

174. Painter, "The Crusade of Theobald of Champagne," *HC* 2, p. 478.

175. Humphreys, *From Saladin to the Mongols*, p. 263.

176. Ibid., p. 264.

177. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, pp. 250–7.

178. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 416–19; Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 552; Shirley, *Crusader Syria in the Thirteenth Century*, pp. 50–1.

179. Jackson, "The Crusades of 1239–1241," p. 41.

180. Ibid., p. 44. Jackson proposes, "There is...no doubt whatsoever that Theobald did reach an agreement with the prince of Kerak, who was simply engaged in a desperate attempt to survive since he had returned from Egypt diplomatically isolated. Once in power Ayyub had reneged on promises extracted from him under duress, and al-Nasir's hopes of recovering his Damascene patrimony were frustrated yet again." See also Humphreys, *From Saladin to the Mongols*, p. 265.

181. Jackson, "The Crusades of 1239–1241," p. 42, and n. 65 with a list of Muslim sources; Humphreys, *From Saladin to the Mongols*, p. 266; Painter, "The Crusade of Theobald of Champagne," p. 479; Runciman, *A History of the Crusades*, 3, p. 216.

182. Humphreys, *From Saladin to the Mongols*, p. 266.

183. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 552–3; Shirley, *Crusader Syria in the 13th Century*, p. 51.

184. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 553–4; Shirley, *Crusader Syria in the Thirteenth Century*, p. 51–2; Paris Eracles, *RHC: Hist. Occid.*, II, p. 419.

Jackson, "The Crusades of 1239–1241," p. 43, doubts that al-Salih Ismail or al-Mansur joined forces with the Franks in the southern part of the Latin Kingdom at this time, proposing instead that the Paris Eracles was conflating these events with what happened a year later, in the summer of 1241. The account in the Paris Eracles is, however, the only one that plausibly explains the split in the Crusader army between the Hospitallers and the Templars vis-à-vis al-Salih Ismail of Damascus and al-Salih Ayyub of Cairo. Hence we are relying heavily on the Paris Eracles here.

185. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 553; Shirley, *Crusader Syria in the Thirteenth Century*, pp. 51–2.

186. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 553; Shirley, *Crusader Syria in the Thirteenth Century*, p. 52.

187. Paris Eracles, *RHC: Hist. Occid.*, II, p. 419; Runciman, *A History of the Crusades*, 3, pp. 216–17.

188. Runciman, *A History of the Crusades*, 3, p. 216, says that the Templars "were rewarded with the possession of Safed." However, the anonymous text of the "De Constructione Castri Saphet," written sometime between 1260 and 1266, presents a different story, namely that Benedict of Alignan, bishop of Marseilles, had to actively persuade the reluctant Templars to accept the responsibility and the expense of rebuilding Safed, which in the end they agreed to do. Seen in this light, the issue of Safed's castle seems to be less of a problem between the Hospitallers and the Templars than the role each order was able to play in the negotiations over the various treaties under discussion. See R. B. C. Huygens, "Un nouveau texte du traité 'De Constructione castri Saphet,'" *Studi Medievali*, ser. 3, 6 (1965), pp. 355–87, trans. in H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 190–8. We will discuss this text further and the issue of castle building and refortification in this period in Chapter 6.

189. Humphreys cites the Muslim historian, Ibn Shaddad, as the source of the Templar massacre of the Muslim slaves working at Safed: Humphreys, *From Saladin to the Mongols*, pp. 267–8.

190. Jackson, "The Crusade of 1239–1241," p. 45.

191. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 555, mentions these men and describes the fate of Henry, count of Bar le Duc.

192. Balard, "La Croisade de Thibaud IV de Champagne," pp. 89–95.

193. Matthew Paris is reported to have suggested that Thibaut left partly because he could not face the disputes over the command of the Crusader army that were sure to arise when Richard of Cornwall arrived. See Painter, "The Crusade of Theobald of Champagne," p. 481. This negative view of Thibaut is part of Richard of Cornwall's long letter giving his account of his activities in the Holy Land, 1240–1. See Matthew Paris, *Chronica Majora*, vol. 57, part 4, pp. 138–44, trans. J. A. Giles, *Matthew Paris's English History*, vol. 1, London, 1852, pp. 362–8. In fact a good deal of the negative view about Thibaut's activity while on Crusade seems to derive from this source.

194. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 553–4; Shirley, *Crusader Syria in the Thirteenth Century*, p. 52.

195. Painter, "The Crusade of Theobald of Champagne," *HC* 2, p. 481.

196. Van Cleve, *The Emperor Frederick II of Hohenstaufen*, pp. 380–1.

197. Jackson, "The Crusades of 1239–1241," p. 46, and n. 104; Runciman, *A History of the Crusades*, 3, p. 218.

198. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 420, and 421–2; Shirley, *Crusader Syria in the Thirteenth Century*, p. 123; Rothelin

Continuation, *RHC: Hist. Occid.*, II, pp. 555–6; Shirley, *Crusader Syria in the Thirteenth Century*, pp. 52–3.

199. Ibid.

200. Jackson, "The Crusades of 1239–1241," p. 46.

201. Ibid., pp. 46–7.

202. Paris Eracles, *RHC: Hist. Occid.*, II, p. 421; Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 556.

203. See Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, esp. pp. 141–3.

204. Jackson, "The Crusades of 1239–1241," p. 47.

205. Paris Eracles, *RHC: Hist. Occid.*, II, p. 421.

206. It is unfortunate that the text does not specify exactly where they went. "All the other places in the land of *Outremer* that they could go to" could include Tortosa, Saidnaya, St. Catherine's, Mount Sinai, but Richard clearly could not have done all that traveling between the time he went to Jerusalem and the time he boarded ship to go home.

In light of the accounts of these sources, it is odd that Mathew Paris's account of Richard's activities in the Holy Land does not include an explicit reference to his pilgrimage to Jerusalem.

207. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 556; Shirley, *Crusader Syria in the Thirteenth Century*, pp. 53–4. Steven Runciman is more positive by far, but even he inserts a negative note: "Richard himself stayed in Palestine till May 1241. He had behaved with great wisdom and tact and had made himself generally accepted as temporary viceroy of the kingdom.... He returned to Europe, to a career of high hopes and small fulfilment." Runciman, *A History of the Crusades*, 3, p. 219.

208. Jackson, "The Crusades of 1239–1241," pp. 35–48.

209. Tyerman, *England and the Crusades, 1095–1588*, p. 102. Richard's letter on his activities in the Holy Land, cited by Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, pp. 138–44, is the best evidence.

210. A. Forey, *The Military Orders from the Twelfth to the Early Fourteenth Centuries*, Toronto, 1992, p. 120.

211. Jackson, "The Crusades of 1239–1241," p. 50. Among the others who sailed later, P. Jackson ("The End of Hohenstaufen Rule in Syria," *Bulletin of the Institute of Historical Research*, 59 (1986), pp. 32–3) lists the following: William Longsword, earl of Salisbury, men in the contingents of William de Forz, titular count of Aumâle, Count Amaury of Montfort, Count Guigues IV of Forez and Nevers, and Hugh IV, duke of Burgundy.

212. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 67.

213. Humphreys, *From Saladin to the Mongols*, pp. 269–70.

214. R. Röhricht, "Acte de Soumission des Barons du Royaume de Jérusalem à Frédéric II," *Archives de l'Orient Latin*, vol. 1, Paris, 1881, pp. 402–3. The document currently survives in a copy found in the British Library, MS Cotton Vespasian F 1, fol. 114.

215. Ibid., p. 403.

216. On the erroneous date of 7 May 1241 often seen for this document, see Jackson, "The End of Hohenstaufen Rule in Syria," p. 22, and n. 11.

217. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 68; Prawer, "Estates, Communities, and the Constitution of the Latin Kingdom," pp. 66–7. H. E. Mayer, "Ibelin versus Ibelin, The Struggle for the Regency of Jerusalem, 1253–1258," *Proceedings of the American Philosophical Society*, 122 (1978), pp. 32–3, presents the alternative argument that the author may have been "John of Ibelin," count of Arsur.

218. Röhricht, "Acte de Soumission des Barons," p. 403. In response, these lords hoped to hear from the emperor about these peace proposals that he sealed with his golden seal, "qu'il les seele de son seele d'or."

219. Mayer, "Ibelin versus Ibelin," p. 33; Runciman, *A History of the Crusades*, 3, p. 219; Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 68.

220. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 556–62. The Rothelin Continuation also has political developments from Germany in the years 1246–8 inserted between the discussion of Frederick II and arrival of the Khwarismians in the Holy Land (pp. 560–1).

221. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 422–9.

222. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 69, places this coup attempt in October 1241. This corresponds to the date reported by Richard of San Germano that the city of Acre rebelled against the emperor in October 1241 (Jackson, "The End of Hohenstaufen Rule in Syria," p. 34).

223. Filippo da Novara, *Guerra*, pp. 222–6; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 124–7; Philippe de Novare, *Mémoires*, pp. 89–93; Philip de Novare, *The Wars of Frederick II*, pp. 170–4.

224. Filippo da Novara, *Guerra*, p. 226; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 127; Philip de Novare, *The Wars of Frederick II*, pp. 173–4.

225. Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus*, pp. 176–83.

226. The documentation on Conrad's announcement and the regency is found in "Documents relatifs à la successibilité au trône et à la régence," *RHC: Lois, II*, pp. 399–400, and the relevant parts are translated by J. La Monte in Philip de Novare, *The Wars of Frederick II*, pp. 207–9.

227. See D. Jacoby, "The Kingdom of Jerusalem and the Collapse of Hohenstaufen Power in the Levant," *DOP*, 40 (1986), pp. 83–4, 87, who argues that fourteen was the age of majority in the Sicilian kingdom where Conrad was born, and that he claimed his coming of age in a letter sent to the Latin Kingdom shortly after his fourteenth birthday on 26 April 1242. For other scholars who accept this position in regard to the date of Conrad's majority, see, ibid., p. 84, n. 3 (M. L. Bulst-Thiele and R. Hiestand); Jackson, "The End of Hohenstaufen Rule in Syria," pp. 23–6; and Edbury, *John of Ibelin and the Kingdom of Jerusalem*, pp. 70–1.

228. Jacoby, "The Kingdom of Jerusalem and the Collapse of Hohenstaufen Power in the Levant," pp. 85–7. Marsilio Zorzi's report is published in Tafel and Thomas, *Urkunden zur älteren Handels- und Staatsgeschichte der Republik Venedig*, vol. II, pp. 354–98. There is now a new edition, O. Berggötz (ed), *Der Bericht des Marsilio Zorzi*, Frankfurt-am-Main, 1991.

229. Jacoby, "The Kingdom of Jerusalem and the Collapse of Hohenstaufen Power in the Levant," p. 89.

230. Ibid., pp. 89–90. Jacoby discusses the complicated reasons for the successive elections of Odo of Montbéliard and Alice of Champagne as regent and the sophisticated legal arguments used to support the rights of the latter on pp. 94–7.

231. Edbury, *John of Ibelin and the Kingdom of Jerusalem*, pp. 72–3, discusses these two accounts and the legal issues surrounding the election of the new regent.

232. See n. 217.

233. Filippo da Novara, *Guerra*, pp. 226–30; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, pp. 127–30; Philip de Novare, *The Wars of Frederick II*, pp. 174–8.

234. La Monte points out that Alice had advanced her claim to be queen of Jerusalem on these grounds earlier, in 1229, but was refused because Conrad was the rightful heir. Here she is claiming her right to be recognized as regent under the laws and usages of the Latin Kingdom (La Monte, in Philip de Novare, *The Wars of Frederick II*, p. 175, n. 3).

235. Jacoby, "The Kingdom of Jerusalem and the Collapse of Hohenstaufen Power in the Levant," pp. 90–1, gives an intricate interpretation of the developments, both those reported by the four main sources and those behind the scenes. He notes that there is conflicting information on the nonnoble attendence at this meeting, but we can expect representatives from all important parties in the Latin Kingdom to have witnessed this important event.

236. Filippo da Novara, *Guerra*, p. 230; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 130; Philip de Novare, *The Wars of Frederick II*, p. 178. According to Jacoby ("The Kingdom of Jerusalem and the Collapse of Hohenstaufen Power in the Levant," p. 84) and Jackson ("The End of Hohenstaufen Rule in Syria," pp. 23–4), the dating of this event and the election of Alice as regent in the year 1242 by Philip de Novare constitutes major evidence to anchor these developments in this year.

237. The Paris Eracles (*RHC: Hist. Occid.*, II, pp. 426–7) tells this story in detail, but the sequence of the events surrounding the Ibelin takeover of Tyre is quite confused.

238. Here again, Philip de Novare provides the date 1242 for these events: Filippo da Novara, *Guerra*, p. 238; Phelippe de Nevaire, *Estoire de la Guerre*, ed. G. Raynaud, p. 135; Philip de Novare, *The Wars of Frederick II*, p. 184. His long account of the siege of Tyre covers pp. 130–6 of the Raynaud edition, and pp. 178–84 in La Monte's translation.

239. Jacoby, "The Kingdom of Jerusalem and the Collapse of Hohenstaufen Power in the Levant," pp. 97–101, discusses the new order with reference to the commune of Acre and the high court, and the precedents that had been set during the dramatic events of 1242.

240. Paris Eracles, *RHC: Hist. Occid.*, II, p. 420, and p. 423, translation, Edbury, *John of Ibelin and the Kingdom of Jerusalem*, p. 75.

241. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, p. 269; Jackson, "The Crusades of 1239–1241," pp. 51–2; Humphreys, *From Saladin to the Mongols*, p. 271.

242. M. Barber, *The New Knighthood: A History of the Order of the Temple*, Cambridge, 1994, pp. 143 and n. 105, 206 and n. 91. Despite its bloodiness, or rather perhaps because of it, this was an exploit about which the Templars gave particular publicity in the West. As one example, the Church of San Bevignate in Perugia had frescoes painted *c.*1280 that include scenes of the Templars fighting Muslims that may represent the raid on Nablus in 1242.

On San Bevignate, see G. Curzi, *La pittura dei Templari*, Milan, 2002, pp. 39–51, Figs. 32, 33; A. Cadei, "Architettura sacra templare," *Monaci in Armi*, eds. A. Cadei et al., Certosa di Firenze, 1995, pp. 169–70, Figs. 107, 108; and P. Scarpellini, "La chiesa di San Bevignate, i Templari e la pittura perugina del Duecento," *Templari e Ospitalieri in Italia*, eds. P. Scarpellini et al., Quaderni storici del Comune di Perugia, 4, Milan, 1987, pp. 93–158.

243. Runciman, *A History of the Crusades*, 3, p. 223.

244. C. Cahen, "The Turks in Iran and Anatolia before the Mongol Invasion," and "The Mongols and the Near East," *HC* 2, pp. 691–2, and 725–32, respectively. See also H. A. R. Gibb, "The Aiyubids," *HC* 2, pp. 708–9.

245. Mayyafariqin, or Silvan in modern Turkey, is located about 75 miles west–southwest of Lake Van in eastern Turkey.

246. Humphreys, *From Saladin to the Mongols*, pp. 269–74; Cahen, "The Turks in Iran and Anatolia . . . , B. The Khorezmian Empire," *HC* 2, pp. 673–4; Gibb, "The Aiyubids," *HC* 2, pp. 708–9; and Jackson, "The Crusades of 1239–1241," pp. 55–6.

247. A ruler had the prerogative of inserting the name of his Muslim sovereign in the prayer of the Friday sermon, known as the *khutba*.

248. The clearest discussion of these tangled developments is found in Jackson, "The Crusades of 1239–1241," pp. 53–5, and Humphreys, *From Saladin to the Mongols*, pp. 271–4.

249. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, p. 272. Some of the terms of this treaty are debated, but the complete return of Jerusalem with the Haram is not in doubt. See Jackson, "The Crusades of 1239–1241," p. 55, n. 168.

The comment about the wine bottles and the bells appears in more than one Muslim source and is clearly an oblique reference to the celebration of Christian liturgical services at the Dome of the Rock, known to the Crusaders as the *Templum Domini*.

250. "A[nno] M et CC et XLIIII, fu afermée la triwe [sic] et le signour de Damas [al-Salih Ibrahim] e le Nasser [an-Nasir Daud], son nevout, et rendirent Jerusalem et Templum Domini et toute la terre du flum [Jordan] en cha fors Naples [Nablus] et Jerico." R. Röhricht (ed.), *Annales de Terre Sainte*, B, in *Archives de l'Orient Latin*, II, p. 441. The *Annales de Terre Sainte* exists in two versions and is a compilation that covers the years 1095–1291.

251. Letter quoted by Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, pp. 288–91, partly translated by M. Barber, *The New Knighthood*, pp. 143–4, alternative trans. by Giles, *Matthew Paris's English History*, vol. 1, pp. 482–4.

It is also notable that in the passage following this letter, Matthew Paris echoes the same reservations and suspicions about the Templars, and the Hospitallers, that Philip de Nanteuil had voiced in the verses quoted earlier after the Crusader defeat at Gaza during the Crusade of Thibaut IV. He basically accuses them of treachery and fraud, without which the brave Crusader soldiers coming from the West would have been successful. This negative opinion continues to grow with regard to the Templars, leading ultimately to their suppression in the early fourteenth century. Significantly, the Hospitallers gradually manage to disassociate themselves from these charges after La Forbie.

252. When he heard what had happened, Frederick II wrote to the Templars and denounced what they had done, which contravened the treaty he had signed in 1229. He threatened that if the Templars did not reliquish their illegally gotten gains, he would confiscate their holdings in Sicily and Germany. See Barber, *The New Knighthood*, p. 144.

253. Runciman observes succinctly, "it was the last diplomatic triumph of Outremer." Runciman, *A History of the Crusades*, 3, p. 223.

254. Hamilton, *The Crusader Church in the Latin Kingdom of Jerusalem*, p. 263.

255. Jackson, "The Crusades of 1239–1241," p. 56; Humphreys, *From Saladin to the Mongols*, pp. 274–5.

256. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 563; Shirley, *Crusader Syria in the Thirteenth Century*, pp. 63–4; al-Maqrizi, *A History of the Ayyubid Sultans of Syria*, p. 273.

257. Paris Eracles, *RHC: Hist. Occid.*, II, p. 428.

258. Ibn al-Furat, *Tarikh al-Duwal wa'l-Muluk*, eds. and trans. U. and M. C. Lyons, *Ayyubids, Mamlukes and Crusaders*, vol. 2, with introduction and notes by J. Riley-Smith, Cambridge, 1971, p. 3.

259. Ibid.

260. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 563–4; Shirley, *Crusader Syria in the Thirteenth Century*, p. 60.

261. Despite the emergency recruiting, the size of the Crusader army was modest as compared to the Muslim forces. See, for estimates of the size of the armies, Marshall, *Warfare in the Latin East, 1192–1291*, p. 147–50.

262. Paris Eracles, *RHC: Hist. Occid.*, II, p. 428; Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 564; and Runciman, *A History of the Crusades*, 3, pp. 225–6.

This Baibars should not be confused with the more famous and more formidable soldier of the same name, who entered the service of Sultan Ayyub in 1246 and later became sultan of Egypt in 1260.

263. Paris Eracles, *RHC: Hist. Occid.*, II, p. 429; Shirley, *Crusader Syria in the Thirteenth Century*, p. 129.

264. Ibn al-Furat, *Tarikh*, ed. Lyons, *Ayyubids, Mamlukes and Crusaders*, 2, p. 5.

265. Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus, 1050–1310*, p. 181, notes that although it was thought at first that he had died while a prisoner, William was held in Cairo until 1250 and when he was finally released he seemed to be a very sick man.

266. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 429–30; Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 564–5.

267. Al-Dahabi, *Kitab Duwal al-Islam*, trans. A. Nègre, Damascus, 1979, p. 248.

268. Runciman, *A History of the Crusades*, 3, p. 227.

269. Paris Eracles, *RHC: Hist. Occid.*, II, pp. 431–2; Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 566–7. News of the loss of Jerusalem and the defeat of the Crusaders at La Forbie was carried to Europe in November of 1244. Louis IX was responding to this information. The official proclamation of the Crusade took place at the Council of Lyon, convened in June of 1245, where Innocent IV issued his bull, "*Afflicti corde*." See Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, pp. 456–62; Giles, *Matthew Paris's English History*, vol. 2, pp. 86–8; and P. Cole, *The Preaching of the Crusades to the Holy Land, 1095–1270*, Cambridge, MA, 1991, pp. 164–5.

270. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, pp. 276–82; and Humphreys, *From Saladin to the Mongols*, pp. 276–8, 283–8.

271. Ibid., pp. 283–4; Paris Eracles, *RHC: Hist. Occid.*, II, pp. 432–5.

272. Al-Maqrizi, *A History of the Ayyubid Sultans of Egypt*, p. 283, only says that the sultan had the walls of the city measured, which is apparently the basis for interpreting that he intended to rebuild them. Wightman (*The Walls of Jerusalem*, p. 286) reports: "In April 1247, . . . Ayyub passed through Jerusalem and laid plans for its repair and refortification, . . . To what extent the project was carried through remains uncertain. It seems likely that the walls themselves were at least partially rebuilt, including Saladin's own wall around Mount Sion. . . . The Tower of David remained in ruins for the time being, though some attempt may have been made to restore the adjoining citadel."

273. Runciman, *A History of the Crusades*, 3, pp. 229–30.

274. Rothelin Continuation, *RHC: Hist. Occid.* II, pp. 565–6; Shirley, *Crusader Syria in the Thirteenth Century*, p. 61.

275. Hamilton, *The Latin Church in the Crusader States*, p. 264.

276. J. Riley-Smith, "Latin Titular Bishops in Palestine and Syria, 1137–1291," *Catholic Historical Review*, 64 (1978), pp. 1–15, discusses the issue of bishops with holdings *in partibus infidelium*. This had been a major problem since 1187, and was again an issue because of the recent territorial losses to the Muslims.

Hamilton (*The Latin Church in the Crusader States*, p. 289) points out that the papacy did not move to deal with problems of the patriarchal see of Jerusalem until the reign of Urban IV (1261–4), when the sees of Jerusalem and Acre were combined administratively and gave the patriarch a territorial base of support in the Latin Kingdom once again.

277. Ibid., pp. 264–5. P. Riant published the most detailed discussion of this whole sequence; see *Études sur l'histoire de l'Eglise de Bethléem*, vol. 1, Genoa, 1889, pp. 33–7, and his earlier discussion, idem, "Une dependence italienne de l'église de Bethléem. Varazze en Ligurie (1139–1424)," *Atti della società ligure di storia patria*, 17 (1885), pp. 573–9.

278. Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, pp. 640–2, and P. Binski, *Westminster Abbey and the Plantagenets: Kingship and the Representation of Power, 1200–1400*, New Haven and London, 1995, pp. 142–3. See now N. Vincent, *The Holy Blood: Henry III and the Westminster Blood Relic*, Cambridge, 2001, pp. 1–30.

On Henry III's vascillating policy with regard to the Crusade, see Tyerman, *England and the Crusades, 1095–1588*, pp. 94, 111–123.

279. The Franciscans began to exist as an order with a rule established by Francis in 1209 that was eventually confirmed by Honorius III in 1223. The Dominican order took shape at the time of their general chapter of Bologna in 1220.

280. Hamilton, *The Latin Church in the Crusader States*, p. 322.

281. Hamilton notes that there is no evidence that the legate had any dealings with the Orthodox patriarch of Jerusalem (ibid., p. 323).

282. Hamilton explains the conditions this way: Orthodox clergy previously subject to Latin bishops would remain subject to them, but Orthodox clergy who had never been subject to a member of the Latin hierarchy would be directly subject to the pope himself (ibid., p. 323).

283. Ibid., pp. 322–3.

284. Runciman, *A History of the Crusades*, 3, pp. 230–3.

285. Here we should distinguish between local Christian troops who served in the Crusader armies as mercenaries, especially for the military orders, specifically the light cavalry known as Turcopoles, and the Arab Muslim troops under Muslim commanders who fought with the Frankish troops at La Forbie. We are referring to the latter in this case.

THE ART OF THE CRUSADERS: 1225–1244

286. See Chapter 2, nn. 208–23.

287. This terminology is drawn from R. Morgan, *The Chronicle of Ernoul and the Continuations of William of Tyre*, Oxford, 1973, pp. 183–4.

288. R. Morgan, "The Rothelin Continuation of William of Tyre," *Outremer*, eds. B. Z. Kedar et al., Jerusalem, 1982, pp. 244, 249, 251.

289. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 490; translation, Shirley, *Crusader Syria in the Thirteenth Century*, p. 9; alternative translation, C. R. Conder, "The City of Jerusalem," *PPTS*, vol. 6, London, 1896, p. 1.

290. The text of the "Estat de la Cité" or "La Citez de Iherusalem" appears in a number of editions: ed. Comte Beugnot, *RHC: Lois*, II, pp. 531–4; ed. T. Tobler, *Descriptiones Terrae Sanctae*, Leipzig, 1874, pp. 197–224; Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 490–504; M. de Vogüé, *Les Eglises de la Terre Sainte*, Paris, 1860, rpt. with introduction by J. Prawer, Toronto, 1973, pp. 436–44. An abbreviated version of these texts is found in H. Michelant and G. Raynaud, *Itinéraires à Jérusalem rédigés en français aux XIe, XIIe et XIIIe siècles*, Paris, 1882, pp. 21–8, and S. de Sandoli (ed.), *Itineraria Hierosolymitana Crucesignatorum*, vol. II, Jerusalem, 1980, pp. 415–21.

291. L. de Mas Latrie (ed.), *Chronique d'Ernoul*, pp. 189–210, and Michelant and Raynaud, *Itinéraires à Jérusalem*, pp. 22–52.

292. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 490–507.

293. The author of the Rothelin Continuation is referring to the fact that the Paris Eracles text mentions this destruction. See Paris Eracles, *RHC: Hist. Occid.*, II, p. 339.

294. This was the first Muslim raid on the unfortified Holy City in 1229, but there would be others.

295. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 489; Shirley, *Crusader Syria in the Thirteenth Century*, p. 9.

296. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 504–9; Shirley, *Crusader Syria in the Thirteenth-Century*, pp. 19–20.

297. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 510–15; Shirley, *Crusader Syria in the Thirteenth-Century*, pp. 21–2.

298. The three Bern MSS are abbreviated chronicles to 1228 or 1232; the Paris MS is a *History of Outremer* continued to 1261. See J. Folda, "Manuscripts of the *History of Outremer* by William of Tyre: A Handlist," *Scriptorium*, 27 (1973), pp. 93, 95.

299. For the text of these two chapters, see "La Citez de Jerusalem," in de Vogüé, *Les Eglises de la Terre Sainte*, pp. 444–51: Chapter 10 appears there as "Des Pelerinages de la Sainte Terre, I," and Chapter 11 as "II" and "III." These texts are largely comparable to the translation by Conder of the second part of "The City of Jerusalem," *PPTS*, vol. 6, pp. 29–49, drawn mostly from MSS of the "Chronique d'Ernoul," including the MSS referred to above in n. 298.

300. The Crusader castle of Safed was rebuilt by the Templars as the result of the exhortations of Bishop Benedict of Marseille, who visited the Holy Land in 1239–40. It would be surprising if this castle were under construction when this text was being written, and the author failed to mention such a new and important Crusader fortification. Therefore, it is likely that this addition to the "Estat" text would have been written before *c.*1240.

301. These additional chapters have also been published as separate texts, by Michelant and Raynaud, *Itinéraires à Jérusalem*, pp. 87–103, and 178–99, as "les Pelerinaiges por aler en Iherusalem," and "les Chemins et les Pelerinages de la Terre Sainte," respectively.

302. See Chapter 4, nn. 304–7.

303. In a select group of manuscripts, there is yet another section introduced in the codices of the "Chronique d'Ernoul," which is called "Fragments relatifs à la Galilée," or "Ernoul's account of Palestine": Michelant and Raynaud, *Itinéraires à Jérusalem*, pp. 54–76, and Conder, pp. 50–64. This material is, however, tied consistently to the period of Saladin's invasion in 1187, and dates earlier with no references to later developments.

304. His name appears as Mousket, Mouskes, or Mouskées. He died in 1283. I do not know for certain whether he visited the Holy Land in person.

305. Philippe Mousket, "Description Rimée des Saintes-Lieux," in Michelant and Raynaud, *Itinéraires à Jérusalem*, pp. 105–22.

306. Ibid., pp. 108–9.

307. See Chapter 4, nn. 172–238.

308. Ibn Wasil and Sibt ibn al-Jauzi, in Gabrieli, *Arab Historians of the Crusades*, pp. 271–2, 274–5. See also Van Cleve, *The Emperor Frederick II of Hohenstaufen*, p. 225.

341. For the comments of R. D. Pringle, see idem, "Architecture in the Latin East, 1098–1571," *Oxford Illustrated History of the Crusades*, ed. J. Riley-Smith, pp. 166–7.

342. Ibid., p. 409.

343. Folda, *ACHL*1, pp. 70–3.

344. Ibid., p. 247–8. Enlart calls this the Church of St. James the Less, but he means the Armenian church, dedicated to St. James the Greater. See H. Vincent and F.-M. Abel, *Jérusalem: Recherches de Topographie, d'Archéologie et d'Histoire*, vol. 2, *Jérusalem nouvelle*, fasc. III, Paris, 1922, pp. 518–61.

345. Enlart, *Les Monuments des Croisés*, 2, p. 410.

346. It is problematic how relevant St. Victor may be. The abbey church on the site today is built on the foundations of an early Christian and eleventh-century structure. It was built in the first half of the thirteenth century, but the east end, including transept and choir, was reconstructed in the mid-fourteenth century. "It was also at this time that the abbey received its fortified character with crenellated outer walls." See A. Kennedy, "St. Victor," *Dictionary of Art*, ed. J. Shoaf Turner, vol. 20, New York, 1996, p. 475.

350. Ibid., pp. 412–13.

351. We are using 1202 as the date of the most consequential earthquake for the thirteenth century, based on the work of D. H. Kallner-Amiran ("A Revised Earthquake-Catalogue of Palestine," *Israel Exploration Journal*, 1 (1951), p. 228). The date of an earthquake in 1212, which sometimes also appears in discussions of Crusader history, does not appear in this catalogue.

374. M. Benveniste, *The Crusaders in the Holy Land*, Jerusalem, 1970, pp. 139, 142.

375. R. Deschamps, *Terre Sainte Romane*, pp. 94–5, dates the loggia and the refined sculpture of the great hall to the 1250s, during the time of the residency of Louis IX in the Holy Land. Kennedy, *Crusader Castles*, pp. 161–2, dates the loggia to the 1230s, indicating his source as Deschamps's earlier publication of Crac. Deschamps in 1934, however, clearly dates the great hall and the loggia to the years after the decoration of the "logis du maitre," in 1230–40, and links this work to the period of St. Louis in the Holy Land. See P. Deschamps, *Le Crac des Chevaliers*, vol. I, *Les Châteaux des Croisés en Terre Sainte*, Paris, 1934, pp. 289–90. We will address this problem of interpretation later.

376. R. D. Pringle, "Architecture of the Latin East, 1098–1571," *Oxford Illustrated History of the Crusades*, ed. J. Riley-Smith, Oxford, 1997, pp. 166–7.

395. M. Struckmeyer is publishing an article on "The Sisters of the Order of St. John at Mynchin Buckland," in *The Hospitaller Women in the Middle Ages*, eds. H. Nicholson and A. Wittsell, Ashgate, forthcoming in 2005. She is arguing that despite the fact that the Order was known to have had convents of nuns, historians of the Order of the Knights of St. John have not taken women into account. This article is a first step toward this type of serious assessment.

In the meantime, the only study known to me otherwise that addresses this issue is by A. J. Forey, "Women and the Military Orders of the Twelfth and Thirteenth Centuries," *Studia Monastica*, XXIX (1987), pp. 91–2. Here he concludes that the women basically lived a contemplative lifestyle, and participated very little in the public mission of the order in the Near East. Struckmeyer contends, however, that there is more to learn about the role of women in this Order, since they always incorporated women and their history has not been investigated. I express my gratitude to Ms. Struckmeyer for permitting me to read a typescript of her work (May 2000).

In spring 2002, M. Struckmeyer announced her Ph.D. dissertation at the University of North Carolina on this topic, which will cover the role of women in the Hospitaller Order in a much more comprehensive manner during the first two-hundred years.

401. Hamilton, *The Latin Church in the Crusader States*, p. 300 and n. 13.

402. Enlart, *Les Monuments des Croisés*, 2, p. 34.

403. Hamilton, *The Latin Church in the Crusader States*, p. 301, bases his estimate on the useful compendium published by Dichter, *The Orders and Churches of Crusader Acre*, pp. 9–124.

404. R. D. Pringle, "The Churches of Crusader Acre," *Historic Acre as a Living City*, Program of a Conference organized by the Old Acre Development Company and the Ministry of Tourism, Acre, 13–16 July 2003, p. X.

405. Montfort is one of the few Crusader castles to receive serious study in the twentieth century. Following the establishment of the British Mandate in Palestine, there was a new opportunity for archaeological work. Bashford Dean sought to advance what he calls "our special problem, the study and exhibition of armor and arms, though we should naturally endeavor at the same time to trace other lines of culture" (Dean, p. 6). Together with P.L.O. Guy, acting director of the Department of Antiquities of the Government of Palestine, he selected Montfort for investigation. Accordingly, in 1926, Dean conducted a campaign in which he cleared 4.5 tons of fill from the site in a month, work apparently sponsored by the Metropolitan Museum of Art. Many of the artifacts found were taken to New York, but most of the finds are in the Rockefeller Museum in Jerusalem.

See Kennedy, *Crusader Castles*, pp. 129–32; R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. 2, Cambridge, 1998, pp. 40–3, with extensive bibliography; idem, "A Thirteenth-Century Hall at Montfort Castle in Western Palestine," *Antiquaries Journal*, 66 (1986), pp. 52–81, with full bibliography to date, on pp. 76–7, esp. n. 19; Marshall, *Warfare in the Latin East, 1192–1291*, pp. 108–11; Benveniste, *The Crusaders in the Holy Land*, pp. 331–7; W. Hubatsch, "Montfort und die Bildung des Deutschordensstaates im Heiligen Lande," *Akademie der Wissenschaften in Göttingen, Nachrichten*, Phil.-Hist. Klasse, no. 5 (1966), pp. 161–99, 27 pls.; and B. Dean, "A Crusaders' Fortress in Palestine," *Bulletin of the Metropolitan Museum of Art*, part II (1927), pp. 5–46, reprinted as *The Crusader's Fortress of Montfort*, intro., M. Benveniste, Jerusalem, 1982. P. Deschamps, *La Défense du Royaume de Jérusalem*, Paris, 1939, pp. 139–40, only seems to know the older work of Rey, Guérin, and the Survey of Western Palestine on Montfort, and he republishes the inaccurate plan of Rey.

406. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 30–2.

407. Pringle, "A Thirteenth-Century Hall at Montfort Castle," p. 53, has a useful map with the locations of these and other relevant sites east and north of Acre.

408. Kennedy, *Crusader Castles*, p. 129.

409. The castle was occupied by the Teutonic Knights between the time building began in 1227/8 and 1271, when it was captured by Baibars. Already by 1266 the Mamluks had destroyed its lands to the extent that the knights were forced to use land borrowed from the Hospitallers on which to grow their grain. Sultan Baibars then had the castle destroyed in July 1271. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 41, and Kennedy, *Crusader Castles*, p. 129.

410. See the plan published by Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 41, and Dean, "A Crusaders' Fortress in Palestine," pp. 8–9.

411. Pringle, "A Thirteenth-Century Hall at Montfort Castle," pp. 57–75, with 13 pls., and idem, *Secular Buildings in the Crusader Kingdom of Jerusalem*, pp. 73–5, no. 156.

412. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 42.

413. E. G. Rey, *Etude sur les Monuments de l'Architecture Militaire des Croisés en Syrie*, Paris, 1871, pp. 143–51, especially pp. 147–50.

414. On the German characteristics, see Kennedy, *Crusader Castles*, pp. 131–2, and R. D. Pringle et al., "Qa'lat Jiddin: A Castle of the Crusader and Ottoman Periods in Galilee," *Levant*, 26 (1994), pp. 159–62, and see also T. E. Lawrence, *Crusader Castles*, ed. R. D. Pringle, Oxford, 1988, p. 130, n. 14; R. Fedden and J. Thomson, *Crusader Castles*, 2nd edn., London, 1957, p. 29; and Hubatsch, "Montfort and die Bildung des Deutschordensstaates," pp. 187–99.

415. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 42; Dean, "A Crusaders' Fortress in Palestine," pp. 14, 40, 42, 44–6, Figs. 55, 57–8; and Z. Jacoby, T. Ornan, et al., *A Display of Crusader Sculpture at the Archaeological Museum (Rockefeller)*, Jerusalem, 1987, 24, no. 33.

416. Dean, "A Crusaders' Fortress in Palestine," p. 28, Fig. 30; Jacoby, Ornan, et al., *A Display of Crusader Sculpture*, p. 15, no. 9.

417. Dean, "A Crusaders' Fortress in Palestine," pp. 26, 28 and Figs. 27, 31.

418. Ibid., pp. 26, 27, 42; Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 42–3.

419. Ibid., pp. 24, 26, 30, 31.

420. Ibid., pp. 26, 39, 40. I will discuss this important icon fragment later.

421. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 40; Kennedy, *Crusader Castles*, p. 129; Hubatsch, "Montfort und die Bildung des Deutschordensstaates," pp. 186, 187, 196.

422. Compare Jacoby, Ornan, et al., *A Display of Crusader Sculpture*, p. 15, no. 9 (Reims sculpture, 1225–41, etc.), with the character of the sculpture at Chartres in the years from 1204 to *c.*1220, for example, between the time of the head of St. Anne, Chartres north transept trumeau, and that of the north transept Magi portal tympanum, *c.*1220. See W. Sauerländer, *Gothic Sculpture in France, 1140–1270*, New York, 1970, Figs. 87, 94. I am comparing the level of naturalism at a very beginning phase, and the proportions and composition of the face and the facial features with its tiny eyes, large nose, pinched mouth.

423. R. D. Pringle, A. Petersen, M. Dow, and C. Singer, "Qa'lat Jiddin: A Castle of the Crusader and Ottoman Periods in Galilee," *Levant*, 26 (1994), pp. 135–66; Pringle, *Secular Buildings in the Crusader Kingdom of Jerusalem*, pp. 80–2.

424. Pringle et al., "Qa'lat Jiddin: A Castle of the Crusader and Ottoman Periods in Galilee," p. 161.

425. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 206–9; idem, *Secular Buildings in the Crusader Kingdom of Jerusalem*,

pp. 91–2, no. 191, with full bibliography; Kennedy, *Crusader Castles*, pp. 128–9; Benveniste, *The Crusaders in the Holy Land*, pp. 199–204; and Conder and Kitchener, *The Survey of Western Palestine*, 1, pp. 248–50 (El Kulah, or Kulat Safed). Deschamps, *La Défense du Royaume de Jérusalem*, pp. 140–2, visited Safed in 1936, and discusses it only briefly.

426. Modern edition, R. B. C. Huygens (ed.), with an introduction, *De constructione castri Saphet, Construction et fonctions d'un château fort franc en Terre Sainte*, Amsterdam/Oxford/New York, 1981, with the text on pp. 33–44, and his earlier publication, idem, "Un Nouveau Texte du Traité 'De constructione castri Saphet,'" *Studi Medievali*, 3rd series, 6 (1965), pp. 378–87, trans. H. Kennedy, *Crusader Castles*, pp. 190–8, and a review article of Huygen's book by R. D. Pringle, "Reconstructing the Castle of Safad," *Palestine Exploration Quarterly*, 117 (1985), pp. 139–49. On the question of the authorship of this account, see Huygens, *De constructione*, 1981, pp. 10–11, and idem, 1965, pp. 357–8.

The "De constructione castri Saphet" text is the most detailed, but by no means the only contemporary text to mention Saphet. Huygens, 1981, has assembled other useful passages by Burchard of Mount Sion (1280s), Jacques de Verona (1330s), and Guillaume de Boldensele (also 1330s), see pp. 15–16. Huygens also cites a valuable set of later travelers' accounts that provide valuable information on the Safed site before the twentieth century, see pp. 17–24.

427. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 206; Kennedy, *Crusader Castles*, pp. 128–9.

428. See Marshall, *Warfare in the Latin East, 1192–1291*, 115–16, 214–21.

429. Benveniste, *The Crusaders in the Holy Land*, pp. 303–5.

430. Huygens, *De constructione castri Saphet*, 1981, pp. 35–6; idem, 1965, pp. 379–80; Kennedy, *Crusader Castles*, pp. 191–2.

431. Smail's argument is reported by Pringle, "Reconstructing the Castle of Safad," p. 140.

432. Huygens, *De constructione castri Saphet*, 1981, pp. 38–9; idem, 1965, p. 382; Kennedy, *Crusader Castles*, p. 194.

433. Huygens, *De constructione castri Saphet*, 1981, pp. 39–40; idem, 1965, pp. 383–4; Kennedy, *Crusader Castles*, pp. 195–6.

These impressive specifications for the castle of Safed should be compared with the much smaller fortification at Montfort, discussed earlier, or the equally impressive castles of Crac des Chevaliers and Chastel Pelerin.

434. Huygens, *De constructione castri Saphet*, 1981, p. 41; idem, 1965, p. 384; Kennedy, *Crusader Castles*, p. 196.

For comparative figures on the size of the garrisons at various thirteenth-century Crusader castles, see Marshall, *Warfare in the Latin East, 1192–1291*, pp. 115–21, 214–23.

435. Huygens, *De constructione castri Saphet*, 1981, pp. 42–4; idem, 1965, pp. 385–7; Kennedy, *Crusader Castles*, pp. 197–8.

436. Pringle, "Reconstructing the Castle of Safed," p. 143; idem, *Secular Buildings in the Crusader Kingdom of Jerusalem*, p. 92. It is also available with the *Survey of Western Palestine*, vol. 1, but the plan is sometimes lost and not located opposite p. 249 where it should be.

437. Huygens, *De constructione castri Saphet*, 1981, pp. 21, 26, 29, and Pringle, "Reconstructing the Castle of Safed," p. 142.

438. See the discussions about this by T. S. R. Boase, "Military Architecture in the Crusader States in Palestine and Syria," *HC* 4, pp. 140–64; R. C. Smail, *The Crusaders in Syria and the Holy Land*, London, 1973, pp. 114–15; and Folda, *ACHL* 1, pp. 9, 15, 123, 302, 393–404, along with Pringle's comments, "Reconstructing the Castle of Safed," p. 142.

439. Pringle, "Reconstructing the Castle of Safed," pp. 145–8; idem, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 206–9; and idem, *Secular Buildings in the Latin Kingdom of Jerusalem*, pp. 91–2.

440. Pringle ("Reconstructing the Castle of Safed," p. 145) makes the argument that the medieval *donjon* was round.

441. O. Dapper, *Naukeurige Beschrijving van gantsch Syrie, en Palestijn, of Heilige Lant*, Amsterdam, 1677, pp. 131–2, cited originally by Huygens, *De constructione castri Saphet*, 1981, pp. 18–19 (in French translation), and by Pringle, *Churches of the Crusader Kingdom of Jerusalem*, 2, p. 207 (in English).

442. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 208, Fig. 57.

443. J. Mesqui, *Ile-de-France Gothique*, vol. 2, Paris, 1988, pp. 327–31, 180–6, respectively.

444. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 367–8, with full bibliographical citations, and C. R. Conder and H. H. Kitchner, *The Survey of Western Palestine*, vol. 1, *Galilee*, London, 1881, pp. 133–5. Pringle points out that in recent years this castle has been the headquarters of the United Nations peacekeeping forces (UNIFIL) in southern Lebanon. Therefore it has been off limits for scholarly work or any archaeological investigation. Paul Deschamps has a long section on Toron: idem, *La Défense du Royaume de Jérusalem*, pp. 117–43; pls. XXXII–XXXIII.

445. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 317–29; idem, *Secular Buildings in the Crusader Kingdom of Jerusalem*, pp. 94–5; Kennedy, *Crusader Castles*, pp. 121–4; H. Kalayan, "The Sea Castle of Sidon," *Bulletin du Musée de Beyrouth*, 26 (1973), pp. 81–9, and the older study of Deschamps, *La Défense du Royaume de Jérusalem*, pp. 224–33, esp. 229–34.

463. For Villard's drawings I am using the annotated publication of F. Bucher, *Architector: The Lodge Books and Sketchbooks of Medieval Architects*, vol. 1, New York, 1979, pp. 15–27, 97, 99, 126–7, 170–1. For references to the full scholarship, see the edition by H. R. Hahnloser, *Villard de Honnecourt, Kritische Gesamtausgabe des Bauhüttenbuches ms. fr. 19093 der Pariser National Bibliothek*, 2nd edn., Graz, 1972, and the bibliographical update in R. Scheller, *Exemplum*, Amsterdam, 1995, pp. 176–87.

464. Johns, "Excavations...an Unfinished Church," Pls. LXXIII 1 and 2, LXXIV 5 and 6. Enlart, *Les Monuments des Croisés*, 1, pp. 96–7, of course, wrote before Johns conducted his archaeological work at 'Atlit, and what he has to say about column bases is therefore rather general. However, even though he did not know the 'Atlit examples, he notices the flattened torus at Tortosa, and he notes that the use of *griffes* or talons is somewhat rare, but both are found here in the 'Atlit parish church.

465. Contrast the early Burgundian diagonal rib profiles in Branner, *Burgundian Gothic Architecture*, p. 17, with more developed ones, pp. 104, 137, 147–9.

466. Johns, "Excavations...an Unfinished Church," Pls. LXXIII and LXXIV, and Figs. 2 and 5.

467. L. Behling, *Die Pflanzenwelt der mittelalterlichen Kathedralen*, Cologne and Graz, 1964, Pls. XLIV–L.

468. Ibid., Pls. LI–LXV.

469. Johns, "Excavations...an Unfinished Church," p. 131.

470. Bucher, *Architector*, p. 99.

471. Ibid., p. 97.

472. Ibid., pp. 127, 171.

473. We might speculate that the 'Atlit parish church was discontinued in the wake of the great disaster at La Forbie and in the face of Muslim raids in the Latin Kingdom during the following years. However, we have no clear evidence to make this link.

474. On the early history of the Carmelites, see A. Jotischky, *The Perfection of Solitude: Hermits and Monks in the Crusader States*, University Park, 1995.

475. Hamilton, *The Latin Church in the Crusader States*, p. 252; Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, p. 249.

476. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 244–8. St. Margaret's, or St. Marina's, was the Greek Orthodox monastery on Mount Carmel.

477. "Les Pelerinaiges," in *Itinéraires à Jérusalem*, eds. Michelant and Raynaud, p. 90, trans. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, p. 249.

478. J. Folda, "Painting and Sculpture in the Latin Kingdom of Jerusalem, 1099–1291," *HC* 4, p. 278; Benveniste, *The Crusaders in the Holy Land*, p. 355.

479. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 2, pp. 250–1.

480. Ibid., pp. 251–4.

481. Deschamps, *Le Crac des Chevaliers*, pp. 190–1, 279–80, plan 6, and Pls. XLI, XLII, XLIV, LXII a, XCVI; idem, *Terre Sainte Romane*, pp. 89 and Pls. 18, 31, 33; Müller-Wiener, *Castles of the Crusaders*, Pls. 70, 78, 79; and Kennedy, *Crusader Castles*, p. 163.

482. Deschamps, *Le Crac des Chevaliers*, p. 279.

483. "Une belle salle ronde voûtée d'ogives qu'on appelle le 'Logis du Maître'. On a supposé avec beaucoup de vraisemblance que là se trouvait l'appartement du châtelain, c'est-à-dire du gouverneur du Crac, et qu'il pouvait servir aussi de résidence au grand'-maître de l'Hôpital quand il venait séjourner au Crac." Ibid., p. 190.

484. Ibid, and Kennedy, *Crusader Castles*, p. 163.

485. No drawn profile of the ribs in the Logis du Maitre was published, but from the photos and from personal inspection, they seem to be similar, although the central roll is more rounded, less pointed, than what we see at 'Atlit.

486. Müller-Wiener, *The Castles of the Crusaders*, Pl. 79, and Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 1, Pl. XXXVIII.

487. Deschamps, *Le Crac des Chevaliers*, p. 191; Kennedy, *Crusader Castles*, p. 167.

488. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 1, pp. 61–9; idem, *Secular Buildings in the Crusader Kingdom of Jerusalem*, p. 21.

489. Remember that Tyre is very relevant to this period, even though much work had been done no doubt before 1225, because of the damage done to the walls and gates of the city by the earthquake of 1202. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," pp. 85–7, and see our discussion in Chapter 4.

490. G. J. Wightman, *The Walls of Jerusalem*, Sydney, 1993, pp. 283–6. There is no evidence that, in fact, Frederick did any work in Jerusalem to plan or actually rebuild any fortifications of Jerusalem.

491. Enlart, *Les Monuments des Croisés*, 2, pp. 249–62, attempted to argue the *Coenaculum* was built at the time of Frederick II, but Plommer, "The Cenacle on Mount Sion," pp. 139–66, has demonstrated persuasively that the Cenacle must date to the years just pre-1187. As a possible textual corroboration to this interpretation, we might observe that the text of the "Estat de la Cité de Jérusalem," refers to the Cenacle in exactly the same way in the early section written about Jerusalem just before October 1187, as in the later emendation that appears in the Rothelin Continuation. See, for example, Ernoul, *Chronique d'Ernoul*, p. 190, and the Rothelin Contination, *RHC: Hist. Occid.*, 2, p. 510. The fact that there was no change in referring to this holy site by these texts at worst does nothing to undermine Plommer's argument, and at best lends support to the idea that the project to rebuild and decorate the Cenacle was completed by 1187, because in both cases the author merely refers to key events that occurred there and says nothing about any changes in the configuration or decoration of the holy site.

492. H. Buschhausen (*Die süditalienische Bauplastik im Königreich Jerusalem*, Vienna, 1978, pp. 59–141) attempted to relate certain Crusader sculpture in Latrun and Jerusalem to the patronage of Frederick II. Reviews of this work by Z. Jacoby (review for the *Zeitschrift für Kunstgeschichte*, 47 (1984), pp. 400–3) and M. Burgoyne and J. Folda (review for the *Art Bulletin*, 63 (1981), pp. 321–4) have argued against this interpretation and proposed other hypotheses, which have also appeared in fuller separate studies. See Folda, *ACHL* 1, pp. 441–56, 467–71; Z. Jacoby, "The Workshop of the Temple Area in Jerusalem in the Twelfth Century: Its Origin, Evolution and Impact," *Zeitschrift für Kunstgeschichte*, 45 (1982), pp. 325–94; and idem, "The Tomb of Baldwin V, King of Jerusalem (1185–1186) and the Workshop of the Temple Area," *Gesta*, 18 (1979), pp. 3–14.

493. For the Crusader coinage in this period, see D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd edn., London, 1995, pp. 48–50, 66–74, 86–96, 98–103, 135–8, 150–2, 162–7, 169–76, and 318–22; A. G. Malloy, I. R. Preston, A. J. Seltman, *Coins of the Crusader States, 1098–1291*, ed. A. G. Berman, New York, 1994, 61–9, 127–67, 227–31; J. Porteous, "Crusader Coinage with Greek or Latin Inscriptions," *HC* 6, pp. 381–7; P. Edbury, "The Baronial Coinage of the Latin Kingdom of Jerusalem," *Coinage in the Latin East*, eds. P. Edbury and D. M. Metcalf, Oxford, 1980, pp. 59–72; and R. Irwin, "The Supply of Money and the Direction of Trade in Thirteenth-Century Syria," *Coinage in the Latin East*, pp. 73–104, and see also the catalogue of the most important collection to be sold in recent years: J. Porteous, *The John J. Slocum Collection of Coins of the Crusaders*, Sotheby's London, 1997, pp. 28–9, 39–45, 47, 49.

494. Metcalf, *Coinage of the Crusades*, Pl. 12, nos. 208, 209, and Porteous, "Crusader Coinage," p. 419, Pl. X, nos. 84, 85.

498. Metcalf, *Coinage of the Crusades*, pp. 95–6, and Figs. 11–13.

499. F. Mütherich, "Katalog," in *Denkmale der deutschen Könige und Kaiser*, eds. P. E. Schramm and F. Mütherich, vol. 1, Munich, 1962, p. 194, no. 208.

500. Metcalf, *Coinage of the Crusades*, pp. 318–22. D. H. Cox (*The Tripolis Hoard of French Seignorial and Crusader's Coins*, New York, 1933, p. 27), for example, reports one denier of Frederick II as king of Sicily only.

501. Porteous, "Crusader Coinage," p. 385, and G. Sambon, *Repertorio generale delle monete coniate in Italia*, vol. V, Paris, 1912, nos. IIB, IIC.

502. C. Castellani and G. Raimondi, "La Cancellerie," in *Federico II e l'Italia*, Rome, 1995, pp. 301–2, 304–5, Figs. VIII.12 and VIII.13, and Fig. VIII.20. Other examples are cited but not illustrated in G. Schlumberger and A. Blanchet, *Sigillographie de l'Orient Latin*, Paris, 1943, pp. 18–22.

The central building with towers and a city wall on the reverses of these seals is something of a mystery. Although the image is based on the image of "golden Rome" as found on the reverse of seals of Henry VI, the specifics of Frederick's image have changed and the inscription, "aurea Roma," on the central building on Henry's seal is gone. In the latter, the central building appears as a separate, three-tiered tower with a large scalloped portal and a cross on top. There are two towers on each side, which appear to be standing independently, both of which have crescents on top. Finally, the two smaller flanking towers – also with crescents – at each side are joined by what appears to be a low wall in front of the other elements. Is this Rome, or could it be Jerusalem at the time of the Treaty of Jaffa?

For an example of the bull of Henry VI, see M. S. C. Mariani and R. Cassano (eds.), *Federico II: Immagine e Potere*, Venice, 1995, p. 460, no. I.6. For a comparable image of Jerusalem in the form of the Holy Sepulcher, see the thirteenth-century map of Jerusalem, Uppsala, Universiteitsbibliotek, MS C.691, illustrated in *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, p. 235.

503. S. Lewis, *The Art of Matthew Paris in the Chronica Majora*, Berkeley, Los Angeles and London, 1987, pp. 76–81, and Fig. 40.

504. Metcalf, *Coinage of the Crusades*, pp. 92–7, and Edbury, "The Baronial Coinage of the Latin Kingdom of Jerusalem," pp. 63–5.

505. Porteous, *The John J. Slocum Collection*, p. 44, and nos. 324 and 326.

506. Metcalf, *Coinage of the Crusades*, p. 95. He did not suggest what real gate it might be, but obviously it might be one of the city gates of Beirut.

507. See for example, the beautiful inlaid woodwork on the pulpit that Nur ad-Din commissioned for a mosque in Aleppo and that Saladin placed in the al-Aqsa mosque in Jerusalem in 1188. For an illustration, see J. Prawer, *The*

World of the Crusaders, New York, 1972, Pl. 16, between pp. 40 and 41. Alas, this handsome work was destroyed by fire in 1968, but the Awqaf administration of the Haram in Jerusalem is sponsoring a project to have it reconstructed from the scraps and fragments that survived the conflagration.

508. Metcalf, *Coinage*, p. 95, Edbury, "The Baronial Coinage of the Latin Kingdom of Jerusalem," p. 64.

509. Metcalf, *Coinage of the Crusades*, p. 93.

510. Ibid., pp. 98–103, and M. Bates and D. M. Metcalf, "Crusader Coinage with Arabic Inscriptions," *HC* 6, pp. 457–68. Bates explains that since the later third series coins bear the mint name of Acre, it is probable that the two earlier series were struck there as well (p. 458). On the other hand other Crusader mints cannot be ruled out, for example, at Tripoli (p. 463).

536. Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, part 4, pp. 640–2, 644–5, trans. Lewis, *The Art of Matthew Paris in the Chronica Majora*, pp. 225–6, and Pl. X, between pp. 290–1.

537. Lewis, *The Art of Matthew Paris in the Chronica Majora*, p. 226.

538. It is, however, worth noting the obvious point that there are limits to the naturalism that characterizes this image. There is no attempt to represent the road with its rough spots, and the two rear clerics who hold up the canopy have their spears reversed to create what is presumably unwitting on the part of Matthew Paris, but nonetheless a whimsical Escher-like play on the perspective of the canopy.

539. Binski, *Westminster Abbey and the Plantagenets*, p. 142.

540. Ibid.

541. Although we do not have this "crystalline vessel" extant, we know of similar vessels in rock crystal and glass that can help provide *comparanda* for us to understand. Such precious containers were widely used in the twelfth and thirteenth centuries, ranging from glass containers, both open and closed, to ewers, flacons, and ampoules. See, for example, the ewers at St. Denis collected by Abbot Suger, and the various glass vessels in Belgian collections: E. Panofsky (ed.), *Abbot Suger on the Abbey Church of St. Denis and its Art Treasures*, 2nd edn., Princeton, 1979, pp. 79, 219, 220, 221, Figs. 28, 30, and J. Philippe, "L'Orient chrétien et des reliquaires médiévaux en cristal de roche et en verre conservés en Belgique," *Bulletin de l'Institut archéologique liégeois*, 86 (1974), pp. 245–89.

542. Hamilton, *The Latin Church in the Crusader States*, pp. 264–5, and D. Jacoby, "Pilgrimage in Crusader Acre: The *Pardouns dAcre*," *De Sion exibit lex et verbum domini de Hierusalem: Essays on Medieval Law, Liturgy, and Literature in Honour of Amnon Linder*, ed. Y. Hen, Turnhout, 2001, pp. 115–16, mention this strange affair, but the most detailed recent account of it is P.-V. Claverie, "Un cas de trafic de reliques dans le royaume de Jérusalem au XIIIe siècle: l'affaire Giovanni Romano, *Revue historique de droit français et étranger*, 75 (1997), pp. 627–37. P. Riant was the first to discuss this episode in the nineteenth century: see idem, "Histoire générale de l'église de Bethléem depuis l'année 1099 jusqu'à nos jours," *Atti della Società Ligure di Storia Patria*, 17 (1886), pp. 573–5, republished in a separate monograph as idem, *Etudes sur l'histoire de l'église de Bethléem*, vol. 1, Genoa, 1889, pp. 34–6, and later added to idem, "Eclaircissements sur quelques points de l'histoire de l'eglise de Bethléem-Ascalon," *Revue de l'Orient Latin*, 1 (1893), pp. 153–6.

543. This synopsis is based on the discussion by Claverie, "Un cas de trafic de reliques," pp. 628–34.

544. M. Piccirillo, *Studium Biblicum Franciscanum, Jerusalem, Museum*, Jerusalem, 1983, pp. 81–4; B. Bagatti, *Il Museo della Flagellazione in Gerusalemme*, Jerusalem, 1939, pp. 50–3.

P. Riant, *Etudes sur l'histoire de l'Eglise de Bethléem*, vol. 2, Paris, 1896, pp. 16–17, says the excavations took place in 1869. However, the correct date appears to be 1863; see B. Bagatti, *Antichi Edifici Sacri di Betlemme*, Jerusalem, 1952, p. 72, and C. Clermont-Ganneau, *Archives des Missions Scientifiques*, ser. 3, 11 (1885), pp. 223–4.

545. S. de Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, Jerusalem, 1974, pp. 227–8, no. 311, and Boase, "Ecclesiastical Art in the Crusader States in Palestine and Syria, B. Mosaic, Painting, and Minor Arts," *HC* 4, pp. 139, 337, Pl. XLIX.

546. Piccirillo, *Studium Biblicum Franciscanum, Jerusalem, Museum*, pp. 82–3.

547. B. Bagatti, *Antichi Edifici Sacri di Betlemme*, Jerusalem, 1952, pp. 106–12; S. de Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, pp. 229–33; Enlart, *Les Monuments des Croisés*, 1, pp. 187–93; O. M. Dalton, "On Two Medieval Bronze Bowls in the British Museum," *Archaeologia*, 72 (1922), pp. 133–60.

548. Bagatti, *Antichi Edifici Sacri di Betlemme*, pp. 112–13, photo 66; Enlart, *Les Monuments des Croisés*, 1, pp. 196–7.

549. Bagatti, *Antichi Edifici Sacri di Betlemme*, p. 113; Enlart, *Les Monuments des Croisés*, 1, pp. 194–5. Enlart proposed that the pair of enameled candlesticks belonged to the twelfth century, whereas the single large candlestick was from the thirteenth century.

550. Enlart, *Les Monuments des Croisés*, 1, suggested that these silver candlesticks were possibly done in England for Gottifredo de' Prefetti when he was traveling in the West to raise support for his see. I think it is possible he had these works done in the Holy Land when he finally took up residence in the 1250s and had the special inscription added as a memento of the attempted alientation of Bethlehem church property.

551. Enlart, *Les Monuments des Croisés*, 1, pp. 181–7, and Bagatti, *Antichi Edifici Sacri di Betlemme*, pp. 72–3, 113. The idea that these objects were made in the fourteenth century and brought to Bethlehem when the Franciscans returned here in the 1330s and 1340s has been voiced (see S. de Sandoli, *The Peaceful Liberation of the Holy Places in the XIVth Century*, Cairo, 1990, pp. 39–58, on the return of the Franciscans to the Holy Places). The weight of opinion still favors a thirteenth-century date for these musical objects, pending more thorough study.

552. Claverie, "Un cas de trafic de reliques," p. 636.

553. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, pp. xxx–xxx.

554. H. Buchthal, with liturgical and palaeographical chapters by F. Wormald, *Miniature*

Painting in the Latin Kingdom of Jerusalem, Oxford, 1957; discussion: pp. 47–8; calendar: 107–9, 110–21, palaeography: 136–7; catalogue: 144 (with older bibliography), Pls. 55–6, and F. Wormald, "The Pontifical of Apamea," *Het Nederlands Kunsthistorisch Jaarboek*, 5 (1954), pp. 271–5.

555. Rome, Biblioteca Apostolica Vaticana, Barberini Latin MS 659: with a Jerusalem calendar (fols. 1r–6v), and one painted initial on fol. 10r: O(rdo secundum) (4.6 × 4.6 cm). See Buchthal and Wormald, *Miniature Painting in the Latin Kingdom of Jerusalem*, pp. xxx; calendar: pp. 107–21; litany: pp. 128–31; palaeography: p. 136. See also the comparison of the Jerusalem calendar in Barberini MS 659 with a Carmelite manuscript, published by B. Zimmerman (ed.), *Ordinaire de l'Ordre de Notre-Dame du Mont-Carmel par Sibert de Beka (vers 1312)*, Bibliothèque Liturgique, vol. 13, Paris, 1910, pp. 367–70.

556. C. Kohler, "Un Rituel et un Bréviaire du Saint-Sépulcre de Jérusalem (XIIe–XIIIe siècle)," *Mélanges pour servir à l'histoire de l'Orient Latin et des Croisades*, fasc. 2, Paris, 1906, pp. 294–344. Wormald notes that the Barletta MS has flyleaves that are fragments of other liturgical manuscripts. It also includes a brief chronicle of events between 1097 and 1202 in the Latin East, which is written in a scribal hand that closely resembles the main hands in the Egerton sacramentary and the pontifical of Apamea (Buchthal and Wormald, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 136).

557. Biblioteca Apostolica Vaticana, Vatican Latin MS 4947, is mostly written in the 1160s, with additions *c.*1180 and the last three sections in this codex written in the mid-thirteenth century. See G. Bresc-Bautier, *Le Cartulaire du Chapitre du Saint-Sépulcre de Jérusalem*, Paris, 1984, pp. 7–9, 17, and the edited text following. This manuscript is also MS B in the edition by E.de Rozière, *Cartulaire de l'Eglise du Saint Sépulcre de Jérusalem*, Paris, 1849, pp. v–vi, and the edited text following.

558. Biblioteca Apostolica Vaticana, Vatican Latin MS 7241, is mostly written in the 1230s. See Bresc-Bautier, *Le Cartulaire du Chapitre du Saint-Sépulcre de Jérusalem*, pp. 10–13. This manuscript is MS A in the edition by E. de Rozière cited earlier. Wormald wonders whether this manuscript was written in Outremer; he thinks the hand in this codex shows similarities to the others, but is lacking the closely related scribal characteristics otherwise identified in this group of manuscripts.

559. Wormald, "The Pontifical of Apamea," pp. 271–9. This manuscript has a colophon that reads, "*Normandus scripsit hoc opus.*" See also Buchthal and Wormald, *Miniature Painting in the Latin Kingdom of Jerusalem*; discussion: pp. xxx, 47–8; palaeography: p. 136; catalogue: p. 144, with older bibliography.

560. Buchthal and Wormald, *Miniature Painting in the Latin Kingdom of Jerusalem*, pp. xxx and 136. Buchthal also mentions an additional manuscript now in Chantilly, a breviary of the Holy Sepulcher, that Kohler studied and in which he identified liturgical indications that relate to Jerusalem and the period 1229–44. However, the manuscript itself dates to the late thirteenth century, and is thus not part of the group mentioned earlier by Buchthal and Wormald (p. xxx and n. 7). On all of these manuscripts see L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, III Colloquio Internazionale Medioevo Romanzo e Orientale, 1999, pp. 86–7.

561. Kohler, "Un Rituel et un Bréviaire du Saint-Sépulcre de Jérusalem," *Mélanges pour servir à l'histoire de l'Orient Latin et des Croisades*, fasc. 2, Paris, 1906, p. 353.

562. For the main bibliography, see n. 554.
The main contents/decoration of the manuscript consist of the following:
Sacramentary in Latin:
London, British Library, Egerton MS 2902:

151 fols., with 6 flyleaves, 30.3 × 21 cm, 21 lines written in one column, one extant full page miniature of the Crucifixion, numerous painted initials.
Fol. 1r–v, Calendar (January and February) written in an Italian fourteenth-century hand.
Fol. 2r–6v, Calendar (March to December)
Fol. 7v, *Summe sacerdos*
Fol. 9r, *Prephatio de omnibus apostolis*
Fol. 14r, Preface:
Initials: P(*er omnia*) and V(*ere dignum*) (9.5 × 5.8 cm)
Fol. 14v, Miniature: Crucifixion (20.7 × 13.7 cm)
Fol. 20v, *Proprium de tempore.*
Initial: E(*xcita domine*) (5.5 × 4.0 cm)
Fol. 56r, *In die sancte pasche*
Initial: D(*eus qui*) (4.8 × 5.0 cm)
Fol. 62r, *In die ascensionis domini*
Initial: C(*oncede quesumus*) (4.2 × 4.0 cm)
Fol. 64v, *In die sancte pentecoste*
Initial: D(*eus qui*) (4.4 × 3.0 cm)
Fol. 74v, *Proprium sanctorum. Natale s. stephani protomartiris*
Initial: D(*a nobis*) (5.8 × 5.2 cm)
Fol. 83r, *Annunciatio s. marie*
Initial: D(*eus qui*) (4.3 × 7.0 cm)
Fol. 100v, *Assumptio s. marie*
Initial: V(*eneranda nobis*) (4.3 × 7.0 cm)
Fol. 112r, *Festivitas omnium sanctorum*
Initial: O(*mnipotens sempiterne*) (3l2 × 7.0 cm)
Fol. 151r, *De nativitate domini secundum Lucam... sic dictum ad illos* (end).

563. For the main bibliography see nn. 554 and 559.
The main contents/decoration of the manuscript consists of the following:

London, British Museum, the Pontifical of Apamea (formerly in the private collection of Professor Francis Wormald)
206 fols. with three flyleaves, 28.5 × 18.5 cm, 19 lines in one column,
one illuminated initial, numerous illuminated and painted initials.
Fol. 1r (*In nomine domini incipit ordo de septem ecclesiasticis gradibus.*)
Initial: O(*remus*). Bust of an archbishop (4.0 × 4.0 cm).
Fol. 21r, *Vis ecclesie appamiensi. Michi meisque successoribus. Fidem obedientiam et reverentiam exhibere.R. Volo* (marginal addition)
Fol. 204v, *Normandus scripsit hoc opus.*
Fol. 205r, *Ego N. electus valanensis ab hac hora in antea....*
Anno domini Millesimo CC.XIII. VI. die intrante decembris. (addition).

564. Ibid., p. 108, and Hamilton, *The Latin Church in the Crusader States*, p. 257.

565. This kind of evidence suggests several possibilities, either that the artist was not a native Frankish Christian, and therefore might have been, for example, Syrian or Armenian, or that he was not completely in command of the writing and spelling of Latin inscriptions, or both. The style of the miniature otherwise seems to indicate a Crusader artist of modest talents who may have Italian ancestry, but perhaps he was an Eastern Christian artist who was trained by artists of Italian descent?

566. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 47.

567. See M. Andrieu, "Le Pontifical d'Apamée et autres textes liturgiques communiqués à Dom Martène par Jean Deslions," *Revue Bénédictine*, 48 (1936), pp. 321–48.

568. Wormald, "The Pontifical of Apamea," p. 274.

569. Ibid., p. 277.

570. H. Buchthal, with liturgical and palaeographical chapters by F. Wormald, *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, discussion: pp. xxx–xxx, 39–48: calendar: pp. 107–8, 110–21; litany: pp. 129–30; palaeography: p. 137; catalogue: pp. 143–4 (with the older bibliography), and Pls. 52–4; G. D. Regoli, "Il Salterio di San Giovanni d'Acri della Riccardiana di Firenze," *Federico II: immagine et potere*, Venice, 1995, pp. 441–5; J. Folda, "Crusader Painting in the 13th Century: The State of the Question," *Il Medio Oriente e l'Occidente nell'Arte del XIII secolo*, ed. H. Belting, Bologna, 1982, pp. 107–8, and see now Minervini, "Produzione e circolazione di manoscritti negli stati crociati," p. 86.

Most reviews of Buchthal's book and comments on the Riccardiana Psalter by other scholars have accepted his interpretations in regard to the Riccardiana Psalter, at least provisionally, as a working hypothesis. H. Bober's review in the *Art Bulletin*, 42 (1961), p. 67, however, does raise questions about Buchthal's attributions.

571. For the main bibliography, see n. 570.
The main contents/decoration of this manuscript consist of the following (Fig. 120, CD nos. 22–37):
Psalter in Latin:
Florence, Biblioteca Riccardiana, MS 323:
175 fols., 22.0 × 16.5 cm, 21 lines written in one column, one full-page and 7 panel miniatures, numerous small illuminated initials.

Fol. 1r–6v	Calendar
Fol. 7r	Calendrical information: *-sti stet dies aput grecos quos manifestavit....*
Fol. 7v–8r	Easter tables.
Fol. 8v	blank
Fol. 9r	*Prima ala est confessio...* (Alanus ab Insulis)
Fol. 12v–13r	*Summe sacerdos*
Fol. 14v	Psalter: Initial: B(*eatus vir*),

	Annunciation and Nativity, with prophets Isaiah and Habbukuk, and King David (15.9 × 10.4 cm).
Fol. 36r	(*Dominus illuminatio mea*) Panel Miniature: Adoration of the Magi (5.8 × 5.6 cm).
Fol. 49v	(*Dixi custodiam*) Panel Miniature: Presentation in the Temple (5.7 × 5.6 cm).
Fol. 62r	(*Dixit insipiens*) Panel Miniature: Entry into Jerusalem (6.1 × 6.2 cm).
Fol. 75r	(*Salvum me fac*) Panel Miniature: Last Supper and the Washing of the Feet (6.1 × 5.4 cm).
Fol. 90v	(*Exultate deo*) Panel Miniature: Harrowing of Hell, and Holy Women at the Sepulchre (6.0 × 5.9 cm).
Fol. 105v	(*Cantate domine*) Panel Miniature: Ascension (5.8 × 5.8 cm).
Fol. 121v	(*Dixit dominus*) Panel Miniature: Pentecost (6.8 × 6.1 cm).
Fol. 171r	Litany
Fol. 172v	Prayers
Fol. 174v	*Pro comite . . . ut famulum tuum N. comitem nostrum . . . custodias . . . ut gratie tue munere defensi donis semper celestibus iocundentur* (end).
Fol. 175v	*Suor margharita dasschorna monacha in sancto Silvestro* (marginal addition in a later hand).

572. I am enormously grateful to Dr. Cathleen Fleck for having generously shared with me the results of her unpublished research on the Riccardiana Psalter. The intensive scrutiny she has given this problematic codex and the penetrating questions she raised about it have been instrumental in stimulating me to attempt to formulate my own hypotheses for the origin, the place of execution, the dating, the patron, and the function of this extraordinary manuscript. In developing my interpretation of the evidence, I have relied heavily on her substantial fifty-five-page paper prepared for a graduate seminar at the Johns Hopkins University with Dr. Daniel Weiss.

573. Wormald, in Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 40 and n. 2.

574. "Suor Margharita dasschorno monacha in sancto silvestro" on fol. 175v, see ibid., p. 143. G. Dalli Regoli, "Il Salterio di San Giovanni d'Acri della Riccardiana di Firenze," in *Federico II: immagine e potere*, ed. M. S. C. Mariani, Venice, 1995, p. 441, identifies Da Scorno or Scornigiani as an influential Pisan family and San Silvestro as the Pisan Benedictine monastery that became in 1331 a Dominican convent for women.

575. Wormald, in Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 108.

576. These additions appear for Samuel the prophet (August 20), Pantaleonis (28 July), and Count Roger (21 June). See Wormald, in Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 109, n. 6.

577. Wormald, in Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, pp. 108–9, n. 6.

578. The eight divisions are as follows: Matins on Sunday (Psalms 1–25), Matins of the Six Feria (psalms 26–37, 38–51, 52–67, 68–79, 80–96, and 97–108), and Vespers of Sunday and the Feria (Psalms 109–50).

579. A more or less contemporary example in England is the Huntingfield Psalter, New York, Morgan Library MS 43 (see N. Morgan, *Early Gothic Manuscripts, I, 1190–1250*, London, 1982, pp. 77–9, Figs. 107, 109, 113) and the Ingeborg Psalter in France (F. Deuchler, *Der Ingeborgpsalter*, Berlin, 1967).

In France and England we also frequently find psalters with a set of historiated initials at the eight divisions, such as the Noyon Psalter c.1200 (F. Avril, *Un Très Précieux Psautier du Temps de Philippe Auguste*, Paris: Galerie Ratton & Ladrière, 1989, pp. 3–15). The Noyon Psalter has recently been acquired by the Getty Museum. I am indebted to Dr. E. Teviotdale, former Associate Curator, for supplying me with a copy of the Avril article just mentioned.

The historiated initials found in these English and French psalters are typically illustrated with scenes such as the following, mostly of King David, for example, Ps. 1, David playing the psaltery, Ps. 26, David annointed by Samuel, Ps. 38, David pointing to his mouth, Ps. 52, David before Saul, Ps. 68, the Fool, Ps. 80, David in prayer, Ps. 97, David playing the bells, Ps. 109, Christ enthroned.

580. Buchthal, *MPLKJ*, p. 41.

581. Ibid., p. 130.

582. Ibid., p. 129.

583. Buchthal and Wormald, Ibid., p. 41, n. 3, and 130.

584. Hamilton, *The Latin Church in the Crusader States*, p. 259.

585. Wormald, in Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 108.

586. Ibid., p. 129.

Pace, "Untersuchungen zur sizilianischen Buchmalerei," in *Die Zeit der Staufer: Geschichte, Kunst, Kultur*, vol. 5, Stuttgart: Württembergisches Landesmuseum, 1977, p. 443.

588. This proposition seems parallel to my own personal case where I, as a married historian of art, have as a prayerbook, a copy of the Jesuit *Liber Devotionum*, 5th edn., Chicago, 1947, which, even though it is written specifically for celibate Jesuit scholastics, is useful for private prayer for those who do not belong to the order.

589. A. Büchler, "Zu den Psalmillustrationen der Haseloff-Schule: Die *Vita Christi*-Gruppe," *Zeitschrift für Kunstgeschichte*, 52 (1989), p. 216; and A. Haseloff, *Eine Thuringische-Sächsische Malerschule des 13. Jahrhunderts*, Strassburg, 1897, p. 37.

590. The text for Isaiah is "Ecce virgo [in utero] concipiet" (Isaiah 7:14), a literal translation of the Greek, for which "in utero" does not even appear in the Vulgate. The text of Habukkuk is "In medio duorum animalium cognosceris" (Habukkuk 3: 2, a literal translation of the Greek). See Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 42.

591. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, p. 43, and Pl. 144c. This manuscript is Madrid, Bibl. Nacional, MS 52, fol. 80r, Virgin and Child enthroned.

592. Ibid., p. 43.

600. V. Pace, "Icone di Puglia, della Terra Santa e di Cipro: Appunti Preliminari per un'indagine sulla ricezione Bizantina nell'Italia meridionale duecentesca," *Il Medio Oriente e l'Occidente nell' Arte del XIII secolo*, ed. H. Belting, Bologna, 1982, pp. 183–4.

601. On manuscripts known in the period of Frederick II, see V. Pace, "Pittura e miniatura sveve da Federico II a Corradino: storia e mito," *Federico II e l'Italia: Percorsi, Luoghi, Segni e Strumenti*, Lucca, 1995, pp. 103–10, and for a more general sketch of Frederick II as an art patron, see T. Van Cleve, Frederick II, Patron of Art," *The Emperor Frederick II of Hohenstaufen*, Oxford, 1972, pp. 333–46.

602. N. Vincent, *Peter des Roches*, pp. 256 and 137, refers only to the *Historia Orientalium Principum*, a work that was also known by Jacques de Vitry and William of Tripoli, but has not survived to modern times. See also R. H. C. Davis, "William of Tyre," *Relations between East and West in the Middle Ages*, p. 71. T. S. R. Boase suggests, however, that both this lost work and his well-known "History of Outremer" were taken to St. Albans (idem, *Kingdoms and Strongholds of the Crusaders*, London, 1971, p. 125).

603. Lewis, *The Art of Matthew Paris in the Chronica Majora*, p. 3.

604. J. Folda, *The Illustrations in Manuscripts of the History of Outremer by William of Tyre*,

Ph.D. dissertation, Johns Hopkins University, vol. 2, Baltimore, 1968, pp. 2–11. Of the ten manuscripts or fragments extant, only MS Reg. Lat. 690, in the Biblioteca Apostolica Vaticana in Rome has an illustrated initial.

605. Paris, B. N. MS fr. 9081, done in Paris in the style of the Moralized Bibles; see ibid., pp. 15–21.

606. Lewis, *The Art of Matthew Paris in the Chronica Majora*, pp. 269–90.

607. Ibid., p. 270.

608. Paris, B. N. MS fr. 2628, done in Acre; see, Folda, *Illustrations*, pp. 276–81.

609. Ibid., pp. 121–324. I am considering only the *History of Outremer* manuscripts done in the thirteenth and fourteenth centuries, not the relatively few from the fifteenth century.

610. I am only considering Matthew's "action" scenes, not other types of illustrations that he also does, including, for example, extensive maps, drawings of seals, heraldry, and standards.

611. Lewis, *The Art of Matthew Paris*, p. 270.

612. Ibid., p. 273.

613. Ibid., Pl. XIII, between pp. 290 and 291.

614. The earliest example is probably Paris, BN, MS fr. 2628, done in Acre in the 1260s, mentioned in n. 608. See also Rome, Biblioteca Apostolica Vaticana, MS Pal. Lat. 1963, done in Antioch, *c.*1260–8. MS Pal. Lat. 1963 is notable, not only for being the only extant illustrated Crusader manuscript we have from Antioch in the thirteenth century, but also because it includes imagery that indicates firsthand knowledge of the site of the city of Antioch, which is incorporated into its miniatures. See J. Folda, "A Crusader Manuscript from Antioch," *Atti della Pontificia Accademia Romana di Archeologia*, ser. 3, *Rendiconti*, 42 (1969–70), pp. 283–98.

615. Folda, "Crusader Painting in the 13th Century: The State of the Question," p. 108.

616. See K. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], Figs. 17, 18, and idem, "Icon Painting," [3 (1966)], Figs. 8, 32.

617. See Weitzmann, "Icon Painting," [3 (1966)], Figs. 8, 48.

618. This tiny detail seems to be quite peculiar. Sandaled feet in icons from the eastern Mediterranean in the thirteenth century appear to have straps that divide into two a short way up on the foot, one strap running along the instep of the foot, the other running across the foot.

619. See the figures of standing male saints cited in two previous notes, nn. 616 and 617.

620. Unpublished icon of the Monastery of St. Catherine's on Mount Sinai: It is a Crusader icon painted in a Veneto-Byzantine Crusader style attributed here to the period of the 1260s. See our discussion in Chapter 6.

621. Dean, "The Exploration of a Crusaders' Fortress (Montfort) in Palestine," pp. 39–40.

622. K. Weitzmann, "The Icons of Constantinople," *The Icon*, [11 (1982)], pp. 19–20, 63–7; D. Mouriki, "Icons from the 12th to the 15th Century," *Sinai, Treasures of the Monastery of St. Catherine*, ed. K. Manafis, Athens, 1990, pp. 108–16, 164–85. See also the general essay on St. Catherine's Monastery by J. Lafontaine-Dosogne, "Le Monastère du Sinai: Creuset de Culture Chrétienne (Xe–XIII siècle), *East and West in the Crusader States: Context – Contacts – Confrontations*, Acta of the congress held at Hernen Castle in May 1993, eds. K. Ciggaar et al., Louvain, 1996, pp. 103–29, esp. 120–5.

623. D. Mouriki, "Four Thirteenth-Century Sinai Icons by the Painter Peter," *Studenica et l'Art Byzantin autour de l'année 1200*, ed. V. Korac, Academie Serbe des Sciences et des Arts: colloques scientifiques, vol. 41, classe des sciences historiques, vol. 11, Belgrade, 1988, pp. 329–47, with twenty-one figures.

624. Besides the black and white reproductions given in the article cited in n. 623, ibid., see also the excellent color plates of three of these icons in Mouriki, "Icons from the 12th to the 15th Century," *Sinai, Treasures of the Monastery of St. Catherine*, ed. K. Manafis, pp. 172, Fig. 45, 174, Fig. 47, and 175, Fig. 48.

625. Ibid., p. 109.

626. It is clear that the study of the Byzantine icons at Sinai is still in a stage of preliminary evaluation with regard to developments in the first half of the thirteenth century. Up to this point, the attribution of icons by K. Weitzmann and D. Mouriki to the thirteenth century has almost consistently followed a pattern of assignments to "the start of the 13th century" or to "the second half of the 13th century," with virtually nothing attributed to the first quarter or the second quarter of the century as such. Examples of these assignments can be seen in the publications cited above in n. 622, or in the study by D. Mouriki of thirteenth-century Sinai icons with donor figures: D. Mouriki, "Portraits de donateurs et invocations sur les icônes du XIIIe siècle au Sinai," *Etudes Balkaniques: Cahiers Pierre Belon*, Actes de la table ronde no. 9, XVIIIe Congrès International d'études byzantines, Moscow, 1990, Athens, 1995, pp. 103–35. Therefore, the article of Mouriki cited in n. 623 with four Byzantine icons dated to the period 1224–7, is an important and very welcome addition to the ongoing process of understanding the stylistic developments reflected in these paintings.

By the same token, the study of many of the thirteenth-century Western-influenced or Crusader icons is also at a stage of preliminary evaluation, and identification of work done in the first half of the thirteenth century is difficult and problematic. Nonetheless it is possible to propose a series of these icons done before 1250 as we shall argue further.

627. Mouriki, "Icons...," pp. 113–14, 170, Fig. 41, and Weitzmann, "The Icons of Constantinople," *The Icon*, [11 (1982)], pp. 20, 66, first published by G. and M. Sotiriou, *Icones du Mont Sinai*, Athens, 1956, vol. 1, pp. 87, 88, vol. 2, Pls. 72, 73.

628. O. Bihalji-Merin and S. Mandic, *Byzantine Frescoes and Icons in Yugoslavia*, New York, 1958, Pls. 27, 29. See now also the interesting study of Mary Aspra-Vardavakis, who attributes these angels with other Sinai templon screen great Dëesis icons to Cyprus *c.*1200, "Three Thirteenth-Century Sinai Icons of John the Baptist Derived from a Cypriot Model," *Medieval Cyprus: Studies... in Memory of Doula Mouriki*, ed. N. P. Ševčenko and C. Moss, Princeton, 1999, pp. 179–93.

629. Unpublished icon from the Monastery of St. Catherine's on Mount Sinai (no. 1997): This icon and its companion are Crusader-influenced icons here attributed to the 1230s.

630. Unpublished icon from the Monastery of St. Catherine's on Mount Sinai (no. 1998): This icon and its companion are Crusader-influenced icons here attributed to the 1230s.

631. See the St. Nicholas icon (*c.*1270s) and two icons with standing saints (1260s): Weitzmann, "Thirteenth-Century Crusader Icons," [1 (1963)], p. 195, Fig. 20, and idem, "Icon Painting," [3 (1966)], pp. 345, 347, Figs. 46, 50.

632. Bihalji-Merin, *Byzantine Icons and Frescoes in Yugoslavia*, Pls. 31, 33, the well-known angel at the tomb and the Virgin of the Annunciation.

633. Unpublished icon from the Monastery of St. Catherine's on Mount Sinai (no. 1414): It is a Crusader icon here attributed to the 1260s, which will be discussed in Chapter 6.

634. Unpublished icon from the Monastery of St. Catherine's on Mount Sinai (no. 1357): It is a Crusader icon here attributed to the 1260s, which will be discussed in Chapter 6.

635. I am not excluding the possibility that one or more painters came to Sinai from Mileševo, on pilgrimage or otherwise, but I am also not insisting on painters physically coming to St. Catherine's, only that some kind of model book or sketch book must have made the trip.

636. Wolfenbüttel, Herzog August-Bibliothek, Cod. Guelf. 61, 2 Aug. 80, of which part 2, fols. 75–94, measuring 16.6 × 12 cm per folio, has the famous drawings. See H. Buchthal, *The "Musterbuch" of Wolfenbüttel and Its Position in the Art of the Thirteenth Century*, Byzantina Vindobonensia, vol. 12, Vienna, 1979, and R. Scheller, *Exemplum: Model-Book Drawings and the Practice of Artistic Transmission in the Middle Ages (ca. 900–ca. 1470)*, trans. M. Hoyle, Amsterdam, 1995, pp. 165–75.

637. Buchthal, *The "Musterbuch" of Wolfenbüttel*, p. 22, Pl. VII, Fig. 10.

638. I am relying here on Buchthal's characterizations, see ibid., p. 66.

639. Scheller, *Exemplum*, pp. 176–87. Villard traveled widely for his day, including the north of France, Rhineland, Switzerland, and all the way to Hungary (p. 178).

640. See Chapter 3, nn. 396ff.

641. K. Weitzmann, "Die Malerei des Halberstädter Schrankes und ihre Beziehung zum Osten," *Zeitschrift für Kunstgeschichte*, 41 (1978), pp. 258–81, "mit einem Anhang von Renate Kroos," pp. 281–2. The older bibliography is included on p. 258 in n. 1.

642. Unpublished icons from St. Catherine's Monastery on Mount Sinai, nos. 36–8. Attributed here to the Franco-Byzantine Crusader style of the 1260s, to be grouped with the archangel icons (Fig. 202, App. no. 89/1414, and Fig. 203, App. no. 85/1357), as part of the same Great Deësis ensemble. See our discussion in Chapter 6.

643. Icon from the Monastery of St. Catherine's on Mount Sinai (no. 285): measurements: 38.5 × 28.0 cm. See Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, ed. K. Manafis, pp. 119–20, 184, Fig. 58.

644. Icon from the Monastery of St. Catherine's on Mount Sinai (no. 679): measurements: 38.6 × 26.9 cm. See Mouriki, "Thirteenth-Century Icon Painting in Cyprus,"

The Griffon, nos. 1–2 (1985–6), pp. 32, 83, Fig. 6, and idem, “Icons from the 12th to the 15th Century,” *Sinai*, ed. K. Manafis, pp. 119–20, 185, Fig. 59.

646. D. Mouriki, “A Thirteenth Century Icon with a Variant of the Hodegetria in the Byzantine Museum of Athens,” *Dumbarton Oaks Papers*, 41 (1987), pp. 411–15.

647. See Folda, *ACHL* 1, pp. 91–7.

648. B. Hamilton, “The Latin Church in the Crusader States,” *East and West in the Crusader States*, eds. K. Ciggaar, et al., Louvain, 1996, pp. 14–20, and idem, *The Latin Church in the Crusader States*, pp. 361–9.

649. A. W. Epstein, “The Middle-Byzantine Sanctuary Barrier: Templon or Iconostasis?,” *Journal of the British Archaeological Association*, 134 (1981), pp. 1–28. For the case of the Church of St. Catherine's in the monastery on Mount Sinai, see K. Weitzmann, “Icon Programs of the 12th and 13th Centuries at Sinai,” [15 (1986)], pp. 63–116.

650. The *tramezzo* and liturgical screens both East and West have become a topic of lively interest recently. The pioneering work was by M. B. Hall, “The Italian Rood Screen: Some Implications for Liturgy and Function,” *Essays Presented to Myron P. Gilmore*, eds. S. Bertelli and G. Ramakus, vol. 2, Florence, 1978, pp. 213–18, and her earlier important articles on the particular evidence for such screens in Florence and their special characteristics for the liturgy. In the past few years see Donal Albert Cooper, *In Medio Ecclesiae: Screen, Crucifixes and Shrines in the Franciscan Church Interior in Italy (c. 1230–c. 1400)*, Ph.D. dissertation for the Courtauld Institute of Art, University of London, 2000, 2 volumes, and the work of Jacqueline Jung, *The West Choir Screen of Naumburg Cathedral and the Formation of Social and Sacred Space*, Ph.D. dissertation for Columbia University, 2002, with an important article as well, idem, “Beyond the Barrier: The Unifying Role of the Choir Screen in Gothic Churches,” *Art Bulletin*, 82 (2000), pp. 622–57. There has also been an international symposium on the templon screen at Dumbarton Oaks, organized by S. Gerstel and G. Majeska, “The Sacred Screen, Development and Diffusion,” 9–11 May 2003, for which a major volume of papers, including work by Hall and Jung, can be expected.

651. The work of Lucy-Anne Hunt, among others, has made significant progress in this area in recent years, cf, e.g., “Eternal Light and Life: A Thirteenth-Century Icon from the Monastery of the Syrians, Egypt, and the Jerusalem Pascal Liturgy,” *Jahrbuch der Österreichischen Byzantinistik*, 43 (1993), pp. 349–66, with useful bibliography in notes 1 and 2, and idem, “Christian-Muslim Relations in Painting in Egypt of the Twelfth to mid-Thirteenth Centuries: Sources of Wallpainting at Deir es-Suriani and the Illustration of the New Testament MS Paris Copte-Arabe 1/Cairo, Bibl. 94,” *Cahiers Archéologiques*, 33 (1985), pp. 111–55. Other scholars who have worked on Coptic painting that possibly bears on developments in the first half of the thirteenth century are A. Dean McKenzie at the University of Oregon and Robert Nelson at the University of Chicago. Nelson also independently published an article on Copte-Arabe 1 and comments on its style in relation to Coptic fresco painting in Egypt: R. Nelson, “An Icon at Mt. Sinai and Christian Painting in Muslim Egypt during the Thirteenth and Fourteenth Centuries,” *Art Bulletin*, 65 (1983), pp. 211–13.

As of this writing in 2003 Elizabeth Bolman of Temple University has made the most important contribution to the study of Coptic painting contemporary with thirteenth-century Crusader painting in the north through the publication of her study of fresco painting at the Coptic monastery of St. Anthony along the Red Sea. See E. Bolman (author of six chapters and editor of nine chapters contributed by other scholars), *Monastic Visions, Wall Paintings in the Monastery of St. Antony at the Red Sea*, American Research Center in Egypt, New Haven and London, 2002.

652. Stained glass is reported as follows: C. N. Johns, “Excavations at Pilgrims' Castle, ‘Atlit (1931–2): An Unfinished Church in the Suburb,” in *Pilgrims' Castle ('Atlit)*, ed. R. D. Pringle, no. V, p. 133, and B. Dean, “A Crusaders' Fortress in Palestine,” pp. 40, 42. The glass includes evidence of figural designs at Montfort, and nonfigural designs at ‘Atlit (our Fig. 103 cited earlier). The attention of scholars with specialized knowledge of stained glass is needed to assess the significance of these archaeological finds in the Latin Kingdom.

CHAPTER 6. TURMOIL IN THE HOLY LAND: 1244–1266

The Latin Kingdom of Jerusalem: Hohenstaufen Kings, Ibelin *Baillis*, Louis IX, Italian Mercantile Warfare, and Mongols versus Mamluks

1. See J. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, London, 1973, pp. 209–18, for a detailed discussion of the intricate developments between 1243 and the 1260s pertaining to the Hohenstaufen heirs to the crown of Jerusalem, and the law of *baillage* in the Latin Kingdom.

2. J. Riley-Smith, “Introduction,” in U. Lyons and M. C. Lyons, *Ayyubids, Mamlukes and Crusaders*, Selections from *The History of the Dynasties and the Kings*, of Ibn al-Furat, vol. 2, Cambridge, 1971, p. xiii.

3. Riley-Smith, “Introduction,” Ibu al-Furat, *Ayyubids, Mamlukes and Crusaders*, 2, p. xiii.

4. P. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, pp. 82–7.

5. For useful comments on the *baillage* and the activities of the *bailli*, see Riley-Smith, “Introduction,” *Ayyubids, Mamlukes and Crusaders*, 2, p. xiv.

6. The main sources I have used for the period of 1244–68, and especially the Crusade of Louis IX and his residency in the Latin Kingdom, are as follows: first are the continuations of the *History of Outremer* in two versions: the Noailles Eracles Continuation and the Rothelin Eracles Continuation.

The Noailles Continuation, as I refer to this text here, is published in the *RHC: Hist. Occid.*, II, pp. 427–57, covering the years 1244–68, for our purposes here. Beugnot used Paris, B.N., MS fr. 9082, a codex written and illustrated in Rome, in 1295, as its base, but following a text tradition from Acre, suggesting to M. R. Morgan (“The Rothelin Continuation of William of Tyre,” *Outremer*, Jerusalem, 1982, pp. 244–57) that this be called the “Acre Continuation.” I choose to retain the old “Noailles” nomenclature to minimize the confusion in an already confused and difficult problem of identifying these continuations with reference to the standard published edition. But my late, lamented friend and colleague Ruth Morgan was certainly correct in her analysis, and had she lived longer, she might have significantly cleared up the confusion with further publications on these texts. Janet Shirley, in her recent translation of a section of the Noailles Continuation (*Crusader Syria in the Thirteenth Century*, Brookfield, 1999, pp. 121–43) follows Morgan but refers to this as the “Acre” or the “Eracles” Continuation.

The Rothelin Continuation, as I call the other one, is also published in the *RHC: Hist. Occid.*, II, pp. 561–639, covering the years 1244–61, for our purposes here. Beugnot used Paris, B.N., MS fr. 9083, a codex written in Paris about 1340 as his base. Although there appear to be eleven extant MSS with this text substantially complete, the text tradition seems to be entirely Western. This text seems to have been written in the region of Soissons, and most of the surviving codices were produced in Paris between the 1290s and the 1330s.

Other source materials we have used include the following, which is the most important French source, written by Louis IX's confidante Jean de Joinville, who accompanied him on the Crusade: Jean, sire de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, Paris, 1868, with translations published as *The Life of Saint Louis*, by M. R. B. Shaw, in *Chronicles of the Crusades*, London, 1963, as *The Life of St. Louis*, by R. Hague, London, 1955, and as *Memoirs of the Crusades*, by F. Marzials, London, 1958.

Among other important independent French sources is the Minstrel of Reims who wrote his account in 1260. It is published as the *Chronique de Reims, Recueil des Historiens des Gaules et de la France*, vol. XXII, Paris, 1865, trans. E. N. Stone, *The Chronicle of Reims*, in *Three Old French Chronicles of the Crusades*, University of Washington Publications in the Social Sciences, Seattle, 1939, pp. 249–366. There are also a series of lives of Louis IX written mostly with regard to the canonization proceedings, which are less valuable for the Crusade years 1248–54 than Joinville. The main authors in this group are Geoffrey de Beaulieu, Guillaume de St. Pathus, and Guillaume de Nangis, available in old editions, e.g., G. de Saint-Pathus, *Vie de Saint Louis*, ed. H.-F. Delaborde, Paris, 1899, or in the *Recueil des Historiens des Gaules et de la France*, vol. XX, eds. MM. Daunou and Naudet, Paris, 1840, pp. 3–27, 309–465. Finally, among the French source material is the massive collection of documents from the reign of Louis IX, *Layettes du Trésor des Chartes*, ed. A. Teulet, in the series, Inventaires et Documents, vols. 2 and 3, Paris 1866, 1875 (Kraus reprint, Nendeln/Liechtenstein, 1977), covering the years 1244–70.

Matthew Paris, who is closely linked to Louis IX and his court and well informed about his activities, even though he never went to the Holy Land, is the most important English source: Matthew Paris, *Chronica Majora*, ed. H. Luard, 7 vols., London, 1872–83, translated as *Matthew Paris's English History* by J. A. Giles, vols. 2 and 3, London, 1853, 1854.

I have also used certain important Arabic sources in translation, primarily the texts of Ibn Wasil, *The Dissipator of Anxieties Concerning the History of the Ayyubids*, ed. F. Gabrieli, *Arab Historians of the Crusades*, trans. E. J. Costello, London, 1969 (selections), and that of Ibn al-Furat, *The History of the Dynasties and the Kings*, trans. U. and M. C. Lyons, *Ayyubids, Mamlukes and Crusaders*, vol. 2, Cambridge, 1971.

For the secondary works we are fortunate to have the outstanding studies by W. C. Jordan and J. Riley-Smith. Jordan's, *Louis IX and the Challenge of the Crusade: A Study in Rulership*, Princeton, 1979, focuses on Louis IX and his involvement with the Crusade. Jordan follows brilliantly in the steps of his master teacher Joseph Strayer, who wrote the chapter, "The Crusades of Louis IX," in *HC*, 2, pp. 487–518. Riley-Smith's *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, London, 1973, deals at length with the momentous and complex constitutional developments in the Latin Kingdom, especially during the years 1242–69.

I have also consulted other standard Crusader histories, including those by R. Grousset, *Histoire des Croisades et du Royaume Franc de Jérusalem*, vol. III, Paris, 1936; S. Runciman, *A History of the Crusades*, vol. 3, Cambridge, 1954; J. Richard, *The Crusades: c.1071–c.1291*, trans. J. Birrell, Cambridge, 1999; J. Riley-Smith, *The Crusades, A Short History*, New Haven and London, 1987; H. E. Mayer, *The Crusades*, trans. J. Gillingham, 2nd edn., Oxford, 1988, as well as additional relevant chapters in the *HC*, 2. Important studies on Louis IX himself include J. Richard, *Saint Louis, Crusader King of France*, ed. and abridged by S. Lloyd, trans. J. Birrell, Cambridge and Paris, 1992; and the original French edition published in Paris, 1983; J. Le Goff, *Saint Louis*, Paris, 1996; and M. W. Labarge, *Saint Louis: Louis IX, Most Christian King of France*, Boston, 1968. From the Muslim point of view, see Michael Chamberlain, "The Crusader Era and the Ayyubid dynasty," *The Cambridge History of Egypt*, vol. 1, *Islamic Egypt, 640–1517*, ed. Carl F. Petry, Cambridge, 1998, pp. 211–41.

7. J. Richard, *The Crusades: c.1071–c.1291*, pp. 329–30; Runciman, "The Crusader States: 1243–1291," *HC*, II, p. 564.

8. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 562–6; idem, *Crusader Syria in the Thirteenth Century*, trans. J. Shirley, pp. 63–6, Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 432–5; idem, *Crusader Syria in the Thirteenth Century*, trans. J. Shirley, pp. 134–6.

9. Noailles Continuation, *Crusader Syria in the Thirteenth Century*, trans. J. Shirley, p. 134; idem, *RHC: Hist. Occid.*, II, pp. 431–2.

10. Rothelin Continuation, *Crusader Syria in the Thirteenth Century*, trans. J. Shirley, pp. 66–7; idem, *RHC: Hist. Occid.*, II, pp. 566–7.

11. The canonization proceedings were begun by Gregory X and completed, ironically, by Boniface VIII. See J. Richard, *Saint Louis: Crusader King of France*, ed. S. Lloyd, trans. J. Birrell, Cambridge, 1992, p. 331; and L. Carolus-Barré, *Le Procès de Canonisation de Saint Louis (1272–1297): Essai de Reconstitution*, Collection de l'Ecole Française de Rome, 195, Rome, 1994.

For manuscripts with images of Louis IX taking the Cross in 1244, see the following *History of Outremer* manuscripts:

a. Brussels, Bibl. Roy., MS 9492–3, Hainault, c.1295, fol. 405v
b. Lyon, Palais des Arts, MS 29, Hainault, c.1295, fol. 312v
c. Paris, Bibl. Nat., MS fr. 2825, Paris, c.1300, fol. 353v
d. Turin, Bibl. Naz., MS L.II.17, Paris, c.1305, fol. 332r
e. Rome, Bibl. Apost. Vat., MS Reg. Lat. 737, Ile de France, c.1305–1310, fol. 360v
f. Paris, Bibl. Nat., MS Fr. 9083, Paris, c.1340, fol. 320v
g. Amiens, Bibl. Mun., MS 483, Flanders, 1429–1474, fol. 332r.

These manuscripts are discussed and catalogued in J. Folda, *Illustrations in the History of Outremer, by William of Tyre*, Ph.D. diss. Johns Hopkins, Baltimore, 1968, vols. 1 and 2.

12. W. Jordan, *Louis IX and the Challenge of the Crusade*, Princeton, 1979, p. 3.

13. Matthew Paris, *Chronica Majora, Rerum Britannicarum Medii Aevi (= Rolls Series)*, vol. 57, ed. H. R. Luard, London, 1877, part 4, p. 456, trans. J. A. Giles, *Matthew Paris's English History*, vol. 2, London, 1853, p. 86.

14. Matthew Paris, *Chronica Majora, Rolls Series*, vol. 57, ed. H. R. Luard, London, 1879, pt. 5, R. Vaughan, *The Illustrated Chronicles of Matthew Paris*, Cambridge, 1993, pp. 50–1; and alternative trans. Giles, *Matthew Paris's English History*, vol. 2, pp. 253–4. This story appears in Matthew Paris's text in the context of the events of 1248, but Louis's retaking of the vow must have occurred in early 1245, after he had regained his health and before the Council of Lyon convened that summer.

15. J. Riley-Smith, "Crusading as an Act of Love," *History* 65 (1980), pp. 177–92. In this remarkable article Riley-Smith discusses the idea of love, firmly rooted in the writings of St. Augustine, as the basis for Crusade ideals just as much as it is the basis for the idea of love preached by St. Francis. Although Louis IX is not mentioned in the article, which brilliantly explains the complex notions of how love can be expressed in violence in writings primarily selected from the twelfth and early thirteenth centuries, Louis IX is perhaps the foremost exemplar of these ideas and ideals.

16. Richard, *Saint Louis*, p. 98; J. Richard, *The Crusades, c.1071–c.1291*, Cambridge, 1999, p. 339.

17. Jordan, *Louis IX and the Challenge of the Crusade*, pp. 14–22.

18. Ibid., p. 32.

19. Ibid., p. 51.

20. Ibid., p. 55.

21. Ibid., pp. 63–4.

22. J. Richard, *The Crusades, c.1071–c.1291*, p. 341.

23. Ibid. For the story, see Jean de Joinville, *Histoire de St. Louis*, ed. N. de Wailly, pp. 40–1, trans. M. R. B. Shaw, *Chronicles*, p. 192.

24. Jean de Joinville, *Histoire de St. Louis*, ed. N. de Wailly, pp. 46–7, trans. M. R. B. Shaw, *Chronicles*, p. 197.

25. Jordan (*Louis IX and the Challenge of the Crusade*, pp. 74–6) notes that little attention has been given to the Tour de Constance. It is a pity because this military architecture at Aigues-Mortes was a harbinger of what Louis would sponsor for Crusader sites between 1250 and 1254, using local materials to construct a major defensive fortification to protect the city. At this point we can note the important fact that Louis IX had dealt with both military and ecclesiastical architectural commissions during the 1240s, as preparations for the Crusade went forward.

26. Jordan comments that no revenues for the Crusade came from England, from Germany, from Norway, or from Spain: *Louis IX and the Challenge of the Crusade*, pp. 81–2.

27. The major denominations are livres tournois and livres parisis. Our figures are stated in livres tournois, which were more widely used in French territory. The ratio was five livres tournois equaled four livres parisis.

28. This is the official estimate, but most historians think it is grossly underestimated. Personal communication of Jonathan Riley-Smith.

29. Strayer ("The Crusade of Louis IX," pp. 490–1. Jordan, *Louis IX and the Challenge of the Crusade*, pp. 77–104) goes into enormous detail about these finances, their sources and disposition, but basically Jordan agrees with Strayer's figures.

30. For the Sainte Chapelle, see R. Branner, *Saint Louis and the Court Style*, London, 1965; L. Grodecki, *La Sainte Chapelle*, 2nd edn., Paris, 1975. On the stained glass, M. Aubert, L. Grodecki, et al., *Le Vitraux de la Sainte-Chapelle de Paris*, Corpus Vitrearum Medii Aevi, France, I, Paris, 1958; and L. Grodecki, "Les Vitraux de la Sainte-Chapelle," *Revue de l'Art*, 1–2 (1968), pp. 8–16. There is also a recent Bryn Mawr Ph.D. dissertation by A. A. Jordan, now published as a major monograph, *Visualizing Kingship in the Windows of the Sainte-Chapelle*, Turnhout, 2002. The most important study linking Saint Chapelle with the Holy Land is by D. Weiss, *Art and Crusade in the Age of Saint Louis*, Cambridge, 1998, esp. pp. 11–77.

31. Branner, *Saint Louis and the Court Style*, pp. 64–5.

32. Weiss, *Art and Crusade*, pp. 16–74.

33. Weiss, *Art and Crusade*, pp. 31–2.

34. Jordan, *Louis IX and the Challenge of the Crusade*, p. 108.

35. J. Riley-Smith, "The Politics of War: France and the Holy Land," *The Book of Kings*, eds. W. Noel and D. Weiss, Baltimore, 2002, p. 76.

36. R. Branner, "The Painted Medallions in the Sainte-Chapelle in Paris," *Transactions of the American Philosophical Society*, n.s., vol. 58, pt. 2 (1968), pp. 3–42.

37. Weiss, *Art and Crusade*, p. 39.

38. Ibid., p. 44.

39. Ibid., p. 47.

40. Ibid., p. 52.

41. Jordan, *Louis IX and the Challenge of the Crusade*, p. 108.

42. Branner, *St Louis and the Court Style*, pp. 58–86; Jordan, *Louis IX and the Challenge of the Crusade*, pp. 91–2.

43. Jordan's most recent work on this issue gives even more precise information on the financial impact of preparing for the Crusade. See W. C. Jordan, "Cutting the Budget: The Impact of the Crusades on Appropriations for Public Works in France," *Revue Belge de Philologie et d'Histoire*, 76 (1998), pp. 307–18. This helps places the Sainte Chapelle project in greater focus.

44. For the literature on this manuscript, see R. Branner, *Manuscript Painting in Paris during the Reign of Saint Louis*, Berkeley, Los Angeles, and London, 1977, pp. 59, 207; *La France de Saint Louis*, Paris, 1970, pp. 94, 96, no. 181; J. Folda, *Crusader Manuscript Illumination at Saint-Jean d'Acre, 1275–1291*, Princeton, 1976, pp. 31, 32, 33, 81,135, 150; and idem, *The Illustrations in Manuscripts of the "History of Outremer" by William of Tyre*, Ph.D. diss., Johns Hopkins University, 1968, vol. 1, pp. 151–61, vol. 2, pp. 15–21 (with the older literature cited), vol. 3, figs. 47–50.

The main contents and illustrations of Paris, B. N. MS fr. 9081 are as follows:

318 folios, 40 gatherings of 8 folios each, with 2 folios missing and 4 folios mutilated.
Text in two columns of 40 lines each; justification: 23.5 × 12.5 cm.
17 historiated initials, one miniature panel extant; four historiated initials missing.
Captions for the reader in Old French.

Fol. 1r, Book 1, (L)es encienes estoires . . . (initial: 6.7 × 5.4 cm):

1. Jesus appears to Peter the Hermit, sleeping at the Holy Sepulcher.
2. Peter the Hermit leads some pilgrims to the Holy Land.

Fol. 16v, Book 2, (V)enuz estoit li mois . . . (initial: 6.9 × 5.5 cm):

1. Departure of Godefroy de Bouillon and his men.
2. The King of Hungary returns the hostages and gives many gifts to Godefroy.

Fol. 26r, Book 3, (D)e la cite de nique . . . (initial (smeared): 5.8 × 5.8, tail, 12.0 cm):

1. The Crusader army assaults Nicaea.
2. The capture of the wife of Qilij Arslan.

Folio with start of text for Book 4 is missing. Historiated initial takeoff visible on fol. 34v:

1. Thoros is killed while trying to escape from Edessa.
2. Tancred receives gifts from Persian and Armenian satraps.

Folio 44r, Book 5, (V)eant le seigneur dantioche . . . (initial: 6.0 × 6.3 cm):

1. The Crusaders assault and enter the city of Antioch.

Folio with start of text for Book 6 is missing. Historiated initial takeoff visible on fol. 53v:

1. The Crusaders at Antioch.
2. The count of Flanders leads the Crusader defense against a strong Turkish attack.
3. A detachment of men attempts to prevent the Crusaders from crossing a bridge.

Fol. 65r, Book 7, (C)es choses furent . . . (initial: 5.9 × 5.6 cm):

1. Crusaders lie stricken with the plague.
2. Count Baldwin receives barons and other pilgrims at Edessa.

Fol. 77r, Book 8, (V)eritez est . . . (initial: 6.3 × 5.7 cm):

1. Saracen sorceresses on the ramparts of Jerusalem during the Crusader assault on the city.

Fol. 88v, Book 9, (S)i con vos avez . . . (initial: 6.5 × 5.3, tail, 13.4 cm):

1. Godefroy de Bouillon is presented by the nobles to be crowned ruler of Jerusalem by the new patriarch.
2. Crusaders rout Egyptian troops and capture their herd of animals.

Fol. 99v, Book 10, (R)ois fu li dus Godefroy . . . (initial: 6.1 × 4.9 cm):

1. The coronation of King Baldwin I.
2. Baldwin I cares for the captured wife of an Arab emir.

Fol. 113v, Book 11, (E)stez estoit ia trespassez . . . (initial: 6.1 × 5.7 cm):

1. Bohemond prince of Antioch sails for Apulia.
2. Bohemond marries Constance, with her father, King Philippe of France, attending the wedding.

Fol. 132r, Book 12, (X)erses fu uns puissanz rois . . . (panel: 5.9 × 4.5 cm):

1. Baldwin II grants to Hughes de Payens and Godefroy de Saint Omer a house near the Temple for their new Order.
2. Turkish invaders ride victorious from the battlefield, leaving Roger prince of Antioch dead.

Fol. 146r, Book 13, (F)orz estoit . . . (initial: 5.9 × 5.2, tail, 4.8 cm):

1. The Crusaders assault the city of Tyre.
2. William I, archbishop of Tyre, is consecrated by Gormand, patriarch of Jerusalem.

Fol. 160r, Book 14, (R)ois fu apres . . . (initial: 6.1 × 5.0 cm):

1. At Sidon Cecelia countess of Tripoli pleads with King Fulk her brother to help her liberate her imprisoned husband.
2. The count of Jaffa is assassinated in Jerusalem while playing backgammon.

Fol. 174r, Book 15, (A)pres les mois . . . (initial: 6.1 × 5.5, tail, 7.4 cm):

1. The patriarch and citizens of Antioch welcome the emperor of Constantinople.
2. The council of Crusader barons at Antioch with the Byzantine Emperor.

Folio with start of text for Book 16 is missing. Historiated initial takeoff visible on fol. 189v:

1. Coronation of King Baldwin III.
2. Zengi rides to Edessa to besiege the city.

Fol. 206r, Book 17, (C)onraz lemperes dalemaigne . . . (initial: 6.1 × 5.3 cm):

1. Emperor Conrad and King Louis camp before Damascus.
2. Nureddin bathes in the sea in view of his army as a sign of victory.

Fol. 224v, Book 18, (O)r vos parlerons . . . (initial cut out, takeoff visible on fol. 225r):

1. The abuse of the patriarch of Antioch by Raynauld de Chatillon.
2. The king of Jerusalem flees the battlefield after suffering a defeat returning home from Banyas.

Fol. 245v, Book 19, (R)emes estoit uns freres . . . (initial: 6.1 × 5.4 cm):

1. The sultan Sanar leads two Crusader messengers, Hugh of Caesarea and Geoffrey Fulcher, into the caliph's palace at Cairo.
2. The sultan kisses the caliph's foot in the presence of the messengers.

Fol. 262v, Book 20, (U)ne chose . . . (initial, smeared: 6.0 × 5.3 cm):

1. Syracon, the Turk, after killing Sultan Sanar, receives from the caliph rule over Egypt.
2. King Amaury I visits Constantinople.

Fol. 280v, Book 21, (M)out fu granz . . . (initial: 5.9 × 6.3, tail, 12.6 cm):

1. The count Philippe of Flanders enters the land of the Saracens and attacks a city.
2. The Crusader army led by King Baldwin IV and Bishop Albert of Bethlehem, who carries the relic of the True Cross, routs a Saracen army.

Fol. 296r, Book 22, (B)uiemonz li princes dantioche . . . (initial: 6.3 × 4.9 cm):

1. Baldwin IV marries his sister to Guy de Lusignan.
2. The protosebastos Alexius is blinded by Andronicus in Constantinople.

Fol. 317r (end), Book 22, ch. 29: bailliez au conte de Triple.

45. We should recall that captions like this are also used for other royal books in the thirteenth century, such as the *Psalter of St. Louis*.

46. Jordan, *Louis IX and the Challenge of the Crusade*, p. 107.

47. Ibid., pp. 106–9.

48. *Chronique de Reims*, RHGF, XXII, pp. 311–12; Minstrel of Reims, *The Chronicle of Reims*, p. 334.

50. P. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, p. 75. See also G. Hill, *A History of Cyprus*, vol. 2, Cambridge, 1942, pp. 140–5.

51. J. Richard, *Chypre sous les Lusignans, Documents chypriotes des archives du Vatican (XIVe et XVe siècles)*, Paris, 1962, p. 79, n. 10.

52. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 569–71; idem, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, pp. 68–9. The most informative discussion of relations between Louis IX and the Mongols is by J. Richard, *Saint Louis*, pp. 282–6. See also D. Morgan, *The Mongols*, Oxford, 1986, pp. 181–2.

53. See the Rothelin Continuation as cited in n. 52. This story is found in the Rothelin Continuation as part of the "Letter of Jean Sarrasin" written on 23 June 1249, while the author was in Damietta. Jean Sarrasin was the chamberlain of Louis IX writing to Nicholas Arrode in Paris. Nicholas was son of Eudes Arrode, a household official for Philippe II Auguste. This letter is published independently by A. Foulet, ed., *Lettre à Nicolas Arrode*, Paris, 1924. Three additional letters written from Damietta are included by Matthew Paris as part of the *Additamenta* to his *Chronica Majora*, reference to which is given in n. 54.

54. The text of this letter is included in the *Additamenta* of Matthew Paris; see Matthew Paris, *Chronica Majora*, trans. J. A. Giles, *Matthew Paris's English History*, vol. 3, pp. 419–20.

55. Richard, *Saint Louis*, pp. 282–3.

56. P. Pelliot, *Les Mongols et la Papauté*, pp. 141–222. This study on Andrew of Longjumeau was originally published as the third of three articles in the *Revue de l'Orient Chrétien*, XXVIII (1931–2), pp. 3–84, but is gathered and bound as a monograph in a separate volume in the W. R. Davis Library of the University of North Carolina.

57. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 47–8.

58. Jean de Joinville, *Chronicles*, trans. M. R. B. Shaw, p. 198.

59. Jean de Joinville, *The Life of Saint Louis*, trans. R. Hague, p. 57.

60. A. Weyl Carr, "Art in the Court of the Lusignan Kings," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 244, 253–4, nn. 24–26. Carr ponders the possibility that these figural sculptures might be carved in ivory or steatite, as well as stone. For a relevant, although probably slightly later, work in steatite either from Acre or from Cyprus, see P. Hetherington, "Byzantine Steatites in the Possession of the Knights of Rhodes," *Burlington Magazine*, 120 (1978), pp. 811–20.

61. An example of these kinds of figural images can be seen in the Virgin and Child and angels sewn on the altar hanging of Otto of Grandson, apparently done on Cyprus shortly after 1291. Cf. J. Folda, "Crusader Art in the Kingdom of Cyprus, c.1275–1291," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, pp. 216, and 234, pl. 5; and Weyl Carr, "Art in the Court of the Lusignan Kings," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, pp. 243, and 264, fig. 8.

90. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 597, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 91.

91. The best historical map and discussion of the Delta region based on medieval Arab texts is by A. R. Guest, "The Delta in the Middle Ages," *Journal of the Royal Asiatic Society*, 1912, pp. 941–2, with map opposite p. 941.

92. "St. Louis' Letter Concerning His Expedition to Egypt," trans. R. Hague, *The Life of St. Louis*, p. 247.

93. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 600–1, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 93.

94. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 73, trans. R. Hague, *The Life of St. Louis*, p. 75.

95. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 602, "St. Louis' Letter Concerning His Expedition to Egypt," trans. R. Hague, *The Life of St. Louis*, p. 248. Joinville calls him a "Beduyns" and says the king agreed to pay him five hundred bezants for his information: Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 75–6. Ibn Wasil also calls this informant a "Muslim": Ibn Wasil, *The Dissipator of Anxieties concerning the History of the Ayyubids*, ed. F. Gabrieli, *Arab Historians of the Crusades*, trans. E. J. Costello, p. 290.

96. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 604, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 95.

97. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 604–5, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, pp. 95–6.

98. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 77–8, trans. R. Hague, *The Life of St. Louis*, p. 78.

99. *Annales de Terre Sainte*, *AOL*, II, p. 444.

100. "St. Louis' Letter Concerning His Expedition to Egypt," trans. R. Hague, p. 248.

101. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 605, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 96. Based on this story, many modern historians including

Runciman, Strayer, and Richard, propose Robert of Artois as the *responsable* here. It seems to me the entire vanguard foolishly ignored the explicit orders of the king, but I do not think that Robert of Artois should be singled out as having the fatal flaw.

102. Jean de Joinville, *Histoire de Saint Louis*, p. 81, trans. R. Hague, *The Life of St. Louis*, p. 81.

103. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 606, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 97.

104. Jean de Joinville, *Histoire de Saint Louis*, p. 87, trans. R. Hague, *The Life of St. Louis*, p. 85.

105. Ibn Wasil, *The Dissipator of Anxieties concerning the History of the Ayyubids*, ed. F. Gabrieli, *Arab Historians of the Crusades*, trans. E. J. Costello, p. 292.

106. These factors are summarized in "St. Louis' Letter Concerning His Expedition to Egypt," trans. R. Hague, *The Life of St. Louis*, pp. 249–50, with no comment on the timing.

107. Joinville describes the appalling conditions in camp: Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 102–4, trans. R. Hague, *The Life of St. Louis*, pp. 96–7.

108. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 610, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 99.

109. Al-Maqrisi reports this French offer: see *The Life of St. Louis*, trans. R. Hague, p. 278, n. 301. See also Strayer, "The Crusades of Louis IX," *HC*, 2, p. 502; and Runciman, *A History of the Crusades*, 3, p. 269, n. 3.

110. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 104–6, trans. R. Hague, *The Life of St. Louis*, pp. 98–9.

111. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 108–10, trans. R. Hague, *The Life of St. Louis*, pp. 100–2.

112. Joinville discusses these Mamluks, who wore the same arms as the sultan and served as his elite bodyguard, in ch. LVI of his *Histoire de Saint Louis*. The Bahri Mamluks were organized by Sultan Aiyub. At the outset they were Turks purchased overseas as slaves and brought to Cairo where they were trained to protect the sultan. They were known as al-Bahriyah as-Salihiyah, signifying their importation from overseas. See M. M. Ziada, "The Mamluk Sultans to 1293," *HC*, 2, pp. 737–8; and idem, "New Notes on Mamluk History" [in Arabic], *Bulletin of the Faculty of Arts of the University of Egypt*, IV (1936), p. 72.

113. Ibn Wasil, *The Dissipator of Anxieties Concerning the History of the Ayyubids*, ed. F. Gabrieli, *Arab Historians of the Crusades*, trans. E. J. Costello, p. 294.

114. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 615, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 103.

115. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 115, trans. R. Hague, *The Life of St. Louis*, pp. 105–6. This story seems to verify the cordial relations Frederick II was said to have had with the Ayyubid sultan.

116. The Crusader army had clearly been decimated, and everything they still had was now lost. In a deposition given by Charles of Anjou for the canonization proceedings of Louis IX, he says that out of thirty-two batailles into which the army had been organized at Damietta for the march along the Nile, only six remained by the time of their capture during the retreat from Mansourah. See L. Carolus-Barré, *Le Proces de Canonisation de Saint Louis (1271–1297)*, p. 69.

117. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 616, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 103.

118. Ibn Wasil, *The Dissipator of Anxieties Concerning the History of the Ayyubids*, ed. F. Gabrieli, *Arab Historians of the Crusades*, trans. E. J. Costello, p. 294.

The building reputed to be the house of Ibn Luqman is now part of the National Museum in Mansourah, where visitors are shown the room in which Louis IX was said to be held during his captivity in 1250. See A. Gayet, "Les Monuments de Damiette et Mansourah contemporains de l'époque des Croisades," *Revue de l'art ancien et moderne*, Paris, 1899, pp. 71–8; and idem, L'Itinéraire des Expéditions de Jean de Brienne et de St.-Louis en Egypte et les traces qu'elles ont laissés: La Terre Sainte," *Revue de l'Orient Chrétien*, année 27, vol. 18 (1901). Archaeologically speaking, it is difficult to tell much about the house identified as the prison, which may have been completely rebuilt or substantially repaired and which is also now contained in a strikingly modern museum building. Although it may be true that "tradition says" this is the site of Ibn Luqman's house, verification of the date of the structure identified as his house remains to be determined.

119. Jean de Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 611–12, trans. R. Hague, *The Life of St. Louis*, p. 107.

120. See especially the excellent reproduction in the facsimile edition of the Hours of Jeanne d'Evreux, MS acc. No. 54.1.2 in the Metropolitan Museum of Art, the Cloisters, New York and Lucerne: Faksimile Verlag, 1998, fol. 146v. See also J. J. Rorimer, *The Hours of Jeanne d'Evreux, Queen of France*, New York, 1957, pp. 14–15, 25, and the reproduction of fol. 146v. W. Jordan (*Louis IX and the Challenge of the Crusade*, p. 126) refers to these developments.

121. L. Delisle, "Testament de Blanche de Navarre, reine de France," *Mémoires de la Société de l'histoire de Paris and de l'Ile de France*, XII (1885), p. 29, no. 196.

122. Rorimer (*The Hours of Jeanne d'Evreux, Queen of France*, p. 15) refers to the opinions of Emile Male and H. Bober in discussing this idea. For Male's views, see idem, *Art and Artists of the Middle Ages*, trans. S. S. Lowe, Redding Ridge, CT, 1986, pp. 179–88. This volume was first published in 1927 as a series of articles collected by the author. It was reissued in revised form as the 4th edition in 1947, and this translation is made from the 1947 edition.

123. See n. 77.

142. Jordan (*Louis IX and the Challenge of the Crusade*, pp. 127–30) discusses these personal changes in the king at some length.

143. Joinville . . . , *Histoire de Saint Louis*, ed. N. de Wailly, pp. 148–52; idem, *Chronicles*, trans. M. R. B. Shaw, p. 270.

144. Joinville . . . , *Histoire de Saint Louis*, ed. N. de Wailly, pp. 154–5; idem, *Chronicles*, trans. M. R. B. Shaw, p. 272.

145. Strayer, "The Crusades of Louis IX," *HC*, II, p. 505.

146. Having lost his personal seal during his capture in Egypt, he has clearly immediately ordered a new seal to have been made for him in Acre. See J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 108, n. 2.

147. Matthew Paris, *Chronica Majora*, trans. J. A. Giles, *Matthew Paris's English History*, vol. II, London, 1853, p. 391.

148. Clearly his concern for the prisoners is a major motivating factor, as Joinville points out and as other sources also indicate. See, for example, Guillaume de Saint-Pathus, *Vie de Saint Louis*, ed. H.-F. Delaborde, Paris, 1899, p. 91,

149. "Epistola sancti Ludovici regis de captione et liberatione sua," ed. F. Duchesne, *Historiae Francorum Scriptores*, vol. V, Paris, 1649, pp. 429–30; idem, trans. R. Hague, "St. Louis' Letter . . . ," in *The Life of St. Louis*, New York, 1955, pp. 247–54.

150. We can imagine that Louis took this occasion to ask his mother to help him with various official and personal needs, now that he had determined to stay in the Near East. Louis would need financing, supplies, and men, and he would need certain personal items that had been lost on the Crusade to be replaced, things such as some of his personal royal and religious items: objects of his regalia, relics and religious objects for him and his chaplain, and special books. Some personal things he could order in Acre, but others would have to come from Paris.

190. P. Grierson, "A Rare Crusader Bezant with the *Christus Vincit* Legend," *American Numismatic Society Museum Notes*, 6 (1954), pp. 169–78; and Jordan, *Louis IX and the Challenge of the Crusade*, pp. 132–3.

191. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 183–4, trans. R. Hague, *The Life of St. Louis*, pp. 154–5.

192. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 199–200, trans. R. Hague, *The Life of St. Louis*, p. 166.

193. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 628–9, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 112.

194. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 1, pp. 265–6.

195. This is based on an estimated three hundred livres for each wall section, five hundred livres for each gate, and four hundred livres for each tower. Given the total reported expenditures of Louis IX for construction in the Latin Kingdom of 95,839 livres tournois, an expenditure of approximately 20,000 livres at Jaffa would have seemed like an astronomical sum, given the number of other major constructions, as well as the expenses of his household and his knights and men, and the military and diplomatic expenses the king paid for. See the citation of expenditures in the *Recueil des Historiens des Gaules de la France*, vol. XXI, Paris, p. 515.

196. William of St. Pathus, *Vie de St. Louis*, ed. H. F. Delaborde, Paris, 1899, pp. 46–7, cited in Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 1, p. 271. On the basis of this foundation, one wonders what other Franciscan churches Louis may have founded, especially at Acre.

197. Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 440–1, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 139.

198. Runciman, *A History of the Crusades*, 3, p. 260. On Andrew of Longjumeau, see also P. Pelliot, *Les Mongols et la Papauté*, pp. 141–54, published originally as the third of a series of articles in the *Revue de l'Orient Chrétien*, 3rd ser., XXVIII (1931–2), pp. 3–16, but it is bound together as a monograph with continuous pagination in a volume in the W. R. Davis Libarary at the University of North Carolina.

199. Richard, *Saint Louis*, p. 284. William of Rubruck specifically mentions these gifts in his report to Louis IX. See P. Jackson, *The Mission of William of Rubruck*, London, 1990, p. 116. William, of course, mentions other interesting items, including a Bible in verse, vestments, and various liturgical objects, but he does not attribute them directly to Louis IX or Marguerite.

200. P. Jackson (*The Mission of William of Rubruck*, p. 42) points out that we do not know the date of his departure from the Latin Kingdom. However, the first date we have for his trip is that William preached at Haghia Sophia in Constantinople on 13 April 1253; it is therefore likely that he left Acre on the spring *passagium*, in March.

201. The recent English translation is by P. Jackson, *The Mission of Friar William of Rubruck*, Hakluyt Society, 2nd ser., no. 173, London, 1990, pp. 57–278. This edition, with an introduction by P. Jackson and D. Morgan, supercedes the older English translations: William of Rubruck, *The Journey of William of Rubruck in the Eastern Parts of the World, 1253–1255*, trans. W.W. Rockhill, Hakluyt Society, ser. II, vol. 4, London, 1900; and C. Dawson, ed., *The Mongol Mission*, New York, 1955, pp. 87–220. In the case of the Dawson work, the translation is attributed to "a nun of Stanbrook Abbey."

202. Jackson, *The Mission of Friar William of Rubruck*, p. 120.

203. Ibid., p. 118.

204. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 198, trans. R. Hague, *The Life of St. Louis*, p. 165.

205. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 201–2, trans. R. Hague, *The Life of St. Louis*, p. 168.

206. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 202, trans. R. Hague, *The Life of St. Louis*, p. 168.

207. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 208–9, trans. R. Hague, *The Life of St. Louis*, p. 173. It would be interesting to know what Joinville means by the king gathering laborers "from all parts." Presumably he is referring to the masons and laborers he employed drawn from the various cities of the Latin Kingdom, but may have also included Eastern Christians and even Muslims.

208. Rorimer, *The Hours of Jeanne d'Evreux*, p. 25, fol. 159v.

209. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, I, pp. 85–7.

210. Ibid., pp. 88–9.

211. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 220, trans. R. Hague, *The Life of St. Louis*, pp. 181–2.

212. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 213, trans. R. Hague, *The Life of St. Louis*, p. 176.

213. November 1252 to July 1253 seems an unduly long time for the news to have gotten to the king. No doubt Louis was notified with all deliberate speed, but one can imagine numerous reasons for the delay.

214. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 216–17, trans. R. Hague, *The Life of St. Louis*, p. 179.

215. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, pp. 214–15, trans. R. Hague, *The Life of St. Louis*, pp. 177–8.

226. On Genoa and Venice, see S. A. Epstein, *Genoa and the Genoese, 958–1528*, Chapel Hill and London, 1996, pp. 128–9, 135–8, 141–3, 146–52; and F. C. Lane, *Venice: A Maritime Republic*, Baltimore, 1973, pp. 67–79.

227. P. Edbury, "The *Livre des Assises* by John of Jaffa: The Development and Transmission of the Text," *The Crusades and Their Sources*, eds. J. France and W. C. Zajac, Aldershot and Brookfield, 1998, pp. 169–70; and n. 1 with other bibliography. Edbury has recently completed a new critical edition of this text.

228. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, p. 215.

229. Rothelin Continuation, *RHC: Hist. Occid.*, II, p. 630, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, p. 113, Ibn al-Furat (*Ayyubids, Mamlukes and Crusaders*, vol. 2, p. 40) reports that the length of the truce varies in the accounts that he knows, but it was essentially for ten years and six months.

230. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 630–2, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, pp. 114–15.

231. Rothelin Continuation, ibid., p. 633–4, trans. J. Shirley, ibid., pp. 115–16.

232. The Venetians and the Genoese were in conflict frequently in the Mediterranean in various places during this period, but these hostilities in Acre constituted their most serious confrontation in the Latin Kingdom. Futhermore this war had the most damaging effects on the mainland Crusader States, among the many disputes between the various maritime powers. See Epstein, *Genoa and the Genoese*, pp. 128–9, 135–7; Lane, *Venice: A Maritime Republic*, pp. 73–4.

233. The shape of the current story about the War of St. Sabas was apparently established by W. Heyd, *Histoire du Commerce du Levant au Moyen-Age*, édition française refondue et considérablement augmentée par l'auteur, vol. 1, Leipzig, 1885, rpt. Adolf M. Hakkert, Amsterdam, 1959, pp. 344–54, but the most useful modern telling is provided by J. Richard, *The Latin Kingdom of Jerusalem*, B, pp. 364–71.

234. In regard to the location of this property on the hill of Montjoie, in Marino Sanudo's maps from the early fourteenth century, it is indicated as "Lamuntzoia," or "la mount joie." See, for example, B. Dichter, *The Maps of Acre: An Historical Cartography*, Acre, 1973, pp. 18, 19, 21, 22, 23. Note that the property is positioned between the quarters inside the city, not exactly "by the sea," and that it appears to be in the territory of the Genoese quarter.

235. Heyd, *Histoire du Commerce du Levant au Moyen-Age*, p. 345, n. 3, notes that the sources call this structure a "maison" but he says it was surely used for services, and was in a strategic location that could be fortified. Prawer (*Histoire du Royaume de Jérusalem*, 2, pp. 363–4) discusses the property of Mar Sabas, identifying it as a house, not a church.

236. The War of St. Sabas is discussed in the following studies: Prawer, *Histoire du Royaume Latin de Jérusalem*, pp. 359–73; Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus, 1050–1310*, London, 1967, pp. 183–6; Runciman, "The Crusader States, 1243–1291," *HC*, 2, pp. 568–70; and W. Heyd, *Histoire du Commerce du Levant au Moyen Age*, I, Leipzig, 1885, pp. 344–54.

237. The reasons for these alignments are discussed in some detail by Runciman, Prawer, and Riley-Smith, among others.

238. Lane, *Venice: A Maritime Republic*, p. 75; Epstein, *Genoa and the Genoese*, p. 146.

239. Lane, ibid., p. 74, fig. 4. For the pilastri acritani and their origin in Constantinople, see M. Harrison, A *Temple for Byzantium*, Austin, 1989, pp. 100, 101, 103, 143, and Figs. 118, 122, 123.

240. Richard, *The Latin Kingdom of Jerusalem*, 2, pp. 368–9.

241. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, p. 86, based on the arguments of Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem*, pp. 215–17.

242. S. Runciman, *A History of the Crusades*, 3, p. 284.

243. P. W. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, p. 86.

244. Jonathan Riley-Smith discusses Geoffrey de Sergines and the French regiment in an important paper published in the Acta of the 2000 Johns Hopkins Symposium on Frankish Culture in Acre during the thirteenth century. See Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 45–62. See also the article by C. J. Marshall, "The French Regiment in the Latin East, 1254–1291," *Journal of Medieval History*, 15 (1989), pp. 301–7.

245. Riley-Smith, "Introduction," *Ayyubids, Mamlukes and Crusaders*, 2, pp. xvii–xviii, 173–4; idem, *The Knights of St. John in Jerusalem and Cyprus, 1050–1310*, London, 1967, pp. 326–7.

246. Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 45–62.

247. James of Pantaleon never returned to the Holy Land in fact, because while he was in Rome, Pope Alexander IV died in May 1261 and in August James was elected the new pope, Urban IV. Thus the linkage between Rome and the Latin Kingdom was tightened in the person of the new pope, but the fact was that he was not able to be in Acre to provide leadership during the resolution of the dispute in 1260 and 1261. Here I am following Hamilton, *The Latin Church in the Crusader States*, pp. 269–70, who establishes a different chronology for the patriarch James in contrast to that of Runciman, *A History of the Crusades*, 3, pp. 285, 290.

248. The reconciliation is discussed by several scholars, including Riley-Smith, *The Knights of St. John*, pp. 185–6, among others.

249. Heyd, *Histoire du Commerce du Levant au Moyen-Age*, I, p. 354.

250. Riley-Smith, *The Knights of St. John*, pp. 443–7.

251. A. Forey, *The Military Orders from the Twelfth to the Early Fourteenth Centuries*, Toronto and Buffalo, 1992, p. 214.

252. Riley-Smith, *The Knights of St. John*, pp. 447–9.

253. Ibid., p. 447.

254. "La ville d'Acre avait déjà énormément souffert; en effet, sans comptait les maisons brûlées en dehors des quartiers marchands, les belligérants avaient monté de 50 à 60 machines de guerre avec lesquelles ils avaient détruit la plus grande partie des tours et un grand nombre de maisons, en les écrasant sous une grêle d'énormes pierres; on comptait qu'il n'avait pas péri moins de 20,000 hommes dans la ville." Heyd, *Histoire du Commerce du Levant au Moyen-Age*, 1, p. 348.

255. Annales de Terre Sainte, *AOL*, II, p. 453, cited by Riley-Smith, *The Knights of St. John*, p. 186, n. 3. See also Richard, *The Latin Kingdom of Jerusalem*, B, p. 369.

256. Metcalf, *Coinage of the Crusades and the Latin East*, pp. 44–5.

257. Metcalf (Ibid., p. 45) comments: "The numismatist will hesitate a little over this conclusion, plausible as it is, only because there is a high proportion of specimens on which the date is illegible or doubtful. And it is in principle possible that immobilized dates were used."

258. It is interesting that Genoa minted its first gold coin in 1252, just before the gold Florin of Florence, but long before Venice issued its first gold ducat in 1284. When the North African gold market dried up as a source for Genoese gold in the 1260s and Acre ceased minting its gold bezants about 1258, the main gold coins available in the eastern Mediterranean were Byzantine and, of course, Muslim. See Epstein, *Genoa and the Genoese*, pp. 128–9, 142–3; Lane, *Venice: A Maritime Republic*, pp. 148–9.

259. Metcalf, *Coinage of the Crusades and the Latin East*, pp. 150–1.

260. The pallio is currently being studied by Cecily Hilsdale at the University of Chicago, who discussed it in a paper titled, "Weaving Allegiances: The Exchange of a Pallio in the Thirteenth Century," at the Byzantine Studies Conference, held at the University of Kentucky on 5–8 November 1998. A synopsis of her talk is published in the abstracts, pp. 66–7. She is currently (2000) at work on a larger study, titled "Weaving Allegiances: The Exchange of a Pallio in the Thirteenth Century," which will be part of her doctoral dissertation. I am grateful to Ms. Hilsdale for sharing her work with me and providing the bibliography that follows.

The pallio, despite its importance, is oddly little published and although installed in the Palazzo Bianchi in Genoa, it is in a room that is often locked and inaccessible. It is a major work approximately thirteen feet long, done in purple silk with exquisite embroidery. It includes images of the lives of Sts. Sisto, Hippolito, and Lawrence.

The main bibliography to date includes the following:
E. Parma Armani, "Nuove Indagini sul 'Pallio' Bizantino Duecentesco di San Lorenzo in Palazzo Bianco a Genova," *Studi di Storia delle Arte*, 5 (1984), pp. 31–47; P. Johnstone, "The Byzantine 'Pallio' in the Palazzo Bianco at Genoa," *Gazette des Beaux-Arts*, 87 (1976), pp. 99–108. See also the discussion by P. Schreiner, "Zwei Denkmäler aus der Frühen Paläologenzeit: Ein Bildnis Michels VIII. und der Genueser Pallio," *Festschrift für Klaus Wessel* in ed. M. Restle, Munich, 1988, pp. 249–57.

261. A. W. Carr, "Art in the Court of the Lusignan Kings," in *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 246–50. These basins are linked to the reign of Hugh IV and said to be of Mamluk origin in the second quarter of the fourteenth century, but their exact dating is as yet undetermined. Further study of the heraldry on the basins may yield more precision on this point. See the exhibition pamphlet by Sophie Makariou, "Two Objects from the Louvre made [by the Mamluks] for the Lusignan Kings," Paris, 2000, 3 pp. with 11 endnotes. For the "baptistère de St. Louis," see the catalogue of the exhibition, *La France de Saint Louis*, Paris, 1970–1, pp. 98–9, with fig., where the *bassin* is said to be dated c.1290–1310.

262. M. Balard, "The Genoese in the Aegean (1204–1566)," *Latins and Greeks in the Eastern Mediterranean after 1204*, eds. B. Arbel, B. Hamilton, and D. Jacoby, London, 1989, p. 159.

270. P. Jackson, "The Crisis in the Holy Land in 1260," *English Historical Review*, 95 (1980), pp. 486–7.

271. Jackson, "The Crisis," p. 486. P. Thorau (*The Lion of Egypt*, trans. P. M. Holt, London and New York, p. 273) basically agrees with regard to *La Flor*, commenting that it was "on the whole largely a propagandist work against Islam, designed to strengthen the zeal of the West for the liberation of the Holy Land."

272. Thorau, *The Lion of Egypt*, p. 68. Thorau has not resolved the problems raised by the Templar of Tyre because later in his assessment of the written sources he says the following about the Templar of Tyre, whom he identifies as probably Gérard de Montréal: "as an eyewitness . . . , his work is one of the most valuable sources of Frankish history in the second half of the thirteenth century" (ibid., p. 273).

273. R. Amitai-Preiss, *Mongols and Mamluks*, Cambridge, 1995, p. 31.

274. Runciman is followed by T. S. R. Boase, *Kingdoms and Strongholds of the Crusaders*, London, 1971, pp. 203–4.

275. J. Prawer, *Histoire du Royaume Latin de Jerusalem*, vol. 2, 2nd edn., Paris, 1975, p. 426 and n. 14.

276. Jean Richard, *The Latin Kingdom of Jerusalem*, vol. 2, p. 388; idem, *The Crusades, c. 1071–c. 1291*, trans. J. Birrell, Cambridge, 1999, p. 410.

277. H. Mayer, *The Crusades*, trans. J. Gillingham, 2nd edn., Oxford, 1988, p. 276.

278. I have noted the opinion of Mayer on the Crusader side. Among other historians of the Mongols and Mamluks, David Morgan (*The Mongols*, Cambridge, MA, and Oxford, 1986, pp. 154–5) and R. S. Humphreys (*From Saladin to the Mongols*, Albany, 1977, p. 353) accept the story of the entry of the three Christians into Damascus, along with E. Hildinger (*Warriors of the Steppe*, New York, 1997, p. 149) and J. J. Saunders (*The History of the Mongol Conquests*, New York, 1971, pp. 112–13). Morgan's acceptance is important because he certainly knew Jackson's article of 1980 and is fully aware that

the Templar of Tyre provides the unique account of this event.

279. D. Sourdel, "Bohémond et les chrétiens à Damas sous l'occupation mongole," *Dei Gesta per Francos*, eds. M. Balard et al., Aldershot, 2001, pp. 295–9.

280. See the next section of this chapter on the art of 1244–68. Sourdel (ibid., p. 296–7) discusses what is known about which mosque was taken over and converted into a church. Whereas many French scholars asserted, based on Arabic sources, that the mosque in question was the great mosque of Damascus, Sourdel concludes that this was unlikely, and I agree with her and N. Elisséef on this point.

281. Humphreys, *From Saladin to the Mongols*, pp. 356–7.

282. Ibid., pp. 355–6.

283. Jackson, "The Crisis in the Holy Land in 1260," p. 492.

284. The one significant action taken by the Mongols in the summer was an attack on Sidon, mentioned by all the sources, occurring just about the time Qutuz marches to Gaza. Jackson, "The Crisis in the Holy Land in 1260," p. 499, says the attack on Sidon took place early in August, and news of the attack reached Damascus on 17 August 1260.

285. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 637–8, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, pp. 118–19, *Cronaca del Templare di Tiro*, ed. L. Minervini, p. 86, sect. 308, *Gestes des Chiprois, RHC: Doc. Armen.*, II, p. 753, M. M. Ziada, "The Mamluk Sultans to 1293," *HC*, 2, p. 745, Runciman, *A History of the Crusades*, 3, pp. 311–12. Jackson ("The Crisis in the Holy Land in 1260," pp. 502–3) discusses this issue and concludes that Qutuz requested Crusader assistance, but the High Court refused and only agreed to allow the Mamluks unimpeded passage via Acre to confront the Mongols.

286. Thorau, *The Lion of Egypt*, trans. Holt, p. 76.

287. This account follows Ziada and Runciman, cited earlier in n. 285, and P. Thorau, "The Battle of 'Ayn Jalut: A Re-examination," *Crusade and Settlement*, ed. P. Edbury, Cardiff, 1985, pp. 236–9. A different interpretation is given by S. F. Sadeque, *Baybars I of Egypt*, Dacca and Oxford, 1956, p. 40. The *Cronaca del Templare di Tiro* (ed. L. Minervini, pp. 86 and 88, sect. 74 (310), *Gestes des Chiprois, RHC: Doc. Armen.*, II, p. 754) gives a simplified version of the battle in which Baybars defeats Kitbogha, and the latter dies in battle. Thorau (*The Lion of Egypt*, trans. Holt, p. 77) says the numbers of the two armies were approximately equal and also that Kitbogha "apparently met his death in the heat of battle."

288. Thorau, *The Lion of Egypt*, trans. Holt, pp. 80–3. Thorau reports four versions of the event by the major chroniclers, but Baybars played a major or decisive role in each case.

289. Ziada, "The Mamluk Sultans to 1293," *HC*, II, pp. 745–6, Runciman, *A History of the Crusades*, 3, p. 314, Thorau, *The Lion of Egypt*, trans. Holt, pp. 91–2; and Sadeque, *Baybars I of Egypt*, pp. 41–2.

290. Sadeque, *Baybars I of Egypt*, p. 42.

291. The basic studies of Baybars and the early Mamluk dynasty that I used are the following: On Baybars there is the following comprehensive critical study: Thorau, *The Lion of Egypt*, trans. P. M. Holt, first published in German in 1987 and in the present English translation in 1992. There is also A.-A. Khowaiter, *Baibars the First: His Endeavors and Achievements*, London, 1978, with a useful survey of the Arabic sources on Baybars (pp. 143–90); and S. F. Sadeque, *Baybars I of Egypt*, Dacca and London, 1956, with a translation of the *Sirat al-Malik al-Zahir*, by Muhi al-Din ibn 'Abd al-Zahir (b. 1223–d.1292). There is also the translation of *The History of the Dynasty of the Kings*, by Ibn al-Furat (b.1357/8–d.1448) that, although written much later, preserves important material on Baybars written by earlier historians; the text is translated by U. Lyons and M. C. Lyons, *Ayyubids, Mamlukes and Crusaders*, vol. 2, Cambridge, 1971.

For important studies on the Mamluks, see L. S. Northrup, "The Bahri Mamluk sultanate, 1250–1390," *The Cambridge History of Egypt*, vol. 1, *Islamic Egypt, 640–1517*, ed. C. F. Petry, Cambridge, 1998, pp. 242–89; see the excellent books and articles by R. Amitai-Preiss, *Mongols and Mamluks: The Mamluk-Ilkhanid War, 1260–1281*, Cambridge, 1995; D. Ayalon, "Aspects of the Mamluk Phenomenon," in *The Mamluk Military Society*, London, 1979, articles Xa and Xb; and idem, "Studies on the Structure of the Mamluk Army," in *Studies on the Mamluks of Egypt (1250–1517)*, London; 1977, article I; R. Irwin, *The Middle East in the Middle Ages: The Early Mamluk Sultanate, 1250–1382*, London and Sydney, 1986; and the volume of collected studies, *The Mamluks in Egyptian Politics and Society*, eds. T. Philipp and U. Haarman, Cambridge, 1998. Finally, there is the important work of P. M. Holt, *Early Mamluk Diplomacy (1260–1290)*, Leiden, New York, and Köln, 1995.

Among the Frankish sources, the Rothelin Continuation ends in 1261, but the Noailles Continuation continues its narration of the 1260s and includes activities of Baybars. Among other sources, there is also the *Annales de Terre Sainte*, published in the *Archives de l'Orient Latin*, vol. II, Paris, 1884, pp. 450–4.

292. It is shortly after this Mamluk victory, in February 1261, that the Crusaders are reported to have attacked a Turcoman force east of the Sea of Galilee (*Gestes des Chiprois, RHC: Doc. Armen.*, II, pp. 752–3; and Jackson, "The Crisis in the Holy Land in 1260," p. 509). The fact that the Crusaders suffered a terrible defeat in this battle is not as surprising as the puzzling decision apparently instigated by the Templars to make this ill-advised attack, squandering manpower that was needed to defend the kingdom against the Mamluks, not the Mongols or the Turcomans. The Crusaders seemed as yet unable to identify fully the peril that loomed before them in the guise of Sultan Baybars.

293. Rothelin Continuation, *RHC: Hist. Occid.*, II, pp. 638–9, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, pp. 119–20.

294. Thorau, *The Lion of Egypt*, trans. Holt, pp. 111–16.

295. Sadeque, *Baybars I of Egypt*, pp. 44–6; Ziada, "The Mamluk Sultans to 1293," *HC*, 2, pp. 746–8; Runciman, *A History of the Crusades*, 3, pp. 315–17; P. Holt, *The Age of the Crusades: The Near East from the Eleventh Century to 1517*, London and New York, 1986, pp. 90–5.

296. Thorau, *The Lion of Egypt*, trans. Holt, pp. 103–5.

297. Holt, *The Age of the Crusades*, pp. 93–4; Ziada, "The Mamluk Sultans to 1293," *HC*, 2, pp. 747–8; Sadeque, *Baybars I of Egypt*, pp. 47–9.

298. See Thorau, *The Lion of Egypt*, trans. Holt, pp. 120–8.

299. There had been a long tradition of Muslim diplomatic interchange with the Hohenstaufens, most notably during the time of Frederick II. See, for example, E. Blochet, "Relations diplomatiques des Hohenstaufen avec les sultans d'Egypte," *Revue Historique*, 80 (1902), pp. 51–64; this was by no means a wholly new initiative. Following the victory at Ain Jalud, for example, in 1261, Baybars had sent sent Manfred a giraffe accompanied by Mongol prisoners, as living proof of the sultan's great victory. See Thorau, *The Lion of Egypt*, trans. Holt, p. 120.

300. Holt, *The Age of the Crusades*, pp. 93–4; Ziada, "The Mamluk Sultans to 1293," *HC*, 2, p. 748; and Sadeque, *Baybars I of Egypt*, pp. 49–52; Runciman, *A History of the Crusades*, 3, pp. 316–17.

301. S. Der Nersessian, "The Kingdom of Cilician Armenia," *HC*, 2, pp. 652–3.

302. Holt, *Early Mamluk Diplomacy*, pp. 12–13.

303. Ibn al-Furat, *The History of the Dynasty of the Kings, Ayyubids, Mamlukes and Crusaders*, 2, pp. 43–4.

304. One wonders what impact the sacking of Port St. Simeon had on the production of pottery there. A. Lane ("Medieval Finds at Al Mina in North Syria," *Archaeologia*, 87 (1937), pp. 19–78) dates the end of pottery production at this site to 1268, the year of the fall of Antioch to the Mamluks, but does not comment on the events of 1262.

305. Noailles Continuation, *RHC: Hist. Occid.*, II, p. 446.

306. Muhi al-Din, *Sirat al Malik al Zahir*, ed. Sadeque, pp. 167–71.

307. Thorau (*The Lion of Egypt*, trans. Holt, p. 144) explains that the Muslim prisoners, mostly well-trained craftsmen, were more valuable to the Orders than their unskilled coreligionists.

308. Muhi al-Din, *Sirat al-Malik al-Zahir*, ed. Sadeque, p. 171.

309. Folda, *The Nazareth Capitals and the Crusader Shrine of the Annunciation*, p. 7 and n. 19; Gaston Le Hardy, *Histoire de Nazareth et de ses Sanctuaires: Etude chronique des documents*, Paris, 1905, pp. 99–105. See Thorau, *The Lion of Egypt*, trans. Holt, p. 147, and n. 26.

310. Muhi al-Din, *Sirat al-Malik al-Zahir*, ed. Sadeque, pp. 173–4.

311. *Annales de Terre Sainte, AOL*, 2, p. 450.

312. Runciman, *A History of the Crusades*, 3, p. 317.

313. I am indebted to Jonathan Riley-Smith for his observations and generous advice on this and many other points in my discussion, points far too numerous to mention individually.

314. Muhi al-Din, *Sirat al-Malik al-Zahir*, ed. Sadeque, p. 178.

315. On Mamluk Jerusalem see M. Burgoyne, *Mamluk Jerusalem: An Architectural Study*,

Buckhurst Hill, 1987, pp. 53–87. Burgoyne notes (p. 77) that "Baybars ordered the restoration of the mosaics on the Dome of the Rock, which had suffered from the years of neglect under the later Ayyubids. The mosaics on the Qubbat al-Silsila, of which traces have recently been revealed, were probably repaired at the same time; and the marble revetment of its *mihrab* is also attributable to Baybars. The terrace around the Dome of the Rock was repaved, the work being overseen as usual by the Nazir al-Haramayn, the Superintendent of the Two Harams of Jerusalem and Hebron, who also restored the Bab al-Mathara, the gate leading from the Haram to the Ablutions Place."

316. Holt, *The Age of the Crusades*, p. 94.

317. Muhi ad-Din, *Sirat al-Malik al-Zahir*, pp. 188–90.

318. We should note that Muhi ad-Din seems to mention Frankish helmets frequently as an example of the best warrior helmets, so we must consider the possibility that this may be a reference to a type, and not necessarily helmets literally acquired from the Franks.

319. *Annales de Terre Sainte, AOL*, II, p. 451.

320. Runciman, *A History of the Crusades*, 3, p. 318.

321. Hamilton, *The Latin Church in the Crusader States*, pp. 270–3.

322. B. Spuler, *History of the Mongols*, Berkeley and Los Angeles, 1972, pp. 121–2, C. Cahen, "The Mongols and the Near East," *HC*, 2, pp. 717–20; D. Nicolle, *The Mongol Warlords*, Poole, Dorset, 1990, pp. 132–4.

323. Thorau, *The Lion of Egypt*, trans. Holt, pp. 103–5; and Sadeque, *Baybars the First of Egypt*, pp. 71–2.

324. Thorau, *The Lion of Egypt*, trans. Holt, pp. 160–1.

325. This was probably the cathedral, St. Peter's, which the Mamluks had taken with the city.

326. Ibn al-Furat, *The History of the Dynasty of the Kings*, trans. U. Lyons and M. C. Lyons, II, pp. 70–1. This image of the ruler personally taking the lead in construction or demolition work seems to be a topos in these narrative medieval accounts. Besides Baybars here we have also encountered similar reports on the activity of Richard I at Ascalon during the Third Crusade, and on Louis IX at Caesarea during his residency in the Holy Land. We must also recall that whereas Ibn al-Furat tells a good story, he is writing long after the fact, in the late fourteenth century, and his main value is the anthology of earlier sources he incorporates in his text.

327. Ibn al-Furat, ibid., pp. 72–3; *Annales de Terre Sainte, AOL*, II, p. 452, *Noailles Continuation, RHC: Hist. Occid.*, II, pp. 450–1; and Runciman, *A History of the Crusades*, 3, p. 318. The *Gestes des Chiprois*, p. 758, reports that Baybars took Caesarea and Arsuf but incorrectly states that he also took Tyre instead of Haifa.

328. Thorau, *The Lion of Egypt*, trans. Holt, pp. 161–2.

329. Ibn al-Furat, *The History of the Dynasty of the Kings*, trans. U. Lyons and M. C. Lyons, II, pp. 73–83; Runciman, *A History of the Crusades*, 3, pp. 318–19.

330. Runciman, ibid. The text of the poem is found in Vincenzo de Bartholomaeis, ed., *Poesie provenzale storiche relative all'Italia, vol. II, Fonti per la storia d'Italia*, vol. LXXII, Rome, 1930, pp. 222–4.

331. Noailles Continuation, *RHC: Hist. Occid.*, II, p. 450; *Gestes des Chiprois, RHC: Doc. Armen.*, II, p. 759.

332. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, pp. 88–9; and idem, "The Disputed Regency of the Latin Kingdom of Jerusalem, 1264/6 and 1268," *Camden Miscellany*, XXVII (=Camden 4th ser., 22), London, 1979, pp. 4–6.

333. Noailles Continuation, *RHC: Hist. Occid.* II, p. 454, *Gestes des Chiprois, RHC: Doc. Armen.*, II, p. 762; *Annales de Terre Sainte, AOL*, II, p. 452.

334. Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 45–62. This accounting is based on the "inventaire" of the count of Nevers published by A. Chazaud, which I discuss at some length later in the chapter.

335. Ibn al-Furat, *The History of the Dynasty of the Kings*, trans. U. Lyons and M. C. Lyons, II, pp. 83–4.

336. Thorau, *The Lion of Egypt*, trans. Holt, pp. 166–71. The distance from Acre to Safed by the new modern road is 75 kilometers, or approximately 45 miles.

337. It was shortly after this, between 1260 and 1266, that an anonymous author wrote an account of the construction of this castle for Benedict of Alignan titled, "De Constructione Castri Saphet." I comment on this text later in the chapter when I discuss certain issues pertaining to the developments in Crusader architecture during the years 1244–68.

338. M. Barber, *The New Knighthood*, Cambridge, 1994, p. 195; R. D. Pringle, "Reconstructing the Castle of Safed," *Palestine Exploration Quarterly*, 117 (1985), pp. 147–8.

339. The Noailles Continuation (*RHC: Hist. Occid.*, II, pp. 454–5) gives a brief account of the siege of Safed, but the *Gestes des Chiprois* (*RHC: Doc. Armen.*, II, pp. 179–81) has a much longer account, summarized also in Runciman, *A History of the Crusades*, 3, p. 321.

The long, complicated story of the attack on and the surrender of Safed is told from the Muslim point of view by Ibn al-Furat, *The History of the Dynasty of the Kings*, in *Ayyubids, Mamlukes and Crusaders*, 2, pp. 88–96. Sadeque (*Baybars the First of Egypt*, p. 56) proposes that "this was the only time that Baybars attempted to gain converts by force. The experiment was a conspicuous failure, and he did not attempt it again." This interpretation does not seem to accord with the account given by ibn al-Furat or with Thorau, *The Lion of Egypt*, trans. Holt, pp. 169–70.

340. Ibn al-Furat, *The History*, 2, p. 105.

341. Sadeque, *Baybars the First of Egypt*, pp. 56–7. Ibn al-Furat says that the slaves were being sold in Hisn Akkar (Gibelacar), not Acre as reported by some historians (Ibn al-Furat, *The History of the Dynasty of the Kings, Ayyubids, Mamlukes and Crusaders*, 2, pp. 99–100).

342. On the fresco fragments from the Syrian Orthodox church at Qara, see L.-A. Hunt, "A Woman's Prayer to St Sergios in Latin Syria: Interpreting a Thirteenth-Century Icon at Mount Sinai," *Byzantine and Modern Greek Studies*, 15 (1991), p. 98 and figs. 4 and 5; and J. Leroy, "Decouvertes de Peintures Chrétiennes en Syrie," *Les Annales Archéologiques Arabes Syriennes*, 25 (1975), pp. 97–9, figs. 1–3.

343. "Chronology of Hetoum," *RHC: Doc. Armen.*, I, p. 487, cited by T. S. R. Boase, "The History of the Kingdom," *The Cilician Kingdom of Armenia*, ed. T. S. R. Boase, New York, 1978, p. 26.

344. Der Nersessian, "The Kingdom of Cilician Armenia," *HC*, II, p. 654.

345. P. Edbury, "John of Jaffa and the Kingdom of Cyprus," *EKEE*, XXIII (1997), p. 16.

346. Noailles Continuation, *RHC: Hist. Occid.*, II, p. 455.

347. Sadeque, *Baybars the First of Egypt*, pp. 57–8.

348. "Le soudan ... fist abatre les molins et les tors des jardins et tayllier les arbres et les vignes quy estoient hors d'Acre" (*Gestes des Chiprois, RHC: Doc. Armen.*, II, p. 768).

349. Hassan Salamé-Sarkis, *Contribution a l'Histoire de Tripoli et de sa Région a l'Époque des Croisades: Problèmes d'Histoire, d'Architecture et de Céramique*, Paris, 1980, pp. 34, 36–7.

350. The truce is not dated exactly but was signed in May 1267. It is published by P. M. Holt, *Early Mamluk Diplomacy (1260–1290)*, Leiden, New York, and Cologne, pp. 32–41. The duration of the truce is recorded in clause 33 on p. 41.

351. *Gestes des Chiprois, RHC: Doc. Armen.*, II, pp. 768–9.

352. Not surprisingly, Hugh of Antioch-Lusignan's claim to the throne was not uncontested. Hugh of Brienne presented his claim as well. For the details see Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, pp. 35–6.

353. Thorau, *The Lion of Egypt*, trans. Holt, p. 188.

354. *Gestes des Chiprois, RHC: Doc. Armen.* II, p. 771, Noailles Continuation, *RHC: Hist. Occid.*, II, p. 456; Runciman, *A History of the Crusades*, 3, p. 324. Ibn al-Furat, *The History of the Dynasty of the Kings, Ayyubids, Mamlukes and Crusaders*, 2, p. 108, refers to wood and marble being taken to Cairo.

355. The mosque of Sultan Baybars I, al-Bunduqdari, was built between 1266 and 1269. Although now in poor condition, with its interior turned into a public garden, it forms the central feature of the maydan al-Zahir in Cairo. See V. Seton-Williams and P. Stock, *Egypt* [Blue Guide], 3rd edn., London and New York, 1993, pp. 409–11.

356. Ibid., pp. 322–6, and the main portal is depicted in E. Prisse d'Avennes, *Islamic Art in Cairo*, Cairo, 1999, p. 11. I have discussed the relief with images of buildings in Jerusalem elsewhere. See Chapter 5, note 594.

357. Thorau, *The Lion of Egypt*, trans. Holt, pp. 188–9.

358. Ibn al-Furat, *The History of the Dynasty of the Kings, Ayyubids, Mamlukes and Crusaders*, 2, p. 113.

359. Ibid., pp. 121–2; and Thorau, *The Lion of Egypt*, trans. Holt, pp. 190–2.

360. Ibn al-Furat, *The History of the Dynasty of the Kings, Ayyubids, Mamlukes and Crusaders*, 2, pp. 122–5.

367. Ibid., pp. 328–9; Edbury, *The Kingdom of Cyprus and the Crusades, 1171–1374*, pp. 90–5.

368. See M. H. Burgoyne, *Mamluk Jerusalem: An Architectural Study*, published by the World of Islam Festival Trust on behalf of the British School of Archaeology in Jerusalem, Buckhurst Hill, Essex, 1987, esp. pp. 33–102.

THE ART OF THE CRUSADERS IN THE LATIN KINGDOM, *c.*1244–*c.*1268

369. B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, p. 263.

370. J. Riley-Smith, "Latin Titular Bishops in Palestine and Syria, 1137–1291," *Catholic Historical Review*, 44 (1978), p. 5; S. Schein, "The Patriarchs of Jerusalem in the Late Thirteenth Century – *Seignors Espiritueles et Temporeles*," *Outremer*, eds. B. Z. Kedar et al., Jerusalem, 1982, pp. 298–9, and B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 270–1.

371. N.B. In this chapter are copious references to works on Crusader manuscripts by Hugo Buchthal and to works on Crusader Icons by Kurt Weitzmann. For Buchthal, the reference to his 1957 book will be the abbreviation as it appears in our list of abbreviations, *MPLKJ*. For Weitzmann, please note the system of references to his corpus of studies on Crusader icons in the list of abbreviations.

372. *Rothelin* Continuation, *RHC: Hist. Occid.*, II, pp. 563–4, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, Brookfield, 1999, p. 64.

373. Ibn al-Furat, in *Ayyubids, Mamlukes and Crusaders*, trans. U. and M. C. Lyons, Cambridge, 1971, p. 3.

374. Noailles Continuation, *RHC: Hist. Occid.*, II, p. 428, trans. J. Shirley, *Crusader Syria*, p. 132.

375. J. Riley-Smith notes (*Ayyubids, Mamlukes and Crusaders*, p. 172, n. 2, p. 3) that not only is this same report of the destruction of the tombs mentioned by Ibn al-Furat, but also by the Rothelin Continuation, as well as patriarchal letters found in Matthew Paris (*Chronica Majora, Rolls Series*, vol. 4, p. 340), in the *Chron. Mailros* (pp. 161–2); and finally, in the *Chronica Regia Coloniensis* (ed. G. Waitz, *MGHS rerum Germanicarum*, vol. XVIII, pp. 286–7).

376. For the tombs designed for the Crusader kings in the twelfth century, see Folda, *ACHL* 1, pp. 37–40, 74–5, 114–15, 174, 328, 461, 467–9.

377. Y. Porath, Y. Neeman, and R. Badihi ("Caesarea," *Excavations and Surveys in Israel*, 9 (1990), pp. 132–4) provide a recent description of archaeological work, but that work does not address the thorny problem of destructions and repairs. On this history and destruction of Caesarea during the Mamluk invasions, see H. W. Hazard, "Caesarea and the Crusades," *The Joint Expedition to Caesarea Maritima*, vol. 1, Studies in the History of Caesarea Maritima, Missoula, Montana, 1975, pp. 88–9.

378. P. Thorau, *The Lion of Egypt*, trans. P. M. Holt, London and New York, 1992, pp. 160–1.

379. See H. Kalayan, "The Sea Castle of Sidon," *Bulletin du Musée de Beyrouth*, 26 (1973), pp. 81–9; and the summary by H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 121–4, 207 n. 2, with the older bibliography.

380. D. Jacoby, "Crusader Acre in the Thirteenth Century: Urban Layout and Topography," *Studi Medievali*, 3rd ser., 20 (1979), pp. 1–45.

381. The main recent study is by B. Kedar, "The Outer Walls of Frankish Acre," *'Atiqot*, 31 (1997), pp. 157–80. There are excellent summaries by R. D. Pringle, "Town Defences in the Crusader Kingdom of Jerusalem," *The Medieval City under Siege*, 1 (1995), pp. 81–4; and A. Boas, "Some Reflections on Urban Landscapes in the Kingdom of Jerusalem: Archaeological Research in Jerusalem and Acre," *Dei Gesta Per Francos*, pp. 247–9; and in Boas's book, idem, *Crusader Archaeology: The Material Culture of the Latin East*," London and New York, 1999, pp. 32–42. See also the older work by M. Benveniste, *The Crusaders in the Holy Land*, Jerusalem, 1970, pp. 78–113.

382. See R. Frankel, "The North-Western Corner of Crusader Acre," *Israel Exploration Journal*, 37 (1987), pp. 256–61.

383. See Pringle in n. 381.

384. In the twelfth century at its greatest extent, Jerusalem's walls enclosed a little more than 95 hectares.

385. On the work of E. Gravier d'Ortières and his work in the eastern Mediterranean for the French crown, see the recent exhibition catalogue *Byzance Retrouvée: Erudits et Voyageurs Français [XVIe-XVIIIe siècles]*, ed. J. Durand, Paris: Chapelle de la Sorbonne, 2001, pp. 41–3, 60–1.

386. Kedar, "The Outer Walls of Frankish Acre," p. 159, plan 4, and his discussion on pp. 164–76.

387. W. Müller-Wiener, *Burgen der Kreuzritter*, Munich and Berlin, 1966, p. 71. Kedar also communicated his opinion to me on the current state of the question by e-mail (sent 19 April 2001).

388. See the recent article by Boas, "Some Reflections on Urban Landscapes," pp. 247–9, and the plan he proposes on p. 248. In this useful plan his locations of the various buildings and quarters is, however, sometimes unclear, with the words written on the map without a specific placement being indicated. For example, he indicates the "Church of the Holy Cross (Sca Crux)" without clarifying whether he agrees with Kedar's proposal to place it much farther to the east than heretofore (see subsequent discussion) or is retaining the old view of locating it near the Hospital of St. John.

389. B. Kedar, "Convergences of Oriental Christian, Muslim and Frankish Worshippers: The Case of Saydnaya and the Knights Templar," in *The Crusades and the Military Orders. Expanding the Frontiers of Medieval Latin Christianity*, eds. Z. Hunyadi and J. Laszlovszky (Budapest, 2001), pp. 89–100. I am indebted to B. Kedar for allowing me to read the article in page proofs prior to its publication.

390. Kedar, "Convergences," p. 96.

391. Kedar, "The Outer Walls of Frankish Acre," p. 159, plan 4; see our Map 8A.

392. D. Jacoby, "Pilgrimage in Crusader Acre: the *Pardouns dAcre*," *De Sion exibit lex et verbum domini de Hierusalem: Essays on Medieval Law, Liturgy, and Literature in Honour of Amnon Linder*, ed. Y. Hen, Turnout, 2001, pp. 106–17. See also Röhricht, *Biblioteca Geographica Palaestinae*, p. 55; and the text in Michelant and Raynaud, eds., *Itinéraires à Jérusalem*, pp. 229–36. This interesting text contains the indulgences (= pardouns), which pilgrims to the Holy Land could gain – cited in terms of years and "karantaines" or days – by visiting specific sites under certain conditions. It refers to forty places in Acre, but its list is not complete.

393. A. M. Chazaud, "Inventaire et comptes de la succession d'Eudes, Comte de Nevers," *Memoires de la Société des Antiquaires de France*, 32 (1871), pp. 198–200. We discuss this inventory as a source of knowledge about works of art toward the end of this chapter.

394. See Chapter 5, and Enlart, *Les Monuments des Croisés*, vol. 2, Paris, 1928, pp. 12–35.

395. Hamilton, *The Latin Church in the Crusader States*, pp. 300–1. Hamilton is presumably basing his number on B. Dichter, *The Orders and Churches of Crusader Acre*, Acre, 1979, pp. 11–121.

396. David Jacoby dates the text specifically to 1258–64. See Jacoby, "Pilgrimage in Crusader Acre: The *Pardouns dAcre*," pp. 111–12.

397. Röhricht, *Biblioteca Geographica Palaestinae*, pp. 52–3; S. Lewis, *The Art of Matthew Paris in the Chronica Majora*, Berkeley and Los Angeles, 1987, pp. 321 ff., esp. 356–62; and B. Dichter, *The Maps of Acre*, Acre, 1973, pp. 9–15.

398. Röhricht, *Biblioteca Geographica Palaestinae*, pp. 67–8; Dichter, *The Maps of Acre*, pp. 16–24. Röhricht, *Biblioteca Geographica Palaestinae*, pp. 67–68; Dichter and J. Prawer, eds., *Liber Secretorum Fidelium Crucis*, by Marinus Sanutus dictus Torsellus, Hanover, 1611, rpt., Toronto, 1972, pp. I–XIX, esp. p. XI.

399. For Paolino Veneto, also known as Paulinus of Pozzuoli, see Dichter, *The Maps of Acre*, pp. 25–30; and A. Boas, *Crusader Archaeology*, p. 34.

400. Hamilton, *The Latin Church in the Crusader States*, p. 300 and n. 13.

401. See J.-B. Chabot, "A propos du couvent du Mont Sinai," *Revue de l'Orient Chrétien*, 5 (1900), pp. 495–8. The text is also quoted in L. Eckenstein, *A History of Sinai*, London, 1921, p. 150. J. Richard (*Le Royaume Latin de Jérusalem*, Paris, 1953, p. 282) interprets this reference as meaning that St. Catherine's in Acre was a Greek Orthodox house, as I also did (Folda, *Crusader Manuscript Illumination*, p. 6 and n. 12). However, it should also be noted that in the important publication of K. Manafis, ed., *Sinai: Treasures of the monastery of Saint Catherine*, Athens, 1990, p. 380, the comprehensive list of *metochia* of the Monastery does not include Acre or mention St. Catherine's there. Also C. Enlart (*Les Monuments des Croisés*, vol. 2, Paris, 1928, pp. 15–23) does not connect St. Catherine's in Acre to the monastery of the same name on Mount Sinai.

402. Most authors who comment on the holdings of the Monastery of St. Catherine on Mount Sinai cite the modern list, which includes property in the following places: Pharan, el Tor, Suez, Cairo, Asmara, Tripoli (Syria), several sites on Cyprus and Crete, as well as Constantinople and Athens, among others. See, for example, J. Kamil, *The Monastery of Saint Catherine in Sinai*, Cairo 1991, p. 36; and M. H. L. Rabino, *Le Monastère de Sainte-Catherine du Mont Sinai*, Cairo, 1938, pp. 2–5, 62–4, 92–3. Other historical introductions to the monastery at Mount Sinai also refer to these holdings (e.g., A. Atiya, *The Arabic Manuscripts of Mount Sinai*, Baltimore, 1955, pp. 1–5), but the definitive list appears to be in *Sinai*, ed. K. Manafis, p. 380, mentioned earlier. These references to more modern holdings unfortunately omit some of the property held by the monastery during the Crusader period, such as the Church of St. Catherine's in Acre.

403. I am indebted to my colleague E. Jane Burns for her expert translation of the meaning of this passage.

404. F. L. Cross and E. A. Livingstone, eds., *The Oxford Dictionary of the Christian Church*, 3rd edn., Oxford, 1997, pp. 178–9.

405. See Chapter 5, nn. 188, 189, 425–40.

406. See nn. 336–8 to this chapter.

407. The text of *De constructione castri Saphet* has been edited by R. B. C. Huygens, "Un nouveau texte du Traité, *'De constructione castri Saphet', Studi Medievali*, 6 (1965), pp. 355–87, with an English translation by Kennedy, *Crusader Castles*, pp. 190–8; R. D. Pringle has written a review article on the text in the *Palestine Exploration Quarterly*, 117 (1985), pp. 139–49; see also his comments on the text of T. E. Lawrence, *Crusader Castles*, ed. R. D. Pringle, Oxford, 1988, pp. 65–9. For the older references, see Kennedy, *Crusader Castles*, p. 208, n. 6.

408. Preliminary excavations were conducted in the 1960s, and now (2003) a campaign is underway under the auspices of the Israel Antiquities Authority, as noted in Chapter 5. For two good panoramic views of the site of the castle, see plates 2.9 and 2.10 in the recent publication by H. Nicholson, *The Knights Templar, A New History*, Sparkford: Sutton Publishing, 2001, pp. 59, 60.

409. *De constructione castri Saphet*, ed. Huygens, p. 379, trans. Kennedy, *Crusader Castles*, p. 191.

410. *De constructione castri Saphet*, ed. Huygens, p. 386, trans. Kennedy, *Crusader Castles*, p. 198.

411. Kennedy, *Crusader Castles*, p. 190.

412. Ibid., pp. 145–68; P. Deschamps, *Le Crac des Chevaliers*, text, Paris, 1934, pp. 213–24; and his more recent discussion in *Terre Sainte Romane*, L'abbaye de Ste-Marie de la pierre qui vire, 1964, pp. 73–137; C. Enlart, *Les Monuments des Croisés*, 2, Paris, 1928, pp. 96–9; T. E. Lawrence, *Crusader Castles*, ed. R. D. Pringle, Oxford, 1988, pp. 76–8; and see the essay by G. Coppola and L. Marino, "Le Crac des Chevaliers," in *Les Croisades: L'Orient et L'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, pp. 263–7.

413. Deschamps, *Le Crac des Chevaliers*, p. 213–14 and plan 4. A clear photo of this internal wall does not seem to survive.

414. For the Church of the Holy Sepulcher, see Folda, *The Art of the Crusaders in the Holy Land, 1098–1187*, Cambridge, 1995, pp. 190–1, pls. 73f–h. For the cathedral at Tortosa, see Figs. 30, Chapter 3, and 85, Chapter 5. For the remains of the chapel in the Templar castle at Tortosa, see H. Kennedy, *Crusader Castles*, Cambridge, 1994, p. 137, pl. 48.

415. These openings between the loggia and the grande salle are drawn, along with the tympanum design, on Deschamps, *Le Crac des Chevaliers*, p. 221. The designs of these ensembles seem to reflect rayonnant ideas, if any do at Crac. But to evaluate this idea fully, one would need to look at cloister designs from the 1240s and 1250s. None survives from this period in Syria-Palestine, but we have Bellapais on Cyprus with its lovely fourteenth-century cloister, dating from the second quarter of the century. Bellapais was, however, under construction from 1205, and we know that the abbey grew rapidly after 1246, when it received a large bequest. So we can wonder what relationship Gothic work being done there and elsewhere on Cyprus may have had on the Latin Kingdom and the County of Tripoli. On Bellapais, see, for example, T. S. R. Boase, "The Arts in Cyprus: Ecclesiastical Art," HC, IV, pp. 183–4.

416. Enlart, *Les Monuments des Croisés*, 2, p. 99, and fig. 233 bis, pl. 34, fig. 111. The photo published by Deschamps, *Le Crac des Chevaliers*, album, pl. LVIb, shows that the sculptural decoration is placed inside of a trefoil Gothic pointed arch at the top of very tall, almost lancet windows, however.

417. Ibid., and 1er album, pl. 26, fig. 83.

418. Deschamps, *Terre Sainte Romane*, pp. 94–5; and idem, *Le Crac des Chevaliers*, p. 223.

419. See the discussion of Tortosa in the twelfth century, Folda, *ACHL*, 1 pp. 302–6; and in Chapters 3 and 5, this volume. For the Templar grande salle at Tortosa, see Enlart, *Les Monuments des Croisés*, text, pp. 427–30, and 2eme album, pls. 175–83, dated to the (early) thirteenth century, but now very heavily damaged. It was much larger than the great hall at Crac, measuring 44 × 15 meters.

420. See the discussion of the Gothic phase of the cathedral in Chapter 3 and especially Chapter 5. See also Enlart, *Les Monuments des Croisés*, text, pp. 408–26, and 2eme album, pls.161, 164, 169–73.

421. Kennedy, *Crusader Castles*, p. 162. Enlart (*Les Monuments des Croisés*, ler album, pl. 28, fig. 93) publishes a photo of the inscription.

422. Most of the comparable examples of this saying cited by Deschamps are from the fourteenth century, but it appears in the *Speculum Maius* of Vincent of Beauvais, written 1247–59. See Deschamps, *Le Crac des Chevaliers*, pp. 218–19.

423. Deschamps, *Le Crac des Chevaliers*, p. 220.

424. Ibid., p. 164. He was apparently castellan at Crac between the mid-1250s and the mid-1260s. See J. Riley-Smith, *The Knights of St. John*, 1, pp. 189–90. A maquette of this inscription now located in the Musée National des Monuments Français at the Trocadéro in Paris is published in *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, pp. 258, 399, no. 64.

425. Deschamps, *Le Crac des Chevaliers*, p. 165.

426. See the discussion of St. Andrew's in Chapter 5. C. Enlart, *Les Monuments des Croisés*, vol. 2, Paris, 1928, pp. 15–23, and pls. 51–4, figs. 163–5, 167–70.

427. See M. Benveniste, *The Crusaders in the Holy Land*, Jerusalem, 1970, pp. 112–13.

428. This marble slab, 70 × 55 cm and 5 cm thick, was found *c.*1874 at the tomb of Sheik Murad near Jaffa. It is now in the Ustinow Collection of the University of Oslo. The most recent article on this work is by Laszlo Berczelly, "En fragmentert gravplate fra Ludvig den helliges Jaffa," *UKM – En Mangfoldig Forskningsinstusion*, ed. E. H. Hofseth, Occasional Papers, no. 1 (2002), pp. 19–30, with four color plates of the slab (figs. 1, 2, 4, and 5) and the older bibliography.

See also R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, 1, Cambridge, 1993, p. 269, with a photo of its current state as fig. CXC; S. Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae (1099–1291)*, Jerusalem, 1974, pp. 258–9, no. 348, fig. 103; and A. Boas, *Crusader Archaeology*, London and New York, 1999, pp. 231, 233, all with references to older notices by C. Clermont-Ganneau.

429. Pringle (*The Churches*, 1, 269) accepts the idea of a probable link to a church in Jaffa.

430. Enlart, *Les Monuments des Croisés*, ler album, pl. 39, fig. 126.

431. See Enlart, *Les Monuments des Croisés*, ler album, pl. 49, figs. 158, 159.

432. E. Panofsky, *Tomb Sculpture*, New York, 1964, p. 53, fig. 205.

433. P. Thorau, *The Lion of Egypt*, London and New York, 1987, pp. 187–8.

434. Other remnants of Crusader tomb slabs are extant from this period, for example, that of Pierre de la Vieille Bride, a Hospitaller Master, in Acre. See S. de Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, Jerusalem, 1974, pp. 303–5, fig. 131. We are, however, only considering those slabs with some symbolic or figural imagery on them, which this example and many others did not have or do not now retain.

435. C. Clermont-Ganneau, *Archaeological Researches in Palestine*, vol. 1, London, 1899, pp. 279–90.

436. A. Boas, *Crusader Archaeology*, pp. 234–5, and pl. 9.3.

437. See Enlart, *Les Monuments des Croisés*, 1er album, pl. 32, fig. 106, with the clef de voute rendered as a sketch.

438. Kedar, "The Outer Walls of Frankish Acre," *'Atiqot*, 31 (1997), pp. 166–7, fig. 9. Enlart, *Les Monuments des Croisés*, text, p. 26, and 1er album, pl. 53, fig. 166, published this same head of St. John in a much less damaged condition in 1928.

439. H. Buchthal, *MPLKJ*, pp. 1–14, 39–46.

440. See my discussion of the Psalter of Queen Melisende in J. Folda, *ACHL*, 1, pp. 137–59, with additional bibliography. There have been several recent studies since that time that are in press or are just coming out. See my discussion of the Riccardiana Psalter in Chapter 5.

441. Buchthal, *MPLKJ*, pp. 54–68.

442. Ibid., p. 54.

443. Ibid., p. 68.

444. D. Weiss, *Art and Crusade in the Age of Saint Louis*, Cambridge, 1998.

445. D. Weiss, "The Three Solomon Portraits in the Arsenal Old Testament and the Construction of Meaning in Crusader Painting," *Arte Medievale*, 6/2 (1992), pp. 15–38; idem, "Biblical History and Medieval Historiography: Rationalizing Strategies in Crusader Art," *Modern Language Notes*, 108 (1993), pp. 710–37; idem, "Architectural Symbolism and the Decoration of the Sainte Chapelle," *Art Bulletin*, 77/2 (1995), pp. 308–20.

446. Weiss, *Art and Crusade*, p. 113.

447. For the literature on the Arsenal Bible, see the fundamental study by H. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, pp. 54–68, 95–7, 146–8, with the older bibliography, and pls. 62–81. More recently, the most important studies have been by D. H. Weiss, of which the following is his major work, *Art and Crusade in the Age of Saint Louis*, Cambridge, 1998, pp. 79–215. Other, more specialized articles include D. H. Weiss, "The Three Solomon Portraits in the Arsenal Old Testament and the Construction of Meaning in Crusader Painting," *Arte Medievale*, 6/2 (1992), pp. 15–38; idem, "Biblical History and Medieval Historiography: Rationalizing Strategies in Crusader Art," *Modern Language Notes*, 108 (1993), pp. 710–37; idem, "Architectural Symbolism and the Decoration of the Sainte-Chapelle," *Art Bulletin*, 77 (1995), pp. 308–20; idem, "Hec est domus Domini firmiter edificata: The Image of the Temple in Crusader Art," *Jewish Art*, 23/24 (1997/1998), pp. 210–17. See now also L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, III Colloquio Internazionale Medioevo Romanzo e Orientale, 1999, pp. 89–90. See also the reviews of Buchthal's book by H. Bober, *Art Bulletin*, 43 (1961), pp. 65–8, and L. M. J. Delaissé, *Scriptorium*, XVI (1962), pp. 348–52. See the review of Weiss's book by J. Lowden, "Reviews in History," Institute of Historical Research, School of Advanced Study, February 2000, online at http://www.ihrinfo.ac.uk/reviews.

Other notices include J. Porcher, "Bible en Français," in *Saint Louis*, Paris: Sainte Chapelle, 1960, pp. 95–6, no. 192, and pl. 9; F. Avril, "Bible en Français," in *La France de Saint Louis*, Paris: Salle des Gens D'Armes du Palais, 1970, p. 105, no. 208, and plate on p. 107; F. Py, "Bible Française," in *Trésors de la Bibliothèque de l'Arsenal*, Paris: Bibliothèque de l'Arsenal, 1980, pp. 50–1, no. 87; D. Muzerelle, "French Bible of Acre," in *Creating French Culture: Treasures from the Bibliothèque Nationale de France*, eds. M.-H. Tesnière and P. Gifford, New Haven and London: Yale University Press, 1995, pp. 63–5; P.-M. Bogaert, ed., *Les Bibles en Français: Histoire Illustrée du Moyen-Âge à nos jours*, Turnhout, 1991, pp. 27–8, and M. Lefèvre and D. Muzerelle, "La bibliothèque du marquis de Paulmy," in *Histoire des bibliothèques françaises*, vol. 3, *Les bibliothèques de l'Ancien Regime, 1530–1789*, ed. C. Jolly, Paris, 1988, pp. 302–15.

The main content/decoration of Arsenal MS 5211 is as follows: (Figs. 145–8, CD nos. 38–71).

Selected Old Testament Books in Old French, 368 fols., 28.5 × 20.0 cm, written in two columns of thirty lines each, fourteen full-page and six partial-page frontispiece illustrations, six large historiated initials, fourteen large decorated initials, numerous smaller ornamental initials.
Fol. 2r (Rubrics) *Ici comence le livre dou comencement dou munde qui est apele genesis . . .*

Historiated initial: (D)*evine escripture nous enseigne . . .*
(A seated Dominican writing; 3.5 × 3.5 cm).

Fol. 3v Frontispiece to Genesis (21.9 × 14.3 cm).

1. First Day of Creation: The Spirit of God moves upon the face of the waters (Gen. 1: 2).
2. Second Day of Creation: The Dividing of the Waters (Gen. 1: 7).
3. Third Day of Creation: Appearance of the Dry Land (Gen. 1: 9).
4. Third and Fourth Days of Creation: Creation of Vegetation, of Sun, Moon and Stars (Gen. 1: 12, 16).
5. Fifth and Sixth Days of Creation: Creation of Fish, Fowl, and Animals.
6. Creation of Eve (Gen. 1: 21, 25).
7. Adam and Eve Given Trees for Food by the Lord (Gen. 1: 29).
8. Seventh Day of Creation: The Lord rests (Gen. 2: 2).
9. The Fall (Gen. 3: 6).
10. The Expulsion (Gen. 3: 23).
11. Adam and Eve Toiling (Gen. 3: 19; 4: 1, 2).
12. The Offerings of Cain and Abel (Gen. 4: 3, 4).

Fol. 30r Frontispiece to Exodus (21.9 × 14.2 cm).

1. The Finding of Moses (Exod. 2: 5).
2. Moses and the Burning Bush (Exod. 3: 2–5).
3. and 4. The Crossing of the Red Sea (Exod. 14: 21ff.).
5. Moses Receiving the Law (Exod. 31: 18).
6. Moses Brings the Tablets of the Law to the Israelites (Exod. 35: 1).

Fol. 30v Decorated Initial: (C)*ist sunt les noms . . .* (5.0 × 6.0 cm).
Fol. 53r Frontispiece to Leviticus (12.6 × 14.3).

1. Offering of the Herd (Lev. 1: 2–10).
2. Offering of the Fowl (Lev. 1: 14).
3. Center/left: Moses makes the Israelites drink water containing powder from the Golden Calf, held by a Levite who has just killed some of his kinsmen (Exod. 32: 20, 27–8).
4. Center: The Golden Calf (Exod. 32: 1–6).
5. Center/right: Moses Breaking the Tablets of the Law (Exod. 32: 20).
6. Nadab and Abihu: The Strange Fire (Lev. 10: 1).
7. The Lord's Fire consumes them (Lev. 10: 2).

Fol. 53v Historiated Initial: (N)*ostre sires dist a moysen . . .* (The Lord speaks to Moses; 5.0 × 4.0 cm).
Fol. 54v Frontispiece to Numbers (16.6 × 14.2 cm).

1. The Lord Speaks to Moses and Aaron (Num. 2: 1).
2. Moses Chooses Spies (Num. 13: 16).
3. The Murmuring of the Israelites with Aaron (Num. 14: 6).

4–6. The Battle of Raphidim, with Moses Supported by Aaron and Hur (Exod. 17: 10–13).

7. Balaam before Barak (Num. 22: 37ff.).

8/9. Balaam Confronted by the Angel (Num. 22: 23).

Fol. 55r Decorated Initial: (N)*ostre sires parla a moysen . . .* (4.5 × 4.1 cm).
Fol. 68r Frontispiece to Deuteronomy (20.8 × 13.6 cm).

1. Moses Receives the Commandments from the Lord (Deut. 10: 4).
2. Moses with the Commandments adresses the Israelites (Deut. 17–27).
3. Moses Places Joshua in Charge (Deut. 31: 7).
4. Moses Ascends Mount Nebo (Deut. 34: 1).
5. and 6. The Burial of Moses (Deut. 34: 6).

Fol. 68v Decorated Initial: (M)*oyses comenca . . .* (5.0 × 6.5 cm).
Fol. 69v Frontispiece to Joshua (21.8 × 13.9 cm).

1. The Lord Orders Joshua to cross the Jordan (Josh. 1: 1–2).
2. Joshua and the Israelites carry the Ark across the Jordan (Josh. 3: 14–17).
3. The Angel of the Lord confronts Joshua near Jericho (Josh. 5: 13–14).
4. The Israelite spies come to the House of Rahab (Josh. 2: 1).
5. and 6. The Conquest of Jericho (Josh. 6: 20–4).

Fol. 70r Decorated Initial: (A)*pres la mort de moysen . . .* (6.0 × 5.0 cm).
Fol. 81r Frontispiece to Judges (22.0 × 14.3 cm).

1. Gideon's Prayer (Judg. 6:14).
2. and 3. The "Sword of Gideon" and the three hundred defeat Midian (Judg. 7).
4. The Sacrifice of Jephtah's Daughter (Judg. 11: 30–40).
5. Delilah Cutting the Hair of Samson (Judg. 16: 19).
6. Samson Felling the Columns of the Temple (Judg. 16: 29–30).

Fol. 81v Decorated Initial: (P)*uis la mort josue . . .* (11.7 × 4.1 cm).
Fol. 120r Frontispiece to 1 Kings (18.3 × 13.8 cm).

1. Hanna is questioned by Eli the priest (I Kings 1: 14).
2. God calls Samuel sleeping in the Temple; He goes to Eli (I Kings 3: 3–5).
3. Saul anointed by Samuel (I Kings 10: 1).
4. David slays Goliath (I Kings 17: 49).
5. Saul's death (I Kings 31: 4).
6. The Philistines cut off Saul's head (I Kings 31: 9).

Fol. 120v Historiated Initial: (U)*n ber fu ia . . .* (King David Standing; 5.0 × 3.0 cm).
Fol. 154v Frontispiece to II Kings (21.7 × 13.7 cm).

1. David is anointed king (II Kings 5: 3).

2. David slays the Philistines in battle (II Kings 5: 25).
3./4. The Ark is brought forth while David and the Israelites play music (II Kings 6: 3–5).
5. and 6. King David rebuked by Nathan (II Kings 12).

Fol. 155r Historiated Initial: (A)*pres la mort Saul* (David receives the news of Saul's death) (5.0 × 4.9 cm).
Fol. 183v Frontispiece to III Kings (21.6 × 14.3 cm).

1. David and Abishag (III Kings 1: 3).
2. David dying, with Nathan and Bathsheba (III Kings 1: 24–31).
3. Solomon rides on David's mule to Gihon (III Kings 1: 38).
4. Solomon is anointed king by Zadok and Nathan (III Kings 1: 39, 45).
5. David's last words to Solomon (III Kings 2: 1–4).
6. The burial of David (III Kings 2: 10).

Fol. 184r Decorated Initial: (D)*avid le rei...* (4.8 × 4.4 cm).
Fol. 220v Frontispiece to IV Kings (21.8 × 14.3 cm).

1. King Ahaziah send messengers to Baalzebub the God of Ekron (IV Kings 1: 2).
2. The messengers meet Elijah on their way (IV Kings 1: 3).
3. Elijah commanded by the captain of fifty to come down (IV Kings 1: 9–10).
4. (Center) A second group of fifty is consumed by fire as Elijah watches (IV Kings 1: 12).
5. Elijah comes and addresses the sick Ahaziah (IV Kings 1: 15–16).
6. Elijah's ascension (IV Kings 2: 11).
7. (Center) Elisha smites the river Jordan with Elijah's mantle (IV Kings 2:14).
8. Elisha mocked by the children of Beth-El and two bears kill forty-two children (IV Kings 2: 23–4).

Fol. 221r Historiated Initial: (C)*il de moab...* (Ahaziah falls from a window of his palace; 5.7 × 4.4 cm).
Fol. 252r Frontispiece to Judith (22.2 × 14.3 cm).

1. The army of Holofernes departs for the kingdoms of the West (Jud. 2).
2. The Israelites of Bethulia (Jud. 7)
3. Judith rebukes the elders, adorns herself, and sets out with her maid to find Holofernes (Jud. 8: 10ff., 10: 10).
4. Judith kneels before Holofernes (Jud. 10: 19–20; 11: 1).
5. Judith slays Holofernes (Jud. 13: 6–10).
6. Judith displays the head of Holofernes to the elders (Jud. 13: 19).

Fol. 252v Decorated Initial: (A)*rphaxat le rei...* (5.6 × 5.5 cm).
Fol. 261r Frontispiece to Esther (15.1 × 15.3 cm).

1. The feast of Ahasuerus: he sends a messenger to the queen (Est. 1: 10–11).
2. Queen Vashti refuses to come (Est. 1: 12).
3. Ahasuerus enthroned holds out his scepter to Esther (Est. 5: 2).
4. (Center) Mordecai's triumph (Est. 6: 11).
5. Haman is hanged (Est. 7: 10).

Fol. 261v Decorated Initial: (A)*utens le rei...* (5.8 × 5.2 cm).
Fol. 269r Frontispiece to Job (15.2 × 13.8 cm).

1. (Center) The Lord and Satan discuss Job (Job 1: 7–12).
2. The First Trial: Sabeans fall on Job's oxen (Job 1: 13ff.).
3. (Center left) The First Trial: Lightening strikes Job's sheep and shepherds (Job 1: 16).
4. (Center right) The First Trial: Chaldeans drive off Job's camels (Job 1: 17).
5. The First Trial: Job's sons and daughters are killed in their house while they were eating and drinking (Job 1: 18–19).
6. Job and his wife (Job 2: 9).
7. Job and his three friends (Job 2: 13).

Fol. 269v Decorated Initial: (U)*n home fu en un terre...* (6.3 × 5.8 cm).
Fol. 296v Frontispiece to Tobit (21.2 × 13.8 cm).

1. Tobit blinded (Tob. 2: 10–12).
2. Tobias instructed by Tobit before setting out on his journey (Tob. 5: 1ff.).
3. Tobias cutting open the fish (Tob. 6: 4–5).
4. The Angel Raphael destroys the evil spirit; Tobias marries (Tob. 7: 12–15, 8: 3).
5. Tobias heals Tobit (Tob. 11: 7–15).
6. The Angel Raphael reveals himself to Tobit and his family (Tob. 12: 11–15).

Fol. 297r Historiated Initial: (T)*obie fu...* (Tobit burying a Jew; 5.9 × 5.6 cm).

Fol. 307v Decorated Initial: (C)*i comencent...* (5.3 × 6.0 cm).
Fol. 332v Frontispiece to Proverbs [2] *Parabola*, (20.9 × 14.0 cm).

1. Solomon enthroned blesses his amanuensis standing at right.

Fol. 333r Historiated Initial: (C)*i comencent...* (4.6 × 5.7 cm).
Fol. 337r Frontispiece to Proverbs [3] *Ecclesiastes* (20.7 × 13.8 cm).

1. Solomon enthroned blesses his amanuensis seated with crossed legs at right.

Fol. 337v Decorated Initial: (C)*i comence...* (4.5 × 4.3 cm).
Fol. 339r Frontispiece to Maccabees (15.1 × 14.1 cm).

1. Antiochus despoils the Temple (1 Macc. 1: 21–5).
2. Mattathias slays the Jew performing a sacrifice (1 Macc. 2: 23–5).
3. The Maccabees in battle (1 Macc. 3, 4, 5ff.)

Fol. 339v Decorated Initial: (Q)*uant li forz...* (5.4 × 6.0 cm).
Fol. 364v Frontispiece to Ruth (21.7 × 14.1 cm).

1. Elimelech and Naomi, followed by Mallon and Chilion, departing outside the city gate of Bethlehem (Ruth 1: 1–2).
2. The two sons of Naomi (center) take wives, at table (Ruth 1: 3–4).
3. Ruth, one of her two daughters in law, follows Naomi back to Bethlehem (Ruth 1: 15–18).
4. Ruth gleans in the fields around Bethlehem (Ruth 2: 3–14).
5. Ruth sleeps at the feet of Boaz (Ruth 3: 7–9).
6. Ruth marries Boaz (Ruth 4: 10).

Fol. 365r Decorated Initial: (E)*s iors dun juge...* (5.7 × 6.2 cm).
Fol. 368v (end)... *ici fenie le livre de ruth la moabitiene.*

448. Robert Branner comments on the king's books and remarks on how few survive, but he did not refer to Arsenal 5211 in his discussion. See R. Branner, *Manuscript Painting in Paris during the Reign of Saint Louis*, Berkeley and Los Angeles, 1977, pp. 4–5.

449. Branner, ibid., p. 4.

450. Branner, ibid., cites the *Eruditio regum et principum* of Guibert de Tournai for this.

451. See nn. 120–2, this chapter.

452. See nn. 55–60, this chapter.

453. See nn. 199–201, this chapter.

454. See n. 196, this chapter.

455. The source of this story is Geoffrey de Beaulieu, "Vita Ludovici Noni...," *Recueil des Historiens des Gaules et de la France*, 20, Paris, 1840, p. 15, as we mentioned in n. 175, this chapter. Weiss (*Art and Crusade*, pp. 208–9) discusses this idea as coming from the time of Louis's incarceration, whereas Riley-Smith ("The Politics of War...," pp. 79–80) emphasizes its linkage with the time just after the Nazareth pilgrimage, so probably in Acre. Riley-Smith thinks of this project as a kind of Library of Congress library that the king wished to have lodged in Sainte Chapelle. My thanks to Jonathan Riley-Smith for his interesting ideas on this issue.

456. Weiss (*Art and Crusade*, p. 209) draws our attention to the study of D. Kimpel and R. Suckale, *L'Architecture Gothique en France: 1130–1270*, Paris, 1990, which tells us what little is known about this building, now destroyed, and establishes the date of this library as *c.*1256.

457. R. Branner, "The Sainte-Chapelle and the *Capella Regis* in the Thirteenth Century," *Gesta*, 10 (1971), pp. 19–22.

458. Since Buchthal published his interpretation of the Arsenal Bible, no one has challenged his attribution outright, and notably various French scholars have accepted the attribution to King Louis IX in a series of exhibition catalogues dealing with the art of Saint Louis and French art. See n. 447, this chapter.

459. Buchthal, *MPLKJ*, p. 97.

460. Folda, *ACHL*, 1, pp. 137–59.

461. Buchthal, *MPLKJ*, p. 97.

462. Weiss, *Art and Crusade*, p. 203.

463. The text of Arsenal MS 5211 is discussed in the first instance by S. Berger, *La Bible Française au Moyen Age: Etude sur les plus anciennes versions de la bible écrites en prose de langue d'oïl*, Paris, 1884, (rpt. Geneva: Slatkine, 1967), pp. 51 ff., 100–8. It is also discussed by Buchthal, *MPLKJ*,

pp. 54, 96–7; by C. A. Robson, "Vernacular Scriptures in France," in *The Cambridge History of the Bible*, vol. 2, ed. G. W. H. Lampe, Cambridge, 1969, pp. 443–5; and Weiss, *Art and Crusade*, p. 104.

464. Berger, *La Bible Française*, p. 100.

465. "Le texte de ce manuscrit est composé d'extraits de la Bible traduits en français et qui nous sont d'ailleurs inconnus, à l'exception des quatre Livres des Rois, qui y sont insérés avec leur commentaire." Berger, *La Bible Française*, p. 101.

466. This codex is Paris, B.N. MS n.acq.fr. 1404, produced in Acre in *c.*1280–1281. See Chapter 7 and J. Folda, *Crusader Manuscript Illumination at St. Jean d'Acre*, Princeton, 1976, pp. 60 ff., 179–80.

467. The longest books are (besides Judges) I–IV Kings, Job, and the first book of Proverbs, titled Wisdom. These books range from twenty-five to forty folios in length. The shortest books are (besides Deuteronomy) Leviticus, Judith, Esther, Tobit, Ruth, and the second and third books of Proverbs, titled Parables and Ecclesiastes. All of these books are ten folios or fewer; several are only three or four folios.

468. See, for example, G. A. Bertin and A. Foulet, "The Book of Judges in Old French Prose: The Gardner A. Sage Library Fragment," *Romania*, 90 (1969), pp. 121–8, as also cited by Weiss, *Art and Crusade*, p. 107, n. 61.

469. L. Light, "French Bibles *c.*1200–30: a new look at the origin of the Paris Bible," *The Early Medieval Bible*, ed. R. Gameson, Cambridge, 1994, pp. 155–76; and see her earlier study, "Versions et révisions du texte biblique," in *Le Moyen Age et le Bible, Bible de tous les temps*, vol. 4, eds. P. Riché and G. Lobrichon, Paris, 1984, pp. 55–93. See also, Branner, *Manuscript Painting in Paris*, pp. 15–21, esp. 16–17.

470. C. A. Robson, "Vernacular Scriptures," pp. 443–4.

471. For a more detailed discussion of this Prologue to Judges and its connection to the Templars, see Weiss, *Art and Crusade*, pp. 110–11; and Folda, *Crusader Manuscript Illumination*, pp. 60–6, the latter with the older literature and the references to earlier published editions of the Prologue by H. Prutz (1888) and the Marquis d'Albon (1913).

472. A question yet to be answered is to what extent the text of Arsenal MS 5211 provides evidence that it was compiled from a set of separate textual exemplars from different books or that its text was selected and copied from a larger preexisting Bible manuscript.

473. Buchthal, *MPLKJ*, p. 97.

474. Berger, *La Bible Française*, p. 101.

475. Buchthal, *MPLKJ*, p. 97, n. 2; S. Berger, *La Bible Française au Moyen-Âge*, Paris, 1884, pp. 51–3, 101, 151; F.-M. Abel, "Le Couvent des Frères Prêcheurs à Saint-Jean d'Acre," *Revue Biblique*, 43 (1934), pp. 265–7. C. R. Sneddon (*A Critical Edition of the Four Gospels in the Thirteenth-Century Old French Translation of the Bible*, D.Phil diss., Oxford University, vol. 1, 1978, pp. 35–41) discusses the activity of the Dominicans and their interest in Bible studies in Paris and in Bible translations in the years from 1235 to 1260, esp. pp. 37–40.

476. See Chapter 7.

477. Buchthal, *MPLKJ*, p. 96, called it "a compilation which is perhaps best described as a condensed form of biblical history," which I agree with, but he also thought the books were "quite arbitrarily selected and arranged," issues I discuss later.

478. B. Metzger and M. Coogan, eds., *The Oxford Companion to the Bible*, Oxford, 1993, p. 726.

479. For Vienna, ÖNB, MS 2554, the earliest Moralized Bible, written in Old French in Paris in the early 1220s, see J. Lowden, *The Making of the Bibles Moralisées*, vol. 1, University Park, 2000, pp. 11–54; G. Guest, *Bible Moralisée*: Codex Vindobonensis 2554, Vienna, Österreichische Nationalbibliotek, London, 1995, pp. 1–144; and Branner, *Manuscript Painting in Paris*, pp. 1–49.

480. For Vienna, ÖNB, MS 1179, the next Moralized Bible in the series of four produced between *c.*1220 and *c.*1240, written in Latin in Paris, *c.*1225, see Lowden, *The Making of the Bibles Moralisées*, 1, pp. 55–94; Guest, *Bible Moralisée*, pp. 1–27; and Branner, *Manuscript Painting in Paris*, pp. 1–49.

481. For Morgan Library, MS 638, a picture book prepared without any text, to which captions were given by later owners, see D. Weiss, *Der Kreuzritter Bibel, The Morgan Crusader Bible, La Bible des Croisades*, New York, 1999, pp. 225–49; and S. C. Cockerell and J. Plummer, *Old Testament Miniatures*, New York, 1969.

482. For the program of the Sainte Chapelle windows, which of course was also without a written textual component, see Jordan, Alyce A., *Visualizing Kingship in the Windows of the Sainte-Chapelle*, Turnhout: Brepols, 2002.

L. Grodecki, *Les Vitraux de Notre-Dame et de la Sainte-Chapelle de Paris, Corpus Vitrearum Medii Aevi*, France, vol. 1, Paris, 1959, pp. 71–332; J.-M. Leniaud and F. Perrot, *La Sainte Chapelle*, Paris, 1991, pp. 120–237; and Weiss, *Art and Crusade*, pp. 44–52.

483. It is worth mentioning for the record that no Latin Vulgate Bible studied by S. Berger corresponds to the order found in MS 5211 either. See the tables in Appendix 1 of his book *Histoire de la Vulgate pendant les premiers siècles du Moyen Age*, Paris, 1893, pp. 331–9.

484. Light, "French Bibles: *c.*1200–30," pp. 159–63; and Weiss, *Art and Crusade*, p. 107.

485. These are thematic sections that I am identifying for the purpose of analyzing this manuscript, not sections that are indicated in the original text or images.

486. Great emphasis is given to the books of Judges and I–IV Kings, which are abridged very little and account for almost half of the text of this codex. See Weiss, *Art and Crusade*, p. 108.

487. For a convenient list of biblical books and prologues in "normal" Vulgate order, according to the Paris Bible, see Branner, *Manuscript Painting in Paris*, pp. 154–5 (Appendix I). Note that Judges and Ruth are omitted but are presumably included as one book with Joshua.

488. I have discussed the issue of the Prologue for the Old French edition of Judges on which the text in this codex is based in Chapter 7; see n. 449.

489. Arsenal MS 5211 is, of course, a sacred book, but the nature of these rubrics and their handling here is quite similar to what we find in the new secular books which will become a major feature of Acre production between 1260 and 1291. See my discussion of the chronicles of William of Tyre's *History of Outremer*, and other secular, nonreligious books later in this chapter. In a certain sense, the Arsenal Bible is being treated like secular history books would be treated shortly thereafter in terms of its production.

490. One might speculate as to whether another volume might have been intended. A second volume to Arsenal 5211 could be conceived as containing the psalter, books of the Prophets, and certain New Testament books. However, in the absence of any clear indication in the extant codex to suggest another volume, in the presence of the coherent programmatic organization of its biblical contents, and in light of the program of its imagery to be seen later, I see no reason to think another volume was planned. It seems more likely that this was a special volume done for the king at a special point in his life. It was a book that could well have been added to his personal books, books such as a psalter and a New Testament that he may have had in his *capella regis*, books that indeed may have been sent to him from Paris to replace other ones he lost on the Crusade.

491. The royal sponsorship of Sainte Chapelle was discussed earlier in this chapter. The royal sponsorship of the two Vienna Moralized Bibles is discussed by Lowden, *The Making of the Bibles Moralisées*, 1, pp. 50–4, 88–94. The case for royal patronage for Morgan MS 638 as a work sponsored by Louis IX in Paris between 1244 and 1254 is made by Weiss, *The Morgan Crusader Bible*, pp. 229–38. See also the fundamental study by H. Stahl, "The Iconographic Sources of the Old Testament Miniatures, Pierpont Morgan Library, M. 638." Ph.D. dissertation, New York University, 1974.

492. The nine are Genesis, fol. 3v; Exodus, fol. 30r; Leviticus, fol. 53r; I Kings, fol. 120r; III Kings, fol. 183v; IV Kings, fol. 220v; Esther, fol. 261r; Job, fol. 269r; and Tobit, fol. 296v.

493. The five are Deuteronomy, fol. 68r; II Kings, fol. 154v; Proverbs, fol. 307r; Parabola, fol. 332v; and Ecclesiastes, fol. 337r.

494. These six consist of Numbers, fol. 54v; Joshua, fol. 69v; Judges, fol. 81r; Judith, fol. 252r; Maccabees, fol. 339r; and Ruth, fol. 364v.

495. Weiss (*Art and Crusade*, pp. 154–86, chapter 7) discusses "Pictorial Language in Crusader Painting," which approaches this question usefully, but rather differently on the basis of the analysis of visual themes. He discusses, for example, "Creation," "The Covenant with the Jews," "Holy War," "Holy Women," "The Mysteries of Faith," "Kingship" (David), and "Kingship" (Solomon). My attempt here is to place the frontispiece imagery more specifically in the historical context of Louis's experience on the Crusade.

496. Weiss, *Art and Crusade*, pp. 154–86, esp. pp. 180–6; and idem, "The Three Solomon Portraits in the Arsenal Old Testament and the Construction of Meaning in Crusader Painting," *Arte Medievali*, 6 (1992), pp. 15–38.

497. Specifically, Solomon wears red imperial robes with the loros, red-purple buskins on his feet, and the Byzantine lobed crown with pearl pendulia on each side. His bench-style backless

throne with a long rounded cushion is also Byzantine, one of several types commonly found.

498. It certainly does not represent Solomon's great gilded ivory throne with lions as described in III Kings 10, but rather evokes a generic royal throne.

499. Weiss, *Art and Crusade*, p. 182.

500. Ibid., pp. 183–5.

501. I say "Arab" here because it is somewhat misleading to say Islamic or Muslim exclusively. The fact is that most of Louis's diplomatic dealings were with Muslim princes, the Mamluks in Cairo and Damascus, for example, but he also was dealing with Christian Arabs in Acre and inside the Latin Kingdom, although we hear rather little about this. But we can nonetheless usefully make a distinction between the cultural world of the Arab Near East and the religious world of the Muslims.

502. This is the *Somme le roi*, a very famous example of which was illustrated by the Parisian painter, Honoré, in 1279. Although different from the Arsenal Bible in its content, its function as a moral and spiritual handbook for a prince seems entirely comparable to MS 5211. Weiss (*Art and Crusade*, pp. 179–80) also mentions some of Louis's Dominican advisors, men such as Vincent of Beauvais, William of Auvergne, and Gilbert of Tournai as writers who emphasized the virtue of kingly wisdom.

503. Weiss, *Art and Crusade*, pp. 81–215.

504. Buchthal, *MPLKJ*, pp. 55–6; Weiss, *Art and Crusade*, pp. 118 and 106, fig. 52.

505. Only two other examples of this iconography are known in the thirteenth century, and both appear in *Histoire Universelle* manuscripts also produced in Acre, apparently copied from this source. See Dijon MS 562 (later in this chapter) and London MS 15268 (Chapter 7).

506. I express my thanks to my colleague Lila Yawn who discussed the Genesis frontispiece with me from the vantage point of her comprehensive work on the Italian giant Bibles. Her comments on the Creation and Adam and Eve–Cain and Abel images enabled me to see some of the points I am citing in the text.

507. The only comparable iconography in a related work is found in the St. Louis Psalter, Paris, B. N. MS lat. 10525, which was done in Paris and dates after Louis returned to France from this Crusade. See Buchthal, *MPLKJ*, p. 56, n. 5; and Weiss, *Art and Crusade*, p. 126.

508. Buchthal, *MPLKJ*, p. 58, Weiss, *Art and Crusade*, pp. 129–34.

509. Leviticus and Numbers have major scenes from Exodus, such as the Worship of the Golden Calf and Moses breaking the Tablets in Leviticus, from Exodus 32, or the Battle of Raphidim in Numbers, from Exodus 17.

510. Buchthal *MPLKJ*, p. 58, Weiss, (*Art and Crusade*, p. 119) calls it the head of an angel of the Lord in the burning bush.

511. Lowden, *The Octateuchs*, p. 31; Weitzmann and Bernabò, *The Byzantine Octateuchs*, pp. 342–3.

512. See, for example, among *Histoire Universelle* mss., Dijon, MS 562; and London, B. L. MS 15268, this chapter and Chapter 7, respectively; the manuscripts of the *History of Outremer*, Paris. B. N. MS fr. 2628, this chapter; and Lyon, MS 828, Chapter 7.

513. Buchthal, *MPLKJ*, p. 60; Weiss, *Art and Crusade*, p. 160–4. Weiss goes into considerable detail in examining the influence of the Moralized Bible imagery on these scenes.

514. Rome, Bibl. Apostolica Vaticana, MS gr. 333, second half of the eleventh century; see Buchthal, *MPLKJ*, p. 60, n. 5, and Weiss, *Art and Crusade*, p. 139.

515. Buchthal, *MPLKJ*, pp. 60–3, Weiss, *Art and Crusade*, pp. 139–40, 169–78.

525. Paris, B. N. MS lat. 11560, fol. 40, top left medallion, reproduced in Weiss, *Art and Crusade*, p. 127, fig. 64.

526. Paris, B. N. MS gr. 139, fol. 1v, reproduced in Weiss, *Art and Crusade*, p. 107, fig. 53.

527. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 189–90; and figs. 21, a thirteenth-century St. Nicholas icon, and 22, a twelfth-century St. Nicholas *Vita* icon, both from the collection of the Monastery of St. Catherine at Mount Sinai.

There is, in fact, a tradition of icons of St. Nicholas all through the thirteenth century, both East and West, that includes this same kind of imagery. In her important article, N. P. Ševčenko ("The *Vita* Icon and the Painter as Hagiographer," *Dumbarton Oaks Papers*, 53 [1999], pp. 152–3, 159–60, and figs. 3 and 20) refers not only to the Byzantine icon on Sinai mentioned earlier, but also the two panels with full-length images of St. Nicholas, one from Apulia, now in Bari from the later thirteenth century (fig. 3), with bust-length images of Christ and the Virgin apparently with an architectural setting that is now mostly lost through damage, and the famous icon of St. Nicholas from Kakopetria, from *c.*1290, now in Nikosia (fig. 20), which has diminutive full-length figures of Christ and the Virgin standing in effect on the arched framework of the title saint. See also my discussion of this latter icon, J. Folda, "Crusader Art in the Kingdom of Cyprus, *c.*1275–1291: Reflections on the State of the Question," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 216–21 and fig. 6.

528. Copenhagen, Royal Library, Gl. Kongl. Saml. MS 6, fol. 83v, reproduced in Weiss, *Art and Crusade*, p. 142, fig. 78.

529. One might suggest that it could be a reference to the news of the death of Frederick II in December 1250, but that is an event that probably occurred too late to be reflected in this codex. Furthermore, Frederick II was not a person even someone so charitable as Louis would likely to be inclined to mourn personally, it must be admitted.

530. Buchthal, *MPLKJ*, p. 65. It is possible that the decorated initials may have been designed by the master but actually carried out by an assistant. For one thing there are so many painted small initials, one would think the main master would need assistance. Second, the initials, although purely French, are quite simplified in their ornament, very different from the striking ornamental repertory of the panels that seem derived in part from stained glass patterns. Third, a few of the small initials have the heads of figures in them, and they, too, are somewhat simplified versions of the painted figures in the main frontispieces; cf. fols. 73v and 74r.

531. For purposes of observation of the features mentioned in the following discussion, I suggest looking at a selection of six frontispieces chosen from the twenty that give a representative sample of the formal characteristics of this painters style. These frontispieces are Genesis, Deuteronomy, the three books of Proverbs, and Ruth.

532. White highlights can also be seen on trees and bushes, as well as on horses and other animals.

533. The two notable exceptions are the angels behind David in the II Kings frontispiece and the reclining figure of King Ahaziah in the IV Kings frontispiece.

534. Buchthal, *MPLKJ*, p. 66.

535. Ibid.

536. For the literature on Perugia, Biblioteca Capitolare, MS 6, see the basic studies of G. Muzzioli, entry on the Perugia Missal, *Mostra Storica Nazionale della Miniatura*, 2nd edn., Florence, 1954, p. 114, no. 157; H. Buchthal, *MPLKJ*, pp. xxxii, 48–51, 97 n. 2, 108, 110–21, 144–5, pls. 57a, 58, 59a; and A. Caleca, "Il Messale di S. Giovanni d'Acri (ms. 6)," in *Miniature in Umbria*, I, *La Biblioteca Capitolare di Perugia* (Florence, 1969), pp. 79–82, 169–71, 301–3, pl. IX, and pp. 397 bis-404, with older bibliography. There are two reviews of Buchthal's book that discuss the Perugia Missal, by H. Bober, in the *Art Bulletin*, 43 (1961), p. 67; and L. M. J. Delaissé, in *Scriptorium*, 16 (1962), pp. 350–2.

Since 1957 see also E. B. Garrison, *Studies in the History of Medieval Italian Painting*, IV, Florence, 1960–2, pp. 214, 415; S. Bettini, "Le Miniature dell'Epistolario di Giovanni da Gaibana nella storia della pittura Veneziana del Duecento," *L'Epistolario Miniato di Giovanni da Gaibana*, eds. C. Bellinati and S. Bettini, vol. 2, Vicenza, 1968, p. 102; K. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 180–1; T. S. R. Boase, "B. Mosaic, Painting and Minor Arts," *A History of the Crusades*, ed. K. M. Setton, vol. 4, *The Art and Architecture of the Crusader States*, ed. H. W. Hazard, Madison, 1977), pp. 130–2; J. Folda, "Crusader Painting in the 13th Century: The State of the Question," *Il Medio Oriente e l'Occidente nell'Arte del XIII Secolo*, ed. H. Belting, Bologna, 1982, pp. 109–10; the important article of V. Pace, "Italy and the Holy Land: Import-Export. I. The Case of Venice," *The Meeting of Two Worlds*, eds. V. Goss and C. V. Bornstein, Kalamazoo, 1986, pp. 334–6; T. Carratù, "Venise et la Langue Franque," in *Les Croisades: L'Orient et L'Occident d'Urbain II à Saint Louis, 1096–1270*," ed. M. Rey-Delqué, Milan, 1997, pp. 306–13; L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, III Colloquio Internazionale Medioevo Romanzo e Orientale, Rubbettino, 1999, p. 89. This manuscript has been studied most recently by Cristina Dondi in a 2000 doctoral dissertation at King's College, London, titled, *The Liturgy of the Holy Sepulchre of Jerusalem (XII–XVI Centuries): with special reference to the practice of the Orders of the Temple an St John of Jerusalem*, pp. 73–4, cat. No. 1.8.

The main content/decoration of this Missal, Perugia, Biblioteca Capitolare, MS 6, is as follows (figs. 149–51, CD nos. 72–9)

Missal in Latin.
467 folios, dimensions (with variations): 30.1/30.2 × 20.1/21.8 cm.
Written in two columns of 27 lines each, justification (with variations): 20.5/21 × 12.4/13.5 cm.
Two panel miniatures: one full-page panel, one half-page frontispiece.
Four historiated initials and a number of decorated initials.

Fol. 1r–6v: Calendar.

7r: *regulares ad lunam . . . ; epacti . . .*
8r-462v: Missal, Proprium de tempore, with:
176r, litany
180r, *Incipiunt prefationes totius anni.* Historiated initial: (V)*ere dignum* . . . (Nativity, 4.8 × 4.6 cm).
182v, Historiated initial: (P)*er omnia secula* . . . (Priest celebrating Mass, 6.6 × 6.5 cm, 16.2 cm maximum height). Decorated initial: (V)*ere dignum* . . . (4.5 × 5.6 cm). Canon:
183v, Full-page miniature: Crucifixion (19.9 × 12.8 cm).
184r, Panel headpiece with historiated initial, (T)*e igitur* . . . (Bust-length Christ Pantocrator in a medallion between two worshipping angels, 9.5 × 12.7 cm).
186r, Historiated initial: (P)*er omnia secula* . . . (Priest celebrating Mass, 5.6 × 6.0 cm, 16.7 maximum height).
188r, *In die sancto pasche*. Historiated initial: (R)*esurrexi* . . . (Christ raised up in his tomb (above), Three Holy Women visit the tomb finding only the angel, 6.9 × 5.7 cm). Decorated initial: (D)*eus* . . . (5.0 × 2.5 cm).
310r, *Proprium sanctorum.*
462v, End: *Fide(s) tua te salva(m) fecit vade i(n) pace.*
463 – 466v, later texts with prayers, and blank sheets on 464r, 465v and 466v.

537. F. Wormald, "The Calendars of the Church of the Holy Sepulcher, Jerusalem," in Buchthal, *MPLKJ*, p. 111. The earlier twelfth-century manuscripts from the scriptorium of the Holy Sepulcher in Jerusalem refer to this feast as the "*Purificatio sancte marie.*"

538. Buchthal, *MPLKJ*, pp. 48–51.

539. The Ryerson Diptych is now in Chicago, Art Institute, cat. E22630; each wing measures 38.0 × 29.5 cm. See Buchthal, *MPLKJ*, pp. 48f., 51; and the basic publication is by E. B. Garrison, *Italian Romanesque Panel Painting*, Florence, 1949, p. 97, no. 241, with the older bibliography.

540. Buchthal, *MPLKJ*, pp. 51, 145.

541. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 180–1.

542. C. L. Striker, "Fresco Cycle of the Life of St. Francis of Assisi," *Kalenderhane in Istanbul*, eds. C. L. Striker and Y. D. Kuban, Mainz, 1997, pp. 128–42.

543. Compare the decorative design on the stem of the "T" to the ornament in the Judges frontispiece of the Arsenal Bible.

544. Buchthal, *MPLKJ*, p. 51.

545. This is problematic in the case of the Ryerson Diptych because its artist seems to have had an Italian background for his training, and there is nothing evidently Italian about the Perugia Missal panels, which were done by a Crusader artist of French Gothic background.

This is particularly puzzling in the latter case because on the one hand Buchthal calls the Arsenal Bible master "a superior artisan, a master of his craft doing work of great originality" (*MPLKJ*, p. 66), whereas the second Perugia Missal painter is of "mediocre artistic quality" even though his work is "individual and distinctive in style" (*MPLKJ*, p. 51).

546. Buchthal's interpretation of the first Perugia Missal painter as Italian led to claims that were consistently controversial. We can recognize this painter's true French background today as the result of the identification of additional Crusader works of painting, works Buchthal himself could not know in 1957. That is not to say that there is not a significant Venetian tradition in the painting of Acre. We examine this mainly in terms of panel painting, including the Ryerson Diptych, later. But neither the Perugia Missal nor the later missal in the British Museum, Egerton MS 3153, are part of that Venetian tradition as Buchthal claimed: idem, *MPLKJ*, pp. 48–51, 97.

547. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 180–1.

548. Icon in the Monastery of St. Catherine's on Mount Sinai: 28.2 × 21.6 cm., published by G. and M. Sotiriou, *Icones de Mont Sinaï*, vol. I, Athens, 1956, fig. 64, vol. II, Athens, 1958, pp. 78–9. See the color reproduction published by K. Weitzmann, *The Icon*, [8 (1978)], pp. 90–1, pl. 26. This feast icon from St. Catherine's on Mount Sinai reflects the refined and slightly mannered style of Constantinople in the late Comnenian period and should be dated no later than *c.*1200, according to Weitzmann.

549. Icon in the Monastery of St. Catherine's on Mount Sinai: 37.2 × 26.6 cm. See K. Weitzmann, "The Icons of the Period of the Crusades," *The Icon*, [11 (1982)], p. 202, and the color reproduction on p. 211.

550. Buchthal, *MPLKJ*, p. 49 and n. 5.

551. The shape of the cross is only slightly different: In the Perugia Missal miniature the *titulus* forms the top of the cross, whereas in the other two the vertical member extends above it. The *suppedaneum* is however similarly shaped, and proportioned, blocky and thick, in all three cases.

552. The image of the dead Christ as "the King of Glory" is, of course, a standard Byzantine iconographic type, comparable to the "Man of Sorrows" in Western medieval art, but it is a title not usually given to a figure of the crucified Christ, and it is not usually positioned as an inscription between the letters of the name of Jesus, IC XC, as here. On the iconography of the "King of Glory" in Byzantine art, see the article of P. Hetherington, "Who Is This King of Glory? The Byzantine Enamels of an Icon Frame and Revetment in Jerusalem," *Zeitschrift für Kunstgeschichte*, 53 (1990), pp. 25–38. This extraordinary work may have been done for Theodora, niece of Emperor Manuel Comnenus, who married Baldwin III, the Latin king of Jerusalem in 1158, before it later came into the hands of the Georgians at the Monastery of the Holy Cross.

553. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 180.

554. Ibid.

555. The Ryerson Diptych Crucifixion differs both iconographically and stylistically from the examples we have been discussing. The pose of the Virgin is obviously different from the two Crusader examples, although her maphorion does have a slight downward point from the head on the right side. John's pose is in fact more similar to the Crusader examples although the placement of the little finger is much less emphatic. The costumes of Mary and John are here, however, very dark blue. Above the angels are different in pose although sharing the expression of grief more than we see on the Byantine icon. The cross of Christ is totally dark, with no beveling, and it has an unusual brilliant red *titulus*. The figure of Christ, slender and attenuated, is painted with striking patterns of linear white highlights, not found on any of the earlier three paintings. Finally note that the haloes of all the figures on the Ryerson Diptych are done with raised gesso patterns, a favorite Crusader technique seen in panel painting in the second half of the century, but, as we have seen, not shared by the three examples discussed earlier. It is with these characteristics in mind, among others that the artist of the Ryerson Diptych can be considered a Venetian-trained Crusader painter who may have been working between 1260 and 1275 in Acre. I discuss this later in the context of other Crusader icon painting from Acre.

556. See Chapter 3, nn. 369–76.

557. One gesture of St. John is of special interest. His hand on the right side hangs down as it does in the later examples, but it firmly grasps his drapery. In the later Crusader Crucifixions,

this hand hangs limply open, seemingly having lost its original function.

558. See Chapter 5, nn. 625–9.

559. Icons from the collection of the Monastery of St. Catherine's on Mount Sinai: Christ (App. no. 16/110, Fig. 128 [ch. 5]), the Virgin (App. no. 15/109, Fig. 129 [ch. 5]), and St. John the Baptist (App. no. 45/470, Fig. 131 [ch. 5]), all unpublished. It is not certain that these three panels went together to form a set, as it were, but their formal characteristics are quite similar.

560. For the final report on the architecture of this building and the St. Francis frescoes, see C. L. Striker and Y. D. Kuban, eds., *Kalenderhane in Istanbul: The Buildings, Their History, Architecture, and Decoration*, Final Reports on the Archaeological Exploration and Restoration at Kalenderhane Camii 1966–1978, Mainz, 1977, especially pp. 82–3 (Francis Chapel), and pp. 128–42 (Fresco Cycle of the Life of St. Francis of Assisi). Finally, I acknowledge my debt to Ellen Winsor, whose careful inquiry into these frescoes and the identification of their location in Constantinople has provided important new material for evaluating them and Crusader painting in the Latin Empire of Constantinople. See E. Winsor, "Preaching to Byzantium: Constantinople, the Friars Minor and the Latin Empire; Reconsidering the Frescos at Kalenderhane Camii," M.A. thesis, University of North Carolina, Chapel Hill, 2002.

561. See the useful reconstruction sketch: *Kalenderhane in Istanbul*, p. 129, fig. 70.

562. "O Lord, I love the habitation of thy house and the place where thy glory dwells."

563. The "*Lavabo*" prayer is quite old in the liturgy, attested in Carolingian times. See J. Jungmann, *The Mass of the Roman Rite*, trans. F. A. Brunner, vol. 2, New York 1955, pp. 76–82. This particular ritual hand-washing was missing at this point in the Byzantine liturgy. I am quoting the prayer from a modern missal (*The Missal*, Westminster, MD, 1959) being the text of the Missale Romanum. The modern version includes verses 6–12 of Psalm 25, but in the thirteenth century, only verse 6, the verse on the arch, was recited from this Psalm.

564. K. Krüger, *Der frühe Bildkult des Franziskus in Italien*, Berlin, 1992, pp. 30–42, 195–8, cat. nos. 2 and 3.

565. Striker ("Fresco cycle," *Kalenderhane in Istanbul*, pp. 130–8) contains detailed analyses of the extant fragments and the identifiable scenes, with a composite sketch and numbered scene locations in figs. 71 and 72 (p. 130). E. Winsor ("Preaching to Byzantium," pp. 17–34) argues that two additional scenes can be identified with reasonable probability. According to Winsor (p. 34) the identifications can be characterized as follows:

Scene 1 may have depicted a miracle scene, but we do not know which one.
Scene 2 was very likely the "Appearance at Arles" or a similar preaching episode.
Scene 3 probably represents the "Blind Woman at Narni."
Scene 4 depicts another miracle, unidentified.
Scene 5 is "St. Francis Preaching to the Birds."
Scene 6 could be the Ecstasy of St. Francis, but it is not clearly identifiable.
Scene 7 cannot be identified.
Scene 8 depicts another miracle scene most likely, again not identifiable.

566. Striker, "Fresco cycle," *Kalenderhane in Istanbul*, p. 142.

567. Ibid.

568. C. L. Striker, "Crusader Paintings in Constantinople: The Findings at Kalenderhane Camii," *Il Medio Oriente e l'Occidente nell'Arte del XIII Secolo*, Bologna, 1982, p. 120.

569. Weitzmann, "Thirteenth Century Crusader Icons" [1 (1963)], pp. 189–90. I have more to say about this important triptych later.

570. Striker, "Crusader Paintings in Constantinople," *Il Medio Oriente*, p. 120.

571. Striker, "Fresco cycle," *Kalenderhane in Istanbul*, p. 142.

572. Ibid., pp. 132, fig. 75, pl. 157; 133, fig. 77, pl. 158; and 137, fig. 82D and 82E, pl. 170.

573. Ibid., pp. 132, fig. 75, pl. 157, and certain other uncontextualized hand fragments not published in the final report. I am indebted to Dr. Striker for sharing a liberal selection of slides of these fragments for my use in formulating this discussion.

574. Striker, "Fresco cycle," *Kalenderhane in Istanbul*, p. 136, fig. 82F, and pl. 166.

575. Ibid., pp. 136–7, figs. 82G and 82H, pl. 167; and 82A (St. Francis), pl. 168.

576. Icon from the Monastery of St. Catherine's on Mount Sinai: App. no. 5/44, Fig. 180. H. Belting published a detail of this icon in his "Introduction," *Il Medio Oriente e l'Occidente nell'Arte del XIII secolo*, Bologna, 1982, p. 2.

577. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 190. Another icon which exhibits formal parallels to this vigorous highlighted drapery style is a panel containing the Deësis with the Twelve Apostles. See Weitzmann, "Four Icons on Mount Sinai," [5 (1972)], pp. 279–86.

578. The literature on London, British Library, Egerton MS 3153, is found in Buchthal, *MPLKJ*, pp. 51, 137, and 145; *The British Museum Catalogue of Additions to the Manuscripts: 1936–1945*, London, 1970, pp. 341–3; and C. Dondi, *The Liturgy of the Holy Sepulchre of Jerusalem (XII–XVI Centuries): With Special Reference to the Practice of the Orders of the Temple and St. John of Jerusalem*, Ph.D. diss., King's College, London, 2000, pp. 86–7, and cat. 1.15.

The main content/decoration of this missal, London, British Library Egerton MS 3153, is as follows:

Missal in Latin.
192 fols. 23.0 × 17.0 cm.
Gatherings of eight folios.
Thirty-six lines in two columns, except for the Preface and Canon, which have nineteen lines.

One full-page panel miniature, numerous decorated initials; most of the paintings are badly damaged.
Fol. 1–7v: Calendar.

8r: *Proprium de tempore.*
Ad te levavi (Two initials are cut out).
81v: Decorated Initial: (V)*espere autem sabbati.*
82v: Decorated Initial: (P)*er omnia secula.*
82v: Decorated Initial: (V)*ere dignum.*
83r: Full-page miniature panel: Crucifixion (15.7 × 10.7 cm.).
83v: Decorated Initial: (T)*e igitur.*
87r: *Resurrexi et adhuc tecum sum.* (Two initials are cut out).
192r: (end) . . . *casta prudens et fidelis imperare nobis velis gaudia perpetua.*

579. Wormald, "Palaeographical Note," *MPLKJ*, p. 137.

580. Dondi, *The Liturgy of the Holy Sepulchre of Jerusalem*, King's College, London, Ph.D. diss., pp. 86–7.

581. The literature on the Padua manuscript of Old Testament selections is found in A. Barzon, *Codici miniati della Biblioteca Capitolare di Padova*, Padua, 1950, no. 35, pp. 34–5, pl. xxxviii a and b; and Buchthal, *MPLKJ*, pp. 51–4, 57, 65–6, 78, 81, 95, 145–6. There is also a handwritten catalogue with an entry on this codex as follows: D. D. F. com. Maldura, *Index codicum manuscriptorum qui in bibliotheca Reverendissimi Capituli Cathedralis ecclesiae Patavinae asservantur*, Padua, 1830, pp. 111–12.

The main content/decoration of the Padua book of Old Testament selections is as follows (Fig. 154, CD nos. 81–105):

Old Testament selections in Latin.
363 fols., 39.7 × 27.7 cm, with the interior text block: 21.5 × 6.2 cm, and the full text area with rulings for the surrounding gloss: 28.0 × 17.2 cm, but these ruling dimensions can vary. The rulings are complex to accommodate the small script of the gloss that surrounds the main text and the main text in the center of each folio, the script of which is twice as large as the script of the gloss.
Gatherings of twelve folios mostly.
Main text in twenty-two lines in one column, the surrounding gloss is in fifty-seven lines, but the number of lines can vary.
Twenty-three historiated initials: at the start of the eight parts of the Psalter, and the beginning of the other books, and numerous decorated initials in the text, beginning the gloss for each psalm and book chapter (small painted initials are typically in the range of 2.0 × 2.0 to 3.2 × 3.2 cm in size).

Fol. 1r–v: blank
Psalter:

2r: Psalm 1: Historiated initial (B)*eatus vir* (David playing the psalter; David slaying Goliath; 6.9 × 6.5, with tail flourish 22.1 cm).

28r: Psalm 26: Historiated initial (D)*ominus illuminatio* (David praying to the Lord, with group of three men; 5.8 × 6.3 cm).

41r: Psalm 38: Historiated initial (D)*ixi custodiam* (Seated David with scepter addressing two standing men; 5.0 × 4.9 cm).

53r: Psalm 52: Historiated initial (D)*ixit insipiens* (Seated David, crowned and enthroned with scroll, addressed by standing male youth; 5.9 × 6.1 cm).

66v: Psalm 68: Historiated initial (S)*alvum me fac* (Kneeling David between two demons, all holding scrolls, with a bust of the Lord above; 6.5 × 5.1, with tail flourish 22.0 cm).

81v: Psalm 80: Historiated initial (E)*xultate deo* (Seated king David playing chimes, with two monks looking on; 5.2 × 4.7 cm).

95r: Psalm 97: Historiated initial (C)*antate domino* (King David seated, holding scepter, with leg crossed, with open book on lectern and two priests standing in front; 5.0 × 5.3 cm).

109r: Psalm 109: Historiated initial (D)*ixit dominus* (Christ with his wounds seated holding open book, with God the Father seated, blessing, holding cross; 6.0 × 6.2 cm).

Prophets:

150r: Book of Daniel: Historiated initial (A)*nno tertio* (Daniel in cave with his hands on the heads of two lions; 6.7 × 6.0 cm).

190r: Book of Hosea: Historiated initial (V)*erbum domini* (Hosea and the courtesan; 4.9 × 4.6 cm).

209v: Book of Joel: Historiated initial (V)*erbum domini* (Joel addresses three young men standing before him; 4.95 × 4.6 cm).

216v: Book of Amos: Historiated initial (V)*erba amos* (Amos addresses three men standing before him wearing pointed caps; 3.9 × 4.4 cm).

230r: Book of Obadiah: Historiated initial (V)*isio abdie* (Sleeping Obadiah is addressed by Christ standing by his bed; 5.6 × 5.4 cm).

232v: Book of Jonah: Historiated initial (E)*t factum est* (Jonah is spewed out of the mouth of the fish; 5.2 × 4.7 cm).

236v: Book of Micah: Historiated initial (V)*erbum domini* (Micah seated is addressing a group of five standing men; 5.9 × 5.4 cm).

246r: Book of Nahum: Historiated initial (O)*nus ninive* (Nahum stands in front of the crumbling walls of the city; 4.4 × 4.4 cm).

252r: Book of Habakkuk: Historiated initial (O)*nus quod* (Habakkuk, beardless and standing holding a scroll, addresses a group of four young men; 4.5 × 4.5 cm).

257v: Book of Zephaniah: Historiated initial (V)*erbum domini* (Zephaniah as a shepherd in the hills with his flock addressed by Christ; 5.1 × 4.9 cm).

263r: Book of Haggai: Historiated initial (I)*n anno secundo* (Haggai below addresses the seated King Zerubbabel above; 11.1 × 2.6 cm).

267r: Book of Zachariah: Historiated initial (I)*n mense octavo* (Zachariah below addressing a king above; 9.7 × 2.3 cm).

287r: Book of Malachi: Historiated initial (O)*nus verbi* (Malachi standing at right is addressed by an angel; 5.0 × 4.8 cm).

Maccabees:

295r: First Book of Maccabees: Historiated initial (E)*t factum est* (Mattathias slaying the renegade Jew who is making an offering to two idols; 6.0 × 5.5 cm).

338v: Second Book of Maccabees: Historiated initial (F)*ratribus qui sunt* (A kneeling messenger delivers the letter from Jerusalem to the Jews of Egypt; 7.0 × 6.0, with a tail flourish 22.1 cm).

363r: "*expliciunt libri machabeorum.*"

Loenertz, "Les Etablissements Dominicains de Péra-Constantinople," *Echos d'Orient*, 34 (1935), pp. 334–5, reprinted in idem, *Byzantina et Franco-Graeca*, Storia e letteratura, Raccolta di Studi e Testi, 118, Rome, 1970, pp. 211–12.

593. A. Berger, "Kalenderhane in the Latin Period," trans. C. L. Striker, *Kalenderhane in Istanbul*, pp. 16–17. Berger notes that "The Franciscan and Dominican orders were founded shortly after one another, their founders were friends, and they were supported by the same popes. Moreover their members worked with one another, for example, in the embassy to the court of Nicaea sent by Gregory IX [in 1234]. Although unlikely at a later date or in the West, a Franciscan decoration in a Dominican establishment for this time and place cannot be excluded from consideration." On the Dominicans and Franciscans in the Latin East, see B. Altaner, *Die Dominikanermission des 13. Jahrhunderts*, Habelschwerdt, 1924; F.-M. Abel, "Le Couvent des Frères Prêcheurs à Saint-Jean d'Acre," *Revue Biblique*, 43 (1934), pp. 265–84; G. Matteucci, *La Missione Francescana di Constantinopoli*, 2 vols., Rome, 1971, 1975, especially vol. 1, pp. 1–108; and G. Governanti, *I Francescani in Acri*, Jerusalem, 1958, pp. 18–43. For the argument proposing a Franciscan identification of this church during the Latin Empire, see now Winsor, "Preaching to Byzantium," pp. 8–16.

599. Weitzmann, "Introduction," *Studies in the Arts at Sinai*, [12 (1982)], p. ix.

600. Consider the corpus of Western-influenced icons now in the collection of the Monastery of St. Catherine on Mount Sinai as presented in the handlist contained in the Appendix.

601. In cataloguing the icons at Sinai, Weitzmann identified this group of "more than one hundred and twenty icons" in the collection as "the product of Latin artists" (Weitzmann, "Introduction," *Studies in the Arts at Sinai*, [12 (1982)], p. ix), but he has also identified another significant group of icons in different styles with Arabic inscriptions, most of which have yet to be published and which may also have important relationships with the icons and the icon painters who painted the "Crusader" panels with Latin and/or Greek inscriptions.

602. Weitzmann discusses the uses of icons for the Church of St. Catherine and its chapels. See K. Weitzmann, "Icon Programs," [15 (1986)], pp. 63–116.

603. Folda, *The Art of the Crusaders in the Holy Land, 1098–1187*, pp. 94–5, 456–8.

604. Ibid., pp. 406–7, and see our earlier discussion of icon painting in Chapter 5 of this volume.

605. On the introduction of the altarpiece in Italy and its function in the Latin West, see K. van der Ploeg, "How Liturgical Is a Medieval Altarpiece?" *Italian Panel Painting of the Duecento and Trecento*, ed. V. M. Schmidt, *Studies in the History of Art*, 61 (2002), pp. 103–21, esp. 108–9.

606. K. Weitzmann, *Illustrated Manuscripts at St. Catherine's Monastery on Mount Sinai*, Collegeville, MN, 1973, p. 26.

607. Ibid., pp. 24–5.

608. Ibid., pp. 25–6.

609. Without having examined this manuscript and this image firsthand, I must say that from the published photo, the "rolling-eye" convention in MS 1216 seems rather different from the pop-eyed effect achieved in the Arsenal Bible (cf. Weitzmann, *Illustrated Manuscripts at St. Catherine's Monastery on Mount Sinai*, p. 25).

610. See V. N. Beneševitch, *Catalogus codicum manuscriptorum graecorum, qui in monasterio Sanctae Catherinae in monte Sina asservantur*, vol. 1, St. Petersburg, 1911, p. 171.

611. J. Lafontaine-Dosogne, "Le Monastère du Sinaï, Creuset de Culture Chrétienne (Xe–XIIIe siècle)," *East and West in the Crusader States*, ed. K. Ciggaar et al., *Orientalia Lovaniensa Analecta*, 75, Louvain, 1996, p. 117; Weitzmann, "Icon Programs," [15 (1986)], p. 81; idem, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 200–1, and L. Eckenstein, *A History of Sinai*, London, 1921, pp. 167–9.

612. See nn. 401–2.

613. J. Folda, *Crusader Manuscript Illumination at Saint-Jean d'Acre, 1275–1291*, Princeton, 1976, pp. 159–61.

614. A. Grabois has discussed the variety of texts produced in Acre in the second half of the thirteenth century ("La Bibliothèque du noble d'Outremer à Acre dans la seconde moitié du XIIIe siècle," *Le Moyen Age*, 103 [1997], pp. 56–61), and he also discusses works of interest to the aristocracy in Acre for which no example survives in the East (ibid., pp. 61–6).

No archaeological evidence has surfaced as yet to help locate where the painters and parchmenters may have worked in Acre. Cf. A. Boas, *Crusader Archaeology*, London and New York, 1999, pp. 214–15. Clearly some other scholars have also contemplated multiple workshops in Acre, especially L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale il Viaggio dei Testi*, III Colloquio Internazionale, Medioevo Romanzo e Orientale, Rubbettino, 1999, pp. 88–96. Clearly the idea of a single resident workshop must be revised and a more complex paradigm developed (Folda, *Crusader Manuscript Illumination at Saint-Jean d'Acre*, pp. 21–6). Surely the interest that notably K. Ciggaar is giving daily life in the Crusader States is one approach that holds the promise of interesting new information on manuscript production, painting, and commerce ("Glimpses of Life in Outremer in *Exempla* and *Miracula*," *East and West in the Crusader States*, eds. K. Ciggaar and H. Teule, *Orientalia Lovaniensia Analecta*, 92, Louvain, 1999, pp. 131–52).

616. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 181.

617. Ibid., p. 182.

618. We must allow for the possibility that a Western artist could come to the Holy Land to live and work, where his style could change and develop over time. This might be possible in a younger artist, but in an artist whose Western style was already formulated and established, it appears to be unlikely. The main example we have for this phenomenon is in the person of the artist I have called the Hospitaller Master. See my discussion of the Hospitaller Master, who came from Paris in the late 1270s and worked in Acre for twelve years (Folda, *Crusader Manuscript Illumination*, pp. 42–116). I discuss this painter again in Chapter 7 and revise both the name we use to identify him and our estimate of his work and reputation in Paris before he comes to Acre.

619. See my discussion in Chapter 3 (nn. 397 ff.) for the Freiburg Leaf. For the Wolfenbüttel Sketchbook, it is Weitzmann who suggests the idea of a Crusader artist, one who traveled to Constantinople during the Latin occupation, but this idea is one which Buchthal in his monograph does not follow, identifying the artist as Venetian and finding his sources from a much more complex array of models. See Weitzmann, "Icon Painting," 3 (1966), pp. 76–7, and Buchthal, *The "Musterbuch" of Wolfenbüttel and Its Position in the Art of the Thirteenth Century*, Vienna, 1979. For the Halberstadt Cabinet, see Weitzmann, "Die Malerei des Halberstädter Schrankes und ihre Beziehung zum Osten," 9 (1978), pp. 258–82.

620. Folda, *Crusader Manuscript Illumination*, pp. 42–116. This artist was formerly known as the "Hospitaller Master" who we are now proposing to call the "Paris–Acre Master." See discussion in Chapter 7.

621. Pace, "Italy and the Holy Land: Import–Export, 1. The Case of Venice," *The Meeting of Two Worlds*, p. 334.

624. Weitzmann, "Icon Programs," [15 (1986)], p. 115.

625. The Acre Triptych in the collection of the Monastery of St. Catherine's on Mount Sinai measures 56.8 × 47.5 cm for the central panel. This triptych is published by Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 185–90; idem, "Icon Painting" [3 (1966)], pp. 56–61, reprinted in idem, *Studies in the Arts at Sinai* [12 (1982)], pp. 291–386, with "Annotation," pp. 432–6; and idem, *The Icon*, [11 (1982)], pp. 202–3, 206, 215–16, 233.

626. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 186–7.

627. See, for example, the Bargello Madonna and Child with Passion Scenes, *c.*1260s, or the panels of the Magdalen Master now in Paris, *c.*1260s, or in Florence, illustrated by A. Derbes, *Picturing the Passion in Late Medieval Italy*, Cambridge, 1996, pp. 3, 4. No French panels survive this early to give us an indication of whether there were French Gothic altarpieces of relevance here.

628. In Duccio's version of this scene in the much later Maestà, 1308–11, the composition is completely different but the strong psychological link between Jesus and his mother, Mary, is clearly the same. Careful study indicates that examples like this seem to accumulate and tend to bear out V. Pace's contention that in terms of import–export issues, Italy imported certain artistic ideas from the Crusader East as well as Byzantium and possibly the Latin Empire, thus complicating the whole phenomenon referred to generally as the *maniera graeca*. On the phenomenon of the *maniera graeca*, see, for example, J. Stubblebine, "Byzantine Influence in Thirteenth Century Italian Panel Painting," *Dumbarton Oaks Papers*, 20 (1966), pp. 87–101; and K. Weitzmann, "Crusader Icons and *Maniera Greca* [14 (1984)], pp. 143–70.

629. Again this scene has slightly later Italian parallels with the tender embrace and the demonstrative grieving, leading to the dramatic, and famous, scene of the Lamentation by Giotto in the Arena Chapel, *c.*1306.

630. Weitzmann, "Thirteenth Century Crusader Icons" [1 (1963)], p. 188.

631. Ibid. cites the famous apse mosaic in the church of St. Maria in Trastevere, in Rome from *c.*1140.

632. P. Verdier, *Le Couronnement de la Vierge: Les origines et les premiers développements d'un thème iconographique*, Montréal and Paris, 1980, pp. 17–47.

633. See, for example, the gable fragment by Guido da Siena, now in London, cited by Weitzmann and published by G. Coor-Achenbach, "The Earliest Italian Representation of the Coronation of the Virgin," *Burlington Magazine*, 99 (1957), p. 328. See also the stained-glass oculus window in the wall of the apse of the Siena cathedral, attributed to Duccio between 1285 and 1308. These examples are all discussed by Verdier, *Le Couronnement de la Vierge*, pp. 153–8.

634. H. Belting, "The New Role of Narrative in Public Painting of the Trecento: *Historia* and Allegory," *Pictorial Narrative in Antiquity and the Middle Ages*, eds. H. Kessler and M. S. Simpson, *Studies in the History of Art*, 16 (1985), p. 152.

635. A. Derbes, *Picturing the Passion in Late Medieval Italy*, p. 2.

636. The linear conventions of dealing with the eyes are widespread and start to be found in Italy as well as the Holy Land as we move to the late 1250s and the early 1260s. Compare, for example, the version of this convention in the Gaibana Epistolary, dated 1259 (cf. Bellinati and Bettini, *L'Epistolario Miniato di Giovanni da Gaibana*, vol. 1, fols. 2v, 19v, etc.) or the Madonna and Child from the Church of Santa Sofia in Padua, dating from the second half of the thirteenth century (ibid., vol. 2, fig. 9).

637. I refer here to the Perugia Missal, the Arsenal Bible, and the Crucifixion icon, all dating *c.*1250.

638. Weitzmann drew this comparison when he first published the central panel ("Thirteenth Century Crusader Icons" [1 (1963)], p. 186), but he qualifies this in his "Annotation" (*Studies in the Arts in Sinai*, [12 (1982)], p. 433) to say this was probably the very icon on which the Crusader artist was modeling his work.

639. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)] p. 186.

640. The angels' drapery seems problematic because of its lack of precision as to what garments they are wearing and to what extent they may have been repainted. The problem of repainting on this central panel is a major issue that must be resolved with careful examination of the original.

641. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 185–6.

642. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], pp. 69–71.

643. V. Pace, "Italy and the Holy Land: Import-Export, 2, The Case of Apulia," *Crusader Art in the Twelfth Century*, ed. J. Folda, Oxford, 1982, p. 247.

644. Weitzmann, "Icon Painting," [3 (1966)], p. 61.

645. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 185–6.

646. A. Derbes, "Siena and the Levant in the Later Dugento," *Gesta*, 28 (1989), p. 198. I am deeply indebted to Dr. Derbes for discussing this issue with me and sharing her views generously and at some length.

647. Weitzmann, "Icon Painting," [3 (1966)], p. 66; and E. Carli, *Pittura medievale Pisano*, Milan, 1958, pls. 11, 13–14.

648. The outpouring of images of the Virgin and Child in Dugento central Italy is impressive, and this Crusader example seems to reflect many aspects of these works, but there are no precise parallels to the throne. Useful works among the older bibliography include E. Sandberg Vavalà, *L'Iconografia della Madonna col Bambino nella Pittura Italiana del Dugento*, Siena, 1934; R. Jaques, "Die Ikonographie der Madonna in Trono in der Malerei des Dugento," *Mitteilungen des Kunsthistorischen Institutes in Florenz*, 5 (1937), pp. 2–57;

C. H. Weigelt, Über die "Mütterliche" Madonna in der Italienischen Malerei des 13. Jahrhunderts," *Art Studies*, 6 (1928), pp. 195–221; and E. B. Garrison, *Italian Romanesque Panel Painting*, Florence, 1949, rpt. New York, 1976, esp. pp. 40–9, 75, 79–84, 87–101, 111–44, 150–60.

649. The tile "floor" is clearly somewhat problematic. Weitzmann noted that the Arezzo comparison he cited might be a later repaint ("Thirteenth Century Crusader Icons," (1) 1963, p. 186, n. 39). This view is shared by J. Stubblebine, *Guido da Siena*, Princeton, 1964, pp. 64–5, catalogue VI. M. Frinta ("Raised Gilded Adornment of the Cypriot Icons, and the Occurrence of the Technique in the West," *Gesta*, 20 (1981), p. 336) says that he finds the tile floor "to be a motif too late to be used still in Acre." Careful analysis of the Acre Triptych in the Monastery of St. Catherine's is necessary to evaluate the possibility of repainting.

650. At this point it is appropriate to note that the condition of this central panel is a major issue, and the question of repainting must be carefully examined not only with regard to the tiled floor, but also the gold decoration on the throne itself. Possibly also the garments of the two standing angels may have been repainted at a later time as well. For Weitzmann's claim that this triptych was done as intended with two separate styles combined in one work, we must verify the integrity of the condition of the central panel, including, of course, the way the hinges are set for both wings.

I am greatly indebted to Joanna Cannon for her enlightening comments on this panel using the published photographs. From her comprehensive knowledge of Sienese painting and Tuscan painting more broadly, I am grateful to have her incisive observations on the problems of condition with regard to this triptych and the relationship of the Virgin and Child Enthroned with Tuscan painting of the second half of the thirteenth century.

651. By "this time," I mean the third quarter of the thirteenth century. See the various examples in Carli, *Pittura medievale Pisana*, pls. 45–7 (the Pisa St. Francis panel); or Stubblebine, *Guido da Siena*, figs. 32, 33 (works known as the Arezzo Madonna, and a polyptych by the Master of the Madonna del Voto).

652. This is not to say that the Crusaders necessarily invented this technique. It is difficult to say where it was invented, but as M. Frinta has remarked about these developments in other discussions, often Byzantine artists may have experimented with these ideas early on. In this case, the earliest Byzantine example known to me is the icon of the Virgin and Child Enthroned between two Archangels, dated about 1200, now in the Church of St. Nicholas in Veroia. This icon is doubly interesting because of its red background, a feature that D. Mouriki has discussed in relation to Cypriot icons. See E. Tsigaridas, "Icon of the Virgin and Child Between Archangels," *Mother of God: Representations of the Virgin in Byzantine Art*, ed. M. Vassilaki, Athens, 2000, pp. 342–3.

653. M. Frinta has discussed these developments in a series of studies leading up to his newly published encyclopedia of *Punched Decoration on Late Medieval Panel and Miniature Painting*, vol. 1, Prague, 1998. See idem, "Raised Gilded Adornment of the Cypriot Icons," pp. 333–43; idem, "Relief Decoration in Gilded Pastiglia on the Cypriot Icons and Its Propagation in the West," *Acta of the Second International Congress of Cypriot Studies*, 1982, Nicosia, 1986, pp. 539–44; idem, "Relief Imitation of Metallic Sheathing of Byzantine Icons as an Indicator of East–West Influences," *The High Middle Ages*, Binghamton, 1983, pp. 147–67; idem, "The Decoration of the Gilded Surfaces in Panel Painting around 1300," *Europäische Kunst um 1300*, Akten des XXV. Internationalen Kongresses für Kunstgeschichte, 1983, ed. E. Liskar, Vienna, Cologne, Graz, 1986, pp. 69–75. None of the Crusader examples uses punched decoration, a technique that emerges in Italy somewhat later, around 1300.

654. Weitzmann, "Icon Painting," [3 (1966)], p. 70. Despite this claim, questions have been raised about these wings: whether they were originally done for this triptych or were a later addition, whether an additional strip of wood was added to the wings to adjust their height to that of the central panel, whether the hinges are original or not, and so on. These questions all need to be decided on the basis of careful physical examination of the Acre Triptych in detail.

655. Doula Mouriki, ("Thirteenth-Century Icon Painting in Cyprus," pp. 24–26) notes the special use of red backgrounds in three circumstances related to its appearance in thirteenth-century icons on Cyprus: first, Comnenian painting in the twelfth-century; second, Syriac thirteenth-century manuscript painting; and third, Romanesque painting in western Europe.

656. Derbes, "Siena and the Levant in the Later Dugento," p. 198. The implications of Derbes's discussion are to suggest that this Triptych may date in the 1260s or even a bit later. Although I agree that the Tuscan connection and the circle of Guido da Siena is the correct evaluation, I propose a somewhat earlier dating later.

657. For the Madonna del Voto master's painting, see Stubblebine, *Guido da Siena*, fig. 33; for a color reproduction, see P. Torriti, *La Pinacoteca Nazionale di Siena, I Dipinti dal XII al XIV Secolo*, Genoa, 1980, pp. 32–3, which is dated to *c.*1260. See now the discussion about the work of the Madonna del Voto Master and Guido da Siena, among others, by H. B. J. Maginnis, "Everything in a Name? or The Classification of Sienese Duecento Painting," *Italian Panel Painting of the Duecento and the Trecento*, ed. V. M. Schmidt, *Studies in the History of Art*, 61 (2002), pp. 471–85, esp. 471, 482.

658. The icon of the Virgin and Child Hodegetria is reproduced in color by H. Belting, *Likeness and Presence*, Chicago and London, 1994, colorplate pl. VI between pp. 264 and 265. See also n. 32 on p. 591.

659. I am indebted to Joanna Cannon for her terminology here. I cannot find an exact parallel for this artist's work, but it is in the circle of "Guido-style" painting that the closest comparisons are found.

660. We have already seen how Pisa represented Tuscan commercial interests in Acre during this period and that therefore merchants from other Tuscan cities, such as Siena or San Gimignano, would fly the Pisan flag when operating here. We can expect a similar Tuscan artistic presence in Crusader Acre, in which Tuscan style was represented by a variety of artists, not all of which would necessarily be Pisan. On Pisa as the Tuscan representative in Acre, see D. Abulafia, "Crocuses and Crusaders: San Gimignano, Pisa and the Kingdom of Jerusalem," *Outremer*, eds. B. Z. Kedar, H. E. Mayer, and R. C.Smail, Jerusalem, 1982, pp. 227–43.

661. See, P. Hills, *Venetian Colour*, New Haven and London, 1999, pp. 32, 35.

662. Pace discussed the style in his 1982 article, see n. 643, this chapter. He discusses problems of stylistic method in relation to these Veneto-Byzantine Crusader style works in idem, "L'analisi 'stilistica' come metodologia storica: possibilità e limiti: con particolare riferimento alle icone 'crociate'," *Artistes, Artisans et Production Artistique au Moyen Age*, ed. X. Barral I Altet, vol. III, *Fabrication et Consommation de l'Oeuvre*, Paris, 1990, pp. 513–23. His important methodological discussion is further commented on by T. Carratù, "Venise et la Langue Franque," in *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan, 1997, pp. 308–13, in her careful review of the state of the question.

663. Weitzmann, "Icon Painting," [3 (1966)], pp. 69–74. I discuss this attribution later when addressing the group of icons and the artist to which Weitzmann assigned this name.

664. Weitzmann, "Icon Painting," [3 (1966)], p. 70. The other icons that he attributes to this group include three standing soldier saints (no. 1118), St. Sergius mounted with a kneeling donor (no. 80), Sts. Sergius and Bacchus mounted (no. 23), Sts. Catherine and Marina (no. 1418), among others to be discussed later.

665. Weitzmann, "Icon Painting," [3 (1966)], pp. 65–6.

666. Ibid., pp. 73–4.

667. Pace recognized this possibility in his discussion of the limits of stylistic analysis; see "L'analisi 'stilistica' come metodologia storica: possibilità e limiti," p. 514.

668. Weitzmann, *The Icon*, [11 (1982)], p. 67.

669. Carli, *Pittura medievale Pisana*, pl. 52. Weitzmann himself noticed this comparison ("Crusader Icons and Maniera Greca," [14] 1984, pp. 156–7, figs. 17–18), but he proposes that the Verano panel done by a Pisan artist was done in the 1270s under the influence of a model like the St. Nicholas found on the Acre Triptych. He continues to maintain in 1984 his view that the artist of the Acre Triptych St. Nicholas was south Italian.

670. D. Mouriki, "Icons from the 12th to the 15th Century," *Sinai: Treasures of the Monastery of St. Catherine*, ed. K. Manafis, Athens, 1990, p. 178, fig. 52.

671. In the mosaics of S. Vitale, the *Agnus Dei* appears as a eucharistic symbol of Christ in the apex of the choir vault mosaics before the main apse. The *Agnus Dei* on the disc also appears as an attribute of St. John the Baptist in the carved ivory frontal of the *cathedra* of Maximianus, also at Ravenna. See O. G. von Simson, *Sacred Fortress: Byzantine Art and Statecraft in Ravenna*, Chicago and London, 1948, rpt. 1976, pls. 8 and 28.

672. E. Dewald, *Italian Painting: 1200–1600*, New York, 1961, p. 62, fig. 3.13.

673. For the French examples, see W. Sauerländer, *Gothic Sculpture in France: 1140–1270*, London, 1972, pls. 83, 86 (Chartres, north transept, central door, right side jambs, *c.*1210), pls. 219, 220 (Reims, west portal, right doorway, right side jambs, *c.*1220).

674. P. Grierson, "A Rare Crusader Bezant with the *Christus Vincit* Legend," *American Numismatic Society: Museum Notes*, 6 (1954), pp. 172–8. There is much discussion about this coin as to where and when it may have been minted. A. A. Gordus and D. M. Metcalf ("Gold Coinages of the Crusader States," *Coins of the Crusader States*, p. 105) prefer to consider Tripoli after 1268 for this coin, but I think it predates the use of such a motif on the French gros tournois.

675. We can note that the pose of the lamb differs slightly in each case – the lamb looks forward in the medallion whereas on the coin it looks back toward the banner; the lamb has ram's horns on the medallion but none on the coin, and the banner carries a differently shaped cross in each case. On the coin it is the cross of St. Andrew, and on the medallion it is the usual red, equal-armed cross on the white banner.

676. See E. J. King, *The Seals of the Order of St. John of Jerusalem*, London, 1932, p. 12, and pl. III, no. 2, "unique bulla used in 1221." King cannot account for why this seal was used instead of that of the Master, who in this case was Garin de Montagu. The image of the lamb in this case has the animal in the same position, but with his head turned back to see the banner, which has a regular equal-armed cross. He has no horns, but his halo seems to have four rays behind his head. This drawing of the seal was published by S. Pauli, *Codice Diplomatico*, vol. 1, p. 113. The document is found in Delaville Le Roulx, Cartulaire, vol. II, p. 297, no. 1739.

677. P. de Saint-Hilaire, *Les Sceaux Templiers et leurs Symboles*, Puisseaux, 1999, pp. 34–5, 165–7.

678. See ibid., pp. 82–5, 94, among others. See also H. Nicholson, *The Knights Templar: A New History*, pp. 177, 180, 202, 211, for color illustrations of certain seals of the masters in England, including that of Richard of Hastings.

See discussion of Paris, Bibl. Nat. MS n.a.fr. 1404, with the prologue to Judges mentioning the Master Richard of Hastings in Chapter 7 and in Folda, *Crusader Manuscript Illumination*, pp. 60–7.

679. See J. Riley-Smith, *The Knights of St John in Jerusalem and Cyprus, 1050–1310*, London, 1967, pp. 447–50; and Delaville Le Roulx, *Cartulaire*, vol. III, pp. 318–19, no. 3565.

680. J. Jungmann, *The Mass of the Roman Rite*, trans. F. Brunner, vol. 2, New York, 1955, pp. 332–40.

681. O. Demus, *The Mosaics of San Marco in Venice*, vol. 2, Chicago and London, 1984, pp. 69, 253, n. 178.

682. Here again we see this detail appearing in Italian painting as well, for example, in the Gaibana Epistolario dated 1259, among others. See Bellinati and Bettini, *L'Epistolario Miniato di Giovanni da Gaibana*, vol. 1, fol. 19v (Adoration of the Magi). It is interesting that this convention for the haloes appears primarily in the Crusader icons and not in the Perugia Missal, whereas in Italy it apparently appears in manuscripts and panel paintings.

683. Among possible events, there are a series of examples ranging in date from 1258 to 1261. There is, for example, the vote of the High Court to recognize Plaisance as regent and King Hugh of Cyprus as the rightful heir in the absence of the Hohenstaufen, Conradin, in February 1258. In May 1259, Queen Plaisance appointed Geoffrey de Sergines as the new *bailli* in the wake of the death of John of Arsuf. In January 1261, an armistice was reached by which Venice and Pisa were established in their quarters in Acre, Genoa withdrew its merchants to Tyre, and, as Runciman characterized it, "the warring nobles and Military Orders were officially reconciled" (Runciman, *A History of the Crusades*, 3, p. 286). The problem is, there is no way as yet to link the Acre Triptych to any of these or other contemporary developments in the Crusader capital.

684. We await the publication of R. D. Pringle's third volume of his corpus of Crusader churches, with information on the churches of Acre, to assist us here.

685. See the important discussion of confraternities in Acre by J. Riley-Smith, "A Note Confraternities in the Latin Kingdom of Jerusalem, *Bulletin of the Institute of Historical Research*, 44 (1971), pp. 301–8. The mendicant orders such as the Franciscans or the Dominicans, founded in the West, or the Carmelites, founded in the East, would be possible patrons.

686. J. White, *Duccio*, 1979, pp. 32–3, who discusses the Laudesi, or the Compagnia delle Laudi di S. Maria Novella in Florence as patrons of this work. See also L. Bellosi, "The Function of the *Rucellai Madonna* in the Church of Santa Maria Novella," *Italian Panel Painting of the Duecento and Trecento*, ed. V. M. Schmidt, *Studies in the History of Art*, 61 (2002), pp. 147–59.

687. J. White, *Art and Architecture in Italy, 1250–1400*, Baltimore, 1966, pp. 108–9.

688. One of the significant differences between the Acre Triptych and these two later examples is the fact that only the former features full-length standing angels, as we saw in the Byzantine icon from Sinai that Weitzmann claims may have been its model. In fact most later thirteenth-century enthroned images of the Virgin have kneeling, bust-length, or partial images of some kind. It is therefore quite interesting to note that the newly discovered panel with the Virgin and Child Enthroned, recently acquired by the National Gallery in London and attributed to Cimabue by Dillian Gordon, has two standing full-length angels holding the throne as well. It remains to be seen what date will be proposed for the Cimabue panel, but it is likely that the Acre Triptych is slightly earlier. I am grateful to Joanna Cannon for drawing my attention to this panel by Cimabue. For the Cimabue panel, see the report by N. F. Weber, "Found in a Country House, A 'Curator's Dream'," *New York Times*, Sunday, March 4, 2001, "Art and Architecture" section, p. 23 (with color reproduction).

689. These dates correspond to the period when, in the aftermath of the War of St. Sabas, we find the new political and commercial arrangements being worked out in Acre under which Venice and Pisa would operate in the Crusader capital. See nn. 242 ff.

690. K. Weitzmann, "Icon Programs of the 12th and 13th Centuries at Sinai," [15 (1986)], pp. 64–94; idem, "Crusader Icons and Maniera Greca," [14 (1984)], p. 158.

691. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 181. Weitzmann notes that even though the size of the beams suggests they were done for a chapel at Sinai, "the great diversity of styles precludes the possibility that they were all painted at Sinai itself." As noted earlier, he changes his mind on this point later. When it comes to this beam specifically, however, he says, "if for the later 13th century we have been able to establish a Venetian workshop, it must be seen in the light of many workshops at Sinai, those organized by Crusader artists being rather an exception than the rule" (idem, "Icon Programs," [15 (1986)], p. 115). I discuss the special case of this beam later. I think he is correct here in what he says.

692. Iconostasis beam now in the Monastery of St. Catherine's on Mount Sinai. It consists of three wooden boards, the first with four scenes, the second with five scenes, and the third with four scenes. The total length of the beam is 2.25 meters. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 181–3; idem, "Icon Painting," [3 (1966)], pp. 62–4; idem, *The Icon*, [11 (1982)], pp. 204, 222–4; idem, "Icon Programs," [15 (1986)], pp. 82–6. See also J. Folda, "The Figural Arts in Crusader Syria and Palestine, 1187–1291: Some New Realities," *Dumbarton Oaks Papers*, 58 (2005), forthcoming.

693. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 182.

694. Weitzmann, "Icon Programs," [15 (1986)], pp. 82–6; idem, *The St. Peter Icon of Dumbarton Oaks*, [13 (1983)], p. 26, fig. 28 (Pentecost); idem, *The Icon*, [11 (1982)], pp. 222–4; idem, "Icon Painting," [3 (1966)], pp. 62–4; and idem, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 181–3.

695. The width of this scene is 28.9 cm.

696. Weitzmann, "Icon Painting," [3 (1966)], p. 62; and Weitzmann, *The Icon*, [11 (1982)], p. 204.

697. As Pace points out these inscriptions did not necessarily have to be executed by the artists themselves (idem, "Italy and the Holy Land: Import–Export. 1. The Case of Venice," pp. 332–3).

698. Weitzmann, "Annotation," *Studies in the Arts at Sinai*, [12 (1982)], p. 433, n. to p. 182, points out that the square format is not exclusively Western and does occasionally appear in Byzantine examples. For a typical Byzantine example with the arched format, see Mouriki, "Icons from the 12th to the 15th Century," *Sinai: Treasures of the Monastery of St. Catherine*, ed. K. Manafis, Athens, 1990, pp. 106–7, 162–3, figs. 31–3.

699. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 182.

700. It is worth recalling that a Crusader painter dealt with the Twelve Feasts iconography in the late twelfth century in Jerusalem, in a single icon panel, discussed in volume 1 (Folda, *ACHL* 1, pp. 406–8, and pl. 9.38). In this earlier

instance, it is striking how closely the artist followed his Byzantine model compared with the imagery we find in this iconostasis beam, however. It will be evident from a comparison of these two works, however, that the Venetian Crusader painter was not using this earlier Crusader panel for his model, but must have been looking at some purely Byzantine example.

701. Weitzmann, "Icon Painting," [3 (1966)], pp. 62–3.

702. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 182–3; idem, "Icon Painting," [3 (1966)], pp. 63–3; and K. Weitzmann, "Various Aspects of Byzantine Influence on the Latin Countries from the Sixth to the Twelfth Century," *Dumbarton Oaks Papers*, 20 (1966), p. 21.

703. Weitzmann, "Icon Painting," [3 (1966)], p. 64. See also our earlier discussion concerning the Coronation of the Virgin on the outer wing of the Acre Triptych.

704. Weitzmann, *The Icon*, [11 (1982)], p. 204.

705. Weitzmann, "Icon Programs," [15 (1986)], p. 84.

706. The interesting example of the Three Magi in the Gaiabana Epistolary, dated 1259, is a Western version that shows touches of Byzantine and possibly Crusader influence (Bellinati and Bettini, *L'Epistolario Miniato di Giovanni da Gaibana*, vol. 1, fol. 19v).

707. See the variety of caps of which this is one example, in J. Kubiski, "Orientalizing Costume in Early Fifteenth-Century French Manuscript Painting (*Cité des Dames* Master, Limbourg Brothers, Boucicaut Master, and Bedford Master)," *Gesta*, 40 (2001), p. 167.

708. This is not the only representation of a Mongol in Christian painting. There is also the more or less contemporary image of Hulagu and his wife depicted as Constantine and Helena with the Holy Cross, in the Syriac lectionary, Bibl. Apostolica Vaticana, MS Syr. 559, fol. 223v (third quarter of the thirteenth century). See G. Lenzi, "Lezionario dei Vangeli. Siriaco," in *I Vangeli dei Popoli*: La Parola e l'immagine del Cristo nelle culture e nella storia, Città del Vaticano: Palazzo della Cancelleria, 2000, pp. 307–9, fig. 75, in color, showing the beautiful oriental designs of Hulagu's and Doquz Khatun's robes, set against a red background, and the older reproduction in black and white, J. Leroy, *Les Manuscrits Syriaques à peintures conservés dans les bibliothèques d'Europe et d'Orient*, Paris, 1964, pl. 99, fig. 2. In this image the identification of Hulagu is largely dependent on his physiognomy, and therefore questions have been raised about this identification, but in the iconostasis beam image, Kitbogha is given not only a distinctive physiognomy rendered in three-quarter view, but also distinctive Mongol garments, including especially his cap.

Mongols also appear in Baghdad School painting toward the end of the thirteenth century. It is interesting to compare these images with the examples from Christian manuscripts. See M. S. Simpson, "The Role of Baghdad in the Formation of Persian Painting," *Art et société dans le monde iranien*, Paris, 1982, esp. pp. 109–14. My thanks to Shreve Simpson for drawing my attention to this important article.

709. Weitzmann, "Icon Painting," [3 (1966)], p. 63. Weitzmann restates this view in "Icon Programs," [15 (1986)], p. 84.

710. Runciman, *A History of the Crusades*, 3, Cambridge, 1954, p. 307.

711. This is not the only appearance of a Mongol in Christian scenes of the three magi. In an Armenian manuscript illuminated by T'oros Roslin dated 1260, we find the bodyguard of the Magi, who are mentioned in apocryphal gospel accounts as soldiers who accompanied the Magi, to be represented as Mongols. S. der Nersessian explains this as the artist "bearing in mind that the Magi came from the East, . . . he has represented the bodyguard with the facial type and costume of the Oriental peoples best known to him, namely the Mongols, the allies of the king of Cilicia [Hethoum I]" (S. Der Nersessian, *Miniature Painting in the Armenian Kingdom of Cilicia*, 1, Washington, D.C., 1993, p. 60, and nn. 45 and 46, and II, fig. 212).

Der Nersessian expresses her doubts that the Mongol in the Nativity Scene on the iconostasis beam represents Kitbogha, as Weitzmann proposed and we are seconding here. But her objection, that Kitbogha was a Nestorian, and therefore in the eyes of the Latins a heretic, is apparently not taking into consideration the complexity of the situation. She does not seem to be taking full account of the widely differing views inside the Latin community, Latin involvement with Armenian politics and their alliance with the Mongols, and papal attempts to bring Nestorians – other than Mongols who were Nestorians – back to the fold. Whereas the barons of Acre were deeply offended by the pro-Mongol, pro-Kitbogha views of Bohemond VI and his overtures to the Greeks, Bohemond himself had good reasons for his Mongol sympathies and for his attempts at harmonious relations with the Greek Orthodox Church in regard to Antioch. As Mayer points out, during this period (1252–75), "Antioch was swept completely into the orbit of Armenian politics" (Mayer, *The Crusades*, p. 276). The pope meanwhile had, in the 1240s and 1250s, attempted to make friendly overtures to the Nestorians, and some Nestorians living in the Crusader States had recognized the papal primacy (Hamilton, *The Latin Church in the Crusader States*, p. 357). Richard ("The Mongols and the Franks," *Journal of Asian History*, 3 [1969], pp. 45–57) discusses some of the most important of the complex developments in his basic article, updated in his recent book, *The Crusades, c.1071–1291*, pp. 408–41.

712. S. Runciman, *A History of the Crusades*, 3, Cambridge, 1954, p. 300.

713. Images of exotic foreigners becomes a feature of painting in the International Gothic style around 1400 in Europe. Despite the advent of "Gothic realism" in the thirteenth century, detailed "portraiture" in terms of dress and ethnic characteristics is still relatively rare in the thirteenth century. But Crusader painters do occasionally produce interesting examples in panel painting, as here, and in manuscript illumination, as Chapter 7 discusses, in the manuscript now in London (British Library, Add. MS 15268). For the depiction of foreigners in works of the International Gothic style, see J. Kubiski, "Orientalizing Costume in Early Fifteenth-Century French Manuscript Painting (*Cité des Dames Master*, Limbourg Brothers, Boucicaut Master, and Bedford Master)," *Gesta*, 40 (2001), pp. 161–80.

714. See T. T. Allsen, *Commodity and Exchange in the Mongol Empire: A Cultural History of Islamic Textiles*, Cambridge, 1997, pp. 11–98.

715. For the portrait of the royal family in the Gospels of Queen Keran (Jerusalem, Armenian Patriarchate, MS 2563, fol. 380) and the portrait of Prince Vasak in the Gospels of Vasak (Jerusalem, Armenian Patriarchate, MS 2568, fol. 320), see S. der Nersessian, *Armenian Art*, trans. S. Bourne and A. O'Shea, Paris, 1978, p. 145, fig. 107, and p. 147, fig. 109, respectively.

It is not unknown for one of the three magi to wear a red garment in Byzantine imagery, and we see the eldest magus wearing a red tunic in the image of the Adoration of the Magi in the Psalter of Queen Melisende, but here a red cloak is specified that compares favorably with the Armenian royal iconography of the Hetoumid family. For the Melisende Psalter image, see Folda, *ACHL* 1, p. 138, pl. 6.8d.

Hetoum I does not wear a crown in this image, presumably because the artist was following a very individual interpretation of who the magi were meant to be within the context of a Nativity image otherwise Byzantine in its character. Each figure is individually characterized to be recognizeable. It is in any case not consistent that all Armenian royal figures wear crowns, as seen in the two images cited earlier.

716. S. Merian, "Un feuillet appartenant à la Collection Feron-Stoclet acquis par la Pierpont Morgan Library de New York," *Revue des Etudes Arméniennes*, 27 (1998–2000), 417–21.

717. S. Der Nersessian, *Miniature Painting in the Armenian Kingdom of Cilicia from the Twelfth to the Fourteenth Century*, Washington, D.C., 1993, vol. 1, pp. 156–9, vol. 2, figs. 641 (black and white and color), 646, 647 (black and white and color).

718. See, e.g., E. Atil, *Renaissance of Islam, Art of the Mamluks*, Washington, D.C., 1981, pp. 58–9, no. 11, a pierced globe dated *c.*1270; and R. Ward, S. La Niece, D. Hook, and R. White, "'Veneto-Saracenic' Metalwork: An Analysis of the Bowls and Incense Burners in the British Museum," *Trade and Discovery, the Scientific Study of Artefacts from Post-medieval Europe and Beyond*, eds. D. Hook and D. Gaimster, British Museum Occasional Papers, 109, London, 1995, pp. 235–58.

719. See, for example, the bearded image of Hulagu, in a Syriac Lectionary book dating *c.*1260 now in the Vatican Library: Vatican Syriac MS 559, fol. 223v. A reproduction is published in *I Vangeli dei Popoli*, eds. F. D'Aiuto, G. Morello, and A. M. Piazzoni, Biblioteca Apostolica Vaticana, Rome, 2000, p. 309.

720. See the enlightening remarks by Giles Constable in his long introduction on "Beards in History," in *Apologiae Duae: Gozechini Epistola ad Walcherum and Burchardi, ut videtur, Abbatis Bellevallis, Apologia de Barbis*, ed. R. B. C. Huygens, *Corpus Christianorum, Continuatio Mediaevalis*, LXII, Turnholt, 1985, especially pp. 85–130.

721. Weitzmann comments on this iconostasis beam as having been done for the Latin

chapel at Sinai in "Icon Programs," [15 (1986)], pp. 82–6.

722. Templar of Tyre: new edition by L. Minervini, ed., Cronaca del Templare di Tiro: (1243–1314), Naples, 2000, p. 82, sect. 67 (303), old edition, part III of *Les Gestes des Chiprois*, ed. G. Raynaud, for the Société de l'Orient Latin, Geneva, 1887, pp. 161–2, ch. 303. On the Templar of Tyre, identified as the secretary to William of Beaujeu, Grand Master of the Temple, see Runciman, *A History of the Crusades*, 3, p. 482. On this report, see now the discussion of D. Sourdel, "Bohémond et les chrétiens à Damas sous l'occupation mongole," *Dei gesta per Francos*, ed. M. Balard et al., Aldershot, 2001, pp. 295–9. She does not believe that the mosque in question was the great mosque of Damascus.

723. Hamilton, *The Latin Church in the Crusader States*, p. 325. Hamilton also comments that "the intrusion of an Orthodox prelate in a Latin see through the intervention of a Mongol warlord was predictably viewed with abhorrence by the Latin hierarchy in the kingdom of Acre," but it was shortlived, just as the Christian control of Damascus was fated to be.

724. Until the wood used for these beams and the relevant icons can be scientifically examined in the Monastery of St. Catherine on Mount Sinai, we will not know what possible information can be learned about the origin and the nature of the wood.

725. The hypothesis that this iconostasis beam was painted at Sinai rests partly on the fact that a number of such beams, both Byzantine and Crusader, were known to have been painted at Sinai in this period, and second, the fact that the beam is preserved at St. Catherine's Monastery today, where it has probably always been. Although it cannot be proved as yet that it was not painted in Acre, it would be more difficult to account for how it was produced there and then taken to Sinai later in the absence of any clear evidence to support this possibility.

726. Pace of course argues that the paintings on this beam should be dated much later, at the end of the thirteenth century ("Italy and the Holy Land: Import – Export. 1. The Case of Venice," p. 333). His stylistic points are important, but the relationship of this imagery with these historical developments forces me to overcome my doubts and offer the 1260 date. If, however, when all is said and done, in fact this beam must be dated later on technical grounds, I could only see it as a copy of an earlier beam that had been done in 1260. But for the present, why could the stylistic ideas Pace observes in these paintings not have come from the Crusader East? Interest in three-dimensional space is also what we see in the central panel of the Acre Triptych, to be dated *c.*1260, not to mention several other Crusader icons.

727. There will be frequent reference to Kurt Weitzmann's various studies on the Crusader icons, which I discuss subsequently. Suitable abbreviations for the corpus of these fifteen studies appear at the start of this volume in the list of abbreviations for the text, notes, and Appendix to this volume.

728. Weitzmann, "Crusader Icons and Maniera Greca," [14 (1984)], pp. 168–9.

729. Icon from the Monastery of St. Catherine at Mount Sinai: 66.0 × 45.6 cm, with a thickness of 3.6 cm. See Weitzmann, "Four Icons," [5 (1972)], pp. 279–84.

730. Besides the throne of the Virgin in the Annunciation icon (no. 44), see also those in another multilevel Deësis icon (no. 293), or an icon with the Virgin Enthroned and three other scenes (no. 574). There is also the related if somewhat different versions on a triptych with a Deësis and standing saints below, with its wings containing the Annunciation (no. 1177). These thrones are all bench thrones in effect, with or without any backs, and they show similar design characteristics of decorated rectangular bodies with large triangular feet below, and an associated decorated footstool. None of these panels is necessarily the product of the same artist, but the throne design suggests a workshop type they were all familiar with. These artists are also using the typical Crusader haloes. They are mostly not drawn with a compass, and consist of either an incised linear rim or have a painted red or black rim decorated with white "pearls." There is also variable ornament for the icon borders visible in this group, which also seem to be part of the repertory of this workshop. The repertory contains plain gold frames outlined in red or golden lozenges with pairs of "pearls" set on a black background.

731. Weitzmann discusses another Sinai icon with the more usual Twelve Apostles, the outer wing of a triptych fragment. The wing of this icon (no. 886) measures 20.5 × 14.0 cm with Twelve Apostles all standing frontally in two registers on lower panel, and with Elijah and Moses in the lunette above. See Weitzmann, "Four Icons," [5 (1972)], pp. 286–9.

732. Weitzmann, "Four Icons," [5 (1972)], pp. 281–3.

733. Ibid., pp. 285–6.

734. Ibid., p. 290.

735. Icon from the collection of the Monastery of St. Catherine on Mount Sinai. See H. Belting, "Introduction," *Il Medio Oriente e l'Occidente nell'Arte del XIII secolo*, Bologna, 1982, p. 2.

736. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 195.

737. Other Sinai icons include elaborate raised gesso decoration and indeed may not be by this same painter, but in most cases their condition is poor and the painted surface is seriously degraded. See, for example, the icons of St. George on Horseback (no. 357), Three Standing Male Saints with Scrolls (no. 589), three Virgin and Child Hodegetria icons (no. 671, no. 681, no. 715) all three with damage to the faces and with massive repainting, a panel of St. John the Baptist in the Wilderness (no. 844), and a Transfiguration panel (no. 1012). These icons all have raised gesso that seem to share similar patterns on the frames, in the background, and in the haloes. There are a few other "Western-influenced" icons at Sinai that have the raised gesso but do not belong to this group, because of certain differences. In some cases the type of raised gesso and the patterns are different, for example, a very damaged double-decker icon wing (?) with the Flight into Egypt in the upper register (no. 909), or a very decorative icon of the Virgin and Child standing between two male saints (no. 1482). In other cases the icon only includes the raised gesso in differing patterns inside the haloes, as, for example, yet another Virgin and Child Hodegetria (no. 1518), or a Virgin and Child Blacherniotissa (no. 427); on the frame, for example, another image of St. John the Baptist in the Wilderness (no. 1803); or on the background, for example, another Transfiguration (no. 154).

738. Cormack and Mihalarias, "A Crusader painting of St. George," *Burlington Magazine*, 126 (1984), pp. 132–41.

739. I discuss this icon later, when we take up the issue of Crusader icons with mounted soldier saints, of which we have a variety of examples, some icons with one and some with more than one mounted soldier saint depicted.

740. Frinta, "Relief Imitation of Metallic Sheathing," *The High Middle Ages*, pp. 147–9.

741. Icon from the Monastery of St. Catherine on Mount Sinai: 24.4 × 17.5, cited by Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 196, n. 90, but variously reported also as 32.0 × 25.6 cm in Weitzmann, *The Icon*, [11 (1982)], p. 219.

742. Icon from the collection of the Monastery of St. Catherine on Mount Sinai: 32.2 × 25.7 cm. See V. Beneševic, ed., *Monumenta Sinaitica Archaeologica et Palaeographica*, fasc. 1, Leningrad/Petropoli, 1925, cols. 39–43, pl. 21 (N.B. plate 21 shows this icon to be somewhat more heavily damaged than we see it today, although part of the effect may be explained by the mode of photography.); Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 199–200; idem, "An Encaustic Icon," [4 (1966)], pp. 720–2; idem, *The Icon*, [11 (1982)], p. 217.

743. Weitzmann, "An Encaustic Icon," [4 (1966)], pp. 720, 722.

744. Ibid., p. 720.

745. Ibid.

746. Weitzmann identifies this figure either as St. Gregory Nazianzus (Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 199; and idem, "An Encaustic Icon," [4 (1966)], p. 720), or as St. Nicholas, the popular bishop of Myra, whose relics were later transferred to Bari (Weitzmann, *The Icon*, [11 (1982)], p. 203). Weitzmann's argument for identifying the figure as St. Gregory is much more convincing than the suggestion that he could be St. Nicholas, based on his own detailed analysis of the iconography and on the fact that the costume he wears here is not typical of images of St. Nicholas in Byzantine art at this time.

747. Icon in the collection of the Monastery of St. Catherine on Mount Sinai: 31.0 × 24.8 cm. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 192–3; and idem, *The Icon*, [11 (1982)], pp. 203–4, 211.

748. Icon from the collection of St. Catherine's Monastery on Mount Sinai: 27.2 × 19.1 cm. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 194.

749. Cormack and Mihalarias, "A Crusader painting of St. George," *Burlington Magazine*, 126 (1984), pp. 132–41.

750. Icon from the Collection of the Monastery of St. Catherine on Mount Sinai:

41.9 × 30.9 cm. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 190–2.

751. J. Folda, "The Saint Marina Icon," *Four Icons in the Menil Collection*, pp. 106–33.

752. Icon now in the collection of the British Museum, M&LA 1984, 6–1, 1 (National Icon Collection, no. 13): 26.8 × 18.8 cm. See, Cormack and Mihalarias, "A Crusader painting of St. George," *Burlington Magazine*, 126 (1984), pp. 132–41; and Cormack, "Icon of St George and the youth of Mytilene," *Byzantium*, ed. D. Buckton, London, 1994, pp. 176–7. See also the discussion of related material in D. Mouriki, "Thirteenth-Century Icon Painting in Cyprus," *The Griffon*, n.s. 1–2 (1985–6), pp. 9–112.

753. I discuss the icons as examples of mounted soldier images in the later discussion of a group of Crusader icons in Veneto-Byzantine Crusader style.

754. Icon from the collection of the Monastery of St. Catherine on Mount Sinai. See Cormack and Mihalarias, "A Crusader Painting of St George," *Burlington Magazine*, 126 (1984), p. 137; and Folda, "The Saint Marina Icon," *Four Icons in the Menil Collection*, pp. 109 and 128, n. 24.

755. Folda, "Crusader Frescoes at Crac des Chevaliers," *DOP*, 36 (1982), pp. 194–5, fig. 22.

756. The iconography of these mounted saints icons is a special category among the Crusader paintings, to which I return later, when we consider the icons painted by Crusader artists of Italo-Byzantine and possibly Syrian background.

757. Icon from the collection of the Monastery of St. Catherine on Mount Sinai: 41.9 × 30.9 cm. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 190–2.

758. See the St. John the Baptist in the wilderness icons in the collection of St. Catherine's Monastery on Mount Sinai (App. nos. 71/884 and 112/1803).

759. St. John was arrested by order of Herod Antipas, and by tradition he was kept in prison at Macherus, south of Mount Nebo. When he was executed, his head was brought to the banquet, and eventually it was buried at Sebaste, northwest of Nablus (Matthew 14: 1–12, Mark 6: 14–29, and Luke 3: 19–20. See M. Aharoni and M. Avi-Yonah, *The Macmillan Bible Atlas*, Jerusalem, 1968, map 227, p. 143.

760. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 192.

761. Icon in the Collection of the Monastery of St. Catherine on Mount Sinai: 27.2 × 19.1 cm. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 194,

762. Folda, *ACHL* 1, p. 366, pl. 9.26d.

763. We can connect this style with icons of the Nativity (no. 1831) and the Baptism of Christ (no. 1836), to be discussed later.

764. Icon from the collection of St. Catherine's Monastery on Mount Sinai: 33.7 × 24.9 cm; width of border, 1.7 cm; thickness of the board, 2.7 cm. See Weitzmann, "Four Icons," [5 (1972)], pp. 289–91, Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, p. 119, and n. 94.

765. Icon from the collection of St. Catherine's Monastery on Mount Sinai: 33.5 × 23.2 cm, width of border, 1.8 cm, thickness of the board, 2.9 cm. See Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, p. 119 and n. 94.

766. Icon fragment from the collection of St. Catherine's Monastery on Mount Sinai: 33.5 × 10.5 cm (fragmentary width); width of border, 1.6 cm; thickness of the board, 2.1 cm. See Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, p. 119, and n. 95. This fragment was also published by G. and M. Sotiriou, *Icones du Mont Sinai*, 2, pp. 163–4, 1, fig. 176.

767. On this issue and its origins in the Holy Land, see, K. Weitzmann, "*Loca Sancta* and the Representational Arts of Palestine," *DOP*, 28 (1974), pp. 35–48.

768. Icon from the collection of St. Catherine's Monastery on Mount Sinai: 31.3 × 24.8 cm, with inscriptions in Greek. See Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 192–4; idem, *The Icon*, [11 (1982)], pp. 203–4, 221.

769. H. Maguire refers to a "speaking icon" where the image in the icon actually talks. See, idem, *The Icons of their Bodies*, Princeton, 1996, p. 15. H. Belting refers to another example; see *Likeness and Presence*, Chicago, 1994, p. 316

770. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 194.

771. Elijah was actually fed by the ravens at Cherith Brook, near Jericho, so this image conflates that event with the time he lived in the south in a cave. See I Kings 17 and 19.

772. Icon in the Menil Collection, Houston, Acq. No. 85-57.04 DJ: 20.4 × 15.8 cm; width of border, 2.1 cm; and thickness of the board, 1.45 cm, in the central surface area, with a Greek inscription. See Folda, "The Saint Marina Icon," *Four Icons in the Menil Collection*, pp. 106–33.

773. See Mouriki, "Thirteenth-Century Icon Painting in Cyprus," *The Griffon*, pp. 33–7, including references to an icon of St. Marina, Pedoulas, of Christ Pantocrator, Moutoullas, and of the Virgin Hodegetria, now in Athens. For the images, see Folda, "The Saint Marina Icon," *Four Icons in the Menil Collection*, pp. 116–17, figs. 112–14.

774. Folda, "The Saint Marina Icon," *Four Icons in the Menil Collection*, pp. 118–23. See now the recently published works by L. Nordiguian and J.-C. Voisin, *Châteaux et Eglises du Moyen Age au Liban*, Paris-Beirut, 1999; and Y. Sader, *Painted Churches and Rock-Cut Chapels of Lebanon*, trans. D. Baker, Beirut, 1997, as well as the older book by Y. Sader, *Peintures Murales dans des Eglises Maronites Médiévales*, Beirut, 1987.

775. See E. C. Dodd, "The 'Syrian' Style in Lebanon," *The Frescoes of Mar Musa al-Habashi: A Study in Medieval Painting in Syria*, Toronto, 2001, pp. 110–17.

776. The recent book by Y. Sader, *Painted Churches and Rock-Cut Chapels of Lebanon*, trans. D. Baker, Beirut, 1997, pp. 146–64, contains four color plates of the grotto at Qalamon to show what is left of the frescoes. The author notes that so much had fallen away that he was forced to resort to the older study of Ch. Brossé for his descriptive analysis, which is translated here into English. For the old study, see Ch. Brossé, "Les Peinturess de la Grotte de Marina près de Tripoli," *Syria*, 7 (1926), pp. 30–45.

777. Folda, "The Saint Marina Icon," *Four Icons in the Menil Collection*, p. 123.

778. Weitzmann, "Icon Programs," [15 (1986)], pp. 115–16.

779. I refer here to the monumental icons of the Bilateral Crucifixion and Anastasis, the Diptych with the Virgin Kykkotissa and St. Procopios, and the iconostasis beam in the form of a dossal with arched niches for individual images of saints including the Deësis in the center. Selections from these icons are published by Weitzmann, *The Icon*, [11 (1982)], pp. 225–7, 229–31.

780. Pace agrees with this analysis. See, idem, "L'analisi 'stilistica' come metodologia storica: possibilità e limiti," p. 515.

781. Pace also accepts the attribution of this icon to the larger group of icons done in the Veneto-Byzantine Crusader style, but he relates it more closely to the later members of the linear group, such as the diptych of the Virgin Kykkotissa and St. Procopios. See, idem, "L'analisi 'stilistica' come metodologia storica: possibilità e limiti," pp. 515–16.

782. Icon in the collection of the Monastery of St. Catherine's on Mount Sinai: 33.0 × 25.0 cm, with Greek inscriptions. See G. and M. Sotiriou, *Icones du Mont Sina*, 2, pp. 169–70, 1, fig. 184; Weitzmann, "Icon Painting," [3 (1966)], pp. 70–1.

783. Weitzmann, "Icon Painting," [3 (1966)], p. 70.

784. Ibid.

785. See Pace, "L'analisi 'stilistica' come metodologia storica: possibilità e limiti," pp. 514–15.

786. Maguire, *The Icons of their Bodies*, p. 65.

787. Icon from the collection of the Monastery of St. Catherine at Mount Sinai: 34.6 × 24.0 cm, with Greek inscriptions. This icon has later, repainted inscriptions in Greek, in which the name of the saint at the left, Catherine, is misidentified as St. Euphemia, as Weitzmann explained. St. Marina is correctly identified. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2, p. 169, 1, fig. 183; Weitzmann, "Icon Painting," [3 (1966)], pp. 72–3; idem, *The Icon*, [11 (1982)], pp. 206–7, 235.

788. Byzantine icon from the collection of the Monastery of St. Catherine on Mount Sinai: 28.0 × 21.7 cm, with Greek inscriptions. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2, p. 68 dated to the eleventh-century, 1, fig. 50; and a color image in Weitzmann, *Ikonen aus dem Katherinenkloster*, [10 (1980)], p. 3, no. 7 and pl. 7.

789. Weitzmann, "Icon Painting," [3 (1966)], p. 73.

790. Icon in the collection of the Monastery of St. Catherine on Mount Sinai: 34.4 × 25.5 cm, with Greek inscriptions. See Weitzmann, "Icon Painting," [3 (1966)], p. 71; and idem, *The Icon*, [11 (1982)], pp. 206, 234.

791. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2, pp. 83–4, 1, fig. 69, and 2, p. 64, 1, fig. 47, respectively. Weitzmann also publishes the eleventh-century icon: "The Icons of Constantinople," *The Icon*, [11 (1982)], pp. 17, 51.

792. Mouriki, "Icons from the 12th to the 15th century," *Sinai*, pp. 111–12, 169, fig. 40.

793. See Chapter 4, nn. 345–9.

794. Icon from the collection of St. Catherine's Monastery at Mount Sinai: 95.0 × 62.0 cm. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2,

pp. 170–1, 1, figs. 185–6; Weitzmann, "Crusader Icons and Maniera Greca," [14 (1984)], pp. 148–9; and Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, pp. 119, 192, fig. 66.

795. Icon from the collection of St. Catherine Monastery at Mount Sinai: 28.7 × 23.2 cm. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2, p. 171, 1, fig. 187, Weitzmann, "Crusader Icons," [3 (1966)], pp. 71–3; Weitzmann, *The Icon*, [11 (1982)], pp. 206, 232; Cormack, "A Crusader Painting of St George," *Burlington Magazine*, 126 (1984), p. 133; L.-A. Hunt, "A Woman's Prayer to St Sergios in Latin Syria," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 96–124; and L.-A. Hunt, "Christian Art in Greater Syria and Egypt: A Triptych of the Ascension with Military Saints Reattributed," *Al-Masaq*, 12 (2000), p. 18.

796. H. Maguire has discussed early Byzantine amulets and a fresco of St. Sisinnios in the sixth-century monastery of Bawit; see *The Icons of Their Bodies*, pp. 120–3, 126–30.

797. One Byzantine work, dated by Weitzmann to the ninth or tenth century, is a triptych at Sinai, with the Ascension of Christ in the center and Sts. Theodore and George as equestrian saints on the wings. See K. Weitzmann, *The Monastery of Saint Catherine at Mount Sinai: The Icons*, vol. I, *From the 6th to the 10th Century*, Princeton, 1976, pp. 68–73, pls. XXVIII, XXIX, XCVI, XCVII. This work has now been reattributed by L.-A. Hunt, "Christian Art in Greater Syria and Egypt: A Triptych of the Ascension with Military Saints Reattributed," *Al-Masaq*, 12 (2000), pp. 1–36. She reattributes it to the 1230s done by a painter in Egypt.

Another Middle Byzantine example is a tenth-century image of St. Mercurius at Sinai, identified as a Coptic icon. See G. Galavaris, "Early Icons at Sinai," *Sinai*, eds. K. A. Manafis, Athens, 1994, p. 97, and p. 143, fig. 11. Hunt ("Christian Art in Greater Syria and Egypt," *Al-Masaq*, 12 (2000), pp. 22–5) also dates this icon to the first half of the thirteenth century.

There is also the strong tradition of imagery pertaining to the mounted St. George in Georgian icons of the tenth and eleventh centuries. See G. Alibegasvili and A. Volskaja, "The Icons of Georgia," *The Icon*, eds. K. Weitzmann et al., New York, 1982, pp. 96, 100–1.

798. Weitzmann, "Icon Painting," [3 (1966)], p. 79.

799. Cormack, "A Crusader Painting of St George," *Burlington Magazine*, 126 (1984), p. 134.

800. Erica Dodd has prepared a corpus of fresco painting from Syria, in what is now Lebanon, which includes a number of important examples. See her title, *Medieval Painting in the Lebanon*, Wiesbaden, 2004, with photographs by Raif Nassif, a study of the Syriac inscriptions by Amir Harrak, and architectural plans by George Michell and Jean Yasmine, which includes this material. Some of these Lebanese examples have of course already been published. E. Dodd has (2001) published the impressive program of six eleventh-century equestrian figures in the nave of Mar Musa in Syria: *The Frescoes of Mar Musa al-Habashi: A Study in Medieval Painting in Syria*, Toronto, 2001, pp. 50–4. L.-A. Hunt has recently published the Syrian examples from Qara, St. Sergios and St. Theodore: "A Woman's Prayer to St. Sergios in Latin Syria: Interpreting a Thirteenth-Century Icon at Mount Sinai," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 107–10, figs. 4 and 5. There are also images of equestrian figures elsewhere, in Lebanon, at Mar Marina, that have been published. See C.-L. Brossé, "Les Peintures de la Grotte de Marina près Tripoli, *Syria*, 7 (1926), pp. 34–5, 37–8, pl. X.

For Cyprus, see the examples at Asinou and Moutoullas. See A. and J. Stylianou, *The Painted Churches of Cyprus: Treasures of Byzantine Art*, London, 1985, pp. 137–8 (Asinou) and pp. 328–9 (Moutoullas). See also A. Stylianou, "A Cross Inside a Crescent on the Shield of St. George: A Wall Painting in the Church of Panagia Phorbiotissa, Asinou, Cyprus," *Kypriakai Spoudai*, 2 (1983), pp. 133–4.

Sharon Gerstel is working on the examples in Orthodox and Frankish Greek territory. See her important article, "Art and Identity in the Medieval Morea," The *Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, D.C., 2001, pp. 263–85. Here she argues that whereas there exists a tradition of Eastern images going back to early Byzantium based on late antique types, the imagery of warrior saints on horseback becomes a major new and flourishing development during the time of the Crusades.

801. Erica Dodd has pointed out that besides the mounted warrior saint in medieval Christian religious art, there was also the secular imagery of the riding horseman found in church and palace decoration, including the remarkable Fatimid painted ceiling in the Cappella Palatina in Palermo (mid-twelfth century), and a long tradition of elaborate palace decoration in Islam. She refers to the eleventh-century palace in Cairo, and says that this is not an isolated example, "but rather reflect[s] a well-established tradition. There is every indication that the rulers in Damascus and Aleppo were equally fortunate in their decoration of palaces, and it is established that the Crusaders in the Levant copied the Arabs in the decoration of their own establishments." See E. Dodd, *The Frescoes of Mar Musa al-Habashi*, pp. 54–5, for this quote; and her review of W. Tronzo, *The Cultures of His Kingdom: Roger II and the Cappella Palatina in Palermo*, Princeton, 1997, in *Al-Masaq*, 12 (2000), pp. 188–91, for additional comments, referring to the Ibelin palace in Beirut, and the famous description of Wilbrand von Oldenburg. See also my discussion of this description of the palace in Chapter 4.

802. Pace, "L'analisi 'stilistica' come metodologia storica: possibilità e limiti," pp. 515–16.

803. It is unusual to find the arrows placed in the quiver with their tips up as seen here. However, it is not unknown elsewhere. One interesting slightly later parallel is found on the Baptistère de St. Louis, the famous basin now in the Louvre, where numerous bowmen are depicted, some with arrows placed tip-up in their quivers. See D. S. Rice, *Le Baptistère de Saint Louis*, Paris, 1951. The tips of the arrows are conspicuous because they are inlaid with gold. In some of the quivers the arrows are placed both tips down and tips up.

804. For details of the bow, quiver, and arrows, see also the line drawing of St. Sergios from this icon (no. 80) published by D. Nicolle, *Arms and Armour of the Crusading Era: 1050–1350*, White Plains, NY, 1988, vol. 1, 333, no. 843; vol. 2, 810, fig. 843. On the Turkish composite bow, see P. E. Klopsteg, *Turkish Archery and the Composite Bow*, Evanston, IL, 1927, 2nd edn.

805. It is interesting that an icon at Sinai with St. Mercurius on horseback, clearly represents the saint with a diminutive strung composite bow on his saddle. This icon, recognized to be a Coptic icon, formerly dated to the ninth or tenth century, has recently been dated to the 1230s by L.-A. Hunt, by comparison to the frescoes dated 1232–3 at the Monastery of St. Anthony in Egypt, near the Red Sea. See L.-A. Hunt, "Christian Art in Greater Syria and Egypt: A Triptych of the Ascension with Military Saints Reattributed," *Al-Masaq*, 12 (2000), pp. 22–5. Dated in this period, it is clearly in the era of widespread Crusader interest in the imagery of mounted soldier saints, and these examples at Sinai and the Egyptian monastery of St. Anthony may have been stimulated by Crusader examples.

806. In the narrative images of illustrated manuscripts the iconography is somewhat different. Besides lances we find also swords and shields on a regular basis. When a mounted soldier carries a lance and a shield, then he rarely also has a sword, and vice versa. See Buchthal, *MPLKJ*, pls. 130–5.

807. It is interesting that in the handsome Byzantine steatite icons with mounted soldier saints that appear a bit later, in the fourteenth century for the most part, the figures brandish a sword in their free hand. See I. Kalavrezou-Maxeiner, *Byzantine Icons in Steatite*, 2 vols., Vienna, 1985. These examples seem to suggest that the iconography of these soldier saints can vary by medium, but that icons and fresco paintings have the most in common.

808. Weitzmann, "Icon Painting," [3 (1966)], pp. 71–2; and Cormack, "A Crusader Painting of St. George," *Burlington Magazine*, 126 (1984), pp. 133–4.

809. See the informative discussion of Mamluk and Mongol horse archery in the second half of the thirteenth century by J. M. Smith, Jr., "Ayn Jalut: Mamluk Success or Mongol Failure?" *Harvard Journal of Asiatic Studies*, 44 (1984), pp. 307–45, esp. 314–19 (Mongols), and 322–4 (Mamluks).

810. Sotiriou (*Icones du Mont Sinai*, 2, p. 171, no. 187, 1, fig. 187) identified this mounted saint as St. George, but Weitzmann ("Icon Painting," [3 (1966)], p. 71) corrected this on the basis of the Greek inscription on both this icon and the Sts. Sergios and Bacchus icon.

811. Weitzmann, ("Icon Painting," [3 (1966)], p. 72) points out that it was "Sotiriou who refers to a discussion in Talbot-Rice's book on the icons of Cyprus (D. Talbot-Rice, *Icons of Cyprus*, London, 1937, p. 103), where a passage is quoted from Jacopo di Verona. This traveller, who had visited Cyprus in 1335, tells of the habit of the Cypriote women of wearing black cloaks over their heads as a sign of sorrow for the loss of the city of Acre." Weitzmann demurs at this interpretation in the case of this icon and says it

is more likely the fall of Jerusalem in 1244 that inspired it. I offer a different interpretation later.

812. Hunt, "A Woman's Prayer to St Sergios in Latin Syria," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 99–106. Hunt also discusses other more or less contemporary representations of mourning women in Syria here. This was, unfortunately, an all-too-common theme in these times of constant military action.

813. Willelmi Tyriensis Archiepiscopi, *Chronicon*, ed. R. B. C. Huygens, *Corpus Christianorum: Continuatio Mediaevalis*, LXIXII A, Turnholt, 1986, Bk. 19, ch. 25, p. 898; see also Bk. 22, ch. 18, 1034.

814. Riley-Smith, *The Knights of St. John*, vol. 1, p. 325.

815. C. Marshall, *Warfare in the Latin East, 1192–1291*, Cambridge, 1992), pp. 58–60, 148–9, 262; A. Forey, *The Military Orders from the Twelfth to the Early Fourteenth Centuries*, Toronto and Buffalo, 1992, p. 57; H. E. Mayer, *The Crusades*, trans. J. Gillingham, 2nd edn., Oxford, 1988, pp. 154, 169; J. Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus: 1050–1310*, London, 1967, pp. 230, 280, 324, 325, 328, 427; I. Sterns, "The Teutonic Knights in the Crusader States," *HC*, 2, vol. V, eds. N. P. Zacour and H. W. Hazard, pp. 338–9.

Although there are references to *turcopoles* in Crusader military service during the thirteenth century, as indicated earlier, none of these discussions has referred to images of *turcopoles*. The only published identification of a *turcopole* known to me is by D. Nicolle, *Knight of Outremer: 1187–1344*, London, 1996, p. 24, where he identifies the icon of St. Sergios and the kneeling woman (no. 80 as follows: "While the Saint is portrayed as a light cavalry *turcopole*, the donor is a Latin woman wearing the long black veil adopted by the ladies of Outremer"). So far I have been unable to find other clearly identifiable contemporary images.

816. R. C. Smail, *Crusading Warfare: 1097–1193*, Cambridge, 1956, pp. 111–12, 179–80, 184, for the twelfth century. In the thirteenth century *turcopoles* appear in various Crusades and even on Cyprus: K. M. Setton, ed., *HC*, 2, pp. 388, 424, 603, 620. See also the comments of D. Nicolle, *Arms and Armour*, 1, p. 319.

817. "Sergiopolis-Rusafah," in *The Oxford Dictionary of Byzantium*, ed. A. P. Kazhdan, New York and Oxford, 1991, vol. 3, pp. 1877–8, and see also the entry on "Sergios and Bakchos," p. 1879.

818. Hunt, "A Woman's Prayer to St Sergios in Latin Syria," pp. 113–23.

819. In the unlikely event that the loss of a city could have had anything to do with the image of the woman and St. Sergios on this icon, we might consider the city of Resafa. Resafa had been in Muslim hands for some time by 1260, but in that year it was occupied by the Mongols and abandoned by its population. This serious loss to what had been formerly a very important Christian city must have been the source of sorrow among Syrian Christians born there, but there is no way to know whether this had anything to do with the imagery on our icon. See R. Amitai-Preiss, "Northern Syria between the Mongols and Mamluks: Political Boundary, Military Frontier, and Ethnic Affinities," *Frontiers in Question: Eurasian Borderlands, 700–1700*, ed. D. Power and N. Standen, New York, 1999, p. 142.

820. Weitzmann, "Icon Painting," [3 (1966)], p. 72.

821. See, for example, the Sinai icon (no. 1463) from the first half of the thirteenth century, which has both St. George and St. Theodore carrying a white banner with a red cross. In manuscripts, there is, for example, a *History of Outremer* by William of Tyre illustrated in Northern France in the third quarter of the thirteenth century that has such banners carried by the Crusaders at Nicaea on the First Crusade (fol. 22v) and later at the siege of Tyre (fol. 177). See Folda, *Crusader Manuscript Illumination*, figs. 175 and 177. It should be noted, of course, that the soldiers represented in this codex carry many banners of which this is only one and that the heraldry is a matter of fantasy.

822. See, for example, Folda, *ACHL* 1, pp. 25 (Dorylaeum), 28 (Antioch), and 32 (Jerusalem).

823. O. Demus, *Romanesque Mural Painting*, London, 1970, pp. 413, 414, 432. This chapel with its frescoes is one possible source of confusion; another is the nineteenth-century perception and artistic representation of the military orders. See E. Siberry, "Victorian Perceptions of the Military Orders," *The Military Orders: Fighting for the Faith and Caring for the Sick*, ed. M. Barber, London, 1994, pp. 365–72.

824. Demus, *Romanesque* p. 414, fig. 191.

825. Ibid., p. 414, fig. 190. Other variations are also possible. See, for example, the depictions of Templars in the mid-thirteenth-century frescoes of the Church of San Bevignate in Perugia: H. Nicholson, *The Knights Templar: A New History*, Phoenix Mill, England, 2001, pp. 78, pl. 2.19, and 125, pls. 4.7 and 4.8.

826. See M. Barber, *The New Knighthood: A History of the Order of the Temple*, Cambridge, 1994, pp. 179–80, 188, 193, 219. Barber also comments on the frescoes in the Cressac chapel on p. 202.

827. S. Lewis, *The Art of Matthew Paris in the Chronica Majora*, Berkeley, Los Angeles, and London, 1987, p. 91 (London, Brit. Lib. MS Royal C.VII, fol. 42v).

828. Lewis, *The Art of Matthew Paris*, p. 90 (Cambridge, CCC MS 26, p. 220).

829. Lewis, *The Art of Matthew Paris*, pp. 239 and 289 (Cambridge, CCC MS 16, fols. 141 and 170v).

830. For some color reproductions of the illustrations by Matthew Paris, see, H. Nicholson, *The Knights Templar: A New History*, Phoenix Mill, England, 2001, pp. 30, pl. 1.7, and p. 166, pl. 6.5. A reference book for these insignia is by I. Heath, *Armies and Enemies of the Crusades, 1096–1291*, Lancing, West Sussex, 1978, pp. 74–8.

831. Weitzmann, "Annotations, 1980," *Studies in the Arts of Sinai*, [12 (1982], p. 435, "p. 72." Weitzmann proposed to rename the workshop that of the "Apulian Painters" or the "South Italian Painters." This seems problematic because the style these painters are working in appears to be a Veneto-Byzantine Crusader style, not a south Italian style.

832. Mouriki, "Thirteenth Century Icon Painting in Cyprus," p. 71.

833. Pace ("L'analisi 'stilistica' come metodologia storica: possibilità e limiti," pp. 515–17) calls attention to these differences.

834. G. and M. Sotiriou, *Icones du Mont Sinaï*, 2, p. 171, 1, fig. 187.

835. J. Leroy, "Decouvertes de peintures chrétiennes en Syrie," *Les Annales Archéologiques Arabes Syriennes*, 25 (1975), pp. 97–9, 104.

836. Hunt, "A Woman's Prayer to St Sergios in Latin Syria," pp. 106–10.

837. Mouriki, "Thirteenth Century Icon Painting in Cyprus," p. 71.

838. Mouriki, "Thirteenth Century Icon Painting in Cyprus," p. 69; J. Leroy, *Les Manuscrits Syriaques à Peintures conservés dans les bibliothèques d'Europe et d'Orient*, II, Paris, 1964, pls. 104.2, 105.4.

839. If, however, we could somehow determine that the reason these icons are presently in the collection of the Monastery of St. Catherine is that each was done explicitly to serve as a pilgrim's donation to the monastery, then we would have to reconsider this attribution.

840. Weitzmann, "Crusader Icons," [3 (1966)], p. 81. Byzantine Icon (from the collection of the Monastery of St. Catherine on Mount Sinai: 117.3 × 79.5 cm).

841. Mouriki ("Thirteenth Century Icon Painting in Cyprus," p. 67) is a notable example of a slightly different grouping. My analysis essentially differs with hers only in terms of separating out a later phase of the icons in this group and enlarging somewhat the number of icons included.

842. Icon from the collection of the Monastery of St. Catherine on Mount Sinai (unpublished).

843. Icon from the collection of the Monastery of St. Catherine on Mount Sinai: 41.6 × 33.0 cm, with Greek inscriptions. See Weitzmann, "Icon Painting," [3 (1966)], p. 66; and idem, *The Icon*, [11 (1982)], pp. 205, 228.

844. Byzantine icon from the collection of the Monastery of St. Catherine on Mount Sinai: 23.0 × 18.5 cm, with Greek inscriptions. See G. and M. Sotiriou, *Icones du Mont Sinaï*, 2, p. 143, and 1, fig. 163; Weitzmann, "Icon Painting," [3 (1966)], p. 66; and idem, *The Icon*, [8 (1978)], pp. 36, 98–9, pl. 30.

845. Byzantine icon from the collection of the Monastery of St. Catherine on Mount Sinai: 23.1 × 18.6 cm, with Greek inscriptions. See Weitzmann, *Ikonen aus dem Katherinenkloster*, [10 (1980)], pp. 4–5, no. 11 and pl. 11; and idem, "*Loca Sancta* and the Representational Arts of Palestine," *DOP*, 28 (1974), p. 53, and fig. 48 (N. B. he also illustrates another example of this type, with Joachim and the Virgin and Child *H THS BATOU*, as fig. 49).

846. Weitzmann cites the names of Abraham, Isaiah, Moses, Joachim, Symeon, George, Theodore, and Sabas, from those ten examples, but no St. John the Baptist. See, for example, Weitzmann, *The Icon*, [8 (1978)], p. 98.

847. These works include the bilateral icon of the Crucifixion and the Anastasis (no. 1568), the diptych of the Virgin Kykkotissa with St. Procopius (no. 1783), and the iconostasis dossal with Christ and seven bust-length saints (no. 1003).

848. E. Maurer, "Das Kloster Königsfelden," *Die Kunstdenkmäler des Kantons Aargau*, III, Kunstdenkmäler der Schweiz, 32 (Basel, 1954), p. 256; and Weitzmann, "Icon Painting," [3 (1966)], p. 62.

851. For the cassa sepolcrale of Giuliana, died 1262, see R. Pallucchini, *La Pittura Veneziana del Trecento*, Venice and Rome, 1964, p. 11 and figure 8; and the catalogue entry with detailed discussion in *Venezia e bisanzio*, eds. I. Furlan, M. Muraro, R. Pallucchini, et al., Venice, Palazzo Ducale, 1974, entry no. 74. I am indebted to my colleague Dott.ssa A. Dorigato, for drawing my attention to this important catalogue entry. See also the recent introductory guidebooks of G. Romanelli, *Museo Correr*, Milan, 1984, pp. 40–1; and E. Bianchi, N. Righi, and M. C. Terzaghi, *Il Museo Correr di Venezia*, Milan, 1997, p. 30 with a color plate.

852. See the Sinai icons nos. 260, cat. 29; 273, cat. 31; 460, cat. 44; 544, cat. 48; 1118, cat. 77; 1144, cat. 79; 1418, cat. 88; 1426, cat. 89; 1454, cat. 91; 1783, cat. 104 (St. Procopios); 1802, cat. 105; and 1966, cat. 113, in the Appendix.

853. A. Neff, "Byzantium Westernized, Byzantium Marginalized: Two Icons in the *Supplicationes variae*," *Gesta*, 38 (1999), p. 81.

854. G. Cattin and G. Mariani Canova, "Un prezioso Antifonario veneziano del Duecento: miniature, liturgia e musica," *Arte Veneta*, 35 (1981), pp. 9–26.

855. See P. Huber, *Bild und Botschaft. Byzantinische Miniaturen zum Alten and Neuen Testament*, Zurich, 1973, pls. 6a–c; and Venice, Palazzo Ducale, *Omaggio a San Marco: Tesori dall'Europa*, eds. H. Fillitz and G. Morello, Milan, 1994, pp. 186–7, no. 73.

856. It should be noted that I retain the use of this title to avoid confusion in relation to the illustrated manuscripts first published by Buchthal in MPLKJ, pp. 68–87, and my discussion in Folda, *Crusader Manuscript Illumination*, pp. 77–116. Recent editions of this text have used other titles and discussed the existence of multiple titles for this work. See M. de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, vol. 2, Orléans, 1999, pp. 225–6, sect. III, d.

857. P. W. Edbury and J. G. Rowe, *William of Tyre: Historian of the Latin East*, Cambridge, 1988, pp. 23–31.

858. The date of William's death is still uncertain, with the possibilities being 29 September 1184, 1185, or 1186. For a summary of these options, see Edbury and Rowe, *William of Tyre*, p. 22 and n. 33. I am inclined to think that William would have carried his history further had he lived beyond 1184.

859. See the discussion of these continuations and the manuscript traditions in Chapter 2 and subsequent chapters, with regard to the historical sources.

860. M. R. Morgan, *The Chronicle of Ernoul and the Continuations of William of Tyre*, Oxford, 1973.

861. See J. Pryor, "The *Eracles* and William of Tyre: An Interim Report," *Outremer*, pp. 270–93.

862. Besides the old study by F. Ost, *Die altfranzösische Übersetzung der Geschichte der Kreuzzuge Wilhelms von Tyrus*, Halle, 1899, based on the *RHC* edition, a dissertation in progress in the 1960s on the translation of the Latin text based on Paris, B.N. MS fr. 2630, has never seen the light of day. Further study on this problem remains a desideratum.

863. See earlier discussion in the first part of this chapter on the *History of Outremer* now in Paris, B. N. MS fr. 9081, done in Paris in the 1240s.

864. We follow here the argument of Marijke de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, vol. 2, pp. 223–4, instead of later dates argued by Guy Raynaud de Lage, who believes the text remained unfinished in 1213, and the original proposal for the dating of this text to 1223–30 by P. Meyer, "Les Premières Compilations françaises d'Histoire ancienne," *Romania*, 14 (1885), pp. 1–81.

865. See Buchthal, *MPLKJ*, 68–9, D. Oltrogge, *Die Illustrationszyklen zur "Histoire ancienne jusqua'à César," (1250–1400)*, Frankfurt am Main, Bern, New York, and Paris, 1989, pp. 9–12; and M. de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, 2, pp. 232–40.

866. Folda, *Crusader Manuscript Illumination*, pp. 38, 175, and for details on its workshop characteristics, see J. Folda, "The Illustrations in Manuscripts of the *History of Outremer*, by William of Tyre," Ph.D. diss., Johns Hopkins University, Baltimore, 1968, vol. 1, pp. 42–3. See now, L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, III Colloquio Internzionale Medioevo Romanzo e Orientale, 1999, p. 90.

The main content/decoration of Paris, B.N. MS fr. 9086 is as follows: Old French translation of William of Tyre's *History of Outremer* (Books 1–22), with continuation to 1232, 431 fols., with 56 gatherings of 8 folios each.

Text in two columns of 36 lines each, justification of 24.1 × 14.9 cm, interval 1.45 cm.
No miniatures, large calligraphic red and blue initials at the start of each book, small calligraphic red and blue initials for each chapter.
Acre, *c.*1250–75.

867. See M. and R. Rouse, *Manuscripts and Their Makers*, vol. 1, pp. 17–89.

868. For the literature on MS fr. 2628, see Buchthal, *MPLKJ*, pp. 87–9, 151, with the older studies, Folda, *Crusader Manuscript Illumination*, pp. 22, 27–32, 36, 48, 49, 54, 82, 84, 86, 88, 89, 90, 112, 113, 115, 134–6, 159, 216. See now also, Minervini, "Produzione e circolazione di manoscritti negli stati crociati," p. 90.

The main content and decoration of Paris, B.N. MS fr. 2628 is as follows: Old French translation of William of Tyre's *History of Outremer* (Books 1–22) with continuation to 1264 (Books 23 ff.);

331 folios, with 27 gatherings of 12 folios each, the final gathering of 7 folios.
Hand 1 ends on fol. 327 with events of 1247. Hand 2 includes fols. 328v–331v.
Text in two columns of 40 lines each, justification of 25.5 × 16.4 cm.
27 historiated initials, of which 22 belong to Books 1–22, and the remaining 5 belong to the continuation.
Acre, *c.*1260, except for the final miniature: Acre, *c.*1280.

Fol. 1r, Book 1, (L)es ancienes estoires . . . (initial: 9.9 × 9.3 cm):

1. Emperor Heraclius and Modestus bishop of Jerusalem worship at the Holy Sepulcher.
2. Emperor Heraclius and Modestus ride to the city of Jerusalem with their entourage.

Fol. 14r, Book 2, (V)enus estoit li mois . . . (initial: 7.8 × 7.0 cm):

1. Godefroy de Bouillon and his Crusaders set out for the Holy Land.
2. The Crusaders arrive at Constantinople.

Fol. 22r, Book 3, (D)e la cite de Nique . . . (initial: 8.0 × 7.3 cm):

1. The Crusaders attack Nicaea.
2. The Crusaders capture the wife of Qilij Arslan.

Fol. 29v, Book 4, (O)r aves oi comment . . . (initial: 7.5 × 7.8 cm):

1. The campaign of Count Baldwin in northern Syria.
2. The Crusaders attack Antioch.

Fol. 37v, Book 5, (V)eant le seignor de antioche . . . (initial: 7.7 × 8.0 cm):

1. The Crusaders enter Antioch: Bohemond climbs the ladder assisted by Firuz.
2. The Crusaders ride up to the gates of Antioch.

Fol. 45v, Book 6, (I)a estoient bien . . . (initial: 9.0 × 7.5 cm):

1. The Citadel of Antioch.
2. The Turkish camp outside Antioch with the commander, Korbugha.

Fol. 53v, Book 7, (C)es choses . . . (initial: 7.5 × 7.3 cm):

1. The Crusader envoys are received by Emperor Alexius of Byzantium.
2. Discussion and dissension among the Crusders who want to resume the march to Jerusalem.

Fol. 62v, Book 8, (V)eritez est . . . (initial: 7.9 × 7.3 cm):

1. The Crusader arrives at the city of Jerusalem.
2. The Crusader camp before Jerusalem; one soldier helps another remove his chain mail.

Fol. 71r, Book 9, (S)i come vos avez... (initial: 7.1 × 7.1 cm):

1. The Crusaders pray at the Holy Sepulcher.
2. Discussion among the Crusaders concerning the choice of a leader.

Fol. 79r, Book 10, (R)ois fu li dus godefroi... (initial: 7.75 × 7.4 cm):

1. The death of Godefroy de Bouillon.
2. The coronation of King Baldwin I by Patriarch Daimbert.

Fol. 89v, Book 11, (E)stez ert ia passez... (initial: 7.2 × 7.2 cm):

1. Bohemond of Antioch sails from the Holy Land.
2. Bohemond arrives in Apulia.

Fol. 103r, Book 12, (X)erces fu un puissanz rois... (initial: 7.7 × 7.1 cm): (clockwise)

1. The death of King Baldwin I in Egypt.
2. The city of Bethlehem.
3. The coronation of King Baldwin II.
4. A mourner.

Fol. 114r, Book 13, (F)ors estoit a grant merveille... (initial: 7.1 × 7.45 cm):

1. The siege of Tyre: a siege engine.
2. The siege of Tyre: Knights on horseback attack.

Fol. 124r, Book 14, (R)ois fu de ierusalem... (initial: 7.2 × 6.95 cm):

1. The funeral of King Baldwin II.
2. The coronation of King Fulk I.

Fol. 134v, Book 15, (A)pres le mois... (initial: 7.2 × 7.3 cm):

1. The death of the Byzantine Emperor John.
2. The coronation of Emperor Manuel.

Fol. 146v, Book 16, (N)e demora gaires... (initial: 7.5 × 7. 8 cm):

1. Fulk and Melisende ride out with an attendant.
2. Fulk is fatally injured when his horse throws him while chasing a hare.

Fol. 160r, Book 17, (C)onraz lemperes dalemaigne... (initial: 7.0 × 7.4 cm):

1. Conrad, emperor of Germany, Louis VII of France, and King Baldwin III at the council of Acre on the Second Crusade.
2. The Crusaders led by Louis VII attack Damascus.

Fol. 175r, Book 18, (O)r parlerons... (initial: 7.9 × 8.0 cm):

1. The patriarch of Antioch is abused by Raynauld de Chatillon by being exposed on a tower of the citadel.
2. Raynauld and his followers look up to see the patriarch enduring his ordeal.

Fol. 192r, Book 19, (R)emes estoit... (initial: 7.5 × 7.4 cm):

1. The funeral of King Baldwin III.
2. The coronation of King Amaury I by the patriarch of Jerusalem.

Fol. 205v, Book 20, (U)ne chose... (initial: 7.2 × 7.75 cm):

1. King Amaury receives envoys from the Byzantine Emperor at Tyre.
2. King Amaury invades Egypt: the attack on Balbis.

Fol. 218v, Book 21 (Mout fu granz li duels... (initial: 7.7 × 7.8 cm):

1. The funeral and mourning of King Amaury in Jerusalem.
2. A man and a woman sorrowfully discuss the death of the king.
3. The coronation of King Baldwin IV.

Fol. 230v, Book 22, (B)eymons li princes dantioche... (initial: 7.6 × 7.9 cm):

1. Baldwin IV gives his sister, Sibylle, to Guy de Lusignan to marry.
2. The patriarch of Jerusalem officiates at the ceremony of their marriage.

Fol. 246r, Book 23, ch 2, (E)n ce que li rois... (initial: 8.0 × 7.8 cm):

1. The death of the leper King, Baldwin IV.
2. The coronation of King Baldwin V.

Fol. 293v [Book 24], (I)e vos dirai... (initial: 7.0 × 6.7 cm):

1. The Crusaders camped before Constantinople.
2. The Crusader assault on the sea walls of Constantinople by ship.

Fol. 300v [Book 25], (S)i tost come... (initial: 7.2 × 7.1 cm):

1. John of Brienne arrives in the Holy Land at Acre and is met by Patriarch Albert.
2. John of Brienne is crowned king at Tyre.

Fol. 313r [Book 26], (I)sabel lemperis fille do roi... (initial: 8.1 × 7.2 cm):

1. Isabella the empress dies in childbirth.
2. Emperor Frederick II arrives in Cyprus.

Fol. 89v, rubrics: Si comence la voire estoire de troies (panel: 12.5 × 8.5 cm).

1. Pelias and Jason.
2. The sailing of the Argo.

Fol. 96v, rubrics: Coment hector fist merveilles quant il fu venus al estor, et come achille locist. Et come grant doulor fu demenee (panel: 8.1 × 7.3 cm).

1. Achilles kills Hector on the battlefield.

Fol. 102v, rubrics: Coment la royne panticelee de femenie vint au secors de cels de troies (panel: 7.6 × 7.6 cm).

1. Queen Penthesilea marches to the aid of the Trojans.

Fol. 103r, rubrics: Coment pirus le fiz Achilles vint en lost por vengier son pere (panel: 7.0 × 7.4 cm).

1. The battle between Queen Penthesilea and Pyrrhus, son of Achilles.

Fol. 114r, rubrics: Coment eneas revint en cesile (panel: 7.5 × 7.5 cm).

1. Dido commits suicide as Aeneas sails away.

Fol. 115r, rubrics: Coment cil dathenes estoient sugiet a cil de crete (panel: 7.7 × 7.6 cm).

1. The Minotaur.

Fol. 125v, rubrics: Coment la royne Camilla demanda a turnus la premiere bataille contre eneas (panel: 7.5 × 7.5 cm).

1. Queen Camilla battles Aeneas.

Fol. 130v, rubrics: Si comence lestorement de la cite de rome (panel: 7.6 × 7.4 cm).

1. The building of the city of Rome.

Fol. 135r, rubrics: Si comence des concelles le grant afere (panel: 7.6 × 7.5 cm).

1. Brutus as consul.

Fol. 150v, rubrics: Coment nabugodenosor comanda a holofernes qui alast sur ciaus qui contre lui estoient (panel: 7.6 × 7.5 cm).

1. Holofernes marches to Jerusalem.

Fol. 151v, rubrics: Coment iudith fu menee devant le duc holofernes (panel: 7.4 × 7.6 cm).

1. Judith is brought before Holofernes in his tent.

Fol. 166r, rubrics: Si comence lestoire de alixandre le grant roi de macedoine qui conquest tot le monde (panel: 7.5 × 7.5 cm).

1. Alexander on horseback.

Fol. 170v, rubrics: Coment alixandre sagenoilla contre le nom de dieu (panel: 8.0 × 8.7 cm).

1. Alexander kneels before the high priest in Jerusalem.

Fol. 171v, rubrics: Coment la royne damazone vint a alixandre (panel: 7.8 × 7.4 cm).

1. Alexander on the wheel of fortune.

Fol. 172v, rubrics: Que cil qui estoient sur les olifanz greverent mult la gent alixandre (panel: 7.8 × 8.5 cm).

1. Alexander and his army battle the Indians on elephants.

Fol. 176r, rubrics: Coment la gent alixandre envairent celle beste (panel: 8.0 × 7.5 cm).

1. The beast of India with three horns.

Fol. 178r, rubrics: Coment la beste qui avoit II. testes corut sus as genz le roi alixandre (panel: 7.9 × 7.4 cm).

1. The beast of India with two heads.

Fol. 181v, rubrics: Coment la voiz del arbre dist au roi alixandre que iames nentreroit en sa terre (panel: 8.4 × 8.0 cm).

1. Alexander listens to the magic speaking tree in India.

Fol. 190r, rubrics: Que le roi pirus vint en laye de ciaus de tarente et si amena ces olifanz (panel: 7.6 × 7.5 cm).

1. Pyrrhus comes to the aid of the people of Tarentum.

Fol. 204v, rubrics: Que adonques ot pais a rome et que nulles gens ne les agrevoient (panel: 7.5 × 7.4 cm).

1. The temple of Janus.

Fol. 249r, rubrics: Coment le roi iugurta fu pris et mene a rome ou grant ioie fu demenee (panel: 8.9 × 8.5 cm).

1. The triumph of Marius.

Fol. 270r, rubrics: Coment pompeius repaira a rome (panel: 7.4 × 8.1 cm).

1. The triumph of Pompey.

Fol. 274v, . . . que totes ces genz furent tornes a desconfiture . . . ne fucent les forest granz et ramees. [end]

876. Buchthal, *MPLKJ*, p. 69.

877. See, J. Folda, "A Crusader Manuscript from Antioch," *Atti della Pontificia Accademia Romana di Archeologia: Rendiconti*, 42 (1969–1970), pp. 283–98; and Buchthal, *MPLKJ*, pp. 101–3, both with older bibliography. See now also, Minervini, "Produzione e circolazione di manoscritti negli stati crociati," pp. 87–8.

The main content and decoration of Rome, Biblioteca Apostolica Vaticana, MS Pal. Lat. 1963 is as follows: *History of Outremer*, in Old French.

258 fols., 35.5 × 27.1 cm.
Text in two columns of 41 lines each.
Justification: 22.2 × 15.3 cm, interval: 1.6 cm.

31 gatherings of 8 folios each, and one gathering at the end of 10 folios.

One miniature panel, 20 historiated initials (one historiated initial missing).

Antioch, c. 1260s.

Fol. 1r, book 1, (L)es ancienes... (small panel miniature), author portrait: William of Tyre in his study.

Fol. 15r, book 2, (V)enuz estoit... (historiated initial), Godefroy de Bouillon leads his army to the Holy Land.

Fol. 23v, book 3, (D)e la cite de nique... (historiated initial is cut out).

Fol. 31v, book 4, (O)r avez... (historiated initial), the army of the First Crusade marches toward the Holy Land.

Fol. 40r, book 5, (V)oiant le seignor... (historiated initial), the Crusaders attack Antioch.

Fol. 49r, book 6, (L)a estoient... (historiated initial), the Crusaders fighting inside Antioch.

Fol. 59r, book 7, (C)es choses... (historiated initial), a Crusader envoy to the emperor of Byzantium.

Fol. 69r, book 8, (V)eritez est que..., (historiated initial), the city of Jerusalem.

Fol. 78v, book 9, (S)i com... (historiated initial), discussions about the choice of a Crusader ruler; a Crusader baron and his wife pay hommage to Godefroy de Bouillon.

Fol. 88r, book 10, (R)ois fu... (historiated initial), King Baldwin I enthroned.

Fol. 100r, book 11, (E)stez estoit... (historiated initial), Bohemond gives Tancred responsibility for Antioch; Bohemond and Daimbert, patriarch of Jerusalem, sail to the West.

Fol. 115r, book 12, (X)erses fu... (historiated initial), Xerxes, king of Persia, and his court.

Fol. 126v, book 13, (F)orz estoit... (historiated initial), the Crusaders camped before the city of Tyre.

Fol. 137v, book 14, (R)ois fu... (historiated initial), King Fulk enthroned.

Fol. 148r, book 15, (A)pres le tens... (historiated initial), the Byzantine Emperor leads his army into Syria.

Fol. 160r, book 16, (N)e demora... (historiated initial), the coronation of Baldwin III watched by Queen Melisende.

Fol. 173v, book 17, (C)onrtz li emperes... (historiated initial), The Second Crusade: the Council of Acre.

Fol. 188r, book 18, (O)r vos parlerons... (historiated initial), The patriarch of Antioch is abused by Raynaud de Chatillon; Raynaud de Chatillon orders his men to take the patriarch to the citadel.

Fol. 205r, book 19, (V)emes estoit... (historiated initial), The coronation of Amaury I.

Fol. 232r, book 21, (M)lt fu granz... (historiated initial), The funeral of Amaury I.

Fol. 243v, book 22, (B)uymons... (historiated initial), Marriage of Sibylle, sister of Baldwin IV, to Guy de Lusignan; Patriarch Heraclius rides to Antioch.

878. Folda, "A Crusader Manuscript from Antioch," p. 286 and nn. 13 and 14.

879. The color of Bohemond's banner is known, for example, from Fulcher of Chartres, *Historia Hierosolymitana 1095–1127*, ed. H. Hagenmeyer, Heidleberg, 1913, ch. XVII, p. 234. The artist could have known it from word of mouth or from the banner used by Bohemond's successors in Antioch.

880. See, for example, the *Hortus Conclusus* in "Canticles" from the Toledo *Bible Moralisée* (A. Delaborde, *La Bible Moralisée*, vol. IV, Paris, 1921, pl. 633 (Toledo, Biblia de San Luis, vol. II, fol. 79v).

881. J. Folda, "Problems in the Iconography of the Art of the Crusaders in the Holy Land: 1098–1291/1917–1997," *Image and Belief*, ed. C. Hourihane, Princeton, 1999, p. 14.

882. D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd rev. edn., London, 1995, p. 125–39.

883. Folda, "A Crusader Manuscript from Antioch," p. 296.

884. Buchthal, *MPLKJ*, p. 102.

885. Runciman, *A History of the Crusades*, 3, p. 304.

886. We note the heavily bearded faces, the strongly outlined and shaded eyes, and the sense for the organic structure of the body even when it is quite elongated or covered with flat patterned drapery. As a general comparison we can look at the initials in an early Exultet Roll from Bari with regard to, for example, the Book 19 initial in MS Pal. Lat. 1963. See M. Avery, *The Exultet Rolls of South Italy*, II, Princeton, 1936, pl. VI and pp. 11 ff. (Bari roll no. 1). No equally relevant comparison can be found in Syriac illumination that is the other tradition this artist's work might suggest.

887. We note the motifs of arched and domed architecture, the imperial imagery of the red buskins worn by rulers, and the frontal or hieratic compositions as seen in the initial of Book 20, the most byzantinizing of all the illustrations in MS Pal. Lat. 1963.

888. In addition to this, we observe the basic formulae for cities, men on horseback, and battles in cities which are found in the Moralized Bibles and adapted for use in MS Pal. Lat. 1963. See Folda, "A Crusader Manuscript from Antioch," pp. 287–8.

889. Runciman, *A History of the Crusades*, 3, p. 278.

890. It is a mystery how this codex was taken from Antioch to Norway to become part of the library of Queen Isabella between 1293 and 1358. Count Paul Riant speculated that the manuscript may have been bought in the Latin East by a certain Brother Maurice who was the negotiator of the marriage of Isabella Bruce and Erik II Magnusson. See P. Riant, *Expéditions et Pélerinages des Scandinaves en Terre Sainte au temps des Croisades*, Paris, 1865, p. 440, n. 4.

891. The only other Crusader manuscript known to come from Antioch is a copy of the *De Arte Rhetorica* now in the Ambrosiana in Milan (MS E.7), dated 1154. It is unillustrated. See F. Steffens, *Lateinische Paläographie*, Berlin and Leipzig, 1929, 2nd edn., pl. 83.

892. Buchthal, *MPLKJ*, pp. 97–8. Buchthal's elitest criteria for taste and style emerges vividly here. Yet even he must have realized in light of some of the notable artistic commissions and legal contributions made by resident Frankish Crusaders that not all of the "military caste" could be characterized in this way.

893. On this point I differ from Buchthal, who believed that the earliest surviving cycle from metropolitan France when compared with a William of Tyre codex now in Lyons, Bibl. Mun. MS 828, *c.*1280, provides evidence to suggest that a Western *History of Outremer* of comparatively early date and outstanding artistic merit was available in Acre for use by Crusader artists. See Buchthal, *MPLKJ*, pp. 98–9.

894. Buchthal, *MPLKJ*, p. 98.

897. Icon in the collection of the Monastery of St. Catherine on Mount Sinai: 43.0 × 30.0 cm. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2, pp. 178–9, no. 196, 1, fig. 196.

898. Icon in the collection of the Monastery of St. Catherine on Mount Sinai: 45.0 × 31.0 cm. See G. and M. Sotiriou, *Icones du Mont Sinai*, 2, p. 181, no. 199, 1, fig. 199.

899. Unpublished icon in the collection of the Monastery of St. Catherine.

900. Unpublished icon in the collection of the Monastery of St. Catherine.

901. Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, ed. K. Manafis, pp. 114, 176, nos. 49 and 50.

The icon of St. John the Baptist is not published.

The icon of Christ Pantokrator measures 98.0 by 65.6 cm. It is published by Weitzmann, *Ikonen*, [10 (1980)], no. 18 (here dated to the 15th century!); M. Chatzidakis, "L'Evolution de l'Icone aux 11e–13e siècles et la Transformation du Templon," *Actes du Congrès International d'Études Byzantines, Athènes*, 1976, I, Art et Archéologie, Athens 1979, pp. 360–1, pl. XLVIII; J. Galey, *Sinai and the Monastery of St. Catherine*, Garden City, 1980, fig. 94; and H. Belting, *The Image and Its Public in the Middle Ages*, New York, 1990, fig. 51 (here published as an icon from Nicaea and dated in the twelfth century!).

902. Mouriki, "Icons from the 12th to the 15th Century," *Sinai*, ed. K. Manafis, p. 114.

903. Unpublished icon from the Monastery of St. Catherine on Mount Sinai.

904. Unpublished icon from the Monastery of St. Catherine on Mount Sinai.

905. Unpublished icon from the Monastery of St. Catherine on Mount Sinai.

906. Unpublished icon from the Monastery of St. Catherine on Mount Sinai.

907. Weitzmann, "Crusader Icons and Maniera Greca," [14 (1984)], pp. 152–3.

908. C. Baltoyanni, "The Mother of God in Portable Icons," *Mother of God*, ed. M. Vassilaki, Athens, 2000, pp. 141–4. In the West, this iconography is known as the "Maria lactans." For Byzantine thirteenth-century examples, see D. Mouriki, "Variants of the Hodegetria

on two Thirteenth-Century Sinai Icons," *Cahiers Archéologiques*, 39 (1991), pp. 153–82. This iconography also appears in Armenian painting around 1300, see S. der Nersessian, "Western Iconographic Themes in Armenian Manuscripts," *Gazette des Beaux-Arts*, 26 (1944), pp. 76–9.

909. For Armenian painting, see S. der Nersessian and S. Agemian, *Miniature Painting in the Armenian Kingdom of Cilicia*, Washington, D.C., 1993, pp. 22–3, 27–8, 83–4, 135, 158–61. For Syriac painting, see L.-A. Hunt, "Manuscript Production by Christians in 13th–14th Century Greater Syria and Mesopotamia and Related Areas," *ARAM*, 9–10 (1997–1998), pp. 289–336, for example, p. 299; and J. Leroy, *Les Manuscrits Syriaques à Peintures conservées dans les Bibliothèques d'Europe et d'Orient*, 2 vols., Paris, 1964.

It is interesting that we have five portraits of King Levon, successor to the Armenian king, Hethoum I, in manuscript illumination, but none of Hethoum I himself, except his "portrait" in the Nativity scene on the Sinai iconostasis beam (no. 1744). See der Nersessian and Agemian, *Miniature Painting*, 1, pp. 154–8.

910. Icon from the Monastery of St. Catherine on Mount Sinai: measurements, 43.0 × 31.0 cm, see G. Sotiriou and M. Sotiriou, *Icones du Mont Sinai*, I, fig. 171, and II, pp. 157–8; and Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 198–9.

911. Folda, *ACHL* 1, pp. 94–6, 316–17, 457, 462.

912. We seem to find diverse images of the throne for the Virgin as *sedes sapientiae* in the second half of the thirteenth century. See on the Kahn Madonna, J. Folda, "Icon to Altarpiece in the Frankish East: Images of the Virgin and Child Enthroned," *Italian Panel Painting of the Duecento and Trecento*, ed. V. Schmidt, *Studies in the History of Art*, 61 (2002), pp. 123–39.

913. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 199.

914. Ibid.

915. Icon from the Monastery of St. Catherine on Mount Sinai: measurements, 29.0 × 42.0 cm with the wings open. Damaged with large round hole cut in the middle of the central panel and serious splitting down the central axis of this panel as well. See G. and M. Sotiriou, *Icones du Mont Sinai*, II, pp. 175–6, I, fig. 193, Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], pp. 197–8, and idem, "Crusader Icons and Maniera Greca," [14 (1984)], pp. 152–3.

916. Weitzmann, "Thirteenth Century Crusader Icons," [1 (1963)], p. 197.

917. See Aaron in the upper left corner of the Byzantine icon from St. Catherine's Monastery on Mount Sinai, in G. Sotiriou and M. Sotiriou, *Icones du Mont Sinai*, I, fig. 56, II, pp. 73–5.

918. Weitzmann, *The Icon*, [8 (1978)], pp. 110–11, pl. 36.

922. A. M. Chazaud, "Inventaire et comptes de la succession d'Eudes, Comte de Nevers (Acre 1266)," *Memoires de la Société des Antiquaires de France*, 32 (1871), pp. 164–206.

923. Folda, "Saint-Jean d'Acre as a Cultural Center of the Latin Kingdom in the Thirteenth Century," *Crusader Manuscript Illumnation*, p. 16.

924. Jonathan Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land: Frankish Culture at the End of the Crusades*, eds. D. Weiss and L. Mahoney, pp. 45–62, comments on the importance of this document. He makes the important observation that it is often overlooked by historians because it was a document overlooked by R. Röhricht when he organized his *Regesta* of materials for the study of the Latin East (n. 71).

925. Paris, Archives Nationales, carton J., 821, no. 1.

> Roll A: The first roll is in two parts, originally sewn together:
>
> Part 1 is $16\frac{11}{16}$ inches long and $7\frac{9}{16}$ inches wide at its maximum point; parchment is very thin.
>
> Part 2 is $34\frac{13}{16}$ inches long and $7\frac{13}{16}$ inches wide at its maximum point; parchment is thick.
>
> Roll B: The parchment is $19\frac{1}{4}$ inches long and $7\frac{9}{16}$ inches wide at its maximum point; parchment is softer and of a more standard thickness than we find in roll A.
>
> Roll C: The parchment is $16\frac{7}{16}$ inches long and $5\frac{7}{8}$ inches wide at its maximum point; parchment is more standard thickness, but stiffer and much whiter than in rolls A and B.
>
> Roll D: The parchment is $23\frac{11}{16}$ inches long and $6\frac{15}{16}$ inches wide at its maximum point; parchment is also very stiff, as with roll C.
>
> Overall these different-sized pieces of parchement appear utilitarian and unexceptional in terms of their parchment, preparation, ink, lack of rulings, and the hands of the scribes. They look comparable to similar western European documents, and except for the content of the text there is nothing that would indicate they were done in Acre with regard to their codicological characteristics.
>
> Chazaud explains that in general the rough draft of these accounts is found on the verso of these rolls, and the fair copy or final version is found on the recto. In the case of roll A, however, the recto is too damaged to read, so we have to rely on the verso. Otherwise the organization of the text on recto and verso is irregular and more complicated than Chazaud leads us to believe.

926. We have verified the transcriptions of Chazaud compared with the originals. In principle his transcriptions are accurate; only the arrangement of the text and the locations of the texts on the various parchment sheets are sometimes difficult to follow.

927. Chazaud, "Inventaire et comptes," pp. 176–9.

928. Ibid., pp. 179–81.

929. Ibid., pp. 181–3.

930. "I chapel d'or à pierres et perles" is difficult to translate; it could be a very lavish golden hat, or a portable chapel made of gold cloth. Given the extraordinary expense, eighty livres tournois, it seems more likely to be a chapel in the context of other objects listed in this section of the inventory.

At this point in my discussion I would like to express my thanks to my colleague, Dr. Elizabeth Jane Burns of the University of North Carolina, who read through the text of these inventories with me, and put her expertise in Old French language and literature at my disposal in my attempt to understand the details of the text in this important document.

931. Ibid., p. 187.

932. Ibid., p. 189. See the discussion by D. Jacoby of these texts listed in the accounts of Eudes de Nevers: idem, "La littérature française dans les états latin de la Méditerranée à l'époque des croisades: diffusion et création," *Essor et Fortune de la Chanson de Geste dans l'Europe et l'Orient Latin*, Modena, 1984, pp. 620–3.

937. Ibid., p. 192.

938. Ibid., p. 193.

939. No illustrated Sanctorale or Breviary can be identified as yet as having been executed in Acre, but the Perugia Missal is an important example of such a liturgical work done there. We certainly can imagine that books such as the Sanctorale and the Breviary were also done in Acre, but no example can as yet be identified as having been done there and these books which the count owned most likely came from France.

957. Ibid., p. 114; this is a house for lepers about which we know virtually nothing.

958. Ibid., pp. 108–10.

959. Ibid., p. 105.

960. Ibid., pp. 101–3.

961. Ibid., p. 78.

962. Ibid., pp. 77–8.

963. Ibid., pp. 44–5.

964. This church is not listed by Dichter. It is presumably the Church of St. Samuel relocated to Acre from the environs just north of Jerusalem after 1187.

965. It is unclear who is referred to here.

966. Dichter, *The Orders*, pp. 16–17.

967. Ibid., pp. 79–83.

968. Ibid., pp. 47–57.

969. Ibid., pp. 200–5.

970. Ibid., p. 206.

971. See the comments of B. Z. Kedar, "Latins and Oriental Christians in the Frankish Levant, 1099–1291," *Sharing the Sacred: Religious Contacts and Conflicts in the Holy Land*, eds. A. Kofsky and G. G. Stroumsa, Jerusalem, 1998, p. 220.

972. The will of Saliba is recorded by J. Delaville Le Roulx, ed., *Cartulaire Générale de l'Ordre des Hospitaliers de St.-Jean de Jérusalem (1100–1310)*, 2, Paris, 1897, no. 3105. Besides his gift to the Church of St. Lawrence, Saliba's bequests include the following:

> "To the hospital of the Holy Spirit, three besants
> To the abbess Agnes and her sisters, fifty besants
> To the friars preacher, five besants
> To the friars minor, five besants
> To St Mary Magdalen, two besants
> To the Convertite sisters, two besants
> To the brethren of Carmel, five besants
> To the lepers of St Lazarus, six besants
> To the Hospital of St Anthony, three besants
> To Holy Trinity, three besants
> To St Bridget, two besants
> To the hospital of St Catherine, two besants
> To the church of St Mary of the Provençaux, two besants."

See, Hamilton, *The Latin Church in the Crusader States*, p. 304. Clearly this is a much more modest will than that of Eudes, count of Nevers.

973. D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd edn, London, 1995, p. 50; A. G. Malloy, I. F. Preston, and A. J. Seltman, *Coins of the Crusader States*, New York, 1994, pp. 129–33; and J. Porteous, "Crusader Coinage with Greek or Latin Inscriptions," *HC*, 6, pp. 385–6.

974. Malloy et al. (*Coins of the Crusader States*, p. 18) note the complete set of obverse inscriptions and those on the reverse. These coins appeared throughout the 1250s with different dates as the years went on.

975. First illustrated in G. Schlumberger, *Numismatique de L'Orient Latin*, Paris, 1878, rpt. Graz, 1954, pl. 19, no. 9; see P. Grierson, "A Rare Crusader Bezant with the *Christus vincit* Legend," *American Numismatic Society: Museum Notes*, 6 (1954), pp. 169–78. This coin is commented on also by J. Yvon, "Monnaies et sceaux de l'Orient Latin," *Revue numismatique*, 6e sér., 8 (1966), pp. 89–91; Metcalf, *Coinage of the Crusades*, p. 50; Malloy et al., *Coins of the Crusader States*, p. 20; and Porteous, "Crusader Coinage," *HC*, 6, pp. 385, 416, pl. VII, no. 57. An example was recently sold in the Slocum sale (6–7 March 1997): [J. Porteous], *The John J. Slocum Collection of Coins of the Crusades*, Sotheby's, London, 1997, cat. no. 289. Note that the obverse of this coin, much enlarged, appears on the front cover of this catalogue.

976. Malloy et al., *Coins of the Crusader States*, p. 20; and Grierson, "A Rare Crusader Bezant," pp. 175–8.

977. Metcalf, *Coinage of the Crusades*, p. 50.

978. Porteous, "Crusader Coinage," *HC*, 6, p. 385.

979. We can make these interpretations based on the hoard evidence. See Grierson, "A Rare Crusader Bezant," pp. 172–5.

980. Malloy et al., *Coins of the Crusader States*, pp. 38–9.

981. The issue of Western coins circulating and being used in the Crusader East is complicated. See the discussions by Metcalf, *Coinage of the Crusades*, pp. 169–76; and A. M. Stahl, "The Circulation of European Coinage in the Crusader States," *The Meeting of Two Worlds*, eds. V. P. Goss and C. V. Bornstein, Kalamazoo, 1986, pp. 85–102.

982. Porteous, "Crusader Coinage," *HC*, 6, p. 382. On John of Ibelin and the *Livre des Assises*, see P. Edbury, "The *Livre des Assises* by John of Jaffa: The Development and Transmission of the Text," "*The Crusades and Their Sources*," eds. J. France and W. G. Zajac, Aldershot/Brookfield, 1998, pp. 169–79; and general comments by H. E. Mayer, *The Crusades*, trans. J. Gillingham, 2nd edn., Oxford, 1988, pp. 161–2.

983. Malloy et al., *Coins of the Crusader States*, p. 151.

984. Ibid., pp. 143–4.

985. Ibid., pp. 156–7.

986. Porteous, "Crusader Coinage," *HC*, 6, p. 384, pl. XI, fig. 99. It was coins of this type with which, Porteous suggests, Louis IX made his offering at the tomb of Walter of Brienne in Sidon in 1252.

987. Malloy et al., *Coins of the Crusader States*, p. 143. Malloy interprets this façade as that of the Cathedral of St. Mary of the Sepulcher of Our Lady of Tyre, whereas Porteous (p. 383) prefers to see this imagery as a reference to the aedicule of the Holy Sepulcher.

988. Runciman, "The Crusader States, 1243–1291," *HC*, 2, p. 578.

989. For an image of the gros tournois, see the exhibition catalogue of *La France de Saint Louis*, Paris, 1971, pp. 79–80, no. 137.

990. Metcalf, *Coinage of the Crusades*, pp. 152–3; Malloy et al., *Coins of the Crusader States*, pp. 164–5; and Porteous, "Crusader Coinage," *HC*, 6, pp. 386–7.

991. Grierson, "A Rare Crusader Bezant," p. 177.

992. J. Strayer, "The Crusades of Louis IX," *HC*, 2, p. 509.

993. The Rothelin Continuation, trans. J. Shirley, *Crusader Syria in the Thirteenth Century*, Aldershot/Brookfield, 1999, p. 103.

994. The two versions of Louis's royal seal are identical in iconography and presentation, but differ subtly in style according to their date. They are illustrated by M. W. Labarge, *Saint Louis*, Boston and Toronto, 1968, opposite p. 241. The later version has the same inscription, but the figure is more trim, the drapery is less voluminous, the face of the king is older, his proper right hand is positioned more naturalistically, and the fleur-de-lis he holds in it is simpler. Opinions vary as to whether the later version dates after his illness of 1244 or after his return from Palestine in 1254. See *La France de Saint Louis*, Paris, 1971, p. 29, no. 21.

995. A beautiful example of this seal is illustrated on a letter from Louis IX written in Caesarea in 1252, now in the Archives Nationales in Paris, inv. J422. See M. Benveniste, "The Crusades, An Historical Introduction," *Knights of the Holy Land: The Crusader Kingdom of Jerusalem*, ed. S. Rozenberg, Jerusalem, 1999, p. 25, fig. 3. The same document also appears with a similarly excellent reproduction in M. Rey-Delqué, *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis: 1096–1270, Milan, 1997, p. 139.

996. It is striking that so few seals are extant from these years, perhaps caused by the destruction suffered at the hands of the Mamluks, as Baybars started his campaigns against the Crusaders. An example of this hiatus is documented by H. Hazard, "The Sigillography of Crusader Caesarea," *Near Eastern Numismatics, Iconography, Epigraphy and History: Studies in Honor of George C. Miles*, ed. D. K. Kouymijian, Beirut, 1974, pp. 359–68.

997. G. Schlumberger et al., *Sigillographie de l'Orient Latin*, Paris, 1943, pp. 66–7.

998. On the seal of John II Ibelin, see H. E. Mayer, *Das Siegelwesen in den Kreuzfahrerstaaten*, Munich, 1978, pp. 84 ff., esp. pp. 93–9, and pl. 4, fig. 35. See also Schlumberger, *Sigillographie*, p. 40, no. 97, p. 154, no. 28, also illustrated in J. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1277*, London, 1973, opp. p. 216.

999. The cloth housing of the horse was probably in several layers, or it may have been quilted. The Crusaders started using such caparisons in the twelfth century, probably imitating the Muslims on this point. The surcoat of the knight and housing of the horse rapidly came to be used for heraldic arms, whereas the Muslims usually reserved their heraldic arms for shields and banners. See, for example, I. Heath, *Armies and Enemies of the Crusades, 1096–1291*, a Lancing, West Sussex, 1978, pp. 68–70, 91–3, 95–8, 108–10.

1000. Ibid., p. 38. The inscription spelled out reads: "+ Boamondus princeps antiochenus et comes Tripolitanus filius Buamundi principis et comitis."

1001. This seal was formerly kept in the Archives of the Hospitaller Order on Malta and is now known only by the drawing published by S. Paoli, *Codice Diplomatico del Sacro Militare Ordine Gersolimitano oggi di Malta . . .*, vol. 1, Lucca, 1733, pl. VI, no. 62.

1002. Schlumberger, *Sigillographie*, pp. 236–7, 248–9. See also E. J. King, *The Seals of the Order of St. John of Jerusalem*, London, 1932, pp. 1–19; and Dichter, *The Orders and Churches of Crusader Acre*, pp. 40–4, 47–57.

1003. The Old French text is published by J. Delaville le Roulx, "Note sur les Sceaux de l'Ordre de St. Jean de Jérusalem, *Memoires de la Société Nationale des Antiquaires de France*, sér. 5, 1 (1880), and translated by King, *The Seals of the Order of St. John of Jerusalem*, pp. 127–8, in Appendix A. The range of imagery is interesting, including, besides the usual Hospitaller master's type, seals for other offices with knights, a ship, an oriflamme, and a castle from the east, and from the west, among others, the *Agnus Dei* for the prior of St. Gilles.

1004. Schlumberger, *Sigillographie*, pp. 251–2; and Dichter, *The Orders and Churches of Crusader Acre*, pp. 79–83.

1005. Schlumberger, *Sigillographie*, pp. 79–80.

1006. Ibid., pp. 80–1.

1007. Ibid., pp. 104–5; and Paoli, *Codice Diplomatico del Sacro Militare Ordine*, pl. VI, no. 59.

1008. Schlumberger, *Sigillographie*, p. 122; and Dichter, *The Orders and Churches of Crusader Acre*, p. 77.

1009. Schlumberger, *Sigillographie*, p. 125; and Dichter, *The Orders and Churches of Crusader Acre*, p. 102.

1010. Schlumberger, *Sigillographie*, p. 121; and Dichter, *The Orders and Churches of Crusader Acre*, p. 117. It is more likely to be a leper, but final determination will necessitate inspection of the actual seal, which I as yet have been unable to do.

1011. Possible examples of *ampullae* found in excavations at Acre and Caesarea are illustrated by D. Syon, "Souvenirs from the Holy Land: A Crusader Workshop of Lead Ampullae from Acre," *Knights of the Holy Land*, pp. 110, fig. 1; 114, fig. 3; p. 319, nos. 112, 114. These *ampullae* are mostly small, and few carry explicit religious decoration. See other comments by Boas, *Crusader Archaeology*, pp. 159–60.

1012. A. Frolow, *La Relique de la Vraie Croix: Recherches sur le Développement d'un Culte*, Paris, 1961, pp. 431–41, nos. 535–63.

1013. See the important article of M. Georgopoulou, "Orientalism and Crusader Art: Constructing a New Canon," *Medieval Encounters*, 5 (1999), pp. 289–321. See also her forthcoming book, *Multiculturalism, in the Middle Ages: Ethnicity, Identity, Style*.

1014. I am substantially basing my discussion here on Maria Georgopoulou's article cited in the previous note.

1015. These examples of metalwork belong to a larger group of eighteen objects said to come from several different places. See, for example, Georgopoulou, "Orientalism and Crusader Art," p. 292, who proposes to view these objects as "indicative of a far wider production than previously thought, [which] ought to be studied within a larger framework that incorporates the artistic production and the market mechanisms of the crusader and the neighboring Muslim states." See, for example, E. Baer, *Ayyubid Metalwork with Christian Images*, Leiden, 1989; R. A. Katzenstein and G. D. Lowry, "Christian Themes in Thirteenth-Century Islamic Metalwork," *Muqarnas*, 1 (1983), pp. 53–68; E. Atil, W. T. Chase, and P. Jett, *Islamic Metalwork in the Freer Gallery of Art*, Washington, D.C., 1985, pp. 137–47; and L. T. Schneider, The Freer Canteen," *Ars Orientalis*, 9 (1973), pp. 137–56.

1016. These examples of enameled glass belong to a group of at least some twenty-five objects. See, for example, Georgopoulou, "Orientalism and Crusader Art," pp. 291–320; J. Carswell, "The Baltimore Beakers," *Gilded and Enamelled Glass from the Middle East*, ed. R. Ward, London, 1998, pp. 61–3; N. Brosh, "Between East and West: Glass and Minor Arts in the Crusader Kingdom," *Knights of the Holy Land*, p. 266, fig. 2 (Montfort beaker); B. Dean, "A Crusaders' Fortress in Palestine (Montfort)," *Bulletin of the Metropolitan Museum of Art*, 22, pt. 2 (1927), pp. 5–46, rpt. Jerusalem, 1982, ed. M. Benveniste; W. Pfeiffer, "Acrische Gläser," *Journal of Glass Studies*, 12 (1970), pp. 67–9, H. Tait, "Beaker," *Masterpieces of Glass*, London, 1968, pp. 151–2, no. 205; W. Pfeiffer, "Magister Aldrevandin me fecit," *Verhandlungen des Historischen Vereins für Oberpfalz und Regensburg*, 106 (1966), pp. 205–9; and Boas, *Crusader Archaeology*, pp. 152–3. The great basic study of this glass is by C. J. Lamm, *Mittelalterliche Gläser und Steinschnittarbeiten aus dem Nahen Osten*, 2 vols., Berlin, 1929–1930, with later critique and discussion by G. T. Scanlon, "Lamm's Classification and Archaeology," pp. 27–9, and S. S. Kenesson, "Islamic Enamelled Beakers: A New Chronology," pp. 45–9, both in *Gilded and Enamelled Glass from the Middle East*, ed. R. Ward, London, 1998.

With regard to Lamm's study, his classification, and his idea that the Aldrevandin Beaker was "Syro-Frankish," see now the recent scholarship arguing that in fact this work and some of the other painted glass in the group related to it was painted in Venice, imitating Islamic technique. See D. Whitehouse, "Imitations of Islamic Glass," in S. Carboni and D. Whitehouse, *Glass of the Sultans*, New York, 2001, pp. 297–8; and S. Carboni, "The Aldrevandin Beaker," ibid., pp. 302–3, no. 151.

Some other handsome examples are illustrated in M. Rey-Delqué, ed., "La Syrie et l'Egypte au XIIe et XIIIe siècles, Quelques aspects de la production artistique," *Les Croisades: L'Orient et L'Occident d'Urbain II à Saint Louis: 1096–1270*, Milan, 1997, pp. 336–7, enameled glass beakers from Kassel and the Hague, and a goblet from Chartres. See also S. Carboni and D. Whitehouse, *Glass of the Sultans*, New York, 2001, pp. 242–5, no. 121, a painted bottle from Syria in the mid-thirteenth century.

1017. S. Schein, "Rulers and Ruled: Women in the Crusader Period," *Knights of the Holy Land*, p. 60, fig. 1, p. 323, no. 234.

1018. A. Grabois, "Nobility and Knighthood," *Knights of the Holy Land*, p. 129, fig. 5, p. 323, no. 235. A detail of this soldier also appears opposite the title page of this catalogue.

1019. Schein, "Rulers and Ruled," p. 66, fig. 4; p. 323, no. 237.

1020. Boas, *Crusader Archaeology*, pp. 149–50; E. J. Stern, "Excavation of the Courthouse Site at 'Akko: The Pottery of the Crusader and Ottoman Periods," *'Atiqot*, 31 (1997), pp. 35 ff., esp. 58–62; R. D. Pringle, "Some More Proto-Maiolica from 'Athlit (Pilgrims' Castle) and a Discussion of its Distribution in the Levant," *Levant*, 14 (1982), pp. 107–15.

1021. My discussion of these beakers is based on the articles by Georgopoulou ("Orientalism and Crusader Art," pp. 301–21) and Carswell ("The Baltimore Beakers," pp. 61–3), which are in substantial agreement about the decoration but differ in their interpretation of the imagery and the character of these beakers as works of art. For color plates, see R. Mack, *Bazaar to Piazza, Islamic Trade and Italian Art, 1300–1600*, Berkeley, Los Angeles, and London, 2002, p. 114, fig. 118.

1022. I have taken the catalogue information, including these inscriptions from Carswell, "The Baltimore Beakers," p. 61.

1023. Kenesson, "Islamic Enamelled Beakers: A New Chronology," p. 45. She refers to an illustrated *Maqamat* of al-Hariri, *c.*1334, now in Vienna, where the emir holds a beaker in his hand. See R. Ettinghausen, *Arab Painting*, Geneva, 1977, p. 148.

1024. H. A. R. Gibb, "The Aiyubids," *HC*, 2, p. 714.

1025. Georgopoulou, "Orientalism and Crusader Art," p. 315, proposes, "I would argue that indeed these two beakers were made in the market of a Muslim city for Christian patrons."

1026. Georgopoulou, "Orientalism and Crusader Art," p. 308, thinks of it as a trademark and an indication of authenticity. She cites the work of S. Redford, "Ayyubid Glass from Samsat, Turkey," *Journal of Glass Studies*, 36 (1994), p. 84. Carswell, "The Baltimore Beakers," p. 61, calls the inscriptions "reverent statements," but does not think that the fact they are in Arabic and refer to the sultan necessarily limits the market for these beakers.

1027. Carswell, "The Baltimore Beakers," p. 62, comments also that these beakers must be some kind of souvenirs for pilgrims to Jerusalem, but "who were the pilgrims is less clear," pointing out that both Christian and Muslim pilgrims wanted souvenirs. He points out these beakers stayed in the East until modern times and that the mixture of Christian and Muslim imagery on the same object, combined with Arabic inscriptions, fits well within the tradition of Mamluk – and Ayyubid – decorative art. He leaves open who the pilgrim might have been but leans toward a local Orthodox Christian in the end.

1028. Kenesson, "Islamic Enamelled Beakers: A New Chronology," pp. 45–9. Redford ("Ayyubid Glass from Samsat, Turkey," p. 85) has raised the question of whether some of this type glass could have come from non-Muslim sources at this time.

1029. C. Hillenbrand, *The Crusades: Islamic Perspectives*, Edinburgh, 1999, pp. 388–91.

1030. Ibid., p. 397.

1031. K. L. Reyerson, "Commerce and Communications," *The New Cambridge Medieval History*, V, ed. D. Abulafia, Cambridge, 1999, p. 60.

1032. See D. Jacoby, "Silk Crosses the Mediterranean," *Le vie del Mediterraneo: Idee, uomini, ogetti (secoli XI–XVI)*, ed. G. Airaldi, Genova, 1997, pp. 55–79; idem, "Genoa, Silk Trade and Silk Manufacture in the Mediterranean Region (ca. 1100–1300), *Tessuti, Oreficerie, miniature in Liguria, XIII–XV secolo*, eds. A. R. Calderoni Masetti, C. Di Fabio, and M. Marcenaro, Istituto Internazionale di Studi Liguri: Atti dei Convegni, III, Bordighera, 1999, pp. 11–40; idem, "Dalla Materia Prima ai Drappi tra Bisanzio, Il Levante e Venezia: La Prima fase dell'Industria Serica Veneziana," *La Seta in Italia dal Medioevo al Seicento*, eds. L. Molà, R. C. Mueller, and C. Zanier, Venice, 2000, pp. 265–304.

See a further selection of his earlier articles on commerce and the silk trade in his selected studies volume, *Trade, Commodities and Shipping in the Medieval Mediterranean*, Aldershot, 1997.

On additional trade issues of relevance here, see D. Jacoby, "The Trade of Crusader Acre in the Levantine Context: An Overview," *Archivio Storico del Sannio*, 98 (2001), pp. 103–120; idem, "The Supply of War Materials to Egypt in the Crusader Period," *Jerusalem Studies in Arabic and Islam*, 25 (2001), pp. 102–32; idem, "Diplomacy, Trade, Shipping and Espionage between Byzantium and Egypt in the Twelfth Century," *Festschrift für Peter Schreiner, Byzantinisches Archiv*, 19 (2000), pp. 83–102; idem, "The Venetian Privileges in the Latin Kingdom of Jerusalem: Twelfth and Thirteenth-Century Interpretations and Implementations," *Montjoie*, eds. B. Z. Kedar et al., Aldershot, 1997, pp. 155–75; and idem, "L'Expansion occidentale dans le Levant: les Vénitiens à Acre dans la seconde moitié du treizième siècle," *Journal of Medieval History*, 3 (1977) pp. 225–64.

On Frankish Greece, see D. Jacoby, "Changing Economic Patterns in Latin Romania: The Impact of the West," *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, D.C., 2001, pp. 197–233, with substantial bibliography.

1033. Runciman's comment was that the "old balanced dyarchy between Byzantium and the Caliphate" which ruled the Near East for so long was over. Runciman, *A History of the Crusades*, 3, p. 304.

1034. According to one view, "the Byzantine recovery of Constantinople and the collapse of the Latin Empire were thus the outcome of a war started round an ancient monastery in Acre. It was a tremendous blow to Latin and to Papal prestige, and a triumph for the Greeks. But Byzantium, . . . was now only one state amongst many." Runciman, *A History of the Crusades*, 3, p. 287.

1035. One or two entries refer to St. Catherine's, or St. Demetrios, in Acre, but otherwise the repertory of scenes or saints found on the icons does not obviously link these panels to the religious establishments of the Crusaders in Acre.

1036. Runciman, *A History of the Crusades*, 3, p. 290.

CHAPTER 7. ACRE AND THE ART OF THE CRUSADERS: THE FINAL YEARS, 1268–1289

The Final Crusades and the Mamluk Assault on the Latin Kingdom to the Fall of Tripoli

1. P. Thorau, *The Lion of Egypt: Sultan Baybars I and the Near East in the Thirteenth Century*, trans. P. M. Holt, London and New York, 1992 from the 1987 edition, pp. 193–5. The relevant passages of Ibn 'abd al-Zahir's account of the embassy to Acre are translated by P. M. Holt, *Early Mamluk Diplomacy (1260–1290): Treaties of Baybars and Qalawun with Christian Rulers*, Leiden/New York/Cologne, 1995, pp. 69–71.

2. For the text of the truce with Lady Isabel dated 6 May 1269, see now Holt, *Early Mamluk Diplomacy*, pp. 42–7, published earlier in P. M. Holt, "Baybars's Treaty with the Lady of Beirut in 667/1269," *Crusade and Settlement*, ed. P. Edbury, Cardiff, 1985, pp. 242–5.

The *hajj* to Mecca was both religious and political, part of Baybars's remarkable program of travel for diplomacy, inspection, and military readiness in the administration of his sultanate. See Robert Irwin, *The Middle East in the Middle Ages: The Early Mamluk Sultanate, 1250–1382*, London and Sydney, 1986, pp. 55–6.

3. See the discussion of the competing claims by J. Riley-Smith, *The Feudal Nobility and the Kingdom of Jerusalem, 1174–1274*, London and Basingstoke, 1973, pp. 220–5.

4. R. D. Pringle, "The Crusader Cathedral of Tyre," *Levant*, 33 (2001), pp. 165–88. Besides serving as the coronation church of the Latin Kingdom, during this period the cathedral was also the burial place of the lords of Tyre, and a year later, in 1270, Philip of Montfort was buried here.

5. P. Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, Cambridge, 1991, pp. 90–3; Riley-Smith, *The Feudal Nobility*, pp. 222–5; S. Runciman, *A History of the Crusades*, 3, Cambridge, 1954, pp. 327–30.

6. Holt, *Early Mamluke Diplomacy*, pp. 32–41. We will discuss later the Hospitaller dealings with Baybars over Crak des Chevaliers in 1271.

7. It is uncertain whether Baybars ordered the assassination of Philip of Montfort or was only blamed for it by the Templar of Tyre. See Thorau, *The Lion of Egypt*, p. 204 and n. 88.

8. On Charles of Anjou, see the recent studies by Jean Dunbabin, *Charles of Anjou: Power, Kingship and State-Making in Thirteenth-Century Europe*, London and New York, 1998, and David Abulafia, *The Western Mediterranean Kingdoms, 1200–1500: The Struggle for Dominion*, London and New York, 1997, as well as the basic work by S. Runciman, *The Sicilian Vespers: A History of the Mediterranean World in the Latin Thirteenth Century*, Cambridge, 1958.

9. For Louis's Second Crusade, see J. Richard, *The Crusades, c. 1071–c. 1291*, trans. J. Birrell, Cambridge, 1999, pp. 428–34; W. Jordan, *Louis IX and the Challenge of the Crusade*, Princeton, 1979, pp. 214–17; J. Strayer, "The Crusades of Louis IX," *HC*, 2, pp. 508–18; and M. Labarge, *Saint Louis: Louis IX, Most Christian King of France*, Boston and Toronto, 1968, pp. 226–44.

10. "En ce tans se croisa Lois roi de France et cil de Navare, et li enfant et moult d'autres contes et barons de France et d'Engleterre et d'Alemaigne por le secors de la Sainte Terre." Noailles Continuation, *RHC: Hist. Occid.*, II, p. 456, for the year 1267. My nomenclature for the continuations into the later years of the thirteenth century has been explained in Chapter 6, n. 6, along with comments on the main sources. Some of the sources do not extend into the period after 1268, but some do. Two new sources become centrally important for the period up to 1291. First there is the eyewitness account of events in the Latin Kingdom written by the Templar of Tyre, published in the old edition by G. Raynaud (ed.), *Gestes des Chiprois*, Geneva, 1887, and the new edition is by L. Minervini (ed.), *Cronaca del Templare di Tiro (1243–1314)*, Naples, 2000. A new translation has just appeared by P. Crawford, *The Templar of Tyre: The Deeds of the Cypriots*, Crusade Texts in Translation, 6, Aldershot and Burlington, 2003. Second, P. M. Holt has published eleven Mamluk treaties dating from 1267 to 1290, in *Early Mamluk Diplomacy (1260–1290): Treaties of Baybars and Qalawun with Christian Rulers*, Leiden/New York/Cologne, 1995.

Among other relevant sources in Arabic in translation, there is Ibn al Furat, *The History of the Dynasties and the Kings*, trans. U. and M. C. Lyons, in *Ayyubids, Mamlukes and Crusaders*, vol. 2, Cambridge, 1971, and a collection of passages from the works of Ibn abd' al-Zahir and Abu l-Fida, who were both eyewitnesses to the events of the late thirteenth century, along with the historical compendium of Abu l-Mahasin, who wrote in the fifteenth century, by F. Gabrieli, *Arab Historians of the Crusades*, trans. E. J. Costello, London, 1969, pp. 305–50.

11. Jean de Joinville, *Histoire de Saint Louis*, ed. Natalis de Wailly, Paris, 1868, pp. 261–2, trans. M. R. B. Shaw, *The Life of Saint Louis*, in Joinville and Villehardouin, *Chronicles of the Crusades*, Baltimore, 1963, 345–6.

12. The account of the Spanish squadron in the Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 457–8, more or less corresponds to what appears in Ibn al-Furat, *The History of the Dynasty of the Kings*, trans. U. and M. C. Lyons, 2, pp. 137–8.

13. Labarge, *Saint Louis*, p. 233.

14. Jordan, *Louis IX and the Challenge of the Crusade*, p. 216, and J. deLaborde, A. Teulet et al. (eds.) *Layettes du Trésor des Chartes*, 4, Paris, 1900, nos. 5662–4.

15. On these manuscripts, see R. Branner, *Manuscript Painting in Paris during the Reign of Saint Louis: A Study of Styles*, Berkeley, Los Angeles and London, 1977, pp. 132–7, 238–9. For the St. Louis Psalter, see "Psautier de Saint Louis," in *La France de Saint Louis*, Paris, 1971, pp. 103, 105, cat. no. 207, both with older bibliography, comments by F. Avril, *L'Enluminure à l'Epoque Gothique*, [Paris], 1979/95, pp. 21, 24, 25; M. Thomas (ed.), *Le Psautier de St. Louis*, en facsimilé, Graz, 1970; and W. Jordan, "The Psalter of Saint Louis (BN MS lat. 10525): The Program of the Seventy-Eight Full Page Illustrations," *Acta: The High Middle Ages*, 7 (Binghamton, NY, 1983, pp. 65–91. Most recently, D. Weiss, *Art and Crusade in the Age of Saint Louis*, Cambridge, 1998, pp. 47, 73, comments on its links to Crusader-inspired imagery and clearly more work needs to be done on the relationship between this famous prayerbook for Louis IX and his royal ideology for the Crusade. Branner dates the Psalter of St. Louis after 1255; Weiss suggests *c.*1260. Harvey Stahl worked on this important manuscript for many years before his untimely death. It remains to be seen whether his widow and his former students can successfully publish the work he had already done.

The equally impressive Isabella Psalter remains effectively unstudied, except for Branner's comments. A doctoral dissertation on this manuscript by K. Showalter at the Johns Hopkins University is said to be underway.

16. It is well-known how widely estimates of troop strengths in medieval armies vary, and this is a case in point. Strayer proposes 10,000 men; Labarge says it was a force of less than 10,000 men. By contrast, Edward Gibbon arbitrarily states there were "six thousand horse and thirty thousand foot," which corresponds to the estimate of Ibn-Khaldun. However, most Muslim sources inflate the numbers enormously; for example, Ibn-abi-Zar says there were 40,000 knights, 100,000 archers, and a million foot soldiers! See Strayer, "The Crusades of Louis IX," p. 515; Labarge, *Saint Louis*, p. 241; E. Gibbon, *The Decline and Fall of the Roman Empire*, New York: Modern Library edition, [n.d.], III, p. 501; and for Ibn Khaldun and Ibn-abi-Zar, see Hazard, "Moslem North Africa, 1049–1394," *HC*, 3, pp. 475–6.

17. The Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 458–9, offers no comment on this and basically summarizes the story of the Louis's Crusade in one terse paragraph.

18. Strayer, "The Crusades of Louis IX," p. 515.

19. There is considerable speculation on why Tunis was chosen. Richard, *The Crusades, c. 1071–c. 1291*, pp. 428–31, says there was a change of plans between 1269 and 1270, and he offers several interesting reasons for the change. However, he notes that the loss of French chancery records and records of royal accounts for this expedition limits our ability to confirm the various suggestions that have been proposed. See also Dunbabin, *Charles of Anjou*, pp. 195–6; Strayer, "The Crusades of Louis IX," pp. 511–15; Labarge, *Saint Louis*, pp. 238–41; and Runciman, *A History of the Crusades*, 3, pp. 291–2.

20. H. W. Hazard, "Moslem North Africa, 1049–1394," *HC*, III, pp. 473–4. See also Hazard's comments on Ibn Khaldun and the history of North Africa during the medieval period, with other sources documented, on pp. 457–60.

21. Richard, *Saint Louis*, p. 429, and J. Riley-Smith, *The Crusades, a Short History*, New Haven and London, 1987, p. 175.

22. The idea that Louis harbored the hope of converting the emir of Tunis has long been identified as a factor here. Edward Gibbon, who published his famous *The Decline and Fall of the Roman Empire* between 1776 and 1788, comments, "a wild hope of baptising the king of Tunis tempted him to steer for the African coast" (idem, III, p. 501).

23. William of St. Pathus, *Vie de St. Louis*, ed. H. F. Delaborde, Paris, 1899, p. 155, quoted by Labarge, *St. Louis*, p. 243.

24. Runciman, *A History of the Crusades*, 3, p. 292.

25. Gibbon, *The Decline and Fall of the Roman Empire*, III, p. 501.

26. Guillaume de Nangis, *Life of Saint Louis, Recueil des Historiens des Gaules et de la France*, 20, ed. Daunou and Naudet, Paris, 1840, pp. 466, 468, reported by Labarge, *Saint Louis*, p. 243. Louis's heart was left with the army in Africa, and lost!

27. Joinville, *Histoire de Saint Louis*, ed. N. de Wailly, p. 267, trans. M. R. B. Shaw, *The Life of Saint Louis*, p. 350.

28. Strayer, "The Crusades of Louis IX," p. 517.

29. See Kennedy, *Crusader Castles* pp. 138–41; M. Barber, *The New Knighthood*, Cambridge, 1994, pp. 81–3; and W. Müller-Wiener, *Burgen der Kreuzritter*, Munich/Berlin, 1966, pp. 53–4.

30. On Thomas Bérard (1256–73), see M. L. Bulst-Thiele, *Sacrae Domus Militae Templi Hierosolymitani Magistri*, Göttingen, 1974, pp. 232–58.

31. Kennedy, *Crusader Castles*, pp. 148–50; D. J. Cathcart King, "The Taking of Crac des Chevaliers in 1271," *Antiquity*, 23 (1949), pp. 83–92, revising the account of P. Deschamps, *Les Châteaux des Croisés en Terre Sainte*, I, *Le Crac des Chevaliers*, Paris, 1934, pp. 132–5. See now the comments of Thorau, *The Lion of Egypt*, pp. 265–6, revising the dating of Cathcart King.

32. Quoted from Ibn al-Furat by Kennedy, *Crusader Castles*, p. 148.

33. Thorau, *The Lion of Egypt*, pp. 204–5, with detailed discussion of the start of the siege in Appendix 5, pp. 265–6.

34. J. Riley-Smith, *The Knights of St. John in Jerusalem and Cyprus, 1050–1310*, London, 1967, p. 193, n. 1, wonders whether the Muslim sources might have confused the events at Safita with what happened here. That is possible, but Baybars is known to have used forged letters elsewhere, for example, at Beaufort and Safed, as well as at Safita, to generate dissension inside the Crusader garrison, as part of his strategy of attack. Using such a letter here would seem to be an entirely normal part of his operations.

35. Ibn al-Furat, *The History*, 2, p. 145. M. C. Lyons suggests the superior in Tripoli would have been Renaud de Nanteuil, cf n. 9, p. 239.

36. Thorau, *The Lion of Egypt*, p. 205. For the full list of sources pertaining to the siege and this letter, see ibid., pp. 216–17, n. 95.

37. Ibn al-Furat, *The History*, 2, p. 146.

38. Riley-Smith, *The Knights of St. John*, p. 193.

39. The text of this treaty is published by Holt, *Early Mamluk Diplomacy*, pp. 48–57.

40. Ibid., p. 55, article 12.

41. Ibid., and Thorau, *The Lion of Egypt*, p. 205.

42. Thorau, *The Lion of Egypt*, p. 205.

43. Kennedy, *Crusader Castles*, pp. 129–31; M. Benveniste, *The Crusaders in the Holy Land*, Jerusalem, 1970, pp. 331–7; and Indrikis Sterns, "The Teutonic Knights in the Crusader States," *HC*, 5, pp. 354–5.

44. M.-L. Favreau-Lilie, "The Teutonic Knights in Acre after the Fall of Montfort (1271): Some Reflections," in *Outremer*, eds. B. Z. Kedar, H. E. Mayer, and R. C. Smail, Jerusalem, 1982, pp. 272–84, discusses the activity of the Teutonic Order in Acre on the basis of documents dated 1273 and 1274 that "throw a clearer light on the financial power of the Teutonic Order and on its ambitions to enlarge its property in Acre" (p. 282).

45. Ibn al-Furat, *The History*, 2, pp. 151–2.

46. Al-'Aini, *The Necklace of Pearls, Arab Historians of the Crusades*, ed. F. Gabrieli, pp. 319–22.

47. "Et brisierent .XIIII. galies de Sarrazins en Chipre a Lymecon, et furent que pris que mors bien .IIII. .M. Sarrazins. . ." . Noailles Continuation, *RHC: Hist. Occid.*, II, p. 460; Templar of Tyre, *Les Gestes des Chiprois*, ed. G. Raynaud, p. 199; Thorau, *The Lion of Egypt*, pp. 206–7; and Runciman, *A History of the Crusades*, 3, p. 334.

48. Al-Maqrizi, *The Book of Proceeding to the Knowledge of the History of the Kings*, trans. F. Gabrieli, *Arab Historians of the Crusades*, pp. 303–4.

49. On Edward's Crusade, see the Templar of Tyre, *Les Gestes des Chiprois*, eds. G. Raynaud, pp. 199–201; the Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 461–2; the excellent chapter in F. M. Powicke, *King Henry III and the Lord Edward: The Community of the Realm in the Thirteenth Century*, vol. 2, Oxford, 1947, rpt. 1966, pp. 597–610; and the old work by Reinhold Röhricht, "La Croisade du Prince Édouard d'Angleterre (1270–1274)," *Archives de l'Orient Latin*, vol. 1, Paris, 1881, rpt. Brussels, 1964, pp. 617–32. More recent discussions include C. Tyerman, *England and the Crusades, 1095–1588*, Chicago, 1988, pp. 124–32; Runciman, *A History of the Crusades*, 3, pp. 335–7; Riley-Smith, *The Crusades*, pp. 175–6; Richard, *The Crusades, c. 1071–c.1291*, pp. 432–4, and Thorau, *The Lion of Egypt*, pp. 208–10.

50. On the dates of the Polo family visits to Acre, see Marco Polo, *The Description of the World*, eds. A. C. Moule and P. Pelliot, London, 1938, pp. 22–5, and n. 209.

51. Templar of Tyre, *Les Gestes des Chiprois*, ed. G. Raynaud, p. 200, and Thorau, *The Lion of Egypt*, pp. 221–2. Again here the Muslim sources differ on the date of an event, in this case the attack on the castle of Caco (Qaqun), which the Templar of Tyre dates to November but the Muslim sources date to December 1271.

52. Runciman, *A History of the Crusades*, 3, pp. 337–8.

53. The Muslim and Christian sources differ on the date. See Thorau, *The Lion of Egypt*, pp. 209, and 219 n. 123. In this case there may be some confusion over when the treaty was signed, 21/22 April, and when it was scheduled to go into force, 22 May.

54. Thorau, *The Lion of Egypt*, p. 210.

55. Ibn al-Furat, *The History*, 2, p. 158. This makes a good story, but we have to exercise caution because Ibn al-Furat was collecting his sources and writing much later, in the later fourteenth century.

56. As part of the evidence it appears that Edward apparently commissioned a manuscript of the *De re militari* by Vegetius in Old French while he was in Acre, a copy of which survives in the Fitzwilliam Museum in Cambridge. I have proposed that at least one of the illustrations in the Cambridge codex (Marlay Add. MS 1), possibly painted in Acre, was cut out of the original manuscript done for Edward and pasted in this codex. See Folda, *Crusader Manuscript Illumination at St. Jean d'Acre, 1275–1291*, pp. 129–30.

57. S. Runciman, "The Crusader States, 1243–1291," *HC*, 2, p. 583, n. 60, gives the full documentation.

58. Ibn al-Furat, *The History*, 2, p. 159.

59. Thorau, *The Lion of Egypt*, pp. 221–2, 244 n. 13. Thorau, citing the Muslim sources, says Edward was only slightly wounded and recovered quickly.

60. B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, 275.

63. For a discussion of the views of Humbert, see J. A. Brundage, "Humbert of Romans and the Legitimacy of Crusader Conquests," *Outremer*, pp. 302–13.

64. On the criticism of the Crusade, see Sylvia Schein, *Fideles Crucis: The Papacy, the West, and the Recovery of the Holy Land, 1274–1314*, Oxford, 1991, pp. 22–36; E. Siberry, *Criticism of Crusading, 1095–1274*, Oxford, 1985; and Palmer A. Throop, *Criticism of the Crusade: A Study of Public Opinion and Crusade Propaganda*, Amsterdam, 1940. Summaries and comments of the various reports are discussed by Richard, *The Crusades, c. 1071–1291*, pp. 435–7; Setton, *The Papacy and the Levant*, 1, p. 109; and Runciman, *A History of the Crusades*, 3, pp. 338–41.

65. Thomas Aquinas, *On Kingship: To the King of Cyprus*, ed. G. B. Phelan, Toronto, 1949/82, with comments on the date of the treatise in the introduction, pp. xxvi–xxx.

66. Setton, *The Papacy and the Levant*, 1, p. 112.

67. Ibid., p. 117. For the Byzantine viewpoint, see G. Ostrogorsky, *History of the Byzantine State*, transl. J. Hussey, New Brunswick, 1957, pp. 409–12, and A. A. Vasiliev, *History of the Byzantine Empire*, vol. 2, Madison, 1958, pp. 658–9. Warren Treadgold, *A History of the Byzantine State and Society*, Stanford, 1997, p. 741, says that the envoys "brought a letter from Michael VIII accepting union and all western doctrines and recognizing western church practices, but requesting that eastern church practices be allowed to continue as before. The union was ratified on Michael's terms."

68. Setton, *The Papacy and the Levant*, 1, p. 115.

69. For a discussion of the *Constitutiones*, see Schein, *Fideles Crucis*, pp. 36–42.

70. Riley-Smith, *The Crusades*, p. 177.

71. For a discussion of these terms, see Schein, *Fideles Crucis*, pp. 15–19.

72. Noailles Continuation, *RHC: Hist. Occid.*, II, p. 462; Ibn al-Furat, *The History*, 2, p. 164; Runciman, *A History of the Crusades*, 3, pp. 342–3; and Thorau, *The Lion of Egypt*, pp. 234–5.

73. Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 466–7; Runciman, *A History of the Crusades*, 3, pp. 343–4; and Thorau, *The Lion of Egypt*, p. 234.

74. On the hostility between William of Beaujeu and King Hugh III, see Pierre-Vincent Claverie, "L'Ordre du Temple au coeur d'une crise politique majeure: la *Querela Cypri* des années 1279–1285," *Le Moyen Age*, 104 (1998), pp. 495–511.

75. Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 474–5; Riley-Smith, *The Knights of St John in Jerusalem and Cyprus, 1050–1310*, p. 188; Runciman, *A History of the Crusades*, 3, pp. 344–5; Richard, *The Crusades, c. 1071–c. 1291*, pp. 447–9.

76. Templar of Tyre, *Cronaca del Templare di Tiro (1243–1314)*, ed. L. Minervini, pp. 148–50; *Les Gestes des Chiprois*, ed. G. Raynaud, p. 206; Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 475–6; J. La Monte, *Feudal Monarchy in the Latin Kingdom of Jerusalem, 1100–1291*, Cambridge, MA, 1932, rpt. New York, 1970, pp. 77–9; Richard, *The Crusades, c. 1071–c. 1291*, pp. 449–50; and Dunbabin, *Charles I of Anjou*, pp. 96–7.

77. Jonathan Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 45–62, has noted that the present consensus that sees Charles of Anjou's eyes to be riveted on the campaign against Constantinople needs to be reevaluated. Riley-Smith observes that even a cursory glance at the reconstituted Angevin archives reveals there is much more to his government in Palestine than simply maintaining his *bailli* and a contingent of men.

78. For a discussion of Roger's arrival, see Riley-Smith, *The Feudal Nobility*, pp. 226–7.

79. Templar of Tyre, *Cronaca del Templare di Tiro (1243–1314)*, ed. L. Minervini, p. 150; *Les Gestes des Chiprois*, ed. G. Raynaud, pp. 206–7; Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 478–9.

80. Noailles Continuation, *RHC: Hist. Occid.*, II, p. 478.

81. Thorau, *The Lion of Egypt*, pp. 224–5.

82. Ibid., pp. 202–3.

84. Ibid., pp. 232–3.

85. Ibid., pp. 220–1.

86. Ibid., p. 227.

87. Ibid., pp. 225–9. The attacks by Sheikh Khadir on Christians were extreme, but they can be seen in the larger perspective as part of the anti-Crusader policy and activity of the Mamluk sultan. See L. S. Northrup, "Muslim-Christian Relations during the Reign of the Mamluk Sultan al-Mansur Qalawun, A. D. 1278–1290," *Conversion and Continuity: Indigenous Christian Communities in Islamic Lands, Eighth to Eighteenth Centuries*, eds. Michael Gervers and Ramzi J. Bikhazi, Toronto, 1990, pp. 253–61. It should also be noted that Sheik Khadir was not the only Muslim holy man competing for the sultan's favors. There was also Sheikh 'Ali al'Majnun, who "was present at the sieges of Arsuf and Caesarea and was observed to enter into a trance state so as to employ a form of spiritual warfare against the Crusader fortifications." See Irwin, *The Middle East in the Middle Ages*, p. 54.

88. Thorau, *The Lion*, pp. 232–4.

89. Reuven Amitai-Preiss, *Mongols and Mamluks: The Mamluk-Ilkhanid War, 1260–1281*, Cambridge, 1995, pp. 168–78.

90. Ibid., pp. 72–4, for a description of the battle.

91. Mustafa M. Ziada, "The Mamluk Sultans to 1293," *HC*, 2, p. 750.

92. The extent to which Baybars was influenced by Mongol culture and institutions is a matter of some differences of opinion among historians. See Irwin, *The Middle East in the Middle Ages*, pp. 52–3.

93. Irwin, *The Middle East in the Middle Ages*, p. 58.

94. Runciman, *A History of the Crusades*, 3, p. 348, and Thorau, *The Lion of Egypt*, pp. 242–3. See also the special Appendix 7 by Thorau on "The Cause of Baybars's Death," p. 268.

95. Thorau, *The Lion of Egypt*, p. 243.

96. For photos of the tombs of both Saladin and Baybars, see H. Nicholson, *The Knights Templar: A New History*, Sparkford, 2001, p. 70, Pl. 2.15 (Saladin), p. 86, Pl. 2.22 (Baybars).

97. Noailles Continuation, *RHC: Hist. Occid.*, II, pp. 467, and 479–80. Note that shortly after the second report of Baybars's death, the Noailles Continuation ends with events of 1277. After this, the account by the Templar of Tyre becomes the main source from the Crusader East.

114. For the text of the treaty of Bohemond VII with Kalavun and discussion of its contents, see Holt, *Early Mamluk Diplomacy (1260–1290)*, pp. 58–65.

115. Northrup, *From Slave to Sultan*, pp. 103–6; Runciman, *A History of the Crusades*, 3, pp. 390–1.

116. For a detailed account of the battle of Homs, see Amitai-Preiss, *Mongols and Mamluks*, pp. 183–201.

117. Templar of Tyre, *Cronaca del Templare di Tiro (1243–1314)*, ed. L. Minervini, p. 154;

Les Gestes des Chiprois, ed. G. Raynaud, p. 210. Riley-Smith points out that when these Hospitallers broke the current truce, Kalavun ordered the Muslim governor of Crac des Chevaliers to attack Margat. Riley-Smith, *The Knights of St John in Jerusalem and Cyprus, 1050–1310*, p. 194. Amitai-Preiss, *Mongols and Mamluks*, pp. 183–201, does not mention the Hospitaller contingent in the Mongol army.

118. Amitai-Preiss, *Mongols and Mamluks*, pp. 191–5, evaluates the size and makeup of these armies.

119. Northrup, *From Slave to Sultan*, pp. 108–11; Runciman, *A History of the Crusades*, 3, p. 391–2.

120. Runciman, "The Crusader States, 1243–1291," *HC*, 2, p. 586, n. 71. Taqi ad-Din al-Maqrizi, writing long after the event, reports this. Amitai-Preiss, *Mongols and Mamluks*, pp. 200–1, does not mention this event.

121. However, consider also the views of David Ayalon on this victory: "Though this battle was won by Kalawun, the real architect of the victory was undoubtedly Sultan Baybars, who, in the seventeen years of his rule . . . built a war-machine which, in spite of the decline it underwent during the four years following his death, proved to be strong enough to beat one of the mightiest armies which the Mongol Il-Khans ever put into the field." Quoted by Amitai-Preiss, *Mongols and Mamluks*, p. 179.

122. Northrup, *From Slave to Sultan*, pp. 111–12, and the quote is from Runciman, *A History of the Crusades*, 3, p. 392.

123. Templar of Tyre, *Cronaca del Templare di Tiro (1243–1314)*, ed. L. Minervini, p. 152; *Les Gestes des Chiprois*, ed. G. Raynaud, p. 207; Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, pp. 95–6; Runciman, *A History of the Crusades*, 3, pp. 389–90.

139. Riley-Smith, *The Knights of St John in Jerusalem and Cyprus, 1050–1310*, p. 141, including the quote from Ibn 'Abd al-Ramim, who was a contemporary chronicler living in Hama.

140. [anonymous], *The Honoring of the Days and Years, Arab Historians of the Crusades*, ed. F. Gabrieli, p. 339.

141. Ibid., p. 340.

142. Ibid.

143. Ibid., p. 341.

144. Marco Polo, *The Description of the World*, eds. A. C. Moule and P. Pelliot, London, 1938, p. 94, partly quoted by S. Der Nersessian, "The Kingdom of Cilician Armenia", *HC*, 2, p. 655. Ayas is variously also called Laias, or Lajazzo.

145. Irwin, *The Middle East in the Middle Ages*, p. 69.

146. For a discussion of the importance of Ayas, see W. Heyd, *Histoire du commerce du Levant au Moyen ge*, vol. 2, Leipzig, 1886, rpt. Amsterdam, 1959, pp. 73–92.

147. Ibid., p. 69, and Northrup, *From Slave to Sultan*, pp. 132–3. See also the comments of Joshua Prawer, *Histoire du Royaume Latin de Jérusalem*, vol. II, Paris, 1970, pp. 529–37, on the role of the Genoese in the eastern Mediterranean at this time.

148. Joseph Strayer, *The Reign of Philip the Fair*, Princeton, 1980, p. 15, proposed the following interpretation of Philippe IV's policy: "Foreign adventures were abandoned. It was made clear that the essential tasks of the government were not to support French princes in Spain and Italy but to make sure that the king's authority was respected everywhere within the boundaries of France." Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 20–1, argues that Philippe's policy has been misinterpreted, and that whereas he refused to take over management of the Holy Land, he did reinstate French royal support for the French regiment.

149. Runciman, *A History of the Crusades*, 3, p. 396.

150. Richard, *The Crusades, c. 1071–c. 1291*, pp. 459–60, seems to think that Eudes Poilechien was the commander of the French regiment at this time. Jonathan Riley-Smith thinks it is more likely that the marshal of the kingdom was commander of the French regiment at this time rather than the seneschal of the kingdom, and in any case, there is no indication that the *bailli* would have been their leader. See Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 20–1. See also C. J. Marshall, "The French Regiment in the Latin East, 1254–1291," *Journal of Medieval History*, 15 (1989), p. 305.

151. Templer of Tyre, *Cronaca del Templare di Tiro (1243–1314)*, ed. L. Minervini, p. 170; *Les Gestes des Chiprois*, ed. G. Raynaud, pp. 218–20; Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 45–62; Richard, *The Crusades, c. 1071–c. 1291*, p. 460, Edbury, *The Kingdom of Cyprus and the Crusades, 1191–1374*, pp. 96–7; and Runciman, *A History of the Crusades*, 3, p. 396.

152. Hamilton, *The Latin Church in the Crusader States*, pp. 276–8.

153. R. D. Pringle, "The Crusader Cathedral of Tyre," *Levant*, 33 (2001), pp. 168–9. During the thirteenth century the Cathedral of Tyre became the coronation church of the Crusader kings, as well as the burial church for the lords of Tyre: Philip of Montfort in 1270, John of Montfort in 1283, and John's step-brother, Humphrey, in 1284. Despite our knowledge of these burials, no archaeological remains of these tombs have come to light (Pringle, ibid., pp. 184–5).

154. Templar of Tyre, Cronaca del Templare di Tiro (1243–1314), ed. L. Minervini, p. 170 (sect. 439); *Gestes des Chiprois, RHC: Doc. Arm.* II, sect. 439; *Les Gestes des Chiprois*, ed. G. Raynaud, sect. 439, trans. Paul Crawford, *Templar of Tyre*, Ashgate, 2003, sect. 439, p. 96:

> And when the king came to Acre, they put on a festival that lasted fifteen days in a place at Acre called the *Auberge* of the Hospital of St. John, where the Hospitallers had a very great palace. It was the loveliest festival anyone had seen for a hundred years, with amusements and jousts with blunted lances. They re-enacted the stories of the Round Table and also of the Queen of Feminie, with knights dressed up like women jousting together. Then they had nuns who were dressed as monks and who jousted together, and they role-played Lancelot and Tristan and Pilamedes and many other fair and delightful and pleasant scenes.

155. The manuscript in question is London, British Library, MS Add. 15268, as published by Hugo Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, pp. 79–87.

156. Ibid., p. 68.

157. See the discussion of the Amazons in Acre in relation to Alice, countess of Blois, by Anne Derbes and Mark Sandona, "Amazons and Crusaders," *France and the Holy Land*, pp. 187–229. J. Riley-Smith notes that Alice came to Acre in 1287 with a large force, and died a year later there. See Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 20–1.

158. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, pp. 86–7.

159. In 1285, Arghun had sent a letter to Pope Honorius IV, and then followed this with more overtures later, especially in 1287. Runciman, *A History of the Crusades*, 3, p. 398.

160. On Baldwin IV, see B. Hamilton, *The Leper King and His Heirs: Baldwin IV and the Crusader Kingdom of Jerusalem*, Cambridge, 2000.

195. "Et enssi avint seste grant mesaventure de la sité de Triple, con je vos ais dit, & le soudan la fist abatre toute à terre, que vos ne troverés une soule mayson entiere, & ce a esté pour achaisson d'une ville, que Sarazins on labouré en un leuc, quy a nom Montpelerin, qui est loins de la mer en sus de Triple main d'une liue, & s'apele la vile de Triple la neuve."

Templar of Tyre, *Cronaca del Templare di Tiro*, ed. L. Minervini, p. 198; *Les Gestes des Chiprois*, ed. G. Raynaud, sect. 478, pp. 237–8; *Gestes des Chiprois, RHC: Doc. Arm.*, II, sect. 478, trans. P. Crawford, *The Templar of Tyre*, Ashgate, 2003, sect. 478.

196. The lack of attention is reflected even in modern accounts. Hans Mayer's excellent one-volume history, *The Crusades*, p. 285, tersely reports: "In 1287 Lattakieh fell; in 1289 Tripoli."

197. Schein, *Fideles Crucis*, p. 68.

198. Ibid., p. 69.

199. Northrup, *From Slave to Sultan*, p. 154.

200. See Schein, *Fideles Crucis*, pp. 117–18.

201. Robert E. Lerner, *The Powers of Prophecy: The Cedar of Lebanon Vision from the Mongol Onslaught to the Dawn of the Enlightenment*, Berkeley, Los Angeles, London, 1983, p. 16.

202. In fact, of course, there was no Cistercian monastery in Tripoli. The Cistercian monastery of Belmont was located about seventeen kilometers away from the city, and the last certain reference to it was in 1282. Lerner, *The Powers of Prophecy*, pp. 41–2, and n. 11. On Belmont, see Folda, *The Art of the Crusaders in the Holy Land, 1098–1187*, pp. 322–4, and L. Nordiguian and J.-C. Voisin, *Châteaux et Eglises du Moyen Age au Liban*, Beirut, 1999, pp. 125–30.

203. Lerner, *The Powers of Prophecy*, pp. 42–3.

204. On Rusticien of Pisa, see Henry Yule (ed.), *The Book of Ser Marco Polo*, 3rd rev. edn. by H. Cordier, vol. 1, London, 1903, pp. 55–64.

205. Marco Polo, *The Description of the World*, eds. A. C. Moule and P. Pelliot, London, 1938, pp. 73–4. "Now he caused all these things to be recounted in order by Master Rustacius citizen of Pise, who was with him in that same dungeon at Jene, at the time when it was 1298 years since the birth of our Lord Master Jesus Christ."

Another important early edition by Henry Yule (ed.), *The Book of Ser Marco Polo*, 3rd rev. edn. by H. Cordier, vol. 1, London, 1903, p. 2, renders this passage: "Now, being thereafter an inmate of the Prison at Genoa, he caused Messer Rusticiano of Pisa, who was in the said Prison likewise, to reduce the whole to writing; and this befell in the year 1298 from the birth of Jesus."

206. Rusticien de Pise, "Voyages en Syrie," in *Itinéraires à Jérusalem et Descriptions de la Terre Sainte*, eds. H. Michelant and G. Raynaud, Geneva, 1882, rpt. Osnabrück, 1966, pp. 201–12. A slightly later revised edition done for Thiébault de Cépoy, agent for Charles of Valois in Venice, is also published at pp. 213–26.

These selections are also published as follows: Rusticien de Pise, "Voyages en Syrie de Nicolo, Maffeo et Marco Polo," with an Italian translation, S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, vol. IV, Jerusalem, 1984, pp. 95–107.

207. Yule, *The Book of Ser Marco Polo*, vol. 1, Introduction pp. 80–90, discusses the claims for Old French, Latin, Venetian dialect, and [Tuscan] Italian. The original language of the text seems to have been Old French, but it may have had some Italian mixed in as one would find in the *lingua franca* of the Mediterranean during that time.

208. Besides the translation cited earlier, Marco Polo, *The Description of the World*, eds. Moule and Pelliot, London, 1938, see also the extensive scholarly notes published on this text by Paul Pelliot, *Notes on Marco Polo*, vol. 1, Paris, 1959, vol. 2, Paris, 1963, and vol. 3 (Index), Paris, 1973.

209. Niccolo and Maffeo Polo had first gone to the East from Constantinople on a trip to explore trading opportunities, starting in 1260. When they were taken to the court of the great Khan, Kubilai, he commissioned them to be his envoys to the pope, and sent letters with them requesting the pope to send a hundred able missionaries to instruct him and his court on the Christian religion. Having returned to Acre in 1269 to find the pope had died, the two Polos went on to Venice while they awaited for the new pontiff to be chosen. There they found Niccolo's wife had died, leaving their son, Marco, who was invited to go with them on the return journey. See Rusticien de Pise, *Voyages en Syrie*, ed. Michelant and Raynaud, pp. 203–9, and 213–23, trans., Yule (ed.), *The Book of Ser Marco Polo*, vol. 1, pp. 2, 11, 13, 17–19.

210. Yule (ed.), *The Book of Ser Marco Polo*, vol. 1, p. 19, and Rusticien de Pise, *Voyages en Syrie*, eds. Michelant and Raynaud, p. 210 and p. 223. The Rusticien de Pise text in Old French actually says that the "two brothers" went to Jerusalem where they obtained "the oil of the lamp of the sepulchre of Christ," wording not reproduced in the revised edition for Thiébault de Cépoy (p. 223) or the English translation.

211. Rusticien de Pise, *Voyages en Syrie*, ed. Michelant and Raynaud, pp. 210–12, 223–6; Yule (ed.), *The Book of Ser Marco Polo*, vol. 1, pp. 20–3.

212. In P. M. Holt, *Early Mamluk Diplomacy (1260–1290)*, Leiden, 1995, p. 86, we learn that by means of a truce agreed on in 1283, the Mamluks allowed pilgrims to visit Nazareth and services were conducted at the holy site. J. Riley-Smith also informs me that cords worn by the Templars as symbols of chastity, similar to scapulars, were often placed on a column in the ruined Cathedral Church of the Annunciation. See, e.g., K. Schottmüller, *Der Untergang des Templar-Ordens*, vol. 2, Berlin, 1887 (rpt. 1970), pp. 65, 93. My thanks to J. Riley-Smith for all of this information.

213. *Pelrinages et Pardouns de Acre*, in *Itinéraires à Jérusalem et Descriptions de la Terre Sainte*, eds. H. Michelant and G. Raynaud, Geneva, 1882, rpt. Osnabrück, 1966, pp. 229–36. This text is published with an Italian translation, S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, vol. IV, Jerusalem, 1984, pp. 109–17.

214. See D. Jacoby, "Pilgrimage in Crusader Acre: The *Pardouns dAcre*," *De Sion exibit lex et verbum domini de Hierusalem: Essays on Medieval Law, Liturgy, and Literature in Honour of Amnon Linder*, ed. Y. Hen, Turnhout, 2001, pp. 105–17. Jacoby proposes to date this text between 1258 and 1264.

215. "Yl y a une tounbe de piére o gisent les .vij. roys, qe furent iadis de la cité, e Godefroy de Boylloun." *Pelrinages et Pardouns de Acre*, eds. Michelant and Raynaud, p. 230.

216. On the tombs of the Crusader kings, see J. Folda, *ACHL* 1, pp. 37–40, 74–5, 114–15, 143–4, 174, 328, 461, and 467–9.

224. *Pelrinages et Pardouns de Acre*, ed. Michelant and Raynaud, p. 235.

225. Jacoby, "Pilgrimage in Crusader Acre: The *Pardouns dAcre*," p. 117.

226. Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, in *Peregrinatores Medii Aevi Quattuor*, ed. J. C. M. Laurent, Leipzig, 1864, pp. 1–100, and reprinted with an Italian translation, S. de Sandoli, *Itinera Hierosolymitana Crucesignatorum*, vol. IV, Jerusalem, 1984, pp. 119–219. The old English translation is by Aubrey Stewart, "A Description of the Holy Land, by Burchard of Mount Sion," in *Palestine Pilgrims' Text Society*, vol. XII, London, 1897, pp. 1–36.

227. See A. Grabois, "Christian Pilgrims in the Thirteenth Century and the Latin Kingdom of Jerusalem: Burchard of Mount Sion," in *Outremer*, eds. B. Z. Kedar, H. E. Mayer, and R. C. Smail, Jerusalem, 1982, p. 287.

228. It is tempting to think he took his name from some association with Mount Sion, either in Jerusalem or with a monastery by that name, but in this period the Augustinian abbey of Mount Sion was in Acre. See Grabois, "Christian Pilgrims in the Thirteenth Century," pp. 288–90.

229. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, p. 4; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 124.

230. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, p. 9; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 128.

231. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, p. 12; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 132.

232. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 16, 20, 21; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 134, 136, 138.

233. Burchard's evaluation of Safed raises the question in my mind whether he ever really visited Margat Castle, which is loftier and on a much more impressive promontory overlooking the sea!

234. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 21, 27; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 138, 142.

235. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 39, 42; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 152, 154, 156.

236. J. Folda, *The Nazareth Capitals and the Crusader Shrine of the Annunciation*, University Park and London, 1986, pp. 12–13.

237. Folda, *Art of the Crusaders in the Holy Land, 1098–1187*, pp. 309–13, and R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. II, Cambridge, 1998, pp. 283–97.

238. Folda, *Art of the Crusaders in the Holy Land, 1098–1187*, pp. 313–15, and Pringle, *The Churches of the Crusader Kingdom of Jerusalem*, vol. II, Cambridge, 1998, pp. 297–301.

239. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 50, 51, 57, 65; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 162, 164, 168, 170, 174, 176.

240. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, p. 66; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 176. This is a puzzling comment because Mount Sion was outside the city walls then and now.

241. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 76, 77; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 186.

242. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 87–8; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 196.

243. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 93, 94, 99; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 202, 206.

244. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, p. 102; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 210.

245. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 103–4; Burchardus de Monte

Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 210–12. Presumably he is thinking of Syrians as meaning Orthodox Christians with an Arabic liturgy.

246. Turcomans are nomadic, but they are not Bedouins.

247. M. M. Ziada, "The Mamluk Sultans to 1293," *HC*, 2, p. 749.

248. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, pp. 104–11; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, pp. 212, 214, 216, 218. Assessment of the population demographics and the separate issue of Islamicization of the land in Syria-Palestine have been debated by scholars. The most recent and most reliable discussion pertaining to these issues is found in R. Ellenblum, *Frankish Rural Settlement in the Latin Kingdom of Jerusalem*, Cambridge, 1998, pp. 3–38, 213–76.

249. Burchard of Mount Sion, trans. A. Stewart, *PPTS*, XII, p. 111; Burchardus de Monte Sion, *Descriptio Terrae Sanctae*, ed. de Sandoli, p. 218.

250. Grabois, "Christian Pilgrims in the Thirteenth Century," *Outremer*, p. 288, identifies the Old and New Testaments, the *Onomasticon* of Eusebius of Caesarea, the writings of St. Jerome, and the *Historia Orientalis* by Jacques de Vitry, as Burchard's main sources.

251. Grabois, "Christian Pilgrims in the Thirteenth Century," *Outremer*, pp. 295–6.

252. W. Neumann, (ed.), *Drei mittelalterliche Pilgerschriften*, III, "Philippi descriptio Terrae Sanctae," *Oesterreichische Vierteljahresschrift für Katholische Theologie*, 11 (1872), pp. 1–78, 165–74. Philippus is named "Philippus Brusserius Savonensis" by R. Röhricht, *Biblioteca Geographica Palaestinae*, Berlin, 1890, rpt. Jerusalem, 1963, pp. 60–1.

253. "Que olim fuit domus Ioachim et beate Anne uxoris eius, matris Virginis gloriose." "Philippi descriptio Terrae Sanctae," p. 51.

254. "Castrum peregrinorum: extra castrum est petra, ubi b. virgo Maria requievit et infra castrum est corpus beate Eufemie virg. et mart." Ibid., p. 76.

255. Ibid., p. 171.

256. "Anteradus civitas que vulgariter Tortosa vocatur, in hac civitate est capella quedam parvula in medio maioris ecclesie Anteradensis sita que Apostolis Petro et Iohanne fabricata esse perhibetur ad honorem b. Virg. Marie que usque hodie in magna veneracione habetur. . . ." Ibid., p. 174.

257. "Et de peregrinacionibus Ierusalem et tocius Sancte Terre que vidi et eciam scire potui hec dicta sufficiunt: quas (ego) Philippus ad honorem Dei omnipotentis et ad utilitatem peregrinorum breviter memorie commendavi." Ibid.

266. Folda, *Crusader Manuscript Illumination*, Pl. 110 (Paris, BN MS fr. 9084, fol. 214r, dated 1286), Pl. 132 (Boulogne sur Mer, Bibl. Mun. MS 142, fol. 183v, dated 1287), and Pl. 156 (Florence, Bibl. Laurenz. MS PLU LXI.10, fol. 188v, dated 1290/1). See also in this book, CD nos. 370–91, 392–413, and 470–95, respectively.

267. Hamilton, *The Latin Church*, p. 280.

268. It is interesting that, relatively speaking, so many important prelates in the Latin Church were Dominicans in the later thirteenth century in the Holy Land.

269. I am relying on the substantial study of Jonathan Riley-Smith, "The Crown of France and Acre, 1254–1261," *France and the Holy Land: Frankish Culture at the End of the Crusades*, eds. D. Weiss and L. Mahoney, pp. 45–62, for my information on the French regiment, along with the briefer article by C. J. Marshall, "The French Regiment in the Latin East, 1254–1291," *Journal of Medieval History*, 15 (1989), pp. 301–7.

270. Riley-Smith, "The Crown of France and Acre, 1254–1261," *France and the Holy Land*, pp. 45–62.

271. M. Barber, *The New Knighthood*, Cambridge, 1994, pp. 169–77; M. L. Bulst-Thiele, *Sacrae Domus Militiae Templi Hierosolymitani Magistri*, Göttingen, 1974, pp. 259–90.

272. J. Riley-Smith, *The Knights of St John in Jerusalem and Cyprus, 1050–1310*, London, 1967, pp. 186–93, 189–94, 196–8, respectively.

273. On the presence of Alice of Brittany in Acre, see "Les Annales de la Terre Sainte," *AOL*, II, pp. 459–69. See also the discussion of Anne Derbes and Mark Sandona, "Amazons and Crusaders: The *Histoire Universelle* in Flanders and the Holy Land," *France and the Holy Land*, pp. 187–229.

274. *RHC: Hist. Occ.*, II, p. 809. P. Crawford identifies her as the heiress of John of Chatillon. He says she did not die in Acre, but returned to France in 1290 and died there in January 1292 (*Templar of Tyre*, sect. 491, n. 33). It is unclear to me whether this person is the same as Alice's daughter, Joan. See Derbes and Sandona, "Amazons and Crusaders," *France and the Holy Land*, pp. 187–229.

275. Folda, *Crusader Manuscript Illumination*, pp. 129–30.

276. Riley-Smith, *The Knights of St John*, pp. 272–3.

277. See Folda, *Crusader Manuscript Illumination*, pp. 60–6, and see now K. V. Sinclair, "The Earliest Old French *Livre des Juges*; a Note on the Translator and His Patrons," *Neophilologus*, 81 (1997), pp. 349–54.

278. H. Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, pp. 86–7.

279. As of this writing a new study of this codex by Lisa Mahoney as the focus of a doctoral dissertation at the Johns Hopkins University is underway.

280. See especially D. Jacoby, "The Trade of Crusader Acre in the Levantine Context: An Overview," *Archivio Storico del Sannio*, nos. 1–2 (1998), pp. 103–20, and idem, "Migration, Trade and Banking in Crusader Acre," *The Balkans and the East Mediterranean, 12th–17th Centuries*, ed. L. Mavromatis, Athens, 1998, pp. 105–19.

281. An interesting case of large loans arranged by the military orders is documented by M. G. Servois, "Emprunts de saint Louis en Palestine et en Afrique," *Bibliothèque de l'Ecole des Chartes*, 19 (1858), pp. 290–3.

282. Jacoby, "Migration, Trade and Banking in Crusader Acre," pp. 116–17.

283. Ibid., pp. 106–19. In his discussion of the various aspects of commercial activity, Jacoby provides the important documentation for how the specific details of these activities can be known.

284. For information concerning the major Italian commercial cities in the period from 1260s to *c.*1290, see D. Jacoby, "Pelerinage Mediéval et Sanctuaires de Terre Sainte: La Perspective Vénitienne," *Ateneo Veneto*, n.s. XXIV (1986), pp. 28–32; idem, "Genoa, Silk Trade and Silk Manufacture in the Mediterranean Region (ca. 1100–1300), *Tessuti, Oreficerie, miniature in Liguria, XII–XV secolo*, Atti del Convegno, III, Bordighera, 1999, pp. 11–40; idem, "Silk Crosses the Mediterranean," *Le Vie del Mediterraneo*, ed. G. Airaldi, Genoa, 1997, pp. 55–79; and L. Buenger Robbert, "Venice and the Crusades," *HC*, 5, pp. 438–51.

285. See D. Jacoby, "Society, Culture and the Arts in Crusader Acre," *France and the Holy Land*, pp. 97–137.

286. J. Riley-Smith, "A Note on Confraternities in the Latin Kingdom of Jerusalem," *Bulletin of the Institute of Historical Research*, 44 (1971), p. 304.

287. J. Richard, "La Confrérie des Mosserins d'Acre et les marchands de Mossoul au XIIIe siècle," *L'Orient Syrien*, 11 (1966), pp. 451–60, and J. Prawer, "Estates, Communities and the Constitution of the Latin Kingdom," *Proceedings of the Israel Academy of Sciences and Humanities*, 2 (1966), pp. 13, 20–2, 39–2.

288. J. Riley-Smith, "A Note" pp. 301–2.

289. On the new altarpieces, see J. Gardner, "Altars, Altarpieces, and Art History: Legislation and Usage," *Italian Altarpieces: 1250–1550*, Oxford, 1994, pp. 5–19, and K. van der Ploeg, "How Liturgical Is a Medieval Altarpiece?," *Italian Panel Painting of the Duecento and Trecento*, ed. V. M. Schmidt, *Studies in the History of Art*, 61 (2002), pp. 103–21. On the development and activities of the Italian confraternities, see the old study by G. M. Monti, *Le Confraternite Medievali dell'Alta e Media Italia*, vol. 1, Venice, 1927, pp. 5–64.

290. B. Wilson, *Music and Merchants: The Laudesi Companies of Republican Florence*, Oxford, 1992, p. 2. Other recent publications on this important topic include C. Barr, *The Monophonic Lauda and the Lay Religious Confraternities of Tuscany and Umbria in the Late Middle Ages*, Early Drama, Art, and Music Monograph Series, 10, Kalamazoo, 1988, pp. 1–59. Besides the *Laudesi*, or confraternities devoted to Mary, there was a second type, the *Disciplinati*, that is, a confraternity established for penitential purposes. On the *Disciplinati*, see J. Henderson, "The Flagellant Movement and Flagellant Confraternities in Central Italy, 1260–1400," *Religious Motivation: Biographical and Sociological Problems for the Church Historian*, ed. D. Baker, Oxford, 1978, pp. 147–60, and G. Dickson, "The Flagellants of 1260 and the Crusades," *Journal of Medieval Studies*, 15 (1989), pp. 227–67.

291. L. Bellosi, "The Function of the Rucellai Madonna in the Church of Santa Maria Novella," *Italian Panel Painting of the Duecento and Trecento*, ed. V. M. Schmidt, *Studies in the History of Art*, 61 (2002), pp. 147–59.

292. Riley-Smith, "A Note on Confraternities," p. 308.

293. A. Grabois, *Le Pèlerin Occidental en Terre Sainte au Moyen Age*, Paris, Brussels, 1998, provides an overview of pilgrimage to the Holy Land as the result of twenty years of study. See also J. Richard, *Les Récits de voyage et de Pèlerinage*, Turnhout, 1981.

294. On Burchard of Mount Sion and his fellow German pilgrims, see A. Grabois, "Christian Pilgrims in the Thirteenth Century and the Latin Kingdom of Jerusalem: Burchard of Mount Sion," *Outremer*, pp. 285–96.

295. Philippus Brusserius Savonensis is the title given to him by R. Röhricht, *Biblioteca Geographica Palaestinae*, Berlin, 1890, rpt. Jerusalem, 1963, pp. 60–1. The text of his account is published by W. Neumann: "Drei mittelalterliche Pilgerschriften," III, "Philippi descriptio Terrae Sanctae," *Oesterreichische Vierteljahresschrift für Katholische Theologie*, 11 (1872), pp. 1–78, 165–74, and S. de Sandoli (ed.), "Frater Philippus de Busseriis, *Liber Peregrinationum*," *Itinera Hierosolymitana Crucesignatorum*, vol. IV, Jerusalem, 1984, pp. 221–54. My thanks to Helen Nicholson for drawing my attention to this pilgrim.

296. This report is discussed by D. Jacoby, "Society, Culture and the Arts in Crusader Acre," *France and the Holy Land*, pp. 97–137, and n. 22. Jacoby says the figure appears in an unpublished manuscript of Ricoldus's account, referred to by E. Panella, "Ricerche su Riccoldo da Monte Croce," *Archivum Fratrum Praedicatorum*, 68 (1988), p. 8. Although it is clearly a very impressionistic number, still the fact that there were many, many pilgrims there in the winter is notable.

297. C. Tyerman, *England and the Crusades, 1095–1588*, Chicago, 1988, p. 261.

298. See, e.g., A. Grabois, "Les Pèlerins Occidentaux en Terre Sainte au Moyen Age: Une Minorité Étrangère dans sa Patrie Spirituelle," *Studi Medievali*, 3a serie, 30 (1989), pp. 15–48; idem, "Medieval Pilgrims, the Holy Land and its Image in European Civilisation," *Pillars of Smoke*, Johannesburg, 1988, pp. 65–79; and idem, "Les pèlerins occidentaux en Terre Sainte et Acre: d'Accon des croisés à Saint-Jean d'Acre," *Studi Medievali*, 3a serie, 24 (1983), pp. 247–64; M.-L. Favreau-Lilie, "The German Empire and Palestine: German Pilgrimages to Jerusalem between the 12th and 16th Century," *Journal of Medieval History*, 21 (1995), pp. 321–41.

299. See Jacoby, "Society, Culture and the Arts in Crusader Acre," *France and the Holy Land*, pp. 97–137.

300. D. Jacoby, "Pilgrimage in Crusader Acre: The *Pardouns dAcre*," *De Sion exibit lex et verbum domini de Hierusalem, Essays on Medieval Law, Liturgy, and Literature in Honour of Amnon Linder*, ed. Y. Hen, Turnhout, 2001, pp. 116–17. See now also Jacoby's important and wide-ranging article, "Society, Culture and the Arts in Crusader Acre," *France and the Holy Land*, pp. 97–137.

301. M. Benveniste, *The Crusaders in the Holy Land*, Jerusalem, 1970, pp. 95–6.

302. This passage from William of Tyre is taken from the *Historia rerum in partibus transmarinis gestarum*, published as Willelmi Tyrensis Archiepiscopi, *Chronicon*, ed. R. B. C. Huygens, with H. E. Mayer and G. Rösch, *Corpus Christianorum, Continuatio Medievalis*, vol. 63, Turnhout, 1986, p. 485, and translated by E. A. Babcock and A. C. Krey, William Archbishop of Tyre, *A History of Deeds Done beyond the Sea*, Records of Civilization, vol. 35, New York, 1943, vol. 1, p. 453.

303. For reproductions of the maps of Matthew Paris, see B. Dichter, *The Maps of Acre: An Historical Cartography*, Acre, 1973, pp. 9–15.

304. Ibid., pp. 16–30.

305. On the maps of Acre, besides the publication of Dichter cited earlier, see J. Prawer, "The Historical Maps of Acre (in Hebrew)," *Eretz Israel*, 2 (1953), pp. 175–83; A. J. Boas, *Crusader Archaeology*, London and New York, 1999, pp. 33–4; and Folda, *Crusader Manuscript Illumination*, p. 3–5 and n. 1.

On the name of Acre, it appears that "St. Jean d'Acre" may have been used later, that is, after 1291, and more in western Europe than in thirteenth-century Acre itself. This needs more investigation.

306. See H. Prutz, *Kulturgeschichte der Kreuzzüge*, Berlin, 1883, esp. pp. 395 ff.; E. G. Rey, *Les Colonies franques en Syrie aux XIIe et XIIIe siècles*, Paris, 1883, esp. pp. 165 ff; and J. L. LaMonte, "The Significance of the Crusaders' States in Medieval History," *Byzantion*, 15 (1940–1), pp. 300–15. More recently, see R. B. C. Huygens, *Latijn in "Outremer": Een Blik op de Latijnse Letterkunde der Kruisvaarderstaten in het Nabije Oosten*, Leiden, 1964 (my thanks to Dr. Huygens for providing me with an English version of his lecture).

307. S. Runciman, *History of the Crusades*, 3, pp. 489–92, Appendix II. More recent works by Mayer and Prawer basically follow Runciman's views. See Mayer, *The Crusades*, pp. 180–2, and Prawer, *The Latin Kingdom*, pp. 525–33.

308. Runciman, *History of the Crusades*, 3, pp. 490, 492.

309. Ibid., p. 489.

310. Runciman, *History of the Crusades*, 3, "Architecture and the Arts in Outremer," p. 367.

311. I see the discussion of David Jacoby in "Society, Culture and the Arts in Crusader Acre," *France and the Holy Land*, as an important statement drawing attention to this more multicultural, less Eurocentric point of view.

312. H. M. Attiya, "Knowledge of Arabic in the Crusader States in the Twelfth and Thirteenth Centuries," *Journal of Medieval History*, 25 (1999), pp. 203–13.

325. For what we know on Jewish centers, see the basic work of J. Prawer, *The History of the Jews in the Latin Kingdom of Jerusalem*, Oxford, 1988, pp. 258–91 (on Acre). See now S. Schein, "Between East and West: The Jews in the Latin Kingdom of Jerusalem," *East and West in the Crusader States*, eds. K. Ciggaar, A. Davids, and H. Teule, Louvain, 1996, pp. 31–8, and also Prawer, *Histoire du Royaume Latin de Jérusalem*, II, pp. 401–2; idem, "Social Classes in the Crusader States: The 'Minorities,'" *HC*, 5, pp 94–100; and A. Grabois, "Acre as the Gateway of Jewish Immigration to Palestine in the Crusader Period (in Hebrew)," *Studies in the History of the Jewish People and the Land of Israel*, 2, University of Haifa, 1972, pp. 93–106, English summary, pp. xi–xii.

326. A. Grabois, "La bibliothèque du noble d'*Outremer* à Acre dans la second moitié du XIIIe siècle," *Le Moyen Age*, 103 (1997), pp. 53–66. See now also the very useful article by L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, colloquium 4 of III Colloquio Internazionale Medioevo Romanze e Orientale, 1999, pp. 79–96, and idem, "Outremer," *Lo Spazio Letterario del Medioevo, 2. Il Medioevo Volgare*, vol. 1, La Produzione del Testo, Rome, [n.d.], pp. 611–48. See also the very important articles by D. Jacoby, "Knightly Values and Class Consciousness in the Mediterranean States of the Eastern Mediterranean," *Mediterranean Historical Review*, 1 (1986), pp. 158–86, and especially, idem, "La Littérature française dans les états latins de la Méditerranée orientale à l'époque des croisades: diffusion et création," *Essor et Fortune de la Chanson de Geste dans l'Europe e l'Orient Latin, Actes du* IXe *Congrès Internationale de la Société Rencesvals* . . . , Modena, 1984, pp. 617–46.

327. Prawer, *The Latin Kingdom of Jerusalem*, pp. 75–6.

328. P. Edbury and J. Folda, "Two Thirteenth-Century Manuscripts of Crusader Legal Texts from Saint-Jean d'Acre," *Journal of the Warburg and Courtauld Institutes*, 57 (1994), pp. 243–54. The two manuscripts in question are in Venice, Bibl. Marciana, MS fr. App. 20 (=265), a codex that is illustrated (his manuscript A), and in Paris, B.N., MS fr. 19025, a codex that is unillustrated (his manuscript C).

329. Edbury has undertaken the enormous task of producing a new critical edition of this important text, which has just been published: John of Ibelin, *Le Livre des Assises*, ed. P. W. Edbury, *The Medieval Mediterranean: Peoples, Economies and Cultures, 400–1500*, vol. 50, Leiden-Boston, 2003. His new edition is partly based on three early manuscripts not known by the first editor, Beugnot, in the nineteenth century.

330. See especially the work of Jacoby, "La Littérature française dans les états latins de la Méditerranée orientale à l'époque des croisades: diffusion et création," pp. 617–46, in particular pp. 620–4, 625–33, 635–9.

331. A. Foulet, "The Epic Cycle of the Crusades," *HC*, 6, pp. 98, and 98–113, and D. Jacoby, "La littérature française dans les états latins de la Méditerranée orientale à l'époque des croisades: diffusion et création," p. 640.

332. K. Ciggaar, "Manuscripts as Intermediaries: The Crusader States and Literary Cross-Fertilization," *East and West in the Crusader States*, eds. K. Ciggaar, A. Davids, and H. Teule, Louvain, 1996, pp. 140–1.

333. Grabois, "La bibliothèque du noble," p. 65. Minervini, "Produzione e circolazione di manoscritti negli stati crociati," p. 95, also suggests the *Roman de Tristan* as another literary work to be found in the Latin East, although the manuscript she cites, Paris, B.N., MS fr. 750, does not seem to be from the Crusader States.

334. Minervini, "Produzione e circolazione di manoscritti negli stati crociati," p. 94, and nn. 50 and 51.

335. See Jacoby, "La Littérature française dans les états latins de la Méditerranée orientale à l'époque des croisades: diffusion et creation," pp. 631–2.

336. Ciggaars, "Manuscripts as Intermediaries," p. 142.

337. Ibid., p. 143.

338. "Jaquemin d'Acre l'escrist/a la chandelor de Nostre Dame Crist./Que Dieu le mete en paradis/Lui et tos nos amis.Amen./Explicit liber mapamondi./Escrist fu en l'an de l'incarnation Nostre Seignor Jesu Crist 1270 o meis de jenvier."

Image du Monde, Chantilly, Musée Condé, MS 476; cf. Minervini, "Produzione e circolazione di manoscritti negli stati crociati," pp. 92–3, and C. Samaran and R. Marichal, *Catalogue des Manuscrits en écriture Latine portant des indications de date, de lieu ou de copiste*, I, Musée Condé et Bibliothèques Parisiennes, CNRS, Paris, 1959, p. 35, Pl. 15.

339. J. S. Beddie, "Some Notices of Books in the East in the Period of the Crusades," *Speculum*, 8 (1933), pp. 240–2. Beddie points out that even though the list is identified as coming from the convent of the Nazareth church, and is linked with the bishop of Sidon, it is not absolutely certain that this is a list of the books from a convent in Nazareth in Palestine. Accepting this cautionary note, it seems very likely that this does pertain to Nazareth in Palestine *c.* 1200, and even more important, it indicates the kind of books in a religious house, in contrast to what we might find in that of an educated layman of means. For the current documentation on this list, see Minervini, "Produzione e circolazione di manoscritti negli stati crociati," p. 81, n. 6.

340. H. de Curzon, *La Règle du Temple*, Société de l'Histoire de France, vol. 228, Paris, 1886, p. 26, art. 15, p. 165, art. 270, p. 341, art. 668. A new edition of the Rule is in preparation by S. Cerrini (ed.), *Regula pauperum commilitonum Christi Templique Salomonici*, for the Corpus Christianorum, Continuatio Medievalis series published by Brepols. See also the recent English translation of the Rule: *The Rule of the Templars: The French Text of the Rule of the Order of the Temple*, trans. J. M. Upton-Ward, Woodbridge, 1992.

341. A. Trudon des Ormes, "Etudes sur les possessions de l'Ordre du Temple en Picardie," *Memoires de la Société des Antiquaires de Picardie*, 4th ser., 2. (1894), pp. 283–4. Nothing similar seems to have survived for the Templars in the Latin East: see E. G. Rey, "L'Ordre du Temple en Syrie et à Chypre: Les Templiers en Terre Sainte," *Revue de Campagne et de Brie*, 24 (1888), pp. 241 ff., 367 ff.

342. Jonathan Riley-Smith, communication by letter, November 2002, and reference to J. Michelet, *Le Procès des Templiers*, vol. 1, Paris, 1841, pp. 379, 388–9.

343. J. Delaville le Roulx (ed.), *Cartulaire générale de l'ordre des Hospitaliers de St.-Jean de Jérusalem*, vol. II, Paris, 1897, art. 2213: pp. 554–5, no. 111, pp. 556–7, no. 121, vol. III, Paris, 1899, p. 52, art. 3039, no. 39.

344. "libri prophetarum et evangeliorum, breviaria, librum . . . Moralium, librum missale, ..." See Minervini, "Produzione e circolazione di manoscritti negli stati crociati," pp. 79–80, who refers to the letters of Ricoldo da Monte Croce published by R. Röhricht, "Lettres de Ricoldo de Monte-Croce," *Archives de l'Orient Latin*, II, Paris, 1884, rpt. AMS Press, New York, 1978, 277, 280–1, 289.

345. Beddie, "Some Notices of Books in the East in the Period of the Crusades," p. 241. H. E. Mayer raised the issue of these libraries in two of his writings, first in a review of Buchthal, *MPLKJ*, p. 167, and his discussion in idem, "Das Pontifikale von Tyrus und die Krönung der lateinischen Könige von Jerusalem," *DOP*, 21 (1967), pp. 143–7.

346. See Chapter 6, n. 932.

347. See Chapter 6, n. 926.

348. These Acre *History of Outremer* manuscripts are the following:

a. Paris, Bibl. Nat. MS fr. 2628, with continuation (added) to 1264, done in the late 1250s or early 1260s, with additions *c.*1280.
b. Leningrad, M. E. Saltykov-Shchedrin State Public Library, MS fr. fol. v.IV.5, with continuation to 1264, done *c.*1280.
c. Lyon, Bibl. Mun. MS 828, with continuation to 1244/8, done *c.*1280.
d. Paris, Bibl. Nat. MS fr. 9084, with continuation to 1275 (incomplete, ends *c.*1264), done *c.*1286.
e. Boulogne-sur-Mer, Bibl. Mun. MS 142, with continuation to 1274, done *c.*1287.
f. Florence, Bibl. Laurenziana, MS PLU.LXI.10, with continuation to 1277, done *c.*1290/1 with additions *c.*1330 in Venice.

We shall discuss them later with regard to their miniature cycles.

349. These Acre manuscripts are the following:

a. Brussels, Bibl. Roy. MS 10175, *Histoire Universelle* done in the 1270s.
b. London, British Lib. MS Add. 15268, *Histoire Universelle* done *c.*1285/6.
c. Paris, Bibl. Nat. MS fr. 20125, *Histoire Universelle*, done in *c.*1287.
d. Brussels, Bibl. Roy. MS 10212, *Faits des Romains*, done *c.*1287/8.

We shall discuss them later with regard to their miniature cycles.

350. Does this choice of style mean, for example, that a Crusader style was more appropriate for a Crusader king than the French Gothic style would be?

351. H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 120–79; K. Molin, *Unknown Castles*, Hambledon and London, 2001, pp. 3–88; W. Müller-Wiener, *Burgen der Kreuzritter*, Munich/Berlin, 1966, pp. 43–77.

352. For the churches, see R. D. Pringle, *The Churches of the Crusader Kingdom of Jerusalem: A Corpus*, Cambridge, vol. 1, 1993, vol. 2, 1998, vol. 3, forthcoming. For secular works see, R. D. Pringle, *Secular Buildings in the Crusader Kingdom of Jerusalem*, Cambridge, 1997.

353. Buchthal, *MPLKJ*, pp. 68 ff., 87 ff.

354. For this manuscript, see Chapter 6, nn. 868–74.

355. For the literature on Lyon, Bibl. Mun., MS 828, see H. Buchthal, *MPLKJ*, pp. 91–2, 152–3, with older bibliography; Folda, *Crusader Manuscript Illumination*, pp. 27–41, 216; R. Morgan, *The Chronicle of Ernoul and the Continuations of William of Tyre*, Oxford, 1973, pp. 6, 19, and passim; and see now *Les Croisades: L'Orient et l'Occident d'Urbain II à Saint Louis, 1096–1270*, ed. M. Rey-Delqué, Milan 1997, pp. 393, with a substantial number of excellent color plates of this manuscript distributed through the first part of the catalogue, pp. 5–97, and Minervini, "Produzione e circolazione di manoscritti negli stati crociati," pp. 90–1.

The main content/decoration of Lyon, Bibl. Mun., MS 828 is as follows: Old French translation of William of Tyre's *History of Outremer* (Books 1–22), with continuation to 1244 completed to 1248. 382 fols.:

Fols. 1–379 with approx. 43 gatherings of 8 fols. each.
Text in two columns of 39 lines each, justification of 22.65 × 16.7 cm, interval 1.7 cm.
Fols. 380–2 with two folios.
Text in two columns of 35 lines each, justification of 22.05 × 16.25 cm, interval 1.8 cm.
No rubrics.
23 miniature panels:
Books 1–22: 22 miniature panels
Books 23 ff.: 1 miniature panel.

Fol. 1r, Book 1, (L)es ancienes estoires . . .(panel: 15.7 × 7.5 cm, damaged)

1. Peter the Hermit prays at the Holy Sepulcher.
2. Peter the Hermit leads the First Crusade.

Fol.15v, Book 2, (V)enus estoit . . . (panel: 7.85 × 7.9 cm)

1. Mounted pilgrims en route to the Holy Land led by Bishop Adhemar of Le Puy.

Fol. 24r, Book 3, (D)e la cite de nique . . . (panel: 7.9 × 7.7 cm)

1. The siege of Nicaea.
2. The capture of the wife of the Turkish commander, Qilij Arslan.

Fol. 33r, Book 4, (O)re aves oi coment tancres . . . (panel: 7.1 × 7.4 cm)

1. The siege of Antioch.

Fol. 42r, Book 5, (V)oians les seignors . . . (panel: 7.8 × 7.55 cm)

1. The surrender of Antioch.
2. The Crusaders enter the lower city.

Fol. 52v, Book 6, (I)a sestoient bien saoule . . . (panel: 7.8 × 7.35 cm)

1. The citadel of Antioch.
2. Fighting at the gate of Antioch.

Fol. 62r, Book 7, (L)es choses . . . (panel: 8.85 × 7.4 cm)

1. Council of the Latin leaders.
2. Death of a king.

Fol. 73r, Book 8, (V)erites est que . . . (panel: 8.15 × 7.3 cm)

1. The Crusaders at Jerusalem.
2. Prayers in the Crusader camp.

Fol. 83r, Book 9, (S)i come vos aves oi . . . (panel: 7.7 × 7.4 cm)

1. Godefroy de Bouillon prays at the Holy Sepulcher.
2. Discussions among the Crusaders about who should rule Jerusalem.

Fol. 93v, Book 10, (R)ois fu li dus . . . (panel: 7.7 × 7.6 cm)

1. Death of Godefroy de Bouillon.
2. Coronation of Baldwin as king of Jerusalem.

Fol. 106r, Book 11, (E)stes iert ia passes . . . (panel: 7.6 × 7.2 cm)

1. Prince Bohemond departs on horseback for the West.
2. Prince Bohemond travels to Apulia by ship.

Fol. 122v, Book 12, (X)erses fu un puissant . . . (panel: 7.7 × 7.5 cm)

1. Death of King Baldwin I.
2. Coronation of King Baldwin II.

Fol. 135v, Book 13, (F)ors fu a grant . . . (panel: 7.8 × 7.45 cm)

1. The siege of Tyre.

Fol. 147v, Book 14, (R)ois fu apres . . . (panel: 8.2 × 7.5)

1. Death of King Baldwin II.
2. Coronation of King Fulk I.

Fol. 160v, Book 15, (A)pres le mois . . . (panel: 7.7 × 7.3 cm)

1. The Byzantine Emperor attacks Shayzar.
2. The prince of Antioch and the count of Tripoli play chess.

Fol. 174, Book 16, (N)e demora gaires apres . . . (panel: 8.2 × 7.35 cm)

1. King Fulk and Queen Melisende ride out from Acre.
2. King Fulk falls from his horse and is killed.

Fol. 189r, Book 17, (C)orat . . . (panel: 7.0 × 7.4 cm)

1. The council at Acre during the Second Crusade.
2. The attack of the Second Crusade on Damascus.

Fol. 205v, Book 18, (O)r parlerons . . . (panel: 8.0 × 7.4 cm)

1. The patriarch of Antioch is abused by Renauld de Chatillon.

Fol. 224v, Book 19, (R)emes . . . (panel: 7.3 × 8.2 cm)

1. Death of King Baldwin III.
2. Coronation of King Amaury I.

Fol. 238v, Book 20, (U)ne chose . . . (panel: 8.05 × 7.5 cm)

1. King Amaury I receives a letter from the Byzantine Emperor.
2. The siege of Balbis.

Fol. 254r, Book 21, (M)lt fu grans le duel . . . (panel: 8.2 × 7.25 cm)

1. Death of King Amaury I.
2. Coronation of King Baldwin IV.

Fol. 268r, Book 22, (B)ueimont . . . (panel: 8.25 × 7.2 cm)

1. The prince of Antioch and the count of Tripoli meet in Jerusalem.
2. Baldwin IV's sister marries Guy de Lusignan.

Fol. 288r, Book 23, ch. 6, (D)evant ce que . . . (panel: 8.4 × 7.6 cm)

1. Death of King Baldwin IV.
2. Coronation of King Baldwin V.

Fol. 379v (end of original hand), . . . il furent mult travaillez et en la fin . . . (Book 33, ch 55).
Fol. 381v (in later hand), . . . Ce fu en lan de lincarnation nostre seignor ihesu christi MCCXLIII (sic: for MCCXLVIII) ans.

356. For the literature on St. Petersburg, National Library of Russia (formerly the M. E. Saltykov-Shchedrin State Public Library), MS fr. fol. v.IV.5, see Folda, *Crusader Manuscript Illumination*, pp. 27–41, 176–8, with older bibliography, and see now Minervini, "Produzione e circolazione di manoscritti negli stati crociati," pp. 90–1.

The main content/decoration of St. Petersburg MS fr. fol. v.IV.5 is as follows: Old French translation of William of Tyre's *History of Outremer*, (Books 1–22) with continuation to 1264.
Bound in two volumes:

Vol. 1, 196 fols., with 27 gatherings of 8 folios each and a number of leaves missing.
Text in two columns of 41 lines each, justification of 24.4 × 16.0 cm, interval, 2.2 cm.
(13 miniatures)
Vol. 2, 133 fols., with 20 gatherings most of 8 folios each but many irregular gatherings and some folios missing.
Text in two columns of 40 to 41 lines each, justification of 24.3 × 16.0 cm, interval, 2.2 cm.
(6 miniatures)
16 miniature panels (5 panel miniatures missing), 3 historiated initials:
Books 1–22: 16 panel miniatures, 1 historiated initial (5 panel miniatures missing).
Books 23 ff.: 2 historiated initials.
Illuminated book initials, and red and blue calligraphically decorated chapter initials.
No rubrics.

Volume I:

Fol. 1r, Book 2, (V)enus estoit li mois daost....

No miniature. Illuminated initial (V), (3.4 × 3.65 cm).

Fol. 10v, Book 3, (D)e la cite de nique... (panel: 8.2 × 6.9 cm)

1. The Crusaders attack Nicaea.
2. The Crusaders capture the wife of the Turkish commander, Qilij Arslan.

Fol. 18v, Book 4, (O)r avez oi coment... (panel: 8.2 × 7.2 cm)

1. The Crusaders besiege Antioch.

Fol. 27r, Book 5, (V)oiant le seignor... (panel: 10.9 × 7.0 cm)

1. The city of Antioch is betrayed to the Crusaders by Firuz.
2. The Crusaders enter Antioch after the gates were opened from within.

Fol. 36r, Book 6, (I)a estoient bien saole... (panel: 8.2 × 7.1 cm)

1. The citadel of Antioch where many citizens took refuge.
2. The Crusaders kill many people in the lower city of Antioch.

Fol. 45r, Book 7, (L)es choses furent ensi... (panel: 9.1 × 7.0 cm)

1. The Crusaders besiege the city of Maara.
2. The Crusaders encamp before the city of Jerusalem.

Book 8: incipit missing between fols. 49 and 50.
Book 9: incipit missing between fols. 49 and 50.
Book 10: incipit missing between fols. 58 and 59.

Fol. 73r, Book 11, (E)stes estoit ia passes... (panel: 9.4 × 7.2 cm)

1. Bohemond leaves Antioch on horseback for the West.
2. Bohemond travels to Apulia by ship.

Fol. 90r, Book 12, (X)erses fu .I. puissat... (panel: 9.3 × 7.2 cm, damaged)

1. Death of King Baldwin I.
2. Coronation of King Baldwin II by Patriarch Arnulf.

Fol. 103r, Book 13, (F)orz estoit a mervoilles... (panel: 9.9 × 7.1 cm)

1. The Crusaders besiege Tyre by land and by sea.

Fol. 116r, Book 14, (R)ois fu de ihrlm... (panel: 8.1 × 6.9 cm)

1. Death of King Baldwin II.
2. Coronation of King Fulk I by Patriarch William.

Fol. 129r, Book 15, (A)pres le mois diver... (panel: 8.3 × 6.8 cm)

1. The Byzantine Emperor attacks Shayzar.
2. The count of Edessa and the prince of Antioch play chess in their tent.

Fol. 143v, Book 16, (N)e demora puis guaires... (panel: 8.6 × 7.2 cm)

1. King Fulk and Queen Melisende ride out from Acre.
2. King Fulk is thrown from his horse and lies fatally injured.

Fol. 166r, Book 17, (C)onrat lempeor dalemaigne... (panel: 9.1 × 7.2 cm)

1. The council at Acre during the Second Crusade.
2. The Crusaders besiege Damascus.

Fol. 177r, Book 18, (O)r plerons .i. petit... (panel: 8.5 × 7.1 cm)

1. Amaury, patriarch of Antioch, is exposed on the citadel.
2. Renauld de Chatillon and his men observe the patriarch on the citadel.

Volume II:

Fol. 2r, Book 19, (R)emes estoit un frere... (historiated initial: 8.1 × 7.9 cm)

1. Death of King Baldwin III.
2. Coronation of King Amaury I.

Fol. 15v, Book 20, (U)ne chose ne voil... (panel: 7.0 × 7.5 cm)

1. The envoys of the Byzantine Emperor to King Amaury I.
2. The Crusaders besiege Balbis.

Fol. 29r, Book 21, (M)out fu grans li duels... (panel: 7.3 × 7.5 cm)

1. Death of King Amaury I.
2. Coronation of King Baldwin IV by Patriarch Amaury.

Fol. 41r, Book 22, (B)eumons li princes... (panel: 6.7 × 7.4 cm)

1. Sibylle, sister of King Baldwin IV, marries Guy de Lusignan.

Fol. 61r, Book 23, ch. 6, (D)evant ce q... (historiated initial: 4.4 × 5.4 cm, damaged)

1. Coronation of King Baldwin V.

Fol. 115v, Book 33, ch. 13, (E)n ce point... (historiated initial: 5.5 × 4.7 cm)

1. Alice, queen of Cyprus, and regent of the Latin Kingdom, conferring with a representative of the High Court on the succession of the crown, in Acre in 1229.

Fol. 134v,... contre le roi manfroi & le desconfi & le tua en champ. (end)

357. The text of Paris, B.N., MS fr. 2628 is continued to 1264. The text of St. Petersburg MS fr. fol. v.IV.5 is also continued to 1264, and that of Lyon MS 828 is continued to 1248. R. Morgan, *The Chronicle of Ernoul and the Continuations of William of Tyre*, Oxford, 1973, pp. 6 and 19, notes that in the continuation of Lyon MS 828 "long sections of the text [are] unique to this manuscript." It remains to be seen whether the same special features are found in the text St. Petersburg codex. Dr. Morgan was at work on Lyon MS 828 at the time of her untimely death. Other important work on these continuations has been carried on since her death, e.g., J. Pryor, "The *Eracles* and William of Tyre: An Interim Report," *The Horns of Hattin*, pp. 270–301, but nothing that deals directly with the manuscripts of St. Petersburg MS fr. fol. v.IV.5 or Lyon MS 828.

358. In what follows I am mostly summarizing what appears in more detail in Folda, *Crusader Manuscript Illumination*, pp. 27–41, with additional comments.

359. See Folda, *Crusader Manuscript Illumination*, pp. 31–2; for reasons stated here I do not believe this imagery is based on Western cycles of the *History of Outremer*.

360. The St. Petersburg–Lyon Master is the same painter as the artist I referred to as the Leningrad–Lyon Master in earlier publications. The name is changed here only to reflect the change in the name of the city – Leningrad to St. Petersburg – in the wake of events in the former Soviet Union in 1991.

361. See, e.g., the miniature for Book 15 in the *History of Outremer*, now in Bern, Burgerbibl. MS 112, produced in France about 1270: Folda, *Crusader Manuscript Illumination*, p. 33, and Pl. 168.

362. See Munich, Staatsbibliothek, Clm. 4660, fol. 92r; facsimile by B. Bischoff, *Carmina Burana*, Munich, 1967, pp. 30 and 36, n. 20, with the views of various art historians on the miniatures attributing the codex to a Bavarian German-speaking area in the *c.*1230s.

363. Patrimonio nacional, Monasterio de El Escorial, Biblioteca Real, MS T.I.6. See J. G. White (ed.), *El tratado de Ajedrez ordenado por mandado del Rey Don Alfonso el Sabio, en el año 1283. Codice de la R. Biblioteca del Ecorial*, Leipzig, 1913, 2 vols., and the more recent publication, A. Steiger (ed. and trans.), *Alfonso el Sabio, Libros de Acedrex, Dados e Tablas*, Romanica Helvetica, X, Geneva-Zurich, 1941. In these scenes it should be mentioned that there are both Easterners and Westerners playing chess, so some sit on the floor and some sit on benches, but this East–West distinction is clearly made.

364. C. Nordenfalk, "En Medeltida Schakbok," in *Spanska Mästare, Nationalmusei Arsbok*, Stockholm, 1960, pp. 33–4, and Fig. p. 32. See my additional comments in Folda, *Crusader Manuscript Illumination*, pp. 33–4.

365. We can point out, however, that there are a number of chess-playing scenes in Persian *Shahnama* manuscripts of *c.*1300 to 1330. See M. L. Swietochowski and S. Carboni, *Illustrated Poetry and Epic Images: Persian Painting of the 1330s and 1340s*, New York, 1994, p. 123. I am indebted to my colleague, M. Shreve Simpson, for drawing my attention to these manuscripts, and providing me with the reference to this publication.

366. Ibn al-Qalanisi, *Appendix to the History of Damascus*, in F. Gabrieli (ed.), *Arab Historians of the Crusades*, trans. E. J. Costello, London, 1969, p. 25. See also additional comments in Folda, *Crusader Manuscript Illumination*, p. 34, n. 43.

367. On the lost *Gesta*, see the comments of P. Edbury and J. G. Rowe, *William of Tyre: Historian of the Latin East*, Cambridge, 1988, and see now A. V. Murray, "William of Tyre and the Origin of the Turks: Observations on Possible Sources of the *Gesta orientalium principum*," *Dei gesta per Francos*, pp. 217–29, with more recent

bibliography. Murray writes a valuable article, which should caution us against imagining that William of Tyre was very much of an orientalist, or had extensive knowledge of Eastern languages.

368. See R. Ettinghausen, *Arab Painting*, Lausanne, 1962, pp. 71, 76, 135.

369. See H. R. Hahnloser, *Villard de Honnecourt-Kritische Gesamtausgabe des Bauhüttenbuches, MS. Fr. 19093 der Pariser, Nationalbibliothek*, 2nd edn., Graz, 1972.

370. Paris, B.N., MS fr. 9085 is published in Folda, *Crusader Manuscript Illumination*, pp. 36–8, 175–6, with the older bibliography. See now also Minervini, "Produzione e circolazione di manoscritti negli stati crociate," pp. 90–1.

The main content/decoration of Paris, B.N., MS fr. 9085 is as follows:

> Old French translation of William of Tyre's "History of Outremer" (Books 1–22), with continuation to 1232 (incomplete: ends *c.*1187, in Old French).
>
> 348 folios (N.B.: Blank paper sheets have been bound in as substitutes for the missing folios at the start of each book.) with 43 gatherings of 8 folios each, occasional losses apart from the systematic removal of leaves with miniatures, last gathering has four folios.
>
> (N.B.: This codex has substantial losses of folios. For the full collation, see Folda, *Crusader Manuscript Illumination*, p. 175.)
>
> Text in two columns of 36 lines each, justification of 25.0 × 18.0 cm, interval of 1.9 cm.
>
> 23 panel miniatures planned and executed with illuminated initials, all systematically removed leaving only one illuminated initial remaining on fol. 47r, at the start of Book 5.
>
> No rubrics.
>
> Acre, *c.*1270s.

375. See F. Wormald and P. M. Giles, *Illuminated Manuscripts in the Fitzwilliam Museum*, Cambridge, 1966, pp. 15–16, no. 31, and Pl. 7. See also Folda, *Crusader Manuscript Illumination*, pp. 129–30, and 199, cat. no. 18 for the other relevant bibiography.

376. See L. Thorpe, "Master Richard: A Thirteenth-Century Translator of the *De re militari* of Vegetius," *Scriptorium*, 6 (1952), Pl. 14, and D. Diringer, *The Illuminated Book*, rev. edn., New York, 1967, Pl. VII-52, for an illustration of this miniature.

377. On the controversy over where this codex was done, see Thorpe, "Master Richard," pp. 39–50, idem, "Master Richard at the Skirmish of Kenilworth?," *Scriptorium*, 7 (1953), pp. 120–1, and M. Dominica Legge, "The Lord Edward's Vegetius," *Scriptorium*, 7 (1953), pp. 262–5.

378. See Thorpe, "Master Richard," Pl. 13, and Wormald and Giles, *Illuminated Manuscripts*, Pl. 7, for an illustration of this miniature.

379. Wormald proposed this comparison to the Huth Psalter; see Wormald and Giles, *Illustrated Manuscripts*, p. 16. For the Huth Psalter, Brit. Library Add. MS 38116, see P. Brieger, *English Art: 1216–1307*, Oxford, 1957, Pls. 85a, c.

380. Folda, *Crusader Manuscript Illumination*, p. 130.

381. For the literature on Brussels, Bibl. Roy. MS 10175, see Buchthal, *MPLKJ*, pp. 69–79, 97–8, 149–50; Oltrogge, *Die Illustrationzyklen zur "Histoire ancienne jusqu'à César" (1250–1400)*, pp. 35–6, 75–83 (pictoral themes in group D), 234–8; M. de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, vol. 1, passim (as variant "B" in the text edition), vol. 2, pp. 11–12, and passim.

The main content/decoration of Brussels, Bibl. Roy. MS 10175 is as follows:

Histoire Universelle in Old French.

333 folios, 34.7 × 25.0 cm., gatherings of eight folios each.

Text in two columns of, for fols. 1–20, 42 lines each, and for fols. 21–332, 38 lines each.

Justification, fols. 1–20 (15th century replacement), 25.0 × 17.5 cm, interval 1.5 cm, fols. 21–332, 24.8 × 16.6 cm, interval 1.2 cm.

Acre, *c.*1270s.

Fol. 1–20, replacements of the 15th century, including the first miniature:

Fol. 20r, The Paradise.

Fol. 22v, rubrics: Coment nostre sires parla a caym (panel: 6.9 × 7.7 cm)

The Lord speaks to Cain standing over the fallen Abel.

Fol. 24v, rubrics: Coment noe entra en larche (panel: 7.6 × 7.7 cm)

Noe, nimbed, shepherds the elephants and lions into the ark.

Fol. 40r, rubrics: Coment Abraham herberia nostre seignor qui li dist quil auroit fiz de sa feme (panel: 7.6 × 7.7 cm)

Abraham with the three Heavenly visitors.

Fol. 41v, rubrics: Coment li angles maudirent les cites et coment eles fondirent après la maleison des angles (panel: 8.0 × 7.7 cm)

The angel destroys the city as Lot flees with his family.

Fol. 45r, rubrics: Coment li angeles rescoust ysaac que son pere ne li tolt la vie (panel: 8.3 × 7.7 cm)

The sacrifice of Isaac where Abraham holding a dagger is stopped by the angel of the Lord.

Fol. 52r, rubrics: Coment iacob dessut ysaac son pere (panel: 7.6 × 7.6 cm)

How Jacob deceives his father Isaac as Esau approaches.

Fol. 61v, rubrics: Coment esau et iacob partirent de decevrerent les terres puis la mort lor pere (panel: 8.7 × 7.7 cm)

The death of Isaac.

Fol. 63r, rubrics: Si commence lestoire de ioseph (panel: 8.0 × 7.7 cm)

Jacob and his sons, with Joseph in front.

Fol. 68v, rubrics: Coment la dame se complainst a son baron de ioseph a tort (panel: 6.8 × 7.7 cm)

Potiphar's wife attempts to sedeuce Joseph.

Fol. 71v, rubrics: De la vision pharaon. Et coment il manda tous les sages de sa terre (panel: 8.2 × 7.7 cm)

The dream of Pharaoh.

Fol. 73r, rubrics: Coment le roi fist aler ioseph sur son riche char par toute sa cite (panel: 7.6 × 7.6 cm)

Joseph tours the land of Egypt in Pharoah's chariot.

Fol. 74r, rubrics: Coment les fiz iacob pristrent conseill a luer [sic] pere daler en egypte au forment (panel: 8.1 × 7.7 cm)

Jacob and his sons take counsel to go to Egypt for grain.

Fol. 79r, rubrics: Coment ioseph fist a sa maisnee voider la salle et ce fist conoistre a ses freres (panel: 7.5 × 7.7 cm)

Joseph makes himself known to his brothers.

Fol. 82r, rubrics: Coment pharaon demanda a iacob de son aage (panel: 8.1 × 7.7 cm)

Jacob and his sons before Pharaoh.

Fol. 84r, rubrics: Coment ioseph porta le cors iacob son pere en ebron per avoir sepulture (panel: 8.3 × 7.7 cm)

The death of Jacob.

Fol. 90r, rubrics: Si commence lestoire de thebes (panel: 9.9 × 7.7 cm)

Above: Laius and Jocasta; below: the finding of Oedipus.

Fol. 92r, rubrics: De la devinaille que Spins dist a edippus (panel: 7.8 × 7.7 cm)

Oedipus approaching from the right confronts the sphinx.

Fol. 96v, rubrics: Coment polinices et thideus se combatirent por la place (panel: 9.1 × 7.5 cm)

The combat of Polynices and Tydeus.

Fol. 110v, rubrics: De la tygre de thebes par quoi comensa la bataille et la grant destorbance (panel: 7.7 × 7.5 cm)

The tiger of Thebes.

Fol. 117v, rubrics: Coment les dames de scite alerent vengier leur fis et leur amis as espees esmolues (panel: 7.8 × 7.5 cm)

The Amazons do battle to avenge their menfolk.

Fol. 119r, rubrics: Coment les II. serors la royne Antyope iousterent as II. chevaliers les meillors qui estoient adonc el monde: Hercules and Theseus (panel: 9.0 × 7.5 cm)

Two Amazon sisters of Antiope do battle with two knights.

Fol. 121r, rubrics: Coment iason et Hercules alerent por la toison par quoi renovela la heyne des grezois a ceaus de troyes, dont la cite fu destruite (panel: 9.0 × 8.0 cm)

The story of the Golden Fleece.

Fol. 130r, rubrics: Coment hector fist merveilles quant il fu venus al estor, et come achille locist. Et come grant dolor fu demenee (panel: 7.9 × 7.8 cm)

Achilles kills Hector by spearing him from behind.

Fol. 138r, rubrics: Coment pirus le fiz Achilles vint en lost por venger son pere (panel: 7.8 × 7.7 cm)

Penthesilea and the Amazons battle Pyrrhus, the son of Achilles.

Fol. 151r, rubrics: Coment eneas revint en cesile (panel: 8.3 × 7.7 cm)

The departure of Aeneas as Dido kills herself on the balcony of her palace.

Fol. 165v, rubrics: Coment la royne Camilla demanda a turnus la premiere bataille contre eneas (panel: 8.3 × 8.0 cm)

Queen Camilla battles Aeneas.

Fol. 172r, rubrics: Ci commence lestorement de la cite de rome (panel: 7.8 × 7.5 cm)

The building of the city of Rome.

Fol. 195r, rubrics: Coment nabugodenosor comanda a holofernes qui alast sur ciaus qui contre lui estoient (panel: 7.8 × 7.5 cm)

Holofernes leads his army against the Israelites.

Fol. 195v, rubrics: Coment iudith fu menee devant le duc holofernes (panel: 7.1 × 7.5 cm)

Judith comes before Holofernes.

Fol. 216v, rubrics: Coment alixandre sagenoilla contre le nom de dieu (panel: 7.9 × 7.6 cm)

Alexander kneels before the high priest in front of the temple in Jerusalem.

Fol. 219v, rubrics: Que cil qui estoient sur les olifans greverent mult la gent alixandre (panel: 7.8 × 7.7 cm)

Alexander and his army battle King Porus with his army on elephants.

Fol. 222r, rubrics: Coment la gent alixandre envairent cele beste (panel: 7.1 × 7.6 cm)

Alexander's army confronts a monstrous beast in India.

Fol. 224v, rubrics: Coment la beste qui avoit II. testes corut sus as genz le roi alixandre (panel: 7.1 × 7.7 cm)

Alexander's army confronts a second monstrous beast with two heads.

Fol. 254v, rubrics: Que adonques ot pais arome et que nulles gens ne les agrevoient (panel: 7.9 × 7.6 cm)

The temple of Janus in Rome.

Fol. 304v, rubrics: Coment le roi iugurta fu pris et mene a rome ou grant ioie fu demenee (panel: 7.8 × 7.7 cm)

Jugurtha captive is carried through the streets of Rome.

Fol. 328r, rubrics: Coment pompeyus repaira a rome (panel: 7.9 × 7.7 cm)

Pompey's return to Rome.

Fol. 332v, text ends: Coment la bataille rassembla lendemain . . . de ce avient encores quele est clamee sei, et non seis en nostre language. Cest livre escrist Bernart dacre.

382. Buchthal, *MPLKJ*, pp. 97–8.

383. On the literary merits of the *Histoire Universelle*, see M. de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, 2, pp. 266–72, and p. 272 for this quote.

384. See Buchthal, *MPLKJ*, p. 70.

385. Ibid., p. 71.

386. Ibid., pp. 68–79.

387. There are actually thirty-seven miniatures in the Brussels codex, but one, the frontispiece on fol. 20r, is a replacement executed in the fifteenth century, when the lost first twenty folios of this codex were replaced.

388. Ibid., p. 71.

389. Ibid., Pls. 107b (MS 10175) and 107a (Dijon MS 562). See also the color plate of this scene in the Dijon MS, in *Les Croisades: L'Orient et L'Occident*, p. 104, which, together with Pls. 107b and 107a, shows the larger size, the better condition, and the higher quality gold ground of the Dijon miniature.

390. Buchthal, *MPLKJ*, p. 72.

391. For the manuscript stemma envisioned in this discussion, see Fig. 1, in Folda, *Crusader Manuscript Illumination*, p. 102.

392. In the case of the example cited here, the triumph of Joseph, the Brussels miniature follows the MS 20125 model more closely, but simplifies and introduces certain changes. See the MS 20125 miniature in Buchthal, *MPLKJ*, Pl. 151e.

393. Buchthal, *MPLKJ*, p. 72.

394. Ibid., pp. 73–4, and see Pl. 99a, also illustrated in an excellent color plate in *Les Croisades: L'Orient et l'Occident*, p. 100. Notably, however, the Brussels MS 10175 lacks this kind of element introduced from observation of the local scene.

395. Buchthal, *MPLKJ*, p. 74.

396. Ibid., p. 75.

397. Ibid., p. 68.

398. This structure has a vague parallel with the throne of the Mellon Madonna, also from the second half of the thirteenth century, whose artist may have worked in the eastern Mediterranean at the time the panel was painted. The Mellon Madonna is now in the National Gallery of Art, where it is designated inv. no. 1937.1.1.

399. Buchthal, *MPLKJ*, p. 78.

400. For the literature on Chantilly, Musée Condé, MS 433(590), see Folda, *Crusader Manuscript Illumination*, pp. 42–76, with the older bibliography. See now also J. Folda, "The Hospitaller in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 51–9, 271, and Minervini, "Produzione e circolazione di manoscritti negli stati crociati," p. 92 and n. 44.

The main content/decoration of Chantilly, Musée Condé, inventory no. MS 433(590), coté XX D(superscript 1)3, is as follows: Old French translation of Cicero's *De Inventione* and the *Rhetorica ad Herennium*, by Jean d'Antioche for William of St. Stephen.

164 fols. with the first two gatherings of 6 folios each, then seventeen gatherings of 8 folios each, gathering twenty with 10 fols. each, and gathering twenty-one with 6 fols. each.

Text in two columns of 31 or 32 lines each, justification of 21.6 × 14.7 cm (fols. 1–12v, hand 1), and 21.5 × 14.9 cm (fols. 13–164v, hand 2), interval 1.5 cm.

4 panel miniatures, 4 illuminated initials, 1 historiated initial, marginal drolleries, and 2 illuminated schemata.

Red and blue calligraphic book and chapter initials.

Rubrics.

Acre, 1282.

Fol. 1–5v, *capitula*.

Fol. 6v, Prologue, illuminated initial (T) (5.2 × 5.0 cm), with flourish and tail.

Fol. 9v, schema of "toute ceste division de philosophie."

Fol. 11v, schema of "la reson civile: retorique."

Fol. 12v, colophon, see text and Folda, *Crusader Manuscript Illumination*, Pl. 26.

Fol. 13r, Book 1 (*De Inventione*) miniature panel with two registers (11.0 × 8.3 cm):
1. Evil Oratory causes the fall of cities and strife among the people.
2. Good Oratory encourages the building of cities and harmony among the people.
Marginal drolleries.

Fol. 45v, Book 2 (*De Inventione*) miniature panel (6.75 × 8.45 cm) with Zeuxis of Heraclea painting an image of Helen; illuminated initial (I) (9.6 × 1.3 cm).

Fol. 86r, Book 3 (*Rhetorica ad Herennium*) illuminated initial (20.7 × 1.6 cm).

Fol. 95r, Book 4 (*Rhetorica ad Herennium*) miniature panel (5.5 × 7.1 cm) with Cicero dictating to his scribe as Herennius looks on; illuminated initial (N) (4.2 × 4.85 cm).

Fol. 113r, Book 5 (*Rhetorica ad Herennium*) historiated initial (4.9 × 5.15 cm) with Cicero seated, addressing a standing student. Marginal drollery.

Fol. 127v, Book 6 (*Rhetorica ad Herennium*) miniature panel (6.0 × 8.4 cm) with a classroom scene: a master teaches six students with two elders looking on; illuminated initial, (N) (4.3 × 8.4). Marginal drollery.

Fol. 164r, . . . trop grant mestier rhetorique de l'argumentacion de logique. (end)

401. Folda, *Crusader Manuscript Illumination*, p. 43, and n. 6. For a reproduction of this text in the manuscript see also Pl. 26.

402. Folda, *Crusader Manuscript Illumination*, p. 43, and n. 5; Riley-Smith, *The Knights of St. John*, p. 273.

403. Folda, *Crusader Manuscript Illumination*, pp. 42–52.

404. In his review of my book, *Crusader Manuscript Illumination*, Harvey Stahl (*Zeitschrift für Kunstgeschichte*, 43 (1980), pp. 417–18) notes the different hands in Chantilly MS 433 and calls one hand "slightly later." I am unable to see why this hand is necessarily later, as opposed to different, and I could not identity separately in this manuscript the hands of the translator, scribe, and illuminator, if the illuminator did any scribal work. Stahl's analysis may lead toward that identification as part of understanding the project to do this commission.

405. The Perugia Missal, discussed earlier in Chapter 6, is the only religious manuscript with textual documentation identifying its place of origin in Acre. Of course, we also noted that the Brussels *Histoire Universelle* was signed by Bernard d'Acre as the scribe, and we have taken this to indicate its Acre origin, but some have chosen to interpret this as evidence it was made elsewhere, perhaps in Cyprus, wrongly in our view.

406. See the catalogue of these manuscripts for ruling diagrams and statistics in Folda, *Crusader Manuscript Illumination*, pp. 175–92.

407. A codex in Leiden, University Library codex Voss. Lat. Q33, dating from the tenth century has illustrations, but they have no relation to the illustrations found in Chantilly MS 590. See F. Mütherich, "'De Rhetorica', Eine Illustration zu Martianus Capella," *Festschrift Bernhard Bishoff zu seinem 65. Geburtstag*, Stuttgart, 1971, pp. 200 ff., and Pl. 11; and *Christina, Queen of Sweden*, 11th Exhibition of the Council of Europe, Stockholm, 1971, pp. 536–7, no. 1343. Most *Rhetorica* manuscripts did not have illustrations.

408. Stephen of Antioch is recorded as having written a Latin manuscript of the *Rhetorica ad Herennium* in 1154 in Antioch. See F. Steffens,

Lateinische Paläographie, 2nd edn., Berlin and Leipzig, 1929, Pl. 83.

409. L. M. C. Randall, *Images in the Margins of Gothic Manuscripts*, Berkeley and Los Angeles, 1966, pp. 8–15. The drolleries found in this codex are seemingly of the innocuous, decorative type, compared to the often highly sexually charged examples discussed by M. Camille, *Image on the Edge: The Margins of Medieval Art*, Cambridge, MA, 1992, whether as related to the monastery, the cathedral, the court, or the city!

410. Delisle provides the Old French and Latin texts of this story in his publication: L. Delisle, "Notice sur la Rhétorique de Cicéron," *Notices et Extraits*, 36, Paris, 1899, pp. 236–7.

411. As Michael Camille points out, writing about this image, "medieval artists, like this illuminator, were not sanctioned to fashion ideal images in the classical sense, even though we so often describe Gothic art as one of idealism." M. Camille, *The Gothic Idol*, Cambridge, 1989, p. 318.

412. For a citation of parallels to images in the *Bibles Moralisées*, the Old Testament Picture Book in the Morgan Library (Morgan MS 638), and the Psalter of Saint Louis (Paris, B.N., MS lat. 10525), see Folda, *Crusader Manuscript Illumination*, p. 49, n. 34.

413. Ibid., p. 50.

414. Camille, *The Gothic Idol*, pp. 73–128, and 197–241. Camille discusses the various kinds of idols, and what is relevant here are pagan idols and idols associated with a church.

415. On the Palaeologan hats, see H. Buchthal, *Historia Troiana*, London and Leiden, 1971, p. 34, and Pls. 32e and 33d. On the contrast between Greeks and Jews wearing such broad-brimmed hats, see Folda, *Crusader Manuscript Illumination*, pp. 51–2.

416. For the literature on Paris, B.N., MS nouv. acq. fr. 1404, see Folda, *Crusader Manuscript Illumination*, pp. 60–76, with the older bibliography, and D. Weiss, *Art and Crusade in the Age of St. Louis*, Cambridge, 1998, pp. 110–12.

The main content/decoration of Paris, B.N., MS nouv. acq. fr. 1404 is as follows: Old French translation of selected Old Testament books of the Bible.

245 fols., with 30 gatherings of 8 folios each, one folio missing, and two folios bound at the end with a final gathering of 4 folios.

Text in two columns of 34 lines each, justification of 20.0 × 13.2 cm, interval 1.2 cm. There are rubrics at the start of each book.

15 miniature panels extant, with large red and blue calligraphically decorated book initials, and smaller red and blue chapter initials.

Acre, *c.*1280–1.

Fol. 1r, Preface, panel miniature with St. Jerome and Brother Ambrosius (6.9 × 6.1 cm), large red and blue calligraphic initial, (D).

Fol. 2r, Genesis, two panel miniatures: the Lord creating on the first day (5.3 × 5.1 cm), and the Lord creating, days two to six, and resting on the seventh day (12.2 × 7.3 cm), large red and blue calligraphic initial, (E).

Fol. 25v, Exodus, panel miniature with Moses leading the Israelites (7.15 × 6.4 cm), with large red and blue calligraphic initial, (C).

Fol. 44r, Numbers, panel miniature with an Israelite making an offering to God (6.9 × 6.35 cm), with large red and blue calligraphic initial, (N).

Fol. 54v, Joshua, panel miniature with Joshua kneeling before the Lord (7.5 × 6.3 cm), with large red and blue calligraphic initial, (A).

Fols. 63r–64v, verse prologue to Judges (cf Folda, *Crusader Manuscript Illumination*, pp. 61–3).

Fol. 64v, Judges, panel miniature with the people of Israel kneeling in prayer to God (6.2 × 6.2 cm), with large red and blue calligraphic initial, (A).

Fol. 94v, I Kings, panel miniature with the prayer of Anna, as Eli looks on (7.3 × 6.4 cm), with large red and blue calligraphic initial, (U).

Fol. 123v, II Kings, panel miniature with King David ordering the killing of the Amalekite (6.8 × 6.5 cm), with large red and blue calligraphic initial, (A).

Fol. 124v, II Kings, Chapter 3, panel miniature with the annointing of the seated King David (5.8 × 6.5 cm), with red and blue calligraphic initial, (Q).

Fol. 148r, III Kings, panel miniature with Abishag brought to the aged King David in bed (5.95 × 6.5 cm), with red and blue calligraphic initial, (D).

Fol. 180v, IV Kings, panel miniature with Elijah taken up to heaven as Elisha watches (6.65 × 6.05 cm), with large red and blue calligraphic initial, (L).

Fol. 208v, I Maccabees, miniature panel, and start of text missing.

Fol. 226v, II Maccabees, panel miniature with John Hyrcanus returning to defend Jerusalem (6.85 × 6.8 cm), with large red and blue calligraphic initial, (I).

Fol. 229v, Tobit, panel miniature with Tobit blinded (6.15 × 6.6 cm), with red and blue calligraphic initial, (T).

Fol. 238r, Judith, panel miniature with Judith decapitating Holofernes (6.25 × 6.85 cm), with large red and blue calligraphic initial, (A).

Fol. 245v, . . . apres sentorna a domas & 7 ileuques morut. "explicit iudith" (end)

417. In the Pentateuch, Arsenal MS 5211 has miniatures for all five books, but Paris MS n.a.fr. 1404 has miniatures only for Genesis, Exodus, and Numbers, but not Leviticus or Deuteronomy.

418. We assume, partly on the basis of this comparison, that Louis IX had taken the Arsenal Bible home to France with him when he left Acre in 1254.

419. Folda, *Crusader Manuscript Illumination*, pp. 60–6; Weiss, *Art and Crusade*, pp. 110–12; and see now also K. V. Sinclair, "The Earliest Old French *Livre des Juges*; a Note on the Translator and His Patrons," *Neophilologus*, 81 (1997), pp. 349–54.

425. M. Schapiro, "An Illuminated English Psalter of the Early Thirteenth Century," *Journal of the Warburg and Courtauld Institutes*, 23 (1960), pp. 181 ff., discusses the crowning and anointing.

426. Folda, *Crusader Manuscript Illumination*, pp. 68–9.

427. We have seen the beardless Byzantine Moses used in the Arsenal MS 5211 miniatures along with the Western bearded version. For the horned Moses, see R. Mellinkoff, *The Horned Moses in Medieval Art and Thought*, Berkelely, Los Angeles, and London, 1970, pp. 6, 13ff., 68–70, 76 ff.

428. True, the text suggests that Judith only uses one hand to wield the sword as shown in the image, but the blow she administers in this depiction contrasts sharply with what we see in the Moralized Bible tradition. Folda, *Crusader Manuscript Illumination*, p. 72.

429. R. L. McGrath, "The Romance of the Maccabees in Medieval Art," Diss. Princeton University, 1963, p. iv.

430. For the literature on Paris, Archives Nationales, Pièce 1626(1), see Folda, *Crusader Manuscript Illumination*, pp. 52–60, opposite p. 58 (color plate), 178–9, with older bibliography, and idem, "The Hospitaller Master in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 51–2, 57. For the discussion on the identification of the hands in the *Censier*, see H. Stahl, review of *Crusader Manuscript Illumination*, in the *Zeitschrift für Kunstgeschichte*, 43 (1980), pp. 416–23.

The main content/decoration of Paris, Archives Nationales, Pièce 1626(1) is as follows:

Censier for the Abbey of Sainte-Geneviève, Paris, in Latin.

35 fols., 27.2 × 19.3 cm, 4 gatherings of 8 folios each, and a final gathering with 3 folios.

Text in one column of 28 lines, justification, 18.5 × 12.4 cm.

4 miniature panels and associated marginal drolleries.

Small illuminated and red and blue calligraphically decorated initials.

Paris, last quarter of 1276.

Fol. 1r, (First quarter) Relicta Hervei Munerii .v. sol' . . .

Rubrics: Recepta pitantiarum conventus sce Genovefe . . . a termino Sci Remigii usque ad natale anno dñi m(o).cc(o).lxxvi(o). . . .

Miniature panel (7.7 × 7.2 cm), Geneviève is consecrated by Bishop Germain of Auxerre and Bishop Loup of Troyes.

Fol. 13r, (Second quarter) Burgesia parisien .xl. sol' . . .

Rubrics: Recepta pitantiarum . . . a termino natale usque ad pascha anno dñi m(o).cc(o).lxxvi(o).

Miniature panel (8.1 × 8.2 cm), Geneviève on her way to evening prayer has her candle relit by an angel after it had been extinguished by a devil.

Fol. 20r, (Third quarter) Relicta Hervei Munerii .v. sol' . . .

Rubrics: Recepta conventus . . . a pascha usque ad festum sci iohis bapte anno dñi m(o).cc(o).lxxvi(o).

Miniature panel (7.8 × 7.8 cm), Geneviève supervises the construction of the Basilica of Saint-Denis.

Fol. 26v, (Fourth quarter) Familia iohis rouselli .xxxv. sol' . . .

Rubrics: Recepta pitantiarum . . . a termino sci iohis bapte usque ad festum sci Remigii anno dñi m(o).cc(o).lxxvi(o).

Miniature panel (8.0x 8.1 cm), Monks from the Abbey of Sainte-Geneviève carry her *châsse* through the streets of Paris on the Feast of Sainte-Geneviève-des-Ardents.

431. For the literature on Paris, B.N., MS lat. 5334, see Folda, "Paris, Bibliothèque Nationale, MS lat. 5334 and the Origins of the Hospitaller Master," *Montjoie*, pp. 177–87, and idem, "The Hospitaller Master in Paris and Acre," *Journal of the Walters Art Gallery*, 54 (1996), pp. 51–2, 57, 269.

The main content/decoration of Paris, B.N. MS lat. 5334 (=ancien Bibl. Reg. MS 4180) is as follows:

Libellus of texts on the life and miracles of St. Martin [for a detailed inventory, see Folda, "Paris, Bibliothèque Nationale MS lat 5334," p. 177, n. 4]

298 fols., 28.7 × 19.5 cm, gatherings of 12 fols. each, justification, 21.0 × 12.6 cm, interval 1.2 cm, text in two columns of 24 lines each, one scribe writing in "gothic textura" (Bischoff) or "littera minuscula gothica textualis rotunda libraria media" (Brown).

One historiated initial (S), 14 medium-sized red and blue calligraphically decorated initials at the start of each main text division, and many small red and blue initials in the text.

Paris, *c.*1276–80.

Fol. 1r, Historiated Initial, (S)everus . . . (3.45 × 3.55 cm, main rectangle, with flourishes in the margins that measure 24.55 cm high maximum).

1. St. Martin nimbed and in episcopal robes, blesses three *malades.*

432. The *censier* was originally discovered by Robert Branner in the 1960s while he was at work on his study eventually published as *Manuscript Painting in Paris during the Reign of Saint Louis*, Berkeley, 1977. He alerted me to its existence.

433. In his review of *Crusader Manuscript Illumination*, in the *Zeitschrift für Kunstgeschichte*, 43 (1980), pp. 416–23, Harvey Stahl argues that two artists did the four miniatures. He sees a weaker hand in the first three miniatures, in contrast to the firm line and sensitive control of the Paris–Acre Master in the final panel with the procession of the chasse through the streets of Paris. The variations in these miniatures are there for all to see. I continue to interpret them, not as different hands, but as evidence of the results of miniatures painted by one hand using different models, possibly produced at different times during the year, but most of all as an indication of change and development in the work of a single painter.

The reader is invited to consider this issue against the background of what criteria we use to identify the work of an individual artist in comparison to the other very closely related manuscripts I am proposing were painted by this Master, and in contrast to those related manuscripts from the West that I argue were done by other artists influenced by the Paris–Acre Master's work. See Folda, *Crusader Manuscript Illumination*, pp. 42–116, 119–58.

434. My initial suggestion that the Paris–Acre Master went to the Near East because of a decline in book production in Paris at the end of the 1270s, is, as I have noted elsewhere (Folda, "Paris, Bibliothèque Nationale, MS lat. 5334," p. 184 and n. 32), not borne out by the facts. The situation in Paris for book production is much more fully documented now that the major study by Mary and Richard Rouse has appeared; see M. and R. Rouse, *Manuscripts and Their Makers: Commercial Book Producers in Medieval Paris, 1200–1500*, Turnhout, 2000, 2 volumes.

435. Work by other artists related to the Paris–Acre Master appears to have been executed in the Paris region between 1276 and 1295, however. See, for example, four illustrated codices with texts in Old French, Paris, BN, MS fr. 19166 and Paris, BN, MS fr. 1533, done in Paris between 1276 and 1287, and Brussels, Bibl. Roy., MS 20.D.II and Tours, Bibl. Mun., MS 951, done in Paris between 1287 and 1295, in Folda, *Crusader Manuscript Illumination*, pp. 119–24.

436. Folda, "Paris, Bibliothèque Nationale, MS lat. 5334," p. 185.

437. I discovered Morgan MS 494 shortly after the article in *Montjoie* was published. Among my colleagues, the only other scholar who seems to know about this manuscript is Alison Stones, and it may well be that she is the one who first alerted me to its existence.

438. For the literature on J. Pierpont Morgan Library, New York, MS 494, see M. R. James, *Catalogue of Manuscripts/Books from Collections of William Morris, Richard Bennett, Bertram of Ashburnham, now part of the Morgan Library*, London, 1906, MS 494, and various incidental notices, such as W. Pfeister and W. Schild (eds.), *Recht und Gerechtigkeit im Spiegel der europäischen Kunst*, Cologne, 1988, Fig. 242 (fol. 330r); T. Ford and A. Green (eds.), *Inventory of Musical Iconography*, New York, 1988, no. 142 (fol. 314v), no. 143 (fol. 318r); P. Needham, *12 Centuries of Bookbinding, 400–1600 (Morgan Library)*, New York, 1979, no. 19.2; and E. Pellegrin and T. de Marinis, *Bibliothèque des Visconti*, Florence and Paris, 1969, p. 56. On the text of MS 494, see the studies by Clive R. Sneddon, *A Critical Edition of the Four Gospels in the Thirteenth-Century Old French Translation of the Bible*, D. Phil. dissertation, Oxford University, 1978, vol. I, pp. 146–8, siglum L, no. 3, and idem, "Pour l'Edition critique de la Bible française du XIIIe siècle," *La Bibbia in Italiano tra Medioevo e Rinascimento*, Atti del Convegno Internazionale, Firenze, Certosa del Galluzzo, 8–9 November 1996, ed. Lino Leonardi, Florence, 1998, pp. 229–461, pp. 214 n.3, 238 n. 2, 241 n. 3.

The main content/decoration of Morgan MS 494 is as follows: Bible in Old French, complete in one volume.

638 fols., 38.5 × 28.0 cm, 81 gatherings of 8 folios each, except gathering 42 has only 3 folios, plus three additional leaves.

Text in two columns of 40 lines each, justification, 26.0 × 18.45 cm, interval, 1.6 cm.

34 Miniature panels, 10 historiated initials, 47 illuminated initials, by at least three main artists, plus assistants.

Paris, *c.*1276–80.

[N.B.: The analysis of the miniatures that follow refers mainly to the parts of the manuscript in which the Paris–Acre Master worked.]

Fol. 1r, Genesis, panel and illuminated initial (C)ist livres est apelez genesis . . . (26.4 × 8.7 cm)

Fol. 59v, Exodus, panel and illuminated initial.

Fol. 77r, Leviticus, panel and illuminated initial.

Fol. 89v, Numbers, panel and illuminated initial.

Fol. 108v, Deuteronomy, panel and illuminated initial.

Fol. 126r, Joshua, panel and illuminated initial.

Fol. 151v, Judges, panel and illuminated initial.

Fol. 169r, Ruth, panel and illuminated initial.

Fol. 171r, I Kings, panel (8.9 × 7.9 cm) and illuminated initial (5.4 × 4.9 cm) (U)ns homs fu de la cite. . . .

1. The prayer of Anna to God, with Eli looking on. [Paris–Acre Master]

Fol. 187, II Kings, panel (5.45 × 5.6 cm) and illuminated initial, joined, (I)l avint apres ce que Saul fu mort . . . , with marginal drolleries.

1. St. John [Paris–Acre Master], with marginal drolleries.

[N.B.: The 3rd Letter of St. John, the Letter of St. Jude, and the start of the Apocalypse are all missing.]

Fol. 639r, "ci fine lapocaypse".

439. The other Bibles related to it in the same text family are Paris, Bibl. Mazarine, MS 35; London, Brit. Lib., Harley MS 616; and London, Brit. Lib. Yates Thompson MS 9. I am indebted to Alison Stones for alerting me to the work of Clive R. Sneddon, whose Oxford doctoral dissertation, cited earlier, contains this analysis.

440. See Folda, *Crusader Manuscript Illumination*, pp. 145, n. 127, 152–7, and 212, no. 27. See also Sneddon's work cited earlier. Thott MS 7 is the second volume, containing Psalms to Apocalypse, of a two-volume work of which the first volume with much of the Old Testament is missing.

441. See A. Stones, "Les Manuscrits du Cardinal Jean Cholet et l'Enluminure Beauvaisienne ver la fin du XIIIeme siècle," in *L'Art Gothique dans l'Oise et ses environs, Actes du Colloque organisé à Beauvais* par le GEMOB, 10–11 October 1998, Beauvais, 2001, pp. 239–66. Alison Stones is the one art history scholar known to me who has studied it, and I am grateful to her for sharing her views about its artists, in letters dated 12 March and 22 March 1997. She thinks there are three main masters, a hand related to the Cholet Master who appears in several other codices, the Paris–Acre Master, and the Copenhagen Bible Master. I am interested here only in the Paris–Acre Master and the work that he did in this Bible, but this book is worth a complete and thorough study.

442. See A. Stones, "Arthurian Art since Loomis," *Arturus Rex*, vol. II, Louvain, 1991, p. 63, Fig. 8, the famous image of the first kiss of Lancelot and Guinevere, on fol. 67r of the Morgan *Lancelot*, MS 805, attributed to Amiens *c.*1315.

443. G. Haseloff, *Die Psalterillustration im 13. Jahrhundert*, [n.p.], 1938, pp. 29–33, 108–9, and Pl. 10.

444. It is difficult to say for certain what this sequence of work should be. It appears that the initial in the *libellus* is more closely related to the painting in the *censier*, so it may be that after the *censier* our Master painted the *libellus*, and then was commissioned to work on the Morgan MS 494 Bible. We provisionally date both the *libellus* and MS 494 to *c.*1276–80.

445. Buchthal, *MPLKJ*, p. 100.

446. For the literature on London, British Library, Additional MS 15268, see Buchthal, *MPLKJ*, pp. 79–87, 98–101, 150–1, with the older bibliography. See now also D. Oltrogge, *Die Illustrationszyklen zur "Histoire Ancienne jusqu'à César" (1250–1400)*, Frankfurt am Main, 1989, pp. 35–6, group D in the analysis of picture themes between pp. 75–83, 141–2, 261–6, with additional bibliography; B. Zeitler, "'Sinful Sons, Falsifiers of the Christian Faith': The Depiction of Muslims in a 'Crusader' Manuscript," *Mediterranean Historical Review*, 12 (1997), pp. 25–50; and M. de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, 2 vols., Orléans, 1999, vol. 1, partial critical edition of the text ("Assyrie," "Thèbes," and "Le Minotaure, Les Amazones, Hercule") ("L" = Add. MS 15268, a "manuscrit de contrôle"), vol. 2, pp. 12, 13, 205, 212–16, and passim. A new study by Lisa Mahoney as a doctoral dissertation at the Johns Hopkins University is currently underway.

The main content/decoration of London, British Library, Add. MS 15268 is as follows:

Histoire Universelle, in Old French.
314 fols., "bound in quaternions" (Oltrogge), 37.0 × 24.7 cm,
text in two columns of 41 lines each, justification of 26.4 × 16.5 cm, interval, 1.7 cm.
43 panel miniatures.
Acre, *c.*1286/7.

465. Despite the fact that London Add. MS 15268 has been studied for its textual contents and its miniature cycle several times since the 1950s, no basic collation has been done to establish the structure of the codex and the relationship of its miniatures to the gatherings in the book. As mentioned earlier a new dissertation is underway on this manuscript by Lisa Mahoney at the Johns Hopkins University, who will certainly rectify this need in her study of the book.

471. If the project started in June 1286, when Henry II formally appeared in Acre ready to accept the crown, then it would seem unlikely that the project could have been done by the time of the festivities following the coronation in the second half of August of that year. Most likely the book was ordered and played some role in the choice of material selected for the presentations made at the time of the celebrations. However, probably the manuscript was done much later in the year, or even at the start of 1287, and the book was given to Henry II later on, partly to commemorate his festive welcome as king in the preceding August.

472. For the literature on Paris, MS fr. 9084, see Folda, *Crusader Manuscript Illumination*, pp. 77–92, 182–4, with older bibliography. See also Folda, "The Hospitaller Master in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 53–6, 272; H. Stahl, review of *Crusader Manuscript Illumination, in Zeitschrift für Kunstgeschichte*, 43 (1980), pp. 419–22; and L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, Rubbettino, 1999, pp. 90–1.

The main content/decoration of Paris, B.N., MS fr. 9084 is as follows:

Old French translation of William of Tyre's *History of Outremer* (Books 1–22), with continuation to 1275 (incomplete, ends 1264), in Old French.

419 folios, with 53 gatherings of 8 folios each except for gathering 1 with 7 folios, gathering 3 with 7 folios, gathering 39 with 10 folios, gathering 40 with 9 folios, gathering 47 with 4 folios, gathering 52 with 7 folios, and gathering 53 with 5 folios, 37.0 × 26.5 cm.

Text in two columns of 34 to 39 lines each, justification, 23.5 × 16.0 cm, interval, 2.3 cm.

22 miniature panels, large red and blue calligraphic book initials, smaller red and blue calligraphic chapter initials.

No rubrics.

Text and first five miniatures, Acre, *c.* early 1286.

Remaining seventeen miniatures, Acre, *c.* later in 1286.

Fol. 1r, Bk 1, (L)es ancienes estoires...(panel: 8.85 × 15.2 cm).

1. Christ appears to Peter the Hermit at the Holy Sepulcher.
2. Peter receives a message from the patriarch of Jerusalem to give to the pope in Rome.

1. Bohemond of Antioch and Raymond of Tripoli arrive at Jerusalem.

Fol. 331r, Bk 23, ch 6, (D)evant ce que li roys fu mors . . . (panel: 9.2 × 6.85 cm).

1. King Baldwin IV on his deathbed crowns his nephew king as Baldwin V.

Fol. 395v, Bk 33, ch 13, (E)n ce point q li emperepres se fu partis . . . (panel: 8.5 × 7.15 cm).

1. The Crusaders send two envoys, Joffrey le Tour and Johan de Bailluel, to Frederick II in Saint-Lorens.

Fol. 417r, . . . En son tens ala li rois charles en puille. & se combati contre le roy manfroy. & le desconfi & le tua en champ. (end)

473. Buchthal, *MPLKJ*, p. 93, and p. 92, n. 2.

474. At Book 6 the frame of the panel is clearly drawn over the calligraphic decoration. In neither case at Book 6 or 7 do we see the panel jut into the margins the way it does with Book 3. These miniatures were more carefully planned at Books 6 and 7.

475. Folda, *Crusader Manuscript Illumination*, pp. 81–3.

476. See ibid., p. 82 and n. 31, for comments on why this should be interpreted as the first rather than the seventh ecumenical council.

477. The presence of these patterned robes in images of this kind make one wonder whether Muslim textiles that are comparable survive from this period. Certainly the Crusaders were interested in these textiles, as this image indicates, and one encounters the Western interest in luxury textiles from the Muslim (and Byzantine) East in French literature of the period, as E. Jane Burns has discussed. Indeed the appearance of Muslim textiles in Western medieval painting becomes quite remarkable in the very lavish costumes that appear in art of the International Gothic style, around the year 1400. One extraordinary example in Italian painting by Lorenzo and Jacopo Salimbeni, in the Oratorio di San Giovanni in Urbino, is cited by E. Gombrich. See E. Gombrich, "An Islamic Motif in a Gothic Setting," *Medieval Art: Recent Perspectives, A Memorial Tribute to C. R. Dodwell*, Manchester and New York, 1998, pp. 159–64. The lead onlooker behind the figure of St. John the Baptist in the "Baptism of Christ" in this Oratorio is wearing an amazing colored robe with what he calls a trefoil counterchange pattern. The trefoil looks suspiciously like a type of fleur-de-lis design to me. Gombrich calls it a type of Hispano-Islamic fabric that was popular in Italy at the time.

478. Buchthal, *MPLKJ*, p. 92.

479. In Paris MS fr. 2628, St. Petersburg MS fr. fol. v.IV.5, and Lyon MS 828, the images of the Holy Sepulcher specifically focus on the aedicule of the Sepulcher, not on the building itself and its dome.

480. The identification of this imagery continues to be problematic on the seals, and interpretations vary. In the manuscripts, however, there is no doubt that the Church of the Holy Sepulcher is indicated, and it seems probable this is also the case with the seals, instead of the alternative of seeing this superstructure as simply some kind of tabernacle. See E. J. King, *The Seals of the Order of St. John of Jerusalem*, London, 1932, pp. 8–17, especially pp. 9–10, and Appendix A, pp. 127–8. For the statute authorizing the new seal during the time of Master Nicholas Lorgne, see the text in Delaville Le Roulx, *Cartulaire*, III, pp. 368–70, no. 3670, with a translation in King, *The Seals*, pp. 129–30 (Appendix B).

481. According to our analysis there were at least six or seven main artists working on the Melisende Psalter project. See Folda, *ACHL I*, pp. 137–59.

482. Folda, "The South Transept Façade of the Church of the Holy Sepulchre in Jerusalem: An Aspect of 'Rebuilding Zion,'" *The Crusades and Their Sources*, pp. 239–57.

483. H. Klein, "The So-Called Byzantine Diptych in the Winchester Psalter, British Library MS Cotton Nero C.IV.," *Gesta*, 37 (1998), pp. 26–43, and W. Voelkle, *The Stavelot Triptych, Mosan Art and the Legend of the True Cross*, New York, 1980.

484. Given the length of time it would take to do an illustrated codex, one assumes the patron involved would be there many months. However, it is of course possible that even a pilgrim to the Latin Kingdom might have lived out there for a year, arriving one season one year, and returning the same season the following year.

485. On the program of mosaics at San Marco, see O. Demus, *The Mosaics of San Marco in Venice*, 2 vols., Chicago and London, 1984, with the special essay on the first narthex dome mosaic by Kurt Weitzmann in vol. 2.

486. For the literature on Boulogne-sur-Mer, Bibliothèque Municipal MS 142, see Folda, *Crusader Manuscript Illumination*, pp. 83–91, 184–7, with the older bibliography; Stahl, review in *Zeitschrift für Kunstgeschichte*, 43 (1980), pp. 418–19; Folda, "The Hospitaller Master in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 53–5; and L. Minervini, "Produzione e circolazione di manoscritti negli stati crociati: biblioteche e *scriptoria* latini," *Medioevo Romanzo e Orientale, Il Viaggio dei Testi*, Rubbettino, 1999, pp. 90–1.

The main contents/decoration of Boulogne-sur-Mer MS 142 is as follows:

Old French translation of William of Tyre's *History of Outremer* (Books 1–22), with continuation to 1274 in Old French.
363 folios, with 42 gatherings of 8 folios each, and seven additional gatherings at the end of differing numbers of folios, 35.4 × 25.2 cm.
Text in two columns of 40 lines each, justification (fols. 1–356) 24.5 × 16.6 cm, (fols. 357–63) 25.7 × 16.6 cm, interval, 2.6 cm.
22 miniature panels, with large red and blue calligraphic book initials, and small red and blue chapter initials.
No rubrics, captions written in a fifteenth-century hand in black ink.
Acre, *c.*1287.

2. Two Crusader envoys, Joffrey le Tour and Johan de Bailluel, sail to Brindisi.

Fol. 363v...concile dou lautran par ensi quil poisent demorer en leur religion. (end)

487. Besides Books 1–5, MS 142 essentially follows the MS fr. 9084 cycle at Books 6, 7, 9, 10, 11, 14, 17, 18, 19, 20, 21, 23 Chapter 6, and 33 Chapter 13. In some of these cases, for example, at Books 20 and 33 Chapter 13 the MS 142 scenes are more complete than those in MS fr. 9084, suggesting the painter referred to the standard cycle, and this is indicated especially at Books 15 and 16 where our artist reintroduces the basic scenes from the St. Petersburg–Lyon cycles that had been changed in MS fr. 9084. There is also the fact that our Master changes the imagery of two scenes, at Books 8 and 14, but to do this he merely refers to other scenes in the cycle. For Book 8 in MS 142 he draws on the imagery he used for Books 5 and 15 in that codex and the image at Book 22 in MS fr. 9084. For Book 14 he introduces the architecture of the Holy Sepulcher seen elsewhere in MS 142 at Book 19 and in MS fr. 9084 at Book 19.

499. M. de Visser-van Terwisga, *Histoire ancienne jusqu'à César*, vol. 2, pp. 24, 30 n. 6, and for the "langue et localisation," pp. 45–55.

500. A. Derbes and M. Sandona, "Amazons and Crusaders: The *Histoire Universelle* in Flanders and the Holy Land," *France and the Holy Land*, pp. 187–229.

501. Stahl, review in the *Zeitschrift für Kunstgeschichte*, 43 (1980), p. 420, says that the stylistic evidence is not convincing. He is willing to see the MS fr. 20125 artist as contemporary with the Paris–Acre Master, but he says the former is "a mediocre artist whose style derives from a different French tradition. . . ." I must agree the painter of MS fr. 20125 probably has a different French background, but the problem is that unlike the Paris–Acre Master, we have not yet identified his hand in specific datable manuscripts done in France. This does not, however, disqualify him as an artist working somehow with the Paris–Acre Master in Acre.

502. Even Stahl agrees this artist is probably contemporary with the Paris–Acre Master, but Oltrogge and M. de Visser-van Terwisga think the manuscript dates from the third quarter of the thirteenth century, without stating specific criteria for their dating.

503. Stahl, review in the *Zeitschrift für Kunstgeschichte*, 43 (1980), p. 420, concludes, "He certainly is an artist working in a different shop, for the manuscript has no important codicological features in common with the other Acre manuscripts." I am puzzled by this assessment because I see the codicological aspects of MS fr. 20125 to be comparable to those books produced by the Paris–Acre Master as well as the earlier books done in the Crusader style from the 1270s and 1280s. Whereas Stahl proposes to see some of the work of the Hospitaller Master (= Paris–Acre Master) as actually the work of more than one hand, I am proposing to see in the MS fr. 20125 painter a clearly distinct artistic personality whose hand is distinctly different from the Paris–Acre Master, but whose style is nonetheless closely related to it.

518. On secular book illumination, see Stones, ibid., pp. 83–102; idem, "Sacred and Profane Art: Secular and Liturgical Book-Illumination in the Thirteenth Century," *The Epic in Medieval Society: Aesthetic and Moral Values*, Tübingen, 1977, pp. 100–12; idem, "Arthurian Art since Loomis," *Arturus Rex*, vol. II, Louvain, 1991, pp. 21–78; idem, "The Illustrations of BN, fr. 95 and Yale 229: Prolegomena to a Comparative Analysis," *Word and Image in Arthurian Literature*, ed. K. Busby, New York and London, 1996, pp. 203–60. For Paris book production, see M. and R. Rouse, *Manuscripts and their Makers: Commercial Book Producers in Medieval Paris, 1200–1500*, Turnhout, 2000, 2 volumes.

519. We exclude his reference to "the university or *pecia* system," which of course pertains only to Paris, not to Acre. See Derolez, "The Aesthetics of the Gothic Manuscript," p. 4.

520. The major extant Crusader style works consist of Paris MS fr. 2628, St. Petersburg MS fr. Fol. v.IV.5, Lyon MS 828, Dijon MS 562, Brussels MS 10175, and London Add. MS 15268, plus the first five miniatures of Paris MS fr. 9084. The Paris–Acre Master then produced in Acre the Paris MS n. a. fr. 1404, Chantilly MS 433 (590), 17 miniatures in Paris MS 9084, Boulogne-sur-Mer MS 142, and Brussels MS 10212, while another French Gothic painter did Paris MS fr. 20125. The remarkable fact is that all but one of these works, Paris MS n. a. fr. 1404, are secular books in the vernacular.

528. Freer Gallery of Art, MS 32.18, thirteenth century. See S. Der Nersessian, *Armenian Manuscripts in the Freer Gallery of Art*, Washington, DC, 1973, pp. 26–8, and Pl. 39, Fig. 95 (p. 159).

529. Der Nersessian, *Armenian Manuscripts in the Walters Art Gallery*, pp. 20–1.

530. Icon in the Collection of the Monastery of St. Catherine on Mount Sinai, no. 1128, unpublished.

531. This contrast of size in the upper and lower registers reminds us of the Ghent Altarpiece by Hubert and Jan van Eyck, from 1432, which of course has no relation to this particular panel. However, one wonders how much the Ghent Altar is inspired by the medieval images of the Last Judgment type seen here.

532. Icon in the collection of the Monastery of St. Catherine on Mount Sinai, no. 1725, 40.2 × 32.0 cm, catalogue no. 99.

533. K. Weitzmann, "The Icons of Constantinople," *The Icon*, [11 (1982)], p. 59. This image appears to have three bishops instead of two along with the Apostles, but is otherwise very comparable.

534. Weitzmann points out, however, that bishops in Byzantine frescoes, for example, at Lagoudhera, also perform these same functions. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], p. 60.

535. Icon in the collection of the Monastery of St. Catherine's on Mount Sinai, no. 496, unpublished, catalogue no. 47.

536. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], pp. 61–9.

537. Ibid., p. 62.

538. See Chapter 6, in the discussion of the Crusader icons done in the Italo-Byzantine style with Venetian connections. For the publication of this work, see R. Pallucchini, *La Pittura Veneziana del Trecento*, Venice and Rome, 1964, p. 11 and Fig. 8, and the catalogue entry in *Venezia e bisanzio*, eds. I. Furlan et al., Venice, 1974, no. 74, with bibliography. For reproductions in accessible guidebooks, see G. Romanelli, *Museo Correr*, Milan, 1984, pp. 40–1, and E. Bianchi et al., *Il Museo Correr di Venezia*, Milan, 1997, p. 30.

539. Icon from the collection of the Monastery of St. Catherine on Mount Sinai (no. 1394), 44.4 × 34.4 cm, catalogue no. 85. A color reproduction is found in Weitzmann, *The Icon*, [8 (1978)], pp. 118–19, Pl. 40.

540. The significance of the appearance of textile, embroidery, and brocade patterns on these panels remains to be explored fully. Suffice it to say here that this kind of appearance suggests both knowledge of textiles with such designs, and perhaps the existence of a model book with a repertory of designs, another possible indication of the continuing output of a workshop in Acre, and also possibly in St. Catherine's Monastery.

541. There are a number of these Crusader icons at St. Catherine's with similar gold lozenge with white pearls on a black ground border decoration, for example, nos. 56, cat. 9; 137, cat. 18; 172, cat. 20; 200, cat. 22; 212, cat. 24; 260, cat. 29; 261, cat. 30; 293, cat. 33; 428, cat. 43; 730, cat. 62; 753 (design in raised gesso with no colors), cat. 66; 1394, cat. 85; 1568, cat. 95; 1744–6, cat. 101a–c; 1783, cat. 104; and 1901, cat. 111.

542. Icon in the collection of the Monastery of St. Catherine on Mount Sinai (no. 1568), 120.5 × 68 cm, catalogue no. 95.

555. Icon in the collection of the Monastery of St. Catherine on Mount Sinai, no. 1783, each panel 51.2 × 39.7 cm, catalogue no. 104

556. M. Aspra-Vardavakis, "Observations on a Thirteenth-Century Sinaitic Diptych Representing St Procopius, the Virgin Kykkotissa and Saints along the Border," *Byzantine Icons: Art, Technique and Technology*, ed. M. Vasilaki, Heraklion, 2002, pp. 90–1.

557. See, for example, the Icons of the Virgin and Child from Moutoullas and from Asinou in Papageorghiou, *Icons of Cyprus*, pp. 48, Fig. 29, and 57, Fig. 35.

558. A. Weyl Carr, "The Presentation of an Icon at Mount Sinai," *Deltion of the Christian Archaeological Society, Athens*, tomos IZ' (1993–4), pp. 239–48.

559. A. Weyl Carr, "Images of Medieval Cyprus," *Visitors, Immigrants, and Invaders in Cyprus*, ed. P. W. Wallace, Institute of Cypriot Studies, Albany, 1995, pp. 96–7. Weyl Carr points out that the earliest known image with this veil is a fresco icon from Lyso in northwest Cyprus, also from the early thirteenth century (ibid., p. 97).

560. A. Weyl Carr, "Threads of Authority: The Virgin Mary's Veil in the Middle Ages," *Robes of Honor, The Medieval World of Investiture*, ed. S. Gordon, New York and Basingstoke, 2001, p. 69.

561. See the discussion of the "Workshop of the Soldier Saints" in Chapter 6.

562. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], p. 67.

563. M. Aspra-Vardavakis, "Diptych: A. St. Prokopios, B. The Virgin Kykkotissa, and Saints," *Mater Theou/Mother of God: Representations of the Virgin in Byzantine Art*, ed. M. Vassilaki, Milan, 2000, pp. 444, 445, and idem, "Observations on a Thirteenth-Century Sinaitic Diptych Representing St Procopius, the Virgin Kykkotissa and Saints along the Border," pp. 90, 92, 93. Aspra-Vardavakis discusses the problem of this inscription at greater length in the second article, and she is by no means certain that "'O PERIBOLITHS" is not the correct interpretation, although she is reluctant to consider that this refers to the precinct of the church in honor of St. Procopius in Jerusalem as the reason for the reference.

I am grateful to M. Aspra-Vardavakis for sending me a copy of her article for the Symposium Papers for consultation in advance of publication in 2002.

564. In other well-known Byzantine images, for example, the preiconoclastic icon from Sinai, Peter holds the keys in his right hand and a cross staff in his left hand (Weitzmann, *The Icon* [8 (1978)], pp. 54–5 and in the late thirteenth-century icon now at Dumbarton Oaks, Peter holds the scroll and cross staff in his left hand but has the keys on a cord around his neck (Weitzmann, *The Saint Peter Icon of Dumbarton Oaks*, Dumbarton Oaks Byzantine Collection Publications, no. 6, Washington, DC, 1983).

565. M. Aspra-Vardavakis, "Observations on a Thirteenth-Century Sinaitic Diptych Representing St Procopius, the Virgin Kykkotissa and Saints along the Border," p. 96, where she cites an example in the work of Guido da Siena (J. Stubblebine, *Guido da Siena*, Princeton, 1964, Fig. 7).

566. Ibid., pp. 94–5.

567. Ibid., pp. 89–90, notes that Moses with a full beard appears in the apse mosaic of the Transfiguration in the Church at St. Catherine's on Mount Sinai. This mosaic would not, however, seem to be a very likely source, because here Moses has white hair and a long white beard, a very old man compared to his younger age and shorter, dark beard in our icon.

568. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], p. 68.

569. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], p. 68, notes that Catherine carrying the orb, as she does in an icon of the Crucifixion (no. 1732), is unusual.

It is, he says, "an attribute which does not occur in earlier genuinely Byzantine icons and which, therefore, appears to be an invention of Crusader iconography." M. Aspra-Vardavakis, "Observations on a Thirteenth-Century Sinaitic Diptych Representing St Procopius, the Virgin Kykkotissa and Saints along the Border," p. 89, notes that St. Catherine with such an orb does, however, appear in the mosaics of Hosios Lukas in Phocis.

570. We shall discuss this chrysography later when we consider the Crucifixion icon (Fig. 267, App. no. 9/56) and related work.

571. Weitzmann, ibid., pp. 66–9.

572. A. Weyl Carr, "Icon-Tact: Byzantium and the Art of Cilician Armenia," *Treasures in Heaven: Armenian Art, Religion, and Society*, eds. T. S. Mathews and R. S. Wieck, New York, 1994, pp. 97–9. Weyl Carr thinks of the Queen Keran gospels, Jerusalem, Armenian Patriarchate, MS 2563, dated 1272, as being very similar to the Sinai Diptych (no. 1783). See S. Der Nersessian, *Armenian Art*, Paris, 1978, pp. 142–3, Figs. 104–6.

573. M. Aspra-Vardavakis, "Diptych: A. St. Prokopios, B. The Virgin Kykkotissa, and Saints," pp. 444–6, no. 71, and Mouriki, "Icons from the 12th to the 15th Century," pp. 118–19, 190–1.

574. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)] p. 69.

575. Mouriki, "Icons from the 12th to the 15th Century," p. 119.

576. Aspra-Vardavakis, "Diptych", pp. 445–6, discusses the style, but whereas she considers the Sinai, Syrian, and Cypriot links, she has nothing to say about Weitzmann's Veneto-Byzantine Crusader style nor about the other icons he relates this to in the collection at Sinai. In her more recent paper, "Observations on a Thirteenth-Century Sinaitic Diptych Representing St Procopius, the Virgin Kykkotissa and Saints along the Border," p. 98, she maintains essentially the same position, but suggests that this "Cypriot artist-monk" may have traveled widely in the East and sketched ideas from other icons.

577. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, 33.7 × 26.6 cm.

578. Mouriki, "Icons from the 12th to the 15th Century," p. 118.

579. Note that M. Aspra-Vardavakis, "Observations on a Thirteenth-Century Sinaitic Diptych Representing St Procopius, the Virgin Kykkotissa and Saints along the Border," p. 97, and Fig. 7, p. 103, attributes this icon to the same artist who did the diptych of our Figs. 271–88.

580. Papageorghiou, *Icons of Cyprus*, p. 13, no. 7, and idem, "Icon of the Virgin Eleousa," *Mother of God*, ed. Vassilaki, pp. 470–1, no. 76.

581. Papageorghiou, *Icons of Cyprus*, p. 18, no. 11, and idem, "Icon of the Virgin Arakiotissa," *Mother of God*, ed. Vassilaki, pp. 406–7, no. 62.

582. Papageorghiou, *Icons of Cyprus*, p. 26, no. 15a, and idem, "Two-sided Icon: A. The Virgin Brephokratousa," *Mother of God*, ed. Vassilaki, pp. 350–2, no. 36.

583. S. Sophocleous, *Icons of Cyprus, 7th–20th Century*, Nicosia, 1994, pp. 90 and 156, no. 28.

584. Mouriki, "Thirteenth-Century Icon Painting in Cyprus," pp. 32, 112, and Fig. 65. I am not certain whether this fresco employs genuine chrysography or painted highlights simulating chrysography on the garments of the figure of the Christ child.

585. Papageorghiou, *Icons of Cyprus*, pp. 52–3, no. 32; J. Folda, "Crusader Art in the Kingdom of Cyprus, c. 1275–1291: Reflections on the State of the Question," *Cyprus and the Crusades*, ed. N. Coureas, Nicosia, 1995, pp. 216–19; and R. W. Corrie, "Icon with St. Nicholas and Scenes from His Life," *The Glory of Byzantium*, eds. H. Evans and W. Wixom, New York, 1997, pp. 397–8, entry 263.

586. Papageorghiou, *Icons of Cyprus*, p. 51, no. 31; Folda, "Crusader Art in the Kingdom of Cyprus, c. 1275–1291," pp. 216–1. This Golden Virgin Enthroned is, of course, a special case, and does not employ chrysography as found in the other examples. Instead it features the Virgin and Child wearing all golden garments. This is a distinctly un-Byzantine iconography found rather in the West, and certainly in Italy in the twelfth and thirteenth centuries (Folda, ibid., p. 220). The date for this panel is partly based on the adoption of the new habit for the Carmelites between 1284 and 1287, as seen in this altarpiece.

587. J. Folda, "The Kahn and Mellon Madonnas: Icon or Altarpiece?" *Byzantine East, Latin West, Art Historical Studies in Honor of Kurt Weitzmann*, eds. C. Moss and K. Kiefer, Princeton, 1995, pp. 501–6.

Balard, B. Z. Kedar, and J. Riley-Smith, Aldershot/Burlington, 2001, pp. 361–71; and idem, "Madonna and Child on a Curved Throne," *The Glory of Byzantium*, pp. 396–7, no. 262.

590. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, 20.0 × 16.0 cm.

591. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, unpublished.

592. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, unpublished.

593. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, unpublished.

594. Icon from the collection of the Monastery of St. Catherine on Mount Sinai.

595. Icon from the collection of the Monastery of St. Catherine on Mount Sinai.

596. Icons from the collection of the Monastery of St. Catherine on Mount Sinai, unpublished.

597. Icon from the collection of the Monastery of St. Catherine on Mount Sinai.

598. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, unpublished.

599. Icon from the collection of the Monastery of St. Catherine on Mount Sinai, unpublished.

600. Icon from the collection of the Monastery of Saint Catherine on Mount Sinai.

601. Mouriki, "Thirteenth-Century Icon Painting in Cyprus," p. 67. She included our nos. 1144, 1453, and 1966 in her grouping.

602. One icon fragment that might be considered in relation to these Mary and John panels is the handsome torso of Christ, no. 809, from the collection at St. Catherine's on Mount Sinai. See our Appendix, no. 69, Fig. 383. We cannot fully evaluate this possible relationship, however, until the precise measurements are known along with other facts pertaining to the painting, condition, and wood panels on which these images are painted.

603. K. Weitzmann, "Three Painted Crosses at Sinai," [6 (1972)], pp. 23–31, and idem, "Annotation," in *Studies in the Arts at Sinai*, [12 (1982)], pp. 436–7.

604. An excellent selection of these painted crucifixions with figures in the side fields is published by E. B. Garrison, *Italian Romanesque Panel Painting, An Illustrated Index*, Florence, 1949, pp. 183–98.

605. Weitzmann, "Thirteenth Century Crusader Icons on Mount Sinai," [1 (1963)], p. 198.

606. For the Freer Canteen, no. 41.10 done in brass with silver inlay, it is attributed to the Mosul School in the mid-thirteenth century, and is related to Eastern Christian painting. See L. Schneider, "Freer Canteen," *Ars Orientalis*, 9 (1973), Pls. 1–2; E. Atil, *Islamic Metalwork in the Freer Gallery of Art*, Washington, DC, 1985, p. 124; and H. Buchthal, "The Painting of the Syrian Jacobites in its Relation to Byzantine and Islamic Art," *Syria*, 20 (1939), pp. 135–50.

For the Freer d'Arenberg Basin, no. 55.10, done in brass with silver inlay, it is attributed to the 1240s as the commission of sultan al-Malik al-Salih in Syria. See G. Migeon, *Exposition des Arts Msulman au Musée des Arts Décoratifs*, Paris, 1903, Pls. 11–12, and E. Atil, *Islamic Metalwork in the Freer Gallery of Art*, Washington, DC, 1985, pp. 137–47.

For the Baptistère de Saint Louis, see E. Atil, *Renaissance of Islam, Art of the Mamluks*, Washington, DC, 1981, pp. 76–8, no. 21, and see our discussion with other bibliography pertaining to the dating in the section on metalwork later in this chapter.

607. Careful study of the existing photograph of this icon does not yield any conclusive evidence that would substantiate a conclusion one way or another about the date of this incision. It is at least possible that it was done at the time of the painting of the icon and not added later. The fact is, however, that this technique is little used in the East before *c.*1300 and so its appearance here would be very early if it is part of the production of this icon in the 1270s or the 1280s. It will be very important to examine this icon firsthand and to see the details of the technique and the relationship between the incision and the painted surface of the icon.

608. This is yet another icon for which detailed study and firsthand examination is required to help determine answers to some of the main questions posed by the work. It is worth mentioning also that this triptych has a special feature of regular display inscriptions painted in Greek combined with a long Arabic painted inscription at the upper right side of the central panel. This reminds us of the Near Eastern context in which these icons were done, the possibility of Arabic-speaking Christians commissioning some of these icons, and the fact, as yet almost entirely unstudied, that there are at Sinai a corpus of icons from the twelfth and thirteenth centuries in the which the display inscriptions for the figures are painted in Arabic, indicating very likely patronage by Arabic-speaking Eastern Christians.

609. On this type of arch in architecture, see D. Howard, *Venice and the East, the Impact of the Islamic World on Venetian Architecture, 1100–1500*, New Haven and London, 2000, pp. 142–6, and Fig. 168, the plate by John Ruskin on the orders of Venetian Gothic.

610. The best parallel is found in the Freer canteen, but the Freer basin and the Paris candlestick also have figures in arched openings that are comparable. For the bibliography, see n. 606, and see also the following articles: N. Khoury, "Narratives of the Holy Land: Memory, Identity and Inverted Imagery in the Freer Basin and Canteen," Orientations, 1998, pp. 63–9, and R. A. Katzenstein and G. D. Lowry, "Christian Themes in Thirteenth-Century Islamic Metalwork," *Muqarnas*, 1 (1983), pp. 53–68.

636. A. Frolow, *La Relique de la Vraie Croix: Recherches sur le Développement d'un Culte*, Paris, 1961, pp. 442–54, nos. 564–90. Some of these objects are Byzantine, see nos. 570, p. 443 (Sopočani), 573, pp. 444–7 (Constantinople), 582, p. 451 (Mount Athos – Vatopedi Monastery), and 586, pp. 452–3 (Venice).

637. See O. Grabar, "The Crusades and the Development of Islamic Art," *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, DC, 2001, pp. 235–45, for an introductory overview. See also R. Ward, "Metallarbeiten der Mamluken-Zeit, hergestellt für den Export nach Europa," *Europa und der Orient, 800–1900*, eds. G. Sievernich and H. Budde, Berlin, 1989, pp. 202–9, and A. Cutler, "Everywhere and Nowhere: The Invisible Muslim and Christian Self-Fashioning in the Culture of Outremer," *France and the Holy Land*, pp. 253–281, esp. pp. 262–9. Ward in contrast to Grabar and Cutler does not link these works to the Crusader context.

638. The basic study is by D. S. Rice, *Le Baptistère de Saint Louis*, Paris, 1953. There are several recent studies, including those by D. Behrens-Abouseif, "The Baptistère de Saint Louis: A Reinterpretation," *Islamic Art*, 3 (1989), pp. 3–13; E. R. Knauer, "Einige trachtgeschichtliche Beobachtungen am Werke Giottos, *Scritti in onore de Roberto Salvini*, Florence, 1984, pp. 173–81; R. Ward, "The 'Baptistère de Saint Louis' – A Mamluk Basin Made for Export to Europe," *Islam and the Italian Renaissance*, eds. C. Burnett and A. Contadini, Warburg Institute Colloquia, 5, London, 1999, pp. 113–32; and comments by C. Hillenbrand, *The Crusades: Islamic Perspectives*, Edinburgh, 1999, pp. 12, 13, 14, 18, 21, 113, 115, and 541–2, and color plate 9. I am indebted to my colleague M. Shreve Simpson for drawing my attention to the Ward article.

639. D. Behrens-Abouseif, "The Baptistère de Saint Louis: A Reinterpretation," *Islamic Art*, 3 (1989), pp. 3–13, argues this work was made in the time of Sultan Baybars I (1260–77). R. Ward, "The 'Baptistère de Saint Louis' – A Mamluk Basin Made for Export to Europe," *Islam and the Italian Renaissance*, pp. 113–32, proposes to date the Baptistère to the 1340s. These differences of attribution point up the unresolved questions surrounding this work as well as this type of metalwork in the Levant during the thirteenth century.

640. E. Atil, *Renaissance of Islam, Art of the Mamluks*, Washington, DC, 1981, pp. 76–8, summarizes its modern history: "The earliest record of its existence appears in a travel book written in 1742, which states that the basin was used for the baptism of the children of the ruling house of France and was thought to have been brought back from the Near East by Louis IX during one of his Crusades (which predates the basin by almost half a century). The basin was kept in the Treasury of the Sainte Chapelle on the grounds of the Chateau de Vincennes until 1852 when it was moved to the newly established museum at the Louvre Palace. It was used for the baptism of Prince Napoleon-Eugène in 1856 – the last time it served as a baptismal font" (p. 78).

641. Ward, "The 'Baptistère de Saint Louis,' – A Mamluk Basin Made for Export to Europe," pp. 113–23, raises all of these issues in light of recent scholarship, but decides in the end to attribute the Baptistère to the early fourteenth century, made in Damascus.

642. Grabar, "The Crusades and the Development of Islamic Art," *The Crusades from the Perspective of Byzantium and the Muslim World*,

pp. 235–45, esp. 241. It is interesting that there are many metalwork objects, some with figural decoration, of Mamluk origin, loosely dated to the thirteenth/fourteenth centuries or the fourteenth century, now in Italian collections, which seem to belong to this market. See S. Carboni and C. Tonghini, "La Siria e l'Egitto nei periodi ayyubide dal 564/1179 al 658/1260 e mamelucco dal 648/1250 al 923/1517," *Eredità dell'Islam, Arte islamica in Italia*, ed. G. Curatola, Milan, 1993, pp. 283–8, 298–323, nos. 169, 172, 173, 174, 175, 176, 177, 178, 179, 180, 182, 188. There seems to be a certain parallelism between the metalwork and its problems of provenance and dating, artists and patronage, and that of the luxury enameled glass production, which I shall comment on later.

643. J. W. Allan, *Islamic Metalwork, The Nuhad es-Sahid Collection*, rev. edn., London, 1999.

644. Ibid., p. 68. See pp. 66–9, no. 9, for the full entry.

646. Ibid., pp. 74–5, no. 11.

647. Ibid., pp. 76–9, no. 12.

648. Ibid., pp. 80–3, no. 13.

649. Ibid., pp. 84–5, no. 14.

650. Ibid., pp. 86–9, no. 15.

651. S. Makariou, "Two Objects from the Louvre Made for the Lusignans of Cyprus," pamphlet published on the occasion of the exhibition of these works at the Leventis Municipal Museum, 19 May–31 July 2000 in Nicosia, Cyprus. I am indebted to my colleague, Annemarie Weyl Carr, for drawing my attention to these works and providing me with a copy of this illustrated pamphlet.

652. See D. S. Rice, "Arabic Inscriptions on a Brass Basin Made for Hugh IV de Lusignan," *Studi orientalistici in onore di Giorgio Levi della Vida*, vol. II, Rome, 1956, pp. 390–402, and comments by Ward, "The 'Baptistère de Saint Louis,' – A Mamluk Basin Made for Export to Europe," pp. 120–1. See also the important article by A. Weyl Carr, "Art in the Court of the Lusignan Kings," *Cyprus and the Crusades*, ed. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 246–7 and 254, with comments on this basin.

653. C. J. Lamm, *Mittelalterliche Gläser und Steinschnittarbeiten aus dem Nahen Osten*, 2 vols., Berlin 1929–30. See the comments on Lamm's classification and dating of the glass by, for example, G. Scanlon, "Lamm's Classification and Archaeology," *Gilded and Enamelled Glass from the Middle East*, ed. R. Ward, London, 1998, pp. 27–9; S. Carboni, "The Great Era of Enameled and Gilded Glass," *Glass from Islamic Lands*, New York, 2001, pp. 323–5.

654. S. Carboni, "Painted Glass," *Glass of the Sultans*, eds. Carboni and Whitehouse, pp. 247–9, no. 123, and R. Ward, "Glass and Brass: Parallels and Puzzles," *Gilded and Enamelled Glass from the Middle East*, ed. R. Ward, London, 1998, pp. 30–1. In this article, R. Ward offers some new ideas for restructuring the chronology of the enameled glass production in Syria and Egypt from *c.*1250 to *c.*1350.

655. Carboni, "Painted Glass," p. 248.

656. With regard to Lamm's study, his classification, and his idea that the Aldrevandinus Beaker was "Syro-Frankish," see now the recent scholarship that argues that in fact this work, and some of the other painted glass in the group related to it, was painted in Venice, imitating Islamic technique. See D. Whitehouse, "Imitations of Islamic Glass," in S. Carboni and D. Whitehouse (eds.), *Glass of the Sultans*, New York, 2001, pp. 297–8, and S. Carboni, "The Aldrevandin Beaker," ibid., pp. 302–3, no. 151.

657. See I. Krüger, "A Second Aldrevandin Beaker and an Update on a Group of Enameled Glasses," *Journal of Glass Studies*, 44 (2002), pp. 111–32, for a survey of the scholarship and the current points of view. The claim that Bohemond VII transferred the technology of Syrian glassmaking to Venice by a treaty dated 1277 must be factored into this discussion. See A. Y. al-Hassan and D. R. Hill, *Islamic Technology, An Illustrated History*, Cambridge, 1986, pp. 33, 153. David Whitehouse characterizes this agreement between Bohemond VII and Doge Jacopo Contarini in 1277 as exempting the Venetians from duty in Tripoli, except when they exported broken glass. See D. Whitehouse, "Islamic Glass and Italy, 1200–1500," *Papers from the EEA Third Annual Meeting in Ravenna, 1997*, M. Pierce and M. Tosi, eds., BAR International Series, 718, Oxford, 1998, pp. 191–195.

On this whole issue of luxury glassmaking East and West, see the fictitious story told by S. Carboni, "Gregorio's Tale; or, Of Enameled Glass Production in Venice," *Gilded and Enamelled Glass from the Middle East*, ed. R. Ward, London, 1998, pp. 101–6.

658. It is now in the Furussiya Arts Foundation, Vaduz, Liechtenstein, said to have been found in China! See S. Carboni, "121. Bottle," S. Carboni and D. Whitehouse, eds., *Glass of the Sultans*, New York, 2001, pp. 242–5, no. 121. See also M. Gibson, "Enamelled Glass of Syria, Twelfth to Fourteenth Centuries," M. A. report, School of Oriental and African Studies, University of London, 1983, J. Ball, "258. Bottle with Monastic Scenes," *Byzantium: Faith and Power: 1261–1557*, pp. 430–1.

659. For a color plate of these beakers, see R. Mack, *Bazaar to Piazza: Islamic Trade and Italian Art 1300–1600*, Berkeley/Los Angeles/London, 2002, p. 114, Fig. 118.

660. See M. Jones, "The Luck of Edenhall," *Palace and Mosque*, London, 2004, pp. 108–109, and the V&A Museum Web site: http://www.vam.ac.uk/collections/glass/stories/edenhall/index.html.

661. S. Kenesson, "Islamic Enamelled Beakers: A New Chronology," *Gilded and Enamelled Glass from the Middle East*, ed. R. Ward, London, 1998, pp. 46–7. C. J. Lamm, *Mittelalterliche Gläser*, vol. 1, p. 329, vol. 2, tafel 127, no. 2, dates it, *c.*1240.

662. On Crusader pottery, see the general remarks by A. Boas, *Crusader Archaeology*, pp. 142–50; B. Porée, "Le Royaume de Jérusalem aux XIIe et XIIIe siècles: les céramiques croisées, témoins des échanges culturels et commerciaux," *Pèlerinages et Croisades*, Comité des Travaux Historiques et Scientifiques, Paris, 1995, pp. 333–50, and R. D. Pringle, "The Medieval Pottery of Palestine and Transjordan (A.D. 636–1500): An Introduction," *Medieval Ceramics*, 5 (1981), pp. 45–60.

663. Boas, *Crusader Archaeology*, p. 143.

664. For the study of Kinet/Tinat/Calamella, see S. Redford, "On *Saqis* and Ceramics: Systems of Representation in the Northeast Mediterranean," in *France and the Holy Land*, pp. 282–312. See also the report on the excavations at Kinet by S. Redford et al., "Excavations at Medieval Kinet, Turkey: A Preliminary Report," *Journal of Ancient Near Eastern Studies*, 38 (2001), pp. 59–139.

665. Redford, "On *Saqis* and Ceramics, Systems of Representation in the Northeast Mediterranean," pp. 282–312.

666. Ibid.

667. Ibid., p. 302, for the quote. He is arguing here parallel to the views expressed in a recent book, R. Ellenblum, *Frankish Rural Settlement in the Latin Kingdom of Jerusalem*, Cambridge, 1998, but with certain important differences that pertain to the northern region.

668. It is this luxury cloth that the Mongols prized especially. See T. T. Allsen, *Commodity and Exchange in the Mongol Empire: A Cultural History of Islamic Textiles*, Cambridge, 1997, for example, pp. 46–71. The term Allsen uses for this cloth is *nasij*, which meant "cloth of gold and silk" (pp. 2–3).

669. Boas cites Burchardus de Monte Sion as saying this, but actually it was the Muslim historian, Taqi ad-Din al-Maqrizi, who wrote it much later. See Maqrizi, "The Book of Proceeding to the Knowledge of the History of the Kings," *Arab Historians of the Crusades*, ed. F. Gabrieli, London, 1969, p. 343. What he says is that when the Mamluks conquered Tripoli they found four thousand weaver's looms. Obviously there may have been more than four thousand weavers working on those looms.

683. Ward, "The 'Baptistère de Saint Louis' – A Mamluk Basin Made for Export to Europe," p. 113.

684. Cahen pointed out that Abu'l-Fadl was probably a Maronite. See B. Z. Kedar, "Latins and Oriental Christians in the Frankish Levant, 1099–1291," *Sharing the Sacred: Religious Contacts and Conflicts in the Holy Land*, eds. A. Kofsky and G. G. Stroumsa, Jerusalem, 1998, p. 220; C. Cahen, "Une inscription mal comprise concernant le rapprochement entre Maronites et Croisés," *Medieval and Middle Eastern Studies in Honor of Aziz Suryal Atiya*, ed. S. A. Hanna, Leiden, 1972, pp. 62–3. This inscription is also published by S. de Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, Jerusalem 1974, pp. 301–2, and n. 11, who disagrees with this interpretation.

CHAPTER 8: THE FALL OF ACRE IN 1291 AND THE END OF THE CRUSADER STATES IN MAINLAND SYRIA-PALESTINE

The Fall of Acre, 1289–1291

1. Templar of Tyre, *Les Gestes des Chiprois*, ed. and trans. P. Crawford, *The Templar of Tyre: The Deeds of the Cypriots*, Aldershot, 2003, p. 115, sect. 479; *Les Gestes des Chiprois, RHC: Doc. Armen.*, II, p. 804, sect. 479. See now the new edition of the text by the Templar of Tyre, ed. L. Minervini, *Cronaca del Templare di Tiro (1243–1314), La caduta degli stati crociati nel racconto di un* testimone oculare, Naples: Liquori, 2000, p. 198, sect. 479. The main sources for the taking of the city of Acre, which constitutes the main focus of historical accounts dealing with the Crusaders in the Holy Land between 1289 and 1291, are discussed by S. Runciman, "The Crusader States, 1243–1291," *HC*, 2, p. 598, n. 95.

The "Templar of Tyre" is the only Crusader eyewitness to write a contemporary account. He is not a Templar himself, but was the secretary to the grand master, William of Beaujeu. Runciman says that his work was put together with that of other writers about 1325 by Gerard de Montreal to produce what we know as the *Gestes des Chiprois* today. See also S. Runciman, *A History of the Crusades*, 3, Cambridge, 1954, pp. 482, 484. We are relying chiefly on the "Templar of Tyre" and not on the later accounts by Thaddeus of Naples and the *De Excidio Urbis Acconis*, both of which, says Runciman, "clearly exaggerated their accounts for propagandist purposes" (p. 484). On these accounts, see S. Schein, *Fideles Crucis: The Papacy, the West, and the Recovery of the Holy Land, 1274–1314*, Oxford, 1991, esp. pp. 114–24.

For the Arabic sources see now D. P. Little, "The Fall of 'Akka in 690/1291: The Muslim Version," *Studies in Islamic History and Civilization in Honour of Professor David Ayalon*, Jerusalem and Leiden, 1986, pp. 159–81, who corrects Runciman's interpretation of Ibn al-Furat's account. Little thinks the Templar of Tyre is Gerard de Montreal, based on the remarks of Ch. Kohler to the early edition by L. de Mas-Latrie, in the *RHC: Doc. Armen.* II, p. 296.

A famous detailed account of the fall of Acre written in modern times is by G. Schlumberger, "Fin de la domination franque en Syrie: Prise de Saint-Jean-d'Acre en l'an 1291 par l'armée du soudan d'Égypte," *Byzance et Croisades: Pages Médiévales*, Paris, 1927, pp. 207–79. This is a republication of an article, much enlarged, which first appeared in the *Revue des Deux Mondes* in July 1913. Finally, Jonathan Riley-Smith told me about another important work on the fall of Acre, too late to be incorporated into this discussion. See E. Stickel, *Der Fall von Akkon: Untersuchungen zum Abklingen des Kreuzzugsgedankens am Ende des 13. Jahrhunderts*, Bern, 1975.

2. Templar of Tyre: Crawford, pp. 115–45, and the poem, pp. 145–54; *RHC: Doc. Armen.*, II, pp. 804–22, and the poem, pp. 822–6; Minervini, pp. 198–252.

3. S. Schein, *Fideles Crucis: The Papacy, the West, and the Recovery of the Holy Land, 1274–1314*, Oxford, 1991, p. 66.

4. S. Schein, "The Patriarchs of Jerusalem in the Late Thirteenth Century – *Seignors espiritueles et temporeles?*," *Outremer*, pp. 302–3.

5. J. Riley-Smith, "The Crown of France and Acre, 1254–1291," *France and the Holy Land*, pp. 45–62.

6. B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 239–40.

7. Templar of Tyre: Crawford, pp. 115–16, sects. 480–1; *RHC: Doc. Armen.*, II, pp. 804–5, sects. 480–1; Minervini, pp. 198–202, sects. 480–1.

8. Templar of Tyre: Crawford, pp. 116–17, sect. 481; *RHC: Doc. Armen.*, II, pp. 805–6, sect. 481.

9. Little, "The Fall of 'Akka in 690/1291," pp. 166–7.

10. Ibid., p. 168.

11. Templar of Tyre: Crawford, p. 118, sect. 485; *RHC: Doc. Armen.*, II, p. 807, sect. 485; Minervini, p. 204, sect. 485.

12. Templar of Tyre: Crawford, p. 118, sect. 484; *RHC: Doc. Armen.*, II, p. 806, sect. 484; Minervini, pp. 202, 204, sect. 484.

13. This is an interesting delegation reflecting the leading constituencies who exercised power in Acre in the circumstances in the year 1290. The sultan's uncharacteristic bad treatment of them was presumably because the Crusaders had ignored his letter warning them not to attempt diplomatic action.

14. Templar of Tyre: Crawford, p. 119, sect. 489; *RHC: Doc. Armen.*, II, p. 808, sect. 489; Minervini, p. 206, sect. 489.

15. Little, "The Fall of 'Akka in 690/1291," pp. 168–71.

16. Ibid., p. 170.

17. Ibid., pp. 168–9.

18. Ibid., pp. 162–4, 170.

19. Ibid., p. 171.

20. Al-'Ayni, 'Iqd al-Juman, cited in ibid., p. 171.

21. Some estimates are truly fantastic: Ludolf von Suchem, writing in the mid-fourteenth century offers the number, 600,000 men in the Mamluk army.

22. Runciman, *A History of the Crusades*, 3, pp. 412–13.

23. In order to conceptualize the city of Acre at this time and to follow the narrative of the siege of the city in 1291, it is useful to consider the medieval maps from Matthew Paris's and Marino Sanudo's works, with the modern attempts to reconstruct the layout and panorama of the medieval city. For the medieval and modern maps, a convenient compendium is found in B. Dichter, *The Maps of Acre, an Historical Cartography*, Acre, 1973. For a panoramic view of the city reconstructed from historical sources with

certain sites identified, see "Acre: A Crusader City," in *The Atlas of the Crusades*, ed. J. Riley-Smith, London, 1991, pp. 102–3. For interesting aerial views of the city in the twentieth century, see the photos from 1918, 1945, 1968, and 1994 in B. Z. Kedar, *The Changing Land between the Jordan and the Sea, Aerial Photographs from 1917 to the Present*, Jerusalem, 1999, pp. 188–9. Note that in Riley-Smith's *Atlas*, the reconstructed city of Acre was made before research of Kedar and the archaeological evidence of Stern and others drew attention to the enlarged dimensions of the city, especially toward the eastern end of the city and along the sea walls on the west side. For the important Kedar article, see the citation in the next sentence.

Other relevant images are two famous seventeenth-century drawings of the city, reproduced by, for example, B. Z. Kedar, "The Outer Walls of Frankish Acre," *'Atiqot*, 31 (1997), p. 165 (E. Gravier d'Ortières), and in Runciman, *A History of the Crusades*, III, pl. IX (Cornelis de Bruyn).

24. Templar of Tyre: Crawford, p. 121, sect. 490; *RHC: Doc. Armen.*, II, pp. 808, sect. 490; Minervini, p. 206, sect. 490.

25. Templar of Tyre: Crawford, pp. 120–2, sects. 490–1; *RHC: Doc. Armen.*, II, pp. 808–10, sects. 490–1; Minervini, pp. 206–10, sects. 490–1.

52. R. B. C. Huygens has kindly drawn my attention to a passage in his forthcoming book, *The Fall of Acre 1291*, where his new edition of the text of Thadeus of Naples contains a detailed description of the Templar headquarters (lines 255–62). He notes that the Latin text is very difficult because of its rhetorical wording, but he provides a translation of the description as follows:

> when the towers became weakened, having been violently cut away from their foundations and completely undermined by the exertions of the unbelievers, along with the platforms contained between them by ingenious construction – platforms by virtue of which the Templar fortress, with vaulted stonework everywhere, was nicely paved above and, by means of the artfully constructed and extensive terrace in the upper part, opened up a wide space for everyone to walk on, to which it was not at all possible to climb [other than] through doors.

I thank Robert Huygens very warmly for sending me this information in a letter, in advance of the publication of his edition, which will appear late in the year 2004.

53. Templar of Tyre: Crawford, p. 138, sect. 508; *RHC: Doc. Armen.*, II, p. 817, sect. 508; Minervini, p. 226, sect. 508.

54. Schlumberger, "Prise de Saint-Jean-d'Acre," p. 276.

55. It had only taken the Crusaders thirty-eight days to capture Jerusalem in 1099, but the circumstances were much different.

56. This text says 17 Jumada II, but the date was actually 17 Jumada I.

The Destruction and Dispersal of the Art of the Crusaders in 1291

91. Archaeological investigations by the Israel Antiquities Authority in Acre ('Akko) are attempting to identify surviving parts of both of these two sites.

92. See F. Hiestand, "*Castrum Peregrinorum* e la fine del dominio crociata in Siria," *Acri 1291: La fine della presenza degli ordini militari in Terra Santa e i nuovi orientamenti nel XIV secolo*, ed. F. Tommasi, Quattroemme, 1996, pp. 23–41, and the republication of the excavations there by C. N. Johns, *Pilgrim's Castle ('Atlit), David's Tower (Jerusalem) and Qal'at ar-Rabal ('Ajlun)*, ed. R. D. Pringle, Aldershot, 1997. It is sometimes said that later Ottoman builders quarried 'Atlit for stone, but the extent of this has not been seriously studied.

93. See n. 70.

94. J. Folda, "Painting and Sculpture in the Latin Kingdom of Jerusalem, 1099–1291," *HC*, IV, p. 277, Pls. XXVIa, b.

95. See the chapter on "Tombs" in C. Enlart, *Gothic Art and the Renaissance in Cyprus*, ed. and trans. D. Hunt, London, 1987, pp. 361–72.

96. The main reference is J. Prawer, "A Crusader Tomb of 1290 from Acre and the Last Archbishops of Nazareth," *Israel Exploration Journal*, 24 (1974), pp. 241–51. See also Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, pp. 314–16, and M. Avi-Yonah, *A History of the Holy Land*, Jerusalem, 1969, p. 236.

97. See Chapter 6, and Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, pp. 258–9.

98. Unfortunately no information is given about the archaeological circumstances of this find. Prawer only reports, "In 1962 two parts of a stone slab were discovered in the Old City of Acre. Today, carefully put together, they belong to one of the prize exhibits of the Acre Municipal Museum." (Prawer, "A Crusader Tomb of 1290 from Acre," p. 241.)

99. B. Hamilton, *The Latin Church in the Crusader States: The Secular Church*, London, 1980, p. 279.

100. It is of interest to determine the type of stone, because it could be local limestone, marble, even reused marble, Cypriot limestone, or Cypriot schist. Tomb plaques of this basic kind are known in Cyprus as well as in western Europe at this time, and the material may provide some indication of its origin and the origin of the sculpture.

101. Prawer, "A Crusader Tomb of 1290 from Acre," p. 243, Fig. 2, reproduces a detail of one of the eagles and the guilloche pattern next to it.

102. For the full documentation of Alberto Sotio's painted cross, dated 1187, see the forthcoming doctoral dissertation by Ann Driscoll at the University of North Carolina, Spring 2005.

103. Prawer, "A Crusader Tomb of 1290 from Acre," p. 250, n. 23, compares this inscription to two other epitaphs of the same period, that is, 1278 and 1266, for Sire Gautier Meinne-Abeuf and Messier Berthelme Chayn, respectively. See Ch. Clermont-Ganneau, "Nouveaux Monuments des Croisés recueillis en Terre Sainte," *Archives de L'Orient Latin*, II, Paris, 1884, pp. 458–9, Pl. IA, and Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, pp. 308–10.

118. See the magnificent new critical edition of this text by P. Edbury (ed.), John of Ibelin, *Le Livre des Assises*, The Medieval Mediterranean: Peoples, Economies and Cultures, 400–1500, vol. 50, Leiden and Boston, 2003.

119. For the literature on Venice, Biblioteca Marciana MS fr. App. 20 (=265), see P. Edbury and J. Folda, "Two Thirteenth-Century Manuscripts of Crusader Legal Texts from Saint-Jean d'Acre," *Journal of the Warburg and Courtauld Institutes*, 57 (1994), pp. 243–54, with older bibliography, and Pl. 31; P. Edbury, "The *Livre des Assises* by John of Jaffa: The Development and Transmission of the Text," *The Crusades and Their Sources*, pp. 169–79; J. Folda, "The Hospitaller Master in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 51–2, 55, 57, 58, and 272, Pl. 5.

The main contents/decoration of Venice, Biblioteca Marciana MS fr. App. 20 (=265) is as follows: [This manuscript consists of two distinct codices bound together.]

Part 1 of the manuscript: fols. 1–10, and i–cciv, from Acre, *c.*1290:

Jean d'Ibelin's *Livre des Assises* and various other texts, in Old French.

29 gatherings of which gatherings 2 and XXVI have 4 fols. each, gatherings 1, I, X, XIX, and XXVII have 6 fols. each, and the rest have 8 fols. each; 31.0 × 22.0 cm.

Text in two columns of 34 lines each.

Part 2 of the manuscript: fols. ccv–ccclxiv, from Cyprus, mid-fourteenth century [after 1346]:

Philippe de Novare and various other texts, in Old French.

20 gatherings of 8 folios each; 31.0 × 22.0 cm.

Text in two columns of 34 lines each.

Part 1:

Fol. 1r, rubrics: Ci commence le livre des assises & des bons usages dou roiaume de iherusalem qui furent establis & mis en escrit par le duc godefroi de buillon. qui lor par comun acort fu esleu a roi & a seignor dou dit roiaume & par lordenement dou patriarche de iherusalem q lors primes fu esleu & sacre & par le conseill des autres rois princes & barons qui après le duc godefroi furent.

[text] (Q)uant la sainte cite de ierlm fu conqse ... (Illuminated initial below the miniature panel: pink (Q) with long tail and pinwheel flourish in the lower margin, each scalloped stem of which is embellished with a gold disc.)

Miniature panel on fol. 1r, 7.9 × 13.9 cm (Fig. 339).

The *haute cour* of the Latin Kingdom meets in Jerusalem with the king and patriarch presiding.

120. Edbury and Folda, "Two Thirteenth-Century Manuscripts," pp. 243–54, Pls. 32, 33. There is a third manuscript closely related to these two, another codex in Paris, Bibl. Nat. MS fr. 19096, also unillustrated. It would appear to have been done on Cyprus in the very early fourteenth century. See ibid., p. 250

121. Below the rubrics six lines were left blank, which are now filled with a modern notation on the contents of this manuscript.

122. Even though there were two obvious traditions that existed, the imagery of the *Traditio Legis* from Early Christian times, and the imagery of the illustrated *Decretum* of Gratian from more recent times, both of these traditions pertained to religious or canon law. The *Livre des assises* was, however, a secular law code written in the vernacular, which would have required an independent artistic interpretation in the Latin East.

For the *Traditio Legis*, see C. Davis-Weyer, "Das Traditio – Legis – Bild und seine Nachfolge," *Münchener Jahrbuch der bildenden Kunst*, XII (1961), pp. 7–45. For the illustration of Gratian's *Decretum*, see A. Melnikas, *The Corpus of the Miniatures in the Manuscripts of Decretum Gratiani*, tome 1, vols. 1–3, Rome, 1975, esp. vol. 1, pp. 3–19, and 23 f., vol. 3, Appendix and pp. 1229 f.

123. See, for example, for Antioch, Paris MS fr. 9084, fol. 64v, or Boulogne sur Mer MS 142, fol. 49v; for Tyre, Florence MS PLU.LXI.10, fol. 138v; and for Jerusalem, also with a domed building, in Florence MS PLU.LXI.10, fol. 80v, as illustrated in CD Figures 374, 397, 482 and 477, respectively.

124. See for example, the icons of Sts. Sergios and Bacchus (no. 63), St. Sergios with a donor (no. 80), and Sts. George and Theodore (no. 1463).

125. G. Schlumberger et al., *Sigillographie de l'Orient Latin*, Paris, 1943, p. 69, no. 163, illustrated by S. Paoli, *Codice diplomatico del sacro militare ordine gerosolimitano oggi di Malta...*, Lucca, 1733, Pl. VIII, no. 66, also reproduced in Sandoli, *Corpus Inscriptionum Crucesignatorum Terrae Sanctae*, pp. 319–20, no. 423.

126. See S. Schein, "The Patriarchs of Jerusalem in the Late Thirteenth Century – *Seignors Espiritueles et Temporeles?*," *Outremer*, pp. 297–305.

127. For further considerations on the colorism, see Folda, "The Hospitaller Master in Paris and Acre," pp. 51–9, and 269–72.

128. Edbury, "The *Livre des Assises* by John of Jaffa," pp. 172–3, "This manuscript – or rather this section of the manuscript – seems to date to *c.* 1290."

129. J. Prawer, *The Latin Kingdom of Jerusalem, European Colonialism in the Middle Ages*, London, 1972, p. 75.

130. For the literature on Paris, Bibliothèque Nationale MS lat. 11907, see R. W. Scheller, *Exemplum: Model-Book Drawings and the Practice of Artistic Transmission in the Middle Ages (ca. 900–ca. 1470)*, trans. M. Hoyle, Amsterdam, 1995, pp. 194–200, cat. no. 16, with the older bibliography; Folda, *Crusader Manuscript Illumination*, pp. 103–11, 192, no. 11; and the two basic publications: L. G. Friedman, *Text and Iconography for Joinville's Credo*, Cambridge, MA, 1958, and H. F. Delaborde and P. Lauer, "Un projet de decoration murale inspiré du Credo de Joinville," *Monuments et mémoires publiées par l'Académie des Inscriptions et Belles-Lettres (Fondation Piot)*, 16 (1909), pp. 61–84.

N.B.: "This manuscript forms part of the literary remains of Bernard de Montfaucon (1655–1741)[sic], Mss. 11904–11920." (Scheller, *Exemplum*, p. 195.)

The main content/decoration of Paris, Bibl. Nationale, MS lat. 11907 is as follows: (Fig. 341)

1 bifolium extant, 34.4 × 22.4 cm, gatherings, 1 (missing), 2 (with two folios).

Justification:

Fol. 231r, 27.9 × 17.7 cm.
Fol. 231v, 27.95 × 17.5 cm.
Fol. 232r, 27.85 × 17.75 cm.
Fol. 232v, 28.3 × 17.75 cm.

Drawings in rectangular frames in three registers except on fol. 232v, which has four registers. Occasional use of red and pale yellow coloring for the images. Text captions rubricated, except, for example, "HELIAS" in black, and small labels for figures also in black ink.

177. M. Piccirillo, "I Frati Minori al servizio dei Luoghi Santi," *In Terra Santa Dalla Crociata alla Custodia dei Luoghi Santi*, ed. M. Piccirillo, Milan, 2000, pp. 44–57. The Franciscan presence in the Holy Land dates from the time of St. Francis in 1217, but the "Custody of the Holy Land" dates from 1333, when according to Franciscan historians, negotiations between the Mamluk sultan and the king and queen of Naples, Robert and Sancha, resulted in the reestablishment of Latin clergy in the holy places. See S. de Sandoli, *The Peaceful Liberation of the Holy Places in the XIV Century: The Third Return of the Frankish or Latin Clergy to the Custody and Service of the Holy Places through Official Negotiations in 1333*, Cairo, 1990, and the popular account in *The Custody of the Holy Land*, Jerusalem, 1981, with information on current activities.

As for the presence of other, Eastern Christians at the holy sites, the Church of the Holy Sepulcher epitomizes this arrangement and its convoluted history over the centuries. Today there are three major communities, the Latins, represented by the Franciscans, the Greek Orthodox, and the Armenians at the Holy Sepulcher, along with three minor communities, the Syrians, the Copts, and the Ethiopians. On the status of the Christian holy sites in modern Israel, see W. Zander, *Israel and the Holy Place of Christendom*, New York, 1971.

4. B. Hamilton, *The Latin Church in the Crusader States*, London, 1980, pp. 361–2.

5. R. Denys Pringle, *The Churches of the Crusader Kingdom of Jerusalem, A Corpus*, vols. 1 and 2, Cambridge, 1993 and 1998, which will be, when volume 3 is published in the near future, the modern critical successor to the fundamental early studies by French scholars. I refer to those of Count M. de Vogüé, *Les Eglises de la Terre Sainte*, Paris, 1860, and the subsequent great publications of Vincent and Abel for Jerusalem, and C. Enlart for the Crusader States more generally. Both of the latter works focused on architecture although Vincent and Abel dealt more broadly with the history of Jerusalem approached through archaeology, and whereas Enlart emphasized architecture as the core of his study, he commented on sculpture and the minor arts as well. These early works are discussed in Chapter 1.

New York, 1971, pp. 2–3, and Burchardus de Monte Sion, *Descriptio Terrae Sanctae* (1283), *Itinera Hierosolymitana Crucesignatorum*, ed. S. de Sandoli, vol. 4, Jerusalem, 1984, pp. 122, 124.

14. This is Paris, BNF, MS fr. 20125, done in the late 1280s by a painter who may have worked with the Paris–Acre Master, and indeed may even have trained with him. See my discussion in Chapter 7, n. 494.

15. The essential recent publications on this debate are by Jonathan Riley-Smith, *What Were the Crusades?*, 3rd edn., Basingstoke and New York, 2002, and Giles Constable, "The Historiography of the Crusades," *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, DC, 2001, pp. 121–31.

16. Hans Eberhard Mayer, *Geschichte der Kreuzzüge*, Stuttgart, 1965, pp. 256–65; idem, *The Crusades*, trans. J. Gillingham, London, 1972, pp. 277–86; Jean Richard, *The Crusades, c.1071–c.1291*, trans. J. Birrell, Cambridge, 1999.

17. C. Erdmann, *The Origin of the Idea of the Crusade*, Stuttgart, 1935, trans. M. W. Baldwin and W. Goffart, Princeton, 1977, and Ernst-Dieter Hehl, "Was ist eigentlich ein Kreuzzug?" *Historische Zeitschrift*, 259 (1994), pp. 297–336.

18. C. Tyerman, *The Invention of the Crusades*, Basingstoke, London, Toronto and Buffalo, 1998.

19. See, for example, J. Flori, *La Guerre Sainte: La Formation de l'Idée de Croisade dans l'Occident Chrétien*, Paris, 2001, derived from his earlier work, and articulated earlier by P. Alphandéry and A. Dupront, *La Chrétienté et l'Idée de Croisade*, 2 vols., Paris, 1954–9.

20. J. Riley-Smith, *What Were the Crusades?*, 3rd edn., and N. Housley, *The Later Crusades, 1274–1580: From Lyons to Alcazar*, Oxford, 1992, and idem, "The Crusading Movement, 1274–1700," *The Oxford Illustrated History of the Crusades*, ed. J. Riley-Smith, Oxford, 1997, pp. 260–93.

21. See, for example, the review by H. E. Mayer of the book by J. Riley-Smith, *What Were the Crusades?*, 1st edn., Basingstoke and London, 1977, in *Speculum*, 53 (1978), pp. 841–2.

22. H. L. Kessler, "On the State of Medieval Art History," *Art Bulletin*, 70 (1988), pp. 169–71, 174, 183, 186, alluded to the diversity of Crusader art as an emerging subject without attempting to define its nature or to resolve the various approaches to the interpretation of its development to that point.

23. "Si l'on pouvait transporter les églises du royaume de Jérusalem dans les vallées du Rhône, de l'Allier ou de la Garonne, il n'en est pas une qui semblerait hors de son milieu." C. Enlart, *Les Monuments des Croisés dans le Royaume de Jérusalem: Architecture religieuse et civile*, vol. 1, Paris: Librarie Orientaliste Paul Geuthner, 1925, p. 32.

24. P. Deschamps, "La Sculpture française en Palestine et en Syrie à l'epoque des croisades," *Memoires et monuments de la fondation Piot*, 31 (1930), pp. 91–118.

25. The pioneering work in this period was by Hugo Buchthal, *Miniature Painting in the Latin Kingdom of Jerusalem*, Oxford, 1957, rpt. London, 1986. This was followed by two articles published by Kurt Weitzmann: "Thirteenth Century Crusader Icons on Mount Sinai," in the *Art Bulletin*, 45 (1963), pp. 179–203, and "Icon Painting in the Crusader Kingdom," *Dumbarton Oaks Papers*, 20 (1966), pp. 49–83, along with other papers by Weitzmann, E. Kitzinger, J. Stubblebine, and Hugo Buchthal, drawn from the Dumbarton Oaks Symposium on "The Byzantine Contribution to Western Art of the Twelfth and Thirteenth Centuries," April 29–May 1, 1965. The relevant work of Otto Demus appeared in the publication of the 1966

Wrightsman Lectures, entitled, *Byzantine Art and the West*, New York, 1970.

26. No book-length studies have yet appeared on Crusader glass, pottery, or textiles; virtually all major publications on these media have appeared in journals and exhibition or museum catalogues.

27. See Folda, *ACHL 1*, pp. 175–245, and the studies by R. Ousterhout, "Rebuilding the Temple: Constantine Monomachus and the Holy Sepulchre," *Journal of the Society of Architectural Historians*, 48 (1989), 66–78, and his important article entitled, "The French Connection? Vaulting Ambitions and Crusader Architecture," *France and the Holy Land*, eds. D. Weiss and L. Mahoney, pp. 77–94.

28. J. Folda, *The Nazareth Capitals and the Crusader Shrine of the Annunciation*, University Park and London, 1986.

29. J. Folda, *ACHL* 1, pp. 91–7, and G. Kühnel, *Wall Painting in the Latin Kingdom of Jerusalem*, Berlin, 1988, pp. 15–22, Pls. III–V, Figures 3–9.

30. Buchthal, *MPLKJ*, pp. 1–14, and Folda, *ACHL 1*, pp. 137–59, among others.

31. Buchthal, *MPLKJ*, pp. 54–68; D. Weiss, *Art and Crusade in the Age of Saint Louis*, Cambridge, 1998, and our discussion earlier in this volume in Chapter 6.

32. See Florence, Biblioteca Laurenziana, Ms. Plu. LXI.10, in J. Folda, *Crusader Manuscript Illumination at Saint-Jean d'Acre, 1275–1291*, Princeton, 1976, pp. 111–16.

33. Folda, *ACHL 1*, pp. 97–100.

34. Ibid., pp. 289–90, 334–7.

35. For all of these examples I am simply referring to basic earlier publications, bearing in mind that I have discussed them in earlier chapters and provided full documentation there.

P. Deschamps, *Terre Sainte Romane*, Abbaye Ste-Marie de la Pierre qui Vire, 1964, pp. 231–6; T. S. R. Boase, "Ecclesiastical Art in the Crusader States in Palestine and Syria, A. Architecture and Sculpture," *HC* 4, pp. 108–10; and R. D. Pringle, "Architecture of the Latin East 1098–1571," *Oxford Illustrated History of the Crusades*, ed. J. Riley-Smith, pp. 166–7.

36. H. Kennedy, *Crusader Castles*, Cambridge, 1994, pp. 146–68.

37. C. N. Johns, *Guide to 'Atlit: The Crusader Castle, Town & Surroundings*, Jerusalem 1947; ed. R. D. Pringle, *Pilgrims' Castle ('Atlit)*, Aldershot, Brookfield, 1997, pp. 35–89; and C. Johns, "Excavations at Pilgrims' Castle, 'Atlit (1931–2)," ibid., pp. 122–42.

38. B. Dean, "The Exploration of a Crusaders' Fortress (Montfort) in Palestine," *Bulletin of the Metropolitan Museum of Art*, New York, vol. 22, pt. II, 1927, pp. 91–7.

39. P. Deschamps, *Les Châteaux des Croisés en Terre Sainte, I: Le Crac des Chevaliers*, Paris 1934, and W. Müller-Wiener, *Burgen der Kreuzritter in Heiligen Land*, Berlin, 1966, pp. 61–3 and Pls. 66–83.

40. Buchthal, *MPLKJ*, pp. 39–46, 54–68, and 68–87.

41. K. Weitzmann, "The Icons of the Period of the Crusades," [11 (1982)], pp. 201–35.

43. D. M. Metcalf, *Coinage of the Crusades and the Latin East*, 2nd edn., London, 1995, pp. 148–55.

44. Ibid., pp. 43–51.

45. J. Riley-Smith, *What Were The Crusades?*, 3rd edn., Basingstoke and New York, 2002.

46. B. Kühnel, *Crusader Art of the Twelfth Century: A Geographical, an Historical or an Art Historical Notion?*, Berlin, 1994. See the extensive review of her book by A. von Hulsen-Esch in the *Göttingische Gelehrte Anzeigen*, 248 (1996), pp. 112–20.

47. Folda, *ACHL 1*, 1995.

48. Buchthal, *MPLKJ*, pp. 48–51, 116.

49. Ibid., pp. xxxii–xxxiii.

50. Ibid., p. 105. He refers to the painters as "Palestinian artists" on p. 104, but he does not explicitly use the term "Crusader artists" or "Crusader art."

51. K. Weitzmann, "Thirteenth Century Crusader Icons on Mount Sinai," [1 (1963)] pp. 180–4.

52. Ibid., p. 182.

53. Ch. J. M. de Vogüé, *Les Eglises de la Terre Sainte*, Paris, 1860, rpt. Toronto and Buffalo, 1973.

54. H. Vincent and F.-M. Abel, *Jérusalem: Recherches de topographie, d'archéologie et d'histoire*, vol. II, Paris, fasc. I–II, 1914, fasc. III, 1922, fasc. IV, 1926.

55. C. Enlart, *Les Monuments des croisés dans le royaume de jérusalem: Architecture religieuse et civile*, Bibliothèque archéologique et historique, vol. VII, VIII, and atlas, Paris, text, vol. 1, 1925, vol. 2, 1928; atlas in two albums.

56. P. Deschamps, *Les Châteaux des Croisés en Terre Sainte: Le Crac des Chevaliers*, Bibliothèque archéologique et historique, vol. XC with album, Paris, 1934; idem, *La Défense du Royaume de Jérusalem*, Bibliothèque archéologique et historique, vol. XXXIV with album, Paris, 1939; idem, *La Défense du Comté de Tripoli et de la Principauté d'Antioche*, Bibliothèque archéolgique et historique, vol. XC with album, Paris, 1973.

57. T. S. R. Boase, "The Arts in the Latin Kingdom of Jerusalem," *Journal of the Warburg and Courtauld Institutes*, 2 (1938–9), p. 11. He continued this line of thought, somewhat modified, in idem, "Ecclesiastical Art in the Crusader States in Palestine and Syria, A. Architecture and Sculpture," *HC*, 4, pp. 102–5.

Boase was followed by Alan Borg, "Romanesque Sculpture from the Rhone Valley to the Jordan Valley," in J. Folda (ed.), *Crusader Art*, pp. 97–119, who argued for a further precision in seeing Vienne as the source for both Plaimpied and Nazareth. In any case, the view that the Nazareth sculptor(s) was French is a strong one stated by numerous scholars. Consult the works cited in Folda, *ACHL 1*, p. 593, n. 141.

58. Boase, "The Arts in the Latin Kingdom," p. 20, offers his important observation on the interchange as follows: "In sculpture, painting and architecture, the West and the East meet and effect exchanges in Palestine: there was also a similar interaction in literature."

59. Boase also remarks on the painter Basil, who signed the Deësis image in the Melisende Psalter (Boase, "The Arts in the Latin Kingdom," 14–15). Boase clearly suspects that Basil was an Easterner, but he never comes right out and says it.

On William of Tyre, see P. W. Edbury and J. G. Rowe, *William of Tyre: Historian of the Latin East*, Cambridge, 1988.

60. Boase, "The Arts in the Latin Kingdom," p. 15.

61. W. Harvey, *Church of the Holy Sepulchre, Jerusalem: Structural Survey, Final Report*, London, 1935.

62. *A History of the Crusades*, ed. K. M. Setton, vol. 4, *The Art and Architecture of the Crusader States*, ed. H. W. Hazard, London, 1977.

63. O. Demus, review of *A History of the Crusades*, vol. 4, in the *Art Bulletin*, 61 (1979), pp. 636–7.

64. In fact, since Demus was writing his review a great deal of work has been done on "Crusader sculpture" that clearly makes the phenomena of stone, ivory, and metal sculpture commissioned in the Latin Kingdom of Jerusalem much more intelligible as a Crusader artistic development compared to the bewildering diversity Demus and others found in early studies by Enlart and others. See, for example, the work of A. Borg, H. Buschhausen, J. Folda, L. Koetzsche, B. Kuhnel, Z. Jacoby, N. Kenaan-Kedar, V. Pace, and H. Plommer cited in J. Folda, *ACHL 1*, pp. 619–37.

65. H. Belting, "Zwischen Gotik und Byzanz," *Zeitschrift fur Kunstgeschichte*, 41 (1978), pp. 217–57.

66. Belting, "Zwischen Gotik und Byzanz," pp. 251–4. For the "lingua franca" as a linguistic phenomenon, see H. Kahane et al., *The Lingua Franca in the Levant*, Urbana, 1958.

67. H. Belting, "Introduction," and "Die Reaktion der Kunst des 13. Jahrhunderts auf den Import von Reliquien und Ikonen," in *Il Medio Oriente e l'Occidente nell'arte del XIII secolo*, Atti del XXIV Congresso Internazionale di Storia dell'Arte, vol. 2, Bologna, 1982, pp. 1–10, 35–53.

68. Belting, "Introduction," *Il Medio Oriente e l'Occidente nell'arte del XIII secolo*, p. 3.

69. "Il faudrait réserver l'expression 'Art-Croisé,' pour le 12e siècle. Son existence ne participe à la compréhension de l'art occidental qu'au niveau des idées et des programmes, et non à celui des formes et des techniques." Ibid., p. 1.

70. K. Weitzmann, "Crusader Icons and la 'Maniera greca,'" in *Il Medio Oriente e l'Occidente nell'arte del XIII secolo*, pp. 71–7; idem, "Crusader Icons and Maniera Greca," *Byzanz und der Westen*, Osterreichische Akademie der Wissenschaften, philosophische-historische Klasse, Sitzungsberichte, Bd. 432, Vienna, 1984, pp. 143–70.

71. Weitzmann, "Crusader Icons and Maniera Greca," pp. 143–4.

72. On the international style around 1400, see E. Panofsky, *Early Netherlandish Painting*, Cambridge, MA, 1953, vol. I, pp. 51–74; *L'Art europeen vers 1400*, 8th Exhibition of the Council of Europe, Vienna: Kunsthistorisches Museum, 1962; *The International Style: The Arts in Europe around 1400*, Baltimore: The Walters Art Gallery, 1962; and *Die Parler und der Schone Stil 1350–1400: Europaische Kunst unten den Luxemburgen*, Cologne, 1978, 5 vols.

73. On the art of Crete in the late medieval period and its parallels with the art of the Crusaders, see Robin Cormack, *Painting the Soul: Icons, Death Masks and Shrouds*, London, 1997, pp. 170–217. On the dynamics of East–West interchange in the late medieval period on Crete, see also now M. Georgopoulou, *Venice's Mediterranean Colonies: Architecture and Urbanism*, New York, 2001.

74. The most recent reference to the Wilton Diptych is found in the catalogue of the exhibition at the Victoria and Albert Museum, *Gothic: Art for England 1400–1547*, eds. R. Marks and P. Williamson, London and New York, 2003, pp. 16, 17. Another recent article proposes to identify new iconography. See D. Gordon, "A New Discovery in the Wilton Diptych," *Burlington Magazine*, 134 (1992), pp. 662–7. Otherwise, see P. Tudor-Craig, "Panel Painting," *The Age of Chivalry: Art in Plantagenet England, 1200–1400*, eds. J. Alexander and P. Binski, London, 1987, pp. 134–6.

Valentino Pace is one scholar who has discussed these issues. See "L'analisi 'stilistica' come metodologia storica: possibilita e limiti con particolare riferimento alle icone 'crociate'," *Artistes, Artisans et Production Artistique au Moyen Age*, ed. X. Barral i Altet, vol. III, Paris; 1990, pp. 513–23; idem, "Fra la maniera greca e la lingua franca," *Il Classicismo Medioevo, Rinascimento, Barocco, Atti del Colloquio Cesare Gnudi*, Bologna, 1993, pp. 71–81.

75. This same position is adopted by Bianca Kühnel for the twelfth century, *Crusader Art of the Twelfth Century*, pp. 164–8.

76. Marie Luise Bulst-Thiele, "Die Mosaiken der 'Auferstehungskirche' in Jerusalem und die Bauten der 'Franken' im 12. Jahrhundert," *Frühmittelalterliche Studien*, 13 (1979), pp. 442–71. The "Einfuhrung" is found on pp. 442–6.

77. Bulst-Thiele, "Die Mosaiken," p. 442. She quotes the entire passage consisting of fourteen lines in her German text. I only quote the well-known introductory lines here.

78. I have discussed this passage by Fulcher of Chartres in Folda, *ACHL 1*, pp. 86–7. The content of the entire passage and its purpose must be taken into account.

79. Buchthal, *MPLKJ*, 1–14, and Folda, *ACHL 1*, pp. 137–59.

80. See my remarks on this problem: J. Folda, "Reflections on Art in Crusader Jerusalem about the Time of the Second Crusade: c. 1140–c. 1150," *The Second Crusade and the Cistercians*, ed. M. Gervers, New York, 1992, pp. 171–82.

81. The only major proposal heretofore was the Riccardiana Psalter said to be commissioned by Frederick II for his third wife, Isabel of England. See Buchthal, *MPLKJ*, pp. 39–46. However, that interpretation seems untenable, see Chapter 5, and the issue is far from solved; it is possible that this luxury psalter was done for Isabella of Brienne, the second wife of Frederick II, in Acre, commissioned by her father or a close associate for the bride-to-be.

82. See our discussion in Chapter 6.

83. R. Cormack and S. Mihalarias, "A Crusader painting of St George: 'Maniera Greca' or 'Lingua Franca'?", *Burlington Magazine*, 126 (1984), p. 132.

84. Weitzmann, "Icon Painting in the Crusader Kingdom," [3, (1966)], p. 61.

85. Pace had already begun the discussion of Crusader styles as related to Italian art in an earlier article. See V. Pace, "Italy and the Holy Land: Import-Export, 2. The Case of Apulia," in Folda (ed.), *Crusader Art*, pp. 245–469.

86. V. Pace, "Italy and the Holy Land: Import-Export, 1. The Case of Venice," *The Meeting of Two Worlds: Cultural Exchange between East and West during the Period of the Crusades*, eds. V. P. Goss and C. V. Bornstein, Kalamazoo, 1986, p. 334.

87. Weitzmann, "Thirteenth Century Crusader Icons on Mount Sinai," [1 (1963)], p. 182.

88. P. Edbury, "The Latin East, 1291–1669," *Oxford Illustrated History of the Crusades*, ed. J. Riley-Smith, Oxford, 1997, p. 295.

89. J. Prawer, *The Latin Kingdom of Jerusalem: European Colonialism in the Middle Ages*, London, 1972.

90. J. Phillips, "The Latin East, 1098–1291," *Oxford Illustrated History of the Crusades*, ed. J. Riley-Smith, Oxford, 1997, p. 112.

91. J. Riley-Smith, "Government and the Indigenous in the Latin Kingdom of Jerusalem," *Medieval Frontiers*, p. 121.

92. See my comments on the issue of Crusader art as a colonial art in the conclusion to my study of the art of the Crusaders in the twelfth century: Folda, *ACHL 1*, pp. 474–8.

93. V. Pace, "I capitelli di Nazareth e la scultura 'franca' del XII secolo a Gerusalemme," *Scritti di storia dell'arte in onore di Roberto Salvini*, Florence, 1984, pp. 87–95. Pace contrasts the Nazareth Capitals with French *comparanda* in style.

94. See the discussion of American colonial art and these two monuments in the following works, among others: J. Wilmerding, *American Art*, Harmondsworth, 1976, pp. 3–44, esp. 17–8; D. P. Handlin, *American Architecture*, London, 1985, pp. 9–38, esp. pp. 18–19 and Fig. 11; and M. W. Brown, *American Art to 1900*, New York, 1977, pp. 22–3, 33, 35.

95. Buchthal, *MPLKJ*, pp. 64–5.

96. Folda, *ACHL 1*, p. 478 for the quote, and pp. 474–80, and p. 603 n. 4 for the full discussion.

97. See our discussion in Chapters 7 and 8. See also the recent publications on the newly discovered manuscripts by this master and his new name: Folda, "The Figural Arts in Crusader Syria and Palestine, 1187–1291: Some New Realities," *Dumbarton Oaks Papers*, 58 (2005) (forthcoming); idem, "The Hospitaller Master in Paris and Acre: Some Reconsiderations in Light of New Evidence," *Journal of the Walters Art Gallery*, 54 (1996), pp. 51–9, 269–72; idem, "Two Thirteenth-Century Manuscripts of Crusader Legal Texts from Saint-Jean d'Acre," *Journal of the Warburg and Courtauld Institutes*, 57 (1994), pp. 243–54; and idem, "Paris, Bibliothèque Nationale, MS lat. 5334 and the Origins of the Hospitaller Master," *Montjoie*, pp. 177–87.

98. See n. 57 for citation of the works by Boase and Borg, and nn. 53–6 for citations of the older French scholars.

99. D. Mouriki, "Thirteenth-Century Icon Painting in Cyprus," *The Griffon*, nos. 1–2 (1985–6), Athens, the Gennadius Library, 1986, pp. 9–112, and idem, "Icons from the 12th to the 15th Century," *Sinai: Treasures of the Monastery of St. Catherine*, ed. K. A. Manafis, Athens, 1990, pp. 102–24, esp. 108–20.

100. Mouriki, "Thirteenth-Century Icon Painting," p. 83, Fig. 6, and p. 112, Figs. 62 and 63, respectively. The two St. Sergios icons were first published by G. and M. Sotiriou, *Icones du Mont Sinai* (Athens: Institut francais d'Athenes, vol. 1, 1956, vol. 2, 1958), 2, p. 171, and 1, Fig. 187 (St. Sergios), and 2, p. 170, and 1, Fig. 185 (Sts. Sergios and Bacchus). The icon of Sts. Sergios and Bacchus is a bilateral icon with an image of the Virgin Hodegetria on the other side.

101. Weitzmann, "Icon Painting in the Crusader Kingdom," [3 (1966)], pp. 71–3, Fig. 49. See also idem, *The Icon*, [11 (1982)], pp. 206, 232, and idem, "Crusader Icons and Maniera Greca," [14 (1984)], pp. 148–9, Fig. 4.

Weitzmann, "Annotation (1980)," *Studies in the Arts at Sinai*, p. 435 (p. 72), reaffirms his attribution of the artist to Apulia by revising the name of the "Master of the Knights Templars" simply to Apulian or South Italian painters. (In our discussion earlier in Chapter 6 we further proposed to rename these artists to "the Workshop of the Soldier Saints.") In suggesting thereby the idea of a Crusader workshop with several artists, he is close to the position taken by V. Pace, "Italy and the Holy Land: Import-Export, 2. The Case of Apulia," Folda, ed., *Crusader Art*, pp. 245–9.

102. Mouriki, "Thirteenth-Century Icon Painting," pp. 66–71.

103. Lucy-Anne Hunt, "A Woman's Prayer to St Sergios in Latin Syria: Interpreting a Thirteenth-Century Icon at Mount Sinai," *Byzantine and Modern Greek Studies*, 15 (1991), pp. 96–124, esp. 106–10.

104. G. and M. Sotiriou, *Icones du Mont Sinai*, Collection de l'Institut Francais d'Athenes, 102, vol. 2, Athens, 1958, p. 171.

105. Mouriki, "Thirteenth-Century Icon Painting," p. 77.

106. See, for example, A. Weyl Carr, "East, West, and Icons in Twelfth-Century Outremer," *The Meeting of Two Worlds: Cultural Exchange between East and West during the Period of the Crusades*, eds. V. Goss and C. V. Bornstein, Kalamazoo, 1986, pp. 347–59, and idem, "Correlative Spaces: Art, Identity, and Appropriation in Lusignan Cyprus," *Modern Greek Studies Yearbook*, Minneapolis, 14/15 (1998/9), pp. 59–80. See also L.-A. Hunt, "Art and Colonialism: The Mosaics of the Church of the Nativity, Bethlehem (1169), and the Problem of 'Crusader' Art," *Dumbarton Oaks Papers*, 45 (1991), pp. 69–85, and B. Kühnel, *Crusader Art of the Twelfth Century*, Berlin, 1994. Also see Cormack, *Painting the Soul*, pp. 167–217.

107. Kühnel, *Crusader Art of the Twelfth Century*, p. 167.

108. Ibid., p. 168.

109. Hunt, "Art and Colonialism," p. 69.

110. Ibid., p. 85.

111. A. Weyl Carr, "Images of Medieval Cyprus," *Visitors, Immigrants, and Invaders in Cyprus*, ed. P. W. Wallace, Albany, 1995, pp. 97–8.

112. Crusader Gothic art started on Cyprus in architecture much earlier in the century, but the traditional multicultural Crusader style only really emerges there in the decade before 1291 at the earliest, depending on when we date the two major icon/altarpieces that exemplify this work. See Folda, "Crusader Art in the Kingdom of Cyprus, c. 1275–1291," pp. 211–22.

113. A.Weyl Carr, "Art in the Court of the Lusignan Kings," p. 243.

114. A. Weyl Carr, "Icon-Tact: Byzantium and the Art of Cilician Armenia," *Treasures in Heaven, Armenian Art, Religion, and Society*, Symposium papers, eds. T. Mathews and R. Wieck, New York, 1996, pp. 74, 75 Fig. 1, 98, and 102.

115. Cormack and Mihalarias, "A Crusader Painting of St George: 'Maniera Greca' or 'Lingua Franca,'" p. 132.

116. Cormack, *Painting the Soul*, pp. 176–87. My remarks are based directly on Cormack's text on the pages cited, but the interpretation of the possible usefulness and relevance of this important study of Cretan icons and archives for the study of Crusader art is my extension of Cormack's discussion.

Another important scholar who was working on the icon painting of Crete is the late George Galavaris. We look forward to the publication of his work on this material.

136. For Cyprus, see especially the works of C. Enlart, *Gothic Art and the Renaissance in Cyprus*, trans. and ed. D. Hunt, London 1966; D. Mouriki, "Thirteenth-Century Icon Painting in Cyprus," *The Griffon*, nos. 1–2 (1985–6), pp. 9–112; and A.Weyl Carr, "Art in the Court of the Lusignan Kings," *Cyprus and the Crusades*, eds. N. Coureas and J. Riley-Smith, Nicosia, 1995, pp. 239–74, as well as that of the present author, J. Folda, "Crusader Art in the Kingdom of Cyprus, 1275–1291: Reflections on the State of the Question," *Cyprus and the Crusades*, pp. 209–37.

For Armenian art see the various works of S. Der Nersessian, especially S. Der Nersessian and S. Agemian, *Miniature Painting in the Armenian Kingdom of Cilicia from the Twelfth to the Fourteenth Century*, Dumbarton Oaks Studies, 31, Washington, DC, 1993.

137. C. L. Striker and D. G. Kuban, *Kalenderhane Camii in Istanbul, the Buildings, Their History, Architecture and Decoration: Final Reports on the Archeological Exploration and Restoration at Kalenderhane Camii, 1966–1978*, Mainz, 1997. A recent M.A. thesis at the University of North Carolina at Chapel Hill by E. W. Winsor, "Preaching to Byzantium: Constantinople, the Friars Minor and the Latin Empire; Reconsidering the Frescos at Kalenderhane Camii," 2002, has raised a number of questions about Frankish art in Constantinople during the Latin Empire.

138. An important study on fresco painting in the Frankish Morea addresses certain issues relevant to the whole eastern Mediterranean region; see S. Gerstel, "Art and Identity in the Medieval Morea, *The Crusades from the Perspective of Byzantium and the Muslim World*, eds. A. E. Laiou and R. P. Mottahedeh, Washington, DC, 2001, pp. 263–85.

139. On fresco painting in the Lebanon, including work by Maronite artists, we now have E. C. Dodd, *Medieval Painting in the Lebanon*, Wiesbaden, 2004. For Melkite and Syriac artists we have valuable studies by L.-A. Hunt and L. Doumato. See L.-A. Hunt, "Manuscript Production by Christians in 13th–14th Century Greater Syria and Mesopotamia and Related Areas," *ARAM*, 9 & 10 (1997–8), pp. 289–336, and idem, "Christian Art in Greater Syria and Egypt: A Triptych of the Ascension with Military Saints Reattributed," *Al-Masaq*, 12 (2000), pp. 1–36, and L. Doumato, "The Art of Bishop Dioscorus Theodorus: Interpreting Syriac Miniatures in the Crusader East," *Arte Cristiana*, 87 (1999), pp. 245–60.

140. Folda, *Crusader Manuscript Illumination*, pp. 117–58.

141. Ibid., pp. 120–8.

142. Ibid., pp. 142–8.

143. Buchthal, *MPLKJ*, p. 70.

144. Folda, *Crusader Manuscript Illumination*, pp. 129–30.

145. Ibid., pp. 128–38.

146. Ibid., pp. 148–51, 155–8.

147. Ibid., pp. 152–5, 158.

148. S. Schein, *Fideles Crucis, The Papacy, the West and the Recovery of the Holy Land, 1274–1314*, Oxford, 1991, pp. 74–180, and N. Housley, *The Later Crusades, 1274–1580, from Lyons to Alcazar*, Oxford, 1992, pp. 22–30.

149. On these treatises, see Schein, *Fideles Crucis*, pp. 181 ff., esp. 200–18, and Housley, *The Later Crusades*, pp. 23–4, 36–7.

150. Schein, *Fideles Crucis*, pp. 171–5; Housley, *The Later Crusades*, pp. 21–4.

151. H. Nicholson, *The Knights Templar, a New History*, Phoenix Mill, pp. 230–3.

152. Ibid., pp. 221, 223, and M. Barber, *The New Knighthood, a History of the Order of the Temple*, Cambridge, 1994, pp. 280–313.

153. Malcolm Barber cites the following story as an example:

> In about 1340 Ludolph of Sudheim, a German priest on a pilgrimage to the Holy Land, came upon two elderly men on the shores of the Dead Sea. He entered into conversation with them and discovered that they were former Templars, captured when the city of Acre had fallen to the Mamluks in May 1291, who had since then been living in the mountains, cut off from all communication with Latin

Christendom. They had wives and children and had survived by working in the sultan's service; they had no idea that the Order of the Temple had been suppressed in 1312 and that the Grand Master had been burnt to death as a relapsed heretic two years later. The men were from Burgundy and Toulouse and, within a year, were repatriated, together with their families. Despite the scandal of the suppression, they were honourably received at the papal court, and were allowed to live out the remainder of their existence in peace (Barber, *The New Knighthood*, p. 1).

154. "Throughout the trial Clement had insisted that the Templar estates should be conserved for the benefit of the crusade to regain the Holy Land. By the time of [the council of] Vienne the Pope had come to favour their cession to the Hospitallers. Clement's determination to pursue this path, despite the opposition of many cardinals, most of the prelates at the Council, and Philip the Fair, forms one of the several extraordinary and unexplained aspects of the trial" (Housley, *The Later Crusades*, p. 213).

Crusader Art in the Holy Land, from the Third Crusade to the fall of Acre: 1187–1291

Bibliographic Addendum:

During 2004 scholars commemorated the 800th anniversary of the Fourth Crusade and the founding of the Latin Empire in a series of conferences and symposia held in the United States, Athens, Istanbul, and elsewhere. I wish to draw the reader's attention to the eventual publication of the papers of these scholarly meetings which will appear in due course, and which will contain much material of direct relevance to the discussion contained in this book.

In August of 2004, when this book went into production by Cambridge University Press, a number of new books had appeared over the immediately preceeding months – including two books on the Fourth Crusade – which I had either not been able to use for my study, or was able to use, in most cases only partially, based on typescripts and/or proofs which the various authors had kindly sent me prior to the publication of their work. I am listing these new publications below as being directly relevant to the content of this book, for the information of the reader:

Michael Angold, *The Fourth Crusade: Event and Context*, Harlow: Pearson Longman, 2003.

Paul Crawford, ed., *The 'Templar of Tyre', Part III of the 'Deeds of the Cypriots', Crusade Texts in Translation*, Aldershot and Burlington: Ashgate, 2003.

Erica Cruikshank Dodd, *Medieval Painting in the Lebanon*, photographs by Raif Nassif, Syriac inscriptions by Amir Harrak, and architectural plans by George Michell and JeanYasmine, *Sprachen und Kulturen des christlichen Orients*, vol. 8, Wiesbaden: Reichert Verlag, 2004.

Christina Dondi, *The Liturgy of the Canons Regular of the Holy Sepulchre of Jerusalem: A Study and a Catalogue of the Manuscript Sources*, Bibliotheca Victorina, 16, Turnhout: Brepols, 2004.

Peter W. Edbury, ed., *John of Ibelin, Le Livre des Assises, The Medieval Mediterranean: Peoples, Economies and Cultures, 400–1500*, vol. 50, Leiden and Boston: Brill, 2003.

Anastasia Drandaki, ed., *Pilgrimage to Sinai: Treasures from the Holy Monastery of Saint Catherine*, Athens: Benaki Museum, 2004, with a very interesting essay – in Greek with an English translation – by Titos Papamastorakis, "The 'Crusader' Icons in the Exhibition," pp. 46–63.

Helen C. Evans, ed., *Byzantium: Faith and Power (1261–1557)*, New York: The Metropolitan Museum of Art, New Haven and London, Yale University Press, 2004.

Helen C. Evans, *Saint Catherine's Monastery, Sinai, Egypt: A Photographic Essay*, Photographs by Bruce White, New York: Metropolitan Museum of Art, 2004.

Hans-Jürgen Kotzur, ed., *Die Kreuzzüge*, Mainz am Rhein, Verlag Philipp von Zabern, 2004, catalogue for an exhibition at the Bischöflichen Dom- und Diözesan-museums, Mainz.

Inna Mokretsova, et al., eds., *Materials and Techniques of Byzantine Manuscripts*, [in Russian with English translation], Moscow: Indrik, 2003.

Jonathan Phillips, *The Fourth Crusade and the Sack of Constantinople*, London: Jonathan Cape, 2004.

Christopher Walter, *The Warrior Saints in Byzantine Art and Tradition*, Aldershot and Burlington, Ashgate, 2003.

Daniel H. Weiss and Lisa Mahoney, eds., *France and the Holy Land: Frankish Culture at the End of the Crusades*, Baltimore and London, The Johns Hopkins University Press, 2004.

Finally, I wish to remind readers that the final volume of Denys Pringle's important work is also in progress and will be forthcoming: R. Denys Pringle, *The Churches of the Crusader Kingdom of Jerusalem: A Corpus*, vol. III, Cambridge: Cambridge University Press, forthcoming. Volume III will deal with Acre, Jerusalem, and Tyre.

Readers who wish to continue to update the bibliography in this volume may consult the *Bulletin* of the Society for the Study of the Crusades and the Latin East, now published annually in the journal, *Crusades*, for which volume 3, 2004, has appeared. There are also the relevant sections in the bibliographical supplements published regularly in the *Byzantinische Zeitschrift*.
